India-Africa Development and Digital Partnership - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies What this India-Africa owner holds and how its boundaries are routed?

A. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. B. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. C. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. D. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point.

Answer: A. Explanation: This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q2. Which card should be filed under What this India-Africa owner holds and how its boundaries are routed in an International Relations answer?

A. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. B. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. C. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. D. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure.

Answer: B. Explanation: This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q3. Which option preserves the source-bounded meaning of What this India-Africa owner holds and how its boundaries are routed?

A. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. B. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. C. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. D. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point.

Answer: C. Explanation: This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q4. Which statement avoids a close-option trap about What this India-Africa owner holds and how its boundaries are routed?

A. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. B. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. C. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. D. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner.

Answer: D. Explanation: This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q5. Which statement correctly identifies The India-Africa Forum Summit cycle and its honest gap?

A. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. B. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. C. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. D. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states.

Answer: A. Explanation: The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African

Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.**

Q6. Which card should be filed under The India-Africa Forum Summit cycle and its honest gap in an International Relations answer?

A. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. B. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. C. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. D. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states.

Answer: B. Explanation: The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q7. Which option preserves the source-bounded meaning of The India-Africa Forum Summit cycle and its honest gap?

A. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. B. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. C. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. D. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure.

Answer: C. Explanation: The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q8. Which statement avoids a close-option trap about The India-Africa Forum Summit cycle and its honest gap?

A. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. B. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. C. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. D. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity.

Answer: D. Explanation: The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point

about the difference between programme continuity and political-architecture continuity. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q9. Which statement correctly identifies The capacity-building grant announced at the first summit?

A. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. B. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. C. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. D. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure.

Answer: A. Explanation: Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q10. Which card should be filed under The capacity-building grant announced at the first summit in an International Relations answer?

A. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. B. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. C. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications

Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. D. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states.

Answer: B. Explanation: Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q11. Which option preserves the source-bounded meaning of The capacity-building grant announced at the first summit?

A. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. B. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. C. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. D. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure.

Answer: C. Explanation: Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q12. Which statement avoids a close-option trap about The capacity-building grant announced at the first summit?

A. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. B. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. C. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. D. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure.

Answer: D. Explanation: Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q13. Which statement correctly identifies Training positions and the technical-cooperation boundary?

A. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. B. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. C. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. D. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states.

Answer: A. Explanation: Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q14. Which card should be filed under Training positions and the technical-cooperation boundary in an International Relations answer?

A. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. B. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. C. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. D. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current.

Answer: B. Explanation: Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q15. Which option preserves the source-bounded meaning of Training positions and the technical-cooperation boundary?

A. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. B. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. C. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. D. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification.

Answer: C. Explanation: Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q16. Which statement avoids a close-option trap about Training positions and the technical-cooperation boundary?

A. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. B. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. C. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. D. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point.

Answer: D. Explanation: Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q17. Which statement correctly identifies The nineteen jointly established institutions?

A. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. B. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. C. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. D. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current.

Answer: A. Explanation: Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage

across all fifty-four African states. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q18. Which card should be filed under The nineteen jointly established institutions in an International Relations answer?

A. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. B. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. C. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. D. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current.

Answer: B. Explanation: Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q19. Which option preserves the source-bounded meaning of The nineteen jointly established institutions?

A. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. B. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. C. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. D. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification.

Answer: C. Explanation: Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q20. Which statement avoids a close-option trap about The nineteen jointly established institutions?

A. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. B. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. C. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. D. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states.

Answer: D. Explanation: Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q21. Which statement correctly identifies African student mobility as a human-capital multiplier?

A. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. B. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. C. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. D. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification.

Answer: A. Explanation: Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q22. Which card should be filed under African student mobility as a human-capital multiplier in an International Relations answer?

A. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. B. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. C. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. D. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number.

Answer: B. Explanation: Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q23. Which option preserves the source-bounded meaning of African student mobility as a human-capital multiplier?

A. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. B. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. C. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. D. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification.

Answer: C. Explanation: Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q24. Which statement avoids a close-option trap about African student mobility as a human-capital multiplier?

A. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. B. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. C. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. D. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure.

Answer: D. Explanation: Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q25. Which statement correctly identifies The Pan African e-Network and its named successor?

A. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. B. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. C. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. D. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure.

Answer: A. Explanation: Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q26. Which card should be filed under The Pan African e-Network and its named successor in an International Relations answer?

A. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. B. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. C. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. D. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question.

Answer: B. Explanation: Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q27. Which option preserves the source-bounded meaning of The Pan African e-Network and its named successor?

A. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. B. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. C. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. D. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question.

