NGOs, SHGs and Civil-Society Stakeholders - Learner-v2

Complete Learning Session

Authoring-only generation: 2026-09-02. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-02.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. The OCR-searchable official General Studies question papers held under books\mains and books\more_previous_papers were used only to confirm the printed wording of routed Mains demands. No official answer key, marking scheme, page precision or unsupported quotation was imported from them.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** Six direct General Studies Mains demands are routed to this topic across the audited ledgers, and every routed stem used below was confirmed word for word in the locally held OCR-searchable official question papers. The audited 2024-2025 ledger routes three demands to this Basic owner: the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors. The audited 2018-2023 ledger routes four demands to the Advanced owner - the 2020 demand on micro-finance and self-help groups, the 2021 demand on micro-financing of women's self-help groups against gender inequality, poverty and malnutrition, the 2021 demand on civil society and non-governmental organisations as an alternative public-service-delivery model, and the 2023 demand on civil-society groups and women's representation in state legislatures, the last of which the ledger marks as running primarily to the Social Justice owner with the civil-society link retained - and the Basic owner records that core routing supersedes the older Advanced pointer. Two ownership conflicts are recorded openly rather than resolved by assertion: the 2025 General Studies Paper-II demand on women's social capital, empowerment and gender equity is discussed in this owner's text but is routed by the audited 2024-2025 ledger to the Social Justice women and gender-justice owner, and the 2025 General Studies Paper-II demand on environmental pressure groups is also discussed here but is routed by that ledger to the Polity pressure-groups owner. Both are therefore treated here only as civil-society support material, and no verbatim ownership is claimed for either. No official answer key or marking scheme is held locally for any routed demand, so every model solution below is an authored answer route rather than an official key.
- **Live-link boundary:** No new live official item was verified for this topic on 2026-09-02. The only dated official elements used are those already carried by the repository owners with their status checks, namely the Foreign Contribution (Regulation) Act, 2010 as amended in 2020 with its designated-account requirement, its administrative-expense reduction from fifty to twenty per cent and five-year renewal as checked on 21 July 2026, the NITI Aayog NGO Darpan identification portal, and the three-tier self-help group, Village Organisation and Cluster-Level Federation design of the national rural livelihoods mission whose cumulative mobilisation figure is deliberately not fixed here because it rises continuously on the mission management information system. No self-help group, household, foreign-funding registration, renewal or cancellation count is asserted; no micro-finance portfolio, borrower, interest-rate or non-performing asset figure is asserted; no named organisation's funding, results or regulatory action is asserted; no percentage of women legislators or operational status for legislative reservation is asserted; pressure-group composition and typology are cross-linked to Polity, gender-justice content is cross-linked to Social Justice, and the funding and legal-vehicle layer is cross-linked to the development-industry owner rather than restated here.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Governance Basic/Core is answer-complete before optional Advanced depth.
Authority boundary	Constitution, statute, delegated rule, executive policy, scheme, recommendation, institution and implementation outcome remain distinct.
Implementation method	Objective -> authority -> finance -> institution -> frontline process -> citizen access -> output -> outcome -> feedback and remedy.
Federal method	Union, state, district, local body, regulator, parastatal and non-state roles are assigned without inventing jurisdiction.
Accountability method	Duty-holder -> information -> forum -> questioning -> consequence -> correction -> grievance/appeal.
Evidence method	Claim -> named India-centric law/institution/scheme/case -> causal analysis -> source/date/status and implementation qualification.
Inclusion method	Gender, caste, tribe, disability, language, region, digital divide, privacy and offline safeguards are tested across access and outcome.
Practice contract	Every solved item has demand decoding, a detailed examiner-grade model, executable timed/compression plan, marks rationale and answer-specific improvement.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner:

upsc-ai-kit\knowledge\Governance\basic\04_NGOs-SHGs-and-Civil-Society-Stakeholders.md

Substantive canonical provenance owner: upsc-ai-kit\knowledge\Governance\04_NGOs-SHGs-and-Civil-Society-Stakeholders_Learner-V2-Complete-Topic-Package.md **Optional Advanced owner:** upsc-ai-kit\knowledge\Governance\advanced\04_NGOs-SHGs-and-Civil-Society-Stakeholders.md

Official syllabus mapping:

upsc-ai-kit\knowledge\Governance\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- **Legal-status discipline:** a proposal, commission recommendation, policy announcement, Cabinet approval, enacted statute, notified rule, commenced provision and implemented programme are never treated as the same status.
- **Institutional discipline:** constitutional, statutory, executive, regulatory, autonomous, registered private and international bodies retain exact mandate, jurisdiction and accountability.
- **Causal discipline:** allocation, portal creation, training, registration, disposal count or ranking does not by itself prove access, remedy, capability, service quality or outcome.
- **Indicator discipline:** input, process, output, outcome and impact indicators are separated; denominator, baseline, disaggregation, attribution and gaming risks are stated.
- **Trade-off discipline:** speed, expertise, autonomy, transparency, privacy, participation, fiscal control and inclusion are balanced with safeguards and residual risk.
- **PYQ discipline:** exact wording is preserved only where verified; routed or reconstructed demands remain labelled and no inferred answer is promoted as official.
- **Current-status note, rechecked 2026-09-05:** volatile law, scheme, institution, tournament and programme claims retain official source, date, jurisdiction and operative/interim/final status.

Generation-local live/current sources:

- No volatile claim is necessary for the static governance core.

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - Civil society is wider than the non-governmental organisation

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Civil society is wider than the non-governmental organisation is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how Civil society is wider than the non-governmental organisation fit into one examinable governance relationship.

Technical definition: In governance analysis, Civil society is wider than the non-governmental organisation denotes the source-bounded relationship among Civil society is wider than the non-governmental organisation, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Civil society is wider than the non-governmental organisation should be analysed as a relation among Civil society is wider than the non-governmental organisation, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- Civil
- society
- wider
- than
- non-governmental
- organisation

How to use them: Define Civil, society, wider; cite than as named evidence; then apply this qualification: Unions, cooperatives, faith-based bodies and associations are civil society too, so a narrow reading is a visible scope error. Conclude by showing how the distinction supports this answer route: Open a civil-society answer with the correct

universe of actors before any evaluation..

VISUAL FIRST

CIVIL SOCIETY IS WIDER THAN THE NON-GOVERNMENTAL ORGANISATION

01. Civil society is wider than the non-governmental organisation

BOUNDARY -> Unions, cooperatives, faith-based bodies and associations are civil society too, so a narrow reading is a visible scope error.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately.

NAMED EVIDENCE AND MECHANISM

- Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately.

EXAMINER CAUTION

- Unions, cooperatives, faith-based bodies and associations are civil society too, so a narrow reading is a visible scope error.

EXAM LINK

- **Prelims:** Retain the exact statute, section, institution, official category, dated edition or scope rule attached to Civil society is wider than the non-governmental organisation.
- **Mains:** Open a civil-society answer with the correct universe of actors before any evaluation.

MINI RECAP

- **Evidence chain:** Civil society is wider than the non-governmental organisation
- **Qualified use:** Open a civil-society answer with the correct universe of actors before any evaluation.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Civil society wider than non-governmental organisation	2. MECHANISM / ARGUMENT relate Civil society is wider than the non-governmental organisation through duty-holder, binding form and remedy	3. CONSEQUENCE / CONTRAST This relation supports the answer route that open a civil-society answer with the correct universe of actors before any evaluation.	4. UPSC TRAP / ANSWER-USE LIMIT: Unions, cooperatives, faith-based bodies and associations are civil society too, so a narrow reading is a visible scope error.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Civil society is wider than the non-governmental organisation converts named institutional evidence into a qualified argument			

SESSION 2 - FOUNDATION - Bonding, bridging and linking capital

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Bonding, bridging and linking capital is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how Bonding, bridging and linking capital fit into one examinable governance relationship.

Technical definition: In governance analysis, Bonding, bridging and linking capital denotes the source-bounded relationship among Bonding, bridging and linking capital, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Bonding, bridging and linking capital should be analysed as a relation among Bonding, bridging and linking capital, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- Bonding
- bridging
- linking
- capital
- Social
- networks

How to use them: Define Bonding, bridging, linking; cite capital as named evidence; then apply this qualification: The three types perform different functions and none substitutes for another. Conclude by showing how the distinction supports this answer route: Structure any social-capital demand on the three-stage typology instead of a general empowerment claim..

VISUAL FIRST

BONDING, BRIDGING AND LINKING CAPITAL

01. Bonding, bridging and linking capital

BOUNDARY -> The three types perform different functions and none substitutes for another.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another.

NAMED EVIDENCE AND MECHANISM

- Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another.

EXAMINER CAUTION

- The three types perform different functions and none substitutes for another.

EXAM LINK

- **Prelims:** Retain the exact statute, section, institution, official category, dated edition or scope rule attached to Bonding, bridging and linking capital.
- **Mains:** Structure any social-capital demand on the three-stage typology instead of a general empowerment claim.

MINI RECAP

- **Evidence chain:** Bonding, bridging and linking capital
- **Qualified use:** Structure any social-capital demand on the three-stage typology instead of a general empowerment claim.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS Bonding bridging linking capital Social networks	2. MECHANISM / ARGUMENT relate Bonding, bridging and linking capital through duty-holder, binding form and remedy	3. CONSEQUENCE / CONTRAST This relation supports the answer route that structure any social-capital demand on the three-stage typology instead of a general empowerment claim.	4. UPSC TRAP / ANSWER-USE LIMIT: The three types perform different functions and none substitutes for another.
---	---	--	---

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Bonding, bridging and linking capital converts named institutional evidence into a qualified argument

SESSION 3 - FOUNDATION - The self-help group as the unit

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The self-help group as the unit is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how The self-help group as the unit fit into one examinable governance relationship.

Technical definition: In governance analysis, The self-help group as the unit denotes the source-bounded relationship among The self-help group as the unit, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The self-help group as the unit should be analysed as a relation among The self-help group as the unit, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- self-help
- group
- unit
- small
- voluntary
- predominantly

How to use them: Define self-help, group, unit; cite small as named evidence; then apply this qualification: The group is a savings and livelihood unit rather than a lending product, and its membership base is predominantly women in the rural context. Conclude by showing how the distinction supports this answer route: Define the institutional unit precisely before describing what mobilisation achieves..

VISUAL FIRST

THE SELF-HELP GROUP AS THE UNIT

01. The self-help group as the unit

BOUNDARY -> The group is a savings and livelihood unit rather than a lending product, and its membership base is predominantly women in the rural context.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built.

NAMED EVIDENCE AND MECHANISM

- A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built.

EXAMINER CAUTION

- The group is a savings and livelihood unit rather than a lending product, and its membership base is predominantly women in the rural context.

EXAM LINK

- **Prelims:** Retain the exact statute, section, institution, official category, dated edition or scope rule attached to The self-help group as the unit.
- **Mains:** Define the institutional unit precisely before describing what mobilisation achieves.

MINI RECAP

- **Evidence chain:** The self-help group as the unit
- **Qualified use:** Define the institutional unit precisely before describing what mobilisation achieves.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS self-help group unit small voluntary predominantly	2. MECHANISM / ARGUMENT relate The self-help group as the unit through duty-holder, binding form and remedy	3. CONSEQUENCE / CONTRAST This relation supports the answer route that define the institutional unit precisely before describing what mobilisation achieves.	4. UPSC TRAP / ANSWER-USE LIMIT: The group is a savings and livelihood unit rather than a lending product, and its membership base is predominantly women in the rural context.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The self-help group as the unit converts named institutional evidence into a qualified argument			

SESSION 4 - CORE - The three-tier livelihoods mission design

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The three-tier livelihoods mission design is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how The three-tier livelihoods mission design fit into one examinable governance relationship.

Technical definition: In governance analysis, The three-tier livelihoods mission design denotes the source-bounded relationship among The three-tier livelihoods mission design, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The three-tier livelihoods mission design should be analysed as a relation among The three-tier livelihoods mission design, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- three-tier
- livelihoods
- mission
- design
- Deendayal
- Antyodaya

How to use them: Define three-tier, livelihoods, mission; cite design as named evidence; then apply this qualification: The federation structure is a deliberate design choice rather than an organic outcome. Conclude by showing how the distinction supports this answer route: Name the programme architecture that converts bonding capital into bridging and linking capital..

VISUAL FIRST

THE THREE-TIER LIVELIHOODS MISSION DESIGN

01. The three-tier livelihoods mission design

BOUNDARY -> The federation structure is a deliberate design choice rather than an organic outcome.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically.

NAMED EVIDENCE AND MECHANISM

- The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically.

EXAMINER CAUTION

- The federation structure is a deliberate design choice rather than an organic outcome.

EXAM LINK

- **Prelims:** Retain the exact statute, section, institution, official category, dated edition or scope rule attached to The three-tier livelihoods mission design.
- **Mains:** Name the programme architecture that converts bonding capital into bridging and linking capital.

MINI RECAP

- **Evidence chain:** The three-tier livelihoods mission design
- **Qualified use:** Name the programme architecture that converts bonding capital into bridging and linking capital.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS three-tier livelihoods mission design Deendayal Antyodaya	2. UPSC TRAP / ANSWER-USE LIMIT: The federation structure is a deliberate design choice rather than an organic outcome.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The three-tier livelihoods mission design converts named institutional evidence into a qualified argument			

SESSION 5 - CORE - Why no mobilisation count is asserted

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Why no mobilisation count is asserted is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how Why no mobilisation count is asserted fit into one examinable governance relationship.

Technical definition: In governance analysis, Why no mobilisation count is asserted denotes the source-bounded relationship among Why no mobilisation count is asserted, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Why no mobilisation count is asserted should be analysed as a relation among Why no mobilisation count is asserted, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- mobilisation
- count
- asserted
- cumulative
- self-help
- group

How to use them: Define mobilisation, count, asserted; cite cumulative as named evidence; then apply this qualification: The management information system figure rises continuously, so no cumulative count may be quoted as current. Conclude by showing how the distinction supports this answer route: Demonstrate data discipline by naming the durable fact instead of a moving total..

VISUAL FIRST

WHY NO MOBILISATION COUNT IS ASSERTED

01. Why no mobilisation count is asserted

BOUNDARY -> The management information system figure rises continuously, so no cumulative count may be quoted as current.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure.

NAMED EVIDENCE AND MECHANISM

- No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure.

EXAMINER CAUTION

- The management information system figure rises continuously, so no cumulative count may be quoted as current.

EXAM LINK

- **Prelims:** Retain the exact statute, section, institution, official category, dated edition or scope rule attached to Why no mobilisation count is asserted.
- **Mains:** Demonstrate data discipline by naming the durable fact instead of a moving total.

MINI RECAP

- **Evidence chain:** Why no mobilisation count is asserted

- **Qualified use:** Demonstrate data discipline by naming the durable fact instead of a moving total.

UPSC TRAP / ANSWER-USE LIMIT: The management information system figure rises continuously, so no cumulative count may be quoted as current.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Why no mobilisation count is asserted converts named institutional evidence into a qualified argument			

SESSION 6 - CORE - Two micro-finance delivery channels

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Two micro-finance delivery channels is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how Two micro-finance delivery channels fit into one examinable governance relationship.

Technical definition: In governance analysis, Two micro-finance delivery channels denotes the source-bounded relationship among Two micro-finance delivery channels, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Two micro-finance delivery channels should be analysed as a relation among Two micro-finance delivery channels, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- micro-finance
- delivery
- channels
- delivers
- that
- must

How to use them: Define micro-finance, delivery, channels; cite delivers as named evidence; then apply this qualification: The two channels build different balance sheets and carry different incentives even for the same household. Conclude by showing how the distinction supports this answer route: Separate the delivery channels before evaluating micro-finance outcomes..

VISUAL FIRST

TWO MICRO-FINANCE DELIVERY CHANNELS

01. Two micro-finance delivery channels

BOUNDARY -> The two channels build different balance sheets and carry different incentives even for the same household.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household.

NAMED EVIDENCE AND MECHANISM

- India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household.

