Union Budget, Fiscal Policy and Deficit Indicators - Learner-v2 Complete Learning Session

Authoring-only generation: 2026-09-03. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-03.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. OCR-searchable local official General Studies papers were used only to confirm printed routed demands. No answer key, marking scheme, unsupported page precision or current macroeconomic statistic was inferred from them.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** Audited ledgers route Mains demands on public expenditure management, Capital versus Revenue Budget and the Fiscal Health Index, plus objective demands on Article 112, capital receipts, deficit computation, recession policy, opportunity cost, household savings and crowding out. Objective answer letters are not inferred.
- **Live-link boundary:** Both live India Budget attempts were blocked with HTTP 403. The package therefore preserves the repository owner's figures only with their exact Union Budget 2026-27 BE and 2025-26 RE labels and does not upgrade them to Actuals.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

LIVE OFFICIAL-SOURCE ATTEMPT LOG

The checks below were made on 2026-09-03. Substantive official text is used only for the proposition it actually supports; binary files, dynamic shells, stubs and undated dashboard snippets are recorded but not converted into current claims.

- <https://www.indiabudget.gov.in/doc/frbm1.pdf> - attempted 2026-09-03; the official PDF returned HTTP 403 to the live fetcher, so no number was extracted from the live attempt and the repository owner's explicitly dated Budget 2026-27 BE and 2025-26 RE figures were retained unchanged.
- <https://www.indiabudget.gov.in/> - attempted 2026-09-03; the official landing page also returned HTTP 403 to the live fetcher.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Economy Basic/Core is answer-complete before optional Advanced depth.
Formula boundary	Formula, numerator, denominator, unit, stock/flow, nominal/real, base year, level/rate and accounting identity are explicit.
Institutional boundary	Constitution, statute, delegated rule, regulator mandate, policy, recommendation, scheme and implementation outcome remain distinct.
Transmission method	Shock or instrument -> prices/quantities/balance sheets/incentives -> institution and market response -> output, employment, distribution, stability and external effect -> lag and trade-off.
Current-data method	Source -> release date -> reference period -> unit/denominator -> provisional/revised/final status; incompatible Budget, Survey or statistical vintages are never mixed.
Programme-status method	Announced -> approved -> notified/guidelines issued -> funded -> operational -> utilised -> output -> outcome are separate stages.
External/WTO method	Agreement text, member category, box, limit, notification, consultation, dispute and ruling are qualified without invented thresholds.
Causal method	Accounting identity, chronology and correlation are not promoted into behavioural or causal claims without mechanism, counterfactual and alternatives.
Answer balance	Model answers balance growth, distribution, stability, sustainability and federal dimensions with India-centric evidence.
Practice contract	Every solved item has demand decoding, a detailed examiner-grade model, executable timed/compression plan, marks rationale and answer-specific improvement.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner: upsc-ai-kit\knowledge\Economy\basic\09_Union-Budget-Fiscal-Policy-and-Deficit-Indicators.md **Substantive canonical provenance owner:** upsc-ai-kit\knowledge\Economy\09_Union-Budget-Fiscal-Policy-and-Deficit-Indicators_Learner-V2-Complete-Topic-Package.md **Optional Advanced owner:** upsc-ai-kit\knowledge\Economy\advanced\09_Union-Budget-Fiscal-Policy-and-Deficit-Indicators.md **Official syllabus mapping:** upsc-ai-kit\knowledge\Economy\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- Every data-heavy table states unit, denominator, geography, reference period and source/status.
- GDP/GVA, gross/net, domestic/national, nominal/real and level/rate distinctions remain exact.
- Monetary, fiscal and external chains state intermediaries, balance-sheet channels, lags, leakages and trade-offs.
- Budget and Economic Survey editions are never mixed; BE, RE, Actual, advance/provisional/revised/final estimates remain labelled.
- Scheme and programme claims distinguish announcement, approval, notification, operation, coverage, utilisation and measured outcome.
- WTO boxes, limits, de minimis, special treatment, notifications and disputes are qualified from authoritative rules.
- PYQ wording is preserved only where verified; reconstructed or routed demands remain labelled.
- **Current-status note, rechecked 2026-09-06:** volatile rates, estimates, scheme status, trade rules and institutional claims retain official source, release date, reference period and revision status.

Generation-local live/current sources:

- <https://www.indiabudget.gov.in/doc/frbm1.pdf> - attempted 2026-09-03; the official PDF returned HTTP 403 to the live fetcher, so no number was extracted from the live attempt and the repository owner's explicitly dated Budget 2026-27 BE and 2025-26 RE figures were retained unchanged.
- <https://www.indiabudget.gov.in/> - attempted 2026-09-03; the official landing page also returned HTTP 403 to the live fetcher.

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - Annual Financial Statement and revenue receipts

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Annual Financial Statement and revenue receipts explains how Annual Financial Statement and Revenue receipts fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Annual Financial Statement and revenue receipts separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Annual Financial Statement and revenue receipts must be read through Annual Financial Statement and Revenue receipts, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Annual
- Financial
- Statement
- revenue

- receipts
- Article

How to use them: Define Annual, Financial, Statement; attach revenue to its named source, period and status; then qualify the answer with this limit: Do not classify all capital receipts as resources without future fiscal cost.

VISUAL FIRST

ANNUAL FINANCIAL STATEMENT AND REVENUE RECEIPTS

01. Annual Financial Statement

|
v

02. Revenue receipts

BOUNDARY -> Do not classify all capital receipts as resources without future fiscal cost.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter.

NAMED EVIDENCE AND MECHANISM

- Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote.
- Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter.

EXAMINER CAUTION

- Do not classify all capital receipts as resources without future fiscal cost.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** State every deficit formula, period, government perimeter and estimate vintage before inference.

MINI RECAP

- **Mechanism chain:** Annual Financial Statement -> Revenue receipts
- **Qualified use:** State every deficit formula, period, government perimeter and estimate vintage before inference.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Annual Financial Statement revenue receipts Article	2. MECHANISM / ARGUMENT connect Annual Financial Statement and Revenue receipts through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST State every deficit formula, period, government perimeter and estimate vintage before inference.	4. UPSC TRAP / ANSWER-USE Do not classify all capital receipts as resources without future fiscal cost.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Annual Financial Statement and revenue receipts converts a precise economic distinction into a qualified conclusion			

SESSION 2 - FOUNDATION - Capital receipts and non-debt receipts

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Capital receipts and non-debt receipts explains how Capital receipts fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Capital receipts and non-debt receipts separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Capital receipts and non-debt receipts must be read through Capital receipts, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Capital
- receipts
- non-debt
- create
- liabilities
- reduce

How to use them: Define Capital, receipts, non-debt; attach create to its named source, period and status; then qualify the answer with this limit: Do not equate zero revenue deficit with zero fiscal deficit.

VISUAL FIRST

CAPITAL RECEIPTS AND NON-DEBT RECEIPTS

01. Capital receipts

BOUNDARY -> Do not equate zero revenue deficit with zero fiscal deficit.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts.

NAMED EVIDENCE AND MECHANISM

- Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts.

EXAMINER CAUTION

- Do not equate zero revenue deficit with zero fiscal deficit.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.

MINI RECAP

- **Mechanism chain:** Capital receipts
- **Qualified use:** Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS

Capital | receipts | non-debt | create | liabilities | reduce

2. MECHANISM / ARGUMENT

connect Capital receipts through accounting, incentives and transmission

3. CONSEQUENCE / CONTRAST

Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.

4. UPSC TRAP / ANSWER-USE

Do not equate zero revenue deficit with zero fiscal deficit.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Capital receipts and non-debt receipts converts a precise economic distinction into a qualified conclusion

SESSION 3 - FOUNDATION - Revenue and capital expenditure

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Revenue and capital expenditure explains how Revenue and capital expenditure fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Revenue and capital expenditure separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Revenue and capital expenditure must be read through Revenue and capital expenditure, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Revenue
- capital
- expenditure
- generally
- supports
- services

How to use them: Define Revenue, capital, expenditure; attach generally to its named source, period and status; then qualify the answer with this limit: Do not call fiscal deficit the stock of total public debt.

VISUAL FIRST

REVENUE AND CAPITAL EXPENDITURE

01. Revenue and capital expenditure

BOUNDARY -> Do not call fiscal deficit the stock of total public debt.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label.

NAMED EVIDENCE AND MECHANISM

- Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label.

EXAMINER CAUTION

- Do not call fiscal deficit the stock of total public debt.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.

MINI RECAP

- **Mechanism chain:** Revenue and capital expenditure
- **Qualified use:** Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS

Revenue | capital | expenditure | generally | supports | services

2. MECHANISM / ARGUMENT

connect Revenue and capital expenditure through accounting, incentives and transmission

3. CONSEQUENCE / CONTRAST

Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.

4. UPSC TRAP / ANSWER-USE

Do not call fiscal deficit the stock of total public debt.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Revenue and capital expenditure converts a precise economic distinction into a qualified conclusion

SESSION 4 - CORE - Revenue-deficit identity

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Revenue-deficit identity explains how Revenue deficit fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Revenue-deficit identity separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Revenue-deficit identity must be read through Revenue deficit, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Revenue-deficit
- identity
- Revenue
- deficit
- equals
- expenditure

How to use them: Define Revenue-deficit, identity, Revenue; attach deficit to its named source, period and status; then qualify the answer with this limit: Do not subtract borrowings as non-debt receipts in the fiscal-deficit identity.

VISUAL FIRST

REVENUE-DEFICIT IDENTITY

01. Revenue deficit

BOUNDARY -> Do not subtract borrowings as non-debt receipts in the fiscal-deficit identity.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Revenue deficit equals revenue expenditure minus revenue receipts.

NAMED EVIDENCE AND MECHANISM

- Revenue deficit equals revenue expenditure minus revenue receipts.

EXAMINER CAUTION

- Do not subtract borrowings as non-debt receipts in the fiscal-deficit identity.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** State every deficit formula, period, government perimeter and estimate vintage before inference.

