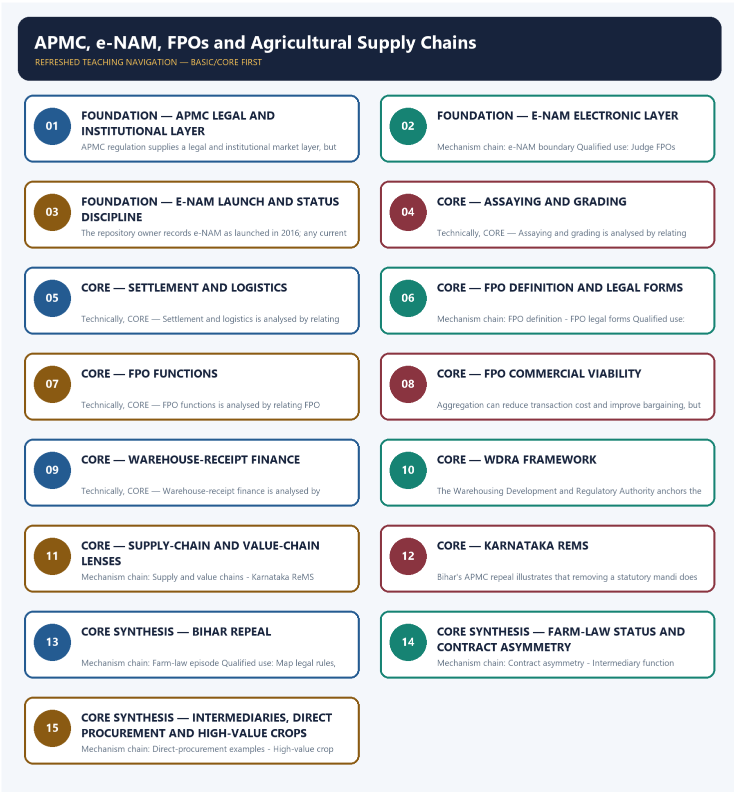
SOLVED PRACTICE WORKBOOK

APMC, e-NAM, FPOs and Agricultural Supply Chains - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing



Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

APMC, e-NAM, FPOs and Agricultural Supply Chains - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies APMC legal layer?

A. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. B. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. C. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. D. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics.

Answer: A. Explanation: An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q2. Which option preserves the accounting or regulatory boundary of APMC legal layer?

A. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. B. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. C. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. D. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics.

Answer: B. Explanation: An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q3. Which statement uses APMC legal layer without losing its vintage, basket or legal status?

A. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. B. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. C. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. D. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements.

Answer: C. Explanation: An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q4. Which option avoids the standard UPSC close-option trap about APMC legal layer?

A. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. B. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. C. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. D. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ.

Answer: D. Explanation: An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q5. Which statement correctly identifies Market committee function?

A. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. B. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. C. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. D. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics.

Answer: A. Explanation: APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q6. Which option preserves the accounting or regulatory boundary of Market committee function?

A. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. B. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. C. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. D. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard.

Answer: B. Explanation: APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q7. Which statement uses Market committee function without losing its vintage, basket or legal status?

A. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. B. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. C. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. D. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements.

Answer: C. Explanation: APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q8. Which option avoids the standard UPSC close-option trap about Market committee function?

A. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. B. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. C. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. D. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade.

Answer: D. Explanation: APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q9. Which statement correctly identifies e-NAM boundary?

A. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. B. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. C. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. D. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work.

Answer: A. Explanation: e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q10. Which option preserves the accounting or regulatory boundary of e-NAM boundary?

A. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. B. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. C. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. D. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work.

Answer: B. Explanation: e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q11. Which statement uses e-NAM boundary without losing its vintage, basket or legal status?

A. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. B. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. C. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. D. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical.

Answer: C. Explanation: e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q12. Which option avoids the standard UPSC close-option trap about e-NAM boundary?

A. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. B. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. C. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. D. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics.

Answer: D. Explanation: e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q13. Which statement correctly identifies e-NAM launch?

A. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. B. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. C. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. D. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements.

Answer: A. Explanation: The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q14. Which option preserves the accounting or regulatory boundary of e-NAM launch?

A. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. B. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. C. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. D. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members.

Answer: B. Explanation: The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q15. Which statement uses e-NAM launch without losing its vintage, basket or legal status?

A. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. B. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. C. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. D. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects.

Answer: C. Explanation: The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q16. Which option avoids the standard UPSC close-option trap about e-NAM launch?

A. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. B. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. C. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. D. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard.

Answer: D. Explanation: The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q17. Which statement correctly identifies Assaying?

A. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. B. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. C. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. D. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical.

Answer: A. Explanation: Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q18. Which option preserves the accounting or regulatory boundary of Assaying?

A. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. B. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. C. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. D. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members.

Answer: B. Explanation: Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q19. Which statement uses Assaying without losing its vintage, basket or legal status?

A. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. B. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. C. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. D. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects.

Answer: C. Explanation: Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q20. Which option avoids the standard UPSC close-option trap about Assaying?

A. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. B. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. C. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. D. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements.

Answer: D. Explanation: Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q21. Which statement correctly identifies Settlement and logistics?

A. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. B. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. C. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. D. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical.

Answer: A. Explanation: A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q22. Which option preserves the accounting or regulatory boundary of Settlement and logistics?

A. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. B. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. C. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. D. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members.

Answer: B. Explanation: A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q23. Which statement uses Settlement and logistics without losing its vintage, basket or legal status?

A. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. B. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. C. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. D. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted.

Answer: C. Explanation: A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q24. Which option avoids the standard UPSC close-option trap about Settlement and logistics?

A. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. B. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. C. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. D. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work.

Answer: D. Explanation: A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q25. Which statement correctly identifies FPO definition?

A. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. B. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. C. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. D. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability.

Answer: A. Explanation: An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q26. Which option preserves the accounting or regulatory boundary of FPO definition?

A. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. B. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. C. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. D. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability.

Answer: B. Explanation: An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q27. Which statement uses FPO definition without losing its vintage, basket or legal status?

A. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. B. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. C. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. D. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability.

Answer: C. Explanation: An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q28. Which option avoids the standard UPSC close-option trap about FPO definition?

A. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. B. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. C. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. D. An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical.

Answer: D. Explanation: An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q29. Which statement correctly identifies FPO legal forms?

A. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. B. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. C. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. D. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted.

Answer: A. Explanation: The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q30. Which option preserves the accounting or regulatory boundary of FPO legal forms?

A. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. B. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. C. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. D. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse.

Answer: B. Explanation: The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q31. Which statement uses FPO legal forms without losing its vintage, basket or legal status?

A. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. B. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. C. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. D. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate.

Answer: C. Explanation: The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q32. Which option avoids the standard UPSC close-option trap about FPO legal forms?

A. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. B. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. C. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. D. The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members.

Answer: D. Explanation: The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q33. Which statement correctly identifies FPO functions?

A. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. B. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. C. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. D. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted.

Answer: A. Explanation: The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q34. Which option preserves the accounting or regulatory boundary of FPO functions?

A. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. B. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. C. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. D. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse.

Answer: B. Explanation: The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q35. Which statement uses FPO functions without losing its vintage, basket or legal status?

A. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. B. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. C. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. D. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate.

Answer: C. Explanation: The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q36. Which option avoids the standard UPSC close-option trap about FPO functions?

A. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. B. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. C. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. D. The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects.

Answer: D. Explanation: The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q37. Which statement correctly identifies FPO viability?

A. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. B. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. C. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. D. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse.

Answer: A. Explanation: Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q38. Which option preserves the accounting or regulatory boundary of FPO viability?

A. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. B. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. C. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. D. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate.

Answer: B. Explanation: Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q39. Which statement uses FPO viability without losing its vintage, basket or legal status?

A. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. B. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. C. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. D. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate.

Answer: C. Explanation: Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q40. Which option avoids the standard UPSC close-option trap about FPO viability?

A. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. B. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. C. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. D. Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability.

Answer: D. Explanation: Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q41. Which statement correctly identifies Warehouse-receipt finance?

A. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. B. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. C. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. D. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate.

Answer: A. Explanation: A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q42. Which option preserves the accounting or regulatory boundary of Warehouse-receipt finance?

A. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. B. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. C. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. D. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement.

Answer: B. Explanation: A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q43. Which statement uses Warehouse-receipt finance without losing its vintage, basket or legal status?

A. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. B. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. C. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. D. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement.

Answer: C. Explanation: A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q44. Which option avoids the standard UPSC close-option trap about Warehouse-receipt finance?

A. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. B. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. C. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. D. A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted.

Answer: D. Explanation: A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q45. Which statement correctly identifies WDRA layer?

A. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. B. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. C. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. D. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate.