Answer: C. Explanation: Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q28. Which statement avoids a close-option trap about The Pan African e-Network and its named successor?

A. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. B. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. C. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. D. Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current.

Answer: D. Explanation: Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q29. Which statement correctly identifies Successor-network coverage and the offered-versus-completed line?

A. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. B. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. C. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. D. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification.

Answer: A. Explanation: The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q30. Which card should be filed under Successor-network coverage and the offered-versus-completed line in an International Relations answer?

A. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. B. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. C. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. D. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question.

Answer: B. Explanation: The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q31. Which option preserves the source-bounded meaning of Successor-network coverage and the offered-versus-completed line?

A. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. B. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. C. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. D. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence.

Answer: C. Explanation: The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q32. Which statement avoids a close-option trap about Successor-network coverage and the offered-versus-completed line?

A. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. B. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. C. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. D. The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure.

Answer: D. Explanation: The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q33. Which statement correctly identifies The India-SADC economic-cooperation memorandum of 2 July 2024?

A. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. B. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. C. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. D. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question.

Answer: A. Explanation: The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q34. Which card should be filed under The India-SADC economic-cooperation memorandum of 2 July 2024 in an International Relations answer?

A. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. B. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. C. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. D. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence.

Answer: B. Explanation: The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q35. Which option preserves the source-bounded meaning of The India-SADC economic-cooperation memorandum of 2 July 2024?

A. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. B. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation

Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. C. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. D. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment.

Answer: C. Explanation: The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q36. Which statement avoids a close-option trap about The India-SADC economic-cooperation memorandum of 2 July 2024?

A. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. B. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. C. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. D. The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification.

Answer: D. Explanation: The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q37. Which statement correctly identifies Lines of credit as commitments rather than disbursements?

A. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. B. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. C. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. D. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question.

Answer: A. Explanation: The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q38. Which card should be filed under Lines of credit as commitments rather than disbursements in an International Relations answer?

A. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. B. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. C. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. D. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice.

Answer: B. Explanation: The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q39. Which option preserves the source-bounded meaning of Lines of credit as commitments rather than disbursements?

A. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. B. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. C. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. D. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in

March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation.

Answer: C. Explanation: The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q40. Which statement avoids a close-option trap about Lines of credit as commitments rather than disbursements?

A. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. B. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. C. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. D. The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number.

Answer: D. Explanation: The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q41. Which statement correctly identifies India-Africa trade and the Economy boundary?

A. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. B. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. C. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. D. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment.

Answer: A. Explanation: The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q42. Which card should be filed under India-Africa trade and the Economy boundary in an International Relations answer?

A. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. B. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. C. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. D. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation.

Answer: B. Explanation: The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q43. Which option preserves the source-bounded meaning of India-Africa trade and the Economy boundary?

A. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. B. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. C. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. D. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice.

Answer: C. Explanation: The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q44. Which statement avoids a close-option trap about India-Africa trade and the Economy boundary?

A. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. B. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. C. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. D. The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question.

Answer: D. Explanation: The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q45. Which statement correctly identifies Demand-driven and non-intrusive co-development as the model claim?

A. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. B. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. C. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. D. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment.

Answer: A. Explanation: Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q46. Which card should be filed under Demand-driven and non-intrusive co-development as the model claim in an International Relations answer?

A. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. B. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. C. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. D. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance.

Answer: B. Explanation: Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an

engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q47. Which option preserves the source-bounded meaning of Demand-driven and non-intrusive co-development as the model claim?

A. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. B. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. C. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. D. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance.

Answer: C. Explanation: Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q48. Which statement avoids a close-option trap about Demand-driven and non-intrusive co-development as the model claim?

A. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. B. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. C. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. D. Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence.

Answer: D. Explanation: Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q49. Which statement correctly identifies The implementation and maintenance test?

A. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. B. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. C.

The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. D. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance.

Answer: A. Explanation: The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q50. Which card should be filed under The implementation and maintenance test in an International Relations answer?

A. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. B. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. C. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. D. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance.

Answer: B. Explanation: The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence

of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q51. Which option preserves the source-bounded meaning of The implementation and maintenance test?

A. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. B. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. C. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. D. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive.

Answer: C. Explanation: The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q52. Which statement avoids a close-option trap about The implementation and maintenance test?

A. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. B. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. C. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. D. The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment.

Answer: D. Explanation: The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q53. Which statement correctly identifies Digital sovereignty as an unresolved design question?

A. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. B. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. C. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. D. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims.

Answer: A. Explanation: The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q54. Which card should be filed under Digital sovereignty as an unresolved design question in an International Relations answer?

A. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. B. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. C. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. D. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims.

Answer: B. Explanation: The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q55. Which option preserves the source-bounded meaning of Digital sovereignty as an unresolved design question?

A. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. B. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. C. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. D. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims.

Answer: C. Explanation: The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q56. Which statement avoids a close-option trap about Digital sovereignty as an unresolved design question?

A. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. B. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. C. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. D. The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice.

Answer: D. Explanation: The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q57. Which statement correctly identifies The defence-dialogue and field-exercise limb?

A. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. B. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. C. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. D. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive.

Answer: A. Explanation: The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q58. Which card should be filed under The defence-dialogue and field-exercise limb in an International Relations answer?

A. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. B. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. C. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. D. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the

Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it.

Answer: B. Explanation: The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q59. Which option preserves the source-bounded meaning of The defence-dialogue and field-exercise limb?

A. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. B. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. C. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. D. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it.

Answer: C. Explanation: The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October

2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.**

Q60. Which statement avoids a close-option trap about The defence-dialogue and field-exercise limb?

A. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. B. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. C. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. D. The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape cooperation.

**Answer: D. Explanation: The first India-Africa Defence Ministers Conclave at Lucknow in February 2020 adopted the Lucknow Declaration and the second India-Africa Defence Dialogue at Gandhinagar in October 2022 adopted a declaration on defence and security cooperation, while the Africa-India Field Training Exercise known as AFINDEX was held in India in 2019 and again in March 2023 as a named peacekeeping and humanitarian mine-action cooperation route, alongside Indian anti-piracy deployments and capacity cooperation in the western Indian Ocean and the Gulf of Aden; the owners attach the limits directly, namely that declarations and offers are not proof of operational capability transfer, that episodic exercises do not create a defence alliance, and that African maritime priorities vary so local ownership must shape

cooperation. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q61. Which statement correctly identifies The African Union's permanent seat in the Group of Twenty?

A. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. B. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. C. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. D. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive.

Answer: A. Explanation: The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q62. Which card should be filed under The African Union's permanent seat in the Group of Twenty in an International Relations answer?

A. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official

Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. B. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. C. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. D. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive.

Answer: B. Explanation: The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q63. Which option preserves the source-bounded meaning of The African Union's permanent seat in the Group of Twenty?

A. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. B. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. C. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. D. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner.

Answer: C. Explanation: The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q64. Which statement avoids a close-option trap about The African Union's permanent seat in the Group of Twenty?

A. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. B. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. C. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. D. The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance.

Answer: D. Explanation: The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q65. Which statement correctly identifies Health, pharmaceutical and plurilateral extensions?

A. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. B. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. C. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. D. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive.

Answer: A. Explanation: The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. The remaining options belong

to different actors, instruments, evidentiary levels or analytical categories.

Q66. Which card should be filed under Health, pharmaceutical and plurilateral extensions in an International Relations answer?

A. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. B. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. C. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. D. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner.

Answer: B. Explanation: The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q67. Which option preserves the source-bounded meaning of Health, pharmaceutical and plurilateral extensions?

A. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. B. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. C. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. D. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner.

Answer: C. Explanation: The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q68. Which statement avoids a close-option trap about Health, pharmaceutical and plurilateral extensions?

A. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. B. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. C. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. D. The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims.

Answer: D. Explanation: The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q69. Which statement correctly identifies Political risk in the Sahel and the comparator question?

A. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. B.

This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. C. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. D. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it.

Answer: A. Explanation: Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q70. Which card should be filed under Political risk in the Sahel and the comparator question in an International Relations answer?

A. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. B. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and

West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. C. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. D. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity.

Answer: B. Explanation: Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q71. Which option preserves the source-bounded meaning of Political risk in the Sahel and the comparator question?

A. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. B. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. C. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. D. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure.

Answer: C. Explanation: Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q72. Which statement avoids a close-option trap about Political risk in the Sahel and the comparator question?

A. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. B. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. C. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. D. Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive.

Answer: D. Explanation: Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the

2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q73. Which statement correctly identifies Agenda 2063 as the African-owned framework the partnership must fit?

A. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. B. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner. C. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. D. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand.

Answer: A. Explanation: The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q74. Which card should be filed under Agenda 2063 as the African-owned framework the partnership must fit in an International Relations answer?

A. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. B. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. C. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. D. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner.

Answer: B. Explanation: The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q75. Which option preserves the source-bounded meaning of Agenda 2063 as the African-owned framework the partnership must fit?

A. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. B. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on

24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. C. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. D. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure.

