Persons with Disabilities - Learner-v2 Complete Learning Session

Authoring-only generation: 2026-09-02. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-02.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. The OCR-searchable official General Studies question papers held under books\mains and books\more_previous_papers were read only to confirm the printed wording of routed Mains demands. No official answer key, marking scheme, page precision or unsupported quotation was imported from them.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** This owner's previous-year record is a verified one rather than a zero, and it is stated precisely. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand here, the 2022 General Studies Paper II question numbered 7 on the Rights of Persons with Disabilities Act, 2016 and sensitisation, with the directive Comment, ten marks and one hundred and fifty words, and with the ledger note that this core route supersedes the older Advanced ownership; that demand is therefore solved in this package with a model answer written to the repository's examiner-grade standard using the claim, named evidence, analysis and qualification pattern. The audited 2026 Prelims routing ledger routes exactly one objective demand here, question 56 of the 2026 Prelims General Studies Paper I on disability rights law, the accessibility mission and the disability development corporation, and that ledger records expressly that the locally held 2026 Set-A key is provisional, so no option, key or inferred answer letter is recorded for it anywhere in this package and the demand is instead covered as taught content by naming the statute, the accessibility mission and its implementation vehicle, and the development-finance corporation as a distinct credit and livelihood route. The audited 2024-2025 Mains and Prelims routing ledgers route no further demand to this owner, and both the Basic and the Advanced owner state independently that no confirmed direct 2024 or 2025 General Studies Paper II Mains question on persons with disabilities exists in the audited local texts, which is consistent with that record. Alongside the solved demand card, the package adds six original Mains questions with model solutions and eighty original objective questions on a strict A -> B -> C -> D rotation. Each model solution opens with its analytical claim so that the evidence which follows does argumentative rather than decorative work. The locally held OCR-searchable official General Studies papers were read only to confirm the printed wording of the routed Mains demand; no question was invented from them, no marking scheme or page precision was imported and no official answer key is claimed for any question anywhere in this package.
- **Live-link boundary:** One live official page was verified for this topic on 2026-09-02. The Department of Empowerment of Persons with Disabilities landing page, read on that date, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities, which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others. Those statements are used only for what they say, and no certification, registration, reservation-fill, accessibility-compliance, device-distribution, guardianship or expenditure figure is inferred from them. One further official check was attempted on the same date, namely a departmental page for the rights statute itself, which returned a not-found error, so nothing was read or used from it and no secondary summary, coaching site or news report has been treated as an official source. The package therefore relies on that verified page together with the dated official anchors already carried by the repository owners, each cited with its issuing instrument or status date: the Rights of Persons with Disabilities Act, 2016 with its definition of a person with disability as one whose long-term physical, mental, intellectual or sensory impairment, in interaction with barriers, hinders full and effective participation on an equal basis with others; the twenty-one specified categories in its Schedule, expandable by

government notification, replacing the seven categories of the repealed Persons with Disabilities Act, 1995; benchmark disability at forty per cent or more certified by a medical authority; the minimum four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities, recorded as statutory and distinct from the constitutional mechanism of Article 16(4) and its fifty per cent ceiling jurisprudence; reasonable accommodation as defined in Section 2(y), with the disproportionate-or-undue-burden limit and with denial recorded as a form of discrimination; the United Nations Convention on the Rights of Persons with Disabilities ratified by India in 2007; the Unique Disability Identity platform as a centralised, nationally portable certification route whose registration counts are recorded as dynamic and are not asserted; the three-pillar accessibility framework covering the built environment, transport and information and communication technology, carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act since March 2024, with harmonised universal-accessibility guidelines and with State and local enforcement and independent access audits still required; the assistive-device scheme delivered in camp mode and institutional mode; the National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 covering only those four conditions; the Chief Commissioner and State Commissioners for Persons with Disabilities as complaint and monitoring authorities, kept distinct from the accessibility mission and from the disability development-finance corporation as a credit and livelihood route; the recorded decisions in Vikash Kumar against the Union Public Service Commission and in Jeeja Ghosh; and the recorded status check of 21 July 2026 that identity-platform counts are dynamic and that accessibility claims must be cited with the departmental reporting date and implementation vehicle rather than with a legacy campaign label. No prevalence figure other than the departmental statement of 2.68 crore and 2.21 per cent from Census 2011 is asserted, that figure is carried with its recorded self-reporting and question-framing limitation, no National Family Health Survey, Periodic Labour Force Survey, NITI Aayog or Sustainable Development Goal value is asserted, no legal or constitutional provision is invented or upgraded in status, no judicial holding is extended beyond what the owners record, no accessibility-compliance count or timeline is asserted, and no previous-year option or official answer key is asserted or inferred, the routed 2026 objective demand being covered as taught content because the audited ledger records the locally held Set-A key as provisional.

- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Social Justice Basic/Core is answer-complete before optional Advanced depth.
Legal-status boundary	Constitutional value/right, statute, rule, judgment, executive policy, scheme, eligibility rule, implementation and outcome remain distinct.
Rights-holder map	Rights-holder -> entitlement/need -> competent institution/duty-bearer -> accountability forum -> grievance/appeal/remedy.
Delivery chain	Identification -> eligibility -> documentation -> enrolment -> finance -> frontline access -> service/benefit -> portability -> outcome -> audit and correction.
Inclusion method	Intersectional caste, tribe, gender, age, disability, religion, occupation, migration and regional variation is retained without homogenising groups.
Evidence method	Claim -> named India-centric law/institution/scheme/case/dataset -> analysis -> source, reference period, release date, denominator, status and causal qualification.
Dignity and safeguards	Accessibility, privacy, participation, social audit, portability, offline access, due process and protection from stigma or coercion are tested.
Practice contract	Every model has demand decoding, detailed examiner-grade answer, executable timed/compression plan, marks rationale and answer-specific improvement.
Approval	This immutable successor remains approved : false pending explicit approval.

Canonical Basic/Core owner:

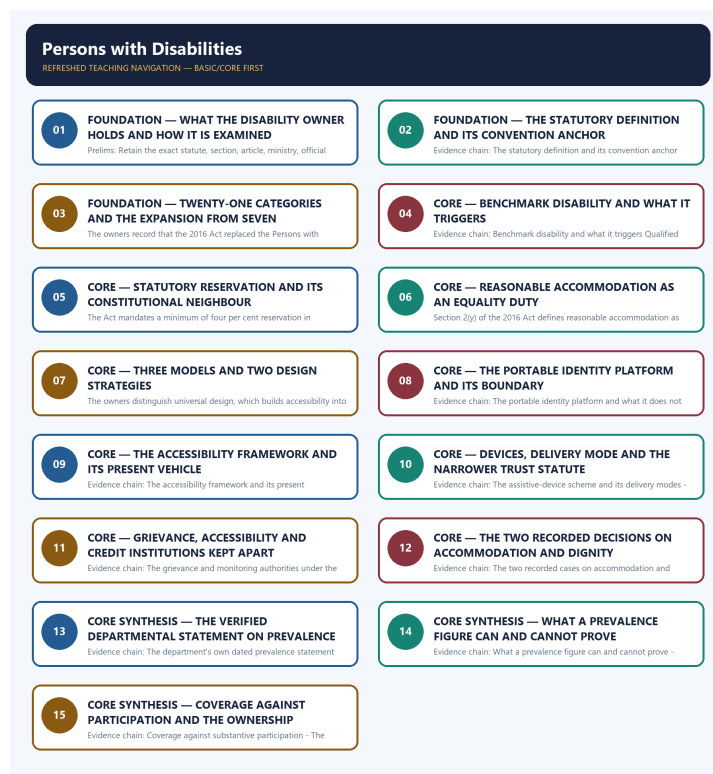

upsc-ai-kit\knowledge\Social-Justice\basic\11_Persons-with-Disabilities.md **Substantive canonical provenance owner:** upsc-ai-kit\knowledge\Social-Justice\11_Persons-with-Disabilities_Learner-V2-Complete-Topic-Package.md **Optional Advanced owner:** upsc-ai-kit\knowledge\Social-Justice\advanced\11_Persons-with-Disabilities.md **Official syllabus mapping:** upsc-ai-kit\knowledge\Social-Justice\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- **Prohibition/outcome discipline:** a legal prohibition, reported case, registration, conviction, rehabilitation measure and lived eradication are different claims.
- **Eligibility discipline:** universal, categorical, means-tested, self-declared, notified-list and residence-linked routes require exact scope; coverage never proves adequacy or access.
- **Reservation discipline:** constitutional basis, beneficiary category, competent list, ceiling, creamy-layer rule, EWS route, horizontal/vertical operation and judicial status are qualified separately.
- **Fiscal discipline:** allocation, release, expenditure, unit cost, beneficiary transfer and outcome are not interchangeable.
- **Data discipline:** retain numerator, denominator, unit, geography, reference period, release date, provisional/final status and survey-versus-administrative character.
- **Causal discipline:** headline change, before-after sequence or cross-state correlation does not establish scheme impact without mechanism and counterfactual limits.
- **PYQ discipline:** exact wording is preserved only when verified; routed or reconstructed demands remain labelled and no model is presented as an official UPSC answer.
- **Current-status note, rechecked 2026-09-06:** volatile law, scheme, judgment, list, budget and dataset claims retain issuing authority, date and operative/interim/final status.

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - What the disability owner holds and how it is examined

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: What the disability owner holds and how it is examined is the part of Persons with Disabilities that explains how What this owner holds and the exact demands routed to it fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, What the disability owner holds and how it is examined denotes the source-bounded relation among What this owner holds and the exact demands routed to it, described by the entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

What the disability owner holds and how it is examined should be analysed as a relation among What this owner holds and the exact demands routed to it, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- What
- disability
- holds
- examined
- this
- demands

How to use them: Define What, disability, holds; cite examined as named evidence with its issuing body and dated edition or round; then apply this qualification: One Mains demand and one objective demand are routed here, and the objective key held locally is provisional. Conclude by showing how the distinction supports this answer route: Open a disability answer by naming the duty, recognition, accommodation or accessibility, that the question actually tests..

VISUAL FIRST

WHAT THE DISABILITY OWNER HOLDS AND HOW IT IS EXAMINED

01. What this owner holds and the exact demands routed to it

BOUNDARY -> One Mains demand and one objective demand are routed here, and the objective key held locally is provisional.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package.

NAMED EVIDENCE AND MECHANISM

- This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package.

EXAMINER CAUTION

- One Mains demand and one objective demand are routed here, and the objective key held locally is provisional.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to What the disability owner holds and how it is examined, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Open a disability answer by naming the duty, recognition, accommodation or accessibility, that the question actually tests.

MINI RECAP

- **Evidence chain:** What this owner holds and the exact demands routed to it
- **Qualified use:** Open a disability answer by naming the duty, recognition, accommodation or accessibility, that the question actually tests.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS What disability holds examined this demands	2. MECHANISM / ARGUMENT relate What this owner holds and the exact demands routed to it through claim, carrying instrument, delivery and measured outcome	3. CONSEQUENCE / CONTRAST This relation supports the answer route that open a disability answer by naming the duty, recognition, accommodation or accessibility, that the question actually tests.	4. UPSC TRAP / ANSWER-USE LIMIT: One Mains demand and one objective demand are routed here, and the objective key held locally is provisional.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: What the disability owner holds and how it is examined converts a dated official entitlement or indicator into a qualified capability argument			

SESSION 2 - FOUNDATION - The statutory definition and its convention anchor

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The statutory definition and its convention anchor is the part of Persons with Disabilities that explains how The statutory definition and its convention anchor fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, The statutory definition and its convention anchor denotes the source-bounded relation among The statutory definition and its convention anchor, described by the entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The statutory definition and its convention anchor should be analysed as a relation among The statutory definition and its convention anchor, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- **statutory**
- **convention**
- **anchor**
- **Rights**
- **Persons**
- **with**

How to use them: Define statutory, convention, anchor; cite Rights as named evidence with its issuing body and dated edition or round; then apply this qualification: The disabling effect sits in the interaction between impairment and barriers, not in impairment alone. Conclude by showing how the distinction supports this answer route: Anchor a disability answer in the statutory definition before any evaluation of delivery..

VISUAL FIRST

THE STATUTORY DEFINITION AND ITS CONVENTION ANCHOR

01. The statutory definition and its convention anchor

BOUNDARY -> The disabling effect sits in the interaction between impairment and barriers, not in impairment alone.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement.

NAMED EVIDENCE AND MECHANISM

- The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement.

EXAMINER CAUTION

- The disabling effect sits in the interaction between impairment and barriers, not in impairment alone.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to The statutory definition and its convention anchor, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Anchor a disability answer in the statutory definition before any evaluation of delivery.

MINI RECAP

- **Evidence chain:** The statutory definition and its convention anchor
- **Qualified use:** Anchor a disability answer in the statutory definition before any evaluation of delivery.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS statutory convention anchor Rights Persons with	2. MECHANISM / ARGUMENT relate The statutory definition and its convention anchor through claim, carrying instrument, delivery and measured outcome	3. CONSEQUENCE / CONTRAST This relation supports the answer route that anchor a disability answer in the statutory definition before any evaluation of delivery.	4. UPSC TRAP / ANSWER-USE LIMIT: The disabling effect sits in the interaction between impairment and barriers, not in impairment alone.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The statutory definition and its convention anchor converts a dated official entitlement or indicator into a qualified capability argument			

SESSION 3 - FOUNDATION - Twenty-one categories and the expansion from seven

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Twenty-one categories and the expansion from seven is the part of Persons with Disabilities that explains how The twenty-one specified disabilities and the power to notify more and The move from seven categories to twenty-one fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, Twenty-one categories and the expansion from seven denotes the source-bounded relation among The twenty-one specified disabilities and the power to notify more and The move from seven categories to twenty-one, described by the entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Twenty-one categories and the expansion from seven should be analysed as a relation among The twenty-one specified disabilities and the power to notify more and The move from seven categories to twenty-one, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- **Twenty-one**
- **categories**
- **expansion**
- **from**
- **seven**
- **specified**

How to use them: Define Twenty-one, categories, expansion; cite from as named evidence with its issuing body and dated edition or round; then apply this qualification: The schedule is a statutory list that the government may extend, not a medical taxonomy. Conclude by showing how the distinction supports this answer route: State an exact statutory count where close options are built on the number and the expandability..