EXAMINER CAUTION

- The two channels build different balance sheets and carry different incentives even for the same household.

EXAM LINK

- **Prelims:** Retain the exact statute, section, institution, official category, dated edition or scope rule attached to Two micro-finance delivery channels.
- **Mains:** Separate the delivery channels before evaluating micro-finance outcomes.

1. KEY TERMS / DEFINITIONS micro-finance delivery channels delivers that must	2. MECHANISM / ARGUMENT relate Two micro-finance delivery channels through duty-holder, binding form and remedy	3. CONSEQUENCE / CONTRAST This relation supports the answer route that separate the delivery channels before evaluating micro-finance outcomes.	4. UPSC TRAP / ANSWER-USE LIMIT: The two channels build different balance sheets and carry different incentives even for the same household.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Two micro-finance delivery channels converts named institutional evidence into a qualified argument			

SESSION 7 - CORE - What micro-finance can and cannot do

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: What micro-finance can and cannot do is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how What micro-finance can and cannot do fit into one examinable governance relationship.

Technical definition: In governance analysis, What micro-finance can and cannot do denotes the source-bounded relationship among What micro-finance can and cannot do, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

What micro-finance can and cannot do should be analysed as a relation among What micro-finance can and cannot do, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- What
- micro-finance
- provision
- small-value
- financial
- services

How to use them: Define What, micro-finance, provision; cite small-value as named evidence; then apply this qualification: Micro-credit is one component of micro-finance, and repayment can be sustained by borrowing again rather than by income growth. Conclude by showing how the distinction supports this answer route: Give the graded evaluative core that an evaluate directive requires rather than a benefits list..

VISUAL FIRST

WHAT MICRO-FINANCE CAN AND CANNOT DO

01. What micro-finance can and cannot do

BOUNDARY -> Micro-credit is one component of micro-finance, and repayment can be sustained by borrowing again rather than by income growth.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth.

NAMED EVIDENCE AND MECHANISM

- Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth.

EXAMINER CAUTION

- Micro-credit is one component of micro-finance, and repayment can be sustained by borrowing again rather than by income growth.

EXAM LINK

- **Prelims:** Retain the exact statute, section, institution, official category, dated edition or scope rule attached to What micro-finance can and cannot do.
- **Mains:** Give the graded evaluative core that an evaluate directive requires rather than a benefits list.

MINI RECAP

- **Evidence chain:** What micro-finance can and cannot do
- **Qualified use:** Give the graded evaluative core that an evaluate directive requires rather than a benefits list.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS What micro-finance provision small-value financial services	2. MECHANISM / ARGUMENT relate What micro-finance can and cannot do through duty-holder, binding form and remedy	3. CONSEQUENCE / CONTRAST This relation supports the answer route that give the graded evaluative core that an evaluate directive requires rather than a benefits list.	4. UPSC TRAP / ANSWER-USE LIMIT: Micro-credit is one component of micro-finance, and repayment can be sustained by borrowing again rather than by income growth.

SESSION 8 - CORE - Named micro-finance risks

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Named micro-finance risks is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how Named micro-finance risks fit into one examinable governance relationship.

Technical definition: In governance analysis, Named micro-finance risks denotes the source-bounded relationship among Named micro-finance risks, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Named micro-finance risks should be analysed as a relation among Named micro-finance risks, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- Named
- micro-finance
- risks
- over-indebtedness
- multiple
- lending

How to use them: Define Named, micro-finance, risks; cite over-indebtedness as named evidence; then apply this qualification: The risks are named categories rather than allegations against any lender, and no portfolio or rate figure may be cited. Conclude by showing how the distinction supports this answer route: Supply the risk register that converts a favourable account into an evaluated one..

VISUAL FIRST

NAMED MICRO-FINANCE RISKS

01. Named micro-finance risks

BOUNDARY -> The risks are named categories rather than allegations against any lender, and no portfolio or rate figure may be cited.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system.

NAMED EVIDENCE AND MECHANISM

- The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system.

EXAMINER CAUTION

- The risks are named categories rather than allegations against any lender, and no portfolio or rate figure may be cited.

UPSC TRAP / ANSWER-USE LIMIT: The risks are named categories rather than allegations against any lender, and no portfolio or rate figure may be cited.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Named micro-finance risks converts named institutional evidence into a qualified argument			

SESSION 9 - CORE - The nutrition pathway as a convergence claim

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The nutrition pathway as a convergence claim is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how The nutrition pathway as a convergence claim fit into one examinable governance relationship.

Technical definition: In governance analysis, The nutrition pathway as a convergence claim denotes the source-bounded relationship among The nutrition pathway as a convergence claim, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The nutrition pathway as a convergence claim should be analysed as a relation among The nutrition pathway as a convergence claim, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- **nutrition**
- **pathway**
- **convergence**
- **credible**
- **from**
- **women's**

How to use them: Define nutrition, pathway, convergence; cite credible as named evidence; then apply this qualification: The pathway is indirect and no measured nutrition effect or malnutrition percentage may be claimed. Conclude by showing how the distinction supports this answer route: State a plausible outcome channel with its evidentiary status attached..

VISUAL FIRST

THE NUTRITION PATHWAY AS A CONVERGENCE CLAIM

01. The nutrition pathway as a convergence claim

BOUNDARY -> The pathway is indirect and no measured nutrition effect or malnutrition percentage may be claimed.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage.

NAMED EVIDENCE AND MECHANISM

- The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage.

EXAMINER CAUTION

- The pathway is indirect and no measured nutrition effect or malnutrition percentage may be claimed.

EXAM LINK

- **Prelims:** Retain the exact statute, section, institution, official category, dated edition or scope rule attached to The nutrition pathway as a convergence claim.
- **Mains:** State a plausible outcome channel with its evidentiary status attached.

MINI RECAP

- **Evidence chain:** The nutrition pathway as a convergence claim
- **Qualified use:** State a plausible outcome channel with its evidentiary status attached.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS nutrition pathway convergence credible from women's	2. UPSC TRAP / ANSWER-USE LIMIT: The pathway is indirect and no measured nutrition effect or malnutrition percentage may be claimed.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The nutrition pathway as a convergence claim converts named institutional evidence into a qualified argument			

SESSION 10 - CORE - The foreign-contribution gate and its 2020 tightening

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The foreign-contribution gate and its 2020 tightening is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how The foreign-contribution gate and its 2020 tightening fit into one examinable governance relationship.

Technical definition: In governance analysis, The foreign-contribution gate and its 2020 tightening denotes the source-bounded relationship among The foreign-contribution gate and its 2020 tightening, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The foreign-contribution gate and its 2020 tightening should be analysed as a relation among The foreign-contribution gate and its 2020 tightening, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- foreign-contribution
- gate
- tightening
- Foreign
- Contribution
- Regulation

How to use them: Define foreign-contribution, gate, tightening; cite Foreign as named evidence; then apply this qualification: The register of current registrations, renewals and suspensions is dynamic, so only the legal architecture is stated. Conclude by showing how the distinction supports this answer route: Introduce the legal gate that determines which organisations operate at scale on foreign funds..

VISUAL FIRST

THE FOREIGN-CONTRIBUTION GATE AND ITS 2020 TIGHTENING

01. The foreign-contribution gate and its 2020 tightening

BOUNDARY -> The register of current registrations, renewals and suspensions is dynamic, so only the legal architecture is stated.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years.

NAMED EVIDENCE AND MECHANISM

- The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years.

EXAMINER CAUTION

- The register of current registrations, renewals and suspensions is dynamic, so only the legal architecture is stated.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The foreign-contribution gate and its 2020 tightening converts named institutional evidence into a qualified argument			

SESSION 11 - CORE - Identification, permission and exemption kept apart

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Identification, permission and exemption kept apart is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how NGO Darpan is identification, not permission and Four regulatory layers kept apart fit into one examinable governance relationship.

Technical definition: In governance analysis, Identification, permission and exemption kept apart denotes the source-bounded relationship among NGO Darpan is identification, not permission and Four regulatory layers kept apart, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Identification, permission and exemption kept apart should be analysed as a relation among NGO Darpan is identification, not permission and Four regulatory layers kept apart, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- Identification
- permission
- exemption
- kept
- apart
- Darpan

How to use them: Define Identification, permission, exemption; cite kept as named evidence; then apply this qualification: Four different authorities administer four different layers, and one is identification rather than permission. Conclude by showing how the distinction supports this answer route: Prevent the regulatory confusion that a precise objective question is built to expose..

VISUAL FIRST

IDENTIFICATION, PERMISSION AND EXEMPTION KEPT APART

01. NGO Darpan is identification, not permission

|
v

02. Four regulatory layers kept apart

BOUNDARY -> Four different authorities administer four different layers, and one is identification rather than permission.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed.

NAMED EVIDENCE AND MECHANISM

- NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption.
- Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Identification, permission and exemption kept apart converts named institutional evidence into a qualified argument			

SESSION 12 - CORE - Non-state against anti-State

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Non-state against anti-State is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how Non-state as a structural category against anti-State as a political label and The suspicion chain fit into one examinable governance relationship.

Technical definition: In governance analysis, Non-state against anti-State denotes the source-bounded relationship among Non-state as a structural category against anti-State as a political label and The suspicion chain, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Non-state against anti-State should be analysed as a relation among Non-state as a structural category against anti-State as a political label and The suspicion chain, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- Non-state
- anti-State
- structural
- category
- political
- label

How to use them: Define Non-state, anti-State, structural; cite category as named evidence; then apply this qualification: A structural category may not be collapsed into a political label, and no specific enforcement case is adjudicated. Conclude by showing how the distinction supports this answer route: Take a reasoned position on a perception demand with both a supporting and a limiting case..

VISUAL FIRST

NON-STATE AGAINST ANTI-STATE

01. Non-state as a structural category against anti-State as a political label

|
v

02. The suspicion chain

BOUNDARY -> A structural category may not be collapsed into a political label, and no specific enforcement case is adjudicated.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation.

NAMED EVIDENCE AND MECHANISM

- A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Non-state against anti-State converts named institutional evidence into a qualified argument			

SESSION 13 - CORE SYNTHESIS - Pressure groups and the capture risk

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Pressure groups and the capture risk is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how Pressure groups and the R-I-S-K test and Elite capture and its design correctives fit into one examinable governance relationship.

Technical definition: In governance analysis, Pressure groups and the capture risk denotes the source-bounded relationship among Pressure groups and the R-I-S-K test and Elite capture and its design correctives, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Pressure groups and the capture risk should be analysed as a relation among Pressure groups and the R-I-S-K test and Elite capture and its design correctives, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- Pressure
- groups
- capture
- risk
- R-I-S-K
- test

How to use them: Define Pressure, groups, capture; cite risk as named evidence; then apply this qualification: Pluralism becomes capture where money and access are unequal, and mobilisation can entrench the very hierarchy it claims to broaden. Conclude by showing how the distinction supports this answer route: Evaluate an organised interest through representation, information, scrutiny and capture risk..

VISUAL FIRST

PRESSURE GROUPS AND THE CAPTURE RISK

01. Pressure groups and the R-I-S-K test

|
v

02. Elite capture and its design correctives

BOUNDARY -> Pluralism becomes capture where money and access are unequal, and mobilisation can entrench the very hierarchy it claims to broaden.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation.

NAMED EVIDENCE AND MECHANISM

- A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed.
- Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation.

EXAMINER CAUTION

UPSC TRAP / ANSWER-USE LIMIT: Pluralism becomes capture where money and access are unequal, and mobilisation can entrench the very hierarchy it claims to broaden.

SESSION 14 - CORE SYNTHESIS - Delivery model, duty-holder and representation

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Delivery model, duty-holder and representation is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how Innovator, facilitator and monitor rather than duty-holder and The civil-society pathway to representation and its gate fit into one examinable governance relationship.

Technical definition: In governance analysis, Delivery model, duty-holder and representation denotes the source-bounded relationship among Innovator, facilitator and monitor rather than duty-holder and The civil-society pathway to representation and its gate, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Delivery model, duty-holder and representation should be analysed as a relation among Innovator, facilitator and monitor rather than duty-holder and The civil-society pathway to representation and its gate, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- **Delivery**
- **model**
- **duty-holder**
- **representation**
- **Innovator**
- **facilitator**

How to use them: Define Delivery, model, duty-holder; cite representation as named evidence; then apply this qualification: A right needs a compellable addressee, and the party ticket gate is not civil-society controlled. Conclude by showing how the distinction supports this answer route: Resolve an alternative-delivery or representation demand by separating the roles civil society can and cannot hold..

VISUAL FIRST

DELIVERY MODEL, DUTY-HOLDER AND REPRESENTATION

01. Innovator, facilitator and monitor rather than duty-holder

|
v

02. The civil-society pathway to representation and its gate

BOUNDARY -> A right needs a compellable addressee, and the party ticket gate is not civil-society controlled.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it.

NAMED EVIDENCE AND MECHANISM

- Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent.
- Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it.

EXAMINER CAUTION

- A right needs a compellable addressee, and the party ticket gate is not civil-society controlled.

EXAM LINK

- **Prelims:** Retain the exact statute, section, institution, official category, dated edition or scope rule attached to Delivery model, duty-holder and representation.
- **Mains:** Resolve an alternative-delivery or representation demand by separating the roles civil society can and cannot hold.

MINI RECAP

- **Evidence chain:** Innovator, facilitator and monitor rather than duty-holder -> The civil-society pathway to representation and its gate
- **Qualified use:** Resolve an alternative-delivery or representation demand by separating the roles civil society can and cannot hold.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Delivery model, duty-holder and representation converts named institutional evidence into a qualified argument

SESSION 15 - CORE SYNTHESIS - The non-member poor and honest question ownership

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The non-member poor and honest question ownership is the part of NGOs, SHGs and Civil-Society Stakeholders that explains how The non-member poor and Verified question ownership and two recorded routing conflicts fit into one examinable governance relationship.

Technical definition: In governance analysis, The non-member poor and honest question ownership denotes the source-bounded relationship among The non-member poor and Verified question ownership and two recorded routing conflicts, described by the duty-holder who is bound, the legal or administrative form that binds them, the mechanism that converts the norm into a delivered outcome, the remedy available when it fails, and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The non-member poor and honest question ownership should be analysed as a relation among The non-member poor and Verified question ownership and two recorded routing conflicts, not as a list of virtues attached to the word governance.

MUST-WRITE KEYWORDS

- non-member
- poor
- honest
- ownership
- recorded
- conflicts

How to use them: Define non-member, poor, honest; cite ownership as named evidence; then apply this qualification: The most excluded households are frequently in no group at all, and two demands claimed by this owner are routed elsewhere by the audited ledger. Conclude by showing how the distinction supports this answer route: Close the civil-society answer with the sharpest inclusion limitation and transparent question ownership..

VISUAL FIRST

THE NON-MEMBER POOR AND HONEST QUESTION OWNERSHIP

01. The non-member poor

|
v

02. Verified question ownership and two recorded routing conflicts

BOUNDARY -> The most excluded households are frequently in no group at all, and two demands claimed by this owner are routed elsewhere by the audited ledger.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner.

NAMED EVIDENCE AND MECHANISM

- The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches.
- The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner.

EXAMINER CAUTION

- The most excluded households are frequently in no group at all, and two demands claimed by this owner are routed elsewhere by the audited ledger.

EXAM LINK

- **Prelims:** Retain the exact statute, section, institution, official category, dated edition or scope rule attached to The non-member poor and honest question ownership.
- **Mains:** Close the civil-society answer with the sharpest inclusion limitation and transparent question ownership.

MINI RECAP

- **Evidence chain:** The non-member poor -> Verified question ownership and two recorded routing conflicts
- **Qualified use:** Close the civil-society answer with the sharpest inclusion limitation and transparent question ownership.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The non-member poor and honest question ownership converts named institutional evidence into a qualified argument

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: Governance | **Tier:** Must-Do (foundation) | **GS Paper:** GS-II. **Core area:** NGOs, Self-Help Groups, civil-society organisations, social capital, FCRA and NGO Darpan. **Grounded in:** DAY-NRLM (Ministry of Rural Development); Foreign Contribution (Regulation) Act, 2010 (amended 2020); NGO Darpan portal (NITI Aayog); audited 2025 GS-II PYQs; official UPSC GS-II syllabus. **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor. *Companion:* advanced/04_NGOs-SHGs-and-Civil-Society-Stakeholders.md.

