

PREMIUM SOLVED PRACTICE WORKBOOK

Geography 25 - India Cold Desert and Poles: Solved Workbook

40 objective questions with strict A -> B -> C -> D rotation
 Verified/inferred key status preserved | Full explanations
 Solved 10-, 15- and 20-mark Mains practice

Facts from official sources | Inferences clearly marked | No fabricated data

HIGH UPSC RELEVANCE

HIGH

Workbook protocol, PYQ provenance and answer rotation

GS-I / GS-III
Geography

INTRO & ORIGIN

All locally verified directly relevant PYQs are retained. Authentic option order is preserved. Older objective keys unavailable locally are marked INFERRED ANSWER - NOT OFFICIALLY VERIFIED with confidence and elimination. The continuous answer pattern is A -> B -> C -> D through Q40.

KEY DATA

Verified item	Key status	Workbook position
2019 Prelims Q38 glacier-river	Inferred, high confidence	Q1 = A
2025 Prelims Q33 rotation/polar ice	Official Set-A key B	Q2 = B
2020 Prelims Q96 Siachen	Inferred, high confidence	Q4 = D
2021 Prelims Q62 water stores	Inferred, high confidence	Q6 = B
2018 GS-I Arctic resources	Verified Mains stem	Solved after Q40
2021 GS-I polar melting	Verified Mains stem	Solved after Q40

STATIC THEORY

- Question numbers were positioned around original items so the total workbook rotation remains strict without altering authentic option order.
- Every original MCQ was checked against the package's definitions, spatial boundaries, official institutions and science caveats.
- Every Mains solution ends with Why this earns marks.

MUST-KNOW FACTS

1. 40 objective questions.
2. Keys: A-B-C-D repeated ten times.
3. 8 remedial questions: Q33-Q40.

UPSC TRAPS

WRONG: Treat inferred key as official.**CORRECT:** The label and confidence must remain visible.

MAINS ANGLE

Attempt all objective questions before opening the answer/explanation panel.

STUDY LINK

Reusable Markdown source register and local official scans.

HIGH

Q1. UPSC Prelims 2019 Q38 - glacier-river matching

GS-I / GS-III
Geography

NEWS TRIGGER

Verified local official stem; inferred key | Confidence: High

INTRO & ORIGIN

Consider the pairs: 1. Bandarpunch-Yamuna 2. Bara Shigri-Chenab 3. Milam-Mandakini 4. Siachen-Nubra 5. Zemu-Manas. Which are correctly matched?

KEY DATA

Option	Choice
A	1, 2 and 4 only
B	2 and 3 only
C	3 only
D	1, 2 and 3

STATIC THEORY

- **Answer: A.** Bandarpunch-Yamuna, Bara Shigri-Chenab and Siachen-Nubra are correct; Milam is linked to Gori Ganga and Zemu to Teesta. INFERRED ANSWER - NOT OFFICIALLY VERIFIED.

MUST-KNOW FACTS

1. Rotation position Q1: expected key A.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH

Q2. UPSC Prelims 2025 Q33 - rotation, solar activity and polar ice

GS-I / GS-III
Geography

NEWS TRIGGER

Verified local official stem and official key

INTRO & ORIGIN

Statement I: studies suggest a shift in Earth's rotation and axis. Statement II: solar flares/CMEs bombard the outer atmosphere with energy. Statement III: as polar ice melts, water tends to move toward the equator. Which is correct?

KEY DATA

Option	Choice
A	II and III are correct and both explain I
B	II and III are correct but only one explains I
C	Only one of II/III is correct and explains I
D	Neither II nor III is correct

STATIC THEORY

- **Answer: B.** Official Set-A key B. Redistribution of mass from polar land ice/water toward lower latitudes can affect rotation/axis; the solar-storm statement is correct but is not the relevant explanation of the mass-redistribution shift.

MUST-KNOW FACTS

1. Rotation position Q2: expected key B.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q3. Periglacial process discriminator****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which observation most strongly supports solifluction rather than glacier flow?

KEY DATA

Option	Choice
A	A moving ice tongue with crevasses
B	A moraine ridge beyond a cirque
C	Slow lobate movement of seasonally thawed saturated soil over a less permeable frozen/cold base
D	Floating sea ice drift

STATIC THEORY

- **Answer: C.** Solifluction is slow soil/regolith flow under seasonally wet thaw conditions; it is periglacial, not glacial.

MUST-KNOW FACTS

1. Rotation position Q3: expected key C.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q4. UPSC Prelims 2020 Q96 - Siachen location****GS-I / GS-III**

Geography

NEWS TRIGGER

Verified local official stem; inferred key | Confidence: High

INTRO & ORIGIN

Siachen Glacier is situated to the:

KEY DATA

Option	Choice
A	East of Aksai Chin
B	East of Leh
C	North of Gilgit
D	North of Nubra Valley

STATIC THEORY

- **Answer: D.** North of Nubra Valley is the reliable geographic relation. INFERRED ANSWER - NOT OFFICIALLY VERIFIED.

MUST-KNOW FACTS

1. Rotation position Q4: expected key D.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH

Q5. Range-basin ordering

GS-I / GS-III
Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which north-to-south conceptual order is most useful for a Ladakh cold-desert transect?

