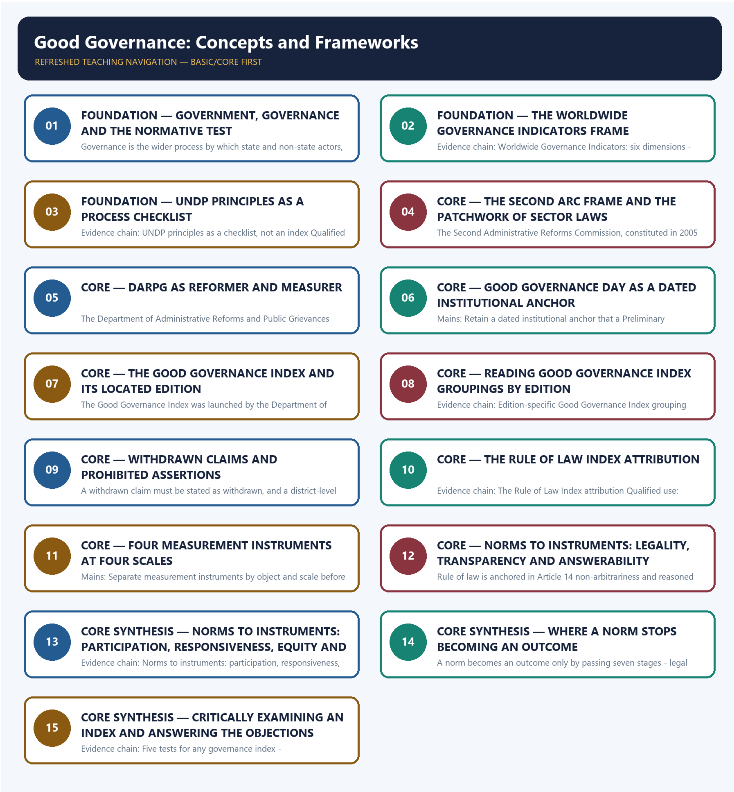
SOLVED PRACTICE WORKBOOK

Good Governance: Concepts and Frameworks - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing



Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Good Governance: Concepts and Frameworks - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Government as a formal authority set?

A. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. B. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. C. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. D. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law.

Answer: A. Explanation: Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Government as a formal authority set?

A. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. B. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. C. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. D. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect.

Answer: B. Explanation: Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Government as a formal authority set?

A. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. B. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. C. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. D. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect.

Answer: C. Explanation: Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Government as a formal authority set?

A. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. B. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. C. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. D. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it.

Answer: D. Explanation: Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Governance as a wider decision process?

A. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. B. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. C. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. D. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total.

Answer: A. Explanation: Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Governance as a wider decision process?

A. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. B. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. C. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. D. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect.

Answer: B. Explanation: Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Governance as a wider decision process?

A. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. B. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. C. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. D. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error.

Answer: C. Explanation: Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Governance as a wider decision process?

A. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. B. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. C. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. D. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance.

Answer: D. Explanation: Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies Good governance as a normative standard?

A. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. B. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. C. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. D. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total.

Answer: A. Explanation: Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under Good governance as a normative standard?

A. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. B. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. C. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. D. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error.

Answer: B. Explanation: Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Good governance as a normative standard?

A. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. B. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. C. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. D. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error.

Answer: C. Explanation: Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Good governance as a normative standard?

A. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. B. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. C. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. D. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law.

Answer: D. Explanation: Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Worldwide Governance Indicators: six dimensions?

A. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. B. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. C. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. D. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect.

Answer: A. Explanation: The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Worldwide Governance Indicators: six dimensions?

A. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. B. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. C. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. D. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department.

Answer: B. Explanation: The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Worldwide Governance Indicators: six dimensions?

A. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. B. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. C. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. D. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument.

Answer: C. Explanation: The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Worldwide Governance Indicators: six dimensions?

A. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. B. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. C. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. D. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total.

Answer: D. Explanation: The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies The perception basis of the Worldwide Governance Indicators?

A. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. B. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. C. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. D. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department.

Answer: A. Explanation: The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under The perception basis of the Worldwide Governance Indicators?

A. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. B. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. C. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. D. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument.

Answer: B. Explanation: The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of The perception basis of the Worldwide Governance Indicators?

A. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. B. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. C. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. D. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department.

Answer: C. Explanation: The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about The perception basis of the Worldwide Governance Indicators?

A. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. B. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. C. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. D. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect.

Answer: D. Explanation: The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies UNDP principles as a checklist, not an index?

A. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. B. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. C. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. D. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute.

Answer: A. Explanation: The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under UNDP principles as a checklist, not an index?

A. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. B. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. C. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. D. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department.

Answer: B. Explanation: The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of UNDP principles as a checklist, not an index?

A. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. B. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. C. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. D. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition.

Answer: C. Explanation: The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about UNDP principles as a checklist, not an index?

A. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. B. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. C. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. D. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error.

Answer: D. Explanation: The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies The Second ARC frame and the absence of one governance statute?

A. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. B. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. C. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. D. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument.

Answer: A. Explanation: The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under The Second ARC frame and the absence of one governance statute?

A. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. B. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. C. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. D. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition.

Answer: B. Explanation: The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of The Second ARC frame and the absence of one governance statute?

A. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. B. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. C. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. D. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition.

Answer: C. Explanation: The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about The Second ARC frame and the absence of one governance statute?

A. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. B. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. C. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. D. The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute.

Answer: D. Explanation: The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute. The remaining options belong to different

chronology, actor or analytical categories.

Q29. Which statement correctly identifies DARPG as reformer and measurer in one department?

A. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. B. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. C. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. D. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument.

Answer: A. Explanation: The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under DARPG as reformer and measurer in one department?

A. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. B. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. C. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. D. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition.

Answer: B. Explanation: The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of DARPG as reformer and measurer in one department?

A. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. B. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. C. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. D. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error.

Answer: C. Explanation: The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about DARPG as reformer and measurer in one department?

A. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. B. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. C. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. D. The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department.

Answer: D. Explanation: The Department of Administrative Reforms and Public Grievances functions under the Ministry of Personnel, Public Grievances and Pensions and is simultaneously the nodal department for administrative reform, Sevottam, the Centralised Public Grievance Redress and Monitoring System and Second ARC follow-up, and the nodal department for good-governance measurement, so agenda-setting and self-assessment sit inside one department. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Good Governance Day?

A. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. B. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. C. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. D. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021.

Answer: A. Explanation: Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Good Governance Day?

A. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. B. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. C. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. D. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition.

Answer: B. Explanation: Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Good Governance Day?

A. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. B. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. C. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. D. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family.

Answer: C. Explanation: Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Good Governance Day?

A. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. B. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. C. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. D. Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument.

Answer: D. Explanation: Good Governance Day has been observed on 25 December every year since 2014, marking the birth anniversary of former Prime Minister Atal Bihari Vajpayee, and it promotes accountability, transparency and citizen-centric administration without being a measurement instrument. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Good Governance Index launch and latest located edition?

A. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. B. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. C. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. D. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted.

Answer: A. Explanation: The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Good Governance Index launch and latest located edition?

A. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. B. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. C. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. D. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted.

Answer: B. Explanation: The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Good Governance Index launch and latest located edition?

A. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. B. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. C. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. D. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family.

Answer: C. Explanation: The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Good Governance Index launch and latest located edition?

A. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. B. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. C. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. D. The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021.

Answer: D. Explanation: The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies Edition-specific Good Governance Index grouping?

A. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. B. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. C. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. D. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family.

Answer: A. Explanation: The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Edition-specific Good Governance Index grouping?

A. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. B. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. C. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. D. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family.

Answer: B. Explanation: The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Edition-specific Good Governance Index grouping?

A. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. B. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. C. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. D. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family.

Answer: C. Explanation: The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Edition-specific Good Governance Index grouping?

A. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. B. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. C. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. D. The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition.

Answer: D. Explanation: The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B,

North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies The withdrawn Good Governance Index 2025 claim?

A. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. B. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. C. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. D. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks.

Answer: A. Explanation: A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under The withdrawn Good Governance Index 2025 claim?

A. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. B. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. C. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. D. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family.

Answer: B. Explanation: A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of The withdrawn Good Governance Index 2025 claim?

A. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. B. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. C. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. D. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates.

Answer: C. Explanation: A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about The withdrawn Good Governance Index 2025 claim?

A. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. B. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. C. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. D. A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted.

Answer: D. Explanation: A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau

release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies The District Good Governance Index is not a national edition?

A. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. B. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. C. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. D. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority.

Answer: A. Explanation: The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under The District Good Governance Index is not a national edition?

A. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. B. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. C. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. D. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates.

Answer: B. Explanation: The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good

Governance Day event into a released national edition is a factual error. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of The District Good Governance Index is not a national edition?

A. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. B. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. C. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. D. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority.

Answer: C. Explanation: The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about The District Good Governance Index is not a national edition?

A. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. B. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. C. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. D. The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error.

Answer: D. Explanation: The District Good Governance Index is a separate sub-national exercise developed for particular states and union territories, and it neither supersedes nor substitutes for a released national

Good Governance Index edition, so converting a district index, a workshop, a proposed cycle or a Good Governance Day event into a released national edition is a factual error. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies The Rule of Law Index attribution?

A. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. B. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. C. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. D. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates.

Answer: A. Explanation: The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under The Rule of Law Index attribution?

A. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. B. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. C. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. D. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis.

Answer: B. Explanation: The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary

examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of The Rule of Law Index attribution?

A. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. B. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. C. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. D. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates.

Answer: C. Explanation: The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about The Rule of Law Index attribution?

A. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. B. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. C. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. D. The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family.

Answer: D. Explanation: The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Four measurement instruments at four different scales?

A. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. B. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. C. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. D. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority.

Answer: A. Explanation: The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Four measurement instruments at four different scales?

A. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. B. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. C. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. D. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it.

Answer: B. Explanation: The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Four measurement instruments at four different scales?

A. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. B. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. C. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. D. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement.

Answer: C. Explanation: The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Four measurement instruments at four different scales?

A. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. B. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. C. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. D. The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks.

Answer: D. Explanation: The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Norms to instruments: legality, transparency and answerability?

A. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. B. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. C. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. Answer: A. Explanation: Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Norms to instruments: legality, transparency and answerability?

A. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. B. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. C. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. D. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement.

Answer: B. Explanation: Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Norms to instruments: legality, transparency and answerability?

A. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. B. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. C. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. D. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it.

Answer: C. Explanation: Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Norms to instruments: legality, transparency and answerability?

A. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. B. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. C. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement.

D. Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority.

Answer: D. Explanation: Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Norms to instruments: participation, responsiveness, equity and effectiveness?

A. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. B. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. C. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. D. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement.

Answer: A. Explanation: Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Norms to instruments: participation, responsiveness, equity and effectiveness?

A. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. B. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. C. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. D. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement.

Answer: B. Explanation: Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Norms to instruments: participation, responsiveness, equity and effectiveness?

A. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. B. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. C. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. D. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement.

Answer: C. Explanation: Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Norms to instruments: participation, responsiveness, equity and effectiveness?

A. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. B. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. C. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. D. Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates.

Answer: D. Explanation: Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies The seven-stage chain from norm to outcome?

A. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. B. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. C. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. D. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it.

Answer: A. Explanation: A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under The seven-stage chain from norm to outcome?

A. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. B. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. C. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. D. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it.

Answer: B. Explanation: A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of The seven-stage chain from norm to outcome?

A. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. B. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. C. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. D. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance.

Answer: C. Explanation: A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. The

remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about The seven-stage chain from norm to outcome?

A. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. B. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. C. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. D. A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis.

Answer: D. Explanation: A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Five tests for any governance index?

A. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. B. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. C. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. D. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance.

Answer: A. Explanation: Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Five tests for any governance index?

A. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. B. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. C. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. D. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance.

Answer: B. Explanation: Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Five tests for any governance index?

A. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. B. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. C. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. D. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance.

Answer: C. Explanation: Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Five tests for any governance index?

A. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. B. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. C. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. D. Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it.

