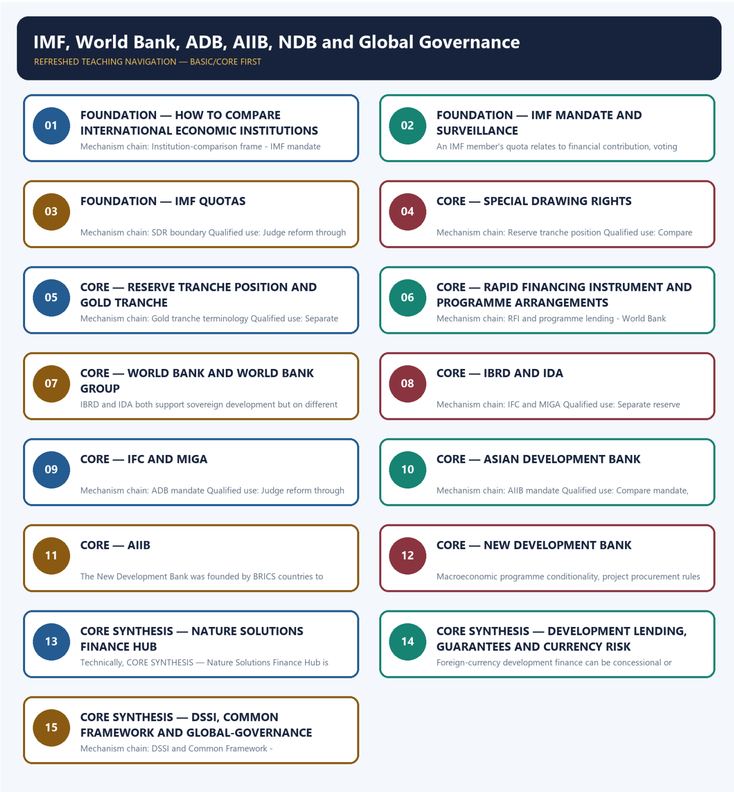
SOLVED PRACTICE WORKBOOK

IMF, World Bank, ADB, AIIB, NDB and Global Governance - Solved Practice Workbook

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing



Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

IMF, World Bank, ADB, AIIB, NDB and Global Governance - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Institution-comparison frame?

A. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. B. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. C. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. D. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan.

Answer: A. Explanation: International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q2. Which option preserves the accounting or regulatory boundary of Institution-comparison frame?

A. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. B. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. C. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. D. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan.

Answer: B. Explanation: International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q3. Which statement uses Institution-comparison frame without losing its vintage, basket or legal status?

A. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. B. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. C. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. D. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan.

Answer: C. Explanation: International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q4. Which option avoids the standard UPSC close-option trap about Institution-comparison frame?

A. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. B. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. C. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. D. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance.

Answer: D. Explanation: International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q5. Which statement correctly identifies IMF mandate?

A. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. B. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. C. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. D. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source.

Answer: A. Explanation: The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q6. Which option preserves the accounting or regulatory boundary of IMF mandate?

A. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. B. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. C. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. D. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility.

Answer: B. Explanation: The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q7. Which statement uses IMF mandate without losing its vintage, basket or legal status?

A. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. B. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. C. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. D. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing.

Answer: C. Explanation: The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q8. Which option avoids the standard UPSC close-option trap about IMF mandate?

A. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. B. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. C. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. D. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction.

Answer: D. Explanation: The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q9. Which statement correctly identifies IMF quota functions?

A. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. B. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. C. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. D. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan.

Answer: A. Explanation: An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q10. Which option preserves the accounting or regulatory boundary of IMF quota functions?

A. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. B. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. C. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. D. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews.

Answer: B. Explanation: An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q11. Which statement uses IMF quota functions without losing its vintage, basket or legal status?

A. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. B. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. C. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. D. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility.

Answer: C. Explanation: An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q12. Which option avoids the standard UPSC close-option trap about IMF quota functions?

A. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. B. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. C. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. D. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source.

Answer: D. Explanation: An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal

perimeters.

Q13. Which statement correctly identifies SDR boundary?

A. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. B. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. C. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. D. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing.