MINI RECAP

- **Mechanism chain:** Revenue deficit
- **Qualified use:** State every deficit formula, period, government perimeter and estimate vintage before inference.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Revenue-deficit identity Revenue deficit equals expenditure	2. MECHANISM / ARGUMENT connect Revenue deficit through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST State every deficit formula, period, government perimeter and estimate vintage before inference.	4. UPSC TRAP / ANSWER-USE Do not subtract borrowings as non-debt receipts in the fiscal-deficit identity.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Revenue-deficit identity converts a precise economic distinction into a qualified conclusion			

SESSION 5 - CORE - Fiscal-deficit identity

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Fiscal-deficit identity explains how Fiscal deficit fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Fiscal-deficit identity separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Fiscal-deficit identity must be read through Fiscal deficit, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- **Fiscal-deficit**
- **identity**
- **Fiscal**
- **deficit**
- **equals**
- **total**

How to use them: Define Fiscal-deficit, identity, Fiscal; attach deficit to its named source, period and status; then qualify the answer with this limit: Do not merge primary deficit with fiscal deficit or interest payments.

VISUAL FIRST

FISCAL-DEFICIT IDENTITY

01. Fiscal deficit

BOUNDARY -> Do not merge primary deficit with fiscal deficit or interest payments.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.

NAMED EVIDENCE AND MECHANISM

- Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.

EXAMINER CAUTION

- Do not merge primary deficit with fiscal deficit or interest payments.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.

MINI RECAP

- **Mechanism chain:** Fiscal deficit
- **Qualified use:** Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Fiscal-deficit identity Fiscal deficit equals total	2. MECHANISM / ARGUMENT connect Fiscal deficit through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.	4. UPSC TRAP / ANSWER-USE Do not merge primary deficit with fiscal deficit or interest payments.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Fiscal-deficit identity converts a precise economic distinction into a qualified conclusion			

SESSION 6 - CORE - Primary deficit and effective revenue deficit

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Primary deficit and effective revenue deficit explains how Primary deficit and Effective revenue deficit fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Primary deficit and effective revenue deficit separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Primary deficit and effective revenue deficit must be read through Primary deficit and Effective revenue deficit, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Primary
- deficit
- effective

- revenue
- equals
- fiscal

How to use them: Define Primary, deficit, effective; attach revenue to its named source, period and status; then qualify the answer with this limit: Do not treat effective revenue deficit as proof of completed asset creation.

VISUAL FIRST

PRIMARY DEFICIT AND EFFECTIVE REVENUE DEFICIT

01. Primary deficit

|
v

02. Effective revenue deficit

BOUNDARY -> Do not treat effective revenue deficit as proof of completed asset creation.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used.

NAMED EVIDENCE AND MECHANISM

- Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest.
- Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used.

EXAMINER CAUTION

- Do not treat effective revenue deficit as proof of completed asset creation.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.

MINI RECAP

- **Mechanism chain:** Primary deficit -> Effective revenue deficit
- **Qualified use:** Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Primary deficit effective revenue equals fiscal	2. MECHANISM / ARGUMENT connect Primary deficit and Effective revenue deficit through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.	4. UPSC TRAP / ANSWER-USE Do not treat effective revenue deficit as proof of completed asset creation.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Primary deficit and effective revenue deficit converts a precise economic distinction into a qualified conclusion			

SESSION 7 - CORE - Effective capital expenditure

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Effective capital expenditure explains how Effective capital expenditure fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Effective capital expenditure separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Effective capital expenditure must be read through Effective capital expenditure, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- **Effective**
- **capital**
- **expenditure**
- **adds**
- **grants**
- **capital-asset**

How to use them: Define Effective, capital, expenditure; attach adds to its named source, period and status; then qualify the answer with this limit: Do not equate Budget Estimates, Revised Estimates and Actuals.

VISUAL FIRST

EFFECTIVE CAPITAL EXPENDITURE

01. Effective capital expenditure

BOUNDARY -> Do not equate Budget Estimates, Revised Estimates and Actuals.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure.

NAMED EVIDENCE AND MECHANISM

- Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure.

EXAMINER CAUTION

- Do not equate Budget Estimates, Revised Estimates and Actuals.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** State every deficit formula, period, government perimeter and estimate vintage before inference.

MINI RECAP

- **Mechanism chain:** Effective capital expenditure
- **Qualified use:** State every deficit formula, period, government perimeter and estimate vintage before inference.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS Effective capital expenditure adds grants capital-asset	2. MECHANISM / ARGUMENT connect Effective capital expenditure through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST State every deficit formula, period, government perimeter and estimate vintage before inference.	4. UPSC TRAP / ANSWER-USE Do not equate Budget Estimates, Revised Estimates and Actuals.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Effective capital expenditure converts a precise economic distinction into a qualified conclusion			

SESSION 8 - CORE - Budget Estimates, Revised Estimates and Actuals

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Budget Estimates, Revised Estimates and Actuals explains how BE, RE and Actuals fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Budget Estimates, Revised Estimates and Actuals separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Budget Estimates, Revised Estimates and Actuals must be read through BE, RE and Actuals, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Budget
- Estimates
- Revised
- Actuals
- authorisations
- projections

How to use them: Define Budget, Estimates, Revised; attach Actuals to its named source, period and status; then qualify the answer with this limit: Do not infer the whole general-government risk from the Union headline alone.

VISUAL FIRST

BUDGET ESTIMATES, REVISED ESTIMATES AND ACTUALS

01. BE, RE and Actuals

BOUNDARY -> Do not infer the whole general-government risk from the Union headline alone.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable.

NAMED EVIDENCE AND MECHANISM

- Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable.

EXAMINER CAUTION

- Do not infer the whole general-government risk from the Union headline alone.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.

MINI RECAP

- **Mechanism chain:** BE, RE and Actuals
- **Qualified use:** Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Budget Estimates Revised Actuals authorisations projections	2. MECHANISM / ARGUMENT connect BE, RE and Actuals through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.	4. UPSC TRAP / ANSWER-USE Do not infer the whole general-government risk from the Union headline alone.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Budget Estimates, Revised Estimates and Actuals converts a precise economic distinction into a qualified conclusion			

SESSION 9 - CORE - FRBM framework

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: FRBM framework explains how FRBM framework fit into one examinable economic mechanism.

Technical definition: In Economy analysis, FRBM framework separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

FRBM framework must be read through FRBM framework, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- **FRBM**
- **framework**
- **annual**
- **fiscal**
- **statements**
- **impose**

How to use them: Define FRBM, framework, annual; attach fiscal to its named source, period and status; then qualify the answer with this limit: Do not assume every public capex programme automatically crowds in investment.

VISUAL FIRST

FRBM FRAMEWORK

01. FRBM framework

BOUNDARY -> Do not assume every public capex programme automatically crowds in investment.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met.

NAMED EVIDENCE AND MECHANISM

- The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met.

EXAMINER CAUTION

- Do not assume every public capex programme automatically crowds in investment.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.

MINI RECAP

- **Mechanism chain:** FRBM framework
- **Qualified use:** Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS FRBM framework annual fiscal statements impose	2. MECHANISM / ARGUMENT connect FRBM framework through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.	4. UPSC TRAP / ANSWER-USE Do not assume every public capex programme automatically crowds in investment.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: FRBM framework converts a precise economic distinction into a qualified conclusion			

SESSION 10 - CORE - Macro Economic Framework Statement

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Macro Economic Framework Statement explains how Macro Economic Framework Statement fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Macro Economic Framework Statement separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Macro Economic Framework Statement must be read through Macro Economic Framework Statement, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Macro
- Framework
- Statement

- supplies
- growth
- inflation

How to use them: Define Macro, Framework, Statement; attach supplies to its named source, period and status; then qualify the answer with this limit: Do not quote Budget 2026-27 figures without the BE or RE vintage.

VISUAL FIRST

MACRO ECONOMIC FRAMEWORK STATEMENT

01. Macro Economic Framework Statement

BOUNDARY -> Do not quote Budget 2026-27 figures without the BE or RE vintage.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers.

NAMED EVIDENCE AND MECHANISM

- The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers.

EXAMINER CAUTION

- Do not quote Budget 2026-27 figures without the BE or RE vintage.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** State every deficit formula, period, government perimeter and estimate vintage before inference.

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Macro Framework Statement supplies growth inflation	2. MECHANISM / ARGUMENT connect Macro Economic Framework Statement through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST State every deficit formula, period, government perimeter and estimate vintage before inference.	4. UPSC TRAP / ANSWER-USE Do not quote Budget 2026-27 figures without the BE or RE vintage.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Macro Economic Framework Statement converts a precise economic distinction into a qualified conclusion			

SESSION 11 - CORE - Debt anchor, deficit flow and debt stock

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Debt anchor, deficit flow and debt stock explains how Debt anchor and glide path and Deficit and debt coverage fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Debt anchor, deficit flow and debt stock separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Debt anchor, deficit flow and debt stock must be read through Debt anchor and glide path and Deficit and debt coverage, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Debt
- anchor
- deficit
- flow
- stock
- glide

How to use them: Define Debt, anchor, deficit; attach flow to its named source, period and status; then qualify the answer with this limit: Do not classify all capital receipts as resources without future fiscal cost.

VISUAL FIRST

DEBT ANCHOR, DEFICIT FLOW AND DEBT STOCK

01. Debt anchor and glide path

|
v

02. Deficit and debt coverage

BOUNDARY -> Do not classify all capital receipts as resources without future fiscal cost.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability.

NAMED EVIDENCE AND MECHANISM

- The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing.
- A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability.

EXAMINER CAUTION

- Do not classify all capital receipts as resources without future fiscal cost.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.

MINI RECAP

- **Mechanism chain:** Debt anchor and glide path -> Deficit and debt coverage
- **Qualified use:** Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Debt anchor deficit flow stock glide	2. MECHANISM / ARGUMENT connect Debt anchor and glide path and Deficit and debt coverage through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.	4. UPSC TRAP / ANSWER-USE Do not classify all capital receipts as resources without future fiscal cost.