VISUAL FIRST

TWENTY-ONE CATEGORIES AND THE EXPANSION FROM SEVEN

01. The twenty-one specified disabilities and the power to notify more

|
v

02. The move from seven categories to twenty-one

BOUNDARY -> The schedule is a statutory list that the government may extend, not a medical taxonomy.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise.

NAMED EVIDENCE AND MECHANISM

- The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability.
- The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise.

EXAMINER CAUTION

- The schedule is a statutory list that the government may extend, not a medical taxonomy.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to Twenty-one categories and the expansion from seven, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** State an exact statutory count where close options are built on the number and the expandability.

MINI RECAP

- **Evidence chain:** The twenty-one specified disabilities and the power to notify more -> The move from seven categories to twenty-one
- **Qualified use:** State an exact statutory count where close options are built on the number and the expandability.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS Twenty-one categories expansion from seven specified	2. MECHANISM / ARGUMENT relate The twenty-one specified disabilities and the power to notify more and The move from seven categories to twenty-one through claim, carrying instrument, delivery and measured outcome	3. CONSEQUENCE / CONTRAST This relation supports the answer route that state an exact statutory count where close options are built on the number and the expandability.	4. UPSC TRAP / ANSWER-USE LIMIT: The schedule is a statutory list that the government may extend, not a medical taxonomy.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Twenty-one categories and the expansion from seven converts a dated official entitlement or indicator into a qualified capability argument			

SESSION 4 - CORE - Benchmark disability and what it triggers

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Benchmark disability and what it triggers is the part of Persons with Disabilities that explains how Benchmark disability and what it triggers fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, Benchmark disability and what it triggers denotes the source-bounded relation among Benchmark disability and what it triggers, described by the entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Benchmark disability and what it triggers should be analysed as a relation among Benchmark disability and what it triggers, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- **Benchmark**
- **disability**
- **what**
- **triggers**
- **owners**
- **define**

How to use them: Define Benchmark, disability, what; cite triggers as named evidence with its issuing body and dated edition or round; then apply this qualification: A person may be a person with disability under the Act without holding benchmark status. Conclude by showing how the distinction supports this answer route: Separate a definitional category from the threshold that creates an entitlement..

VISUAL FIRST

BENCHMARK DISABILITY AND WHAT IT TRIGGERS

01. Benchmark disability and what it triggers

BOUNDARY -> A person may be a person with disability under the Act without holding benchmark status.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement.

NAMED EVIDENCE AND MECHANISM

- The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement.

EXAMINER CAUTION

- A person may be a person with disability under the Act without holding benchmark status.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to Benchmark disability and what it triggers, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Separate a definitional category from the threshold that creates an entitlement.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Benchmark disability and what it triggers converts a dated official entitlement or indicator into a qualified capability argument			

SESSION 5 - CORE - Statutory reservation and its constitutional neighbour

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Statutory reservation and its constitutional neighbour is the part of Persons with Disabilities that explains how Statutory reservation and why it is not Article 16(4) reservation fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, Statutory reservation and its constitutional neighbour denotes the source-bounded relation among Statutory reservation and why it is not Article 16(4) reservation, described by the entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and

the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Statutory reservation and its constitutional neighbour should be analysed as a relation among Statutory reservation and why it is not Article 16(4) reservation, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- **Statutory**
- **reservation**
- **constitutional**
- **neighbour**
- **Article**
- **mandates**

How to use them: Define Statutory, reservation, constitutional; cite neighbour as named evidence with its issuing body and dated edition or round; then apply this qualification: This reservation is created by ordinary legislation and is not governed by the ceiling jurisprudence of the constitutional mechanism. Conclude by showing how the distinction supports this answer route: Attribute an entitlement to its correct legal source before comparing it with another..

VISUAL FIRST

STATUTORY RESERVATION AND ITS CONSTITUTIONAL NEIGHBOUR

01. Statutory reservation and why it is not Article 16(4) reservation

BOUNDARY -> This reservation is created by ordinary legislation and is not governed by the ceiling jurisprudence of the constitutional mechanism.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement.

NAMED EVIDENCE AND MECHANISM

- The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Statutory reservation and its constitutional neighbour converts a dated official entitlement or indicator into a qualified capability argument			

SESSION 6 - CORE - Reasonable accommodation as an equality duty

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Reasonable accommodation as an equality duty is the part of Persons with Disabilities that explains how Reasonable accommodation and the fact that its denial is discrimination fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, Reasonable accommodation as an equality duty denotes the source-bounded relation among Reasonable accommodation and the fact that its denial is discrimination, described by the entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Reasonable accommodation as an equality duty should be analysed as a relation among Reasonable accommodation and the fact that its denial is discrimination, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- Reasonable
- accommodation
- equality
- duty
- that
- denial

How to use them: Define Reasonable, accommodation, equality; cite duty as named evidence with its issuing body and dated edition or round; then apply this qualification: The duty carries a burden limb, so it is neither unlimited nor automatically refusible. Conclude by showing how the distinction supports this answer route: Argue accommodation as substantive equality with both limbs of the statutory definition stated..

VISUAL FIRST

REASONABLE ACCOMMODATION AS AN EQUALITY DUTY

01. Reasonable accommodation and the fact that its denial is discrimination

BOUNDARY -> The duty carries a burden limb, so it is neither unlimited nor automatically refusible.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused.

NAMED EVIDENCE AND MECHANISM

- Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused.

EXAMINER CAUTION

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Reasonable accommodation as an equality duty converts a dated official entitlement or indicator into a qualified capability argument			

SESSION 7 - CORE - Three models and two design strategies

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Three models and two design strategies is the part of Persons with Disabilities that explains how The medical, social and rights models and Universal design against retrofitting fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, Three models and two design strategies denotes the source-bounded relation among The medical, social and rights models and Universal design against retrofitting, described by the entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery

mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Three models and two design strategies should be analysed as a relation among The medical, social and rights models and Universal design against retrofitting, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- Three
- models
- design
- strategies
- medical
- rights

How to use them: Define Three, models, design; cite strategies as named evidence with its issuing body and dated edition or round; then apply this qualification: Universal design does not remove the need for individual accommodation. Conclude by showing how the distinction supports this answer route: Say which model a recommendation operates in before proposing it..

VISUAL FIRST

THREE MODELS AND TWO DESIGN STRATEGIES

01. The medical, social and rights models

|

v

02. Universal design against retrofitting

BOUNDARY -> Universal design does not remove the need for individual accommodation.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives.

NAMED EVIDENCE AND MECHANISM

- The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions.

SESSION 8 - CORE - The portable identity platform and its boundary

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The portable identity platform and its boundary is the part of Persons with Disabilities that explains how The portable identity platform and what it does not do fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, The portable identity platform and its boundary denotes the source-bounded relation among The portable identity platform and what it does not do, described by the entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The portable identity platform and its boundary should be analysed as a relation among The portable identity platform and what it does not do, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- portable
- identity
- platform
- what
- does
- owners

How to use them: Define portable, identity, platform; cite what as named evidence with its issuing body and dated edition or round; then apply this qualification: Identification reform lowers a transaction cost without creating an

entitlement. Conclude by showing how the distinction supports this answer route: Present an administrative reform for the friction it removes rather than the access it does not create..

VISUAL FIRST

THE PORTABLE IDENTITY PLATFORM AND ITS BOUNDARY

01. The portable identity platform and what it does not do

BOUNDARY -> Identification reform lowers a transaction cost without creating an entitlement.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.

NAMED EVIDENCE AND MECHANISM

- The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The accessibility framework and its present vehicle converts a dated official entitlement or indicator into a qualified capability argument			

SESSION 10 - CORE - Devices, delivery mode and the narrower trust statute

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Devices, delivery mode and the narrower trust statute is the part of Persons with Disabilities that explains how The assistive-device scheme and its delivery modes and The 1999 trust statute and its four-condition scope fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, Devices, delivery mode and the narrower trust statute denotes the source-bounded relation among The assistive-device scheme and its delivery modes and The 1999 trust statute and its four-condition scope, described by the entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Devices, delivery mode and the narrower trust statute should be analysed as a relation among The assistive-device scheme and its delivery modes and The 1999 trust statute and its four-condition scope, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- **Devices**
- **delivery**
- **mode**

- narrower
- trust
- statute

How to use them: Define Devices, delivery, mode; cite narrower as named evidence with its issuing body and dated edition or round; then apply this qualification: The 1999 statute covers four conditions only and is not a care system for all twenty-one categories. Conclude by showing how the distinction supports this answer route: Locate a reach failure in the delivery mode rather than in the size of the budget..

VISUAL FIRST

DEVICES, DELIVERY MODE AND THE NARROWER TRUST STATUTE

01. The assistive-device scheme and its delivery modes

|
v

02. The 1999 trust statute and its four-condition scope

BOUNDARY -> The 1999 statute covers four conditions only and is not a care system for all twenty-one categories.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability.

NAMED EVIDENCE AND MECHANISM

- The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument.
- The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability.

- **Qualified use:** Locate a reach failure in the delivery mode rather than in the size of the budget.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Devices delivery mode narrower trust statute	2. MECHANISM / ARGUMENT relate The assistive-device scheme and its delivery modes and The 1999 trust statute and its four-condition scope through claim, carrying instrument, delivery and measured outcome	3. CONSEQUENCE / CONTRAST This relation supports the answer route that locate a reach failure in the delivery mode rather than in the size of the budget.	4. UPSC TRAP / ANSWER-USE LIMIT: The 1999 statute covers four conditions only and is not a care system for all twenty-one categories.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Devices, delivery mode and the narrower trust statute converts a dated official entitlement or indicator into a qualified capability argument			

SESSION 11 - CORE - Grievance, accessibility and credit institutions kept apart

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Grievance, accessibility and credit institutions kept apart is the part of Persons with Disabilities that explains how The grievance and monitoring authorities under the 2016 Act fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, Grievance, accessibility and credit institutions kept apart denotes the source-bounded relation among The grievance and monitoring authorities under the 2016 Act, described by the entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Grievance, accessibility and credit institutions kept apart should be analysed as a relation among The grievance and monitoring authorities under the 2016 Act, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- **Grievance**
- **accessibility**
- **credit**
- **institutions**
- **kept**
- **apart**

How to use them: Define Grievance, accessibility, credit; cite institutions as named evidence with its issuing body and dated edition or round; then apply this qualification: The routed objective demand turns on exactly this three-way institutional distinction. Conclude by showing how the distinction supports this answer route: Name each institution's function without merging regulator, mission and lender..

VISUAL FIRST

GRIEVANCE, ACCESSIBILITY AND CREDIT INSTITUTIONS KEPT APART

01. The grievance and monitoring authorities under the 2016 Act

BOUNDARY -> The routed objective demand turns on exactly this three-way institutional distinction.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them.

NAMED EVIDENCE AND MECHANISM

- The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them.

EXAMINER CAUTION

- The routed objective demand turns on exactly this three-way institutional distinction.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to Grievance, accessibility and credit institutions kept apart, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Name each institution's function without merging regulator, mission and lender.

MINI RECAP

- **Evidence chain:** The grievance and monitoring authorities under the 2016 Act
- **Qualified use:** Name each institution's function without merging regulator, mission and lender.

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Grievance accessibility credit institutions kept apart	2. MECHANISM / ARGUMENT relate The grievance and monitoring authorities under the 2016 Act through claim, carrying instrument, delivery and measured outcome	3. CONSEQUENCE / CONTRAST This relation supports the answer route that name each institution's function without merging regulator, mission and lender.	4. UPSC TRAP / ANSWER-USE LIMIT: The routed objective demand turns on exactly this three-way institutional distinction.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Grievance, accessibility and credit institutions kept apart converts a dated official entitlement or indicator into a qualified capability argument			

SESSION 12 - CORE - The two recorded decisions on accommodation and dignity

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The two recorded decisions on accommodation and dignity is the part of Persons with Disabilities that explains how The two recorded cases on accommodation and dignity fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, The two recorded decisions on accommodation and dignity denotes the source-bounded relation among The two recorded cases on accommodation and dignity, described by the

entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The two recorded decisions on accommodation and dignity should be analysed as a relation among The two recorded cases on accommodation and dignity, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- recorded
- decisions
- accommodation
- dignity
- cases
- owners

How to use them: Define recorded, decisions, accommodation; cite dignity as named evidence with its issuing body and dated edition or round; then apply this qualification: Neither holding may be extended beyond what the owners record. Conclude by showing how the distinction supports this answer route: Convert a statutory duty into an enforceable equality claim using named judicial evidence..

VISUAL FIRST

THE TWO RECORDED DECISIONS ON ACCOMMODATION AND DIGNITY

01. The two recorded cases on accommodation and dignity

BOUNDARY -> Neither holding may be extended beyond what the owners record.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record.

NAMED EVIDENCE AND MECHANISM

- The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record.

EXAMINER CAUTION

- Neither holding may be extended beyond what the owners record.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to The two recorded decisions on accommodation and dignity, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Convert a statutory duty into an enforceable equality claim using named judicial evidence.

UPSC TRAP / ANSWER-USE LIMIT: The verified page records the aim, the dated prevalence statement and the number of statutory types and nothing more.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The verified departmental statement on prevalence and categories converts a dated official entitlement or indicator into a qualified capability argument			

SESSION 14 - CORE SYNTHESIS - What a prevalence figure can and cannot prove

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: What a prevalence figure can and cannot prove is the part of Persons with Disabilities that explains how What a prevalence figure can and cannot prove and Where the entitlement-to-participation gap actually opens fit into one examinable social-justice relationship.

