EXTRA SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

OPTIONAL ADVANCED ENRICHMENT | MSME INFORMALITY CAN BE AN ADAPTATION TO COMPLIANCE AND | CLUSTER POLICY LOWERS SHARED COSTS FOR TESTING, DESIGN, SKILLING | PLI ADDITIONALITY ASKS WHETHER OUTPUT, INVESTMENT OR TECHNOLOGY WOULD | SEMICONDUCTOR SUPPORT MUST MANAGE LONG GESTATION, TECHNOLOGY OBSOLESCENCE AND | DOMESTIC VALUE ADDITION SHOULD BE MEASURED ACROSS STAGES, NOT | SUPPLIER DEVELOPMENT AND R&D LINKS DETERMINE WHETHER AN ANCHOR | MINISTRY OF MSME AND SIDBI

OPTIONAL SOURCE DEPTH
- CAUTION: MSME informality can be an adaptation to compliance and finance constraints, not simply
- CAUTION: Cluster policy lowers shared costs for testing, design, skilling, effluent treatment
- CAUTION: PLI additionality asks whether output, investment or technology would have occurred
- CAUTION: Semiconductor support must manage long gestation, technology obsolescence and global

ADVANCED DEBATE
- CAUTION: Domestic value addition should be measured across stages, not inferred from final
- CAUTION: Supplier development and R&D links determine whether an anchor investment generates
- Ministry of MSME and SIDBI: support enterprise development, credit and cluster
- RBI-regulated TReDS platforms: facilitate discounting of accepted MSME receivables.

LEGACY / NUANCE
- Line ministries administering PLI schemes: verify sector-specific investment and
- India Semiconductor Mission and MeitY: coordinate semiconductor ecosystem support.
- CAUTION: TReDS finances an accepted invoice; it is not collateral-based machinery finance or a
- CAUTION: Final assembly can expand rapidly while domestic value addition remains low if high

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.