1. Visual foundation

*Pressure-group composition/typology is a Polity topic; here the focus is civil society's governance/development role.

Core proposition: FACT: Civil-society organisations (NGOs, SHGs, CSOs) generate "social capital" - networks of trust and reciprocity - that state institutions can either draw on as a governance resource or view with suspicion as a check on/challenge to state authority; how the state frames CSOs shapes how effectively that social capital is used for development.

2. Essential definitions

Concept	Exam-ready meaning
FACT: Social capital	Networks, norms of reciprocity and trust that enable collective action; commonly disaggregated (Putnam) into bonding (within a homogenous group), bridging (across different groups) and linking (between citizens/groups and formal institutions, including the state).
FACT: Self-Help Group (SHG)	A small, voluntary group (predominantly of women in the Indian rural-livelihoods context) that pools savings, accesses credit and undertakes livelihood activity collectively - the core institutional unit of DAY-NRLM.
FACT: DAY-NRLM	The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission, run by the Ministry of Rural Development, which mobilises rural women into SHGs and federates them into village organisations and cluster-level federations for livelihoods, financial inclusion and social empowerment.
FACT: FCRA	The Foreign Contribution (Regulation) Act, 2010 (amended 2020), administered by the Ministry of Home Affairs, which regulates the acceptance and utilisation of foreign contributions by associations/NGOs, requiring registration or prior permission before receiving foreign funds.
FACT: NGO Darpan	NITI Aayog's identification/database portal. Its Unique ID is required for Union-government grants and is used in FCRA/tax/banking compliance interfaces; it is not itself incorporation, FCRA permission or tax exemption.
FACT: Pressure group	An organised interest that seeks to influence public policy without itself seeking to form the government. Its governance role is representation, agenda-setting, expertise and scrutiny; risks include unequal access, opaque lobbying and policy capture.
ANALYSIS: Non-state actor vs anti-State actor framing	CSOs are, by definition, non-state actors (not part of formal government); whether a specific CSO is perceived/treated as adversarial ("anti-State") depends on its relationship to government policy and its funding/accountability transparency, not on its non-state status itself.

3. How civil society contributes to governance (mechanism)

1. **Mobilisation:** SHGs and NGOs organise otherwise-dispersed citizens (especially women and marginalised groups) into collective units capable of accessing credit, markets and government schemes.
2. **Social capital as governance infrastructure:** bonding capital within an SHG builds trust for internal savings/credit; bridging capital across SHGs (federations) enables scale; linking capital connects federations to banks, markets and government departments.
3. **Empowerment and gender equity:** women's participation in SHGs builds collective bargaining power, financial literacy and public voice - directly advancing empowerment and gender equity, the exact link tested in the 2025 PYQ.
4. **Advocacy and watchdog function:** civil-society organisations also monitor government performance, advocate policy change and highlight rights violations - a function some governments perceive as oppositional rather than collaborative.
5. **Regulatory gate for foreign funding:** any NGO seeking foreign contributions must clear FCRA registration/prior permission, which the state uses to screen for national-security and public-interest concerns - a regulatory chokepoint that shapes which CSOs can operate at scale with international funding.
6. **Policy influence:** pressure groups use representation, research, petitions, campaigns,

consultation and litigation to shape policy. The 2025 GS-II environmental-pressure-group PYQ requires evaluating both democratic voice and capture/representation deficits.

4. Institutions and tools

- FACT: **DAY-NRLM (Ministry of Rural Development)**: mobilises rural women into SHGs, provides revolving funds and community investment support, and links SHG federations to bank credit, covering crores of rural women households across the large majority of Indian states/UTs. No fixed household or SHG count is asserted here, since the NRLM MIS portal's cumulative mobilisation figure rises continuously as the programme expands; the durable fact is the programme's near-universal state/UT coverage and its three-tier SHG -> Village Organisation -> Cluster-Level Federation design (see Section 4 of the advanced companion).
- FACT: **FCRA, 2010 (amended 2020)**: registration/prior permission requirement, a designated FCRA bank account (State Bank of India, New Delhi main branch, per the 2020 amendment framework), and restrictions on administrative-expense proportions and sub-granting of foreign funds between FCRA-registered entities.
- FACT: **NGO Darpan (NITI Aayog)**: voluntary/mandatory-for-grants registration portal that assigns a unique ID used across government-grant and linked compliance processes.
- ANALYSIS: **Village Organisations and Cluster-Level Federations** under NRLM aggregate SHGs upward, building the bridging/linking capital layer described above.

5. Indian applications and examples

- FACT: 2025 GS-II PYQ (Q6): "Women's social capital complements in advancing empowerment and gender equity. Explain" - the expected answer links SHG-based bonding/bridging capital directly to financial inclusion, collective bargaining and public voice for women.
- FACT: 2025 GS-II PYQ (Q8): "Civil Society Organizations are often perceived as being anti-State actors than non-State actors. Do you agree? Justify" - tests the non-state/anti-State framing distinction: the correct approach argues CSOs are structurally non-state actors, and any "anti-State" perception arises from advocacy/watchdog friction with government policy or from funding-transparency concerns (FCRA-related), not from an inherent anti-State character.
- FACT: 2025 GS-II PYQ (Q15): environmental pressure groups - analyse awareness, expertise, agenda-setting and legal/policy influence, then qualify with transparency, representational legitimacy and capture risks.
- ANALYSIS: A women's SHG federation negotiating directly with a bank for a cluster-level credit line demonstrates linking social capital converting into tangible financial inclusion.

6. Must-Know Facts for Prelims

- FACT: DAY-NRLM is implemented by the Ministry of Rural Development and predominantly mobilises rural women into SHGs, federated into village organisations and cluster-level federations.
- FACT: FCRA, 2010 (amended 2020) is administered by the Ministry of Home Affairs and mandates registration/prior permission for any association receiving foreign contributions.
- FACT: NGO Darpan is a NITI Aayog portal that assigns NGOs a unique identification number, used in accessing government grants.
- FACT: Putnam's social capital typology distinguishes bonding, bridging and linking capital.

7. UPSC traps

- WRONG: Social capital and financial capital are the same thing. -> Social capital refers to networks/trust/reciprocity enabling collective action; it can facilitate access to financial capital but is conceptually distinct from it.
- WRONG: All civil-society organisations are "anti-State" by definition. -> CSOs are non-state

actors by definition; adversarial perception arises from specific advocacy/policy friction or funding-transparency concerns, not from their non-state status itself.

- WRONG: FCRA regulates all NGO funding. -> FCRA specifically regulates *foreign* contributions; domestic donations/CSR funding to NGOs are governed by separate frameworks (Companies Act, Income Tax Act - see 03).
- WRONG: NGO Darpan registration is legally identical to FCRA registration. -> NGO Darpan is a NITI Aayog identification/database portal (relevant mainly for government grants); FCRA registration is a separate Ministry of Home Affairs legal requirement specifically for foreign funding.
- WRONG: Pressure groups and political parties are identical. -> Pressure groups influence policy without contesting for governmental power as their defining purpose.

8. CURRENT: Current anchor

- CURRENT: **Status checked 21 July 2026:** DAY-NRLM's cumulative SHG-mobilisation count rises continuously and is published on the NRLM MIS portal. No fixed current figure is asserted here because the count is updated on an ongoing basis; the durable, exam-ready fact is that DAY-NRLM is India's largest women-focused SHG mobilisation programme, organised through the SHG -> Village Organisation -> Cluster-Level Federation structure.

9. PYQ application

- FACT: 2025 Q6: build the answer around bonding capital (internal SHG trust/savings), bridging capital (federation-level scale) and linking capital (bank/market/government access), each explicitly tied to empowerment and gender equity outcomes.
- FACT: 2025 Q8: take a reasoned position - argue that CSOs are structurally non-state, not anti-State, actors, while acknowledging that specific advocacy positions or funding opacity can generate state suspicion; avoid a purely one-sided "CSOs are always benign/always adversarial" answer.
- FACT: 2025 Q15: use **R-I-S-K** - representation, information/expertise, scrutiny, and capture risk - to assess an environmental pressure group rather than merely listing organisations.

10. Mains angles

- ANALYSIS: Use the bonding/bridging/linking social-capital framework as the default structuring device for any SHG or civil-society empowerment question.
- ANALYSIS: Where a question invites you to "agree or disagree," take an explicit position and justify it with both a supporting and a limiting example - examiners reward reasoned judgment over fence-sitting.
- ANALYSIS: Distinguish civil society's collaborative/service-delivery role (implementation partner) from its advocacy/watchdog role (independent check) - both are legitimate but generate different kinds of state response.

Answer thesis: Civil-society organisations are non-state, not anti-State, actors whose bonding, bridging and linking social capital can be either harnessed as governance infrastructure or treated with suspicion - the difference lies in the transparency of their funding and the state's willingness to engage advocacy as feedback rather than opposition.

11. Probable questions

- ANALYSIS: **Prelims:** Which Ministry administers DAY-NRLM, and which portal assigns NGOs a unique identification number for accessing government grants?
- ANALYSIS: **Mains (10 marks):** Women's social capital complements in advancing empowerment and gender equity. Explain. (2025 PYQ)
- ANALYSIS: **Mains (10 marks):** Civil Society Organizations are often perceived as being anti-State actors rather than non-State actors. Do you agree? Justify. (2025 PYQ)

12. Study links

- FACT: Advanced companion: advanced/04_NGOs-SHG-and-Civil-Society-Stakeholders.md.
- FACT: 03_Development-Processes-and-the-Development-Industry.md - the funding/legal-vehicle layer that channels resources to NGOs/SHGs.
- FACT: 14_Participatory-Governance.md - civil society's role in participatory decision-making.
- FACT: Polity/advanced/44_Pressure-Groups.md - the constitutional/typological treatment of pressure groups (Polity owns this composition-level detail).

13. Answer architecture (10/15/20-mark support)

Scope. All marks-bearing content for the *NGOs, SHGs, groups, associations and other stakeholders* clause - including the four demands the 2018-2023 ledger routed to advanced/04 - is held **in this file**. advanced/04 is optional enrichment only.

13.0 Direct Mains demands owned by this Core file

ANALYSIS: **Core routing supersedes the older Advanced pointer.**

(a) 2020 GS-II Q17 - micro-finance as an anti-poverty instrument and the role of SHGs (15 marks, "evaluate").

Executable route:

1. Define the instrument precisely: micro-finance = small-value financial services (credit, savings, insurance, remittance) to households excluded from conventional banking on collateral, documentation or transaction-cost grounds. **Micro-credit is one component, not the whole of micro-finance** - this distinction alone separates a good answer.
2. Name the two Indian delivery channels and keep them apart: the **SHG-Bank Linkage** route (savings-first groups linked to bank credit, the DAY-NRLM architecture) and the **MFI/NBFC-MFI** route (specialised lenders regulated by the RBI). They have different incentives: one builds a group balance sheet, the other builds a loan book.
3. Mechanism by which it can reduce poverty: replaces the moneylender's rate; converts irregular income into a savings and repayment discipline; funds working capital for micro-enterprise; and - through the **linking** capital of federations - opens access to markets and schemes (Section 3 of this file).
4. Honest evaluative core, because "evaluate" demands a graded judgment. Micro-finance is strongest as a **consumption-smoothing and vulnerability-reduction** instrument and weakest as a **structural poverty-exit** instrument: loan sizes suit micro-enterprise, not asset accumulation; returns in saturated local markets are thin; and repayment discipline can be sustained by borrowing again rather than by income growth.
5. Named risks: **over-indebtedness and multiple lending** where several lenders serve one household; **coercive recovery** as a documented sector risk that prompted regulatory correction; **interest-rate and cost-of-delivery** tension, since serving small remote loans is genuinely expensive; and **elite capture** within groups.
6. Governance verdict: micro-finance works as one instrument inside a livelihoods system - credit **plus** skill, market linkage, social protection and public services - and fails when treated as a substitute for that system. **WRONG:** Do not state loan volumes, interest-rate caps, NPA figures, borrower counts or any named MFI crisis statistic; none is verified in this repository.

(b) 2021 GS-II Q8 - micro-financing of women's SHGs against gender inequality, poverty and malnutrition (10 marks, "explain with examples"). Executable route: use the bonding -> bridging -> linking chain (Section 3), then show three distinct outcome channels rather than repeating "empowerment": **(i) income and asset control** - money routed through a woman's own group account changes who decides household expenditure; **(ii) voice** - federation office-bearing produces public speaking, negotiation with banks and officials, and Gram Sabha participation (see 14); **(iii) nutrition pathway** - the credible mechanism is *indirect*: women's control over income, plus SHG platforms used for health/nutrition messaging and convergence with public nutrition services, rather than a direct income-to-nutrition link. State that the nutrition link is a **convergence** claim, and qualify it - this precision is exactly what "explain"

rewards. WRONG: Do not cite a malnutrition percentage or claim a measured nutrition effect.

(c) 2021 GS-II Q18 - civil society and NGOs as an alternative public-service delivery model: the challenges (15 marks). Executable route:

1. Frame it as a **model comparison**, not a complaint list: state delivery has universal mandate, coercive and taxing power, and electoral accountability; NGO delivery has flexibility, local trust and innovation, with donor accountability.
2. Six challenges, each with its mechanism: **scale** (NGO coverage is geographic and partial, so equity across a State cannot be assured); **sustainability** (project-cycle funding versus a permanent entitlement); **accountability direction** (upward to funder, not downward to citizen, and no electoral sanction); **capacity and standards** variation between organisations; **substitution risk** (relieving political pressure to fix public delivery); and **regulatory dependence** (FCRA registration, renewal and compliance make scale legally contingent).
3. Concede the genuine case: NGOs reach populations the state reaches poorly, pilot innovations the state cannot risk, and supply the facilitation that social audit and community institutions require.
4. Resolution: NGOs are best used as **complement and innovator**, and as the *facilitator* of accountability (social audit support, legal aid, grievance help), rather than as the **duty-holder** for a right - because a right needs an addressee who can be compelled.
5. Verdict sentence and a safeguard set: convergence with the local plan, disclosure, beneficiary grievance route, and exit planning.

(d) 2023 GS-II Q14 - civil-society groups and women's representation in State legislatures (15 marks). The Governance half owned here: explain the **causal pathway** by which civil society affects representation - awareness and rights literacy; candidate identification and training; the SHG federation as a school of public life producing local leadership that can progress to higher tiers; advocacy and litigation for reservation and party-level selection; and election-monitoring/voter-mobilisation work. Then state the limits with equal force: local-body leadership does not automatically convert into legislative candidature; party ticket distribution is the actual gate and is not civil-society controlled; and elite capture reproduces existing hierarchies inside the very groups meant to broaden them. Cross-link Social - Justice for the gender-justice content and Polity for the reservation provisions. WRONG: Do not state any percentage of women legislators or any reservation commencement/operational claim - see Polity/basic/Parliament.md for the controlled statement of the 106th Amendment's status.

13.1 Demand map

Stem pattern	What is being tested	Opening move
"Anti-State vs non-State"	Category vs perception	Non-state is structural/legal ; anti-State is political/perceptual - say this in sentence one
"Social capital ... empowerment"	Whether you use Putnam properly	Bonding / bridging / linking, each tied to a different outcome
"Alternative delivery model"	Model comparison	Compare mandate, accountability direction and sustainability, not virtues
"Pressure groups / associations"	Pluralism vs capture	Use R-I-S-K : representation, information, scrutiny, capture risk
"Do you agree? Justify"	Position-taking	Commit in the introduction; justify with one supporting <i>and</i> one limiting case
Novel actor (online collective, resident welfare association, faith-based body, gig-worker union)	Transferability	Apply the same four tests: structure, funding, accountability, representativeness

13.2 Qualified theses

- **T1 (structural):** "Civil-society organisations are structurally non-State actors; the

'anti-State' label is a political judgment about particular advocacy or funding, not a legal category - and collapsing the two converts a constitutional freedom into a suspicion."

