

ASCII MASTER FLOW – PANEL 1/9: Rig Veda as source and chronological spine

FAMILY BOOKS (7-7) → OTHER LAYERS (1, 8, 9, 10) → REDACTION/ORAL PRESERVATION

Working early Vedic horizon: broadly c. 1500-1000 BCE, not a date for every hymn.
Text gives a poetic-ritual world; frequency and silence are not census data.

ASCII MASTER FLOW – PANEL 2/9: Sapta-Sindhu textual geography

NORTH WESTERN MILEU

Kabul/Kubha ---- Indus/Sindhu ---- Punjab rivers ---- Sarasvati/Drishadvati zone
mountain routes trunk river pastoral/farming eastern attention
 |
 v

Rivers organise praise, movement, pasture and conflict; geography is selective.
Ganga is marginal in this horizon; later Vedic expansion shifts the centre east.
Do not turn remembered rivers into precise political borders.

ASCII MASTER FLOW – PANEL 3/9: Kin polity: authority without territorial state

KULA --> GRAMA --> VIS --> JANA

|
v

RAJAN: war leadership, protection, distribution and ritual status; not absolute monarch

|-- sabha: smaller/select assembly context | samiti: broader assembly

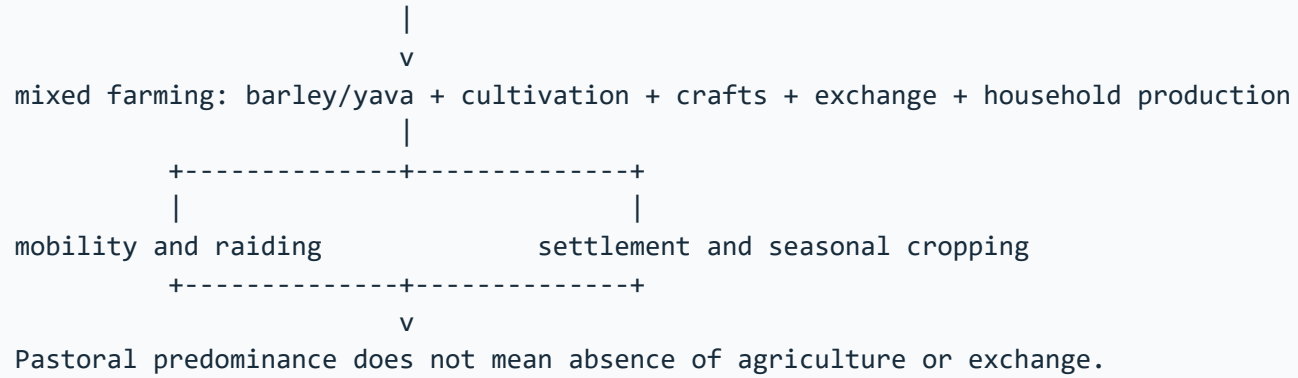

|-- purohita: adviser | senani: martial role | gramani: group leader

+-> bali: offering/tribute, not a regular land-revenue bureaucracy

Power rested on kin support, cattle, gifts, assemblies and successful leadership.

ASCII MASTER FLOW – PANEL 4/9: Cattle-agriculture economy loop

PASTURE + WATER -> CATTLE WEALTH -> dairy, traction, gifts, status and conflict

ASCII MASTER FLOW – PANEL 5/9: Society: kinship, difference and projection limits

HOUSEHOLD/KIN ORDER

|
 v
Purusha Sukta is late in the corpus; later jati cannot be back-projected.

ASCII MASTER FLOW – PANEL 6/9: Deities, rita, yajna and soma

RITA: ordered truth and cosmic social regularity

|

v

DEITIES: Indra-war/rain | Agni-fire/mediator | Varuna-order | Soma-plant/deity

|

v

YAJNA: praise + offering + priestly speech -> protection, cattle and victory

|

v

Religion links ecology, warfare, gift economy and order; temples are not central.

ASCII MASTER FLOW – PANEL 7/9: Conflict, technology and cultural interaction

horse/chariot + bows/weapons + mobile war bands

|

v

cattle raids + route/pasture contests + Dasharajna coalition conflict

|

+-----+-----+

|

leadership and prestige

|

contact and incorporation

+-----+-----+

v

Textual chariot terms matter; archaeological correlation remains independent.

ASCII MASTER FLOW – PANEL 8/9: Early to Later Vedic transformation

EARLY VEDIC

north-west/Sapta-Sindhu
jana and kin leadership
cattle-centred mixed economy
fluid differentiation
deity praise and yajna

LATER VEDIC

upper Ganga-Yamuna and eastward movement
janapada, stronger monarchy and ratnins
plough agriculture, surplus and crafts
firmer varna/patriarchy and gotra
royal ritual and Upanishadic questioning

VERDICT: cumulative transformation with regional variation, not abrupt rupture.

ASCII MASTER FLOW – PANEL 9/9: Rig Vedic answer architecture

10 MARKS: source caution -> institution/economy -> hymn term -> qualification

15 MARKS: geography -> polity -> economy -> society -> religion -> archaeology caution

20 MARKS: corpus/layers -> Sapta-Sindhu -> kin system -> cattle-agriculture loop
-> differentiation -> ritual worldview -> conflict/contact -> transition

AVOID: nomad-only, caste-complete, state/empire or homogeneous-date claims.

CLOSE: a layered pastoral-agricultural kin society undergoing differentiation.
