00

STAGE 00

POPULATION BALANCE EQUATION

POPULATION BALANCE EQUATION | POPULATION AT T2 | POPULATION AT T1 + BIRTHS - DEATHS +/- MIGRATION | TIME-SPECIFIC SNAPSHOT, NOT A CONTINUOUS LIVE COUNTER | GROWTH RATE | OUTCOME OF ALL THREE COMPONENTS TOGETHER | BIRTH RATE ALONE CANNOT EXPLAIN TOTAL POPULATION CHANGE | MUST REMEMBER

POPULATION AT T2 = population at T1 + births - deaths +/- migration → **CENSUS → time-specific snapshot, not a continuous live counter** → **GROWTH RATE → outcome of all three components together** → **TRAP → birth rate alone cannot explain total population change** → **MUST REMEMBER: Population geography separates stock, structure, distribution, density, growth, fertility, mortality and mobility**

CORE CLAIM

- POPULATION AT T2 = population at T1 + births - deaths +/- migration
- CENSUS → time-specific snapshot, not a continuous live counter

MECHANISM

- GROWTH RATE → outcome of all three components together
- TRAP → birth rate alone cannot explain total population change

CONSEQUENCE / LIMIT

- MUST REMEMBER: Population geography separates stock, structure, distribution, density, growth, fertility, mortality and mobility
- demographic transition moves from high birth/high death through mortality-led growth and fertility decline toward low rates, with a

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: TRAP → birth rate alone cannot explain total population change.

01

STAGE 01

DEMOGRAPHIC TRANSITION SPINE

DEMOGRAPHIC TRANSITION SPINE | STAGE 1 | HIGH BIRTH, HIGH DEATH, UNSTABLE GROWTH | STAGE 2 | DEATH RATE FALLS FIRST, BIRTH STAYS HIGH | STAGE 3 | FERTILITY FALLS, GROWTH SLOWS | STAGE 4/5

STAGE 1 → high birth, high death, unstable growth → **STAGE 2 → death rate falls first, birth stays high** → **STAGE 3 → fertility falls, growth slows** → **STAGE 4/5 → low rates, then ageing or decline in some societies**

CORE CLAIM

- STAGE 1 → high birth, high death, unstable growth
- STAGE 2 → death rate falls first, birth stays high

MECHANISM

- STAGE 3 → fertility falls, growth slows
- STAGE 4/5 → low rates, then ageing or decline in some societies

CONSEQUENCE / LIMIT

- STAGE 1 → high birth, high death, unstable growth
- STAGE 2 → death rate falls first, birth stays high

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: STAGE 4/5 → low rates, then ageing or decline in some societies.

02

STAGE 02

POPULATION PYRAMID READING

POPULATION PYRAMID READING | BROAD BASE, YOUTHFUL AGE STRUCTURE, HIGH FERTILITY | MODERATED BASE AND FULLER MIDDLE, SLOWER GROWTH | NARROW BASE AND WIDER UPPER AGES, AGEING TREND | READING RULE | SHAPE, DEPENDENCY AND LABOUR SUPPLY MOVE TOGETHER

CORE CLAIM	MECHANISM	CONSEQUENCE / LIMIT
EXPANSIVE → broad base, youthful age structure, high fertility	CONSTRICTIVE → narrow base and wider upper ages, ageing trend	EXPANSIVE → broad base, youthful age structure, high fertility
STATIONARY → moderated base and fuller middle, slower growth	READING RULE → shape, dependency and labour supply move together	STATIONARY → moderated base and fuller middle, slower growth

CORE CLAIM

- EXPANSIVE → broad base, youthful age structure, high fertility
- STATIONARY → moderated base and fuller middle, slower growth

MECHANISM

- CONSTRICTIVE → narrow base and wider upper ages, ageing trend
- READING RULE → shape, dependency and labour supply move together

CONSEQUENCE / LIMIT

- EXPANSIVE → broad base, youthful age structure, high fertility
- STATIONARY → moderated base and fuller middle, slower growth

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: READING RULE → shape, dependency and labour supply move together.