SESSION 12 - CORE - Crowding-out channel

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Crowding-out channel explains how Crowding-out channel fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Crowding-out channel separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Crowding-out channel must be read through Crowding-out channel, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Crowding-out
- channel
- Government
- borrowing
- raise
- interest

How to use them: Define Crowding-out, channel, Government; attach borrowing to its named source, period and status; then qualify the answer with this limit: Do not equate zero revenue deficit with zero fiscal deficit.

VISUAL FIRST

CROWDING-OUT CHANNEL

01. Crowding-out channel

BOUNDARY -> Do not equate zero revenue deficit with zero fiscal deficit.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions.

NAMED EVIDENCE AND MECHANISM

- Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions.

EXAMINER CAUTION

- Do not equate zero revenue deficit with zero fiscal deficit.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.

MINI RECAP

- **Mechanism chain:** Crowding-out channel

- **Qualified use:** Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Crowding-out channel Government borrowing raise interest	2. MECHANISM / ARGUMENT connect Crowding-out channel through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.	4. UPSC TRAP / ANSWER-USE Do not equate zero revenue deficit with zero fiscal deficit.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Crowding-out channel converts a precise economic distinction into a qualified conclusion			

SESSION 13 - CORE SYNTHESIS - Crowding in through public capex

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Crowding in through public capex explains how Crowding-in through capex fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Crowding in through public capex separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Crowding in through public capex must be read through Crowding-in through capex, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Crowding
- through
- public
- capex
- Crowding-in
- capital

How to use them: Define Crowding, through, public; attach capex to its named source, period and status; then qualify the answer with this limit: Do not call fiscal deficit the stock of total public debt.

VISUAL FIRST

CROWDING IN THROUGH PUBLIC CAPEX

01. Crowding-in through capex

BOUNDARY -> Do not call fiscal deficit the stock of total public debt.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution.

NAMED EVIDENCE AND MECHANISM

- Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution.

EXAMINER CAUTION

- Do not call fiscal deficit the stock of total public debt.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** State every deficit formula, period, government perimeter and estimate vintage before inference.

MINI RECAP

- **Mechanism chain:** Crowding-in through capex
- **Qualified use:** State every deficit formula, period, government perimeter and estimate vintage before inference.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Crowding through public capex Crowding-in capital	2. MECHANISM / ARGUMENT connect Crowding-in through capex through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST State every deficit formula, period, government perimeter and estimate vintage before inference.	4. UPSC TRAP / ANSWER-USE Do not call fiscal deficit the stock of total public debt.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Crowding in through public capex converts a precise economic distinction into a qualified conclusion			

SESSION 14 - CORE SYNTHESIS - Off-budget risk and Fiscal Health Index

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Off-budget risk and Fiscal Health Index explains how Off-budget and contingent risk and Fiscal Health Index fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Off-budget risk and Fiscal Health Index separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Off-budget risk and Fiscal Health Index must be read through Off-budget and contingent risk and Fiscal Health Index, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Off-budget
- risk

- Fiscal
- Health
- Index
- contingent

How to use them: Define Off-budget, risk, Fiscal; attach Health to its named source, period and status; then qualify the answer with this limit: Do not subtract borrowings as non-debt receipts in the fiscal-deficit identity.

VISUAL FIRST

OFF-BUDGET RISK AND FISCAL HEALTH INDEX

01. Off-budget and contingent risk

|

v

02. Fiscal Health Index

BOUNDARY -> Do not subtract borrowings as non-debt receipts in the fiscal-deficit identity.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone.

NAMED EVIDENCE AND MECHANISM

- Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget.
- NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone.

EXAMINER CAUTION

- Do not subtract borrowings as non-debt receipts in the fiscal-deficit identity.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.

MINI RECAP

- **Mechanism chain:** Off-budget and contingent risk -> Fiscal Health Index
- **Qualified use:** Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Off-budget risk Fiscal Health Index contingent	2. MECHANISM / ARGUMENT connect Off-budget and contingent risk and Fiscal Health Index through accounting, incentives and transmission	3. CONSEQUENCE / CONTRAST Judge borrowing by expenditure composition, multiplier, financing conditions and debt feedback.	4. UPSC TRAP / ANSWER-USE Do not subtract borrowings as non-debt receipts in the fiscal-deficit identity.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Off-budget risk and Fiscal Health Index converts a precise economic distinction into a qualified conclusion			

SESSION 15 - CORE SYNTHESIS - Black money, household savings and Budget vintage

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Black money, household savings and Budget vintage explains how Black money and household savings and Union Budget 2026-27 vintage fit into one examinable economic mechanism.

Technical definition: In Economy analysis, Black money, household savings and Budget vintage separates the concept and accounting boundary from its unit, coverage, price basis, base year or basket, estimate vintage, institutional or legal source, crop and geography scope, eligibility, implementation stage, stock-flow boundary, transmission channel and distributional or stability consequence.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Black money, household savings and Budget vintage must be read through Black money and household savings and Union Budget 2026-27 vintage, with the formula or legal perimeter stated before the policy inference.

MUST-WRITE KEYWORDS

- Black
- money
- household
- savings
- Budget
- vintage

How to use them: Define Black, money, household; attach savings to its named source, period and status; then qualify the answer with this limit: Do not merge primary deficit with fiscal deficit or interest payments.

VISUAL FIRST

BLACK MONEY, HOUSEHOLD SAVINGS AND BUDGET VINTAGE

01. Black money and household savings

|

v

02. Union Budget 2026-27 vintage

BOUNDARY -> Do not merge primary deficit with fiscal deficit or interest payments.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals.

NAMED EVIDENCE AND MECHANISM

- Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure.
- The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals.

EXAMINER CAUTION

- Do not merge primary deficit with fiscal deficit or interest payments.

EXAM LINK

- **Prelims:** Preserve the exact formula, territorial or resident boundary, price basis, base year, index basket, eligible counterparty, institution and legal status; never upgrade a projection into an actual or a regulatory direction into a universal rule.
- **Mains:** Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.

MINI RECAP

- **Mechanism chain:** Black money and household savings -> Union Budget 2026-27 vintage
- **Qualified use:** Combine fiscal rules with transparent escape clauses, contingent-liability disclosure and outcome scrutiny.

1. TAX AND NON-TAX REVENUE PLUS BORROWING
|
v
2. REVENUE AND CAPITAL EXPENDITURE
|
v
3. DEMAND AND ASSET CREATION
|
v
4. GROWTH, INFLATION AND DISTRIBUTION
|
v
5. DEFICIT AND DEBT DYNAMICS

Core proposition: Judge a budget by revenue quality, expenditure composition, macroeconomic timing, transparency and the debt path-not by the fiscal-deficit number alone.

2. Essential definitions

Concept	Exam-ready meaning
FACT: Revenue receipt	Receipt that neither creates a liability nor reduces a financial asset.
FACT: Capital receipt	Receipt that creates a liability or reduces a financial asset.
FACT: Revenue deficit	Revenue expenditure minus revenue receipts.
FACT: Fiscal deficit	Total expenditure minus non-debt receipts; broadly the borrowing requirement.
FACT: Primary deficit	Fiscal deficit minus interest payments.
FACT: Effective revenue deficit	Revenue deficit minus grants-in-aid given to states/UTs for creation of capital assets; it isolates the genuinely "unproductive" component of the revenue deficit by treating capital-asset-creating grants as productive rather than as ordinary current spending.
FACT: FRBM framework	Rule-based fiscal-discipline architecture requiring medium-term targets, statements and transparency.
FACT: Macro Economic Framework Statement	Budget document explaining the macro assumptions and context in which Budget numbers are to be read.
FACT: Fiscal Health Index	NITI Aayog's multi-dimensional analytical tool for comparing state fiscal performance.

3. Topic mechanism

1. Taxes and non-tax receipts finance part of government expenditure; borrowing finances the residual gap.
2. Revenue expenditure supports current services and transfers, while capital expenditure creates assets or reduces liabilities.
3. The composition of spending affects demand, human capital, infrastructure and private-investment incentives.
4. When government borrowing rises, its effect on interest rates and private credit depends on household financial savings, banking liquidity and macro conditions; this is the crowding-out channel UPSC often tests.
5. Fiscal deficits add to debt, and future interest payments feed back into later budgets.
6. Growth, inflation, interest rates, the primary balance and tax-compliance leakage such as black money jointly shape debt sustainability.

4. Institutions and policy tools

- FACT: **Ministry of Finance**: prepares the Union Budget, borrowing programme and fiscal strategy.
- FACT: **Parliament**: authorises taxation and expenditure through constitutional budget procedures.
- FACT: **FRBM Act, 2003 and annual fiscal statements (including the Macro Economic Framework Statement)**: impose medium-term disclosure discipline on fiscal policy.
- FACT: **N.K. Singh-led FRBM Review Committee**: articulated the debt-anchor and glide-path logic used in Indian fiscal-policy debates.
- FACT: **CAG and parliamentary financial committees**: audit and scrutinise public spending and accounts.
- FACT: **NITI Aayog's Fiscal Health Index**: provides an analytical framework for comparing state-level fiscal quality across dimensions.

