

1 The significance of political theory lies in control of social life, social criticism and reconstruction, clarification of concepts, and encouragement to mutual respect and toleration (Gauba, PDF pp.21-23).

2 The chapter's basic synthesis is simple: political theory becomes exam-usable only when facts are interpreted through concepts and judged against defensible values.

3 Do not write "political theory ended in the 1950s and was revived in the 1970s" as flat chronology. Cobban, Lipset and Easton(1953) are three distinct claims with different scope, and Easton's own 1969 correction already begins the revival from inside behaviouralism itself, well before the 1970s consolidation Gauba records (Gauba, PDF pp.24-25, 27).

4 Conclusion: political theory as a whole must integrate both components; its significance lies in control of social life, social criticism/reconstruction, concept-clarification and cultivation of mutual respect and toleration (Gauba, PDF pp.21-23).

1

This chapter gives the module's basic vocabulary: what counts as political, what a theory is, and why political theory includes both factual explanation and value-judgment (Gaub, PDF pp.15-18).

2

Positivists and behaviouralists try to restrict valid knowledge to empirical and logical statements, but Gaub rejects the move to expel evaluative inquiry from theory (Gaub, PDF pp.16-17, 23).

3

Dante Germino identified revival with the recovery of political philosophy itself — critical inquiry into right political order, distinct both from reductionist behaviouralism and from ideology; on his reading, detachment is not the same thing as ethical neutrality (Gaub, PDF pp.26-27).

4

Gaub treats political science and political philosophy as complementary, not rival, components of political theory; this is the base for later files on ideology, approaches, power, rights and democracy (Gaub, PDF pp.17-18, 23, 27).

The chapter's basic synthesis is simple: political theory becomes exam-usable only when facts are interpreted through concepts and judged against defensible values.

2

Behaviouralism made political theory unnecessary. -> Even Gauba's summary of post-behaviouralism restores values while preserving scientific method for facts (Gauba, PDF pp.18-19, 23).

3

Theory must include both science and philosophy because public policy needs facts and values together (Gauba, PDF pp.17-18).

4

Easton's own 1969 post-behavioural turn makes the distinction explicit from inside the behavioural camp itself: he called on political science to become practically relevant to a crisis-ridden society and to restore concern with values without discarding scientific method for the study of facts (Gauba, PDF pp.24-25).

Gauba treats political science and political philosophy as complementary, not rival, components of political theory; this is the base for later files on ideology, approaches, power, rights and democracy (Gauba, PDF pp.17-18, 23, 27).

2

Political theory must therefore include both political science and political philosophy: science explains political reality, while philosophy asks what goals and principles should guide collective life (Gauba, PDF pp.17-18).

3

Political science relies on observation, generalization and explanation; political philosophy seeks justification and concept-clarification (Gauba, PDF pp.18-20).

4

In UPSC and PSIR answers, this topic prevents two common errors: reducing theory to moral sermon, or reducing it to data without a judgment on ends.

4

Gauba begins by defining the political as the public sphere of rule-making, authoritative decision and regulation for the whole community (Gauba, PDF pp.15-16).

1

Alfred Cobban described a decline of political theory under both capitalist and communist systems in the mid-twentieth century, yet still insisted that politics required criteria of judgment that narrow social-science methodology alone could not supply (Gaubu, PDF p.25).

2

Dante Germino identified revival with the recovery of political philosophy itself — critical inquiry into right political order, distinct both from reductionist behaviouralism and from ideology; on his reading, detachment is not the same thing as ethical neutrality (Gaubu, PDF pp.26-27).

3

The debate operates on two levels at once: a methodological dispute over what counts as valid evidence (Easton 1953 vs Strauss/Germino), and a civilizational dispute over whether politics can ever avoid argument about ends (Strauss/Germino/Marcuse vs Lipset's "good society already found" thesis). Gauba's closing formula — science strengthens means, philosophy judges ends (Gaubu, PDF

A strong answer can therefore use data to explain unemployment, but it still needs a philosophical yardstick to judge whether a given policy is fair, free or humane.