Answer: A. Explanation: A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q14. Which option preserves the accounting or regulatory boundary of SDR boundary?

A. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. B. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. C. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. D. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates.

Answer: B. Explanation: A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q15. Which statement uses SDR boundary without losing its vintage, basket or legal status?

A. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. B. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. C. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. D. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows.

Answer: C. Explanation: A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q16. Which option avoids the standard UPSC close-option trap about SDR boundary?

A. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. B. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. C. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. D. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan.

Answer: D. Explanation: A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q17. Which statement correctly identifies Reserve tranche position?

A. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. B. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. C. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. D. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility.

Answer: A. Explanation: A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q18. Which option preserves the accounting or regulatory boundary of Reserve tranche position?

A. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. B. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. C. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. D. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews.

Answer: B. Explanation: A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q19. Which statement uses Reserve tranche position without losing its vintage, basket or legal status?

A. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. B. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. C. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. D. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates.

Answer: C. Explanation: A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q20. Which option avoids the standard UPSC close-option trap about Reserve tranche position?

A. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. B. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. C. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. D. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing.

Answer: D. Explanation: A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q21. Which statement correctly identifies Gold tranche terminology?

A. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. B. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. C. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. D. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates.

Answer: A. Explanation: Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q22. Which option preserves the accounting or regulatory boundary of Gold tranche terminology?

A. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. B. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. C. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. D. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates.

Answer: B. Explanation: Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q23. Which statement uses Gold tranche terminology without losing its vintage, basket or legal status?

A. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. B. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. C. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. D. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window.

Answer: C. Explanation: Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q24. Which option avoids the standard UPSC close-option trap about Gold tranche terminology?

A. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. B. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. C. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. D. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility.

Answer: D. Explanation: Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q25. Which statement correctly identifies RFI and programme lending?

A. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. B. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. C. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. D. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window.

Answer: A. Explanation: The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q26. Which option preserves the accounting or regulatory boundary of RFI and programme lending?

A. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. B. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. C. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. D. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows.

Answer: B. Explanation: The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q27. Which statement uses RFI and programme lending without losing its vintage, basket or legal status?

A. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. B. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. C. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. D. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source.

Answer: C. Explanation: The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q28. Which option avoids the standard UPSC close-option trap about RFI and programme lending?

A. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. B. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. C. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. D. The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews.

Answer: D. Explanation: The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q29. Which statement correctly identifies World Bank boundary?

A. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. B. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. C. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. D. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations.

Answer: A. Explanation: The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q30. Which option preserves the accounting or regulatory boundary of World Bank boundary?

A. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. B. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. C. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. D. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source.

Answer: B. Explanation: The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q31. Which statement uses World Bank boundary without losing its vintage, basket or legal status?

A. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. B. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. C. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. D. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source.

Answer: C. Explanation: The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q32. Which option avoids the standard UPSC close-option trap about World Bank boundary?

A. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. B. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. C. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. D. The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates.

Answer: D. Explanation: The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q33. Which statement correctly identifies IBRD and IDA?

A. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. B. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. C. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. D. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window.

Answer: A. Explanation: IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q34. Which option preserves the accounting or regulatory boundary of IBRD and IDA?

A. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. B. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. C. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. D. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source.

Answer: B. Explanation: IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q35. Which statement uses IBRD and IDA without losing its vintage, basket or legal status?

A. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. B. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. C. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. D. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source.

Answer: C. Explanation: IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q36. Which option avoids the standard UPSC close-option trap about IBRD and IDA?

A. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. B. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. C. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. D. IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows.

Answer: D. Explanation: IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q37. Which statement correctly identifies IFC and MIGA?

A. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. B. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. C. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. D. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations.

Answer: A. Explanation: IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q38. Which option preserves the accounting or regulatory boundary of IFC and MIGA?

A. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. B. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. C. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. D. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source.

Answer: B. Explanation: IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q39. Which statement uses IFC and MIGA without losing its vintage, basket or legal status?

A. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. B. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. C. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. D. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source.

Answer: C. Explanation: IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q40. Which option avoids the standard UPSC close-option trap about IFC and MIGA?

A. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. B. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. C. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. D. IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window.