- **T2 (social capital):** "SHG-based social capital advances gender equity because it moves

in three stages - trust within the group, scale across groups, and access to banks, markets and the state - and it stalls wherever any one stage is missing."

- **T3 (delivery):** "Civil society is a superior *innovator, facilitator and monitor* and an inferior *duty-holder*: a right needs an addressee who can be compelled, and no NGO can be."

- **T4 (capture-aware):** "Social capital is not automatically democratic; the same density of local networks that enables collective action can entrench dominant caste and economic groups unless participation design is deliberately inclusive."

13.3 Mark-scaled structure

10 marks - position in sentence one; the structural distinction or the three-part social capital chain; two named institutional anchors; one limitation; verdict.

15 marks - thesis; mechanism chain; 4-6 evidence units from Section 13.4; the legal-layer distinctions (Section 13.5) where funding or regulation is in issue; the elite-capture or capture-risk counterpoint; graded verdict.

20 marks - thesis with criteria; civil society disaggregated into service-deliverer, advocate, watchdog and community institution - because the state's response differs for each; state-civil society relations across the collaborative/adversarial spectrum; FCRA as a structural gate with its stated rationale **and** the proportionality critique; representativeness and internal democracy of CSOs themselves; verdict with reversal condition.

13.4 Evidence bank A - institutions, mechanisms and limits

Anchor	What it is	Mechanism	Limitation / caution
FACT: DAY-NRLM (Ministry of Rural Development)	Mobilises rural women into SHGs, federated into Village Organisations and Cluster-Level Federations	Revolving fund and community investment support; bank linkage; three-tier scale	WRONG: No cumulative SHG or household count asserted - the MIS figure rises continuously
FACT: SHG-Bank Linkage	Savings-first groups accessing bank credit	Group liability and repayment record substitute for collateral	Credit access ≠ enterprise viability; saturated local markets thin returns
FACT: Putnam's typology	Bonding / bridging / linking	Each performs a different governance function; none substitutes for another	Bonding without bridging can entrench in-group exclusion
FACT: FCRA, 2010 (amended 2020) - MHA	Registration or case-specific prior permission; designated FCRA account at State Bank of India, New Delhi main branch ; limits on administrative expenses and on sub-granting between FCRA-registered entities	The legal gate determining which CSOs can operate at scale on foreign funds	WRONG: No registration/cancellation counts; renewal and suspension actions are dynamic
FACT: NGO Darpan (NITI Aayog)	Unique-ID identification/database portal	Required for Union grants; used in linked compliance interfaces	WRONG: Not incorporation, not FCRA permission, not tax exemption
FACT: Pressure group	Organised interest seeking policy influence without seeking to form the government	Representation, expertise, agenda-setting, litigation, mobilisation	Unequal money and access convert pluralism into capture
ANALYSIS: Elite capture	Dominant local groups controlling a participatory or collective body	Explains why devolution/mobilisation can reproduce hierarchy	Requires design safeguards: rotation, reservation, disclosure, external facilitation

13.5 Evidence bank B - the four regulatory layers (the discrimination that earns marks)

Layer	Regulator	What it governs	Confusion it prevents
Incorporation	State registrar / Registrar of Companies	Legal existence: trust, society or s.8 company (see 03)	Being registered is not being funded
Foreign funding	Ministry of Home Affairs, FCRA	Whether foreign contribution may be received at all	FCRA governs foreign contribution only; domestic and CSR funds fall outside it
Tax status	Income Tax Department, 12A/80G	Exemption for the body; deduction for the donor	Tax exemption is not a licence to receive foreign funds
Government-grant identity	NITI Aayog, NGO Darpan	Unique ID for Union grant eligibility	Darpan is identification, not permission

13.6 Causal chains

EMPOWERMENT CHAIN (SHG)

savings + meeting discipline -> BONDING (trust, peer accountability)
 -> federation into VO/CLF -> BRIDGING (risk-pooling, scale, negotiation)
 -> bank / market / department -> LINKING (credit, price, scheme access)
 -> income control + public voice -> gender-equity outcome
 FAILURE POINT: any stage missing; or elite capture at the bridging stage

SUSPICION CHAIN (CSO)

watchdog/advocacy function is structurally independent of government
 -> advocacy opposes a specific policy or project
 -> perceived as adversarial rather than as feedback
 -> foreign funding compounds the perception (FCRA security rationale)
 -> "anti-State" label applied to a structurally non-State actor
 CORRECT RESOLUTION: contest or justify case-by-case; refuse the blanket label

PRESSURE-GROUP CHAIN

diffuse interest aggregated -> specialised information supplied
 -> consultation, media, petition, litigation, mobilisation
 -> blind spot corrected OR one organised interest privileged
 EVALUATE BY: funding transparency, representativeness, evidence quality, conflict-of-interest safeguards, measurable outcome

13.7 Counter-argument and trade-off bank

- ANALYSIS: **Autonomy vs accountability**: the freedom that lets a CSO criticise the state is the same freedom that makes it hard to hold to standards; disclosure, not control, is the proportionate answer.
- ANALYSIS: **Foreign funding: security vs civic space**: the stated FCRA rationale is that externally funded advocacy could serve external interests; the contested counter-position is that broad screening can chill legitimate dissent. Present both; adjudicate no case.
- ANALYSIS: **Representativeness objection**: an unelected NGO claiming to speak for a community faces a legitimacy question the state can always raise - the answer is internal democracy, disclosed membership and mandated consultation, not indignation.
- ANALYSIS: **Professionalisation trade-off**: professional staff, audited accounts and reporting systems raise quality and donor confidence while raising cost, distancing organisations from volunteers and pushing them toward donor-legible work.
- ANALYSIS: **Community ownership vs delivery speed**: genuine community ownership is slow; contracting an experienced NGO is fast. Speed bought at the cost of ownership usually ends when the project ends.
- ANALYSIS: **Credit as empowerment**: access to credit is not the same as control over income or freedom from over-indebtedness.

13.8 Stakeholder and last-mile variation

- **SHG member**: gains savings discipline and voice; bears meeting time and joint-liability pressure.

- **Federation office-bearer:** acquires negotiation experience - the practical route from group membership to public life.
- **Bank branch:** faces small-ticket transaction costs; behaviour determines whether linking capital converts into credit.
- **Frontline NGO worker:** carries local trust; also the point at which donor metrics bite.
- **District administration:** decides whether CSO work converges with public schemes or runs parallel.
- **Non-member poor:** the most-excluded households are frequently **not** in any SHG - state this, because it is the sharpest limitation on SHG-based inclusion claims.

13.9 Verdict scaffolds

- **Anti-State stem:** "CSOs are non-State by structure and adversarial only by circumstance; the appropriate governance response to disagreement is disclosure and engagement, not reclassification."
- **Social-capital stem:** "Women's social capital advances equity because it converts trust into scale and scale into institutional access - but only where bridging is genuinely inclusive; without that, it consolidates existing local hierarchy."
- **Delivery-model stem:** "Civil society should be commissioned for innovation, facilitation and monitoring, and never made the duty-holder for an entitlement - the state cannot contract out an addressee."
- **Novel-actor stem:** test structure, funding, accountability direction and representativeness before judging legitimacy.

13.10 Factual and current-status controls

- **FACT:** Safe: DAY-NRLM under the Ministry of Rural Development, SHG -> VO -> CLF structure; FCRA, 2010 (amended 2020) under the MHA with registration/prior-permission routes, the designated SBI New Delhi main branch account, administrative-expense limits and the sub-granting restriction; NGO Darpan as a NITI Aayog identification portal; Putnam's bonding/bridging/linking typology; pressure group defined by non-pursuit of governmental office.
- **WRONG:** **Do not assert:** DAY-NRLM SHG or household totals; FCRA registration, renewal or cancellation counts; micro-finance portfolio, borrower, interest-rate or NPA figures; any named NGO's funding, results or regulatory action; percentages of women in legislatures.
- **ANALYSIS:** Pressure-group **composition and typology** are Polity-owned (Polity/advanced/44_Pressure-Groups.md); this file owns their **governance function and capture risk**. Keep the boundary explicit rather than duplicating.
- **ANALYSIS:** **Civil society ≠ NGO**. Civil society includes unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives. Answering an "civil society" stem with NGO material only is a scope error the examiner can see immediately.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2024, 2025
- **Paper(s):** GS-I, GS-II
- **Routed question demands:** 3

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2024	GS-I	10	Government-NGO-private collaboration in socio-economic development	Discuss · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2024	GS-II	6	Public charitable trusts and inclusive development	Comment · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2025	GS-II	8	Civil Society Organizations as anti-State versus non-State actors	Justify · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Government-NGO-private collaboration in socio-economic development
- Public charitable trusts and inclusive development
- Civil Society Organizations as anti-State versus non-State actors

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Semantic-completeness ownership and PYQ control

- **Official syllabus/index and owned core:** NGOs, SHGs and civil-society organisations can aggregate voice, deliver services, build capabilities, innovate, monitor the state and enable collective action, but their legitimacy and effectiveness depend on representation, finance, capacity, transparency and downward accountability.
- **Indispensable distinction and prerequisite taxonomy:** NGO, voluntary organisation, charitable trust, society, section 8 company, SHG, cooperative and social movement are not synonyms; registration, tax treatment, foreign-contribution regulation and programme partnership use distinct legal or executive frameworks.
- **Mechanism, implementation and evidence control:** Use Kudumbashree, SEWA, SHG-bank linkage, social movements and disaster-response partnerships with exact institutional qualification; distinguish allegation, suspension, cancellation, judicial finding and final liability, and protect both associational freedom and accountable finance.
- **FACT: Verified current fact (official sources rechecked 5 September 2026):**

Rechecked 2026-09-05: the official FCRA portal continues to carry the 2010 Act as amended in 2020, including the designated receipt account, twenty-percent administrative-expense ceiling and renewal framework. DAY-NRLM partnership does not erase NGO/SHG legal and accountability differences. Sources: <https://fcraonline.nic.in/>; https://fcraonline.nic.in/home/PDF_Doc/fc_amend_07102020_1.pdf; <https://aajeevika.gov.in/>

- **ANALYSIS: Analytical inference:** institutional design, allocation, a portal, a registration, a report, a training completion, a disposal count or a ranking can support a causal argument only after authority, capacity, incentives, distribution, implementation, grievance, outcome and alternative explanations are tested.

- **Canonical and cross-owner boundary:** this Governance owner teaches the authority-to-delivery-to-remedy chain. Detailed constitutional doctrine stays with Polity; sector entitlement design stays with Social Justice; macro-fiscal doctrine stays with Economy; ethics theory stays with Ethics. Cross-owner evidence may be routed but is not silently duplicated or re-owned.

- **Four-ledger hostile audit:** literal syllabus, indispensable prerequisites,

standard public-administration/governance taxonomy and complete verified PYQ demands were checked for absent concepts, institutions, mechanisms, classifications, exceptions, comparisons, criticisms, current status, answer architecture and dependent artifacts.

- **Verified PYQ ownership, 2018-2026:** Six direct General Studies Mains demands are routed to this topic across the audited ledgers, and every routed stem used below was confirmed word for word in the locally held OCR-searchable official question papers. The audited 2024-2025 ledger routes three demands to this Basic owner: the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors. The audited 2018-2023 ledger routes four demands to the Advanced owner - the 2020 demand on micro-finance and self-help groups, the 2021 demand on micro-financing of women's self-help groups against gender inequality, poverty and malnutrition, the 2021 demand on civil society and non-governmental organisations as an alternative public-service-delivery model, and the 2023 demand on civil-society groups and women's representation in state legislatures, the last of which the ledger marks as running primarily to the Social Justice owner with the civil-society link retained - and the Basic owner records that core routing supersedes the older Advanced pointer. Two ownership conflicts are recorded openly rather than resolved by assertion: the 2025 General Studies Paper-II demand on women's social capital, empowerment and gender equity is discussed in this owner's text but is routed by the audited 2024-2025 ledger to the Social Justice women and gender-justice owner, and the 2025 General Studies Paper-II demand on environmental pressure groups is also discussed here but is routed by that ledger to the Polity pressure-groups owner. Both are therefore treated here only as civil-society support material, and no verbatim ownership is claimed for either. No official answer key or marking scheme is held locally for any routed demand, so every model solution below is an authored answer route rather than an official key.

GOVERNANCE DEEP-REVIEW CORE CONTROL

- **Must remember:** NGOs, SHGs and civil-society organisations can aggregate voice, deliver services, build capabilities, innovate, monitor the state and enable collective action, but their legitimacy and effectiveness depend on representation, finance, capacity, transparency and downward accountability.
- **Close distinction:** NGO, voluntary organisation, charitable trust, society, section 8 company, SHG, cooperative and social movement are not synonyms; registration, tax treatment, foreign-contribution regulation and programme partnership use distinct legal or executive frameworks.
- **Authority / evidence / implementation limit:** Use Kudumbashree, SEWA, SHG-bank linkage, social movements and disaster-response partnerships with exact institutional qualification; distinguish allegation, suspension, cancellation, judicial finding and final liability, and protect both associational freedom and accountable finance.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Civil society is wider than the non-governmental organisation?

A. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. B. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. C. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. D. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically.

Answer: A. Explanation: Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Civil society is wider than the non-governmental organisation?

A. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. B. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. C. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. D. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure.

Answer: B. Explanation: Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Civil society is wider than the non-governmental organisation?

A. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. B. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. C. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. D. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically.

Answer: C. Explanation: Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Civil society is wider than the non-governmental organisation?

A. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. B. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. C. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. D. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately.

Answer: D. Explanation: Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Bonding, bridging and linking capital?

A. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. B. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. C. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. D. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure.

Answer: A. Explanation: Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Bonding, bridging and linking capital?

A. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. B. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. C. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. D. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure.

Answer: B. Explanation: Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Bonding, bridging and linking capital?

A. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. B. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. C. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. D. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth.

Answer: C. Explanation: Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Bonding, bridging and linking capital?

A. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. B. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. C. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. D. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another.

Answer: D. Explanation: Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies The self-help group as the unit?

A. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. B. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. C. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. D. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure.

Answer: A. Explanation: A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under The self-help group as the unit?

A. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. B. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. C. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. D. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth.

Answer: B. Explanation: A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of The self-help group as the unit?

A. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. B. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. C. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. D. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system.

Answer: C. Explanation: A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about The self-help group as the unit?

A. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. B. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. C. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. D. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built.

Answer: D. Explanation: A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies The three-tier livelihoods mission design?

A. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. B. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. C. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. D. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household.

Answer: A. Explanation: The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under The three-tier livelihoods mission design?

A. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. B. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. C. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. D. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system.

Answer: B. Explanation: The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of The three-tier livelihoods mission design?

A. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. B. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. C. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. D. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage.

Answer: C. Explanation: The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about The three-tier livelihoods mission design?

A. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. B. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. C. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. D. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically.

Answer: D. Explanation: The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Why no mobilisation count is asserted?

A. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. B. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. C. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. D. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household.

Answer: A. Explanation: No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Why no mobilisation count is asserted?

A. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. B. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. C. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. D. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system.

Answer: B. Explanation: No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Why no mobilisation count is asserted?

A. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. B. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. C. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. D. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years.

Answer: C. Explanation: No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Why no mobilisation count is asserted?

A. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. B. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. C. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. D. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure.

Answer: D. Explanation: No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Two micro-finance delivery channels?

A. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. B. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. C. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. D. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system.

Answer: A. Explanation: India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Two micro-finance delivery channels?

A. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. B. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. C. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. D. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system.

Answer: B. Explanation: India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Two micro-finance delivery channels?

A. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. B. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. C. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. D. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption.

Answer: C. Explanation: India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Two micro-finance delivery channels?

A. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. B. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. C. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. D. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household.