Answer: D. Explanation: Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Counter-arguments and the behavioural-insights anchor?

A. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. B. Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it. C. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. D. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance.

Answer: A. Explanation: Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Counter-arguments and the behavioural-insights anchor?

A. Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance. B. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. C. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law. D. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total.

Answer: B. Explanation: Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Counter-arguments and the behavioural-insights anchor?

A. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. B. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. C. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. D. Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law.

Answer: C. Explanation: Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Counter-arguments and the behavioural-insights anchor?

A. The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total. B. The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect. C. The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error. D. Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the

Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement.

Answer: D. Explanation: Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

TRANSPARENT ZERO-DIRECT-PYQ AUDIT

No direct General Studies Mains demand is routed to this owner in the audited 2018-2023 or 2024-2025 Mains ledgers. The audited 2018-2023 Preliminary ledger routes one objective demand to this owner, namely the organisation that releases the Rule of Law Index annually, and that ledger itself records the official key as unavailable locally. The printed wording of that objective question could not be confirmed in the locally held OCR-searchable 2018 Preliminary paper, whose scan does not yield searchable text for the item, so no option set, no official key and no verbatim stem is reproduced or inferred. The owner therefore carries the examinable distinction - the Rule of Law Index is published by the World Justice Project and not by the World Bank - without converting an unkeyed objective question into a solved answer. The six original Mains answers below are authored practice, not previous-year questions, and the Basic owner records that this topic functions mainly as the conceptual opening for evaluative demands owned by Topics 02 to 15 rather than as a standalone Mains topic.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- ANALYSIS: No GS-II Mains question in the audited 2024-2025 papers asks directly "define good

governance," but the concept underlies several questions that ask you to evaluate whether an institution or reform "provides good governance" (e.g., 2024 Q5 on local bodies - see `12`) - always open such answers with the rule-of-law/transparency/accountability/ responsiveness frame from this file before moving to the specific institution.

- ANALYSIS: Use this file's WGI + UNDP + ARC synthesis as the conceptual opening paragraph whenever

a question asks you to "assess," "evaluate" or "analyse" the quality of governance of any specific mechanism across Topics `02-15`.

Historical PYQ Integration (2018-2023)

> **Status:** Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: `_PYQ-ROUTING-PRELIMS-2018-2023.md`. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2018
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	Prelims GS-I	14	Organization that releases Rule of Law Index annually	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Organization that releases Rule of Law Index annually

> The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- ANALYSIS: Any GS-II question asking you to "assess" or "evaluate" whether a specific institution

(local body, e-governance model, tribunal, civil-service reform) delivers good governance should be answered by naming which WGI/UNDP dimension is being tested and where the measurement-versus-process gap might arise - this file supplies that opening analytical move for Topics `02-15`.

- ANALYSIS: Where a question invites comparison across states or reform periods, use the

index-versus-principle distinction (Section 2) to avoid a purely descriptive answer.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish government from governance and explain why the distinction changes the evaluation of a public institution in India. Answer in about 150 words.

Model thesis: Government names the institutions, governance names the process and good governance names the standard, so an evaluation that begins by identifying the duty-holder and the binding form reaches a defensible verdict while one that begins with adjectives about the state does not.

Claim -> named evidence -> analysis -> qualification:

- Government is the formal, constitutionally mandated set of institutions - legislature, executive and judiciary - that holds legitimate public authority, and it is only one actor inside governance rather than the whole of it.
- Governance is the wider process by which state and non-state actors, including the market, civil society and citizens, together make, implement and enforce collective decisions, so a governance answer must name which actor holds the duty before it evaluates performance.
- Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law.

Qualified conclusion: Government names the institutions, governance names the process and good governance names the standard, so an evaluation that begins by identifying the duty-holder and the binding form reaches a defensible verdict while one that begins with adjectives about the state does not.

ORIGINAL MAINS 2 - 10 MARKS

Question: Explain why the Worldwide Governance Indicators and the UNDP governance principles cannot be used interchangeably. Answer in about 150 words.

Model thesis: One is an aggregated perception-based comparative index with six named dimensions and the other is a normative process checklist that cannot rank anything, so an answer that merges them has already failed the discrimination the examiner is testing.