Answer: D. Explanation: IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q41. Which statement correctly identifies ADB mandate?

A. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. B. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. C. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. D. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source.

Answer: A. Explanation: The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q42. Which option preserves the accounting or regulatory boundary of ADB mandate?

A. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. B. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. C. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. D. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies.

Answer: B. Explanation: The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q43. Which statement uses ADB mandate without losing its vintage, basket or legal status?

A. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. B. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. C. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. D. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition.

Answer: C. Explanation: The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q44. Which option avoids the standard UPSC close-option trap about ADB mandate?

A. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. B. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. C. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. D. The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations.

Answer: D. Explanation: The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q45. Which statement correctly identifies AIIB mandate?

A. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. B. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. C. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. D. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition.

Answer: A. Explanation: The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q46. Which option preserves the accounting or regulatory boundary of AIIB mandate?

A. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. B. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. C. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. D. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source.

Answer: B. Explanation: The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q47. Which statement uses AIIB mandate without losing its vintage, basket or legal status?

A. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. B. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. C. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. D. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ.

Answer: C. Explanation: The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q48. Which option avoids the standard UPSC close-option trap about AIIB mandate?

A. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. B. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. C. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. D. The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source.

Answer: D. Explanation: The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q49. Which statement correctly identifies NDB mandate?

A. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. B. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. C. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. D. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ.

Answer: A. Explanation: The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q50. Which option preserves the accounting or regulatory boundary of NDB mandate?

A. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. B. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. C. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. D. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ.

Answer: B. Explanation: The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q51. Which statement uses NDB mandate without losing its vintage, basket or legal status?

A. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. B. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. C. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. D. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency.

Answer: C. Explanation: The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q52. Which option avoids the standard UPSC close-option trap about NDB mandate?

A. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. B. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. C. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. D. The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies.

Answer: D. Explanation: The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q53. Which statement correctly identifies Nature Solutions Finance Hub?

A. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. B. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. C. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. D. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ.

Answer: A. Explanation: The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q54. Which option preserves the accounting or regulatory boundary of Nature Solutions Finance Hub?

A. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. B. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. C. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. D. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency.

Answer: B. Explanation: The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q55. Which statement uses Nature Solutions Finance Hub without losing its vintage, basket or legal status?

A. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. B. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. C. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. D. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk.

Answer: C. Explanation: The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q56. Which option avoids the standard UPSC close-option trap about Nature Solutions Finance Hub?

A. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. B. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. C. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. D. The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source.

Answer: D. Explanation: The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q57. Which statement correctly identifies Conditionality and safeguards?

A. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. B. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. C. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. D. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk.

Answer: A. Explanation: Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q58. Which option preserves the accounting or regulatory boundary of Conditionality and safeguards?

A. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. B. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. C. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. D. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk.

Answer: B. Explanation: Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q59. Which statement uses Conditionality and safeguards without losing its vintage, basket or legal status?

A. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. B. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. C. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. D. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency.

Answer: C. Explanation: Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q60. Which option avoids the standard UPSC close-option trap about Conditionality and safeguards?

A. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. B. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. C. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. D. Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition.

Answer: D. Explanation: Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q61. Which statement correctly identifies Project and policy-based lending?

A. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. B. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. C. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. D. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk.

Answer: A. Explanation: Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q62. Which option preserves the accounting or regulatory boundary of Project and policy-based lending?

A. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. B. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. C. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. D. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency.

Answer: B. Explanation: Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q63. Which statement uses Project and policy-based lending without losing its vintage, basket or legal status?

A. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. B. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. C. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. D. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension.

Answer: C. Explanation: Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q64. Which option avoids the standard UPSC close-option trap about Project and policy-based lending?

A. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. B. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. C. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. D. Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ.

Answer: D. Explanation: Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q65. Which statement correctly identifies Guarantees and co-financing?

A. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. B. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. C. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. D. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit.

Answer: A. Explanation: A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q66. Which option preserves the accounting or regulatory boundary of Guarantees and co-financing?

A. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. B. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. C. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. D. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit.

Answer: B. Explanation: A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q67. Which statement uses Guarantees and co-financing without losing its vintage, basket or legal status?

A. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. B. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. C. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. D. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction.