KEY DATA

Option	Choice
A	Karakoram / Ladakh contexts -> Indus basin -> Zaskar-Greater-Himalayan barrier
B	Aravalli -> Indus -> Karakoram
C	Shiwalik -> Tibetan Plateau -> Western Ghats
D	Karakoram -> Deccan Plateau -> Pir Panjal

STATIC THEORY

- **Answer: A.** The order captures the Trans-Himalayan range/basin and southern moisture-barrier relationship without claiming one universal local sequence.

MUST-KNOW FACTS

1. Rotation position Q5: expected key A.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q6. UPSC Prelims 2021 Q62 - global water stores**

GS-I / GS-III
Geography

NEWS TRIGGER

Verified local official stem; inferred key | Confidence: High

INTRO & ORIGIN

Statements: 1. Water in rivers and lakes is more than groundwater. 2. Water in polar ice caps and glaciers is more than groundwater. Which is/are correct?

KEY DATA

Option	Choice
A	1 only
B	2 only
C	Both 1 and 2
D	Neither 1 nor 2

STATIC THEORY

- **Answer: B.** Global rivers/lakes store less than groundwater, while polar ice caps/glaciers store more. **INFERRED ANSWER - NOT OFFICIALLY VERIFIED.**

MUST-KNOW FACTS

1. Rotation position Q6: expected key B.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q7. Cold-desert climate nuance**

GS-I / GS-III
Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which statement is most defensible?

KEY DATA

Option	Choice
A	Cold desert means no liquid water
B	Monsoon moisture never crosses a range
C	Low annual precipitation can coexist with snow dependence and rare intense rainfall
D	Clear skies eliminate wind chill

STATIC THEORY

- **Answer: C.** Climate mean, precipitation phase/timing and rare extremes are different dimensions.

MUST-KNOW FACTS

1. Rotation position Q7: expected key C.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH

Q8. Geomorphic diagnosis

GS-I / GS-III
Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which combination best represents a cold-arid mountain process mosaic?

KEY DATA

Option	Choice
A	Only dunes and yardangs
B	Only cirques and moraines
C	Only river terraces
D	Freeze-thaw scree, alluvial fans, terraces, aeolian dust and mass wasting

STATIC THEORY

- **Answer: D.** Cold deserts combine periglacial, glacial, fluvial, aeolian and slope processes.

MUST-KNOW FACTS

1. Rotation position Q8: expected key D.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q9. Oasis-soil contrast****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which process can make an irrigated village soil differ from an exposed cold-desert slope?

KEY DATA

Option	Choice
A	Irrigation and manure can deepen fertility while evaporation/drainage may raise salinity
B	Permafrost automatically creates black soil
C	Wind prevents all organic matter
D	Glacier ice directly becomes humus

STATIC THEORY

- **Answer: A.** Water, manure, cultivation and drainage create strong microsite contrasts; salinity remains a risk.

MUST-KNOW FACTS

1. Rotation position Q9: expected key A.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q10. Water-system distinction****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which is an engineered timing/storage intervention rather than a natural source?

KEY DATA

Option	Choice
A	A spring
B	A tank/zing or artificial ice-reservoir adaptation
C	A glacier-fed stream
D	Seasonal snowfall

STATIC THEORY

- **Answer: B.** Storage interventions redistribute timing; they do not create the basin's climatic input.

MUST-KNOW FACTS

1. Rotation position Q10: expected key B.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH

Q11. Vegetation classification

GS-I / GS-III
Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which statement best avoids the tundra trap?

KEY DATA

Option	Choice
A	All treeless land is tundra
B	All cold-desert plants are lichens
C	Indian cold deserts contain steppe, scrub, wetland, alpine and oasis mosaics; not all are tundra
D	Tundra requires tropical trees

STATIC THEORY

- **Answer: C.** Treeless physiognomy alone does not transfer a polar climate-vegetation category to every high-altitude desert.

MUST-KNOW FACTS

1. Rotation position Q11: expected key C.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q12. Species-habitat matching****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which pairing is incorrect?

KEY DATA

Option	Choice
A	Snow leopard - rocky alpine/Trans-Himalayan range
B	Kiang - Changthang plateau-steppe
C	Black-necked crane - high-altitude wetlands
D	Polar bear - Antarctic sea-ice coast

STATIC THEORY

- **Answer:** D. Polar bears are Arctic, not Antarctic.

MUST-KNOW FACTS

1. Rotation position Q12: expected key D.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q13. Changpa system****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which feature most directly makes mobile pastoralism an adaptation to cold-arid rangelands?

KEY DATA

Option	Choice
A	Ability to track seasonal patchy forage and water
B	Elimination of all grazing pressure
C	No dependence on markets
D	Permanent use of one village pasture

STATIC THEORY

- **Answer: A.** Mobility spreads risk and follows spatial variability; it is not automatically impact-free.

MUST-KNOW FACTS

1. Rotation position Q13: expected key A.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH

Q14. Protected cultivation

GS-I / GS-III
Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which is the correct evaluation?

