

ASCII MASTER FLOW – PANEL 1/10: Harappan chronology: regional roots to localisation

EARLY/REGIONALISATION → MATURE/INTEGRATION → LATE/LOCALISATION

c. 3300-2600 BCE	c. 2600-1900 BCE	c. 1900-1300 BCE
regional towns/crafts and exchange networks	shared weights, seals, script, urban systems	de-urbanisation, local ceramics, settlement shifts, continuities

Civilisation = integrated urban-rural network; decline = regional transformation.

ASCII MASTER FLOW – PANEL 2/10: Harappan spatial system and site atlas

WEST: Surkagendor -> Makran edge | NORTH: Handa -> Jammu frontier

CORE INDUS: Harappa -> urban/cemetery sequence | Mohenjo-daro -> Great Bath/drains

GHAGGAR: Kalibangan -> ploughed field/fire installations | Banawali -> fortified town

EAST: Rakhigarhi -> major Haryana complex | Alamgirpur -> eastern Late Harappan edge

KUTCH: Dholavira -> three-part city, reservoirs, signboard | Surkotada -> fortification

GUJARAT: Lothal -> basin/warehouse/craft debate | Rangpur -> regional sequence

SINDH: Chanhudaro -> craft centre; no classic citadel-lower-town profile

ASCII MASTER FLOW – PANEL 3/10: Urban-rural settlement hierarchy

FARM/PASTORAL HAMLETS → VILLAGES → CRAFT/ROUTE CENTRES → REGIONAL CITIES

weights + seals + transport + shared styles connect unequal regional domains.

Urbanism depended on rural surplus and raw-material corridors; cities were not isolated.

ASCII MASTER FLOW – PANEL 4/10: Built order, water and civic maintenance

PLANNED STREETS + STANDARD BRICKS + PLATFORMS + COURTYARD HOUSES

ASCII MASTER FLOW – PANEL 5/10: The Harappan economy as a linked system

AGRICULTURAL PASTORAL BASE

SURPLUS -> craft workshops -> calibrated weights -> seals/transport -> exchange

CRAFTS: beads, shell, faience, pottery, copper/bronze; stone remains important.

ASCII MASTER FLOW – PANEL 6/10: Internal and overseas exchange corridors

RAW MATERIAL FLOW

Baluchistan/Afghanistan -> metals/stones -> Indus cities

Rajasthan/Khetri -> copper corridor -> production zones

Gujarat/Kutch -> shell, carnelian, coastal routes -> crafts and ports

Indus/Makran/Gulf -> Dilmun/Magan -> Mesopotamia; Meluhha in cuneiform texts

|

v

Trade evidence = imports + texts + seals + production; it does not prove colonies.

Lothal basin has dockyard/reservoir interpretations: state the debate.

ASCII MASTER FLOW – PANEL 7/10: Society and polity: evidence without invented kings

EVIDENCE: house variation + scarce goods + craft control + standards + public works

NO secure palace, royal tomb or deciphered king-list; hierarchy existed, form is open.

VERDICT: coordinated institutions are certain; empire-level sovereignty is unproven.

ASCII MASTER FLOW – PANEL 8/10: Script, seals and religion: evidence ladder

SECURE: short signs, seals/tablets, motifs, ritual installations, burials, figurines

PROBABLE: identity/transaction marking and differentiated ritual practices

DISPUTED: script language; proto-Shiva; mother-goddess system; universal fire altars

REJECT: reading later Hindu doctrine directly into every Harappan image.

|

v

Undeciphered script blocks direct access to office, belief and political vocabulary.

Use object + context + distribution before analogy.

ASCII MASTER FLOW – PANEL 9/10: De-urbanisation: interacting regional causes

river shifts/floods + aridification + exchange contraction + maintenance stress

ASCII MASTER FLOW – PANEL 10/10: Harappan answer architecture: 10/15/20 marks

10 MARKS: phase -> site feature -> mechanism -> interpretation -> conclusion

15 MARKS: chronology -> spatial system -> urban form -> economy -> polity/religion limits

20 MARKS: integration -> site map -> urban-rural economy -> water/standards/trade

-> society-polity evidence -> script/ritual limits -> transformation

BENCHMARK: material uniformity indicates integration, not automatic political unity.

CLOSE: a varied civilisation coordinated by standards, exchange and maintenance.