Answer: A. Explanation: The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q46. Which option preserves the accounting or regulatory boundary of WDRA layer?

A. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. B. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. C. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. D. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated.

Answer: B. Explanation: The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q47. Which statement uses WDRA layer without losing its vintage, basket or legal status?

A. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. B. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. C. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. D. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated.

Answer: C. Explanation: The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q48. Which option avoids the standard UPSC close-option trap about WDRA layer?

A. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. B. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. C. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. D. The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse.

Answer: D. Explanation: The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q49. Which statement correctly identifies Supply and value chains?

A. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. B. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. C. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. D. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions.

Answer: A. Explanation: A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q50. Which option preserves the accounting or regulatory boundary of Supply and value chains?

A. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. B. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. C. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. D. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal.

Answer: B. Explanation: A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q51. Which statement uses Supply and value chains without losing its vintage, basket or legal status?

A. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. B. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. C. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. D. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated.

Answer: C. Explanation: A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q52. Which option avoids the standard UPSC close-option trap about Supply and value chains?

A. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. B. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. C. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. D. A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate.

Answer: D. Explanation: A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q53. Which statement correctly identifies Karnataka ReMS?

A. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. B. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. C. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. D. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated.

Answer: A. Explanation: Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q54. Which option preserves the accounting or regulatory boundary of Karnataka ReMS?

A. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. B. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. C. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. D. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal.

Answer: B. Explanation: Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q55. Which statement uses Karnataka ReMS without losing its vintage, basket or legal status?

A. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. B. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. C. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. D. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary.

Answer: C. Explanation: Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q56. Which option avoids the standard UPSC close-option trap about Karnataka ReMS?

A. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. B. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. C. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. D. Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions.

Answer: D. Explanation: Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q57. Which statement correctly identifies Bihar repeal lesson?

A. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. B. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. C. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. D. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated.

Answer: A. Explanation: Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q58. Which option preserves the accounting or regulatory boundary of Bihar repeal lesson?

A. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. B. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. C. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. D. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal.

Answer: B. Explanation: Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q59. Which statement uses Bihar repeal lesson without losing its vintage, basket or legal status?

A. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. B. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. C. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. D. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary.

Answer: C. Explanation: Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q60. Which option avoids the standard UPSC close-option trap about Bihar repeal lesson?

A. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. B. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. C. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. D. Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement.

Answer: D. Explanation: Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q61. Which statement correctly identifies Farm-law episode?

A. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. B. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. C. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. D. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed.

Answer: A. Explanation: The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q62. Which option preserves the accounting or regulatory boundary of Farm-law episode?

A. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. B. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. C. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. D. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary.

Answer: B. Explanation: The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q63. Which statement uses Farm-law episode without losing its vintage, basket or legal status?

A. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. B. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. C. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. D. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary.

Answer: C. Explanation: The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q64. Which option avoids the standard UPSC close-option trap about Farm-law episode?

A. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. B. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. C. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. D. The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated.

Answer: D. Explanation: The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q65. Which statement correctly identifies Contract asymmetry?

A. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. B. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. C. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. D. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss.

Answer: A. Explanation: Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q66. Which option preserves the accounting or regulatory boundary of Contract asymmetry?

A. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. B. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. C. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. D. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ.

Answer: B. Explanation: Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q67. Which statement uses Contract asymmetry without losing its vintage, basket or legal status?

A. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. B. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. C. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. D. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ.

Answer: C. Explanation: Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q68. Which option avoids the standard UPSC close-option trap about Contract asymmetry?

A. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. B. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. C. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. D. Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal.

Answer: D. Explanation: Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q69. Which statement correctly identifies Intermediary function?

A. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. B. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. C. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. D. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss.

Answer: A. Explanation: Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q70. Which option preserves the accounting or regulatory boundary of Intermediary function?

A. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. B. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. C. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. D. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade.

Answer: B. Explanation: Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q71. Which statement uses Intermediary function without losing its vintage, basket or legal status?

A. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. B. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. C. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. D. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ.

Answer: C. Explanation: Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q72. Which option avoids the standard UPSC close-option trap about Intermediary function?

A. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. B. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. C. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. D. Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed.

Answer: D. Explanation: Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q73. Which statement correctly identifies Direct-procurement examples?

A. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. B. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. C. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. D. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss.

Answer: A. Explanation: The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q74. Which option preserves the accounting or regulatory boundary of Direct-procurement examples?

A. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. B. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. C. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. D. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ.