Technical definition: In social-justice analysis, What a prevalence figure can and cannot prove denotes the source-bounded relation among What a prevalence figure can and cannot prove and Where the entitlement-to-participation gap actually opens, described by the entitlement or claim that is asserted, the legal, statutory or purely administrative form that carries it, the delivery mechanism that is supposed to convert it into access, the measured outcome by which the conversion is tested, and the remedy or recommendation that follows when the conversion fails.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

What a prevalence figure can and cannot prove should be analysed as a relation among What a prevalence figure can and cannot prove and Where the entitlement-to-participation gap actually opens, separating the right claimed, the scheme that carries it, the delivery that reaches a person and the outcome that is actually measured.

MUST-WRITE KEYWORDS

- What
- prevalence
- figure
- prove
- entitlement-to-participation
- actually

How to use them: Define What, prevalence, figure; cite prove as named evidence with its issuing body and dated edition or round; then apply this qualification: A self-reported 2011 share is not a current denominator and not proof of entitlement adequacy. Conclude by showing how the distinction supports this answer route: Use official data with its source, its year and its recorded limitation attached..

VISUAL FIRST

WHAT A PREVALENCE FIGURE CAN AND CANNOT PROVE

01. What a prevalence figure can and cannot prove

|

v

02. Where the entitlement-to-participation gap actually opens

BOUNDARY -> A self-reported 2011 share is not a current denominator and not proof of entitlement adequacy.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy.

NAMED EVIDENCE AND MECHANISM

- The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation.

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: Social Justice | **Tier:** Must-Do (foundation) | **GS Paper:** GS-II; cross-cuts GS-I (society, inclusion) and GS-IV (empathy, dignity). **Core area:** Rights of Persons with Disabilities Act, 2016; 21 specified disability categories; reservation for PwDs; reasonable accommodation; UDID; Accessible India Campaign; ADIP; National Trust. **Grounded in:** Rights of Persons with Disabilities Act, 2016 (RPwD Act); Persons with Disabilities Act, 1995 (repealed); National Trust for Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999; UDID portal; Accessible India Campaign (Sugamya Bharat Abhiyan); ADIP Scheme guidelines; Department of Empowerment of Persons with Disabilities (DEPwD). **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor. *Companion:* advanced/11_Persons-with-Disabilities.md.

1. Visual foundation

Core proposition: **FACT:** The Rights of Persons with Disabilities Act, 2016 expands the definition of disability from 7 to 21 specified categories, mandates reservation and reasonable accommodation, and shifts the paradigm from welfare to rights; effectiveness depends on bridging the gap between statutory entitlements and substantive access to education, employment, mobility and public life.

2. Essential definitions

Concept	Exam-ready meaning
FACT: Person with disability (PwD)	A person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others (RPwD Act, 2016 definition, aligned with UNCRPD).
FACT: 21 specified disabilities (RPwD Act, 2016)	The Schedule lists blindness; low vision; leprosy-cured persons; hearing impairment (deaf and hard of hearing); locomotor disability; dwarfism; intellectual disability; mental illness; autism spectrum disorder; cerebral palsy; muscular dystrophy; chronic neurological conditions; specific learning disabilities; multiple sclerosis; speech and language disability; thalassaemia; haemophilia; sickle-cell disease; multiple disabilities including deafblindness; acid-attack victims; and Parkinson's disease. The government may notify additional categories.
FACT: Reasonable accommodation	Necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure persons with disabilities enjoy rights on an equal basis with others (RPwD Act, Section 2(y)).
FACT: UDID (Unique Disability ID)	A centralised, nationally portable disability-certificate/ID platform that standardises application, certificate and card processes. It reduces re-certification friction but does not by itself guarantee benefit access.
FACT: Accessible India / SIPDA	Sugamya Bharat's accessibility framework covers built environment, transport and ICT. Since March 2024, accessibility work is carried through the Scheme for Implementation of the RPwD Act (SIPDA); do not present the earlier campaign label as proof of a separate current programme.
FACT: ADIP (Assistance to Disabled Persons for Purchase/Fitting of Aids and Appliances)	A scheme providing assistive devices (wheelchairs, hearing aids, artificial limbs, etc.) to PwDs to enhance their mobility, independence and participation.

Medical, social and rights models

- ANALYSIS: The **medical model** locates disability mainly in impairment and treatment.
- ANALYSIS: The **social model** locates disabling disadvantage in inaccessible environments, institutions and attitudes.
- FACT: The RPwD/UNCRPD **rights model** adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties; impairment may remain, but exclusion is not treated as inevitable.

3. How disability rights and welfare work (mechanism)

1. **Recognition and certification:** A medical authority certifies the type and extent (benchmark: 40%+) of disability; the UDID system issues a unique identification enabling portability of benefits across states.
2. **Reservation:** The RPwD Act mandates minimum 4% reservation in government establishments and 5% in higher-education institutions for persons with benchmark disabilities across the statutory categories - this is a statutory reservation, distinct from the constitutional Art 16(4) reservation for SC/ST/OBC.
3. **Reasonable accommodation:** Employers, educational institutions and service providers must make necessary modifications (accessible workplaces, assistive technology, flexible evaluation) without imposing disproportionate burden.
4. **Accessibility infrastructure:** Sugamya Bharat Abhiyan targets built environment (ramps, tactile paths, accessible toilets), transportation (accessible buses, railway coaches) and ICT (screen readers, accessible websites) accessibility.

5. **Assistive devices:** ADIP Scheme provides aids/appliances to enhance mobility and independence; National Trust supports specific conditions (see Section 4).

4. Institutions and tools

- **FACT: Rights of Persons with Disabilities Act, 2016 (RPwD Act):** Replaced the Persons with Disabilities Act, 1995; expanded categories from 7 to 21; mandated reservation, reasonable accommodation and accessibility; aligned with UNCRPD. The government may notify additional disability categories.
- **FACT: UDID (Unique Disability ID):** Centralised certification/ID platform operated by DEPwD; enables a portable, standardised route but does not itself confer every benefit. Registration counts are dynamic and not asserted here.
- **FACT: Accessible India / SIPDA:** Sugamya Bharat's three-pillar accessibility framework (built environment, transport, ICT) is now carried through SIPDA after March 2024. Compliance-dashboard figures are dynamic and must be cited with a reporting date.
- **FACT: ADIP Scheme:** Provides assistive devices (wheelchairs, tricycles, hearing aids, artificial limbs, braille kits, etc.) to PwDs; implemented through camp mode and institutional mode by DEPwD.
- **FACT: National Trust (Act of 1999):** Statutory body under the National Trust for Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999. Note: this Act covers ONLY four specific conditions (autism, cerebral palsy, mental retardation, multiple disabilities) - its scope is narrower than the 21 RPwD categories. Functions include legal guardianship support and registered-organisation support for care and rehabilitation.

5. Indian applications and examples

- **ANALYSIS:** A PwD student requiring extra time in examinations as reasonable accommodation illustrates the substantive-equality principle - same exam, modified conditions to ensure equal opportunity.
- **ANALYSIS:** A government building retrofitted with ramps, accessible toilets and signage under Sugamya Bharat Abhiyan illustrates built-environment accessibility.
- **ANALYSIS:** A visually impaired candidate receiving screen-reader access during a competitive examination illustrates ICT accessibility as reasonable accommodation.

6. Must-Know Facts for Prelims

- **FACT:** RPwD Act, 2016 specifies 21 disability categories (expanded from 7 under the 1995 Act); the government may notify additional categories.
- **FACT:** Minimum 4% reservation in government establishments/posts and 5% in higher-education institutions for persons with benchmark disabilities - statutory, not Art 16(4) constitutional reservation.
- **FACT:** UDID provides a centralised, portable disability certification replacing fragmented state-level certificates.
- **FACT:** Sugamya Bharat's three-pillar accessibility framework covers built environment, transportation and ICT; its current implementation vehicle is SIPDA.
- **FACT:** National Trust (1999 Act) covers only four conditions: autism, cerebral palsy, mental retardation and multiple disabilities - narrower than RPwD's 21 categories.

7. UPSC traps

- **WRONG:** The RPwD Act, 2016 specifies 7 disability categories. -> **FACT:** The 2016 Act specifies 21 categories; the repealed 1995 Act had 7 categories.
- **WRONG:** Reservation for PwDs is under Article 16(4) of the Constitution. -> **FACT:** PwD reservation is statutory under the RPwD Act, 2016 - it is NOT the same constitutional mechanism as SC/ST/OBC reservation under Art 16(4).
- **WRONG:** The National Trust Act, 1999 covers all 21 disabilities under the RPwD Act. -> **FACT:**

The National Trust Act covers only FOUR specific conditions (autism, cerebral palsy, mental retardation, multiple disabilities); its scope is narrower than the 21 RPwD categories.

- **WRONG:** Reasonable accommodation means physical accessibility only. -> **FACT:** Reasonable accommodation includes any necessary modification - physical, procedural, technological or attitudinal - to ensure equal participation; accessibility is one component.

8. CURRENT: Current anchor

- **CURRENT: Status check (21 July 2026):** UDID counts are dynamic. Sugamya Bharat's accessibility framework continues through SIPDA after March 2024; cite the applicable DEPwD reporting date and implementation vehicle rather than a legacy campaign count.

9. PYQ application

- **ANALYSIS:** There is no confirmed direct 2024 or 2025 GS-II Mains PYQ specifically on persons with disabilities in the audited local PYQ texts. However, questions on inclusive development, accessibility and welfare may intersect with this topic. A strong answer should cite the RPwD Act, 2016 (21 categories, reasonable accommodation), the distinction between statutory PwD reservation and constitutional SC/ST/OBC reservation, and the three pillars of Sugamya Bharat Abhiyan.

10. Mains angles

- **ANALYSIS:** Frame the RPwD Act, 2016 as a paradigm shift from welfare to rights, aligned with UNCRPD - emphasise reasonable accommodation as the core substantive-equality concept.

- **ANALYSIS:** Distinguish statutory PwD reservation (4% govt, 5% higher ed) from constitutional reservation for SC/ST/OBC.

- **ANALYSIS:** Flag the scope mismatch: National Trust (1999) covers only 4 conditions, while RPwD (2016) covers 21 categories - an exam-trap-worthy nuance.

- **ANALYSIS:** Use UDID's portability as an example of administrative reform reducing documentation burden for vulnerable groups.

Answer thesis: The Rights of Persons with Disabilities Act, 2016 marks a paradigm shift from charity-based welfare to rights-based inclusion, expanding recognised disabilities from 7 to 21, mandating statutory reservation and reasonable accommodation, and anchoring accessibility through Sugamya Bharat Abhiyan; its success depends on bridging the implementation gap between statutory entitlements and substantive participation in education, employment and public life, while recognising the scope mismatch between RPwD's 21 categories and the narrower coverage of older institutions like the National Trust.

11. Probable questions

- **ANALYSIS: Prelims:** How many disability categories are specified under the Rights of Persons with Disabilities Act, 2016, and what is the minimum reservation for PwDs in government establishments?

- **ANALYSIS: Mains (10 marks):** Explain the concept of 'reasonable accommodation' under the RPwD Act, 2016 and its significance for inclusive education and employment.

- **ANALYSIS: Mains (15 marks):** "The Rights of Persons with Disabilities Act, 2016 marks a paradigm shift from welfare to rights." Critically examine this statement with reference to the Act's key provisions and implementation challenges.

11A. Answer architecture (10/15/20-mark support)

The **2022 GS-II** RPwD Act/sensitisation demand is owned here, superseding advanced/11.

- **Cases:** *Vikash Kumar v. UPSC* treated reasonable accommodation as equality, not charity; *Jeeja Ghosh* connected dignity/non-discrimination to air-travel treatment.

- **Universal design:** widest usability from inception; individual accommodation remains necessary where a specific barrier survives.

- **Institutions:** Chief Commissioner monitors/inquires under RPwD; the disability development-finance corporation is a credit/livelihood route, not the regulator or accessibility mission.

10 marks: accommodation, one case and two examples. **15 marks:** law, accessibility, education, employment, attitudes and grievance institutions. **20 marks:** medical, social and rights models, universal design, intersectionality and enforceability.

Reasoned verdict: Inclusion requires institutions to remove preventable barriers and provide individual accommodation.

2026 PYQ Integration

Status: 2026 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2026.md. **Answer-key rule:** The 2026 Prelims and CSAT Set-A keys held locally are **provisional**; no option or answer is recorded or inferred in this integration.

- **Year represented:** 2026
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2026	Prelims GS-I	56	Disability rights law, accessibility mission, and disability development corporation	Objective question; provisional 2026 Set-A key present locally, answer not inferred	Provisional 2026 Set-A key present locally (Ans - ■2026-■GS1-■Provisional); key is provisional - no answer letter recorded or inferred here	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Disability rights law, accessibility mission, and disability development corporation

This block integrates the 2026 examinable demand and paper metadata. It is kept separate from the 2018-2023 and 2024-2025 blocks and does not convert a provisionally-keyed, answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2022
- **Paper(s):** GS-II
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2022	GS-II	7	Rights of Persons with Disabilities Act 2016 and sensitisation	Comment · 10 marks · 150 words	Core route supersedes older Advanced ownership	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Rights of Persons with Disabilities Act 2016 and sensitisation

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

SOCIAL JUSTICE DEEP-REVIEW CORE CONTROL

- **Must remember:** Disability justice follows equality, dignity, autonomy, accessibility, reasonable accommodation, supported decision-making and community participation through a social and rights-based model rather than a charity-only approach.
- **Close distinction:** Impairment is not disability, accessibility is not reasonable accommodation, benchmark disability is not every disability, reservation eligibility is not the entire RPwD Act, and a certificate or portal registration is not substantive inclusion.
- **Authority / evidence / implementation limit:** Use the RPwD Act, UNCRPD status, commissioners, accessibility standards and UDID with precise scope; trace assessment, certification, accommodation, education/work access, transport/digital design, grievance and remedy while preserving agency and avoiding ableist assumptions.