03

STAGE 03

DEPENDENCY TO DIVIDEND FORK

DEPENDENCY TO DIVIDEND FORK | WORKING-AGE SHARE RISES | DEPENDENCY RATIO CAN FALL | IF HEALTH + EDUCATION + SKILLS + JOBS IMPROVE | DIVIDEND WINDOW | IF LABOUR ABSORPTION FAILS | UNEMPLOYMENT AND INFORMALITY RISE | DEMOGRAPHY GIVES POTENTIAL, INSTITUTIONS DECIDE THE OUTCOME

WORKING-AGE SHARE RISES → dependency ratio can fall

IF health + education + skills + jobs improve → dividend window → **IF labour absorption fails → unemployment and informality rise** → **VERDICT → demography gives potential, institutions decide the outcome**

CORE CLAIM

- WORKING-AGE SHARE RISES → dependency ratio can fall
- IF health + education + skills + jobs improve → dividend window

MECHANISM

- IF labour absorption fails → unemployment and informality rise
- VERDICT → demography gives potential, institutions decide the outcome

CONSEQUENCE / LIMIT

- WORKING-AGE SHARE RISES → dependency ratio can fall
- IF health + education + skills + jobs improve → dividend window

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: VERDICT → demography gives potential, institutions decide the outcome.

04

STAGE 04

POPULATION-RESOURCE TRIANGLE

POPULATION-RESOURCE TRIANGLE | TOO FEW PEOPLE TO USE RESOURCES FULLY | PRESSURE LOWERS LIVING STANDARDS AND EMPLOYMENT QUALITY | OPTIMUM POPULATION | RELATIVE BALANCE OF PEOPLE, RESOURCES AND TECHNOLOGY | SHIFT RULE | TECHNOLOGY, TRADE AND INSTITUTIONS CAN MOVE THE OPTIMUM

CORE CLAIM	MECHANISM	CONSEQUENCE / LIMIT
UNDER-POPULATION → too few people to use resources fully	OPTIMUM POPULATION → relative balance of people, resources and technology	UNDER-POPULATION → too few people to use resources fully
OVER-POPULATION → pressure lowers living standards and employment quality	SHIFT RULE → technology, trade and institutions can move the optimum	OVER-POPULATION → pressure lowers living standards and employment quality

CORE CLAIM

- UNDER-POPULATION → too few people to use resources fully
- OVER-POPULATION → pressure lowers living standards and employment quality

MECHANISM

- OPTIMUM POPULATION → relative balance of people, resources and technology
- SHIFT RULE → technology, trade and institutions can move the optimum

CONSEQUENCE / LIMIT

- UNDER-POPULATION → too few people to use resources fully
- OVER-POPULATION → pressure lowers living standards and employment quality

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: SHIFT RULE → technology, trade and institutions can move the optimum.

05

STAGE 05

INDIA DEMOGRAPHIC TIMELINE

INDIA DEMOGRAPHIC TIMELINE | STAGNATION UNDER HIGH BIRTH AND HIGH DEATH RATES | STEADY GROWTH AFTER THE TURNING POINT | POPULATION EXPLOSION AS MORTALITY FALLS SHARPLY | SLOWING GROWTH AS FERTILITY DECLINE DEEPENS

1901-1921 → stagnation under high birth and high death rates → **1921-1951 → steady growth after the turning point** → **1951-1981 → population explosion as mortality falls sharply** → **1981-2011 → slowing growth as fertility decline deepens**

CORE CLAIM

- 1901-1921 → stagnation under high birth and high death rates
- 1921-1951 → steady growth after the turning point

MECHANISM

- 1951-1981 → population explosion as mortality falls sharply
- 1981-2011 → slowing growth as fertility decline deepens

CONSEQUENCE / LIMIT

- 1901-1921 → stagnation under high birth and high death rates
- 1921-1951 → steady growth after the turning point

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: 1981-2011 → slowing growth as fertility decline deepens.