Answer: D. Explanation: India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies What micro-finance can and cannot do?

A. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. B. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. C. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. D. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system.

Answer: A. Explanation: Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under What micro-finance can and cannot do?

A. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. B. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. C. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. D. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years.

Answer: B. Explanation: Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of What micro-finance can and cannot do?

A. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. B. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. C. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. D. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years.

Answer: C. Explanation: Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about What micro-finance can and cannot do?

A. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. B. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. C. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. D. Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth.

Answer: D. Explanation: Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Named micro-finance risks?

A. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. B. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. C. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. D. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage.

Answer: A. Explanation: The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Named micro-finance risks?

A. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. B. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. C. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. D. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed.

Answer: B. Explanation: The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Named micro-finance risks?

A. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. B. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. C. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. D. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests.

Answer: C. Explanation: The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Named micro-finance risks?

A. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. B. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. C. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. D. The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system.

Answer: D. Explanation: The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies The nutrition pathway as a convergence claim?

A. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. B. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. C. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. D. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption.

Answer: A. Explanation: The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under The nutrition pathway as a convergence claim?

A. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. B. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. C. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. D. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests.

Answer: B. Explanation: The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of The nutrition pathway as a convergence claim?

A. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. B. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. C. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. D. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation.

Answer: C. Explanation: The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about The nutrition pathway as a convergence claim?

A. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. B. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. C. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. D. The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage.

Answer: D. Explanation: The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies The foreign-contribution gate and its 2020 tightening?

A. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. B. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. C. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. D. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption.

Answer: A. Explanation: The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under The foreign-contribution gate and its 2020 tightening?

A. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. B. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. C. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. D. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed.

Answer: B. Explanation: The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of The foreign-contribution gate and its 2020 tightening?

A. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. B. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. C. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. D. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests.

Answer: C. Explanation: The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible

administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about The foreign-contribution gate and its 2020 tightening?

A. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. B. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. C. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. D. The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years.

Answer: D. Explanation: The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies NGO Darpan is identification, not permission?

A. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. B. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. C. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. D. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests.

Answer: A. Explanation: NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under NGO Darpan is identification, not permission?

A. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. B. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. C. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. D. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests.

Answer: B. Explanation: NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of NGO Darpan is identification, not permission?

A. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. B. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. C. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. D. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation.

Answer: C. Explanation: NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about NGO Darpan is identification, not permission?

A. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. B. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. C. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. D. NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption.

Answer: D. Explanation: NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Four regulatory layers kept apart?

A. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. B. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. C. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. D. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation.

Answer: A. Explanation: Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Four regulatory layers kept apart?

A. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. B. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. C. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. D. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation.

Answer: B. Explanation: Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Four regulatory layers kept apart?

A. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. B. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. C. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. D. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent.

Answer: C. Explanation: Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Four regulatory layers kept apart?

A. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. B. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. C. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. D. Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed.

Answer: D. Explanation: Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Non-state as a structural category against anti-State as a political label?

A. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. B. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. C. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. D. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed.

Answer: A. Explanation: A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Non-state as a structural category against anti-State as a political label?

A. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. B. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. C. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. D. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent.

Answer: B. Explanation: A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Non-state as a structural category against anti-State as a political label?

A. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. B. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. C. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. D. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent.

Answer: C. Explanation: A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Non-state as a structural category against anti-State as a political label?

A. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. B. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. C. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. D. A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests.

Answer: D. Explanation: A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies The suspicion chain?

A. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. B. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. C. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. D. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed.

Answer: A. Explanation: The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under The suspicion chain?

A. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. B. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. C. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. D. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation.

Answer: B. Explanation: The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of The suspicion chain?

A. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. B. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. C. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. D. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it.

Answer: C. Explanation: The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or

contest the label case by case rather than accept it as a blanket characterisation. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about The suspicion chain?

A. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. B. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. C. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. D. The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation.

Answer: D. Explanation: The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Pressure groups and the R-I-S-K test?

A. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. B. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. C. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. D. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation.

Answer: A. Explanation: A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Pressure groups and the R-I-S-K test?

A. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. B. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. C. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. D. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent.

Answer: B. Explanation: A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Pressure groups and the R-I-S-K test?

A. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. B. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. C. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. D. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two

conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner.

Answer: C. Explanation: A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Pressure groups and the R-I-S-K test?

A. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. B. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. C. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. D. A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed.

Answer: D. Explanation: A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Elite capture and its design correctives?

A. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. B. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. C. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. D. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement,

upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent.

Answer: A. Explanation: Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Elite capture and its design correctives?

A. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. B. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. C. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. D. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches.

Answer: B. Explanation: Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Elite capture and its design correctives?

A. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. B. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. C. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within

federation structures, disclosure and external facilitation - rather than by exhortation. D. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches.

Answer: C. Explanation: Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Elite capture and its design correctives?

A. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. B. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. C. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. D. Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation.

Answer: D. Explanation: Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Innovator, facilitator and monitor rather than duty-holder?

A. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. B. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on

environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. C. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. D. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches.

Answer: A. Explanation: Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Innovator, facilitator and monitor rather than duty-holder?

A. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. B. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. C. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. D. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately.

Answer: B. Explanation: Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Innovator, facilitator and monitor rather than duty-holder?

A. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. B. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. C. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. D. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner.

Answer: C. Explanation: Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Innovator, facilitator and monitor rather than duty-holder?

A. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. B. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. C. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. D. Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent.

Answer: D. Explanation: Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies The civil-society pathway to representation and its gate?

A. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. B. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. C. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. D. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches.

Answer: A. Explanation: Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under The civil-society pathway to representation and its gate?

A. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. B. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. C. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see

immediately. D. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner.

Answer: B. Explanation: Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of The civil-society pathway to representation and its gate?

A. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. B. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. C. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. D. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately.

Answer: C. Explanation: Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about The civil-society pathway to representation and its gate?

A. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. B. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. C. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates

them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. D. Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it.

Answer: D. Explanation: Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies The non-member poor?

A. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. B. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. C. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. D. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately.

Answer: A. Explanation: The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under The non-member poor?

A. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. B. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. C. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. D. A self-help group

is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built.

Answer: B. Explanation: The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of The non-member poor?

A. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. B. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. C. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. D. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically.

Answer: C. Explanation: The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about The non-member poor?

A. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. B. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. C. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. D. The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches.

Answer: D. Explanation: The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Verified question ownership and two recorded routing conflicts?

A. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. B. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. C. Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. D. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another.

Answer: A. Explanation: The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Verified question ownership and two recorded routing conflicts?

A. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. B. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. C. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. D. Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as

connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another.

Answer: B. Explanation: The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Verified question ownership and two recorded routing conflicts?

A. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. B. A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. C. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. D. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure.

Answer: C. Explanation: The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Verified question ownership and two recorded routing conflicts?

A. India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household. B. No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure. C. The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. D. The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner.

Answer: D. Explanation: The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Six direct General Studies Mains demands are routed to this topic across the audited ledgers, and every routed stem used below was confirmed word for word in the locally held OCR-searchable official question papers. The audited 2024-2025 ledger routes three demands to this Basic owner: the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors. The audited 2018-2023 ledger routes four demands to the Advanced owner - the 2020 demand on micro-finance and self-help groups, the 2021 demand on micro-financing of women's self-help groups against gender inequality, poverty and malnutrition, the 2021 demand on civil society and non-governmental organisations as an alternative public-service-delivery model, and the 2023 demand on civil-society groups and women's representation in state legislatures, the last of which the ledger marks as running primarily to the Social Justice owner with the civil-society link retained - and the Basic owner records that core routing supersedes the older Advanced pointer. Two ownership conflicts are recorded openly rather than resolved by assertion: the 2025 General Studies Paper-II demand on women's social capital, empowerment and gender equity is discussed in this owner's text but is routed by the audited 2024-2025 ledger to the Social Justice women and

gender-justice owner, and the 2025 General Studies Paper-II demand on environmental pressure groups is also discussed here but is routed by that ledger to the Polity pressure-groups owner. Both are therefore treated here only as civil-society support material, and no verbatim ownership is claimed for either. No official answer key or marking scheme is held locally for any routed demand, so every model solution below is an authored answer route rather than an official key.

Demand decoding: The directive **answer** requires a direct position on "VERIFIED PYQ OWNERSHIP AUDIT", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The answer must resolve the governance demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Analytical body:

1. **Claim and named evidence:** Define the governance concept and separate it from the nearest legal, institutional or measured category. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
2. **Claim and named evidence:** Identify the constitutional, statutory, delegated or executive authority and the competent level of government. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
3. **Claim and named evidence:** Map state, market, civil-society, frontline and citizen stakeholders with power, duty and vulnerability. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
4. **Claim and named evidence:** Trace finance, information, implementation, monitoring, grievance, appeal and correction through the delivery chain. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
5. **Claim and named evidence:** Use a named Indian law, institution, scheme, audit, reform or local example with source, date and operative status. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
6. **Claim and named evidence:** Test exclusion, digital divide, privacy, capture, capacity, indicator gaming, trade-off and residual-risk limits. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: The answer must resolve the governance demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy,

federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "VERIFIED PYQ OWNERSHIP AUDIT", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- FACT: 2025 Q6: build the answer around bonding capital (internal SHG trust/savings), bridging capital (federation-level scale) and linking capital (bank/market/government access), each explicitly tied to empowerment and gender equity outcomes.
- FACT: 2025 Q8: take a reasoned position - argue that CSOs are structurally non-state, not anti-State, actors, while acknowledging that specific advocacy positions or funding opacity can generate state suspicion; avoid a purely one-sided "CSOs are always benign/always adversarial" answer.
- FACT: 2025 Q15: use **R-I-S-K** - representation, information/expertise, scrutiny, and capture risk - to assess an environmental pressure group rather than merely listing organisations.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2024, 2025
- **Paper(s):** GS-I, GS-II
- **Routed question demands:** 3

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2024	GS-I	10	Government-NGO-private collaboration in socio-economic development	Discuss · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2024	GS-II	6	Public charitable trusts and inclusive development	Comment · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2025	GS-II	8	Civil Society Organizations as anti-State versus non-State actors	Justify · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Government-NGO-private collaboration in socio-economic development
- Public charitable trusts and inclusive development
- Civil Society Organizations as anti-State versus non-State actors

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

10. PYQ-based analytical application

- FACT: 2025 Q6 rewards explicitly sequencing bonding -> bridging -> linking capital and tying each stage to a concrete empowerment/gender-equity outcome, not a generic "SHGs help women" statement.
- FACT: 2025 Q8 rewards taking a reasoned, evidence-qualified position (structurally non-state, contested "anti-State" perception) rather than an unqualified "yes" or "no" - use the suspicion-chain (Section 3) to justify the position with the FCRA/advocacy dynamic.
- FACT: 2025 Q15 rewards separating legitimate environmental representation/expertise from opaque lobbying or elite capture; apply the five safeguards in the influence chain.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2020, 2021, 2023
- **Paper(s):** GS-II
- **Routed question demands:** 4

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2020	GS-II	17	Micro-finance as an anti-poverty instrument and the role of SHGs	Evaluate · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2021	GS-II	8	Microfinancing of women SHGs against gender inequality poverty and malnutrition	Explain with examples · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2021	GS-II	18	Civil society and NGOs as an alternative public service delivery model	Discuss the challenges · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2023	GS-II	14	Civil society groups and women's representation in state legislatures	Discuss the contribution · 15 marks · 250 words	Social Justice Core route; civil-society link retained	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Micro-finance as an anti-poverty instrument and the role of SHGs
- Microfinancing of women SHGs against gender inequality poverty and malnutrition
- Civil society and NGOs as an alternative public service delivery model
- Civil society groups and women's representation in state legislatures

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2025 General Studies Paper-II

Demand: Civil Society Organizations are often perceived as being anti-State actors than non-State actors. Do you agree? Justify. Answer in 150 words for 10 marks.

Status: Routed to this Basic owner by the audited 2024-2025 Mains ledger and confirmed word for word in the locally held official 2025 General Studies Paper-II. No official answer key is held locally, so the model solution is an authored route.

Model solution: Commit in the first sentence, because justify penalises fence-sitting: civil-society organisations are non-State actors by structure and adversarial only by circumstance, so the perception described in the stem is a political judgment about particular advocacy or funding rather than a legal reclassification. Establish the category before the perception. Non-state is a structural and legal fact, namely that the body is not part of government; anti-State is a perceptual label applied to a specific position, and collapsing the two converts a constitutional freedom into a suspicion. Then supply the mechanism that explains the perception rather than dismissing it. The watchdog and advocacy function is independent of government by construction; where advocacy opposes a specific policy or project, independence is read as adversarial rather than as feedback; and foreign funding compounds the perception because the screening rationale under the foreign-contribution law reflects a concern that externally funded advocacy could serve external interests. Give one supporting and one limiting case as the directive requires. Supporting the non-State reading, the same organisations co-implement public programmes, facilitate social audit and supply the mobilisation on which community institutions depend. Limiting it, opacity about funding, weak internal democracy and an unelected claim to speak for a community are legitimate grounds for the state to ask a legitimacy question. Name the proportionate response: disclosure, internal democracy and engagement rather than reclassification, with any screening kept time-bound, reasoned and reviewable. Conclude that the label should be justified or contested case by case and never applied as a blanket characterisation, and adjudicate no specific enforcement action.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 1 - 2025 General Studies Paper-II", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2025 General Studies Paper-II", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

PYQ DEMAND CARD 2 - 2024 General Studies Paper-I

Demand: In dealing with socio-economic issues of development, what kind of collaboration between government, NGOs and private sector would be most productive? Answer in 150 words for 10 marks.

Status: Routed to this Basic owner by the audited 2024-2025 Mains ledger and confirmed word for word in the locally held official 2024 General Studies Paper-I. No official answer key is held locally, so the model solution is an authored route.

Model solution: The stem asks what kind of collaboration, so the answer must specify a division of labour rather than praise partnership in general. Open with the organising principle: the most productive collaboration assigns each actor the role its accountability structure can actually sustain. Assign the roles explicitly. The government holds the universal mandate, the taxing and coercive power and electoral accountability, so it must remain the duty-holder for the entitlement, the standard-setter and the funder of last resort; a right needs an addressee who can be compelled, and neither of the other two actors can be. The non-governmental sector holds local trust, flexibility and the ability to pilot what a department cannot risk, so it is best commissioned as innovator, facilitator and monitor - community mobilisation, social-audit facilitation, legal aid and grievance help. The private sector holds capital, technology and operating capability, so it is best used where a whole-life service standard can be specified and paid for on performance, with corporate social responsibility funding under Section 135 bounded by the Schedule VII activity list. Name the design conditions that make the collaboration productive rather than merely coordinated: convergence with the district plan instead of parallel silos, disclosed funding and contract terms, a beneficiary grievance route, exit and hand-over planning at the design stage, and outcome indicators agreed before the work begins. State the risks

honestly - upward accountability to funders rather than downward to citizens, visible-need bias that crowds funders into legible sectors, and substitution that relieves political pressure to fix public delivery. Conclude that the productive form is complementarity with the state as duty-holder, civil society as facilitator and monitor, and the private sector as a performance-bound provider, and invent no project, spend figure or partnership statistic.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 2 - 2024 General Studies Paper-I", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

activity list. Name the design conditions that make the collaboration productive rather than merely coordinated: convergence with the district plan instead of parallel silos, disclosed funding and contract terms, a beneficiary grievance route, exit and hand-over planning at the design stage, and outcome indicators agreed before the work begins. State the risks honestly - upward accountability to funders rather than downward to citizens, visible-need bias that crowds funders into legible sectors, and substitution that relieves political pressure to fix public delivery. Conclude that the productive form is complementarity with the state as duty-holder, civil society as facilitator and monitor, and the private sector as a performance-bound provider, and invent no project, spend figure or partnership statistic.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "PYQ DEMAND CARD 2 - 2024 General Studies Paper-I", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

PYQ DEMAND CARD 3 - 2024 General Studies Paper-II

Demand: Public charitable trusts have the potential to make India's development more inclusive as they relate to certain vital public issues. Comment. Answer in 150 words for 10 marks.