Answer: C. Explanation: The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q76. Which statement avoids a close-option trap about Agenda 2063 as the African-owned framework the partnership must fit?

A. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. B. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. C. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. D. The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the

Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it.

Answer: D. Explanation: The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q77. Which statement correctly identifies Honest question ownership for this India-Africa owner?

A. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. B. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. C. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. D. This topic owns India's development partnership with Africa: the India-Africa Forum Summit political framework, the capacity-building and human-resource-development instruments, joint institution building with the African Union Commission and member states, African student mobility, the tele-education and tele-medicine digital layer running from the Pan African e-Network to its e-VidyaBharati and e-ArogyaBharati successor, lines of credit carried as commitments, and the demand-driven and non-intrusive co-development claim; its distinctive feature is that the partnership is judged on human capital and institutions rather than on infrastructure volume, and two General Studies Paper II Mains demands from 2021 and 2025 plus two objective demands from 2023 and 2024 are routed here, while bilateral trade-volume and digital-economy mechanics belong to the Economy owner, Global South representation framing belongs to topic 08, diaspora and cultural-diplomacy instruments belong to topic 09, and African colonial-history chronology belongs to the World History owner.

Answer: A. Explanation: The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic;

two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.**

Q78. Which card should be filed under Honest question ownership for this India-Africa owner in an International Relations answer?

A. The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity. B. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. C. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. D. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point.

Answer: B. Explanation: The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q79. Which option preserves the source-bounded meaning of Honest question ownership for this India-Africa owner?

A. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. B. Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure. C. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. D. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point.

Answer: C. Explanation: The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

Q80. Which statement avoids a close-option trap about Honest question ownership for this India-Africa owner?

A. Tharoor notes that at any time there are at least ten thousand to fifteen thousand African students studying in various parts of India, which the owners treat as a standing education-diplomacy channel that extends the capacity-building effect beyond the jointly built institutions into India's own higher-education system; the qualification is that a standing range is a book-period stock estimate and not an enrolment record for any specific year, so it evidences a continuing channel rather than a dated annual figure. B. Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point. C. Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states. D. The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand.

Answer: D. Explanation: The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand. The remaining options belong to different actors, instruments, evidentiary levels or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Two General Studies Paper II Mains demands are routed to this topic in the audited routing ledgers and each is reproduced below as a demand card with its printed year, paper, question number, directive, marks and word limit exactly as the ledger records them: 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words, for which the ledger records that the Core route supersedes the older Advanced ownership; and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic. Two objective demands are also routed to this owner and are carried as coverage requirements only: 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally; and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally and its presence is recorded without being used. No option or answer letter is recorded or inferred for either objective demand. The locally held OCR-searchable official General Studies papers were read only to confirm the printed wording of the routed Mains demands; no question was invented from them, no stem was paraphrased into an apparent routing, and no marking scheme or official answer key was imported.

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2021	GS-II	9	India's influence in Africa in the light of Africa's growth prospects	Examine · 10 marks · 150 words	Core route supersedes older Advanced ownership	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2023	Prelims GS-I	98	Military coups in Chad Guinea Mali Sudan West Africa	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- India's influence in Africa in the light of Africa's growth prospects
- Military coups in Chad Guinea Mali Sudan West Africa

> The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- FACT: **2021 GS-II** tests India's wider influence in Africa against the

continent's expected growth story. Use a balanced influence matrix (development, trade, capacity, diplomacy) and then test delivery, competition and African agency.

- FACT: **2025 Q9 (direct):** *India-Africa digital partnership is achieving mutual

respect, co-development and long-term institutional partnerships. Elaborate.* An advanced answer should:

1. Separate the three claimed elements (mutual respect, co-development,

long-term institutional partnership) and evidence each distinctly.

2. Trace the Pan African e-Network (concluded 2017) to e-VBAB (launched

2019), then cite the SADC MoU (2 July 2024) as a current digital-cooperation instrument.

3. Apply the implementation/maintenance test to qualify "long-term" - noting

that sustained functioning, not the initial announcement, is the true measure.

4. Avoid overstating scale (continent-wide claims) beyond what the specific,

dated instruments support.

PYQ DEMAND CARD 1 - 2021 General Studies Paper II Question 9

Demand: "If the last few decades were of Asia's growth story, the next few are expected to be of Africa's." In the light of this statement, examine India's influence in Africa in recent years. An Examine demand of 10 marks and 150 words, exactly as recorded in the audited 2018-2023 Mains routing ledger and confirmed against the locally held official paper.