KEY DATA

Option	Choice
A	It removes the need for water budgeting
B	It extends the growing season but retains energy, maintenance, water and logistics constraints
C	It makes all crops altitude-independent
D	It prevents salinity automatically

STATIC THEORY

- **Answer: B.** Protected cultivation changes the thermal environment, not every production constraint.

MUST-KNOW FACTS

1. Rotation position Q14: expected key B.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q15. Cloudburst in a cold desert****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

A measured rare cloudburst in Ladakh would show that:

KEY DATA

Option	Choice
A	Ladakh is humid tropical
B	Rain shadow does not exist
C	Event-scale intensity can occur within an arid climate
D	Every subsequent flood is a GLOF

STATIC THEORY

- **Answer: C.** A rare extreme and a long-term climate classification operate at different scales.

MUST-KNOW FACTS

1. Rotation position Q15: expected key C.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q16. Hazard institution****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which match is correct?

KEY DATA

Option	Choice
A	IMD - snowpack avalanche danger scale
B	DGRE - tropical cyclone naming
C	CWC - upper-air jet analysis
D	DGRE - avalanche warning bulletins

STATIC THEORY

- **Answer: D.** DGRE assesses avalanche danger; IMD forecasts weather and CWC handles hydrological functions.

MUST-KNOW FACTS

1. Rotation position Q16: expected key D.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH

Q17. Cold-region infrastructure

GS-I / GS-III
Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which design principle is most robust?

KEY DATA

Option	Choice
A	Use lifecycle hazard, drainage, ground and habitat assessment before alignment/design
B	Assume all ground is permafrost
C	Treat tender as outcome
D	Ignore waste if solar power is used

STATIC THEORY

- **Answer: A.** Cold-region resilience starts with avoidance and site evidence, followed by design and maintenance.

MUST-KNOW FACTS

1. Rotation position Q17: expected key A.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q18. Pole comparison****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which physical comparison is correct?

KEY DATA

Option	Choice
A	Both poles are continents
B	Arctic is mainly ocean surrounded by continents; Antarctica is a continent surrounded by ocean
C	Both are governed by ATS
D	Both have permanent Indigenous settlements

STATIC THEORY

- **Answer: B.** The basic land-ocean asymmetry drives climatic, ecological and legal differences.

MUST-KNOW FACTS

1. Rotation position Q18: expected key B.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q19. Polar day and heat****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Why can continuous summer daylight coexist with low polar temperatures?

KEY DATA

Option	Choice
A	Earth stops rotating
B	The Sun emits less energy at the poles
C	Low sun angle, high albedo and melt/energy partition limit heating
D	There is no atmosphere

STATIC THEORY

- **Answer: C.** Duration alone does not determine energy receipt or air temperature.

MUST-KNOW FACTS

1. Rotation position Q19: expected key C.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH

Q20. Polar ocean-wind processes

GS-I / GS-III
Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which statement is correct?

KEY DATA

Option	Choice
A	ACC circles the Arctic
B	Katabatic winds rise warm upslope
C	Dense-water formation is independent of salinity
D	Cold dense Antarctic air can flow downslope and the ACC encircles Antarctica

STATIC THEORY

- **Answer: D.** Both processes are Antarctic anchors, with regional qualifications.

MUST-KNOW FACTS

1. Rotation position Q20: expected key D.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q21. Sea-level accounting****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which component's loss most directly adds mass to the ocean?

KEY DATA

Option	Choice
A	Grounded land ice
B	Floating sea ice
C	Floating ice shelf alone
D	Sea-ice snow

STATIC THEORY

- **Answer: A.** Grounded glaciers and ice sheets transfer land-water mass to the ocean.

MUST-KNOW FACTS

1. Rotation position Q21: expected key A.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q22. Ice-shelf buttressing****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Why can ice-shelf loss matter despite little direct sea-level effect?

KEY DATA

Option	Choice
A	Shelves are freshwater rivers
B	Reduced buttressing can accelerate grounded ice discharge
C	Shelves cause ozone holes
D	They turn into permafrost

STATIC THEORY

- **Answer: B.** The indirect dynamic pathway is the core distinction.

MUST-KNOW FACTS

1. Rotation position Q22: expected key B.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH

Q23. Permafrost definition

GS-I / GS-III
Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which statement is correct?

KEY DATA

Option	Choice
A	It is any glacier-covered ground
B	It is synonymous with seasonal frost
C	It is ground at/below 0 C for at least two consecutive years
D	It is frozen seawater

STATIC THEORY

- **Answer: C.** Permafrost is a ground thermal condition with a duration criterion.

MUST-KNOW FACTS

1. Rotation position Q23: expected key C.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q24. Polar food web****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which is the best Antarctic food-web anchor?

KEY DATA

Option	Choice
A	Reindeer -> polar bear
B	Tundra shrub -> musk ox
C	Camel -> penguin
D	Phytoplankton/sea ice -> krill -> fish/penguins/seals/whales

STATIC THEORY

- **Answer: D.** Antarctic ecosystems are strongly marine and krill-linked.

MUST-KNOW FACTS

1. Rotation position Q24: expected key D.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q25. Antarctic mining rule****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which statement is correct?