Semantic-completeness ownership and PYQ control

- **Official syllabus/index and owned core:** Disability justice follows equality, dignity, autonomy, accessibility, reasonable accommodation, supported decision-making and community participation through a social and rights-based model rather than a charity-only approach.
- **Indispensable distinction and prerequisite taxonomy:** Impairment is not disability, accessibility is not reasonable accommodation, benchmark disability is not every disability, reservation eligibility is not the entire RPwD Act, and a certificate or portal registration is not substantive inclusion.
- **Mechanism, implementation and evidence control:** Use the RPwD Act, UNCRPD status, commissioners, accessibility standards and UDID with precise scope; trace assessment, certification, accommodation, education/work access, transport/digital design, grievance and remedy while preserving agency and avoiding ableist assumptions.
- **FACT: Verified current fact (official sources rechecked 6 September 2026):**

Rechecked 2026-09-06: DEPwD and UDID remain official sources; disability, benchmark disability, certification, registration, accessibility, reasonable accommodation and realised inclusion are separate claims. Sources: <https://depwd.gov.in/acts/>; <https://depwd.gov.in/important-documents/>; <https://www.swavlambancard.gov.in/>

- **ANALYSIS: Analytical inference:** institutional design, allocation, a portal, a registration, a report, a training completion, a disposal count or a ranking can support a causal argument only after authority, capacity, incentives, distribution, implementation, grievance, outcome and alternative explanations are tested.

- **Canonical and cross-owner boundary:** this Social Justice owner teaches the authority-to-delivery-to-remedy chain. Detailed constitutional doctrine stays with Polity; sector entitlement design stays with Social Justice; macro-fiscal doctrine stays with Economy; ethics theory stays with Ethics. Cross-owner evidence may be routed but is not silently duplicated or re-owned.

- **Four-ledger hostile audit:** literal syllabus, indispensable prerequisites, standard public-administration/social justice taxonomy and complete verified PYQ demands were checked for absent concepts, institutions, mechanisms, classifications, exceptions, comparisons, criticisms, current status, answer

architecture and dependent artifacts.

- **Verified PYQ ownership, 2018-2026:** This owner's previous-year record is a verified one rather than a zero, and it is stated precisely. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand here, the 2022 General Studies Paper II question numbered 7 on the Rights of Persons with Disabilities Act, 2016 and sensitisation, with the directive Comment, ten marks and one hundred and fifty words, and with the ledger note that this core route supersedes the older Advanced ownership; that demand is therefore solved in this package with a model answer written to the repository's examiner-grade standard using the claim, named evidence, analysis and qualification pattern. The audited 2026 Prelims routing ledger routes exactly one objective demand here, question 56 of the 2026 Prelims General Studies Paper I on disability rights law, the accessibility mission and the disability development corporation, and that ledger records expressly that the locally held 2026 Set-A key is provisional, so no option, key or inferred answer letter is recorded for it anywhere in this package and the demand is instead covered as taught content by naming the statute, the accessibility mission and its implementation vehicle, and the development-finance corporation as a distinct credit and livelihood route. The audited 2024-2025 Mains and Prelims routing ledgers route no further demand to this owner, and both the Basic and the Advanced owner state independently that no confirmed direct 2024 or 2025 General Studies Paper II Mains question on persons with disabilities exists in the audited local texts, which is consistent with that record. Alongside the solved demand card, the package adds six original Mains questions with model solutions and eighty original objective questions on a strict A-B-C-D rotation. Each model solution opens with its analytical claim so that the evidence which follows does argumentative rather than decorative work. The locally held OCR-searchable official General Studies papers were read only to confirm the printed wording of the routed Mains demand; no question was invented from them, no marking scheme or page precision was imported and no official answer key is claimed for any question anywhere in this package.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies What this owner holds and the exact demands routed to it?

A. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. B. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. C. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. D. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and

specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise.

Answer: A. Explanation: This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under What this owner holds and the exact demands routed to it?

A. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. B. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. C. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. D. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement.

Answer: B. Explanation: This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere

in this package. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of What this owner holds and the exact demands routed to it?

A. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. B. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. C. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. D. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement.

Answer: C. Explanation: This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about What this owner holds and the exact demands routed to it?

A. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. B. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not

imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. C. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. D. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package.

Answer: D. Explanation: This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies The statutory definition and its convention anchor?

A. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. B. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. C. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. D. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is

what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement.

Answer: A. Explanation: The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under The statutory definition and its convention anchor?

A. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. B. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. C. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. D. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise.

Answer: B. Explanation: The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of The statutory definition and its convention anchor?

A. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. B. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. C. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. D. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement.

Answer: C. Explanation: The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about The statutory definition and its convention anchor?

A. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. B. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. C. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary

legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. D. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement.

Answer: D. Explanation: The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies The twenty-one specified disabilities and the power to notify more?

A. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. B. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. C. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. D. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise.

Answer: A. Explanation: The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that

the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under The twenty-one specified disabilities and the power to notify more?

A. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. B. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. C. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. D. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused.

Answer: B. Explanation: The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of The twenty-one specified disabilities and the power to notify more?

A. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. B. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable

accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. C. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. D. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement.

Answer: C. Explanation: The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about The twenty-one specified disabilities and the power to notify more?

A. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. B. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. C. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. D. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may

notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability.

Answer: D. Explanation: The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies The move from seven categories to twenty-one?

A. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. B. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. C. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. D. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused.

Answer: A. Explanation: The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under The move from seven categories to twenty-one?

A. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. B. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. C. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused.

Answer: B. Explanation: The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of The move from seven categories to twenty-one?

A. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. B. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. C. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had

excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. D. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused.

Answer: C. Explanation: The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about The move from seven categories to twenty-one?

A. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. B. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. C. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. D. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise.

Answer: D. Explanation: The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Benchmark disability and what it triggers?

A. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. B. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. C. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. D. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions.

Answer: A. Explanation: The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Benchmark disability and what it triggers?

A. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. B. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. C. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. D. The owners set out three conceptions in sequence: the medical model locates disability

mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions.

Answer: B. Explanation: The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Benchmark disability and what it triggers?

A. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. B. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. C. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. D. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives.

Answer: C. Explanation: The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Benchmark disability and what it triggers?

A. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. B. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. C. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. D. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement.

Answer: D. Explanation: The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Statutory reservation and why it is not Article 16(4) reservation?

A. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. B. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. C. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal

design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. D. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions.

Answer: A. Explanation: The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Statutory reservation and why it is not Article 16(4) reservation?

A. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. B. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. C. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. D. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives.

Answer: B. Explanation: The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. The remaining options belong to

different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Statutory reservation and why it is not Article 16(4) reservation?

A. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. B. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. C. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. D. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.

Answer: C. Explanation: The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Statutory reservation and why it is not Article 16(4) reservation?

A. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. B. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. C. The owners record the accessibility framework as

covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. D. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement.

Answer: D. Explanation: The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Reasonable accommodation and the fact that its denial is discrimination?

A. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. B. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. C. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. D. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.

Answer: A. Explanation: Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of

reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Reasonable accommodation and the fact that its denial is discrimination?

A. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. B. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. C. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. D. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.

Answer: B. Explanation: Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Reasonable accommodation and the fact that its denial is discrimination?

A. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. B. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence

and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. C. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. D. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.

Answer: C. Explanation: Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Reasonable accommodation and the fact that its denial is discrimination?

A. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. B. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. C. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. D. Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused.

Answer: D. Explanation: Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies The medical, social and rights models?

A. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. B. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. C. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. D. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.

Answer: A. Explanation: The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under The medical, social and rights models?

A. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. B. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and

rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. C. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. D. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.

Answer: B. Explanation: The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of The medical, social and rights models?

A. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. B. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. C. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. D. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility.

Answer: C. Explanation: The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about The medical, social and rights models?

A. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. B. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. C. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. D. The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions.

Answer: D. Explanation: The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Universal design against retrofitting?

A. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. B. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces

re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. C. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. D. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument.

Answer: A. Explanation: The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Universal design against retrofitting?

A. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. B. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. C. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. D. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility.

Answer: B. Explanation: The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the

qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Universal design against retrofitting?

A. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. B. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. C. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. D. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument.

Answer: C. Explanation: The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Universal design against retrofitting?

A. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. B. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. C. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend

remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. D. The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives.

Answer: D. Explanation: The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies The portable identity platform and what it does not do?

A. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. B. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. C. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. D. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument.

Answer: A. Explanation: The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under The portable identity platform and what it does not do?

A. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. B. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. C. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. D. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability.

Answer: B. Explanation: The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of The portable identity platform and what it does not do?

A. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. B. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. C. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its

registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. D. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability.

Answer: C. Explanation: The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about The portable identity platform and what it does not do?

A. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. B. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. C. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. D. The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.

Answer: D. Explanation: The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies The accessibility framework and its present implementation vehicle?

A. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. B. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. C. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. D. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability.

Answer: A. Explanation: The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under The accessibility framework and its present implementation vehicle?

A. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. B. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. C. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a

statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. D. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record.

Answer: B. Explanation: The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of The accessibility framework and its present implementation vehicle?

A. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. B. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. C. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. D. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted.

Answer: C. Explanation: The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate

current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about The accessibility framework and its present implementation vehicle?

A. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. B. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. C. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. D. The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility.

Answer: D. Explanation: The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies The assistive-device scheme and its delivery modes?

A. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. B. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. C. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. D. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability.

Answer: A. Explanation: The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under The assistive-device scheme and its delivery modes?

A. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. B. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. C. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability,

intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. D. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them.

Answer: B. Explanation: The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of The assistive-device scheme and its delivery modes?

A. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. B. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. C. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. D. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation.

Answer: C. Explanation: The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. The remaining options belong to different chronology, actor or analytical

Q48. Which statement avoids a close-option trap about The assistive-device scheme and its delivery modes?

A. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. B. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. C. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. D. The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument.

Answer: D. Explanation: The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies The 1999 trust statute and its four-condition scope?

A. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. B. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution

count is asserted. C. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. D. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them.

Answer: A. Explanation: The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under The 1999 trust statute and its four-condition scope?

A. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. B. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. C. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. D. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted.

Answer: B. Explanation: The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four

conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of The 1999 trust statute and its four-condition scope?

A. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. B. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. C. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. D. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation.

Answer: C. Explanation: The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about The 1999 trust statute and its four-condition scope?

A. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. B. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to

enable remains impossible. C. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. D. The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability.

Answer: D. Explanation: The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies The grievance and monitoring authorities under the 2016 Act?

A. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. B. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. C. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. D. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted.

Answer: A. Explanation: The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on

which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under The grievance and monitoring authorities under the 2016 Act?

A. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. B. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. C. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. D. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted.

Answer: B. Explanation: The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of The grievance and monitoring authorities under the 2016 Act?

A. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. B. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself

secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. C. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. D. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation.

Answer: C. Explanation: The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about The grievance and monitoring authorities under the 2016 Act?

A. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. B. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. C. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. D. The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them.

Answer: D. Explanation: The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial

measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies The two recorded cases on accommodation and dignity?

A. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. B. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. C. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. D. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted.

Answer: A. Explanation: The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under The two recorded cases on accommodation and dignity?

A. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. B. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service

Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. C. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. D. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible.

Answer: B. Explanation: The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of The two recorded cases on accommodation and dignity?

A. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. B. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. C. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. D. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a

strict A -> B -> C -> D rotation.

Answer: C. Explanation: The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about The two recorded cases on accommodation and dignity?

A. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. B. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. C. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. D. The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record.

Answer: D. Explanation: The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies The department's own dated prevalence statement?

A. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. B. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. C. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. D. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible.

Answer: A. Explanation: The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under The department's own dated prevalence statement?

A. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. B. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing

beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. C. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. D. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible.

Answer: B. Explanation: The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of The department's own dated prevalence statement?

A. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. B. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. C. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. D. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment

and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible.

Answer: C. Explanation: The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about The department's own dated prevalence statement?

A. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. B. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. C. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. D. The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted.

Answer: D. Explanation: The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that

as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies What a prevalence figure can and cannot prove?

A. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. B. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. C. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. D. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy.

Answer: A. Explanation: The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under What a prevalence figure can and cannot prove?

A. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. B.

The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. C. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. D. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package.

Answer: B. Explanation: The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of What a prevalence figure can and cannot prove?

A. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. B. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. C. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate

and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. D. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement.

Answer: C. Explanation: The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about What a prevalence figure can and cannot prove?

A. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. B. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. C. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. D. The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation.

Answer: D. Explanation: The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute

count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Where the entitlement-to-participation gap actually opens?

A. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. B. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. C. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. D. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible.

Answer: A. Explanation: The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Where the entitlement-to-participation gap actually opens?

A. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. B. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. C. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. D. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation.

Answer: B. Explanation: The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Where the entitlement-to-participation gap actually opens?

A. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. B. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons,

hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. C. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. D. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement.

Answer: C. Explanation: The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Where the entitlement-to-participation gap actually opens?

A. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. B. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. C. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. D. The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty

per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy.

Answer: D. Explanation: The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Coverage against substantive participation?

A. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. B. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. C. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. D. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement.

Answer: A. Explanation: The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Coverage against substantive participation?

A. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. B. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. C. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. D. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement.

Answer: B. Explanation: The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Coverage against substantive participation?

A. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. B. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. C. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures

whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. D. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability.

Answer: C. Explanation: The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Coverage against substantive participation?

A. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. B. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. C. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. D. The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible.

Answer: D. Explanation: The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies The verified previous-year ownership stated precisely?

A. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. B. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. C. This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package. D. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability.

Answer: A. Explanation: The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under The verified previous-year ownership stated precisely?

A. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability. B. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the

2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. C. The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. D. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise.

Answer: B. Explanation: The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of The verified previous-year ownership stated precisely?

A. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. B. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. C. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. D. The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological

conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability.

Answer: C. Explanation: The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about The verified previous-year ownership stated precisely?

A. The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement. B. The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise. C. The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. D. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation.