Status: Routed to this owner in the audited 2018-2023 Mains routing ledger, where the Core route is recorded as superseding the older Advanced ownership. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: India's influence in Africa is real but instrument-specific, resting on human-capital and institutional investment rather than on financing scale, and it is best measured by what has been sustained rather than by what has been announced. Named evidence and example: the India-Africa Forum Summit framework, held at New Delhi on 8-9 April 2008, Addis Ababa on 24-25 May 2011 and New Delhi on 26-29 October 2015, with a fourth edition announced on 23 April 2026 and postponed on 21 May 2026; the grant of five hundred million United States dollars for human resource development and capacity building announced at the first summit; one thousand six hundred training positions offered to Africa under India's technical cooperation programme, distinct from the Indian Technical and Economic Cooperation Programme's global total of more than two lakh trainees from over one hundred and sixty countries recorded by the Economic Survey 2025-26; nineteen institutions being established jointly with the African Union Commission and member states; ten thousand to fifteen thousand African students in India at any time; more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries and India-Africa trade of USD 81.99 billion in the financial year 2024-25 per the Ministry of External Affairs Africa brief of April 2026; the first India-Africa Defence Ministers Conclave at Lucknow in February 2020 with its Lucknow Declaration, the Gandhinagar dialogue of October 2022 and AFINDEX in 2019 and March 2023; and the African Union's admission as a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023. Analysis: these instruments produce influence through four different mechanisms, since training and joint institutions build in-country capacity that outlives a project cycle, student mobility and telemedicine create durable professional networks, concessional credit buys project presence without matching the scale of larger financiers, and the Group of Twenty outcome shows India converting advocacy into a checkable institutional result; the growth-story framing therefore raises the stakes, because a faster-growing Africa will have more partnership options and will select partners on delivery rather than on solidarity. Qualification: influence claims must be bounded, because extended lines of credit are commitments and not disbursements, nineteen institutions are not coverage across fifty-four states, defence declarations are not operational capability transfer, one seat in one forum is not systemic reform, coups in Mali, Guinea, Burkina Faso and Niger between 2020 and 2023 show that project risk is regionally specific, and the Forum on China-Africa Cooperation route must be compared on finance terms and local ownership rather than caricatured. Why this earns marks: it evidences influence across development, education, digital, security and representation limbs with dated anchors, then converts the growth-story premise into a delivery test instead of a celebration.

PYQ DEMAND CARD 2 - 2025 General Studies Paper II Question 9

Demand: India-Africa digital partnership is achieving mutual respect, co-development and long-term institutional partnerships. Elaborate. An Elaborate demand of 10 marks and 150 words, exactly as recorded in the audited 2024-2025 Mains routing ledger and confirmed against the locally held official paper.

Status: Routed to this owner in the audited 2024-2025 Mains routing ledger and reproduced in the Basic owner as the anchor demand for this topic. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: the statement's three elements are separable and each is supported by a different kind of evidence, so an elaboration must evidence mutual respect through design, co-development through governance and long-term partnership through continuity, rather than merging them into a single claim of success. Named evidence and example: mutual respect is evidenced by the demand-driven, non-intrusive model Tharoor describes as non-intrusive support to the development of democratic institutions, and by the India-Southern African Development Community Memorandum of Understanding on Economic Cooperation of 2 July 2024, whose new and emerging technologies pillar covering information and communication technology development, connectivity, access and digital public infrastructure is framed against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an Indian template, and which renews an earlier memorandum of 14 October 1997; co-development is evidenced by the nineteen institutions being established jointly with the African Union Commission and member states and by the tele-education and tele-medicine succession from the Pan African e-Network, concluded in 2017, to the e-VidyaBharati and e-ArogyaBharati Network Project, whose implementation agreement with Telecommunications Consultants India Limited was signed on 10 September 2018 and which was launched in 2019; long-term institutional partnership is evidenced by that network's recorded reach of twenty-two African countries and 15,116 scholarships offered in the Ministry of External Affairs Africa brief of April 2026, and by the standing presence of ten thousand to fifteen thousand African students in India. Analysis: the design evidence matters because framing a cooperation pillar against the partner's own published strategy is what converts a technology offer into a respectful one, the governance evidence matters because a jointly governed institution transfers decision rights rather than only equipment, and the continuity evidence matters because a network that keeps enrolling and treating people is the only proof that partnership language has outlived its launch. Qualification: the elaboration must concede that a memorandum is a statement of intent whose entry into force and delivery require separate verification, that scholarships offered is an input measure and not completed training or employment, that no continent-wide rollout of digital public infrastructure is established by these instruments, that digital sovereignty and data-governance questions are framed rather than resolved, and that the summit architecture itself shows a gap, since the third India-Africa Forum Summit of 26-29 October 2015 remains the last one held while the fourth was announced on 23 April 2026 and postponed on 21 May 2026. Why this earns marks: it separates and separately evidences all three words of the statement with dated instruments and then applies an explicit maintenance test instead of asserting achievement.