Answer: C. Explanation: A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q68. Which option avoids the standard UPSC close-option trap about Guarantees and co-financing?

A. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. B. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. C. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. D. A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk.

Answer: D. Explanation: A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. The other options belong to

different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q69. Which statement correctly identifies Currency-risk boundary?

A. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. B. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. C. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. D. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance.

Answer: A. Explanation: Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q70. Which option preserves the accounting or regulatory boundary of Currency-risk boundary?

A. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. B. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. C. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. D. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction.

Answer: B. Explanation: Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q71. Which statement uses Currency-risk boundary without losing its vintage, basket or legal status?

A. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. B. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. C. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. D. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source.

Answer: C. Explanation: Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q72. Which option avoids the standard UPSC close-option trap about Currency-risk boundary?

A. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. B. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. C. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. D. Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency.

Answer: D. Explanation: Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q73. Which statement correctly identifies DSSI and Common Framework?

A. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. B. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. C. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. D. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance.

Answer: A. Explanation: The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q74. Which option preserves the accounting or regulatory boundary of DSSI and Common Framework?

A. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. B. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. C. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. D. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source.

Answer: B. Explanation: The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q75. Which statement uses DSSI and Common Framework without losing its vintage, basket or legal status?

A. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. B. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. C. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. D. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source.

Answer: C. Explanation: The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q76. Which option avoids the standard UPSC close-option trap about DSSI and Common Framework?

A. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. B. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. C. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. D. The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension.

Answer: D. Explanation: The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q77. Which statement correctly identifies Global-governance reform?

A. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. B. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. C. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. D. International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance.

Answer: A. Explanation: Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q78. Which option preserves the accounting or regulatory boundary of Global-governance reform?

A. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. B. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. C. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. D. The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction.

Answer: B. Explanation: Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q79. Which statement uses Global-governance reform without losing its vintage, basket or legal status?

A. An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. B. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. C. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. D. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing.

Answer: C. Explanation: Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q80. Which option avoids the standard UPSC close-option trap about Global-governance reform?

A. A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. B. Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. C. A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. D. Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit.

Answer: D. Explanation: Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

PYQS AND ANSWER PRACTICE

TRANSPARENT OBJECTIVE-ONLY PYQ AUDIT

Audited Prelims ledgers route objective concepts on AIIB, the reserve or gold tranche, the Rapid Financing Instrument, the G20 Common Framework, ADB's Nature Solutions Finance Hub and IBRD. No direct Economy Mains demand is claimed and no objective answer letter is inferred.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- ANALYSIS: Use institution-matching questions to distinguish mandate, membership, instrument and governance.
- ANALYSIS: Apply the 2025 protectionism PYQ to explain why multilateral institutions face legitimacy and coordination pressures.
- ANALYSIS: 2025 Prelims: Launcher of the Nature Solutions Finance Hub for Asia and the Pacific - answer with ADB, COP28 (December 2023) and its blended-finance purpose above.

Recent PYQ Integration (2024-2025)

> **Status:** 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: `_PYQ-ROUTING-PRELIMS-2024-2025.md`. **Answer-key rule:** The official 2024-2025 Prelims Set-A keys are present in the repository and CSAT Set-A keys are supplied; even so, no option or answer is recorded or inferred in this integration.

- **Years represented:** 2025
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2025	Prelims GS-I	35	Launcher of the 'Nature Solutions Finance Hub for Asia and the Pacific' (ADB)	Objective question; official Set-A key available locally, answer not inferred	Key available locally (official Set-A answer key present); answer not recorded here	Cover the named fact/concept and its likely statement-level distinctions.
2025	Prelims GS-I	67	International Bank for Reconstruction and Development (IBRD)	Objective question; official Set-A key available locally, answer not inferred	Key available locally (official Set-A answer key present); answer not recorded here	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Launcher of the 'Nature Solutions Finance Hub for Asia and the Pacific' (ADB)

- International Bank for Reconstruction and Development (IBRD)

> This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

> **Status:** Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: `_PYQ-ROUTING-PRELIMS-2018-2023.md`. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2019, 2020, 2022
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 4