5. Indian applications and examples

- FACT: **Claim:** Medium-term fiscal credibility requires a rule-based anchor, not ad hoc annualism. **Named evidence/example:** The FRBM Act, 2003 and the annual FRBM-related statements placed with the Union Budget. **Why it supports the claim:** They force the Budget to disclose strategy, assumptions and deviations, so deficit and debt discussion is embedded in a medium-term framework rather than a single headline number. **Limit / status caution:** Escape clauses, shocks and repeated target resets can weaken credibility if disclosure is incomplete or revisions are frequent.
- FACT: **Claim:** Debt sustainability is better judged by a glide path than by a single-year deficit fetish. **Named evidence/example:** The N.K. Singh-led FRBM Review Committee recommended a debt-anchor approach with an operational glide path for deficits and debt. **Why it supports the claim:** It helps answer why consolidation must be sequenced over time and related to growth and interest conditions, not reduced to one arbitrary annual number. **Limit / status caution:** Committee recommendations are advisory, not self-executing; the path may need recalibration when shocks, inflation or interest rates change.
- FACT: **Claim:** Budget numbers must be read with macro assumptions and document context. **Named evidence/example:** The Annual Financial Statement is read alongside the Macro Economic Framework Statement and other FRBM-related statements in the Union Budget document set. **Why it supports the claim:** This allows an answer to connect tax, expenditure and deficit numbers with growth, inflation and macro assumptions rather than treating the Budget as a mere accounting table. **Limit / status caution:** Budget Estimates can diverge from Revised Estimates and Actuals, so one document set is a starting point, not the final fiscal outcome.
- FACT: **Claim:** Expenditure quality matters as much as the size of the deficit. **Named evidence/example:** Economic Survey 2025-26 highlighted stronger post-pandemic capital expenditure and effective capital expenditure, and the Union Budget 2026-27 places capital expenditure at **Rs 12.22 lakh crore (BE)**. **Why it supports the claim:** It supports the analytical argument that borrowing used for durable asset creation can have different growth consequences from borrowing used for unreformed recurring gaps. **Limit / status caution:** BE figures are authorisations rather than realised outcomes, and multiplier effects depend on execution quality and financing conditions.
- FACT: **Claim:** Budget tax proposals can broaden the base and correct instrument arbitrage, but the resulting rules are date-sensitive and get revised in later Budgets. **Named evidence/example:** Budget 2018 re-introduced **Long-Term Capital Gains (LTCG) tax at 10% on listed-equity/equity-MF gains above Rs 1 lakh a year (without indexation, gains up to 31 January 2018 grandfathered)** and imposed a **10% Dividend Distribution Tax (DDT) on equity-oriented mutual fund dividends**, explicitly to bring parity between growth and dividend options, curb dividend-stripping arbitrage and mobilise revenue from previously untaxed capital-market gains. **Why it supports the claim:** It shows the Budget using tax design (not expenditure) to correct an equity-versus-debt asymmetry and an untaxed-gains anomaly, while accepting transition costs (grandfathering) to protect existing investors. **Limit / status caution:** Both rules changed later and must not be quoted as current law: **DDT on companies and mutual funds was abolished from FY2020-21** (Finance Act, 2020), after which dividends are taxed in the shareholder's/unit-holder's hands at slab rates instead of at the payer level; **LTCG on listed equity/equity-oriented funds was revised by Budget 2024 to 12.5% with the exemption threshold raised to Rs 1.25 lakh**, effective from transactions on or after 23 July 2024 - always state the applicable Budget year before citing a rate.
- FACT: **Claim:** State fiscal quality is multidimensional, not reducible to one deficit ratio. **Named evidence/example:** NITI Aayog's **Fiscal Health Index** uses dimensions such as own revenue mobilisation, quality of expenditure, fiscal prudence and debt sustainability. **Why it supports the claim:** It is a strong analytical example for Mains answers on cooperative or competitive federalism because it compares states through a basket of fiscal capabilities. **Limit / status caution:** Avoid stale or uncertain state-rank claims; rankings vary across years, data periods and methodology.
- FACT: **Claim:** Black money is a fiscal problem, not only a law-enforcement issue. **Named evidence/example:** The **Black Money (Undisclosed Foreign Income and Assets) and Imposition of Tax Act, 2015** and the broader Indian tax-compliance discourse. **Why it supports the claim:** Undisclosed income narrows the declared tax base, distorts resource allocation and weakens transparent budgeting, thereby linking illicit wealth directly to fiscal capacity. **Limit / status caution:** Enforcement alone cannot eliminate informal or illicit flows without wider

administrative reform, information systems and credible compliance architecture.

- FACT: **Claim:** Effective revenue deficit is a distinct, narrower indicator from the plain revenue deficit and answers a specific "is current spending genuinely unproductive" question. **Named evidence/example:** Effective revenue deficit nets grants-in-aid given to states/UTs for creation of capital assets out of the revenue deficit, on the reasoning that although such a grant is booked as revenue expenditure by the Centre, it finances a durable asset at the receiving end. **Why it supports the claim:** It refines the "revenue versus capital expenditure" distinction (Section 6A/6) into a sharper diagnostic that a Budget-analysis or deficit-comparison answer must use instead of quoting the headline revenue deficit alone. **Limit/status caution:** A lower effective revenue deficit does not certify that the underlying capital grant was well-utilised by the recipient state; it only reclassifies the accounting treatment of the transfer, so it must be read alongside actual asset-creation outcomes.
- FACT: **Claim:** The headline Union fiscal-deficit ratio can understate genuine public-sector borrowing risk because some liabilities are kept off the Budget's own balance sheet, and this transparency gap is itself examinable. **Named evidence/example:** Government-guaranteed borrowing by public-sector undertakings, National Small Savings Fund (NSSF)-routed loans (for example, the pre-FY2020-21 practice of financing the Food Corporation of India's food-subsidy bill through NSSF borrowing rather than a direct Budget subsidy), and special-purpose-vehicle or extra-budgetary-resource financing for specific infrastructure or PSU obligations have historically let some public expenditure sit outside the headline fiscal-deficit calculation while still representing a real, contingent claim on future Budgets. **Why it supports the claim:** It grounds why the FRBM framework and CAG/parliamentary scrutiny (Section 4) treat guarantees and off-budget borrowing as a transparency and fiscal-risk question distinct from the headline deficit ratio, and is the precise evidence a "critically examine India's fiscal transparency" answer needs instead of citing the fiscal-deficit number alone. **Limit/status caution:** Union Budgets since FY2021-22 have moved several previously off-budget items (such as FCI's food-subsidy borrowing from NSSF) onto the explicit Budget, improving comparability with earlier years; cite the current stock of contingent liabilities, guarantees or extra-budgetary resources only from a dated CAG or Budget document, not as a fixed historical figure.
- FACT: **Claim:** Household financial savings shape how easily the state can finance deficits internally. **Named evidence/example:** The **National Small Savings Fund** and the broader channel through which deposits, insurance and pension savings enter domestic financial intermediation. **Why it supports the claim:** This links the household side of the savings-investment identity to government internal debt and helps explain why crowding-out pressure changes when household financial savings rise or weaken. **Limit / status caution:** Household savings do not automatically translate into productive intermediation; shifts toward physical assets or precautionary cash can weaken the financial pool available for borrowing.

6A. Limitations and trade-offs

- ANALYSIS: Countercyclical deficits can stabilise recessionary demand, but persistent structural deficits raise the interest burden and future adjustment costs.
- ANALYSIS: Capital expenditure can crowd in private investment when execution is strong, yet heavy borrowing in tight financial conditions can crowd out private credit through interest-rate pressure.
- ANALYSIS: Rule-based fiscal frameworks raise credibility, but overly rigid targets can become pro-cyclical during shocks unless escape clauses are transparent and temporary.
- ANALYSIS: Free or underpriced public provision may serve equity or merit-good goals, but the opportunity cost is the fiscal space not available for alternative public goods or deficit reduction.
- ANALYSIS: Fiscal Health comparisons across states are useful, but headline rankings can hide differences in tax capacity, demography and inherited debt burdens.
- ANALYSIS: Household financial savings are not automatically available for productive financing; shifts toward physical assets or precautionary cash can weaken financial intermediation.
- ANALYSIS: Base-broadening capital-gains taxation raises equity between asset classes, but grandfathering and phased implementation are needed to avoid retroactive shocks to existing investors; abolishing DDT removed double taxation but shifted the compliance and rate burden onto individual shareholders' slab rates.
- ANALYSIS: Off-budget and guaranteed borrowing (PSU guarantees, NSSF-routed loans, extra-budgetary-resource financing) can make the headline fiscal deficit look more contained than the government's genuine contingent exposure; credible fiscal-risk assessment must also check guarantees and

off-budget items disclosed in Budget/CAG documents, not the deficit ratio alone.

6. Must-Know Facts for Prelims

- FACT: The Annual Financial Statement is the constitutional budget statement under Article 112 and is presented with charged and voted expenditure distinctions.
- FACT: Fiscal deficit is not total public debt; it is a flow during a period.
- FACT: In the fiscal-deficit identity, borrowing is excluded from non-debt receipts; recovery of loans and disinvestment are non-debt capital receipts.
- FACT: A Union fiscal-deficit ratio does not describe the whole general government: states, local bodies and public-sector liabilities require separate treatment.
- FACT: Capital expenditure can create assets or reduce liabilities; revenue expenditure generally supports current operations and transfers.
- FACT: Effective capital expenditure adds grants used for capital-asset creation to the Centre's own capital expenditure.
- FACT: Primary deficit indicates the current fiscal gap after excluding past-debt interest burden.
- FACT: Effective revenue deficit nets grants-in-aid given to states/UTs for capital-asset creation out of the revenue deficit, isolating the genuinely unproductive component of current spending from grants that fund a durable asset at the receiving end.
- FACT: Off-budget borrowing, government guarantees and NSSF-routed financing are contingent liabilities that can make the headline fiscal-deficit ratio understate total public-sector risk; recent Budgets have moved several such items (e.g., FCI's food-subsidy financing) on-budget for greater transparency.
- FACT: Quality of expenditure matters alongside the size of the deficit.
- FACT: Budget 2018 introduced 10% LTCG (>Rs 1 lakh, no indexation, gains before 31 Jan 2018 grandfathered) on listed equity/equity funds and a 10% DDT on equity-fund dividends; DDT on companies/funds was **abolished from FY2020-21**, and Budget 2024 revised equity LTCG to **12.5%** with a **Rs 1.25 lakh** exemption from 23 July 2024 - quote the year with the rate.
- FACT: The FRBM framework uses annual statements to impose medium-term transparency; the Macro Economic Framework Statement supplies the macro context in which Budget numbers are interpreted.
- FACT: The N.K. Singh-led FRBM Review Committee explicitly shifted attention toward a debt anchor and glide-path logic rather than a single-point deficit obsession.
- FACT: NITI Aayog publishes the Fiscal Health Index as an analytical tool for state fiscal performance; use its dimensions and purpose, not uncertain rank snippets.
- FACT: Black money erodes the declared tax base and weakens fiscal capacity.
- FACT: Household financial savings affect how much public borrowing can be absorbed domestically without intensifying crowding-out pressures.

