OPTIONAL ADVANCED ENRICHMENT · THE JUDICIAL SEQUENCE TO KNOW (VERIFY EXACT ORDER DATES) · READ THE SEQUENCE, NOT JUST THE ENDPOINT. THE 2022 · IMPLEMENTATION GAP · ESZ BOUNDARY FINALISATION FOR MANY PROTECTED AREAS HAS · THE TENSION IS GENUINELY TWO-SIDED · OVERLY PERMISSIVE ESZ RULES RISK EDGE-EFFECT · PROTECTED-AREA AREA/COUNT STATISTICS (NATIONAL PARKS, SANCTUARIES, RESERVES) ARE

OPTIONAL SOURCE DEPTH
- The judicial sequence to know (verify exact order dates before citing them): in
- CAUTION: Read the sequence, not just the endpoint. The 2022 order is the strongest judicial
- CAUTION: Implementation gap: ESZ boundary finalisation for many protected areas has
- CAUTION: The tension is genuinely two-sided: overly permissive ESZ rules risk edge-effect

ADVANCED DEBATE
- CAUTION: Protected-area area/count statistics (National Parks, Sanctuaries, Reserves) are
- CAUTION: "Core/critical tiger habitat" determination involves scientific criteria (habitat
- CAUTION: Human-wildlife conflict data (e.g., livestock/crop loss, human casualties near protected
- NTCA relocation guidelines require voluntary, informed consent and a defined

LEGACY / NUANCE
- Eco-Sensitive Zone extent and permissible activity have been subject to evolving
- Project Elephant has historically lacked an NTCA-equivalent statutory authority
- Conservation Reserves and Community Reserves (2002 amendment) were specifically designed
- NOT: NTCA-mandated relocation from tiger reserves is mandatory/involuntary. - Guidelines

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.