ORIGINAL MAINS 1 - 10 MARKS

Question: Examine India's influence in Africa in the light of the expectation that the coming decades will be Africa's growth story. Answer in about 150 words.

Model thesis: Influence must be evidenced through instruments rather than asserted, so the examination must name the summit framework and its honest gap, evidence capacity building and credit commitments at their true evidentiary level, add the one concrete representation outcome, and close on delivery rather than announcement.

Claim -> named evidence -> analysis -> qualification:

- The India-Africa Forum Summit is the umbrella political mechanism convening India, African states and the African Union, and the owners record its held editions exactly: the first at New Delhi on 8-9 April 2008, the second at Addis Ababa on 24-25 May 2011 and the third at New Delhi on 26-29 October 2015; a fourth edition was announced on 23 April 2026 for New Delhi and on 21 May 2026 India and the African Union agreed to convene it later owing to the health situation, so it is an announced and postponed summit rather than a held one, and the decade-plus gap after the third edition is itself a legitimate analytical point about the difference between programme continuity and political-architecture continuity.
- Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states.
- The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number.
- The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations

representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance.

Qualified conclusion: Influence must be evidenced through instruments rather than asserted, so the examination must name the summit framework and its honest gap, evidence capacity building and credit commitments at their true evidentiary level, add the one concrete representation outcome, and close on delivery rather than announcement.

ORIGINAL MAINS 2 - 10 MARKS

Question: Comment on the proposition that India's Africa engagement is a donor-driven aid relationship rather than a co-development partnership. Answer in about 150 words.

Model thesis: The proposition fails against the joint-governance structure and the non-intrusive framing, so the comment must cite the jointly established institutions, the demand-driven model wording and the training instruments, and must still concede that the model's credibility rests on African priority-setting rather than on Indian intent alone.

Claim -> named evidence -> analysis -> qualification:

- Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence.
- Tharoor documents India in the process of establishing nineteen institutions on African soil jointly with the African Union Commission and the member states, including an India-Africa Institute of Information Technology, an India-Africa Institute of Foreign Trade, an India-Africa Institute of Educational Planning and Administration, an India-Africa Diamond Institute, ten vocational training centres and five human settlement institutes; the owners treat joint governance with the African Union Commission and member states as the structural feature that separates co-development from an India-funded and India-designed facility, and they add that nineteen institutions do not amount to continent-wide coverage across all fifty-four African states.
- Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an Africa-specific data point.
- The Pan African e-Network linked Indian institutions with African partners for tele-education and telemedicine and its successor carries e-ArogyaBharati telemedicine, while affordable Indian generic medicines, vaccines and health training widen access and commercial links; India also launched the New Delhi-headquartered Coalition for Disaster Resilient Infrastructure at the United Nations Climate Action Summit on 23 September 2019, and the treaty-based International Solar Alliance Framework Agreement entered into force on 6 December 2017 with headquarters at Gurugram in India; the owners require each of these to be cited as a platform African members can use, with the explicit limits that membership and a global mission are not evidence that any particular African project has been delivered, that digital access and local health capacity determine telemedicine use, and that regulation, local manufacturing, procurement and supply continuity qualify celebratory pharmaceutical claims.

Qualified conclusion: The proposition fails against the joint-governance structure and the non-intrusive framing, so the comment must cite the jointly established institutions, the demand-driven model wording and the training instruments, and must still concede that the model's credibility rests on African priority-setting rather than on Indian intent alone.

ORIGINAL MAINS 3 - 15 MARKS

Question: Elaborate on how the India-Africa digital partnership is achieving mutual respect, co-development and long-term institutional partnership. Answer in about 250 words.

Model thesis: The three claimed elements must be separated and evidenced distinctly, so the elaboration must trace the network succession, cite the dated memorandum pillar for current digital cooperation, evidence institutional partnership through joint governance, and apply the maintenance test to the word long-term.