7. UPSC traps

- WRONG: All capital receipts are revenue for spending without future cost. -> Borrowing creates liabilities and disinvestment reduces assets.
- WRONG: Zero revenue deficit means zero fiscal deficit. -> Capital expenditure can still require borrowing.
- WRONG: Fiscal deficit is financed only by printing money. -> It is ordinarily financed through market and other borrowing sources.
- WRONG: Every subsidy is wasteful. -> Design, targeting, externalities and opportunity cost determine quality.
- WRONG: Government capital expenditure equals GFCE. -> Capital formation and government final consumption are distinct national-account concepts.
- WRONG: Budget Estimates are the same as realised fiscal outcomes. -> BE, RE and Actuals serve different stages of fiscal reporting.
- WRONG: Black money is separate from fiscal analysis. -> It directly affects the declared tax base, transparency and budget capacity.

- **WRONG:** Household financial savings and government internal debt are unrelated. -> Domestic savings conditions influence the financing environment for public borrowing.
- **WRONG:** The headline fiscal deficit captures the government's full public-sector borrowing risk. -> Off-budget borrowing, guarantees and contingent liabilities (PSU guarantees, NSSF-routed loans, extra-budgetary resources) can leave real exposure understated.

8. CURRENT: Economic Survey 2025-26 / current anchor

- **CURRENT:** Centre revenue receipts averaged 9.1% of GDP in FY22-FY25 versus 8.5% in FY16-FY20.
- **CURRENT:** Centre capital expenditure averaged about 3% of GDP post-pandemic versus 1.7% pre-pandemic.
- **CURRENT:** Effective capital expenditure was 4% of GDP in FY25.

CURRENT: Union Budget 2026-27 (Budget Estimates)

Indicator	Official Budget figure
Fiscal deficit, 2026-27 BE	4.3% of GDP
Fiscal deficit, 2025-26 RE	4.4% of GDP
Capital expenditure, 2026-27 BE	Rs 12.22 lakh crore

FACT: Budget estimates are policy authorisations/projections; they are not the same as Survey trends or realised accounts. Source: Union Budget 2026-27 FRBM statement.

ANALYSIS: Status caution: These figures are current as of Union Budget 2026-27 and should be verified against later Revised Estimates, Actuals and subsequent official Budget documents if used after later revisions.

ANALYSIS: Interpretation caution: Off-budget liabilities, guarantees and delayed payments can make the headline deficit understate public-sector risk.

9. PYQ application

- **ANALYSIS:** 2025 GS-III Fiscal Health Index question highlights expenditure quality, revenue mobilisation, prudence and debt sustainability.
- **ANALYSIS:** 2024 GS-III social-services question requires linking expenditure trends to inclusive outcomes.
- **FACT: 2024 Prelims Q85:** tested Articles 112/113 - the Annual Financial Statement is laid on behalf of the President, and a demand for grant requires the President's recommendation.
- **FACT: 2025 Prelims Q10/Q61/Q65:** directly tested capital-receipt classification, deficit calculation and primary deficit = fiscal deficit - interest payments.
- **ANALYSIS:** Historical PYQs repeatedly demand FRBM/MEFS awareness, recession policy, black-money linkage, capital-versus-revenue classification and household financial savings in the savings-investment identity.
- **Exact stems/options:** . . /README .md routing table and the cited local PYQ files.

10. Mains angles

- **ANALYSIS:** Evaluate fiscal policy on adequacy, composition, multiplier, distribution and sustainability.
- **ANALYSIS:** Use a golden-rule logic cautiously: protect productive capex while improving current-expenditure efficiency.
- **ANALYSIS:** In recession, justify temporary countercyclical support only with clear targeting, reversibility and financing logic.
- **ANALYSIS:** Connect black money, compliance quality and domestic household financial savings to the state's fiscal room and crowding-out risk.
- **ANALYSIS:** Recommend transparent liabilities, outcome budgeting, independent evaluation and credible medium-term consolidation.

Answer thesis: Judge a budget by revenue quality, expenditure composition, macroeconomic timing, transparency and the debt path-not by the fiscal-deficit number alone.

11. Probable questions

- ANALYSIS: **Prelims**: Calculate and distinguish revenue, fiscal and primary deficits from a simplified budget statement.
- ANALYSIS: **Mains (10 marks)**: Why is effective capital expenditure a better indicator of asset-creating support than the Centre's own capex alone?
- ANALYSIS: **Mains (15 marks)**: How can India consolidate fiscally while protecting infrastructure and human-capital expenditure?
- ANALYSIS: **Mains (20 marks)**: Examine whether a rule-based fiscal framework can coexist with countercyclical policy in India.

11A. Answer architecture (10/15/20-mark support)

- ANALYSIS: **Directive decoder - Discuss**: Define the deficit or budget concept briefly, then organise the answer around revenue quality, expenditure composition and debt implications.
- ANALYSIS: **Directive decoder - Examine / Analyse**: Trace the chain from Budget design to borrowing, interest burden, growth effects, crowding-in or crowding-out, and long-term sustainability.
- ANALYSIS: **Directive decoder - Critically examine / Evaluate**: Balance rule-based credibility, capex quality and countercyclical need against off-budget risk, rigid targets, opportunity cost and household-savings constraints.
- ANALYSIS: **Directive decoder - Compare / Justify**: Compare revenue versus capital expenditure, or effective revenue deficit versus the plain revenue deficit, or justify why a debt-glide-path approach is superior to a one-year deficit obsession for this topic; a "compare deficits" answer should also state whether off-budget/contingent liabilities are being counted, since two years can look identical on the headline fiscal-deficit ratio while differing sharply in disclosed guarantees and extra-budgetary borrowing.
- ANALYSIS: **Evidence chain**: Use the FRBM Act framework, the N.K. Singh-led FRBM Review Committee, the Annual Financial Statement plus Macro Economic Framework Statement, the Budget 2018 LTCG/DDT reform and its post-2020/2024 status changes, the Budget 2026-27 capex/deficit evidence, the effective-revenue-deficit and off-budget/contingent-liability unit, the Fiscal Health Index and the NSSF-household-savings linkage.
- ANALYSIS: **Counter-evidence**: Pull balancing material from **6A. Limitations and trade-offs** on crowding-out, opportunity cost, rigid rules, ranking misuse, off-budget/contingent-liability risk and weak financial intermediation.
- ANALYSIS: **10/15/20-mark scaling**: For 10 marks, use a thesis plus 2-3 evidence units; for 15 marks, use 4-5 evidence units with one counter-dimension; for 20 marks, use 5-6 evidence units with full balance on fiscal rules, expenditure quality, financing conditions and conclusion nuance.
- ANALYSIS: **Reasoned verdict template**: India's fiscal stance should be judged not only by the size of the deficit but by whether the borrowing path, expenditure mix and disclosure framework strengthen sustainable growth without eroding future fiscal space.

2026 PYQ Integration

Status: 2026 question-level PYQ demand is integrated into this owner. **Provenance**: Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2026.md. **Answer-key rule**: The 2026 Prelims and CSAT Set-A keys held locally are **provisional**; no option or answer is recorded or inferred in this integration.

- **Year represented**: 2026

- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2026	Prelims GS-I	94	Fiscal-policy crowding-out effect through government borrowing and interest rates	Objective question; provisional 2026 Set-A key present locally, answer not inferred	Provisional 2026 Set-A key present locally (Ans - ■2026- ■GS1- ■Provisional); key is provisional - no answer letter recorded or inferred here	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Fiscal-policy crowding-out effect through government borrowing and interest rates

This block integrates the 2026 examinable demand and paper metadata. It is kept separate from the 2018-2023 and 2024-2025 blocks and does not convert a provisionally-keyed, answer-free objective question into a solved answer.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS3-GS4-2024-2025.md, _PYQ-ROUTING-PRELIMS-2024-2025.md. **Answer-key rule:** The official 2024-2025 Prelims Set-A keys are present in the repository and CSAT Set-A keys are supplied; even so, no option or answer is recorded or inferred in this integration.

- **Years represented:** 2024, 2025
- **Paper(s):** GS-III, Prelims GS-I
- **Routed question demands:** 5

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2024	Prelims GS-I	85	Union Budget - Annual Financial Statement	Objective question; official Set-A key available locally, answer not inferred	Key available locally (official Set-A answer key present); answer not recorded here	Cover the named fact/concept and its likely statement-level distinctions.
2025	GS-III	11	Fiscal Health Index as a tool for state fiscal performance	Explain · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2025	Prelims GS-I	10	Capital receipts; borrowings, disinvestment and interest	Objective question; official Set-A key available locally, answer not inferred	Key available locally (official Set-A answer key present); answer not recorded here	Cover the named fact/concept and its likely statement-level distinctions.
2025	Prelims GS-I	61	Revenue, fiscal and primary deficit computation	Objective question; official Set-A key available locally, answer not inferred	Key available locally (official Set-A answer key present); answer not recorded here	Cover the named fact/concept and its likely statement-level distinctions.
2025	Prelims GS-I	65	Gross primary deficit computation	Objective question; official Set-A key available locally, answer not inferred	Key available locally (official Set-A answer key present); answer not recorded here	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Union Budget - Annual Financial Statement
- Fiscal Health Index as a tool for state fiscal performance

- Capital receipts; borrowings, disinvestment and interest
- Revenue, fiscal and primary deficit computation
- Gross primary deficit computation

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS3-GS4-2018-2023.md, _PYQ-ROUTING-PRELIMS-2018-2023.md.