Answer: B. Explanation: The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q75. Which statement uses Direct-procurement examples without losing its vintage, basket or legal status?

A. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. B. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. C. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. D. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics.

Answer: C. Explanation: The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q76. Which option avoids the standard UPSC close-option trap about Direct-procurement examples?

A. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. B. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. C. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. D. The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary.

Answer: D. Explanation: The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q77. Which statement correctly identifies High-value crop chain?

A. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. B. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. C. An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. D. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade.

Answer: A. Explanation: High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q78. Which option preserves the accounting or regulatory boundary of High-value crop chain?

A. APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. B. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. C. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. D. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard.

Answer: B. Explanation: High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q79. Which statement uses High-value crop chain without losing its vintage, basket or legal status?

A. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. B. e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. C. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. D. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements.

Answer: C. Explanation: High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q80. Which option avoids the standard UPSC close-option trap about High-value crop chain?

A. Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. B. A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. C. The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. D. High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss.

Answer: D. Explanation: High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Audited ledgers route Mains demands on supermarkets, transport and marketing constraints, upstream and downstream bottlenecks, high-value crops and supply-chain management. Objective demands on Tea Board and Small Farmer Large Field are retained as concept routes without inferred answer letters.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- ANALYSIS: 2025 GS-III: Scope and significance of supply-chain management of agricultural commodities.
- ANALYSIS: 2025 GS-III: Factors shaping farmers' choice of high-value crops.
- ANALYSIS: **Supply-chain answer route:** trace aggregation, grading, warehousing, finance, transport, processing, standards and final market access; then identify where value, spoilage risk or bargaining power gets concentrated.
- ANALYSIS: **High-value-crop answer route:** add perishability, irrigation reliability, buyer contracts, cold-chain depth, FPO support and logistics to the usual price-and-water discussion.
- ANALYSIS: **Unfamiliar-question route:** if the paper asks whether reform should focus on APMC laws or logistics, compare Karnataka ReMS, Bihar repeal, e-NAM, NWRs and FPOs rather than arguing in absolutes.
- ANALYSIS: **2018 GS-III Q4 route (supermarkets and intermediary elimination):** use Section 5A - name Reliance Retail/e-Choupal/Safal, explain why the aggregation-grading-logistics function is retained even as the traditional commission-agent layer is bypassed, and add the monopsony/bargaining-power counter-evidence before concluding.

Recent PYQ Integration (2024-2025)

> **Status:** 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: `_PYQ-ROUTING-MAINS-GS3-GS4-2024-2025.md`.

- **Years represented:** 2025
- **Paper(s):** GS-III
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2025	GS-III	3	Factors influencing farmers' selection of high-value crops	Explain · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2025	GS-III	4	Scope and significance of supply-chain management of agricultural commodities	Elaborate · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Factors influencing farmers' selection of high-value crops
- Scope and significance of supply-chain management of agricultural commodities

> This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

> **Status:** Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: `_PYQ-ROUTING-MAINS-GS3-GS4-2018-2023.md`, `_PYQ-ROUTING-PRELIMS-2018-2023.md`. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2018, 2020, 2022, 2023
- **Paper(s):** GS-III, Prelims GS-I
- **Routed question demands:** 5

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	GS-III	4	Supermarkets in agricultural supply chain and intermediary elimination	Examine · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2020	GS-III	3	Constraints in transport and marketing of agricultural produce	What are · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2022	GS-III	13	Bottlenecks in upstream and downstream agricultural marketing in India	Discuss · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2022	Prelims GS-I	79	Tea Board India statutory body ministry and overseas offices	Objective question; official key unavailable locally	Commodity-sector specialist plus statutory-body classification Core; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2023	Prelims GS-I	26	Small Farmer Large Field cooperative agricultural concept	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Supermarkets in agricultural supply chain and intermediary elimination
- Constraints in transport and marketing of agricultural produce
- Bottlenecks in upstream and downstream agricultural marketing in India
- Tea Board India statutory body ministry and overseas offices
- Small Farmer Large Field cooperative agricultural concept

> The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- ANALYSIS: 2025 GS-III: Supply-chain management of agricultural commodities.

- ANALYSIS: 2025 GS-III: Factors shaping farmers' choice of high-value crops.
- ANALYSIS: **Supply-chain answer engine:** map product, information, payment and risk flows from

farm gate to consumer; assess aggregation, assaying, cold/ordinary storage, working capital, logistics, processing, standards and contracts before prescribing an app or a new mandi.