Claim -> named evidence -> analysis -> qualification:

- Tharoor describes the Pan African e-Network as seeking to bridge the digital divide through tele-education and information and communication technology connectivity, and the Ministry of External Affairs records that project as concluded in 2017, after which the e-VidyaBharati and e-ArogyaBharati Network Project became its tele-education and tele-medicine successor, its implementation agreement between the Ministry and Telecommunications Consultants India Limited was signed on 10 September 2018 and the project was launched in 2019; the owners are categorical that the Pan African e-Network is a historical precursor and not an ongoing flagship platform, so an answer must name the succession instead of treating the older network as current.
- The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure.
- The India-Southern African Development Community Memorandum of Understanding on Economic Cooperation was signed on 2 July 2024 at the SADC Secretariat by SADC Executive Secretary Elias Mpedi Magosi and India's High Commissioner to Botswana and Special Representative to SADC, Bharath Kumar Kuthati, renewing an earlier India-SADC economic-cooperation memorandum of 14 October 1997; it frames cooperation against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and its Digital Transformation Strategy and covers industrialisation, human and social development, new and emerging technologies including information and communication technology development, connectivity, access and digital public infrastructure, trade and investment, disaster risk management, women-led development, private sector development, space cooperation, green growth, and research and innovation; the owners require it to be described as a statement of intent whose entry into force and delivery need separate verification.
- The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment.

Qualified conclusion: The three claimed elements must be separated and evidenced distinctly, so the elaboration must trace the network succession, cite the dated memorandum pillar for current digital cooperation, evidence institutional partnership through joint governance, and apply the maintenance test to the word long-term.

ORIGINAL MAINS 4 - 15 MARKS

Question: Examine why announced development-partnership figures overstate what India has actually delivered in Africa. Answer in about 250 words.

Model thesis: Overstatement is structural rather than accidental, so the examination must separate commitment from disbursement, announcement from functioning institution and offered scholarships from completed training, and must show that each gap has its own verification requirement.

Claim -> named evidence -> analysis -> qualification:

- Tharoor records that at the first India-Africa Forum Summit India announced a grant of five hundred million United States dollars specifically to undertake projects in human resource development and capacity building, and the owners treat this as the founding financial commitment of the partnership's human-capital model rather than as an infrastructure package; the boundary is attached in the same place, because an announced grant is a commitment whose disbursement and project completion require separate dated verification, so the figure may open an answer but may never be presented as delivered expenditure.

- The Ministry of External Affairs Africa brief of April 2026 records more than 190 Lines of Credit worth over USD 10 billion extended to 41 African countries, and the owners identify the treatment of extended credit as disbursed money as the single most common overstatement in answers on this topic; the disciplined formulation is that a line of credit extended is a commitment, that disbursement and project completion are separate questions, and that an answer earns marks by naming that distinction rather than by quoting the larger number.
- The owners define the implementation and maintenance test as the question whether a jointly built institution, training network or digital platform continues functioning, staffed and used after the initial launch ceremony, and they make it the genuine measure of the long-term institutional partnership claimed in the 2025 demand; the consequence for answer writing is that announcement scale is not evidence of partnership depth, so the strongest answers evidence continuity and local ownership instead of repeating the size of the original commitment.
- The Ministry of External Affairs Africa brief of April 2026 records e-VidyaBharati and e-ArogyaBharati participation by twenty-two African countries and 15,116 scholarships offered, which the owners treat as the dated evidence for the digital half of the 2025 demand; the boundary is stated in the same place, because scholarships offered is an input measure and is not the same as students who completed training or obtained employment, so the figure evidences reach rather than outcome and cannot support a claim of delivered continent-wide digital public infrastructure.

Qualified conclusion: Overstatement is structural rather than accidental, so the examination must separate commitment from disbursement, announcement from functioning institution and offered scholarships from completed training, and must show that each gap has its own verification requirement.

ORIGINAL MAINS 5 - 20 MARKS

Question: Assess India's Africa partnership model against the alternative external partnership routes available to African states. Answer in about 300 words.

Model thesis: Comparison must be evidence-based rather than moralised, so the assessment must state India's specific comparative strengths, price political risk honestly, refuse to caricature the competing route, and close with a graded verdict that rests on delivery and local ownership.

Claim -> named evidence -> analysis -> qualification:

- Coups in Mali, Guinea, Burkina Faso and Niger during 2020 to 2023 illustrate that political and security volatility can delay projects, raise commercial risk and complicate partner selection, and the audited ledgers route two objective demands on this theme to this owner, namely the 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa and the 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region; the owners add that China's Forum on China-Africa Cooperation and its infrastructure finance give African states another large-scale partnership route, that India's comparative strengths lie in training, affordable technology, digital public infrastructure and demand-driven projects, and that neither Sahel instability nor Chinese engagement may be generalised across the continent or caricatured as uniformly extractive.
- Tharoor frames India's political-cooperation dimension as non-intrusive support to the development of democratic institutions and records that endeavours to invest in human capital and sustainable political systems have made human resource development a vital aspect of India's model of cooperation with Africa, which the owners treat as the textual anchor for the mutual-respect and co-development language of the 2025 demand; the qualification is that non-intrusive describes an engagement model avoiding conditionality and prescriptiveness rather than an absence of political engagement, and that whether it is uniformly realised across every African partner requires country-specific dated evidence.
- Tharoor cites one thousand six hundred training positions offered under India's technical cooperation programme to Africa specifically, while the Economic Survey 2025-26 records that the Indian Technical and Economic Cooperation Programme has trained more than two lakh persons from over one hundred and sixty countries in both the civilian and the defence sector and describes it as an important tool in strengthening India's cultural diplomacy and influence, especially in the South Asian region; the owners require the two figures to be kept apart, because the two-lakh figure is a global programme total with an explicit South Asian emphasis and is not an