Answer: D. Explanation: The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation. The

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

This owner's previous-year record is a verified one rather than a zero, and it is stated precisely. The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand here, the 2022 General Studies Paper II question numbered 7 on the Rights of Persons with Disabilities Act, 2016 and sensitisation, with the directive Comment, ten marks and one hundred and fifty words, and with the ledger note that this core route supersedes the older Advanced ownership; that demand is therefore solved in this package with a model answer written to the repository's examiner-grade standard using the claim, named evidence, analysis and qualification pattern. The audited 2026 Prelims routing ledger routes exactly one objective demand here, question 56 of the 2026 Prelims General Studies Paper I on disability rights law, the accessibility mission and the disability development corporation, and that ledger records expressly that the locally held 2026 Set-A key is provisional, so no option, key or inferred answer letter is recorded for it anywhere in this package and the demand is instead covered as taught content by naming the statute, the accessibility mission and its implementation vehicle, and the development-finance corporation as a distinct credit and livelihood route. The audited 2024-2025 Mains and Prelims routing ledgers route no further demand to this owner, and both the Basic and the Advanced owner state independently that no confirmed direct 2024 or 2025 General Studies Paper II Mains question on persons with disabilities exists in the audited local texts, which is consistent with that record. Alongside the solved demand card, the package adds six original Mains questions with model solutions and eighty original objective questions on a strict A -> B -> C -> D rotation. Each model solution opens with its analytical claim so that the evidence which follows does argumentative rather than decorative work. The locally held OCR-searchable official General Studies papers were read only to confirm the printed wording of the routed Mains demand; no question was invented from them, no marking scheme or page precision was imported and no official answer key is claimed for any question anywhere in this package.

Demand decoding: The directive **answer** requires a direct position on "VERIFIED PYQ OWNERSHIP AUDIT", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The answer must resolve the Social Justice demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Analytical body:

- 1. Claim and named evidence:** Define the vulnerable group, deprivation, right or policy concept and distinguish the nearest legal and measured category. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 2. Claim and named evidence:** Identify the constitutional, statutory, judicial or executive basis and the competent Union, state or local institution. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 3. Claim and named evidence:** Map rights-holder, household/community context, duty-bearer, frontline worker, provider and accountability forum. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 4. Claim and named evidence:** Trace identification, eligibility, documentation, finance, access, portability, grievance, appeal and correction. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal

limit, accessibility, dignity, privacy, portability or residual exclusion.

5. **Claim and named evidence:** Use a named Indian law, judgment, scheme, institution or official dataset with source, date, denominator and status. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.

Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

6. **Claim and named evidence:** Test intersectionality, regional variation, stigma, accessibility, privacy, fiscal adequacy, exclusion and causal limits. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.

Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The answer must resolve the Social Justice demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "VERIFIED PYQ OWNERSHIP AUDIT", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- **ANALYSIS:** There is no confirmed direct 2024 or 2025 GS-II Mains PYQ specifically on persons with disabilities in the audited local PYQ texts. However, questions on inclusive development, accessibility and welfare may intersect with this topic. A strong answer should cite the RPwD Act, 2016 (21 categories, reasonable accommodation), the distinction between statutory PwD reservation and constitutional SC/ST/OBC reservation, and the three pillars of Sugamya Bharat Abhiyan.

2026 PYQ Integration

Status: 2026 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2026.md. **Answer-key rule:** The 2026 Prelims and CSAT Set-A keys held locally are **provisional**; no option or answer is recorded or inferred in this integration.

- **Year represented:** 2026
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2026	Prelims GS-I	56	Disability rights law, accessibility mission, and disability development corporation	Objective question; provisional 2026 Set-A key present locally, answer not inferred	Provisional 2026 Set-A key present locally (Ans- ■2026 - ■GS1 - ■Provis ional); key is provisional - no answer letter recorded or inferred here	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Disability rights law, accessibility mission, and disability development corporation

This block integrates the 2026 examinable demand and paper metadata. It is kept separate from the 2018-2023 and 2024-2025 blocks and does not convert a provisionally-keyed, answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2022
- **Paper(s):** GS-II
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2022	GS-II	7	Rights of Persons with Disabilities Act 2016 and sensitisation	Comment · 10 marks · 150 words	Core route supersedes older Advanced ownership	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Rights of Persons with Disabilities Act 2016 and sensitisation

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- **ANALYSIS:** There is no confirmed direct 2024 or 2025 GS-II Mains PYQ specifically on persons with disabilities in the audited local PYQ texts. A strong Mains answer should: (a) distinguish the medical model from the social model and locate RPwD in the latter, (b) explain reasonable accommodation as a substantive-equality concept, (c) cite the statutory (not constitutional) basis of PwD reservation, (d) flag the National Trust scope mismatch, and (e) frame success as closing the outcome gap between entitlements and participation.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2022
- **Paper(s):** GS-II
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2022	GS-II	7	Rights of Persons with Disabilities Act 2016 and sensitisation	Comment · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Rights of Persons with Disabilities Act 2016 and sensitisation

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2022 General Studies Paper II

Demand: Rights of Persons with Disabilities Act 2016 and sensitisation, with the directive Comment, ten marks and one hundred and fifty words, exactly as recorded in the audited 2018-2023 Mains routing ledger, where the ledger note records that this core route supersedes older Advanced ownership.

Status: Routed to this owner by the audited 2018-2023 Mains routing ledger. The demand is rendered neutrally from that ledger and from the generated previous-year integration block carried inside the Basic and Advanced owners; no official marking scheme, model answer or page precision is claimed for it, and the answer below is this repository's own examiner-grade solution.

Model solution: Claim: the 2016 Act shifts disability from a welfare category to an equality claim, so sensitisation is not a soft accompaniment to the law but the mechanism through which its central duty, reasonable accommodation, is actually performed by the people who owe it. Named evidence and example: the statutory definition of a person with disability as one whose long-term impairment, in interaction with barriers, hinders full and effective participation on an equal basis with others, aligned with the convention India ratified in 2007; the expansion of recognised categories from seven under the repealed 1995 Act to twenty-one specified categories, which brought thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities inside the frame and thereby made recognition itself an act of inclusion; Section 2(y), which defines reasonable accommodation as necessary and appropriate modification and adjustment that does not impose a disproportionate or undue burden, together with the Act's express treatment of the denial of such accommodation as discrimination; the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a passenger with disability; the minimum four per cent reservation in government establishments and five per cent in higher-educational institutions for persons with benchmark disabilities; the three-pillar accessibility framework covering the built environment, transport and information and communication technology, carried through the implementation scheme for the 2016 Act since March 2024 under harmonised universal-accessibility guidelines; and the Chief Commissioner and State Commissioners as the statutory complaint and monitoring authorities. Analysis: each of these duties is discharged by a decision-maker, an examiner, an employer, a teacher, a station master or a website owner, and every one of those decisions turns on whether the duty-bearer reads an adjustment as an entitlement of equal citizenship or as a discretionary favour; that is precisely why sensitisation carries the Act, because an unsensitised establishment converts a lawful accommodation request into a burden argument, leaves an identified reservation post unfilled on the ground that no suitable post exists, treats an accessible coach as compliance while the platform remains unusable, and reduces the grievance authority to a formality by contesting rather than remedying. Sensitisation, understood this way, is the transmission of the social and rights models into administrative behaviour, and it is measurable through the joints where the gap opens rather than through the number of workshops held. Qualification: sensitisation is necessary and not sufficient, because the Act itself limits the accommodation duty by the disproportionate-burden test, the benchmark threshold of forty per cent leaves persons below it outside the reservation entitlement, enforcement against private establishments is weaker than against government, and the evidence base is thin, since the departmental page records the Census 2011 figure of 2.68 crore persons with disabilities or 2.21 per cent of the population, a self-reported estimate the owners record as likely undercounting. A complete answer therefore argues that sensitisation must be paired with universal design in new construction, with

identified posts and time-bound retrofitting, and with outcome measurement of participation rather than of coverage. Why this earns marks: it answers the directive Comment by taking a position on the relationship between the statute and sensitisation, uses exact statutory provisions, percentages, dates and two named decisions as argumentative rather than decorative evidence, locates the failure at named joints, and closes with a qualified verdict that does not overstate what sensitisation alone can achieve.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 1 - 2022 General Studies Paper II", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: the 2016 Act shifts disability from a welfare category to an equality claim, so sensitisation is not a soft accompaniment to the law but the mechanism through which its central duty, reasonable accommodation, is actually performed by the people who owe it. Named evidence and example: the statutory definition of a person with disability as one whose long-term impairment, in interaction with barriers, hinders full and effective participation on an equal basis with others, aligned with the convention India ratified in 2007; the expansion of recognised categories from seven under the repealed 1995 Act to twenty-one specified categories, which brought thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities inside the frame and thereby made recognition itself an act of inclusion; Section 2(y), which defines reasonable accommodation as necessary and appropriate modification and adjustment that does not impose a disproportionate or undue burden, together with the Act's express treatment of the denial of such accommodation as discrimination; the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a passenger with disability; the minimum four per cent reservation in government establishments and five per cent in higher-educational institutions for persons with benchmark disabilities; the three-pillar accessibility framework covering the built environment, transport and information and communication technology, carried through the implementation scheme for the 2016 Act since March 2024 under harmonised universal-accessibility guidelines; and the Chief Commissioner and State Commissioners as the statutory complaint and monitoring authorities. Analysis: each of these duties is discharged by a decision-maker, an examiner, an employer, a teacher, a station master or a website owner, and every one of those decisions turns on whether the duty-bearer reads an adjustment as an entitlement of equal citizenship or as a discretionary favour; that is precisely why sensitisation carries the Act, because an unsensitised establishment converts a lawful accommodation request into a burden argument, leaves an identified reservation post unfilled on the ground that no suitable post exists, treats an accessible coach as compliance while the platform remains unusable, and reduces the grievance authority to a formality by contesting rather than remedying. Sensitisation, understood this way, is the transmission of the social and rights models into administrative behaviour, and it is measurable through the joints where the gap opens rather than through the number of workshops held. Qualification: sensitisation is necessary and not sufficient, because the Act itself limits the accommodation duty by the disproportionate-burden test, the benchmark threshold of forty per cent leaves persons below it outside the reservation entitlement, enforcement against private establishments is weaker than against government, and the evidence base is thin, since the departmental page records the Census 2011 figure of 2.68 crore persons with disabilities or 2.21 per cent of the population, a self-reported estimate the owners record as likely undercounting. A complete answer therefore argues that sensitisation must be paired with universal design in new construction, with identified posts and time-bound retrofitting, and with outcome measurement of participation rather than of coverage. Why this earns marks: it answers the directive Comment by taking a position on the relationship between the statute and sensitisation, uses exact statutory provisions, percentages, dates and two named decisions as argumentative rather than decorative evidence, locates the failure at named joints, and closes with a qualified verdict that does not overstate what sensitisation alone can achieve.

Analytical body:

1. **Claim and named evidence:** PYQ DEMAND CARD 1 - 2022 General Studies Paper II **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: Claim: the 2016 Act shifts disability from a welfare category to an equality claim, so sensitisation is not a soft accompaniment to the law but the mechanism through which its central duty, reasonable accommodation, is actually performed by the people who owe it. Named evidence and example: the statutory definition of a person with disability as one whose long-term impairment, in interaction with barriers, hinders full and effective participation on an equal basis with others, aligned with the convention India ratified in 2007; the expansion of recognised categories from seven under the repealed 1995 Act to twenty-one specified categories, which brought thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities inside the frame and thereby made recognition itself an act of inclusion; Section 2(y), which defines reasonable accommodation as necessary and appropriate modification and adjustment that does not impose a disproportionate or undue burden, together with the Act's express treatment of the denial of such accommodation as discrimination; the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a passenger with disability; the minimum four per cent reservation in government establishments and five per cent in higher-educational institutions for persons with benchmark disabilities; the three-pillar accessibility framework covering the built environment, transport and information and communication technology, carried through the implementation scheme for the 2016 Act since March 2024 under harmonised universal-accessibility guidelines; and the Chief Commissioner and State Commissioners as the statutory complaint and monitoring authorities. Analysis: each of these duties is discharged by a decision-maker, an examiner, an employer, a teacher, a station master or a website owner, and every one of those decisions turns on whether the duty-bearer reads an adjustment as an entitlement of equal citizenship or as a discretionary favour; that is precisely why sensitisation carries the Act, because an unsensitised establishment converts a lawful accommodation request into a burden argument, leaves an identified reservation post unfilled on the ground that no suitable post exists, treats an accessible coach as compliance while the platform remains unusable, and reduces the grievance authority to a formality by contesting rather than remedying. Sensitisation, understood this way, is the transmission of the social and rights models into administrative behaviour, and it is measurable through the joints where the gap opens rather than through the number of workshops held. Qualification: sensitisation is necessary and not sufficient, because the Act itself limits the accommodation duty by the disproportionate-burden test, the benchmark threshold of forty per cent leaves persons below it outside the reservation entitlement, enforcement against private establishments is weaker than against government, and the evidence base is thin, since the departmental page records the Census 2011 figure of 2.68 crore persons with disabilities or 2.21 per cent of the population, a self-reported estimate the owners record as likely undercounting. A complete answer therefore argues that sensitisation must be paired with universal design in new construction, with identified posts and time-bound retrofitting, and with outcome measurement of participation rather than of coverage. Why this earns marks: it answers the directive Comment by taking a position on the relationship between the statute and sensitisation, uses exact statutory provisions, percentages, dates and two named decisions as argumentative rather than decorative evidence, locates the failure at named joints, and closes with a qualified verdict that does not overstate what sensitisation alone can achieve.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2022 General Studies Paper II", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 1 - 10 MARKS

Question: Explain the concept of reasonable accommodation under the Rights of Persons with Disabilities Act, 2016 and its significance for inclusive education and employment. Answer in about 150 words.

Model thesis: Accommodation is an equality duty with a built-in limit, so the explanation must state both limbs of Section 2(y), name the case that treated it as equality rather than charity, and then show what it changes in a classroom and in a workplace.

Claim -> named evidence -> analysis -> qualification:

- Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused.
- The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record.
- The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions.
- The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible.

Qualified conclusion: Accommodation is an equality duty with a built-in limit, so the explanation must state both limbs of Section 2(y), name the case that treated it as equality rather than charity, and then show what it changes in a classroom and in a workplace.