06

STAGE 06

INDIA DATA-SOURCE FIREWALL

INDIA DATA-SOURCE FIREWALL | CENSUS 2011 | 1.21 BILLION TOTAL; SEX RATIO 943; LITERACY 74.04% | SRS 2022 | TFR 2.0; FERTILITY ANCHOR, NOT CENSUS COUNT | UN WPP 2024 | MID-2024 ESTIMATE ABOUT 1.45 BILLION PROJECTION | KEEP INSTRUMENT, DATE AND STATUS LABEL ATTACHED TO EVERY

CENSUS 2011 → 1.21 billion total; sex ratio 943; literacy 74.04%

SRS 2022 / NFHS-5 → TFR 2.0; fertility anchor, not census count → **UN WPP 2024 → mid-2024 estimate about 1.45 billion projection** → **RULE → keep instrument, date and status label attached to every figure**

CORE CLAIM

- CENSUS 2011 → 1.21 billion total; sex ratio 943; literacy 74.04%
- SRS 2022 / NFHS-5 → TFR 2.0; fertility anchor, not census count

MECHANISM

- UN WPP 2024 → mid-2024 estimate about 1.45 billion projection
- RULE → keep instrument, date and status label attached to every figure

CONSEQUENCE / LIMIT

- CENSUS 2011 → 1.21 billion total; sex ratio 943; literacy 74.04%
- SRS 2022 / NFHS-5 → TFR 2.0; fertility anchor, not census count

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: RULE → keep instrument, date and status label attached to every figure.

07

STAGE 07

KERALA-EAG CONTRAST RAIL

KERALA-EAG CONTRAST RAIL | EARLY FERTILITY DECLINE, HIGHER LITERACY, LATER-AGEING PRESSURES | EAG STATES | MORE YOUTHFUL STRUCTURES AND SLOWER TRANSITION TIMING | NATIONAL AVERAGE | HIDES STAGGERED STATE-LEVEL TRANSITION STAGES | EXAM USE | INDIA CONTAINS EARLY, MIDDLE AND LATE TRANSITION SPACES TOGETHER

CORE CLAIM	MECHANISM	CONSEQUENCE / LIMIT
KERALA → early fertility decline, higher literacy, later-ageing pressures	NATIONAL AVERAGE → hides staggered state-level transition stages	KERALA → early fertility decline, higher literacy, later-ageing pressures
EAG STATES → more youthful structures and slower transition timing	EXAM USE → India contains early, middle and late transition spaces together	EAG STATES → more youthful structures and slower transition timing

CORE CLAIM

- KERALA → early fertility decline, higher literacy, later-ageing pressures
- EAG STATES → more youthful structures and slower transition timing

MECHANISM

- NATIONAL AVERAGE → hides staggered state-level transition stages
- EXAM USE → India contains early, middle and late transition spaces together

CONSEQUENCE / LIMIT

- KERALA → early fertility decline, higher literacy, later-ageing pressures
- EAG STATES → more youthful structures and slower transition timing

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: EXAM USE → India contains early, middle and late transition spaces together.

08

STAGE 08

AGEING WITH POPULATION MOMENTUM

AGEING WITH POPULATION MOMENTUM | REPLACEMENT-LEVEL TFR | DOES NOT STOP GROWTH IMMEDIATELY | YOUNG COHORT BULGE | POPULATION MOMENTUM KEEPS TOTALS RISING | EARLY-TRANSITION STATES | OLD-AGE BURDEN APPEARS SOONER | LATE-TRANSITION STATES

REPLACEMENT-LEVEL TFR → does not stop growth immediately → **YOUNG COHORT BULGE → population momentum keeps totals rising** → **EARLY-TRANSITION STATES → old-age burden appears sooner** → **LATE-TRANSITION STATES → youth bulge and migration pressure persist longer**