Claim -> named evidence -> analysis -> qualification:

- The World Bank Worldwide Governance Indicators use six named dimensions - Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law and Control of Corruption - and countries are scored on each dimension separately rather than on one undifferentiated total.
- The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect.
- The UNDP governance principles - participation, rule of law, transparency, responsiveness, consensus orientation, equity and inclusiveness, effectiveness and efficiency, accountability and strategic vision - form a normative

checklist that supplies process vocabulary and cannot rank anything, so treating them as a scoring system is a category error.

Qualified conclusion: One is an aggregated perception-based comparative index with six named dimensions and the other is a normative process checklist that cannot rank anything, so an answer that merges them has already failed the discrimination the examiner is testing.

ORIGINAL MAINS 3 - 15 MARKS

Question: Critically examine the Good Governance Index as a tool for measuring governance performance across Indian states. Answer in about 250 words.

Model thesis: As a sector-wise diagnostic that forces states to confront specific weakness the index is defensible, but as a summary judgment on governance quality it over-claims, and its value depends on whether an edition-dated poor score triggers correction rather than contestation.

Claim -> named evidence -> analysis -> qualification:

- The Good Governance Index was launched by the Department of Administrative Reforms and Public Grievances on 25 December 2019 as a composite diagnostic tool assessing state and union-territory performance across ten sectors, and the latest completed national edition located on that department as of 13 August 2026 is the Good Governance Index 2020-21, released on 25 December 2021.
- The Good Governance Index comparison grouping is edition-specific: the 2019 edition used three groups while the 2020-21 edition used four - Other States Group A, Other States Group B, North-East and Hill States, and Union Territories - so any grouping claim must carry its edition year, and the Gujarat top-rank fact belongs specifically to the 2020-21 edition.
- A previous audit introduced an unsupported claim that a third Good Governance Index edition described as 2025 had been released, no departmental report or Press Information Bureau release establishing that edition was located, and the correction record of 13 August 2026 withdraws the claim explicitly, so no post-2021 national edition, rank, score, top performer or indicator count may be asserted.
- Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it.

Qualified conclusion: As a sector-wise diagnostic that forces states to confront specific weakness the index is defensible, but as a summary judgment on governance quality it over-claims, and its value depends on whether an edition-dated poor score triggers correction rather than contestation.

ORIGINAL MAINS 4 - 15 MARKS

Question: Examine the claim that India's good-governance deficits lie in enforceable conversion mechanisms rather than in the absence of norms. Answer in about 250 words.

Model thesis: India has not lacked good-governance norms but enforceable conversion mechanisms, which is why the reforms that supplied an identifiable duty-holder and a remedy have moved outcomes further than any additional charter of principles.

Claim -> named evidence -> analysis -> qualification:

- The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute.
- Rule of law is anchored in Article 14 non-arbitrariness and reasoned quasi-judicial orders whose discipline is uneven below the regulator tier, transparency in Section 4 proactive disclosure under the Right to Information Act, 2005 whose compliance is not independently audited across authorities, and accountability in the Comptroller and Auditor General under Articles 148 to 151, the Lokpal and Lokayuktas Act, 2013 and the Central Vigilance Commission Act, 2003, which supply three different remedies and none of which is a general grievance authority.

- Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates.
- A norm becomes an outcome only by passing seven stages - legal form, identified duty-holding institution, procedure with timeline, officer, appeal and penalty, administrative capacity, citizen-side access and cost, correctable remedy, and counted feedback - and naming the stage at which a named instrument stops converts a generic complaint about poor governance into a diagnosis.

Qualified conclusion: India has not lacked good-governance norms but enforceable conversion mechanisms, which is why the reforms that supplied an identifiable duty-holder and a remedy have moved outcomes further than any additional charter of principles.

ORIGINAL MAINS 5 - 20 MARKS

Question: Assess whether the good-governance agenda is a universal standard or an externally imposed development discourse, using Indian institutional evidence. Answer in about 300 words.

Model thesis: The core of the standard - legality, answerability and non-arbitrariness - is universal while its instruments are contextual, and the Indian route is traceable to constitutional guarantees and domestic statutes rather than to donor conditionality, so the conditionality objection is answerable without abandoning the norms.