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2019	Prelims GS-I	71	Asian Infrastructure Investment Bank membership and shareholding	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2020	Prelims GS-I	17	Gold Tranche Reserve Tranche IMF credit system	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2022	Prelims GS-I	1	IMF Rapid Financing Instrument and Credit Facility	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2022	Prelims GS-I	4	G20 Common Framework for sovereign debt restructuring	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Asian Infrastructure Investment Bank membership and shareholding
- Gold Tranche Reserve Tranche IMF credit system
- IMF Rapid Financing Instrument and Credit Facility
- G20 Common Framework for sovereign debt restructuring

> The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- ANALYSIS: Use institution-matching questions to distinguish mandate, membership, instrument and governance.
- ANALYSIS: Apply the 2025 protectionism PYQ to explain why multilateral institutions face legitimacy and coordination pressures.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish SDRs, the reserve tranche position and IMF programme borrowing. Answer in about 150 words.

Model thesis: Claim: SDR boundary. **Named evidence/example:** A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Reserve tranche position. **Named evidence/example:** A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Gold tranche terminology. **Named evidence/example:** Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** RFI and programme lending. **Named evidence/example:** The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan.
- A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing.
- Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility.
- The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews.

Qualified conclusion: Claim: SDR boundary. **Named evidence/example:** A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Reserve tranche position. **Named evidence/example:** A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Gold tranche terminology. **Named evidence/example:** Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** RFI and programme lending. **Named evidence/example:** The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Demand decoding: The directive **answer** requires a direct position on "Distinguish SDRs, the reserve tranche position and IMF programme borrowing. Answer in about...", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: SDR boundary. **Named evidence/example:** A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Reserve tranche position. **Named evidence/example:** A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Gold tranche terminology. **Named evidence/example:** Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** RFI and programme lending. **Named evidence/example:** The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Analytical body:

1. **Claim and named evidence:** A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
2. **Claim and named evidence:** A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

3. **Claim and named evidence:** Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
4. **Claim and named evidence:** The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: Claim: SDR boundary. **Named evidence/example:** A Special Drawing Right is an IMF-created international reserve asset valued from a currency basket; it is neither retail currency, budget revenue nor automatically an IMF loan. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Reserve tranche position. **Named evidence/example:** A reserve tranche position is a member's liquid claim on the IMF arising from quota resources and is treated as a reserve asset; it is distinct from conditional programme borrowing. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Gold tranche terminology. **Named evidence/example:** Gold tranche is the historical name associated with what modern IMF usage calls the reserve tranche position, not an additional separate lending facility. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** RFI and programme lending. **Named evidence/example:** The Rapid Financing Instrument provides urgent balance-of-payments support with limited ex-post programme structure, while arrangements such as the SBA or EFF involve phased access and programme reviews. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "Distinguish SDRs, the reserve tranche position and IMF programme borrowing. Answer in about...", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Differentiate IBRD, IDA, IFC and MIGA by client and instrument. Answer in about 150 words.

Model thesis: Claim: World Bank boundary. **Named evidence/example:** The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IBRD and IDA. **Named evidence/example:** IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IFC and MIGA. **Named evidence/example:** IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates.
- IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows.
- IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window.

Qualified conclusion: Claim: World Bank boundary. **Named evidence/example:** The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IBRD and IDA. **Named evidence/example:** IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IFC and MIGA. **Named evidence/example:** IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Demand decoding: The directive **answer** requires a direct position on "Differentiate IBRD, IDA, IFC and MIGA by client and instrument. Answer in about 150 words.", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: World Bank boundary. **Named evidence/example:** The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IBRD and IDA. **Named evidence/example:** IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IFC and MIGA. **Named evidence/example:** IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Analytical body:

1. **Claim and named evidence:** The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
2. **Claim and named evidence:** IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
3. **Claim and named evidence:** IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: Claim: World Bank boundary. **Named evidence/example:** The term World Bank commonly refers to IBRD and IDA, while the World Bank Group also includes institutions with private-investment and guarantee mandates. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IBRD and IDA. **Named evidence/example:** IBRD and IDA both support sovereign development but on different eligibility and financing terms; they must not be presented as identical lending windows. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IFC and MIGA. **Named evidence/example:** IFC supports private-sector development through finance and mobilisation, while MIGA provides political-risk insurance or credit enhancement; neither is an IMF stabilisation window. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "Differentiate IBRD, IDA, IFC and MIGA by client and instrument. Answer in about 150 words.", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

ORIGINAL MAINS 3 - 15 MARKS

Question: Compare the IMF with multilateral development banks. Answer in about 250 words.