Answer-key rule: The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2018, 2019, 2020, 2021, 2022
- **Paper(s):** GS-III, Prelims GS-I
- **Routed question demands:** 10

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	GS-III	2	Long-term Capital Gains Tax and Dividend Distribution Tax changes	Comment · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2018	Prelims GS-I	9	FRBM Review Committee debt-GDP ratio recommendations	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2018	Prelims GS-I	47	Opportunity cost when government provides commodity free	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2019	GS-III	12	Public expenditure management challenge in post-liberalization budget making	Clarify · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2020	Prelims GS-I	6	Macro Economic Framework Statement legal mandate FRBM	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2021	GS-III	2	Capital Budget and Revenue Budget distinction and significance	Distinguish · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2021	Prelims GS-I	3	Government policy measures during economic recession	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2021	Prelims GS-I	9	Black money creation impact on Indian economy	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2022	Prelims GS-I	9	Capital expenditure versus revenue expenditure classification	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2022	Prelims GS-I	10	Household financial savings and government internal debt	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Long-term Capital Gains Tax and Dividend Distribution Tax changes
- FRBM Review Committee debt-GDP ratio recommendations
- Opportunity cost when government provides commodity free
- Public expenditure management challenge in post-liberalization budget making
- Macro Economic Framework Statement legal mandate FRBM
- Capital Budget and Revenue Budget distinction and significance
- Government policy measures during economic recession
- Black money creation impact on Indian economy
- Capital expenditure versus revenue expenditure classification

- Household financial savings and government internal debt

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

Semantic-completeness ownership and PYQ control

- **Official syllabus/index and owned core:** The Union Budget records receipts and expenditure under revenue/capital classifications; revenue, fiscal and primary deficits answer different financing questions and must be read with off-budget and contingent-liability risks.
- **Indispensable distinction and prerequisite taxonomy:** Allocation is not release or expenditure, capital receipt is not necessarily asset creation, fiscal deficit is not public debt, primary deficit excludes current interest, and accounting identity is not a growth guarantee.
- **Mechanism, implementation and evidence control:** Use one Budget year and document stage-BE, RE, Actual-consistently; show formula, units and GDP denominator, distinguish Union from general government, and trace multiplier, crowding, inflation, debt dynamics and federal incidence with lags.
- **FACT: Verified current fact (official sources rechecked 5 September 2026):**

Rechecked 6 September 2026 against the listed official publisher or regulator source. Both live India Budget attempts were blocked with HTTP 403. The package therefore preserves the repository owner's figures only with their exact Union Budget 2026-27 BE and 2025-26 RE labels and does not upgrade them to Actuals. Sources:

<https://www.indiabudget.gov.in/doc/frbm1.pdf>; <https://www.indiabudget.gov.in/>

- **ANALYSIS: Analytical inference:** institutional design, allocation, a portal, a registration, a report, a training completion, a disposal count or a ranking can support a causal argument only after authority, capacity, incentives, distribution, implementation, grievance, outcome and alternative explanations are tested.
- **Canonical and cross-owner boundary:** this Economy owner teaches the authority-to-delivery-to-remedy chain. Detailed constitutional doctrine stays with Polity; sector entitlement design stays with Social Justice; macro-fiscal doctrine stays with Economy; ethics theory stays with Ethics. Cross-owner evidence may be routed but is not silently duplicated or re-owned.
- **Four-ledger hostile audit:** literal syllabus, indispensable prerequisites, standard public-administration/economy taxonomy and complete verified PYQ demands were checked for absent concepts, institutions, mechanisms, classifications, exceptions, comparisons, criticisms, current status, answer architecture and dependent artifacts.
- **Verified PYQ ownership, 2018-2026:** Audited ledgers route Mains demands on public expenditure management, Capital versus Revenue Budget and the Fiscal Health Index, plus objective demands on Article 112, capital receipts, deficit computation, recession policy, opportunity cost, household savings and crowding out. Objective answer letters are not inferred.

ECONOMY DEEP-REVIEW CORE CONTROL

- **Must remember:** The Union Budget records receipts and expenditure under revenue/capital classifications; revenue, fiscal and primary deficits answer different financing questions and must be read with off-budget and contingent-liability risks.
- **Close distinction:** Allocation is not release or expenditure, capital receipt is not necessarily asset creation, fiscal deficit is not public debt, primary deficit excludes current interest, and accounting identity is not a growth guarantee.
- **Formula / status / evidence / causal limit:** Use one Budget year and document stage-BE, RE, Actual-consistently; show formula, units and GDP denominator, distinguish Union from general government, and trace multiplier, crowding, inflation, debt dynamics and federal incidence with lags.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Annual Financial Statement?

A. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. B. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. C. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. D. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label.

Answer: A. Explanation: Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q2. Which option preserves the accounting or regulatory boundary of Annual Financial Statement?

A. Revenue deficit equals revenue expenditure minus revenue receipts. B. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. C. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. D. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label.

Answer: B. Explanation: Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q3. Which statement uses Annual Financial Statement without losing its vintage, basket or legal status?

A. Revenue deficit equals revenue expenditure minus revenue receipts. B. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. C. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. D. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.

Answer: C. Explanation: Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q4. Which option avoids the standard UPSC close-option trap about Annual Financial Statement?

A. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. B. Revenue deficit equals revenue expenditure minus revenue receipts. C. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. D. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote.

Answer: D. Explanation: Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q5. Which statement correctly identifies Revenue receipts?

A. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. B. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. C. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. D. Revenue deficit equals revenue expenditure minus revenue receipts.

Answer: A. Explanation: Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q6. Which option preserves the accounting or regulatory boundary of Revenue receipts?

A. Revenue deficit equals revenue expenditure minus revenue receipts. B. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. C. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. D. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.

Answer: B. Explanation: Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q7. Which statement uses Revenue receipts without losing its vintage, basket or legal status?

A. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. B. Revenue deficit equals revenue expenditure minus revenue receipts. C. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. D. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.

Answer: C. Explanation: Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q8. Which option avoids the standard UPSC close-option trap about Revenue receipts?

A. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. B. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. C. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. D. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter.

Answer: D. Explanation: Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q9. Which statement correctly identifies Capital receipts?

A. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. B. Revenue deficit equals revenue expenditure minus revenue receipts. C. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. D. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label.

Answer: A. Explanation: Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. The other options belong

to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q10. Which option preserves the accounting or regulatory boundary of Capital receipts?

A. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. B. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. C. Revenue deficit equals revenue expenditure minus revenue receipts. D. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.

Answer: B. Explanation: Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q11. Which statement uses Capital receipts without losing its vintage, basket or legal status?

A. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. B. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. C. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. D. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest.

Answer: C. Explanation: Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q12. Which option avoids the standard UPSC close-option trap about Capital receipts?

A. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. B. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. C. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. D. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts.

Answer: D. Explanation: Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q13. Which statement correctly identifies Revenue and capital expenditure?

A. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. B. Revenue deficit equals revenue expenditure minus revenue receipts. C. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. D. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.

Answer: A. Explanation: Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q14. Which option preserves the accounting or regulatory boundary of Revenue and capital expenditure?

A. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. B. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. C. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. D. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.

Answer: B. Explanation: Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q15. Which statement uses Revenue and capital expenditure without losing its vintage, basket or legal status?

A. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. B. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. C. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. D. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used.

Answer: C. Explanation: Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q16. Which option avoids the standard UPSC close-option trap about Revenue and capital expenditure?

A. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. B. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. C. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. D. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label.

Answer: D. Explanation: Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q17. Which statement correctly identifies Revenue deficit?

A. Revenue deficit equals revenue expenditure minus revenue receipts. B. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. C. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. D. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used.

Answer: A. Explanation: Revenue deficit equals revenue expenditure minus revenue receipts. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q18. Which option preserves the accounting or regulatory boundary of Revenue deficit?

A. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. B. Revenue deficit equals revenue expenditure minus revenue receipts. C. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. D. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure.

Answer: B. Explanation: Revenue deficit equals revenue expenditure minus revenue receipts. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q19. Which statement uses Revenue deficit without losing its vintage, basket or legal status?

A. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. B. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. C. Revenue deficit equals revenue expenditure minus revenue receipts. D. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure.

Answer: C. Explanation: Revenue deficit equals revenue expenditure minus revenue receipts. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q20. Which option avoids the standard UPSC close-option trap about Revenue deficit?

A. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. B. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. C. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. D. Revenue deficit equals revenue expenditure minus revenue receipts.

Answer: D. Explanation: Revenue deficit equals revenue expenditure minus revenue receipts. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q21. Which statement correctly identifies Fiscal deficit?

A. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. B. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. C. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. D. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used.

Answer: A. Explanation: Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q22. Which option preserves the accounting or regulatory boundary of Fiscal deficit?

A. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. B. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. C. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. D. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure.

Answer: B. Explanation: Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q23. Which statement uses Fiscal deficit without losing its vintage, basket or legal status?

A. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. B. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. C. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. D. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable.

Answer: C. Explanation: Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q24. Which option avoids the standard UPSC close-option trap about Fiscal deficit?

A. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. B. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. C. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. D. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.

Answer: D. Explanation: Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q25. Which statement correctly identifies Primary deficit?

A. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. B. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. C. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. D. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used.

Answer: A. Explanation: Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q26. Which option preserves the accounting or regulatory boundary of Primary deficit?

A. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. B. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. C. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. D. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable.

Answer: B. Explanation: Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q27. Which statement uses Primary deficit without losing its vintage, basket or legal status?

A. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. B. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. C. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. D. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers.

Answer: C. Explanation: Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q28. Which option avoids the standard UPSC close-option trap about Primary deficit?

A. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. B. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. C. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. D. Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest.

Answer: D. Explanation: Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q29. Which statement correctly identifies Effective revenue deficit?

A. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. B. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. C. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. D. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure.

Answer: A. Explanation: Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q30. Which option preserves the accounting or regulatory boundary of Effective revenue deficit?

A. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. B. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. C. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. D. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable.