CORE CLAIM

- REPLACEMENT-LEVEL TFR → does not stop growth immediately
- YOUNG COHORT BULGE → population momentum keeps totals rising

MECHANISM

- EARLY-TRANSITION STATES → old-age burden appears sooner
- LATE-TRANSITION STATES → youth bulge and migration pressure persist longer

CONSEQUENCE / LIMIT

- REPLACEMENT-LEVEL TFR → does not stop growth immediately
- YOUNG COHORT BULGE → population momentum keeps totals rising

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: LATE-TRANSITION STATES → youth bulge and migration pressure persist longer.

09

STAGE 09

SEX RATIO INTERPRETATION RULE

SEX RATIO INTERPRETATION RULE | SEX RATIO | SHAPED BY BIRTHS, MORTALITY AND MIGRATION TOGETHER | LABOUR MIGRATION | CAN SKEW ALL-AGE RATIOS WITHOUT CHANGING BIRTHS | CHILD SEX RATIO | ISOLATES A DIFFERENT PART OF THE DEMOGRAPHIC PROBLEM | SAFE ANSWER

SEX RATIO → shaped by births, mortality and migration together → **LABOUR MIGRATION → can skew all-age ratios without changing births** → **CHILD SEX RATIO → isolates a different part of the demographic problem** → **SAFE ANSWER → define the measure before comparing regions** → **CLOSE DISTINCTION: Crude birth/death rates, TFR, replacement fertility, dependency ratio, sex ratio, life expectancy and**

CORE CLAIM

- SEX RATIO → shaped by births, mortality and migration together
- LABOUR MIGRATION → can skew all-age ratios without changing births
- CHILD SEX RATIO → isolates a different part of the demographic problem

MECHANISM

- SAFE ANSWER → define the measure before comparing regions
- CLOSE DISTINCTION: Crude birth/death rates, TFR, replacement fertility, dependency ratio, sex ratio, life expectancy and population pyramid answer
- demographic dividend is a conditional age-structure opportunity, not an automatic growth bonus, and

CONSEQUENCE / LIMIT

- Census 2011, SRS, NFHS and UN estimates retain different reference dates and methods.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: CLOSE DISTINCTION: Crude birth/death rates, TFR, replacement fertility, dependency ratio, sex ratio, life expectancy and population pyramid answer different questions; demographic dividend is a conditional age-structure opportunity, not an automatic growth bonus, and.

10

STAGE 10

WORLD DIVERGENCE UNDER ONE MODEL

WORLD DIVERGENCE UNDER ONE MODEL | SUB-SAHARAN AFRICA | YOUTHFUL, HIGH-GROWTH STRUCTURES REMAIN COMMON | EAST ASIA | LOW FERTILITY, AGEING AND LABOUR SHORTAGE CONCERNS | DIVIDEND WINDOW PLUS INTERNAL DIVERGENCE AT THE SAME TIME | ONE TRANSITION MODEL YIELDS VERY DIFFERENT POLICY PROBLEMS | EVIDENCE LIMIT

CORE CLAIM	MECHANISM	CONSEQUENCE / LIMIT
SUB-SAHARAN AFRICA → youthful, high-growth structures remain common	LESSON → one transition model yields very different policy problems	transition theory is descriptive, while policy, health, education, labour absorption and gender agency explain divergent pathways.
EUROPE / EAST ASIA → low fertility, ageing and labour shortage concerns	EVIDENCE LIMIT: India must be mapped through Kerala/Tamil Nadu ageing and low fertility,	
INDIA → dividend window plus internal divergence at the same time	EAG-state youth and higher fertility, urban-rural and gender contrasts, and migration-adjusted state patterns	

CORE CLAIM

- SUB-SAHARAN AFRICA → youthful, high-growth structures remain common
- EUROPE / EAST ASIA → low fertility, ageing and labour shortage concerns
- INDIA → dividend window plus internal divergence at the same time