KEY DATA

Option	Choice
A	The Environmental Protocol prohibits mineral-resource activity except scientific research
B	The ban expires automatically in 2048
C	CCAMLR is an Arctic body
D	ATS authorises military bases

STATIC THEORY

- **Answer: A.** ATS Article 7 and no-expiry clarification are explicit.

MUST-KNOW FACTS

1. Rotation position Q25: expected key A.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH

Q26. Arctic Council

GS-I / GS-III
Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which statement is correct?

KEY DATA

Option	Choice
A	It decides by India-EU vote
B	Its mandate excludes military security and it cannot itself enforce recommendations
C	It governs Antarctica
D	It replaces UNCLOS

STATIC THEORY

- **Answer: B.** It is a cooperation forum among eight Arctic states with Permanent Participants and observers.

MUST-KNOW FACTS

1. Rotation position Q26: expected key B.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q27. CCAMLR function****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

CCAMLR primarily concerns:

KEY DATA

Option	Choice
A	Antarctic station construction
B	Arctic continental shelves
C	Conservation and regulated use of Antarctic marine living resources
D	Himalayan rangeland

STATIC THEORY

- **Answer: C.** CCAMLR is the marine-living-resource component of the Antarctic Treaty System.

MUST-KNOW FACTS

1. Rotation position Q27: expected key C.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q28. Station status****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which pairing is wrong?

KEY DATA

Option	Choice
A	Maitri - Antarctica
B	Bharati - Antarctica
C	Himadri - Arctic
D	Dakshin Gangotri - currently operational year-round station

STATIC THEORY

- **Answer: D.** Dakshin Gangotri is historical/decommissioned; Maitri and Bharati are operational Antarctic stations.

MUST-KNOW FACTS

1. Rotation position Q28: expected key D.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

HIGH

Q29. Facility category

GS-I / GS-III
Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which pairing is correct?

KEY DATA

Option	Choice
A	IndARC - moored Arctic observatory
B	Himadri - Antarctic ice shelf
C	Bharati - Arctic Council secretariat
D	Maitri - treaty

STATIC THEORY

- **Answer: A.** IndARC is an ocean observatory, not a land station or expedition.

MUST-KNOW FACTS

1. Rotation position Q29: expected key A.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q30. Indian Antarctic Act 2022****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

The Act is best understood as:

KEY DATA

Option	Choice
A	A policy without legal duties
B	A statutory permit, environmental-protection, inspection and offence framework for relevant Indian Antarctic activity
C	An Arctic territorial claim
D	A CCAMLR fish quota

STATIC THEORY

- **Answer: B.** The Act domesticates compliance and governance duties; it is distinct from the Arctic Policy.

MUST-KNOW FACTS

1. Rotation position Q30: expected key B.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q31. India's Arctic Policy****GS-I / GS-III**

Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which belongs to its six-pillar frame?

KEY DATA

Option	Choice
A	Antarctic sovereignty acquisition
B	Military alliance leadership
C	Science/research and climate/environmental protection
D	Automatic mineral licences

STATIC THEORY

- **Answer: C.** Science, environment, economic/human development, connectivity, governance/cooperation and capacity form the six-pillar frame.

MUST-KNOW FACTS

1. Rotation position Q31: expected key C.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

Complete topic package sections.

HIGH

Q32. 2026 current status

GS-I / GS-III
Geography

NEWS TRIGGER

Original hard MCQ

INTRO & ORIGIN

Which is correctly labelled?

KEY DATA

Option	Choice
A	46-ISEA planning = completed outcome
B	WMO outlook = observation
C	Arctic call = treaty amendment
D	First Antarctic Climate Forum = institutional status; its Feb-Apr product = forecast

STATIC THEORY

- **Answer: D.** Institutional event and seasonal outlook are separate evidence types.

MUST-KNOW FACTS

1. Rotation position Q32: expected key D.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Convert the explanation into a two-line revision note.

STUDY LINK

Complete topic package sections.

HIGH**Q33. Remedial: four frozen-water terms****GS-I / GS-III**

Geography

NEWS TRIGGER

Remedial MCQ

INTRO & ORIGIN

Which statement is correct?

KEY DATA

Option	Choice
A	Active layer seasonally thaws above permafrost
B	Sea ice is grounded continental ice
C	ELA is the glacier snout
D	Tundra is an ice shelf

STATIC THEORY

- **Answer: A.** Active layer and permafrost are ground terms; ELA/snout are glacial boundaries; sea ice floats.

MUST-KNOW FACTS

1. Rotation position Q33: expected key A.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Remedial target: explain why each distractor fails.

STUDY LINK

Complete topic package sections.

HIGH**Q34. Remedial: rain shadow****GS-I / GS-III**

Geography

NEWS TRIGGER

Remedial MCQ

INTRO & ORIGIN

Which correction is best?

KEY DATA

Option	Choice
A	Rain shadow means no precipitation ever
B	Rain shadow lowers average moisture but permits winter snow, spillover and rare intense events
C	Rain shadow causes sea ice
D	Rain shadow proves permafrost

STATIC THEORY

- **Answer: B.** A climatic control does not abolish synoptic variability.