Model thesis: Claim: Institution-comparison frame. **Named evidence/example:** International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IMF mandate. **Named evidence/example:** The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** ADB mandate. **Named evidence/example:** The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** AIIB mandate. **Named evidence/example:** The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** NDB mandate. **Named evidence/example:** The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Conditionality and safeguards. **Named evidence/example:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance.
- The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction.
- The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations.
- The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source.
- The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies.
- Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition.

Qualified conclusion: Claim: Institution-comparison frame. **Named evidence/example:** International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IMF mandate. **Named evidence/example:** The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** ADB mandate. **Named evidence/example:** The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** AIIB mandate. **Named evidence/example:** The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** NDB mandate. **Named evidence/example:** The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Conditionality and safeguards. **Named evidence/example:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Demand decoding: The directive **compare** requires a direct position on "Compare the IMF with multilateral development banks. Answer in about 250 words.", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: Institution-comparison frame. **Named evidence/example:** International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IMF mandate. **Named evidence/example:** The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** ADB mandate. **Named evidence/example:** The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** AIIB mandate. **Named evidence/example:** The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** NDB mandate. **Named evidence/example:** The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Conditionality and safeguards. **Named evidence/example:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Analytical body:

1. **Claim and named evidence:** International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
2. **Claim and named evidence:** The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

3. **Claim and named evidence:** The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
4. **Claim and named evidence:** The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
5. **Claim and named evidence:** The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
6. **Claim and named evidence:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: Claim: Institution-comparison frame. **Named evidence/example:** International institutions must be compared by mandate, client, instrument, governance, conditionality and lending window rather than grouped as one pool of external finance. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** IMF mandate. **Named evidence/example:** The IMF supports monetary cooperation, surveillance and balance-of-payments financing; its core function is not long-lived project construction. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** ADB mandate. **Named evidence/example:** The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** AIIB mandate. **Named evidence/example:** The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** NDB mandate. **Named evidence/example:** The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Conditionality and safeguards. **Named evidence/example:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "Compare the IMF with multilateral development banks. Answer in about 250 words.", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

ORIGINAL MAINS 4 - 15 MARKS

Question: Why do project loans, policy-based loans and guarantees require different evaluation criteria? Answer in about 250 words.

Model thesis: Claim: Conditionality and safeguards. **Named evidence/example:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Project and policy-based lending. **Named evidence/example:** Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Guarantees and co-financing. **Named evidence/example:** A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition.
- Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ.
- A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk.

Qualified conclusion: Claim: Conditionality and safeguards. **Named evidence/example:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Project and policy-based lending. **Named evidence/example:** Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Guarantees and co-financing. **Named evidence/example:** A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Demand decoding: The directive **answer** requires a direct position on "Why do project loans, policy-based loans and guarantees require different evaluation...", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: Conditionality and safeguards. **Named evidence/example:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Project and policy-based lending. **Named evidence/example:** Project lending finances a bounded investment, while policy-based lending supports an agreed reform programme; disbursement conditions and evaluation units therefore differ. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Guarantees and co-financing. **Named evidence/example:** A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "Why do project loans, policy-based loans and guarantees require different evaluation...", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate the role of ADB, AIIB and NDB in a plural development-finance architecture. Answer in about 300 words.

Model thesis: Claim: ADB mandate. **Named evidence/example:** The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** AIIB mandate. **Named evidence/example:** The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** NDB mandate. **Named evidence/example:** The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Nature Solutions Finance Hub. **Named evidence/example:** The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Guarantees and co-financing. **Named evidence/example:** A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Currency-risk boundary. **Named evidence/example:** Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations.
- The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source.
- The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies.
- The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source.
- A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk.
- Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency.