Status: Routed to this Basic owner by the audited 2024-2025 Mains ledger and confirmed word for word in the locally held official 2024 General Studies Paper-II. The development-industry owner also discusses this demand in its own text, and that overlap is recorded as a routing conflict rather than resolved by assertion. No official answer key is held locally.

Model solution: Read the stem's own conditionality first, because have the potential to is not an assertion that the outcome occurs. Answer conditionally: charitable trusts hold real potential precisely where the state is procedurally slow, but potential becomes inclusion only under stated conditions. Establish the legal position accurately, since a wrong statute here is a visible error: a public charitable trust is governed by its deed and the applicable state public-trust or endowment law, and Section 1 of the Indian Trusts Act, 1882 expressly excludes public or private religious or charitable endowments, so that Act is not the national incorporation statute for such trusts. Then give the supporting case with named vital issues: flexibility and speed in disaster relief, targeted health and education work, and the ability to fund needs that routine budgeting and procurement cycles reach slowly. Apply the five conditions that convert potential into inclusion - additionality rather than substitution for a public obligation still owed, need-based targeting from disaggregated exclusion data rather than founder priority, disclosed governance with a beneficiary route to complain, sustainability beyond the grant cycle, and convergence with the district plan rather than a parallel silo. State the structural limitation squarely: a trust reports upward to trustees, donors and regulators and never downward to a beneficiary who has no electoral sanction, and trusts face the lightest external disclosure of the three common legal vehicles. Conclude that the charitable legal form supplies flexibility but supplies none of the accountability conditions by itself, so the potential in the stem is genuine and conditional rather than automatic, and assert no trust's programme results or spend figure.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 3 - 2024 General Studies Paper-II", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Read the stem's own conditionality first, because have the potential to is not an assertion that the outcome occurs. Answer conditionally: charitable trusts hold real potential precisely where the state is procedurally slow, but potential becomes inclusion only under stated conditions. Establish the legal position accurately, since a wrong statute here is a visible error: a public charitable trust is governed by its deed and the applicable state public-trust or endowment law, and Section 1 of the Indian Trusts Act, 1882 expressly excludes public or private religious or charitable endowments, so that Act is not the national incorporation statute for such trusts. Then

give the supporting case with named vital issues: flexibility and speed in disaster relief, targeted health and education work, and the ability to fund needs that routine budgeting and procurement cycles reach slowly. Apply the five conditions that convert potential into inclusion - additionality rather than substitution for a public obligation still owed, need-based targeting from disaggregated exclusion data rather than founder priority, disclosed governance with a beneficiary route to complain, sustainability beyond the grant cycle, and convergence with the district plan rather than a parallel silo. State the structural limitation squarely: a trust reports upward to trustees, donors and regulators and never downward to a beneficiary who has no electoral sanction, and trusts face the lightest external disclosure of the three common legal vehicles. Conclude that the charitable legal form supplies flexibility but supplies none of the accountability conditions by itself, so the potential in the stem is genuine and conditional rather than automatic, and assert no trust's programme results or spend figure.

Analytical body:

1. **Claim and named evidence:** PYQ DEMAND CARD 3 - 2024 General Studies Paper-II **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
2. **Claim and named evidence:** Demand: Public charitable trusts have the potential to make India's development more inclusive as they relate to certain vital public issues. Comment. Answer in 150 words for 10 marks. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: Read the stem's own conditionality first, because have the potential to is not an assertion that the outcome occurs. Answer conditionally: charitable trusts hold real potential precisely where the state is procedurally slow, but potential becomes inclusion only under stated conditions. Establish the legal position accurately, since a wrong statute here is a visible error: a public charitable trust is governed by its deed and the applicable state public-trust or endowment law, and Section 1 of the Indian Trusts Act, 1882 expressly excludes public or private religious or charitable endowments, so that Act is not the national incorporation statute for such trusts. Then give the supporting case with named vital issues: flexibility and speed in disaster relief, targeted health and education work, and the ability to fund needs that routine budgeting and procurement cycles reach slowly. Apply the five conditions that convert potential into inclusion - additionality rather than substitution for a public obligation still owed, need-based targeting from disaggregated exclusion data rather than founder priority, disclosed governance with a beneficiary route to complain, sustainability beyond the grant cycle, and convergence with the district plan rather than a parallel silo. State the structural limitation squarely: a trust reports upward to trustees, donors and regulators and never downward to a beneficiary who has no electoral sanction, and trusts face the lightest external disclosure of the three common legal vehicles. Conclude that the charitable legal form supplies flexibility but supplies none of the accountability conditions by itself, so the potential in the stem is genuine and conditional rather than automatic, and assert no trust's programme results or spend figure.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "PYQ DEMAND CARD 3 - 2024 General Studies Paper-II", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

PYQ DEMAND CARD 4 - 2020 General Studies Paper-II

Demand: Micro-Finance as an anti-poverty vaccine, is aimed at asset creation and income security of the rural poor in India. Evaluate the role of the Self Help Groups in achieving the twin objectives along with empowering women in rural India. Answer in 250 words for 15 marks.

Status: Routed by the audited 2018-2023 Mains ledger to the Advanced owner and confirmed word for word in the locally held official 2020 General Studies Paper-II. The Basic owner answers it under core routing. No official answer key is held locally.

Model solution: Evaluate requires a graded judgment against criteria named first, so define the instrument precisely before judging it. Micro-finance is the provision of small-value financial services - credit, savings, insurance and remittance - to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is one component of it rather than the whole; that distinction alone separates a good answer. Keep the two Indian delivery channels apart: the savings-first self-help group and bank linkage route inside the national rural livelihoods architecture, which builds a group balance sheet, and the specialised micro-finance institution and non-banking financial company route regulated by the central bank, which builds a loan book. Explain the mechanism by which the group route can serve the twin objectives: group liability and repayment record substitute for collateral, the moneylender's rate is displaced, irregular income is converted into savings and repayment discipline, working capital funds micro-enterprise, and federation into Village Organisations and Cluster-Level Federations supplies the linking capital that opens bank, market and scheme access. Then deliver the evaluative core rather than a benefits list. Micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation, returns in saturated local markets are thin, and repayment discipline can be sustained by borrowing again rather than by income growth. Name the risks as categories: over-indebtedness and multiple lending, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rate and the cost of serving small remote loans, and elite capture inside groups. On empowerment, credit access is not the same as control over income, so the defensible claim runs through group savings held in a woman's own account, office-bearing that produces negotiation experience, and public voice, while noting that the most excluded households are frequently members of no group at all. Conclude that micro-finance works as one instrument inside a livelihoods system of credit plus skill, market linkage, social protection and public services, and fails when treated as a substitute for that system. Assert no loan volume, interest-rate cap, non-performing asset figure or borrower count.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 4 - 2020 General Studies Paper-II", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

PYQ DEMAND CARD 5 - 2021 General Studies Paper-II

Demand: Can the vicious cycle of gender inequality, poverty and malnutrition be broken through microfinancing of women SHGs? Explain with examples. Answer in 150 words for 10 marks.

Status: Routed by the audited 2018-2023 Mains ledger to the Advanced owner and confirmed word for word in the locally held official 2021 General Studies Paper-II. The Basic owner answers it under core routing. No official answer key is held locally.

Model solution: Answer the question actually asked - whether the cycle can be broken - rather than describing what self-help groups do. Take a qualified position: micro-financing of women's groups can weaken each link of the cycle and can break none of them on its own. Then explain through three distinct outcome channels rather than repeating the word empowerment. First, income and asset control: money routed through a woman's own group account changes who decides household expenditure, which is the operative mechanism on gender inequality rather than the mere fact of a loan. Second, voice: federation office-bearing produces public speaking, negotiation with bank branches and officials, and Gram Sabha participation, converting bonding capital into linking capital. Third, the nutrition pathway, and here precision earns the marks - the credible link is indirect, running through women's control over income and through the group platform used for health and nutrition messaging and for convergence with public nutrition services, so this must be stated explicitly as a convergence claim rather than as a measured income-to-nutrition effect. Give the examples the directive requires in institutional form: a federation negotiating a cluster-level credit line with a bank branch, and a group platform used as the delivery point for nutrition and health messaging alongside public services. State the limits with equal force: credit access is not freedom from over-indebtedness, elite capture concentrates office among already-advantaged members, and the poorest households are frequently not members of any group. Conclude that micro-financing is a necessary lever on the cycle and never a sufficient one, and cite no malnutrition percentage or measured nutrition outcome.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 5 - 2021 General Studies Paper-II", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

PYQ DEMAND CARD 6 - 2021 General Studies Paper-II

Demand: Can Civil Society and Non-Governmental Organizations present an alternative model of public service delivery to benefit the common citizen? Discuss the challenges of this alternative model. Answer in 250 words for 15 marks.

Status: Routed by the audited 2018-2023 Mains ledger to the Advanced owner and confirmed word for word in the locally held official 2021 General Studies Paper-II. The Basic owner answers it under core routing. No official answer key is held locally.

Model solution: Frame the answer as a model comparison rather than a complaint list, because that framing is what the discuss directive rewards here. State the comparison first: state delivery carries a universal mandate, taxing and coercive power and electoral accountability, while non-governmental delivery carries flexibility, local trust and innovation with accountability running to a funder. Concede the genuine case before the challenges, so that the critique is credible: these organisations reach populations the state reaches poorly, pilot innovations a department cannot risk, and supply the facilitation that social audit, legal aid and community institutions require. Then set out the six challenges with the mechanism of each. Scale, because coverage is geographic and partial, so equity across a state cannot be assured by an organisation that operates in some districts and not others. Sustainability, because project-cycle funding is mismatched to a permanent entitlement and a successful pilot can collapse when the grant ends. Accountability direction, because reporting runs upward to the funder rather than downward to the citizen and there is no electoral sanction. Capacity and standards, because quality varies between organisations in a way a

uniform entitlement cannot tolerate. Substitution risk, because effective non-state delivery can relieve the political pressure that would otherwise force public delivery to improve. Regulatory dependence, because incorporation, foreign-funding registration under the 2010 Act as amended in 2020, tax status and grant identity are four separate permissions that make scale legally contingent. Resolve the question rather than leaving it open: civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, since a right needs an addressee who can be compelled and no organisation can be. Close with the safeguard set that makes commissioning defensible - convergence with the local plan, disclosure of funding and cost, a beneficiary grievance route, and exit planning at the design stage - and name no organisation's funding, results or regulatory action.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 6 - 2021 General Studies Paper-II", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "PYQ DEMAND CARD 6 - 2021 General Studies Paper-II", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 1 - 10 MARKS

Question: Explain how bonding, bridging and linking social capital advance women's empowerment through self-help groups in India. Answer in about 150 words.

Model thesis: The chain works only in sequence, because trust within the group creates the savings discipline, federation supplies negotiating scale and vertical linkage converts that scale into credit, market and scheme access, and it stalls wherever any single stage is missing or captured.

Claim -> named evidence -> analysis -> qualification:

- Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another.
- A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built.
- The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically.

Qualified conclusion: The chain works only in sequence, because trust within the group creates the savings discipline, federation supplies negotiating scale and vertical linkage converts that scale into credit, market and scheme access, and it stalls wherever any single stage is missing or captured.

Demand decoding: The directive **explain** requires a direct position on "Explain how bonding, bridging and linking social capital advance women's empowerment through...", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The chain works only in sequence, because trust within the group creates the savings discipline, federation supplies negotiating scale and vertical linkage converts that scale into credit, market and scheme access, and it stalls wherever any single stage is missing or captured.

Analytical body:

1. **Claim and named evidence:** Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
2. **Claim and named evidence:** A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
3. **Claim and named evidence:** The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: The chain works only in sequence, because trust within the group creates the savings discipline, federation supplies negotiating scale and vertical linkage converts that scale into credit, market and scheme access, and it stalls wherever any single stage is missing or captured.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "Explain how bonding, bridging and linking social capital advance women's empowerment through...", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Explain why a civil-society organisation is a non-State actor even when its advocacy is perceived as adversarial. Answer in about 150 words.

Model thesis: Non-state is a structural and legal category while anti-State is a political label, so the appropriate governance response to disagreement is disclosure and engagement rather than reclassification of a constitutional freedom as a suspicion.

Claim -> named evidence -> analysis -> qualification:

- A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a

constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests.

- The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation.
- Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately.

Qualified conclusion: Non-state is a structural and legal category while anti-State is a political label, so the appropriate governance response to disagreement is disclosure and engagement rather than reclassification of a constitutional freedom as a suspicion.

Demand decoding: The directive **explain** requires a direct position on "Explain why a civil-society organisation is a non-State actor even when its advocacy is...", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Non-state is a structural and legal category while anti-State is a political label, so the appropriate governance response to disagreement is disclosure and engagement rather than reclassification of a constitutional freedom as a suspicion.

Analytical body:

1. **Claim and named evidence:** A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests.
Analysis: Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
2. **Claim and named evidence:** The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response.

3. **Claim and named evidence:** Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative

status.

Qualified conclusion: Non-state is a structural and legal category while anti-State is a political label, so the appropriate governance response to disagreement is disclosure and engagement rather than reclassification of a constitutional freedom as a suspicion.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "Explain why a civil-society organisation is a non-State actor even when its advocacy is...", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 3 - 15 MARKS

Question: Examine micro-finance as an anti-poverty instrument and the role of self-help groups in achieving asset creation and income security. Answer in about 250 words.

Model thesis: Micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, so it works inside a livelihoods system of credit plus skill, market linkage and social protection and fails when treated as a substitute for it.

Claim -> named evidence -> analysis -> qualification:

- India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household.
- Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth.
- The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system.
- The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically.

Qualified conclusion: Micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, so it works inside a livelihoods system of credit plus skill, market linkage and social protection and fails when treated as a substitute for it.

Demand decoding: The directive **examine** requires a direct position on "Examine micro-finance as an anti-poverty instrument and the role of self-help groups in...", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, so it works inside a livelihoods system of credit plus skill, market linkage and social protection and fails when treated as a substitute for it.

4. **Claim and named evidence:** The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: Micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, so it works inside a livelihoods system of credit plus skill, market linkage and social protection and fails when treated as a substitute for it.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "Examine micro-finance as an anti-poverty instrument and the role of self-help groups in...", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 4 - 15 MARKS

Question: Examine the challenges of treating civil society and non-governmental organisations as an alternative model of public service delivery. Answer in about 250 words.

Model thesis: Civil society should be commissioned for innovation, facilitation and monitoring and never made the duty-holder for an entitlement, because scale, sustainability, accountability direction, capacity variation, substitution risk and regulatory dependence all bear on the same structural point that the state cannot contract out an addressee.

Claim -> named evidence -> analysis -> qualification:

- Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent.
- NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption.
- The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years.
- The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches.

Qualified conclusion: Civil society should be commissioned for innovation, facilitation and monitoring and never made the duty-holder for an entitlement, because scale, sustainability, accountability direction, capacity variation, substitution risk and regulatory dependence all bear on the same structural point that the state cannot contract out an addressee.

Demand decoding: The directive **examine** requires a direct position on "Examine the challenges of treating civil society and non-governmental organisations as an...", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Civil society should be commissioned for innovation, facilitation and monitoring and never made the duty-holder for an entitlement, because scale, sustainability, accountability direction, capacity variation, substitution risk and regulatory dependence all bear on the same structural point that the state cannot contract out an addressee.

Analytical body:

1. **Claim and named evidence:** Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction,

legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

2. **Claim and named evidence:** NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
3. **Claim and named evidence:** The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
4. **Claim and named evidence:** The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: Civil society should be commissioned for innovation, facilitation and monitoring and never made the duty-holder for an entitlement, because scale, sustainability, accountability direction, capacity variation, substitution risk and regulatory dependence all bear on the same structural point that the state cannot contract out an addressee.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "Examine the challenges of treating civil society and non-governmental organisations as an...", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 5 - 20 MARKS

Question: Assess whether the regulation of foreign funding for civil society in India is proportionate to its stated rationale. Answer in about 300 words.