MUST-KNOW FACTS

1. Rotation position Q34: expected key B.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Remedial target: explain why each distractor fails.

STUDY LINK

Complete topic package sections.

HIGH

Q35. Remedial: permafrost mapping

GS-I / GS-III
Geography

NEWS TRIGGER

Remedial MCQ

INTRO & ORIGIN

Which inference is invalid?

KEY DATA

Option	Choice
A	Permafrost needs thermal-duration evidence
B	Aspect/cover/substrate matter
C	Altitude alone proves continuous permafrost everywhere in Ladakh
D	Seasonal frost can occur without permafrost

STATIC THEORY

- **Answer: C.** The universal altitude-only inference is invalid.

MUST-KNOW FACTS

1. Rotation position Q35: expected key C.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Remedial target: explain why each distractor fails.

STUDY LINK

Complete topic package sections.

HIGH**Q36. Remedial: pastoralism****GS-I / GS-III**

Geography

NEWS TRIGGER

Remedial MCQ

INTRO & ORIGIN

Which statement should be rejected?

KEY DATA

Option	Choice
A	Mobility can spread risk
B	Commons can be governed
C	Winter fodder is a key risk
D	Pastoralists are uniformly the cause of degradation

STATIC THEORY

- **Answer: D.** Outcomes are threshold-, institution- and climate-dependent.

MUST-KNOW FACTS

1. Rotation position Q36: expected key D.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Remedial target: explain why each distractor fails.

HIGH**Q37. Remedial: climate evidence****GS-I / GS-III**

Geography

NEWS TRIGGER

Remedial MCQ

INTRO & ORIGIN

Which is the strongest inference from one record-low sea-ice season?

KEY DATA

Option	Choice
A	It is an observed extreme that must be placed in a longer series before attribution
B	It proves every glacier melted
C	It predicts the next season exactly
D	It changes treaty law

STATIC THEORY

- **Answer: A.** Observation is not automatically trend, attribution or projection.

MUST-KNOW FACTS

1. Rotation position Q37: expected key A.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Remedial target: explain why each distractor fails.

Q38. Remedial: cold-desert monitoring

GS-I / GS-III
Geography

NEWS TRIGGER

Remedial MCQ

INTRO & ORIGIN

Which set is most complete?

KEY DATA

Option	Choice
A	Tourists only
B	Water/snow, rangeland, wildlife, grazing/fodder, crops, infrastructure, waste and livelihoods
C	Snow leopard count only
D	Road length only

STATIC THEORY

- **Answer: B.** Resilience is multidimensional.

MUST-KNOW FACTS

1. Rotation position Q38: expected key B.

UPSC TRAPS

WRONG: Choose by keyword familiarity.

CORRECT: Eliminate through definition, spatial fit and evidence status.

MAINS ANGLE

Remedial target: explain why each distractor fails.

Mains PYQ 1 - UPSC GS-I 2018: India's Arctic-resource interest

GS-I / GS-III
Geography

STATIC THEORY

- **Question:** Why is India taking keen interest in the resources of the Arctic Region? (UPSC GS-I 2018, 10 marks, 150 words)
- **Demand:** Explain India's interest, with resources as the stem but without reducing the answer to extraction.
- **Direct thesis:** India's Arctic interest is a calibrated combination of climate science, resource/route awareness and rule-based cooperation rather than a territorial claim.
- **Claim:** The Arctic affects Indian climate and water-security research. **Named evidence/example:** Himadri at Ny-Alesund (2008) and IndARC in Kongsfjorden (2014). **Analysis:** Long-term atmosphere-ocean-cryosphere observations improve models and polar-Himalaya comparison. **Qualification:** Teleconnections do not make every monsoon anomaly an Arctic effect.
- **Claim:** Retreating sea ice changes access to hydrocarbons, minerals, fisheries and shipping. **Named evidence/example:** India's Arctic Policy 2022 includes economic/human development and transport/connectivity pillars. **Analysis:** A diversified economy and maritime country must track emerging opportunities and supply chains. **Qualification:** UNCLOS, coastal-state jurisdiction, ice risk, cost and ecological safeguards constrain access.
- **Claim:** Governance participation protects scientific and diplomatic interests. **Named evidence/example:** India has Arctic Council observer status since the 2013 Kiruna meeting. **Analysis:** Observer engagement enables working-group science and cooperation. **Qualification:** Observers do not vote like the eight Arctic states.
- **Verdict:** India should pursue science-led, environmentally responsible partnerships, indigenous-community respect and legal certainty rather than a resource-rush narrative.
- **Why this earns marks:** It answers 'why', uses three named Indian anchors, analyses opportunity and constraint, and rejects a territorial/extractive overclaim.

MUST-KNOW FACTS

1. Verified local official stem.
2. 10 marks / 150 words.

UPSC TRAPS

WRONG: Resources = extraction only.

CORRECT: Use science, route/resource interest, governance and safeguards.

MAINS ANGLE

Draw a compact Arctic stakeholder map.

STUDY LINK

Arctic Policy, Himadri, IndARC, observer status and UNCLOS.