Historical PYQ Integration (2018-2023)

> **Status:** Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: `_PYQ-ROUTING-MAINS-GS3-GS4-2018-2023.md`.

- **Years represented:** 2018, 2020, 2022
- **Paper(s):** GS-III
- **Routed question demands:** 3

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	GS-III	4	Supermarkets in agricultural supply chain and intermediary elimination	Examine · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2020	GS-III	3	Constraints in transport and marketing of agricultural produce	What are · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2022	GS-III	13	Bottlenecks in upstream and downstream agricultural marketing in India	Discuss · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Supermarkets in agricultural supply chain and intermediary elimination
- Constraints in transport and marketing of agricultural produce
- Bottlenecks in upstream and downstream agricultural marketing in India

> The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2018 GS-III

Demand: Examine whether supermarkets can eliminate intermediaries in agricultural supply chains.

Status: Verified routed Mains demand; original model solution, not an official answer.

Model solution: Intermediary function: Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. **Direct-procurement examples:** The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. **FPO viability:** Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. **Contract asymmetry:** Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

PYQ DEMAND CARD 2 - 2020 GS-III

Demand: Identify constraints in transport and marketing of agricultural produce.

Status: Verified routed Mains demand; original model solution, not an official answer.

Model solution: Market committee function: APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. **Assaying:** Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. **Settlement and logistics:** A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. **Warehouse-receipt finance:** A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. **High-value crop chain:** High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

PYQ DEMAND CARD 3 - 2022 GS-III

Demand: Discuss bottlenecks in upstream and downstream agricultural marketing.

Status: Verified routed Mains demand; original model solution, not an official answer.

Model solution: Assaying: Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. **Settlement and logistics:** A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. **FPO viability:** Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. **Supply and value chains:** A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. **Contract asymmetry:** Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. **High-value crop chain:** High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

PYQ DEMAND CARD 4 - 2025 GS-III

Demand: Elaborate the scope and significance of supply-chain management for agricultural commodities.

Status: Verified routed Mains demand; original model solution, not an official answer.

Model solution: Supply and value chains: A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. **Assaying:** Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. **Settlement and logistics:** A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. **Warehouse-receipt finance:** A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. **High-value crop chain:** High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

PYQ DEMAND CARD 5 - 2025 GS-III

Demand: Explain factors influencing farmers' selection of high-value crops.

Status: Verified routed Mains demand; original model solution, not an official answer.

Model solution: FPO viability: Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. **Contract asymmetry:** Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. **High-value crop chain:** High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish APMC regulation from e-NAM trading. Answer in about 150 words.

Model thesis: Claim: APMC legal layer. **Named evidence/example:** An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Market committee function. **Named evidence/example:** APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** e-NAM boundary. **Named evidence/example:** e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** e-NAM launch. **Named evidence/example:** The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ.
- APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade.
- e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics.
- The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard.

Qualified conclusion: Claim: APMC legal layer. **Named evidence/example:** An Agricultural Produce Market Committee operates under the applicable state marketing law for notified produce, market yards, licensing, fees and local practices; state designs differ. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Market committee function. **Named evidence/example:** APMC regulation supplies a legal and institutional market layer, but competition, assaying, storage, payment and dispute resolution determine the quality of actual trade. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** e-NAM boundary. **Named evidence/example:** e-NAM is an electronic trading and price-discovery layer connecting participating mandis; it does not itself abolish APMC laws or create physical logistics. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** e-NAM launch. **Named evidence/example:** The repository owner records e-NAM as launched in 2016; any current count of mandis, states, lots or participants requires a dated official dashboard. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

ORIGINAL MAINS 2 - 10 MARKS

Question: Why are assaying and settlement indispensable to digital trade? Answer in about 150 words.

Model thesis: Claim: Assaying. **Named evidence/example:** Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Settlement and logistics. **Named evidence/example:** A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements.
- A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work.

Qualified conclusion: Claim: Assaying. **Named evidence/example:** Assaying and grading convert heterogeneous produce into credible tradable categories, enabling comparison and distant bidding while imposing quality-measurement requirements. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Settlement and logistics. **Named evidence/example:** A displayed bid becomes a completed trade only when payment, title, loading, transport, delivery, grievance handling and quality settlement work. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

ORIGINAL MAINS 3 - 15 MARKS

Question: Explain the legal role and commercial constraints of FPOs. Answer in about 250 words.