Claim -> named evidence -> analysis -> qualification:

- Four standing objections must be answered rather than ignored - the vagueness objection that bundled values such as speed against consultation conflict, the measurement objection that perception indices can encode elite priors, the conditionality objection that the agenda entered through donor conditionality, answered by tracing Indian norms to the Constitution and to domestic statutes, and the capacity objection that a further charter changes nothing at the capacity stage - while the Economic Survey 2018-19 Chapter 2 supplies the official behavioural-insights anchor in which a nudge changes the choice architecture without removing formal choice and cannot cure missing supply, unequal power, weak enforcement or a wrongly designed entitlement.
- Good governance is governance judged against normative standards - rule of law, transparency, accountability, participation, responsiveness, equity, effectiveness and consensus orientation - and the Second Administrative Reforms Commission frames it as public institutions conducting public affairs and managing public resources largely free of abuse and corruption with due regard for the rule of law.
- The Second Administrative Reforms Commission, constituted in 2005 and reporting through fifteen reports, supplies the India-specific institutional-reform frame, and India deliberately enforces the good-governance standard through a patchwork of sector laws such as the Right to Information Act, state right-to-service Acts and Section 17 of the Mahatma Gandhi National Rural Employment Guarantee Act rather than through a single overarching good-governance statute.
- Participation is anchored in Section 17 Gram Sabha social audit under the Mahatma Gandhi National Rural Employment Guarantee Act and in the Pre-Legislative Consultation Policy of 2014, which is executive rather than statutory and whose comments are not binding; responsiveness in state right-to-service Acts beginning with Madhya Pradesh in 2010 and the twenty-one-day benchmark of the Centralised Public Grievance Redress and Monitoring System stated in departmental guidelines of August 2024, which cover only notified services and remain administrative rather than adjudicatory; equity in direct benefit transfer targeting, where authentication failure converts an inclusion tool into an exclusion risk; and effectiveness in the Output-Outcome Monitoring Framework and the Development Monitoring and Evaluation Office, where output reporting still dominates.

Qualified conclusion: The core of the standard - legality, answerability and non-arbitrariness - is universal while its instruments are contextual, and the Indian route is traceable to constitutional guarantees and domestic statutes rather than to donor conditionality, so the conditionality objection is answerable without abandoning the norms.

ORIGINAL MAINS 6 - 20 MARKS

Question: Assess how far governance measurement in India can be trusted to guide reform, given the number and variety of instruments in use. Answer in about 300 words.

Model thesis: Measurement guides reform only where the instrument, the scale and the object are stated together and where the index carries a corrective loop, because four instruments measuring four different objects at four different scales cannot be aggregated into a single verdict on governance quality.

Claim -> named evidence -> analysis -> qualification:

- The Worldwide Governance Indicators measure cross-country comparison, the Good Governance Index measures state and union-territory sectoral governance, the National e-Governance Service Delivery Assessment measures end-service delivery depth at portal level and the Panchayati Raj Ministry Devolution Index measures panchayat devolution only, so treating the four as interchangeable governance rankings is the discrimination failure that costs marks.
- The Worldwide Governance Indicators are built substantially from aggregated perception surveys and expert assessments rather than solely from administrative statistics, so a score reports perceived quality with a margin of error and an administrative improvement can move ahead of, or lag behind, the perception it is supposed to reflect.
- Any governance index must be tested on indicator validity, data comparability where the ranked entity self-reports, the balance between output and realised outcome, federal and contextual adjustment for states of different size, base level and subject responsibility, and consequence, because an index whose poor score triggers no corrective process measures governance without improving it.
- The Rule of Law Index is published by the World Justice Project and not by the World Bank, and this attribution is the exact objective distinction routed by the audited 2018 Preliminary examination ledger to this owner, so the index must never be folded into the World Bank Worldwide Governance Indicators family.

Qualified conclusion: Measurement guides reform only where the instrument, the scale and the object are stated together and where the index carries a corrective loop, because four instruments measuring four different objects at four different scales cannot be aggregated into a single verdict on governance quality.