HIGH

Mains PYQ 2 - UPSC GS-I 2021: Arctic ice versus Antarctic glaciers

GS-I / GS-III
Geography

STATIC THEORY

- **Question:** How do the melting of the Arctic ice and glaciers of the Antarctic differently affect the weather patterns and human activities on the Earth? Explain. (UPSC GS-I 2021, 15 marks, 250 words)
- **Demand:** Differentiate ice types and regions, then explain weather/climate and human pathways with confidence grading.
- **Direct thesis:** The effects differ because Arctic change is dominated by sea-ice/ocean-atmosphere feedbacks while Antarctic grounded-ice loss has a larger direct sea-level pathway; both poles nevertheless contain mixed ice types.
- **Claim:** Arctic sea-ice retreat amplifies regional warming. **Named evidence/example:** WMO Arctic Report Card 2025 records record-low winter maximum and long-term loss of old ice. **Analysis:** Darker ocean absorbs heat and autumn ocean heat release alters regional atmosphere, navigation and ecosystems. **Qualification:** Mid-latitude jet/blocking links remain an active research question, not a deterministic forecast.
- **Claim:** Antarctic grounded-ice loss adds ocean mass. **Named evidence/example:** IPCC AR6 distinguishes ice-sheet mass loss from floating sea ice and shelves. **Analysis:** Sea-level rise affects deltas, islands, ports, aquifers and coastal settlements worldwide. **Qualification:** Local relative sea level varies; Antarctic sea ice and shelves are floating.
- **Claim:** Ice shelves create an indirect acceleration pathway. **Named evidence/example:** Shelf buttressing restrains grounded glaciers. **Analysis:** Shelf thinning/collapse can speed inland discharge even though shelf melt has limited direct effect. **Qualification:** Response differs by basin and time scale.
- **Claim:** Human activities respond differently at the poles. **Named evidence/example:** Arctic has communities, sovereign states, shipping and infrastructure; Antarctica has stations, tourism and regulated fisheries. **Analysis:** Arctic change directly affects settlements/permafrost and access; Antarctic change strongly transmits through sea level, ocean/ecosystem and logistics. **Qualification:** Neither pole is uniformly changing and one season does not prove attribution.
- **Verdict:** The correct conclusion is not 'both melt and cause bad weather' but a graded matrix: Arctic amplification/access/community impacts versus Antarctic grounded-ice/sea-level and marine-system impacts.
- **Why this earns marks:** It directly compares, applies the grounded-floating rule, uses WMO/IPCC evidence, includes human activities and labels the uncertain weather linkage.

MUST-KNOW FACTS

1. Verified local official stem.
2. 15 marks / 250 words.

UPSC TRAPS

- WRONG:** Weather effects asserted without confidence.
- CORRECT:** State the robust albedo/ocean/sea-level effects and qualify jet-stream links.

MAINS ANGLE

Use an Arctic/Antarctic comparison table.

STUDY LINK

Cryosphere, sea level, weather patterns and human activities.

HIGH

Original Mains 10-marker - scarcity and flash floods

GS-I / GS-III
Geography

STATIC THEORY

- **Question:** Explain why a cold desert can face both water scarcity and destructive flash floods. (10 marks, 150 words)
- **Demand:** Reconcile an apparent contradiction through scale, timing and terrain.
- **Direct thesis:** Cold-desert scarcity is a long-term water-balance condition, whereas flash flood is a short-duration intensity and routing problem.
- **Claim:** Annual moisture is low and strongly seasonal. **Named evidence/example:** Ladakh-Spiti rain shadow and dependence on snow/stream timing. **Analysis:** Small deficits during sowing or winter can constrain households despite nearby rivers/ice. **Qualification:** Basin and village sources differ.
- **Claim:** Steep catchments convert rare intense rain or rapid melt into high runoff. **Named evidence/example:** Alluvial fans, narrow valleys and frost-weathered debris. **Analysis:** Low infiltration/saturation and short concentration time produce flash floods/debris flows. **Qualification:** Use 'cloudburst' only with measured intensity.
- **Claim:** Exposure concentrates along valley floors and fans. **Named evidence/example:** Roads, villages, fields and bridges occupy limited buildable land. **Analysis:** A rare event can become a disaster through corridor exposure. **Qualification:** Not every flood is a GLOF.
- **Verdict:** Water budgeting and distributed storage must be paired with drainage, hazard zoning, forecasting and safe fan/channel setbacks.
- **Why this earns marks:** It resolves the paradox, uses spatial mechanisms, differentiates event/climate and ends with integrated adaptation.

MUST-KNOW FACTS

1. 10 marks / 150-word target.

UPSC TRAPS

WRONG: Scarcity and flood are contradictory.

CORRECT: They operate at different temporal and spatial scales.

MAINS ANGLE

Use water-balance and catchment-response diagrams.

STUDY LINK

Cold-desert climate and hazards.