Model thesis: Claim: FPO definition. **Named evidence/example:** An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** FPO legal forms. **Named evidence/example:** The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** FPO functions. **Named evidence/example:** The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** FPO viability. **Named evidence/example:** Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical.
- The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members.
- The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects.
- Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability.

Qualified conclusion: Claim: FPO definition. **Named evidence/example:** An FPO is a producer organisation whose members are farmers; a producer organisation may take more than one legal form, so FPO and cooperative are not universally identical. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** FPO legal forms. **Named evidence/example:** The official SFAC FAQ states that a producer organisation can be a producer company, cooperative society or another legal form that shares benefits among members. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** FPO functions. **Named evidence/example:** The SFAC FAQ lists production, procurement, grading, pooling, marketing, processing, member services, resource conservation, insurance and finance among possible producer-company objects. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** FPO viability. **Named evidence/example:** Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

ORIGINAL MAINS 4 - 15 MARKS

Question: How does warehouse-receipt finance reduce distress sale? Answer in about 250 words.

Model thesis: Claim: Warehouse-receipt finance. **Named evidence/example:** A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** WDRA layer. **Named evidence/example:** The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted.
- The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse.

Qualified conclusion: Claim: Warehouse-receipt finance. **Named evidence/example:** A negotiable warehouse receipt can separate harvest-time cash need from sale timing by supporting credit against stored produce, provided storage, grading and documentation are trusted. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** WDRA layer. **Named evidence/example:** The Warehousing Development and Regulatory Authority anchors the regulated warehousing and negotiable-receipt framework; a receipt is not credible merely because a building is called a warehouse. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

ORIGINAL MAINS 5 - 20 MARKS

Question: Compare Karnataka integration, Bihar repeal and the 2020-2021 farm-law episode. Answer in about 300 words.

Model thesis: Claim: Karnataka ReMS. **Named evidence/example:** Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Bihar repeal lesson. **Named evidence/example:** Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Farm-law episode. **Named evidence/example:** The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions.
- Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement.
- The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated.

Qualified conclusion: Claim: Karnataka ReMS. **Named evidence/example:** Karnataka's ReMS model illustrates unified rules, assaying and electronic processes within a reformed mandi architecture rather than digitisation detached from physical institutions. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Bihar repeal lesson. **Named evidence/example:** Bihar's APMC repeal illustrates that removing a statutory mandi does not automatically create assaying, private competition, storage, roads or enforceable settlement. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Farm-law episode. **Named evidence/example:** The Farmers' Produce Trade and Commerce Act, 2020 created an outside-APMC channel and was repealed through the Farm Laws Repeal Act, 2021; legal status and federal trust must be dated. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

ORIGINAL MAINS 6 - 20 MARKS

Question: Design an agricultural supply chain that improves price realisation without replacing one monopsony with another. Answer in about 300 words.

Model thesis: Claim: FPO viability. **Named evidence/example:** Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Supply and value chains. **Named evidence/example:** A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Contract asymmetry. **Named evidence/example:** Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Intermediary function. **Named evidence/example:** Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Direct-procurement examples. **Named evidence/example:** The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** High-value crop chain. **Named evidence/example:** High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability.
- A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate.
- Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal.
- Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed.
- The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary.
- High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss.

Qualified conclusion: Claim: FPO viability. **Named evidence/example:** Aggregation can reduce transaction cost and improve bargaining, but working capital, professional management, member trust, business volume and reliable buyers determine viability. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Supply and value chains. **Named evidence/example:** A supply chain traces product, information, payment and risk from inputs to retail, while a value-chain lens additionally asks where value is created and margins or power accumulate. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Contract asymmetry. **Named evidence/example:** Contract farming may reduce buyer uncertainty but can shift quality, rejection, price and enforcement risk onto small farmers when bargaining and dispute-resolution capacity are unequal. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Intermediary function. **Named evidence/example:** Organised retail or direct procurement can replace the traditional commission-agent layer, but aggregation, grading, finance and logistics functions still have to be performed. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** Direct-procurement examples. **Named evidence/example:** The owner uses ITC e-Choupal, Mother Dairy Safal and organised retail sourcing as named examples, while cautioning that reach, commodity scope and bargaining outcomes vary. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source. **Claim:** High-value crop chain. **Named evidence/example:** High-value crop choice depends on water, perishability, cold-chain depth, standards, contract terms and buyer access; production promotion without downstream demand can increase loss. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility, crop and geography scope, implementation stage, stock-flow distinction or legal perimeter rather than generalise beyond the source.