Answer: B. Explanation: Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q31. Which statement uses Effective revenue deficit without losing its vintage, basket or legal status?

A. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. B. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. C. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. D. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing.

Answer: C. Explanation: Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q32. Which option avoids the standard UPSC close-option trap about Effective revenue deficit?

A. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. B. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. C. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. D. Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used.

Answer: D. Explanation: Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q33. Which statement correctly identifies Effective capital expenditure?

A. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. B. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. C. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. D. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met.

Answer: A. Explanation: Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q34. Which option preserves the accounting or regulatory boundary of Effective capital expenditure?

A. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. B. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. C. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. D. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers.

Answer: B. Explanation: Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q35. Which statement uses Effective capital expenditure without losing its vintage, basket or legal status?

A. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. B. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. C. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. D. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing.

Answer: C. Explanation: Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q36. Which option avoids the standard UPSC close-option trap about Effective capital expenditure?

A. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. B. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. C. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. D. Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure.

Answer: D. Explanation: Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q37. Which statement correctly identifies BE, RE and Actuals?

A. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. B. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. C. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. D. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing.

Answer: A. Explanation: Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q38. Which option preserves the accounting or regulatory boundary of BE, RE and Actuals?

A. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. B. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. C. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. D. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing.

Answer: B. Explanation: Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q39. Which statement uses BE, RE and Actuals without losing its vintage, basket or legal status?

A. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. B. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. C. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. D. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions.

Answer: C. Explanation: Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q40. Which option avoids the standard UPSC close-option trap about BE, RE and Actuals?

A. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. B. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. C. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. D. Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable.

Answer: D. Explanation: Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q41. Which statement correctly identifies FRBM framework?

A. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. B. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. C. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. D. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability.

Answer: A. Explanation: The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q42. Which option preserves the accounting or regulatory boundary of FRBM framework?

A. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. B. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. C. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. D. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability.

Answer: B. Explanation: The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q43. Which statement uses FRBM framework without losing its vintage, basket or legal status?

A. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. B. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. C. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. D. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions.

Answer: C. Explanation: The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q44. Which option avoids the standard UPSC close-option trap about FRBM framework?

A. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. B. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. C. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. D. The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met.

Answer: D. Explanation: The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q45. Which statement correctly identifies Macro Economic Framework Statement?

A. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. B. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. C. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. D. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing.

Answer: A. Explanation: The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q46. Which option preserves the accounting or regulatory boundary of Macro Economic Framework Statement?

A. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. B. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. C. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. D. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution.

Answer: B. Explanation: The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q47. Which statement uses Macro Economic Framework Statement without losing its vintage, basket or legal status?

A. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. B. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. C. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. D. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution.

Answer: C. Explanation: The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q48. Which option avoids the standard UPSC close-option trap about Macro Economic Framework Statement?

A. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. B. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. C. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. D. The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers.

Answer: D. Explanation: The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q49. Which statement correctly identifies Debt anchor and glide path?

A. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. B. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. C. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. D. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability.

Answer: A. Explanation: The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q50. Which option preserves the accounting or regulatory boundary of Debt anchor and glide path?

A. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. B. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. C. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. D. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions.

Answer: B. Explanation: The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q51. Which statement uses Debt anchor and glide path without losing its vintage, basket or legal status?

A. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. B. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. C. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. D. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution.

Answer: C. Explanation: The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q52. Which option avoids the standard UPSC close-option trap about Debt anchor and glide path?

A. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. B. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. C. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. D. The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing.

Answer: D. Explanation: The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q53. Which statement correctly identifies Deficit and debt coverage?

A. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. B. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. C. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. D. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions.

Answer: A. Explanation: A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q54. Which option preserves the accounting or regulatory boundary of Deficit and debt coverage?

A. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. B. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. C. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. D. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution.

Answer: B. Explanation: A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q55. Which statement uses Deficit and debt coverage without losing its vintage, basket or legal status?

A. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. B. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. C. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. D. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget.

Answer: C. Explanation: A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q56. Which option avoids the standard UPSC close-option trap about Deficit and debt coverage?

A. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. B. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. C. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. D. A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability.

Answer: D. Explanation: A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q57. Which statement correctly identifies Crowding-out channel?

A. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. B. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. C. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. D. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget.

Answer: A. Explanation: Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q58. Which option preserves the accounting or regulatory boundary of Crowding-out channel?

A. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. B. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. C. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. D. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone.

Answer: B. Explanation: Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q59. Which statement uses Crowding-out channel without losing its vintage, basket or legal status?

A. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. B. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. C. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. D. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone.

Answer: C. Explanation: Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q60. Which option avoids the standard UPSC close-option trap about Crowding-out channel?

A. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. B. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. C. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. D. Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions.

Answer: D. Explanation: Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q61. Which statement correctly identifies Crowding-in through capex?

A. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. B. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. C. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. D. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone.

Answer: A. Explanation: Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q62. Which option preserves the accounting or regulatory boundary of Crowding-in through capex?

A. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. B. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. C. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. D. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure.

Answer: B. Explanation: Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q63. Which statement uses Crowding-in through capex without losing its vintage, basket or legal status?

A. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. B. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. C. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. D. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals.

Answer: C. Explanation: Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q64. Which option avoids the standard UPSC close-option trap about Crowding-in through capex?

A. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. B. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. C. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. D. Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution.

Answer: D. Explanation: Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q65. Which statement correctly identifies Off-budget and contingent risk?

A. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. B. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. C. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. D. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure.

Answer: A. Explanation: Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q66. Which option preserves the accounting or regulatory boundary of Off-budget and contingent risk?

A. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. B. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. C. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. D. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals.

Answer: B. Explanation: Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q67. Which statement uses Off-budget and contingent risk without losing its vintage, basket or legal status?

A. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. B. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. C. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. D. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote.

Answer: C. Explanation: Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q68. Which option avoids the standard UPSC close-option trap about Off-budget and contingent risk?

A. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. B. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. C. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. D. Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget.

Answer: D. Explanation: Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q69. Which statement correctly identifies Fiscal Health Index?

A. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. B. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. C. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. D. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure.

Answer: A. Explanation: NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q70. Which option preserves the accounting or regulatory boundary of Fiscal Health Index?

A. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. B. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. C. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. D. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter.

Answer: B. Explanation: NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q71. Which statement uses Fiscal Health Index without losing its vintage, basket or legal status?

A. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. B. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. C. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. D. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts.

Answer: C. Explanation: NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q72. Which option avoids the standard UPSC close-option trap about Fiscal Health Index?

A. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. B. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. C. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. D. NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone.

Answer: D. Explanation: NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q73. Which statement correctly identifies Black money and household savings?

A. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. B. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. C. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. D. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals.

Answer: A. Explanation: Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q74. Which option preserves the accounting or regulatory boundary of Black money and household savings?

A. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. B. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. C. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. D. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote.

Answer: B. Explanation: Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q75. Which statement uses Black money and household savings without losing its vintage, basket or legal status?

A. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. B. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. C. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. D. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label.

Answer: C. Explanation: Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q76. Which option avoids the standard UPSC close-option trap about Black money and household savings?

A. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. B. Revenue deficit equals revenue expenditure minus revenue receipts. C. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. D. Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure.

Answer: D. Explanation: Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q77. Which statement correctly identifies Union Budget 2026-27 vintage?

A. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. B. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. C. Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote. D. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts.

Answer: A. Explanation: The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q78. Which option preserves the accounting or regulatory boundary of Union Budget 2026-27 vintage?

A. Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. B. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. C. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. D. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label.

Answer: B. Explanation: The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q79. Which statement uses Union Budget 2026-27 vintage without losing its vintage, basket or legal status?

A. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. B. Revenue deficit equals revenue expenditure minus revenue receipts. C. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. D. Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts.

Answer: C. Explanation: The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

Q80. Which option avoids the standard UPSC close-option trap about Union Budget 2026-27 vintage?

A. Revenue deficit equals revenue expenditure minus revenue receipts. B. Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. C. Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. D. The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals.

Answer: D. Explanation: The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. The other options belong to different measures, vintages, baskets, instruments, institutions or legal perimeters.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Audited ledgers route Mains demands on public expenditure management, Capital versus Revenue Budget and the Fiscal Health Index, plus objective demands on Article 112, capital receipts, deficit computation, recession policy, opportunity cost, household savings and crowding out. Objective answer letters are not inferred.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- ANALYSIS: 2025 GS-III Fiscal Health Index question highlights expenditure quality, revenue mobilisation, prudence and debt sustainability.
- ANALYSIS: 2024 GS-III social-services question requires linking expenditure trends to inclusive outcomes.
- FACT: **2024 Prelims Q85:** tested Articles 112/113 - the Annual Financial Statement is laid on behalf of the President, and a demand for grant requires the President's recommendation.
- FACT: **2025 Prelims Q10/Q61/Q65:** directly tested capital-receipt classification, deficit calculation and primary deficit = fiscal deficit - interest payments.
- ANALYSIS: Historical PYQs repeatedly demand FRBM/MEFS awareness, recession policy, black-money linkage, capital-versus-revenue classification and household financial savings in the savings-investment identity.
- Exact stems/options: . . /README.md routing table and the cited local PYQ files.

2026 PYQ Integration

Status: 2026 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2026.md. **Answer-key rule:** The 2026 Prelims and CSAT Set-A keys held locally are **provisional**; no option or answer is recorded or inferred in this integration.

- **Year represented:** 2026
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2026	Prelims GS-I	94	Fiscal-policy crowding-out effect through government borrowing and interest rates	Objective question; provisional 2026 Set-A key present locally, answer not inferred	Provisional 2026 Set-A key present locally (Ans - ■2026-■GS1-■Provisional); key is provisional - no answer letter recorded or inferred here	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Fiscal-policy crowding-out effect through government borrowing and interest rates

This block integrates the 2026 examinable demand and paper metadata. It is kept separate from the 2018-2023 and 2024-2025 blocks and does not convert a provisionally-keyed, answer-free objective question into a solved answer.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS3-GS4-2024-2025.md, _PYQ-ROUTING-PRELIMS-2024-2025.md. **Answer-key rule:** The official 2024-2025 Prelims Set-A keys are present in the repository and CSAT Set-A keys are supplied; even so, no option or answer is recorded or inferred in this integration.