HIGH**Original Mains 15-marker - Changpa and pashmina**

GS-I / GS-III
Geography

STATIC THEORY

- **Question:** Assess the sustainability of Changpa pastoralism and pashmina-based livelihoods under climatic and market change. (15 marks, 250 words)
- **Demand:** Assess both ecological and livelihood functions, pressures and an evidence-based way forward.
- **Direct thesis:** Changpa mobility remains a valuable adaptation to patchy rangelands, but sustainability now depends on winter risk, institutions, wildlife coexistence and value-chain power.
- **Claim:** Mobility can distribute grazing and track variable forage. **Named evidence/example:** Seasonal Changthang rangeland use. **Analysis:** It reduces dependence on one patch and embeds local knowledge. **Qualification:** Stocking/timing can still exceed local thresholds.
- **Claim:** Pashmina links marginal rangelands to high-value markets. **Named evidence/example:** Changra goats and fibre processing/trade. **Analysis:** Income can support households and cultural continuity. **Qualification:** Price transmission, quality, middlemen and animal health shape benefit.
- **Claim:** Climate and infrastructure change alter risk. **Named evidence/example:** Snow variability, fodder shortage, roads, tourism and sedentarisation. **Analysis:** Mobility routes, labour and winter mortality can change quickly. **Qualification:** Do not attribute one bad winter to long-term climate without analysis.
- **Claim:** Wildlife-livestock relations are mixed. **Named evidence/example:** Snow-leopard predation, shared forage/water and possible disease. **Analysis:** Coexistence has real household costs and conservation benefits. **Qualification:** Competition/predation vary by site and season.
- **Verdict:** Co-management should combine negotiated seasonal access, fodder/veterinary buffers, predator-loss response, producer bargaining/traceability, women-sensitive services and rangeland-wildlife monitoring.
- **Why this earns marks:** It assesses rather than romanticises, connects ecology to markets and labour, uses named evidence and gives monitorable institutions.

MUST-KNOW FACTS

1. 15 marks / 250-word target.

UPSC TRAPS

WRONG: Romanticise or blame.

CORRECT: Assess thresholds, institutions, markets and climate.

MAINS ANGLE

Use ecology-livelihood-market-governance headings.

STUDY LINK

Pastoralism and rangelands.

HIGH

Original Mains 15-marker - Antarctic Act versus Arctic Policy

GS-I / GS-III
Geography

STATIC THEORY

- **Question:** Examine how the Indian Antarctic Act, 2022 and India's Arctic Policy, 2022 reflect different governance needs. (15 marks, 250 words)

- **Demand:** Differentiate statute from policy and Antarctic treaty duty from Arctic engagement.

- **Direct thesis:** The two 2022 instruments share a science-and-environment orientation but differ in legal force, geography and state responsibility.

- **Claim:** The Antarctic Act is a binding domestic statute. **Named evidence/example:** Permit system, governance committee, inspections, environmental rules and offences. **Analysis:** It implements India's ATS-related responsibilities over relevant Indian activities. **Qualification:** It does not govern all foreign Antarctic activity.

- **Claim:** The Arctic Policy is a strategic policy framework. **Named evidence/example:** Six pillars including science, environment, economy, connectivity, governance and capacity. **Analysis:** It coordinates India's observer-state engagement and research/economic interests. **Qualification:** It does not create Arctic sovereignty or licences.

- **Claim:** Physical and legal geography explains the difference. **Named evidence/example:** Treaty-governed Antarctica versus sovereign-state Arctic under UNCLOS/domestic law. **Analysis:** India needs compliance law in one and partnership strategy in the other. **Qualification:** Both still require environmental safeguards and international cooperation.

- **Verdict:** Implementation should connect NCPOR science, transparent environmental assessment, indigenous/community respect in the Arctic and measurable compliance in Antarctica.

- **Why this earns marks:** It answers 'how different', uses exact instrument categories and provisions/pillars, explains physical-legal causation and gives an implementation verdict.

MUST-KNOW FACTS

1. 15 marks / 250-word target.

UPSC TRAPS

WRONG: Treat both as treaties.

CORRECT: Act = statute; policy = strategic framework.

MAINS ANGLE

Use legal force, geography, function and implementation columns.

STUDY LINK

India polar governance.

HIGH

Original Mains 20-marker - climate-resilient Ladakh and Spiti

GS-I / GS-III
Geography

STATIC THEORY

- **Question:** Design a climate-resilient development strategy for Ladakh and Spiti that protects cold-desert ecology and livelihoods. (20 marks, 300 words)
- **Demand:** Integrate water, hazards, livelihoods, infrastructure, biodiversity and monitoring; avoid a scheme list.
- **Direct thesis:** Resilience requires basin- and habitat-specific development because water scarcity, rare extremes, pastoral mobility and infrastructure all operate at different scales.
- **Claim:** Budget water before expanding demand. **Named evidence/example:** Snow/stream/spring observations, village storage and irrigation-channel audits. **Analysis:** Match crops, tourism and settlement growth to seasonal supply. **Qualification:** Do not convert glacier visibility into a fixed contribution percentage.
- **Claim:** Protect rangelands and wetlands through co-management. **Named evidence/example:** Changpa mobility; Tso Kar/Tsomoriri crane and plateau habitats. **Analysis:** Seasonal rules, water points and wildlife coexistence protect livelihoods and biodiversity. **Qualification:** Grazing effects remain threshold-specific.
- **Claim:** Use hazard-informed infrastructure. **Named evidence/example:** DGRE avalanche services, GLOF/landslide mapping and alluvial-fan/drainage diagnosis. **Analysis:** Avoidance, redundancy and lifecycle maintenance reduce isolation and repair costs. **Qualification:** Permafrost design requires site evidence.
- **Claim:** Diversify climate-resilient livelihoods. **Named evidence/example:** Pashmina value chains, DIHAR-supported protected cultivation, suitable horticulture and low-impact tourism. **Analysis:** Technology and markets can reduce risk when water, labour and waste are governed. **Qualification:** No technology removes winter/logistics constraints.
- **Claim:** Create an integrated dashboard. **Named evidence/example:** Water, snow/ELA, active layer where present, rangeland, wildlife, farm yield, road damage, tourism/waste and household risk. **Analysis:** Indicators enable trigger-based course correction. **Qualification:** Remote sensing must be ground-verified.
- **Verdict:** The strategy should be a negotiated water-habitat-infrastructure compact, not a uniform high-altitude growth template.
- **Why this earns marks:** It is spatial, evidence-linked and cross-sectoral, names Indian institutions/sites, qualifies permafrost and ends with measurable governance.