Demand decoding: The directive **explain** requires a direct position on "Explain the concept of reasonable accommodation under the Rights of Persons with Disabilities...", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Accommodation is an equality duty with a built-in limit, so the explanation must state both limbs of Section 2(y), name the case that treated it as equality rather than charity, and then show what it changes in a classroom and in a workplace.

Analytical body:

1. **Claim and named evidence:** Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the

owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

2. **Claim and named evidence:** The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: Accommodation is an equality duty with a built-in limit, so the explanation must state both limbs of Section 2(y), name the case that treated it as equality rather than charity, and then show what it changes in a classroom and in a workplace.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "Explain the concept of reasonable accommodation under the Rights of Persons with Disabilities...", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Distinguish statutory reservation for persons with benchmark disabilities from constitutional reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes. Answer in about 150 words.

Model thesis: The two entitlements have different sources and different ceilings, so the distinction must name the Act and the percentages on one side and the constitutional mechanism on the other, and must state what benchmark certification adds.

Claim -> named evidence -> analysis -> qualification:

- The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement.
- The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement.
- The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability.
- The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible.

Qualified conclusion: The two entitlements have different sources and different ceilings, so the distinction must name the Act and the percentages on one side and the constitutional mechanism on the other, and must state what benchmark certification adds.

Demand decoding: The directive **answer** requires a direct position on "Distinguish statutory reservation for persons with benchmark disabilities from constitutional...", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The two entitlements have different sources and different ceilings, so the distinction must name the Act and the percentages on one side and the constitutional mechanism on the other, and must state what benchmark certification adds.

Analytical body:

1. **Claim and named evidence:** The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled

Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

How to improve this answer: For "Distinguish statutory reservation for persons with benchmark disabilities from constitutional...", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 3 - 15 MARKS

Question: Critically examine the claim that the Rights of Persons with Disabilities Act, 2016 marks a paradigm shift from welfare to rights. Answer in about 250 words.

Model thesis: A shift in model is a shift in duty-bearer, so the examination must trace medical to social to rights, test the claim against the statutory duties actually created, and then locate the residual welfare logic that survives in delivery.

Claim -> named evidence -> analysis -> qualification:

- The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions.
- The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement.
- Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused.
- The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy.

Qualified conclusion: A shift in model is a shift in duty-bearer, so the examination must trace medical to social to rights, test the claim against the statutory duties actually created, and then locate the residual welfare logic that survives in delivery.

Demand decoding: The directive **critically examine** requires a direct position on "Critically examine the claim that the Rights of Persons with Disabilities Act, 2016 marks a...", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: A shift in model is a shift in duty-bearer, so the examination must trace medical to social to rights, test the claim against the statutory duties actually created, and then locate the residual welfare logic that survives in delivery.

Analytical body:

1. **Claim and named evidence:** The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: A shift in model is a shift in duty-bearer, so the examination must trace medical to social to rights, test the claim against the statutory duties actually created, and then locate the residual welfare logic that survives in delivery.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "Critically examine the claim that the Rights of Persons with Disabilities Act, 2016 marks a...", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 4 - 15 MARKS

Question: Assess why statutory entitlements for persons with disabilities have not translated into proportionate participation in education, employment and public life. Answer in about 250 words.

Model thesis: Entitlement and participation fail at different joints, so the assessment must name unfilled posts, legacy retrofitting, weaker private-sector enforcement and the benchmark threshold, and must attach a distinct remedy to each.

Claim -> named evidence -> analysis -> qualification:

- The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy.
- The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility.
- The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.
- The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible.

Qualified conclusion: Entitlement and participation fail at different joints, so the assessment must name unfilled posts, legacy retrofitting, weaker private-sector enforcement and the benchmark threshold, and must attach a distinct remedy to each.

Demand decoding: The directive **assess** requires a direct position on "Assess why statutory entitlements for persons with disabilities have not translated into...", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Entitlement and participation fail at different joints, so the assessment must name unfilled posts, legacy retrofitting, weaker private-sector enforcement and the benchmark threshold, and must attach a distinct remedy to each.

Analytical body:

- 1. Claim and named evidence:** The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 2. Claim and named evidence:** The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 3. Claim and named evidence:** The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
- 4. Claim and named evidence:** The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: Entitlement and participation fail at different joints, so the assessment must name unfilled posts, legacy retrofitting, weaker private-sector enforcement and the benchmark threshold, and must attach a distinct remedy to each.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "Assess why statutory entitlements for persons with disabilities have not translated into...", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 5 - 20 MARKS

Question: Analyse the relationship between universal design, reasonable accommodation and accessibility standards in building a disability-inclusive public realm. Answer in about 300 words.

Model thesis: The three instruments operate at different scales, so the analysis must separate design from adjustment from standard-setting, show why none of them alone completes the chain, and use a named illustration of an incomplete chain.

Claim -> named evidence -> analysis -> qualification:

- The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives.
- Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused.
- The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility.
- The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible.

Qualified conclusion: The three instruments operate at different scales, so the analysis must separate design from adjustment from standard-setting, show why none of them alone completes the chain, and use a named illustration of an incomplete chain.

Demand decoding: The directive **analyse** requires a direct position on "Analyse the relationship between universal design, reasonable accommodation and accessibility...", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The three instruments operate at different scales, so the analysis must separate design from adjustment from standard-setting, show why none of them alone completes the chain, and use a named

illustration of an incomplete chain.

Analytical body:

1. **Claim and named evidence:** The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "Analyse the relationship between universal design, reasonable accommodation and accessibility...", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: Evaluate the adequacy of India's disability data and identification architecture for rights-based policy. Answer in about 300 words.

Model thesis: Measurement determines what policy can even see, so the evaluation must weigh the dated prevalence statement, the certification threshold and the portable identity platform against what a rights framework needs to know, and must close with a graded verdict.

Claim -> named evidence -> analysis -> qualification:

- The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted.
- The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation.
- The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.
- The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement.

Qualified conclusion: Measurement determines what policy can even see, so the evaluation must weigh the dated prevalence statement, the certification threshold and the portable identity platform against what a rights framework needs to know, and must close with a graded verdict.

Demand decoding: The directive **evaluate** requires a direct position on "Evaluate the adequacy of India's disability data and identification architecture for rights-...", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Measurement determines what policy can even see, so the evaluation must weigh the dated prevalence statement, the certification threshold and the portable identity platform against what a rights framework needs to know, and must close with a graded verdict.

Analytical body:

- 1. Claim and named evidence:** The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or device-distribution count is asserted.

Analysis: Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

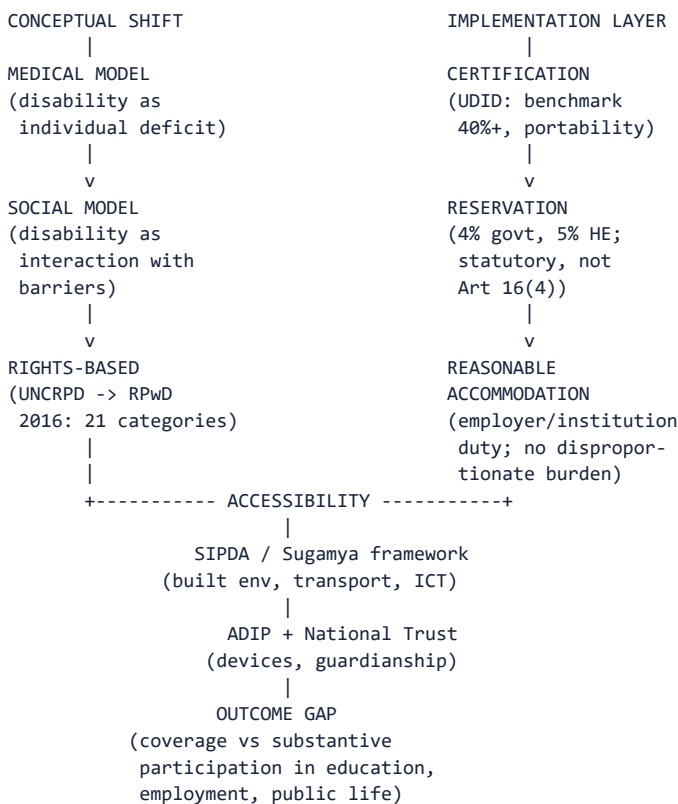

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "Evaluate the adequacy of India's disability data and identification architecture for rights-...", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Social Justice | **Tier:** Advanced | **GS Paper:** GS-II; cross-cuts GS-I (society, inclusion) and GS-IV (empathy, dignity, ethics of care). **Core area:** RPwD Act 2016, UNCRPD, medical vs social model, reasonable accommodation, accessibility standards, implementation gaps. **Grounded in:** Rights of Persons with Disabilities Act, 2016; UN Convention on the Rights of Persons with Disabilities (UNCRPD, ratified 2007); National Trust Act, 1999; Accessible India Campaign; UDID; ADIP; Census 2011 disability data; Department of Empowerment of Persons with Disabilities (DEPwD). **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor. *Companion:* basic/11_Persons-with-Disabilities.md.

1. Architecture

Analytical claim: ANALYSIS: The RPwD Act, 2016 embodies the UNCRPD-aligned shift from the medical model (disability as individual deficit to be cured/accommodated) to the social model (disability as the interaction between impairment and societal barriers); its success depends on enforcing reasonable-accommodation duties and closing the gap between statutory entitlements and substantive participation outcomes in education, employment and public life.

2. Concepts and distinctions

Concept	Precise meaning
FACT: Medical model vs social model	The medical model locates disability in the individual's impairment and focuses on cure/rehabilitation; the social model locates disability in the interaction between impairment and societal barriers (physical, attitudinal, institutional) and focuses on removing barriers. The RPwD Act, 2016 and UNCRPD are grounded in the social model.
FACT: Benchmark disability	40% or more disability of any specified type, certified by a medical authority; benchmark-disability status triggers eligibility for reservation and various concessions.
FACT: Reasonable accommodation (Section 2(y), RPwD Act)	Necessary and appropriate modification and adjustment - not imposing a disproportionate or undue burden - to ensure persons with disabilities enjoy rights on an equal basis with others. Denial of reasonable accommodation is a form of discrimination.
FACT: Universal design vs retrofitting	Universal design builds accessibility into the original design (e.g., step-free entrances); retrofitting adds accessibility features to existing structures (e.g., ramps added later). Universal design is more effective and cost-efficient; retrofitting is often the reality given legacy infrastructure.
ANALYSIS: Coverage vs substantive participation	Coverage counts how many PwDs hold certificates or receive scheme benefits; substantive participation measures whether PwDs actually access education, employment and public life on an equal basis - the latter is the true test of rights-based inclusion.

3. Detailed causal chain: rights to outcomes

- 1. Recognition:** The RPwD Act, 2016 specifies 21 disability categories (expandable by notification), aligned with UNCRPD's broad definition of disability as interaction between impairment and barriers.
- 2. Certification:** A medical authority certifies disability type and percentage; UDID issues a unique, portable identification replacing fragmented state certificates. Benchmark (40%+) triggers reservation eligibility.
- 3. Reservation entitlement:** PwDs gain statutory entitlement to minimum 4% reservation in government establishments and 5% in higher-education institutions - distinct from constitutional SC/ST/OBC reservation, and thus not subject to 50% ceiling jurisprudence.
- 4. Reasonable-accommodation duty:** Employers, educational institutions and service providers must provide necessary modifications (accessible workplaces, flexible evaluation, assistive technology) unless doing so imposes a disproportionate burden.
- 5. Accessibility infrastructure:** Sugamya Bharat's built-environment, transport and ICT framework is carried through SIPDA after March 2024, using standards, retrofitting and universal-design requirements.
- 6. Assistive devices and care support:** ADIP provides devices; National Trust provides guardianship and registered-organisation support for specific conditions.
- 7. Outcome gap:** Despite statutory entitlements, many PwDs face barriers to education (non-inclusive schools), employment (unfilled reservation seats, hostile workplaces) and public life (inaccessible buildings, transport, websites). Closing this gap is the test of the rights-based framework's success.

4. Institutional and reform architecture

- FACT: **UNCRPD (ratified 2007):** India ratified the UN Convention on the Rights of Persons with Disabilities in 2007; the RPwD Act, 2016 is the domestic law giving effect to UNCRPD obligations.

- **FACT: RPwD Act, 2016 - key features:** 21 specified categories (expandable); benchmark disability (40%+); statutory reservation (4% govt, 5% HE); reasonable-accommodation duty; accessibility mandates; penalties for discrimination; Chief Commissioner and State Commissioners for PwDs as grievance/monitoring authorities.
- **FACT: Chief Commissioner for Persons with Disabilities:** Statutory authority under RPwD Act to receive complaints, monitor safeguards and recommend remedial measures; State Commissioners perform parallel functions at the state level.
- **ANALYSIS: Accessibility standards and compliance:** Harmonised Guidelines and Standards for Universal Accessibility specify technical requirements; SIPDA/DEPwD monitoring does not remove the need for State/local enforcement and independent access audits.

5. Indian applications and boundary cases

- **ANALYSIS:** A private-sector employer arguing that providing sign-language interpretation for a deaf employee is a disproportionate burden illustrates the boundary of reasonable accommodation - the Act requires balancing necessity against burden, not automatic exemption.
- **ANALYSIS:** An accessible railway coach (Divyangjan Coach) illustrates Sugamya Bharat's transportation pillar; however, if platforms remain inaccessible, the coach alone does not ensure substantive mobility.
- **ANALYSIS:** A PwD candidate whose reservation seat remains unfilled due to non-identification of suitable posts illustrates the implementation gap in government-reservation compliance.

6. Limitations and trade-offs

- **ANALYSIS: Benchmark rigidity:** The 40% threshold for reservation eligibility may exclude persons with lower-percentage disability who still face significant barriers.
- **ANALYSIS: National Trust scope mismatch:** The National Trust Act, 1999 covers autism, cerebral palsy, the statute's term "mental retardation" and multiple disabilities. Its narrower mandate should not be mistaken for a care/guardianship system covering every specified disability under the RPwD Act.
- **ANALYSIS: Retrofitting cost:** Making legacy infrastructure accessible is expensive and slow; Sugamya Bharat compliance timelines have been extended multiple times.
- **ANALYSIS: Private-sector coverage:** RPwD's reasonable-accommodation duty applies to all establishments, but enforcement mechanisms are weaker for private employers compared to government.
- **ANALYSIS: Data gap:** Census 2011 estimated disability prevalence at ~2.2% of population, but methodological limitations (self-reporting, narrow question framing) likely undercount actual disability prevalence.

