EXTRA SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

OPTIONAL ADVANCED ENRICHMENT · WATER PRICING, ELECTRICITY PRICING, PROCUREMENT INCENTIVES AND CROP CHOICE · MICRO-IRRIGATION SAVES WATER AT PLOT LEVEL, BUT BASIN-LEVEL SAVINGS · FORMAL TENANTS MAY GAIN CREDIT AND INSURANCE ACCESS, YET · AREA-YIELD INSURANCE REDUCES INDIVIDUAL VERIFICATION COSTS BUT INTRODUCES BASIS · CLIMATE ADAPTATION REQUIRES STRESS-TOLERANT SEEDS, ADVISORIES, WATER MANAGEMENT · PUBLIC EXTENSION IS A KNOWLEDGE INFRASTRUCTURE CONNECTING RESEARCH WITH · CENTRAL AND STATE IRRIGATION DEPARTMENTS

OPTIONAL SOURCE DEPTH
- CAUTION: Water pricing, electricity pricing, procurement incentives and crop choice form one
- CAUTION: Micro-irrigation saves water at plot level, but basin-level savings require limits on
- CAUTION: Formal tenants may gain credit and insurance access, yet insecure records create
- CAUTION: Area-yield insurance reduces individual verification costs but introduces basis risk.

ADVANCED DEBATE
- CAUTION: Climate adaptation requires stress-tolerant seeds, advisories, water management,
- CAUTION: Public extension is a knowledge infrastructure connecting research with local decision
- Central and state irrigation departments: build and manage major, medium and minor
- NABARD, banks and co-operatives: finance agricultural investment and seasonal

LEGACY / NUANCE
- Agricultural Insurance Company and empanelled insurers: implement crop-insurance
- ICAR, KVKs and state extension systems: provide research, advisories and farm-level
- CAUTION: Drip irrigation can reduce water applied per crop, but total aquifer extraction may
- CAUTION: Free power lowers the pumping cost seen by an individual farmer while accelerating

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.