Model thesis: The security rationale and the civic-space critique are both real, so a defensible verdict rests on whether the screening is time-bound, reasoned and reviewable rather than on whether external funding of advocacy is permitted at all, and no specific enforcement case may be adjudicated in an answer.

Claim -> named evidence -> analysis -> qualification:

- The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years.
- Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed.
- The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation.
- A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests.

Qualified conclusion: The security rationale and the civic-space critique are both real, so a defensible verdict rests on whether the screening is time-bound, reasoned and reviewable rather than on whether external funding of advocacy is permitted at all, and no specific enforcement case may be adjudicated in an answer.

Demand decoding: The directive **assess** requires a direct position on "Assess whether the regulation of foreign funding for civil society in India is proportionate...", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The security rationale and the civic-space critique are both real, so a defensible verdict rests on whether the screening is time-bound, reasoned and reviewable rather than on whether external funding of advocacy is permitted at all, and no specific enforcement case may be adjudicated in an answer.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: The security rationale and the civic-space critique are both real, so a defensible verdict rests on whether the screening is time-bound, reasoned and reviewable rather than on whether external funding of advocacy is permitted at all, and no specific enforcement case may be adjudicated in an answer.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "Assess whether the regulation of foreign funding for civil society in India is proportionate...", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: Assess the claim that organised civil society broadens democratic representation in India. Answer in about 300 words.

Model thesis: Civil society genuinely widens the pool of information, leadership and scrutiny, but the party ticket gate, the capture risk inside participatory bodies and the exclusion of the poorest non-members set a hard ceiling on how far mobilisation converts into representation.

Claim -> named evidence -> analysis -> qualification:

- Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not

automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it.

- A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed.
- Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation.
- The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner.

Qualified conclusion: Civil society genuinely widens the pool of information, leadership and scrutiny, but the party ticket gate, the capture risk inside participatory bodies and the exclusion of the poorest non-members set a hard ceiling on how far mobilisation converts into representation.

Demand decoding: The directive **assess** requires a direct position on "Assess the claim that organised civil society broadens democratic representation in India....", every clause, exact authority and institutional boundary, an implementation chain, stakeholder/accountability map, Centre-state-local allocation, named Indian evidence, trade-offs, safeguards and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Civil society genuinely widens the pool of information, leadership and scrutiny, but the party ticket gate, the capture risk inside participatory bodies and the exclusion of the poorest non-members set a hard ceiling on how far mobilisation converts into representation.

Analytical body:

1. **Claim and named evidence:** Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
2. **Claim and named evidence:** A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

3. **Claim and named evidence:** Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.
4. **Claim and named evidence:** The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner. **Analysis:** Connect authority -> institution and stakeholder incentives -> frontline implementation -> process/output/outcome effect -> accountability or grievance response. **Qualification:** State the jurisdiction, legal/executive status, Centre-state-local boundary, inclusion/privacy safeguard, causal limit, indicator weakness or residual trade-off.

Counter-position / limit: A constitutional value, commission recommendation, scheme catalogue, budget allocation, portal, disposal count or ranking cannot alone establish lawful authority, inclusive implementation, substantive remedy or attributable outcome; test capacity, federal competence, distribution, privacy, audit, appeal and current operative status.

Qualified conclusion: Civil society genuinely widens the pool of information, leadership and scrutiny, but the party ticket gate, the capture risk inside participatory bodies and the exclusion of the poorest non-members set a hard ceiling on how far mobilisation converts into representation.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing authority -> institution -> delivery -> outcome -> remedy; define and state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for inclusion, privacy, federal, indicator, grievance and current-status limits.

Why this earns marks: The answer obeys the directive, explains implementation rather than listing schemes, uses named India-centric evidence and preserves legal, federal, institutional, causal and outcome distinctions.

How to improve this answer: For "Assess the claim that organised civil society broadens democratic representation in India...", replace the weakest catalogue-style point with one named duty-holder, legal or executive basis, delivery bottleneck, process and outcome indicator, grievance route and evidence-status qualification.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Governance | **Tier:** Advanced | **GS Paper:** GS-II. **Core area:** NGOs, Self-Help Groups, civil-society organisations, social capital, FCRA and NGO Darpan. **Grounded in:** DAY-NRLM; FCRA, 2010 (amended 2020); NGO Darpan (NITI Aayog); Putnam's social-capital theory; audited 2025 GS-II PYQs. **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor. *Companion:* basic/04_NGOs-SHG-and-Civil-Society-Stakeholders.md.

1. Architecture

Analytical claim: ANALYSIS: The same structural feature - civil society's independence from government - simultaneously enables its social-capital contribution to empowerment (Q6, 2025) and produces the non-state/anti-State perception tension (Q8, 2025); the two 2025 PYQs are analytically two faces of the same underlying feature, not unrelated topics.

2. Concepts and distinctions

Concept	Precise meaning
FACT: Putnam's bonding/bridging/linking typology	Bonding capital is dense, homogenous trust within a group (an SHG's internal savings circle); bridging capital connects otherwise-separate groups (SHG federations, inter-caste/inter-village cooperation); linking capital connects citizens vertically to formal power structures (banks, government departments) - each type serves a different governance function and none substitutes for the others.
FACT: Registration vs prior permission under FCRA	FCRA-registered associations (in existence and demonstrating developmental activity, typically for a minimum period, with continuing renewal obligations) may receive foreign contributions on an ongoing basis; associations without registration may instead seek case-specific "prior permission" for a defined foreign contribution - the two routes carry different compliance burdens and risk profiles.
FACT: NGO Darpan vs FCRA vs 12A/80G tax registration	NGO Darpan (NITI Aayog) is an identification/database registration mainly relevant to government-grant eligibility; FCRA (MHA) is the foreign-funding legal gate; 12A/80G (Income Tax Department) governs tax-exemption status for the NGO and its domestic donors - three distinct regulatory layers frequently confused as one "NGO registration."
ANALYSIS: Structural non-state status vs perceived alignment	A CSO's non-state status is a legal/structural fact (it is not part of government); "anti-State" is a perceptual/political label applied when a CSO's advocacy, funding source or activity is seen as opposing state policy or sovereignty concerns - conflating the two collapses a structural category into a political judgment.
ANALYSIS: Social capital as a public good with private capture risk	Social capital generated by SHG federations can be captured by local elites (dominant caste/economic groups within a village) unless deliberately designed for inclusive participation - a limitation on the "social capital automatically empowers" claim.
ANALYSIS: Pressure-group pluralism vs capture	Multiple organised interests can improve representation and policy information, but unequal money, access and organisational capacity can convert pluralism into policy capture. Disclosure of funding, consultation records and conflicts of interest is the key governance safeguard.

3. Detailed causal chain: social capital to empowerment, and civil society to state suspicion

Empowerment chain (2025 PYQ Q6)

1. SHG formation builds **bonding capital**: regular savings meetings build trust,

financial discipline and peer accountability among women members.

2. **Bridging capital** emerges as SHGs federate into village organisations and cluster-level federations, enabling risk-pooling and negotiating scale.

3. **Linking capital** connects federations to banks (credit linkage), markets (produce aggregation) and government schemes (DAY-NRLM community investment support), converting social trust into financial and political access.

4. The cumulative effect is measurable empowerment: financial inclusion, collective bargaining power in local governance (e.g., Gram Sabha participation), and enhanced public voice for women - directly advancing gender equity, not merely income generation.

Suspicion/anti-State perception chain (2025 PYQ Q8)

1. CSOs perform an inherent **watchdog/advocacy function** (monitoring implementation, highlighting rights violations, opposing specific policies) that is structurally independent of government.

2. Where advocacy directly challenges a government's specific policy or project (e.g., opposing a particular infrastructure project on environmental/human-rights grounds), the state may perceive this as adversarial rather than as legitimate feedback.

3. **Foreign funding** compounds this perception: FCRA's national-security screening rationale reflects a state concern that foreign-funded advocacy could serve external interests rather than domestic public interest - a concern applied unevenly and sometimes contested as disproportionate suppression of legitimate dissent.

4. The correct analytical resolution (for Q8) is that CSOs remain structurally non-state actors; "anti-State" is a political label, not a legal category, and should be justified or contested case-by-case rather than accepted as a blanket characterisation.

Pressure-group influence chain (2025 PYQ Q15)

1. Group aggregates a diffuse environmental interest and supplies specialised information.

2. It uses consultation, media, petitions, litigation and community mobilisation.

3. Government/regulator receives information and political pressure that may correct a blind spot or, if access is unequal/opaque, privilege one organised interest.

4. Evaluate the result through transparency of funding, representativeness, evidence quality, conflict-of-interest safeguards and measurable policy/environmental outcome.

4. Institutional and reform architecture

- FACT: FCRA, 2010 was substantially amended in 2020, introducing requirements including a designated FCRA bank account at a specified State Bank of India branch in New Delhi, restrictions on sub-granting foreign funds between FCRA-registered entities, and a reduction of the permissible administrative-expense proportion from 50% to 20% of foreign contribution utilised.

- FACT: NGO Darpan functions as a light-touch, largely self-reported database; it is not a substitute for FCRA or tax-registration compliance, and its primary institutional purpose is improving government visibility into the NGO ecosystem for grant administration.

- ANALYSIS: DAY-NRLM's institutional design (SHG -> Village Organisation -> Cluster-Level Federation) is a deliberate three-tier structure intended to convert bonding capital into bridging and linking capital systematically, rather than leaving federation to emerge organically.

5. Indian applications and boundary cases

- ANALYSIS: A women's SHG federation that successfully negotiates a bulk input-supply contract illustrates bridging capital converting into market access - a strong example for Q6-style answers.

- ANALYSIS: Boundary case: an environmental-advocacy CSO receiving foreign funding and opposing a

government-backed infrastructure project sits exactly at the Q8 tension point - a rigorous answer must assess whether the opposition reflects genuine public-interest advocacy or a funding-transparency concern, rather than assuming either extreme.

- ANALYSIS: Elite capture within an SHG federation (where office-bearer positions concentrate among already-empowered women) illustrates the social-capital-as-public-good-with-capture-risk limitation - a corrective often recommended is rotational leadership and reservation within federation structures.

6. Limitations and trade-offs

- ANALYSIS: Strengthening FCRA scrutiny protects against genuine national-security/money-laundering risk but raises the compliance burden and can chill legitimate rights-based advocacy work - a live and contested trade-off, not a settled matter.

- ANALYSIS: SHG federation models build social capital effectively for economic/livelihood objectives but do not automatically translate into political empowerment (e.g., representation in Panchayats) unless deliberately linked to participatory governance channels (see 14).

- ANALYSIS: NGO Darpan's light-touch registration improves visibility but does not by itself ensure NGO financial accountability - genuine accountability still depends on FCRA/tax-regulator enforcement capacity.

7. Must-Know Facts for Advanced Prelims

- FACT: FCRA's 2020 amendment tightened compliance by, among other changes, mandating a designated FCRA account at a specified bank branch and restricting the sub-granting of foreign contributions between FCRA-registered entities.

- FACT: NGO Darpan, FCRA registration and Income Tax 12A/80G registration are three distinct regulatory processes administered by three different authorities (NITI Aayog, Ministry of Home Affairs, Income Tax Department respectively).

- FACT: DAY-NRLM's institutional design explicitly builds a three-tier federation structure (SHG -> Village Organisation -> Cluster-Level Federation) to scale social capital systematically.

8. Advanced Prelims traps

- WRONG: FCRA registration automatically confers tax-exemption status. -> Tax exemption (12A/80G) is a separate Income Tax Department process independent of FCRA foreign-funding registration.

- WRONG: "Anti-State" and "non-state" are interchangeable descriptors for CSOs. -> Non-state is a structural/legal category (outside government); anti-State is a contested political label applied selectively - treating them as synonyms is the exact trap the 2025 PYQ tests.

- WRONG: Social capital automatically benefits all members of a community equally. -> Elite capture within federated structures is a documented limitation requiring deliberate design correctives (rotation, reservation).

9. CURRENT: Current-anchor note

- CURRENT: **Status checked 21 July 2026:** the FCRA administrative-expense cap is 20% of foreign contribution utilised, and FCRA registration is renewable every five years. No fixed count of currently suspended or cancelled FCRA registrations is asserted here, since the Ministry of Home Affairs updates this list on an ongoing basis; DAY-NRLM's SHG-mobilisation count is similarly not fixed here, since it rises continuously on the NRLM MIS portal.

10. PYQ-based analytical application

- FACT: 2025 Q6 rewards explicitly sequencing bonding -> bridging -> linking capital and tying each stage to a concrete empowerment/gender-equity outcome, not a generic "SHGs help women" statement.

- FACT: 2025 Q8 rewards taking a reasoned, evidence-qualified position (structurally non-state, contested "anti-State" perception) rather than an unqualified "yes" or "no" - use the suspicion-chain (Section 3) to justify the position with the FCRA/advocacy dynamic.

- FACT: 2025 Q15 rewards separating legitimate environmental representation/expertise from opaque lobbying or elite capture; apply the five safeguards in the influence chain.

11. Mains-ready framework

Central thesis: Civil society's independence from the state is the same structural feature that enables its social-capital contribution to empowerment and produces the recurring "anti-State" perception applied to its advocacy role; sound governance treats CSO independence as a resource to be engaged, not a threat to be suppressed, while maintaining proportionate financial-transparency safeguards.

1. Define social capital (bonding/bridging/linking) and civil society's structural non-state status.
2. Trace the empowerment chain for the specific case (SHG, advocacy CSO, or CSR-linked NGO).
3. If the question invites a normative judgment (agree/disagree), state a reasoned position using the suspicion-chain analysis.
4. Flag the FCRA/funding-transparency trade-off explicitly.
5. Recommend a correction (rotation/reservation for elite capture; proportionate, time-bound FCRA scrutiny for funding-transparency concerns) with a measurable safeguard.

12. Probable questions

- ANALYSIS: **Prelims:** What amendment did the FCRA undergo in 2020 regarding designated bank accounts for foreign contributions?
- ANALYSIS: **Mains (10 marks):** Distinguish bonding, bridging and linking social capital with reference to India's Self-Help Group movement.
- ANALYSIS: **Mains (15 marks):** "Civil Society Organisations are structurally non-state but frequently perceived as anti-State." Critically examine this statement with reference to India's regulatory framework for NGOs.

13. Study links

- FACT: Foundation companion: basic/04_NGOs-SHGs-and-Civil-Society-Stakeholders.md.
- FACT: 03_Development-Processes-and-the-Development-Industry.md - the funding/legal-vehicle layer intersecting with FCRA.
- FACT: 14_Participatory-Governance.md - converting social capital into political participation.
- FACT: Polity/advanced/44_Pressure-Groups.md - the constitutional/typological composition of pressure groups (Polity owns this detail).