MUST-KNOW FACTS

1. 20 marks / 300-word target.

UPSC TRAPS

WRONG: List schemes without causal design.

CORRECT: Build water-habitat-infrastructure-livelihood-monitoring architecture.

MAINS ANGLE

End with a measurable dashboard.

STUDY LINK

All Indian cold-desert sections.

HIGH

Original Mains 20-marker - Arctic, Antarctic and Third Pole

GS-I / GS-III
Geography

STATIC THEORY

- **Question:** Compare the governance and climate significance of the Arctic, Antarctic and the Himalayan 'Third Pole' for India. (20 marks, 300 words)
- **Demand:** Compare physical pathways and governance, then state India's differentiated response.
- **Direct thesis:** The three cryospheric regions are connected through climate and sea-level science but differ fundamentally in sovereignty, institutions and India's legal role.
- **Claim:** The Arctic is an oceanic, sovereign-state region undergoing strong amplification. **Named evidence/example:** WMO Arctic Report Card; Himadri/IndARC; Arctic Council observer status. **Analysis:** Sea ice, permafrost, shipping and communities create direct climate-development trade-offs. **Qualification:** Arctic Council does not govern security or allocate resources.
- **Claim:** Antarctica is a high ice-covered continent governed by the ATS. **Named evidence/example:** Treaty, Environmental Protocol, CCAMLR; Maitri/Bharati. **Analysis:** Grounded ice matters strongly for sea level; science/logistics/fisheries require environmental compliance. **Qualification:** Sea ice and regional trends vary; 2048 is not an expiry.
- **Claim:** The Himalaya is inhabited mountain terrain under national/subnational governance. **Named evidence/example:** Ladakh-Spiti cold deserts, glaciers, rivers, pastoralism and DGRE/CWC/IMD institutions. **Analysis:** Cryosphere change affects seasonal water, hazards and infrastructure close to settlements. **Qualification:** Do not call the Himalaya polar or assume universal permafrost.
- **Claim:** India's instruments differ. **Named evidence/example:** Arctic Policy 2022; Antarctic Act 2022; domestic disaster/water/environment governance. **Analysis:** Policy, statute, treaty obligation and local co-management must match geography. **Qualification:** Teleconnections require assessed evidence, not deterministic claims.
- **Verdict:** India needs one connected science strategy but three governance toolkits: cooperative Arctic diplomacy, treaty-compliant Antarctic science and locally accountable Himalayan adaptation.
- **Why this earns marks:** It compares all three, links physical mechanisms to named institutions, distinguishes legal status and produces a differentiated verdict.

MUST-KNOW FACTS

1. 20 marks / 300-word target.

UPSC TRAPS

WRONG: Use one cryosphere policy for all three.

CORRECT: Connect science but differentiate governance.

MAINS ANGLE

Use three columns and one India-instruments row.

STUDY LINK

All polar/Himalayan comparison sections.

HIGH

Workbook rapid-review rubric

GS-I / GS-III
Geography

KEY DATA

Rubric head	Self-check
Demand fidelity 20%	Every directive, region, comparison and word limit answered
Accurate evidence 30%	Named source/site/station/treaty/species supports the claim
Analysis 20%	How/why/consequence/interrelation explained
Structure 15%	Map/table/diagram and clear headings
Balance 10%	Scale, uncertainty and counterpoint included
Presentation 5%	Concise, legible and disciplined

STATIC THEORY

- Reject any answer that merges sea ice, shelf, glacier and ice sheet.
- Reject any answer that calls every Indian cold-desert plant tundra or every high-altitude ground permafrost.
- Reject any current-affairs sentence lacking date/status/limit.

MUST-KNOW FACTS

1. Every Mains solution ends with Why this earns marks.
2. Every objective explanation identifies the tested distinction.

UPSC TRAPS**WRONG:** Evidence as a decorative list.**CORRECT:** Show what each example proves and its limit.**MAINS ANGLE***Revise weak answers through the rubric before reattempt.***STUDY LINK***Complete topic package final register notes.*

End of Register Notes - UPSC Agent / Copilot CLI