MECHANISM

- LESSON → one transition model yields very different policy problems
- EVIDENCE LIMIT: India must be mapped through Kerala/Tamil Nadu ageing and low fertility,
- EAG-state youth and higher fertility, urban-rural and gender contrasts, and migration-adjusted state patterns

CONSEQUENCE / LIMIT

- transition theory is descriptive, while policy, health, education, labour absorption and gender agency explain divergent pathways.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: EAG-state youth and higher fertility, urban-rural and gender contrasts, and migration-adjusted state patterns; transition theory is descriptive, while policy, health, education, labour absorption and gender agency explain divergent pathways.

11

STAGE 11

POPULATION ANSWER SPINE

POPULATION ANSWER SPINE | INDICATOR, CENSUS OR SURVEY, AND WHAT EXACTLY IS BEING | TRANSITION STAGE, PYRAMID SHAPE AND DEPENDENCY CONDITION | WORLD CONTRAST PLUS KERALA-EAG OR OTHER STATE DIVERGENCE | PROJECTION VERSUS CENSUS, DIVIDEND VERSUS MOMENTUM, NO FABRICATED PYQ

DEFINE → indicator, census or survey, and what exactly is being measured → **ORDER → transition stage, pyramid shape and dependency condition** → **LOCATE → world contrast plus Kerala-EAG or other state divergence** → **QUALIFY → projection versus census, dividend versus momentum, no fabricated PYQ**

CORE CLAIM

- DEFINE → indicator, census or survey, and what exactly is being measured
- ORDER → transition stage, pyramid shape and dependency condition

MECHANISM

- LOCATE → world contrast plus Kerala-EAG or other state divergence
- QUALIFY → projection versus census, dividend versus momentum, no fabricated PYQ

CONSEQUENCE / LIMIT

- DEFINE → indicator, census or survey, and what exactly is being measured
- ORDER → transition stage, pyramid shape and dependency condition

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: QUALIFY → projection versus census, dividend versus momentum, no fabricated PYQ.

E

EXTRA

SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

OPTIONAL ADVANCED ENRICHMENT | SOUTHERN AND SOME WESTERN STATES MOVED EARLIER TOWARDS LOWER | SEVERAL EAG OR HISTORICALLY LAGGING STATES RETAINED YOUTHFUL AGE | LONGER, WHICH KEPT NATIONAL MOMENTUM HIGH EVEN AS ALL-INDIA | THEREFORE INDIA SIMULTANEOUSLY CONTAINS AGEING POCKETS , REPLACEMENT-LEVEL STATES | OFFICE OF THE REGISTRAR GENERAL AND CENSUS COMMISSIONER, INDIA | CENSUS AND SRS. | MINISTRY OF HEALTH AND FAMILY WELFARE

OPTIONAL SOURCE DEPTH

- CAUTION: Southern and some western states moved earlier towards lower fertility, better female literacy and slower growth.
- CAUTION: Several EAG or historically lagging states retained youthful age structures for
- longer, which kept national momentum high even as all-India fertility fell.
- CAUTION: Therefore India simultaneously contains ageing pockets , replacement-level states , and youth-bulge states .

ADVANCED DEBATE

- Office of the Registrar General and Census Commissioner, India . Census and SRS.
- Ministry of Health and Family Welfare : NFHS.
- UN DESA Population Division : World Population Prospects for dated international comparison.
- CAUTION: In Mains, naming the source often upgrades credibility more than adding an unverified number.

LEGACY / NUANCE

- 1921 is widely treated as India's demographic turning point.
- India has reached replacement-level fertility at the national scale in recent official estimates, but not uniformly across all states.
- The last completed Census is 2011.
- Census, SRS and NFHS answer different questions and should not be mixed casually.

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.

END OF MASTER CANVAS • poster embeds this exact master • tiled pages are overlapping crops of the same pixels