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2020, 2021, 2023
- **Paper(s):** GS-II
- **Routed question demands:** 4

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2020	GS-II	17	Micro-finance as an anti-poverty instrument and the role of SHGs	Evaluate · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2021	GS-II	8	Microfinancing of women SHGs against gender inequality poverty and malnutrition	Explain with examples · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2021	GS-II	18	Civil society and NGOs as an alternative public service delivery model	Discuss the challenges · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2023	GS-II	14	Civil society groups and women's representation in state legislatures	Discuss the contribution · 15 marks · 250 words	Social Justice Core route; civil-society link retained	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Micro-finance as an anti-poverty instrument and the role of SHGs
- Microfinancing of women SHGs against gender inequality poverty and malnutrition
- Civil society and NGOs as an alternative public service delivery model
- Civil society groups and women's representation in state legislatures

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

CONSOLIDATED REGISTER NOTES

NGOs, SHGs and Civil-Society Stakeholders: RAPID INSTITUTION, INSTRUMENT AND EVIDENCE MAP

- Civil society is wider than the non-governmental organisation:** Civil society includes trade unions, cooperatives, faith-based bodies, professional associations, resident welfare associations, student bodies and informal collectives as well as non-governmental organisations, so answering a civil-society stem with non-governmental-organisation material alone is a scope error an examiner can see immediately.
- Bonding, bridging and linking capital:** Social capital is the networks, norms of reciprocity and trust that enable collective action, and Putnam's typology separates bonding capital as dense trust within a homogeneous group, bridging capital as connection across otherwise separate groups, and linking capital as the vertical connection between citizens and formal institutions such as banks and government departments, with each performing a different governance function and none substituting for another.
- The self-help group as the unit:** A self-help group is a small voluntary group, predominantly of women in the Indian rural-livelihoods context, that pools savings, accesses credit and undertakes livelihood activity collectively, and it is the core institutional unit on which the national rural livelihoods architecture is built.
- The three-tier livelihoods mission design:** The Deendayal Antyodaya Yojana - National Rural Livelihoods Mission of the Ministry of Rural Development mobilises rural women into self-help groups and federates them deliberately into Village Organisations and Cluster-Level Federations, providing revolving funds and community investment support and linking federations to bank credit, so that bonding capital is converted into bridging and linking capital systematically rather than being left to emerge organically.

5. **Why no mobilisation count is asserted:** No cumulative self-help group or household count is asserted for the mission because the management information system figure rises continuously as the programme expands, and the durable exam-ready facts are instead the near-universal state and union-territory coverage, the ministry that runs it and the three-tier structure.
6. **Two micro-finance delivery channels:** India delivers micro-finance through two channels that must be kept apart: the savings-first self-help group and bank linkage route that builds a group balance sheet within the livelihoods architecture, and the specialised micro-finance institution and non-banking financial company route regulated by the Reserve Bank of India that builds a loan book, and the two carry different incentives even where they serve the same household.
7. **What micro-finance can and cannot do:** Micro-finance is the provision of small-value financial services including credit, savings, insurance and remittance to households excluded from conventional banking on collateral, documentation or transaction-cost grounds, and micro-credit is only one component of it, so the honest evaluative core is that micro-finance is strongest as a consumption-smoothing and vulnerability-reduction instrument and weakest as a structural poverty-exit instrument, because loan sizes suit micro-enterprise rather than asset accumulation and repayment discipline can be sustained by borrowing again rather than by income growth.
8. **Named micro-finance risks:** The named risks are over-indebtedness and multiple lending where several lenders serve one household, coercive recovery as a documented sector risk that prompted regulatory correction, the genuine tension between interest rates and the real cost of serving small remote loans, and elite capture within groups, so micro-finance works only inside a livelihoods system of credit plus skill, market linkage, social protection and public services and fails when treated as a substitute for that system.
9. **The nutrition pathway as a convergence claim:** The credible link from women's micro-financing to nutrition is indirect rather than direct, running through women's control over income and through group platforms used for health and nutrition messaging and for convergence with public nutrition services, so the answer must state explicitly that this is a convergence claim and must not present a measured income-to-nutrition effect or cite a malnutrition percentage.
10. **The foreign-contribution gate and its 2020 tightening:** The Foreign Contribution (Regulation) Act, 2010 as amended in 2020 and administered by the Ministry of Home Affairs requires registration or case-specific prior permission before foreign contribution is received, mandates a designated account at the State Bank of India main branch in New Delhi, restricts sub-granting of foreign funds between registered entities and reduced the permissible administrative-expense proportion from fifty per cent to twenty per cent of foreign contribution utilised, with registration renewable every five years.
11. **NGO Darpan is identification, not permission:** NGO Darpan is a NITI Aayog identification and database portal that assigns a unique identification number required for Union-government grants and used in linked compliance interfaces, it is largely self-reported and light-touch, and it is not incorporation, not foreign-funding permission and not tax exemption.
12. **Four regulatory layers kept apart:** Incorporation before a state registrar or the Registrar of Companies, foreign funding under the Ministry of Home Affairs, tax status under Sections 12A and 80G with the Income Tax Department, and grant identity through NGO Darpan are four distinct layers administered by four different authorities, and this discrimination prevents the commonest confusion in which a single undifferentiated non-governmental-organisation registration is assumed.
13. **Non-state as a structural category against anti-State as a political label:** A civil-society organisation is a non-state actor as a matter of structure and law because it is not part of government, whereas anti-State is a perceptual and political label applied when advocacy, funding source or activity is seen as opposing state policy, so collapsing the structural category into the political judgment converts a constitutional freedom into a suspicion and is precisely the trap the 2025 demand tests.
14. **The suspicion chain:** The suspicion chain runs from a structurally independent watchdog and advocacy function, through advocacy that opposes a specific policy or project, to perception of that advocacy as adversarial rather than as feedback, compounded by foreign funding where the security screening rationale reflects a concern that externally funded advocacy could serve external interests, while the contested counter-position is that broad screening can chill legitimate dissent, and the correct resolution is to justify or contest the label case by case rather than accept it as a blanket characterisation.

15. **Pressure groups and the R-I-S-K test:** A pressure group is an organised interest that seeks to influence public policy without itself seeking to form the government, its governance contribution is representation, information and expertise, agenda-setting, scrutiny and litigation, and it is evaluated through representation, information, scrutiny and capture risk, because unequal money and access convert pluralism into policy capture unless funding, consultation records and conflicts of interest are disclosed.
16. **Elite capture and its design correctives:** Social capital is not automatically democratic, because the same density of local networks that enables collective action can entrench dominant caste and economic groups, and elite capture within federated structures is corrected by deliberate design - rotational leadership, reservation within federation structures, disclosure and external facilitation - rather than by exhortation.
17. **Innovator, facilitator and monitor rather than duty-holder:** Civil society is a superior innovator, facilitator and monitor and an inferior duty-holder, because a right needs an addressee who can be compelled and no non-governmental organisation can be compelled in that way, and the six named challenges of the alternative delivery model are partial geographic scale, project-cycle sustainability against a permanent entitlement, upward rather than downward accountability with no electoral sanction, variation in capacity and standards between organisations, substitution risk that relieves political pressure to fix public delivery, and regulatory dependence that makes scale legally contingent.
18. **The civil-society pathway to representation and its gate:** Civil-society groups affect women's representation through awareness and rights literacy, candidate identification and training, the federation as a school of public life that produces local leadership, advocacy and litigation on reservation and party selection, and election monitoring and voter mobilisation, but local-body leadership does not automatically convert into legislative candidature, party ticket distribution is the actual gate and is not civil-society controlled, and elite capture reproduces existing hierarchy inside the very groups meant to broaden it.
19. **The non-member poor:** The most excluded households are frequently not members of any self-help group, which is the sharpest limitation on every self-help-group-based inclusion claim, and stating it converts a celebratory answer about mobilisation into an evaluative one about who the mobilisation actually reaches.
20. **Verified question ownership and two recorded routing conflicts:** The audited 2024-2025 Mains ledger routes three demands to this Basic owner - the 2024 General Studies Paper-I demand on collaboration between government, non-governmental organisations and the private sector, the 2024 General Studies Paper-II demand on public charitable trusts and inclusive development, and the 2025 General Studies Paper-II demand on civil-society organisations as anti-State against non-State actors - while the audited 2018-2023 ledger routes four demands to the Advanced owner, of which the 2020 micro-finance and 2021 women's micro-financing and alternative-delivery demands are answered here and the 2023 women's representation demand runs primarily to Social Justice with the civil-society link retained; and two conflicts are recorded openly, because the 2025 demand on women's social capital is claimed in this owner's text but routed by the audited ledger to Social Justice, and the 2025 demand on environmental pressure groups is claimed here but routed by the audited ledger to the Polity pressure-groups owner.

NGOs, SHGs and Civil-Society Stakeholders: CLOSE-OPTION AND CAUSAL TRAPS

- Do not answer a civil-society stem with non-governmental-organisation material alone when unions, cooperatives and associations are also civil society.
- Do not treat social capital and financial capital as the same thing.
- Do not present bonding, bridging and linking capital as interchangeable or allow one to substitute for another.
- Do not assert any cumulative self-help group, household or mobilisation figure for the national rural livelihoods mission.
- Do not merge the self-help group and bank linkage route with the micro-finance institution route.
- Do not treat micro-credit as the whole of micro-finance.
- Do not present micro-finance as a structural poverty-exit instrument rather than a vulnerability-reduction instrument.
- Do not state a loan volume, interest-rate cap, non-performing asset figure, borrower count or named crisis statistic.
- Do not claim a measured nutrition effect from women's micro-financing or cite a malnutrition percentage.

- Do not claim that the foreign-contribution law regulates domestic donations or corporate social responsibility funding.
- Do not treat NGO Darpan registration as equivalent to foreign-funding permission or to tax exemption.
- Do not use non-state and anti-State as interchangeable descriptors for a civil-society organisation.
- Do not adjudicate a specific foreign-funding enforcement case while presenting both the security rationale and the proportionality critique.
- Do not treat pressure groups and political parties as identical when a pressure group does not seek to form the government.
- Do not claim that social capital automatically benefits every member of a community equally.
- Do not make a non-governmental organisation the duty-holder for an entitlement that requires a compellable addressee.
- Do not state a percentage of women legislators or assert an operational status for legislative reservation.
- Do not present self-help-group mobilisation as inclusive without stating that the most excluded households are frequently non-members.

NGOs, SHGs and Civil-Society Stakeholders: ANSWER-WRITING SPINE

NAME THE NORM OR PROBLEM -> IDENTIFY THE DUTY-HOLDER AND THE BINDING FORM
 -> GROUP NAMED EVIDENCE BY MECHANISM: STATUTE, RULE, SCHEME OR EXECUTIVE POLICY
 -> LOCATE THE STAGE AT WHICH THE MECHANISM STOPS AND STATE THE REMEDY GAP
 -> SEPARATE MEASURED OUTPUT FROM REALISED OUTCOME AND SCOPE FROM TERRITORIAL EXTENT
 -> CLOSE WITH A GRADED VERDICT AND AN EXPLICIT STATUS OR DATA CAVEAT

NGOs, SHGs and Civil-Society Stakeholders: CURRENT-STATUS AND DATA BOUNDARY

No new live official item was verified for this topic on 2026-09-02. The only dated official elements used are those already carried by the repository owners with their status checks, namely the Foreign Contribution (Regulation) Act, 2010 as amended in 2020 with its designated-account requirement, its administrative-expense reduction from fifty to twenty per cent and five-year renewal as checked on 21 July 2026, the NITI Aayog NGO Darpan identification portal, and the three-tier self-help group, Village Organisation and Cluster-Level Federation design of the national rural livelihoods mission whose cumulative mobilisation figure is deliberately not fixed here because it rises continuously on the mission management information system. No self-help group, household, foreign-funding registration, renewal or cancellation count is asserted; no micro-finance portfolio, borrower, interest-rate or non-performing asset figure is asserted; no named organisation's funding, results or regulatory action is asserted; no percentage of women legislators or operational status for legislative reservation is asserted; pressure-group composition and typology are cross-linked to Polity, gender-justice content is cross-linked to Social Justice, and the funding and legal-vehicle layer is cross-linked to the development-industry owner rather than restated here.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: The civil-society universe

SERVICE DELIVERERS -> non-governmental organisations and community institutions
COLLECTIVES -> self-help groups, unions, cooperatives, resident welfare associations
ADVOCATES AND WATCHDOGS -> pressure groups, professional and faith-based bodies
SCOPE RULE -> a civil-society stem answered only with non-governmental bodies is out of scope
MUST REMEMBER: NGOs, SHGs and civil-society organisations can aggregate voice, deliver...

ASCII MASTER FLOW - PANEL 2/12: Three kinds of social capital

BONDING -> dense trust within a homogeneous group; savings discipline and peer accountability
BRIDGING -> across separate groups; risk-pooling, negotiating scale, federation
LINKING -> vertical to banks, markets and departments; credit, price and scheme access
RULE -> none substitutes for another; bonding without bridging entrenches in-group exclusion

ASCII MASTER FLOW - PANEL 3/12: Three-tier mission design

TIER ONE -> self-help group of rural women pooling savings and accessing credit
TIER TWO -> Village Organisation aggregating groups within a village
TIER THREE -> Cluster-Level Federation negotiating with banks, markets and departments
SUPPORT -> revolving fund and community investment support under the rural development ministry

ASCII MASTER FLOW - PANEL 4/12: Data discipline card

MOVING FIGURE -> cumulative mobilisation on the management information system rises continuously
PROHIBITION -> no self-help group or household total is asserted as a current fact
DURABLE FACTS -> ministry, near-universal state and union-territory coverage, three-tier structure
ANSWER USE -> cite architecture rather than a total that will be stale by the examination

ASCII MASTER FLOW - PANEL 5/12: Two delivery channels

GROUP ROUTE -> savings-first groups linked to bank credit inside the livelihoods architecture
LENDER ROUTE -> micro-finance institutions and non-banking companies under central-bank regulation
INCENTIVE -> one builds a group balance sheet, the other builds a loan book
ERROR -> merging the two and attributing one route's risks to the other

ASCII MASTER FLOW - PANEL 6/12: Micro-finance evaluation ladder

SCOPE -> credit, savings, insurance and remittance; micro-credit is one component only
STRONGEST -> consumption smoothing and vulnerability reduction
WEAKEST -> structural poverty exit, because loan sizes suit micro-enterprise not asset accumulation
WARNING -> repayment discipline can be sustained by borrowing again rather than by income growth
CLOSE DISTINCTION: NGO, voluntary organisation, charitable trust, society, section 8...

ASCII MASTER FLOW - PANEL 7/12: Named risk register

OVER-INDEBTEDNESS -> multiple lenders serving one household
COERCIVE RECOVERY -> a documented sector risk that prompted regulatory correction
PRICE TENSION -> serving small remote loans is genuinely expensive to deliver
ELITE CAPTURE -> office and benefit concentrate among already-advantaged members

ASCII MASTER FLOW - PANEL 8/12: Nutrition pathway status

CHANNEL ONE -> women's control over income changes household expenditure decisions
CHANNEL TWO -> group platforms carry health and nutrition messaging
CHANNEL THREE -> convergence with public nutrition services reaches the same members
STATUS -> a convergence claim; no measured effect and no malnutrition percentage is asserted

ASCII MASTER FLOW - PANEL 9/12: Foreign-contribution gate card

STATUTE -> Foreign Contribution (Regulation) Act, 2010, amended in 2020, Ministry of Home Affairs
ROUTES -> registration for ongoing receipt, or case-specific prior permission
ACCOUNT -> designated account at the State Bank of India main branch, New Delhi
LIMITS -> administrative expense reduced from fifty to twenty per cent; sub-granting restricted

ASCII MASTER FLOW - PANEL 10/12: Four layers, four authorities

INCORPORATION -> state registrar or Registrar of Companies; legal existence
FOREIGN FUNDING -> Ministry of Home Affairs; whether foreign contribution may be received at all
TAX STATUS -> Income Tax Department, Sections 12A and 80G; exemption and donor deduction
GRANT IDENTITY -> NITI Aayog NGO Darpan unique identification; identification, not permission

ASCII MASTER FLOW - PANEL 11/12: Suspicion chain

STRUCTURE -> the watchdog function is independent of government by construction
TRIGGER -> advocacy opposes a specific policy or project
PERCEPTION -> independence is read as adversarial rather than as feedback
RESOLUTION -> justify or contest the label case by case; refuse the blanket characterisation

ASCII MASTER FLOW - PANEL 12/12: Roles, gates and the answer spine

OPEN -> commit to a position in sentence one and name the structural category
BUILD -> innovator, facilitator and monitor; never the compellable duty-holder for a right
TEST -> representation, information, scrutiny and capture risk; rotation and disclosure correct it
CLOSE -> the party ticket gate, the non-member poor, and the two recorded routing conflicts
EVIDENCE LIMIT: AUTHORITY / IMPLEMENTATION: Use Kudumbashree, SEWA, SHG-bank linkage,...