7. Must-Know Facts for Advanced Prelims

- **FACT:** India ratified UNCRPD in 2007; the RPwD Act, 2016 is the domestic law giving effect to UNCRPD obligations.
- **FACT:** The RPwD Act mandates 4% reservation in government establishments and 5% in higher education - statutory, not constitutional Art 16(4) reservation.
- **FACT:** Denial of reasonable accommodation is explicitly recognised as a form of discrimination under the RPwD Act, 2016.
- **FACT:** The National Trust Act, 1999 covers only four conditions: autism, cerebral palsy, mental retardation and multiple disabilities - scope is narrower than the 21 RPwD categories.

8. Advanced Prelims traps

- **WRONG:** The RPwD Act, 2016 is based on the medical model of disability. -> **FACT:** The RPwD Act is based on the social model, aligned with UNCRPD - disability is defined as the interaction between impairment and barriers, not as individual deficit alone.
- **WRONG:** PwD reservation counts toward the 50% ceiling for SC/ST/OBC reservation. -> **FACT:** PwD

reservation is statutory under the RPwD Act, separate from the constitutional Art 16(4) mechanism and its 50% ceiling jurisprudence.

- **WRONG:** Universal design and retrofitting are the same concept. -> **FACT:** Universal design

builds accessibility into original construction; retrofitting adds features to existing inaccessible structures - universal design is more effective and cost-efficient.

9. CURRENT: Current-anchor note

- **CURRENT: Status check (21 July 2026):** UDID counts are dynamic. The three-pillar Sugamya Bharat accessibility framework is carried through SIPDA after March 2024; cite the DEPwD reporting date and vehicle rather than treating a legacy campaign label as a current compliance result.
- **ANALYSIS:** Census 2011 estimated disability prevalence at ~2.2% of population; the 2027 Census (once completed) may provide updated enumeration under revised methodologies.

10. PYQ-based analytical application

- **ANALYSIS:** There is no confirmed direct 2024 or 2025 GS-II Mains PYQ specifically on persons with disabilities in the audited local PYQ texts. A strong Mains answer should: (a) distinguish the medical model from the social model and locate RPwD in the latter, (b) explain reasonable accommodation as a substantive-equality concept, (c) cite the statutory (not constitutional) basis of PwD reservation, (d) flag the National Trust scope mismatch, and (e) frame success as closing the outcome gap between entitlements and participation.

11. Mains-ready framework

Central thesis: The Rights of Persons with Disabilities Act, 2016 embodies the UNCRPD-aligned shift from medical to social model, recognising disability as the interaction between impairment and societal barriers; its success depends on enforcing reasonable-accommodation duties, ensuring accessibility through Sugamya Bharat Abhiyan, and closing the outcome gap between statutory entitlements (reservation, certification) and substantive participation in education, employment and public life.

1. **Define the conceptual shift:** Medical model (individual deficit) -> social model (barriers) -> rights-based (UNCRPD, RPwD 2016).
2. **Outline the statutory architecture:** 21 categories, benchmark 40%, statutory reservation (4% govt, 5% HE), reasonable-accommodation duty, Chief Commissioner/ State Commissioners.
3. **Map implementation mechanisms:** UDID (certification, portability), Sugamya Bharat (built env, transport, ICT), ADIP (devices), National Trust (guardianship for 4 conditions).
4. **Identify implementation gaps:** Unfilled reservation seats, inaccessible legacy infrastructure, weak private-sector enforcement, data undercounting.
5. **Distinguish from constitutional reservation:** PwD reservation is statutory; not the same Art 16(4) mechanism as SC/ST/OBC; not subject to 50% ceiling jurisprudence.
6. **Recommend:** Universal-design mandates for new construction, accelerated retrofitting timelines, strengthened private-sector enforcement, expanded National Trust scope, outcome tracking (employment rates, educational attainment, mobility indices).

12. Probable questions

- **ANALYSIS: Prelims:** Which international convention, ratified by India in 2007, provides the basis for the Rights of Persons with Disabilities Act, 2016?
- **ANALYSIS: Mains (10 marks):** Distinguish the medical model from the social model of disability. How does the RPwD Act, 2016 reflect the social model?
- **ANALYSIS: Mains (15 marks):** "Reasonable accommodation is the cornerstone of disability-inclusive education and employment." Discuss with reference to the RPwD Act, 2016 and implementation challenges in India.
- **ANALYSIS: Mains (15 marks):** Critically examine the implementation of the Accessible India

Campaign (Sugamya Bharat Abhiyan) with reference to its three pillars and ground-level challenges.

13. Study links

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2022
- **Paper(s):** GS-II
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2022	GS-II	7	Rights of Persons with Disabilities Act 2016 and sensitisation	Comment · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Rights of Persons with Disabilities Act 2016 and sensitisation

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

CONSOLIDATED REGISTER NOTES

Persons with Disabilities: RAPID RIGHT, SCHEME AND MEASURED-OUTCOME MAP

1. **What this owner holds and the exact demands routed to it:** This owner holds the disability half of the rights-and-inclusion argument: the statutory definition and the twenty-one specified disabilities, benchmark certification and the portable identity platform, statutory reservation, the reasonable-accommodation duty, the accessibility framework and its present implementation vehicle, the assistive-device scheme, the narrower 1999 trust statute and the grievance authorities; its ownership record is mixed rather than empty, because the audited 2018-2023 Mains routing ledger routes the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation to this owner with the note that the core route supersedes the older Advanced ownership, and the audited 2026 Prelims routing ledger routes one objective demand on disability rights law, the accessibility mission and the disability development corporation to this owner while recording that the 2026 Set-A key held locally is provisional, so no option or answer letter is recorded or inferred for it anywhere in this package.
2. **The statutory definition and its convention anchor:** The Rights of Persons with Disabilities Act, 2016 defines a person with disability as a person with long-term physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders full and effective participation in society on an equal basis with others, and the owners record that this definition is aligned with the United Nations Convention on the Rights of Persons with Disabilities, which India ratified in 2007 and to which the 2016 Act gives domestic effect; the decisive words are in

interaction with barriers, because they place the disabling effect in the relationship between impairment and environment rather than in the impairment alone, and every later duty in the Act follows from that placement.

3. **The twenty-one specified disabilities and the power to notify more:** The Schedule to the 2016 Act lists blindness, low vision, leprosy-cured persons, hearing impairment covering the deaf and the hard of hearing, locomotor disability, dwarfism, intellectual disability, mental illness, autism spectrum disorder, cerebral palsy, muscular dystrophy, chronic neurological conditions, specific learning disabilities, multiple sclerosis, speech and language disability, thalassaemia, haemophilia, sickle-cell disease, multiple disabilities including deafblindness, acid-attack victims and Parkinson's disease, and the government may notify additional categories; the examinable discipline is that the list is a statutory schedule and not a medical taxonomy, so a candidate must be able to name the exact count and the expandability rather than paraphrasing the list as physical and mental disability.
4. **The move from seven categories to twenty-one:** The owners record that the 2016 Act replaced the Persons with Disabilities Act, 1995, which recognised seven categories, and that the expansion to twenty-one categories is the single most tested numerical fact in the topic; the analytical value of the expansion is that it brought into the statutory frame conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities that a purely mobility-and-sensory conception of disability had excluded, so recognition itself became a substantive act of inclusion rather than a technical listing exercise.
5. **Benchmark disability and what it triggers:** The owners define benchmark disability as forty per cent or more of a specified disability certified by a medical authority, and they record that benchmark status is what triggers eligibility for reservation and various concessions rather than being the definition of disability itself; the distinction matters twice over, first because a person may be a person with disability under the Act without holding benchmark status, and second because the threshold is a recorded limitation of the design, since a person below the threshold may still face significant barriers while remaining outside the reservation entitlement.
6. **Statutory reservation and why it is not Article 16(4) reservation:** The Act mandates a minimum of four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities across the statutory categories, and the owners insist that this is a statutory reservation created by ordinary legislation and not the constitutional mechanism of Article 16(4) that carries reservation for the Scheduled Castes, the Scheduled Tribes and the other backward classes; the recorded consequence is that it is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism, so a candidate who files disability reservation under the same heading as caste-based reservation will misread every close option about ceilings and about the source of the entitlement.
7. **Reasonable accommodation and the fact that its denial is discrimination:** Section 2(y) of the 2016 Act defines reasonable accommodation as necessary and appropriate modification and adjustment, not imposing a disproportionate or undue burden, to ensure that persons with disabilities enjoy rights on an equal basis with others, and the owners record that denial of reasonable accommodation is expressly recognised as a form of discrimination under the Act; the two limbs must be stated together, because the duty is not unlimited and the burden test is part of the definition, and the boundary case the owners give is an employer arguing that a particular adjustment is a disproportionate burden, which the Act requires to be balanced rather than automatically conceded or automatically refused.
8. **The medical, social and rights models:** The owners set out three conceptions in sequence: the medical model locates disability mainly in the impairment and directs attention to cure and rehabilitation; the social model locates the disabling disadvantage in inaccessible environments, institutions and attitudes and directs attention to removing barriers; and the rights model, carried by the convention and the 2016 Act, adds enforceable equality, autonomy, accessibility and reasonable-accommodation duties, so that impairment may remain while exclusion is no longer treated as inevitable; the answer-writing use is that a recommendation must say which model it is operating in, because a cure-oriented and a barrier-oriented proposal answer different questions.
9. **Universal design against retrofitting:** The owners distinguish universal design, which builds accessibility into the original design so that the widest range of users can use a facility from inception, from retrofitting, which adds accessibility features to structures that were built without them, and they record that universal design is more effective and more cost-efficient while retrofitting is often the reality given legacy infrastructure; the qualification the owners attach is that universal design does not abolish the need for individual accommodation, because a specific barrier may survive even a well-designed environment, so the two instruments are complementary rather than alternatives.

10. **The portable identity platform and what it does not do:** The owners record the Unique Disability Identity platform as a centralised, nationally portable disability-certificate and card system operated by the Department of Empowerment of Persons with Disabilities, which standardises the application, certificate and card processes and replaces fragmented State-level certification, and they attach the boundary that it reduces re-certification friction but does not by itself guarantee access to any benefit and that its registration counts are dynamic and are not asserted; the examinable point is therefore an administrative one, namely that identification reform lowers a transaction cost without creating an entitlement.
11. **The accessibility framework and its present implementation vehicle:** The owners record the accessibility framework as covering three pillars, namely the built environment, transport and information and communication technology, and they record the status carefully: since March 2024 accessibility work is carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act, so the earlier campaign label must not be presented as proof of a separate current programme, and any compliance-dashboard figure must be cited with its reporting date and its implementation vehicle; the owners add that the harmonised guidelines and standards for universal accessibility specify the technical requirements while enforcement and independent access audits remain a State and local responsibility.
12. **The assistive-device scheme and its delivery modes:** The owners record the scheme for assistance to disabled persons for the purchase and fitting of aids and appliances as the assistive-device route, providing wheelchairs, tricycles, hearing aids, artificial limbs and braille kits among others to enhance mobility, independence and participation, and they record that it is implemented in camp mode and in institutional mode by the department; the reason the delivery mode is examinable is that camp mode makes reach a function of camp scheduling and location, so a device scheme can be fully funded and still miss a dispersed rural population, which is a delivery argument rather than a funding argument.
13. **The 1999 trust statute and its four-condition scope:** The National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 creates a statutory body whose functions include legal-guardianship support and support to registered organisations for care and rehabilitation, and the owners record the scope mismatch as an exam-trap-worthy nuance: the trust statute covers only those four conditions, using the statute's own term mental retardation, while the 2016 Act covers twenty-one specified categories, so the older institution must not be mistaken for a care and guardianship system covering every specified disability.
14. **The grievance and monitoring authorities under the 2016 Act:** The owners record the Chief Commissioner for Persons with Disabilities as the statutory authority under the 2016 Act to receive complaints, monitor safeguards and recommend remedial measures, with State Commissioners performing parallel functions at the State level, and they record separately that the disability development-finance corporation is a credit and livelihood route and is neither the regulator nor the accessibility mission; keeping these three institutions apart is the exact distinction on which the routed objective demand about disability rights law, the accessibility mission and the development corporation turns, so an answer must be able to name each institution's function without merging them.
15. **The two recorded cases on accommodation and dignity:** The owners record two decisions for use as named judicial evidence: the decision in Vikash Kumar against the Union Public Service Commission, which treated reasonable accommodation as a requirement of equality rather than an act of charity, and the decision in Jeeja Ghosh, which connected dignity and non-discrimination to the treatment of a person with disability in air travel; the answer-writing use is that these two cases convert a statutory duty into an enforceable equality claim, so a Mains answer that argues for accommodation should cite the equality framing rather than a welfare framing, and should not extend either holding beyond what the owners record.
16. **The department's own dated prevalence statement:** The Department of Empowerment of Persons with Disabilities landing page, read on 2 September 2026, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others; nothing beyond those recorded statements is claimed, and no certification, registration, reservation-fill, accessibility-compliance or

device-distribution count is asserted.

