

ASCI MASTER FLOW – PANEL 1/12: Two commissions, two questions

FIRST COMMISSION -> 1966 to 1970; Morarji Desai, later K. Hanumanthaiah

QUESTION ASKED -> how to build an administrative structure for a planning-era state

SECOND COMMISSION -> constituted 2005; M. Veerappa Moily; fifteen reports, 2006 to 2009

QUESTION ASKED -> how to make an existing structure accountable and technology-enabled

MUST REMEMBER: Administrative reform changes structures, processes, personnel, ethics,...

ASCII MASTER FLOW – PANEL 2/12: Five-status ladder

PROPOSED -> the report text alone; the commonest error is presenting this as practice

ACCEPTED IN PRINCIPLE -> a recorded decision with no operative instrument

NOTIFIED OR ENACTED -> an Act, rule, order or scheme instrument exists

OPERATIONAL -> institutions, staff, budget and procedure are actually functioning

EVALUATED -> independent evidence exists on implementation quality and outcome

ASCII MASTER FLOW – PANEL 3/12: The ladder written as one sentence

STEP 1 -> the commission recommended the measure

STEP 2 -> the government accepted it in principle

STEP 3 -> the operative instrument is the named later Act, rule or scheme

STEP 4 -> whether it functions as intended has not been independently evaluated

ASCII MASTER FLOW – PANEL 4/12: Routing table, reports one to eight

- 1 RIGHT TO INFORMATION -> transparency and accountability owner
- 2 UNLOCKING HUMAN CAPITAL -> policy design and implementation owner
- 3 CRISIS MANAGEMENT -> Paper-III disaster-management space; cross-reference only
- 4 ETHICS IN GOVERNANCE -> institutional accountability owners; personal probity is Ethics
- 5 PUBLIC ORDER -> Paper-III internal-security space; cross-reference only
- 6 LOCAL GOVERNANCE -> local governance and service delivery owner
- 7 CAPACITY BUILDING FOR CONFLICT RESOLUTION -> cross-reference only
- 8 COMBATING TERRORISM -> Paper-III internal-security space; cross-reference only

ASCII MASTER FLOW – PANEL 5/12: Routing table, reports nine to fifteen

- 9 SOCIAL CAPITAL -> civil-society, self-help-group and non-governmental-organisation owner
- 10 REFURBISHING OF PERSONNEL ADMINISTRATION -> civil services and capacity owner
- 11 PROMOTING E-GOVERNANCE -> e-governance models and user-centricity owner
- 12 CITIZEN-CENTRIC ADMINISTRATION -> citizen-centric administration owner
- 13 ORGANISATIONAL STRUCTURE OF GOVERNMENT -> machinery and coordination; Polity cross-link
- 14 STRENGTHENING FINANCIAL MANAGEMENT -> public finance and service-delivery tools owner
- 15 STATE AND DISTRICT ADMINISTRATION -> local governance and district delivery owner

ASCII MASTER FLOW – PANEL 6/12: Nodal department card

WHAT IT IS -> the nodal Union department for tracking and coordinating follow-up

WHAT IT DOES -> circulates recommendations, holds institutional memory, coordinates ministries

WHAT IT CANNOT DO -> compel a line ministry or a State government to implement anything

CONSEQUENCE -> non-implementation is often an institutional fact, not an attitude

CLOSE DISTINCTION: Commission recommendation is not law, acceptance in principle is not...

ASCII MASTER FLOW – PANEL 7/12: Diagnosis to outcome chain

DIAGNOSIS -> the commission identifies a structural problem

- > ACCEPTANCE, report by report; failure mode is acceptance in principle with no instrument
- > INSTRUMENT: an Act, rule, order or scheme must be separately created
- > FEDERAL STEP: State subjects need State action; a Union acceptance cannot deliver them
- > CAPACITY, then INCENTIVE: who loses discretion, authority or rent?
- > OUTCOME: partial adoption, often unattributed and frequently unevaluated

ASCII MASTER FLOW – PANEL 8/12: The federal explanation

STATE-ACTION REPORTS -> Local Governance; State and District Administration

PARTLY STATE-ACTION -> much of Refurbishing of Personnel Administration

MECHANISM -> Union acceptance cannot legislate or staff a State subject

USE -> explains uneven national adoption without asserting Union indifference

ASCII MASTER FLOW – PANEL 9/12: The attribution trap

TEMPTATION -> a later reform resembles a report, so the answer claims implementation

REALITY -> causation is usually unprovable without a sourced acceptance or decision trail

NAMED RISK -> capacity programmes and State service-guarantee statutes are the usual claims

CORRECT MOVE -> state thematic continuity, and say that the linkage is not verified

ASCII MASTER FLOW – PANEL 10/12: Datedness objection and reply

OBJECTION -> a 2006 to 2009 diagnosis predates population-scale digital infrastructure

OBJECTION -> it also predates the current data-protection framework and later fiscal design

REPLY -> the analytical categories have aged far better than the specific prescriptions

DISCIPLINE -> say which of the two the answer is actually using

ASCII MASTER FLOW – PANEL 11/12: Political economy of adoption

COMPREHENSIVE PROGRAMME -> analytically complete and politically indigestible

INCREMENTAL REFORM -> implementable and incoherent across the system

COMMISSION FATIGUE -> repeated commissions convert reform into a documented intention

COST DISTRIBUTION -> concentrated resistance against diffuse benefit decides adoption

ASCII MASTER FLOW – PANEL 12/12: Answer spine for a reform demand

OPEN -> name the report by title and the governance problem it diagnoses

BUILD -> route the theme to its destination owner and take the evidence from there

CORRECT -> attach a status label, then give the federal or incentive reason for the gap

CLOSE -> graded verdict on continuing relevance with the datedness reply stated

EVIDENCE LIMIT: AUTHORITY / IMPLEMENTATION: Cite the relevant Second ARC report and...