Africa-specific data point.

- The same Ministry of External Affairs brief of April 2026 records India-Africa trade at USD 81.99 billion in the financial year 2024-25, which the owners admit as dated scale evidence while routing bilateral trade-volume mechanics, tariff structure and wider digital-economy detail to the Economy owner; the analytical point retained here is that this topic's syllabus emphasis is capacity building, education, digital connectivity and institutional partnership rather than trade volume, so an answer that converts the demand into a trade-and-investment essay has answered a different question.

Qualified conclusion: Comparison must be evidence-based rather than moralised, so the assessment must state India's specific comparative strengths, price political risk honestly, refuse to caricature the competing route, and close with a graded verdict that rests on delivery and local ownership.

ORIGINAL MAINS 6 - 20 MARKS

Question: Assess whether India's Africa partnership is genuinely aligned with African-owned development priorities. Answer in about 300 words.

Model thesis: Alignment is testable rather than declarative, so the assessment must set the partnership against the African-owned continental framework, test it through the maintenance and digital-sovereignty questions, credit the one delivered representation outcome, and refuse to predict any future summit or project result.

Claim -> named evidence -> analysis -> qualification:

- The African Union's own Agenda 2063 overview page, checked live on 2026-09-03, describes Agenda 2063 as Africa's blueprint and master plan for transforming Africa into the global powerhouse of the future, records that African heads of state and government signed the 50th Anniversary Solemn Declaration during the Golden Jubilee celebrations of the formation of the Organisation of African Unity and the African Union in May 2013, states the Pan-African Vision of an integrated, prosperous and peaceful Africa driven by its own citizens and representing a dynamic force in the international arena, sets a fifty-year horizon from 2013 to 2063, and organises delivery through aspirations, flagship programmes and ten-year implementation plans; the owners use this only as the African-owned framework against which a demand-driven partnership claim is tested, and no India-specific project, figure or outcome is taken from it.
- The owners define digital sovereignty here as the requirement that digital-public-infrastructure and connectivity cooperation should strengthen rather than substitute for an African partner's own control over its digital infrastructure and data, and they note that the India-SADC memorandum frames its new and emerging technologies pillar against SADC's own Regional Indicative Strategic Development Plan 2020-2030 and Digital Transformation Strategy rather than an externally supplied template; the boundary is explicit, because framing an instrument around the partner's own plan is evidence of demand-driven design and is not proof that data-governance and control questions have been resolved in practice.
- The African Union became a permanent member of the Group of Twenty at the New Delhi Summit on 9 September 2023, which the owners treat as the single most concrete representation outcome achieved in this cycle and as proof that partnership language can be converted into an institutional result; the qualification is equally firm, because membership of one forum does not resolve Africa's financing, implementation or United Nations representation deficits, so the outcome must be described at its real scale rather than presented as systemic reform of global governance.
- The audited ledgers route two General Studies Paper II Mains demands to this owner, namely 2021 General Studies Paper II question 9 on India's influence in Africa in the light of Africa's expected growth story, an Examine demand of 10 marks and 150 words for which the ledger records that the Core route supersedes the older Advanced ownership, and 2025 General Studies Paper II question 9 on the India-Africa digital partnership, an Elaborate demand of 10 marks and 150 words routed to the owning topic; two objective demands are also routed here and carried as coverage requirements only, namely 2023 Prelims General Studies Paper I question 98 on military coups in Chad, Guinea, Mali, Sudan and West Africa, for which the official 2018-2023 Prelims keys are not held locally, and 2024 Prelims General Studies Paper I question 91 on instability and military coups in the Sahel region, for which the official Set-A key is present locally, and no option or answer letter is recorded or inferred for either objective demand.

Qualified conclusion: Alignment is testable rather than declarative, so the assessment must set the partnership against the African-owned continental framework, test it through the maintenance and digital-sovereignty questions, credit the one delivered representation outcome, and refuse to predict any future summit or project result.