Qualified conclusion: Claim: ADB mandate. **Named evidence/example:** The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** AIIB mandate. **Named evidence/example:** The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** NDB mandate. **Named evidence/example:** The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Nature Solutions Finance Hub. **Named evidence/example:** The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Guarantees and co-financing. **Named evidence/example:** A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Currency-risk boundary. **Named evidence/example:** Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Demand decoding: The directive **evaluate** requires a direct position on "Evaluate the role of ADB, AIIB and NDB in a plural development-finance architecture. Answer...", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: ADB mandate. **Named evidence/example:** The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** AIIB mandate. **Named evidence/example:** The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** NDB mandate. **Named evidence/example:** The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Nature Solutions Finance Hub. **Named evidence/example:** The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Guarantees and co-financing. **Named evidence/example:** A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Currency-risk boundary. **Named evidence/example:** Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Analytical body:

1. **Claim and named evidence:** The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
2. **Claim and named evidence:** The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
3. **Claim and named evidence:** The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
4. **Claim and named evidence:** The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
5. **Claim and named evidence:** A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect.

Qualification: State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

6. **Claim and named evidence:** Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: Claim: ADB mandate. **Named evidence/example:** The Asian Development Bank is a regional development bank serving Asia and the Pacific through sovereign, private-sector, knowledge and technical-assistance operations. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** AIIB mandate. **Named evidence/example:** The Asian Infrastructure Investment Bank is a multilateral development bank focused on sustainable infrastructure and connectivity; current membership or voting figures require a dated institutional source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** NDB mandate. **Named evidence/example:** The New Development Bank was founded by BRICS countries to mobilise resources for infrastructure and sustainable development in member emerging and developing economies. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Nature Solutions Finance Hub. **Named evidence/example:** The Nature Solutions Finance Hub for Asia and the Pacific is an ADB initiative, an audited 2025 Prelims concept; any current financing total or project count requires a dated ADB source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Guarantees and co-financing. **Named evidence/example:** A guarantee absorbs specified risks and co-financing combines institutions or financiers; neither means that one lender funds or bears every project risk. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Currency-risk boundary. **Named evidence/example:** Foreign-currency development finance can be concessional or long-term yet still create exchange-rate exposure for a borrower whose revenues are in domestic currency. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "Evaluate the role of ADB, AIIB and NDB in a plural development-finance architecture. Answer...", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: What reforms can improve representation and effectiveness in global economic governance? Answer in about 300 words.

Model thesis: Claim: IMF quota functions. **Named evidence/example:** An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Conditionality and safeguards. **Named evidence/example:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** DSSI and Common Framework. **Named evidence/example:** The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Global-governance reform. **Named evidence/example:** Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source.
- Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition.
- The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension.
- Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit.

Qualified conclusion: Claim: IMF quota functions. **Named evidence/example:** An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Conditionality and safeguards. **Named evidence/example:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** DSSI and Common Framework. **Named evidence/example:** The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Global-governance reform. **Named evidence/example:** Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Demand decoding: The directive **answer** requires a direct position on "What reforms can improve representation and effectiveness in global economic governance?...", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: IMF quota functions. **Named evidence/example:** An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Conditionality and safeguards. **Named evidence/example:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** DSSI and Common Framework. **Named evidence/example:** The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Global-governance reform. **Named evidence/example:** Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Analytical body:

1. **Claim and named evidence:** An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status,

source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

2. **Claim and named evidence:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
3. **Claim and named evidence:** The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
4. **Claim and named evidence:** Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: Claim: IMF quota functions. **Named evidence/example:** An IMF member's quota relates to financial contribution, voting power, access to resources and its share in general SDR allocations; the current numerical share requires a dated IMF source. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Conditionality and safeguards. **Named evidence/example:** Macroeconomic programme conditionality, project procurement rules and environmental-social safeguards serve different purposes and should not be collapsed into one generic lender condition. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** DSSI and Common Framework. **Named evidence/example:** The Debt Service Suspension Initiative temporarily deferred eligible official bilateral payments, while the G20 Common Framework aims at case-specific debt treatment beyond mere suspension. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Global-governance reform. **Named evidence/example:** Governance reform concerns voice, quota or shareholding representation, leadership, crisis resources, debt coordination and development additionality; creating a new bank does not by itself solve each deficit. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "What reforms can improve representation and effectiveness in global economic governance?...", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.