17. **What a prevalence figure can and cannot prove:** The owners record that the Census 2011 disability estimate rests on self-reporting and a narrow question framing and therefore likely undercounts actual prevalence, and they add that the identity-platform registration counts are dynamic and that a completed 2027 enumeration may later provide updated figures under revised methodologies; the discipline is that a prevalence share converts an absolute count into a rate and makes a representation or budget-share claim meaningful, while a share measured in 2011 by self-report cannot be used as a current denominator or as evidence about the adequacy of any entitlement, so the figure must always be cited with its source, its year and its recorded limitation.
18. **Where the entitlement-to-participation gap actually opens:** The owners locate the gap at four named joints rather than asserting a general implementation failure: reservation seats that remain unfilled because suitable posts are not identified, legacy infrastructure whose retrofitting is expensive and slow with compliance timelines extended more than once, private-sector establishments where the accommodation duty applies but the enforcement mechanism is weaker than for government, and the benchmark threshold itself which excludes persons below forty per cent who nevertheless face significant barriers; naming the joint is what turns a complaint into a diagnosis, and each joint has a different remedy.
19. **Coverage against substantive participation:** The owners separate coverage, which counts how many persons hold certificates or receive scheme benefits, from substantive participation, which measures whether persons with disabilities actually access education, employment and public life on an equal basis, and they state that the second is the true test of a rights-based framework; the owners give a precise illustration of why the distinction is not verbal, namely that an accessible railway coach does not by itself secure mobility if the platform remains inaccessible, so an output can be complete while the journey it was meant to enable remains impossible.
20. **The verified previous-year ownership stated precisely:** The audited 2018-2023 Mains routing ledger routes exactly one General Studies Mains demand to this owner, the 2022 General Studies Paper II question on the Rights of Persons with Disabilities Act, 2016 and sensitisation, directive Comment, ten marks, one hundred and fifty words, with the ledger note that the core route supersedes older Advanced ownership, and the audited 2026 Prelims routing ledger routes exactly one objective demand to this owner on disability rights law, the accessibility mission and the disability development corporation, recording that the 2026 Set-A key held locally is provisional, so that objective demand is covered as taught content and no option, key or inferred answer is recorded for it; the Mains demand is solved here to the repository's examiner-grade standard, and six original Mains questions and eighty original objective questions are added on a strict A -> B -> C -> D rotation.

Persons with Disabilities: CLOSE-OPTION AND ENTITLEMENT TRAPS

- Do not say the 2016 Act specifies seven disability categories, because it specifies twenty-one and the repealed 1995 Act had seven.
- Do not paraphrase the schedule as physical and mental disability, because the statutory list names conditions such as thalassaemia, haemophilia, sickle-cell disease, acid-attack injury and specific learning disabilities.
- Do not treat the list as closed, because the government may notify additional categories.
- Do not equate benchmark disability with disability, because benchmark status is forty per cent or more certified by a medical authority and is what triggers reservation eligibility.
- Do not file disability reservation under Article 16(4), because it is statutory reservation under the 2016 Act and is not governed by the fifty per cent ceiling jurisprudence built around that constitutional mechanism.
- Do not state the reservation percentages the wrong way round, because the Act mandates a minimum of four per cent in government establishments and five per cent in higher-educational institutions.
- Do not reduce reasonable accommodation to physical accessibility, because Section 2(y) covers any necessary and appropriate modification and adjustment, whether physical, procedural, technological or attitudinal.
- Do not drop the burden limb of reasonable accommodation, because the definition excludes modifications imposing a disproportionate or undue burden.
- Do not describe the 2016 Act as medical-model legislation, because it defines disability as impairment in interaction with barriers and is aligned with the convention India ratified in 2007.
- Do not treat universal design and retrofitting as the same concept, because one builds accessibility in from inception and the other adds it to structures built without it.

- Do not say universal design removes the need for individual accommodation, because a specific barrier may survive a well-designed environment.
- Do not present the identity platform as conferring benefits, because it standardises and makes certification portable without guaranteeing access to any entitlement.
- Do not cite the earlier accessibility-campaign label as proof of a separate current programme, because accessibility work has been carried through the implementation scheme for the 2016 Act since March 2024.
- Do not assume the assistive-device scheme reaches a dispersed rural population automatically, because it is implemented in camp mode as well as institutional mode.
- Do not say the 1999 trust statute covers all twenty-one categories, because it covers only autism, cerebral palsy, the statute's term mental retardation, and multiple disabilities.
- Do not merge the grievance authority, the accessibility mission and the development-finance corporation, because the first monitors and hears complaints, the second delivers accessibility work and the third is a credit and livelihood route.
- Do not extend the two recorded decisions beyond what the owners record, because one treats reasonable accommodation as equality rather than charity and the other connects dignity and non-discrimination to air-travel treatment.
- Do not use the 2011 prevalence share as a current denominator, because the owners record that it rests on self-reporting and a narrow question framing and likely undercounts prevalence.
- Do not assert a certification, registration, reservation-fill, accessibility-compliance or device-distribution count, because the verified official page records the department's aim, the dated prevalence statement and the number of statutory disability types and nothing more.
- Do not record an answer letter for the routed 2026 objective demand, because the audited ledger states that the locally held 2026 Set-A key is provisional.

Persons with Disabilities: ANSWER-WRITING SPINE

NAME THE DEPRIVATION OR CLAIM -> IDENTIFY THE RIGHT-HOLDER AND THE DUTY-BEARER
 -> SEPARATE THE CONSTITUTIONAL OR STATUTORY ENTITLEMENT FROM THE SCHEME THAT CARRIES IT
 -> TRACE ADMINISTRATIVE DELIVERY: IDENTIFICATION, ENROLMENT, ACCESS, QUALITY
 -> TEST THE MEASURED OUTCOME AGAINST THE INPUT, NAMING SURVEY, ROUND AND YEAR
 -> SEPARATE INCLUSION ERROR FROM EXCLUSION ERROR AND COVERAGE FROM CAPABILITY
 -> CLOSE WITH A GRADED VERDICT AND AN EXPLICIT INDICATOR OR STATUS CAVEAT

Persons with Disabilities: DATED-INDICATOR AND STATUS BOUNDARY

One live official page was verified for this topic on 2026-09-02. The Department of Empowerment of Persons with Disabilities landing page, read on that date, records that the department in the Ministry of Social Justice and Empowerment aims to facilitate the empowerment of persons with disabilities; that as per Census 2011 the number of persons with disabilities in the country is 2.68 crore, which is 2.21 per cent of the total population of the country; and that as per the Rights of Persons with Disabilities Act, 2016 there are twenty-one types of disabilities, which include locomotor disability, visual impairment, hearing impairment, speech and language disability, intellectual disability, multiple disabilities, cerebral palsy and dwarfism among others. Those statements are used only for what they say, and no certification, registration, reservation-fill, accessibility-compliance, device-distribution, guardianship or expenditure figure is inferred from them. One further official check was attempted on the same date, namely a departmental page for the rights statute itself, which returned a not-found error, so nothing was read or used from it and no secondary summary, coaching site or news report has been treated as an official source. The package therefore relies on that verified page together with the dated official anchors already carried by the repository owners, each cited with its issuing instrument or status date: the Rights of Persons with Disabilities Act, 2016 with its definition of a person with disability as one whose long-term physical, mental, intellectual or sensory impairment, in interaction with barriers, hinders full and effective participation on an equal basis with others; the twenty-one specified categories in its Schedule, expandable by government notification, replacing the seven categories of the repealed Persons with Disabilities Act, 1995; benchmark disability at forty per cent or more certified by a medical authority; the minimum four per cent reservation in government establishments and posts and five per cent in higher-educational institutions for persons with benchmark disabilities, recorded as statutory and distinct from the constitutional mechanism of Article 16(4) and its fifty per cent ceiling jurisprudence; reasonable accommodation as defined in Section 2(y), with the

disproportionate-or-undue-burden limit and with denial recorded as a form of discrimination; the United Nations Convention on the Rights of Persons with Disabilities ratified by India in 2007; the Unique Disability Identity platform as a centralised, nationally portable certification route whose registration counts are recorded as dynamic and are not asserted; the three-pillar accessibility framework covering the built environment, transport and information and communication technology, carried through the Scheme for Implementation of the Rights of Persons with Disabilities Act since March 2024, with harmonised universal-accessibility guidelines and with State and local enforcement and independent access audits still required; the assistive-device scheme delivered in camp mode and institutional mode; the National Trust for the Welfare of Persons with Autism, Cerebral Palsy, Mental Retardation and Multiple Disabilities Act, 1999 covering only those four conditions; the Chief Commissioner and State Commissioners for Persons with Disabilities as complaint and monitoring authorities, kept distinct from the accessibility mission and from the disability development-finance corporation as a credit and livelihood route; the recorded decisions in Vikash Kumar against the Union Public Service Commission and in Jeeja Ghosh; and the recorded status check of 21 July 2026 that identity-platform counts are dynamic and that accessibility claims must be cited with the departmental reporting date and implementation vehicle rather than with a legacy campaign label. No prevalence figure other than the departmental statement of 2.68 crore and 2.21 per cent from Census 2011 is asserted, that figure is carried with its recorded self-reporting and question-framing limitation, no National Family Health Survey, Periodic Labour Force Survey, NITI Aayog or Sustainable Development Goal value is asserted, no legal or constitutional provision is invented or upgraded in status, no judicial holding is extended beyond what the owners record, no accessibility-compliance count or timeline is asserted, and no previous-year option or official answer key is asserted or inferred, the routed 2026 objective demand being covered as taught content because the audited ledger records the locally held Set-A key as provisional.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: Recognition to participation

IMPAIRMENT -> long-term physical, mental, intellectual or sensory
-> IN INTERACTION WITH BARRIERS: physical, attitudinal, institutional
-> RECOGNITION: 21 specified categories; benchmark certification at 40 per cent or more
-> DUTIES: statutory reservation; reasonable accommodation; accessibility standards
TEST -> substantive participation in education, employment and public life
MUST REMEMBER: Disability justice follows equality, dignity, autonomy, accessibility,...

ASCII MASTER FLOW - PANEL 2/12: Category expansion

1995 ACT -> seven recognised categories; repealed
2016 ACT -> twenty-one specified categories in the Schedule
ADDED SCOPE -> thalassaemia, haemophilia, sickle-cell disease, acid-attack victims
ALSO -> specific learning disabilities, multiple sclerosis, Parkinson's disease, dwarfism
OPEN -> the government may notify additional categories

ASCII MASTER FLOW - PANEL 3/12: Threshold and entitlement

STEP 1 -> the Act's definition covers a person with disability without any percentage
STEP 2 -> a medical authority certifies type and extent of disability
STEP 3 -> forty per cent or more is benchmark disability
STEP 4 -> benchmark status triggers reservation eligibility and concessions
LIMIT -> a person below the threshold may still face significant barriers

ASCII MASTER FLOW - PANEL 4/12: Reservation source card

DISABILITY RESERVATION -> statutory, under the 2016 Act
QUANTUM -> minimum four per cent in government establishments and posts
QUANTUM -> minimum five per cent in higher-educational institutions
CASTE RESERVATION -> constitutional, under Article 16(4)
CONSEQUENCE -> the fifty per cent ceiling jurisprudence does not govern the statutory route

ASCII MASTER FLOW - PANEL 5/12: Accommodation test

DEFINITION -> Section 2(y): necessary and appropriate modification and adjustment
PURPOSE -> enjoyment of rights on an equal basis with others
LIMIT -> not imposing a disproportionate or undue burden
SANCTION -> denial of reasonable accommodation is discrimination under the Act
SCOPE -> physical, procedural, technological and attitudinal, not accessibility alone

ASCII MASTER FLOW - PANEL 6/12: Three models

MEDICAL MODEL -> disability located in impairment; attention to cure and rehabilitation
SOCIAL MODEL -> disadvantage located in environments, institutions and attitudes
RIGHTS MODEL -> enforceable equality, autonomy, accessibility, accommodation duties
CONVENTION -> ratified by India in 2007; the 2016 Act gives it domestic effect
RULE -> a recommendation must say which model it operates in
CLOSE DISTINCTION: Impairment is not disability, accessibility is not reasonable...

ASCII MASTER FLOW - PANEL 7/12: Design strategies

UNIVERSAL DESIGN -> accessibility built into the original design from inception
RETROFITTING -> accessibility added to structures built without it
EFFICIENCY -> universal design is more effective and more cost-efficient
REALITY -> retrofitting dominates because of legacy infrastructure
QUALIFICATION -> individual accommodation is still needed where a barrier survives

ASCII MASTER FLOW - PANEL 8/12: Identification platform

BEFORE -> fragmented State-level disability certificates
-> CENTRALISED APPLICATION, CERTIFICATE AND CARD PROCESS
-> NATIONAL PORTABILITY across States
-> FRICTION REMOVED: repeated re-certification
BOUNDARY -> portability is not entitlement; registration counts are dynamic

ASCII MASTER FLOW - PANEL 9/12: Accessibility framework

PILLAR 1 -> built environment: ramps, tactile paths, accessible sanitation
PILLAR 2 -> transport: accessible buses and railway coaches
PILLAR 3 -> information and communication technology: screen readers, accessible websites
VEHICLE -> carried through the implementation scheme for the 2016 Act since March 2024
STANDARDS -> harmonised guidelines; enforcement and access audits remain State and local

ASCII MASTER FLOW - PANEL 10/12: Institutions kept apart

CHIEF COMMISSIONER -> complaints, monitoring of safeguards, remedial recommendations
STATE COMMISSIONERS -> parallel functions at the State level
ACCESSIBILITY MISSION -> delivery of built, transport and technology accessibility work
DEVELOPMENT CORPORATION -> concessional credit and livelihood finance
TRUST STATUTE 1999 -> guardianship and care for four conditions only

ASCII MASTER FLOW - PANEL 11/12: Departmental statement card

AIM -> facilitate the empowerment of persons with disabilities
PREVALENCE -> as per Census 2011, 2.68 crore persons with disabilities
SHARE -> 2.21 per cent of the total population of the country
CATEGORIES -> twenty-one types of disabilities under the 2016 Act
NAMED -> locomotor, visual, hearing, speech and language, intellectual, multiple, dwarfism

ASCII MASTER FLOW - PANEL 12/12: Gap diagnosis

JOINT 1 -> reservation seats unfilled because suitable posts are not identified
JOINT 2 -> legacy infrastructure; retrofitting slow and costly; timelines extended
JOINT 3 -> private establishments; accommodation duty applies but enforcement is weaker
JOINT 4 -> benchmark threshold excludes persons below forty per cent facing real barriers
ILLUSTRATION -> an accessible coach does not secure mobility if the platform is not accessible
EVIDENCE LIMIT: AUTHORITY / IMPLEMENTATION: Use the RPwD Act, UNCRPD status,...