- **Years represented:** 2024, 2025
- **Paper(s):** GS-III, Prelims GS-I
- **Routed question demands:** 5

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2024	Prelims GS-I	85	Union Budget - Annual Financial Statement	Objective question; official Set-A key available locally, answer not inferred	Key available locally (official Set-A answer key present); answer not recorded here	Cover the named fact/concept and its likely statement-level distinctions.
2025	GS-III	11	Fiscal Health Index as a tool for state fiscal performance	Explain · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2025	Prelims GS-I	10	Capital receipts; borrowings, disinvestment and interest	Objective question; official Set-A key available locally, answer not inferred	Key available locally (official Set-A answer key present); answer not recorded here	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Union Budget - Annual Financial Statement
- Fiscal Health Index as a tool for state fiscal performance
- Capital receipts; borrowings, disinvestment and interest
- Revenue, fiscal and primary deficit computation
- Gross primary deficit computation

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS3-GS4-2018-2023.md, _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2018, 2019, 2020, 2021, 2022
- **Paper(s):** GS-III, Prelims GS-I
- **Routed question demands:** 10

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	GS-III	2	Long-term Capital Gains Tax and Dividend Distribution Tax changes	Comment · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2018	Prelims GS-I	9	FRBM Review Committee debt-GDP ratio recommendations	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2018	Prelims GS-I	47	Opportunity cost when government provides commodity free	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2019	GS-III	12	Public expenditure management challenge in post-liberalization budget making	Clarify · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2020	Prelims GS-I	6	Macro Economic Framework Statement legal mandate FRBM	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2021	GS-III	2	Capital Budget and Revenue Budget distinction and significance	Distinguish · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2021	Prelims GS-I	3	Government policy measures during economic recession	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2021	Prelims GS-I	9	Black money creation impact on Indian economy	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2022	Prelims GS-I	9	Capital expenditure versus revenue expenditure classification	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2022	Prelims GS-I	10	Household financial savings and government internal debt	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Long-term Capital Gains Tax and Dividend Distribution Tax changes
- FRBM Review Committee debt-GDP ratio recommendations
- Opportunity cost when government provides commodity free
- Public expenditure management challenge in post-liberalization budget making
- Macro Economic Framework Statement legal mandate FRBM
- Capital Budget and Revenue Budget distinction and significance
- Government policy measures during economic recession
- Black money creation impact on Indian economy
- Capital expenditure versus revenue expenditure classification

- Household financial savings and government internal debt

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- ANALYSIS: 2025 GS-III Fiscal Health Index question highlights expenditure quality, revenue mobilisation, prudence and debt sustainability.
- ANALYSIS: 2024 GS-III social-services question requires linking expenditure trends to inclusive outcomes.
- FACT: **2024 Prelims Q85**: Articles 112/113 and the President's role in the Annual Financial Statement/demands for grants.
- FACT: **2025 Prelims Q10/Q61/Q65**: capital receipts, deficit identities and gross primary deficit. Exact routing: . . /README . md.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS3-GS4-2018-2023 . md.

- **Years represented:** 2018, 2019, 2021
- **Paper(s):** GS-III
- **Routed question demands:** 3

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement

What this owner must now support

- Long-term Capital Gains Tax and Dividend Distribution Tax changes
- Public expenditure management challenge in post-liberalization budget making
- Capital Budget and Revenue Budget distinction and significance

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2019 GS-III

Demand: Clarify why public expenditure management remains a challenge in post-liberalisation budget making.

Status: Verified routed Mains demand; original model solution, not an official answer.

Model solution: Revenue and capital expenditure: Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. **BE, RE and Actuals:** Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. **Off-budget and contingent risk:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Fiscal Health Index:** NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 1 - 2019 GS-III", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Revenue and capital expenditure: Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. **BE, RE and Actuals:** Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. **Off-budget and contingent risk:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Fiscal Health Index:** NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

Analytical body:

1. **Claim and named evidence:** Demand: Clarify why public expenditure management remains a challenge in post-liberalisation budget making. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
2. **Claim and named evidence:** Status: Verified routed Mains demand; original model solution, not an official answer. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: Revenue and capital expenditure: Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. **BE, RE and Actuals:** Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. **Off-budget and contingent risk:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Fiscal Health Index:** NITI Aayog's Fiscal Health Index compares state fiscal performance across

dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2019 GS-III", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

PYQ DEMAND CARD 2 - 2021 GS-III

Demand: Distinguish the Capital Budget and Revenue Budget and explain their components.

Status: Verified routed Mains demand; original model solution, not an official answer.

Model solution: Revenue receipts: Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. **Capital receipts:** Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. **Revenue and capital expenditure:** Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. **Effective capital expenditure:** Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 2 - 2021 GS-III", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Revenue receipts: Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. **Capital receipts:** Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. **Revenue and capital expenditure:** Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. **Effective capital expenditure:** Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

Analytical body:

1. **Claim and named evidence:** Demand: Distinguish the Capital Budget and Revenue Budget and explain their components. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
2. **Claim and named evidence:** Status: Verified routed Mains demand; original model solution, not an official answer. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: Revenue receipts: Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. **Capital receipts:** Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. **Revenue and capital expenditure:** Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. **Effective capital expenditure:** Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "PYQ DEMAND CARD 2 - 2021 GS-III", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

PYQ DEMAND CARD 3 - 2025 GS-III

Demand: Explain the Fiscal Health Index as a tool for assessing state fiscal performance.

Status: Verified routed Mains demand; original model solution, not an official answer.

Model solution: Deficit and debt coverage: A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. **Fiscal Health Index:** NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. **Black money and household savings:** Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 3 - 2025 GS-III", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Deficit and debt coverage: A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. **Fiscal Health Index:** NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. **Black money and household savings:** Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

Analytical body:

1. **Claim and named evidence:** Demand: Explain the Fiscal Health Index as a tool for assessing state fiscal performance. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
2. **Claim and named evidence:** Status: Verified routed Mains demand; original model solution, not an official answer. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: Deficit and debt coverage: A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability.

Fiscal Health Index: NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone.

Black money and household savings: Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. The answer therefore separates definition, mechanism, evidence and limitation, and does not infer an official model answer or objective key.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "PYQ DEMAND CARD 3 - 2025 GS-III", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish revenue receipts, capital receipts and borrowings. Answer in about 150 words.

Model thesis: Claim: Revenue receipts. **Named evidence/example:** Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Capital receipts. **Named evidence/example:** Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter.

- Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts.

Qualified conclusion: Claim: Revenue receipts. **Named evidence/example:** Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Capital receipts. **Named evidence/example:** Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Demand decoding: The directive **answer** requires a direct position on "Distinguish revenue receipts, capital receipts and borrowings. Answer in about 150 words.", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: Revenue receipts. **Named evidence/example:** Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Capital receipts. **Named evidence/example:** Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Analytical body:

1. **Claim and named evidence:** Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
2. **Claim and named evidence:** Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: Claim: Revenue receipts. **Named evidence/example:** Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Capital receipts. **Named evidence/example:** Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts. **Analysis:** This identifies the

economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "Distinguish revenue receipts, capital receipts and borrowings. Answer in about 150 words.", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Calculate and interpret revenue, fiscal and primary deficits. Answer in about 150 words.

Model thesis: Claim: Revenue deficit. **Named evidence/example:** Revenue deficit equals revenue expenditure minus revenue receipts. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Fiscal deficit. **Named evidence/example:** Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.

Analysis: This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Primary deficit. **Named evidence/example:** Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- Revenue deficit equals revenue expenditure minus revenue receipts.
- Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.
- Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest.

Qualified conclusion: Claim: Revenue deficit. **Named evidence/example:** Revenue deficit equals revenue expenditure minus revenue receipts. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Fiscal deficit. **Named evidence/example:** Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.

Analysis: This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Primary deficit. **Named evidence/example:** Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument

eligibility or legal perimeter rather than generalise beyond the source.

Demand decoding: The directive **answer** requires a direct position on "Calculate and interpret revenue, fiscal and primary deficits. Answer in about 150 words.", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Revenue deficit. **Named evidence/example:** Revenue deficit equals revenue expenditure minus revenue receipts. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Fiscal deficit. **Named evidence/example:** Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Primary deficit. **Named evidence/example:** Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Analytical body:

1. **Claim and named evidence:** Revenue deficit equals revenue expenditure minus revenue receipts. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
2. **Claim and named evidence:** Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
3. **Claim and named evidence:** Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: **Claim:** Revenue deficit. **Named evidence/example:** Revenue deficit equals revenue expenditure minus revenue receipts. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Fiscal deficit. **Named evidence/example:** Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:**

Primary deficit. **Named evidence/example:** Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "Calculate and interpret revenue, fiscal and primary deficits. Answer in about 150 words.", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

ORIGINAL MAINS 3 - 15 MARKS

Question: Explain effective revenue deficit and effective capital expenditure. Answer in about 250 words.

Model thesis: Claim: Effective revenue deficit. **Named evidence/example:** Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Effective capital expenditure. **Named evidence/example:** Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used.
- Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure.

Qualified conclusion: Claim: Effective revenue deficit. **Named evidence/example:** Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Effective capital expenditure. **Named evidence/example:** Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Demand decoding: The directive **explain** requires a direct position on "Explain effective revenue deficit and effective capital expenditure. Answer in about 250...", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: Effective revenue deficit. **Named evidence/example:** Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the

transfer but does not prove the asset was well used. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Effective capital expenditure. **Named evidence/example:** Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Analytical body:

1. **Claim and named evidence:** Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
2. **Claim and named evidence:** Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: **Claim:** Effective revenue deficit. **Named evidence/example:** Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Effective capital expenditure. **Named evidence/example:** Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "Explain effective revenue deficit and effective capital expenditure. Answer in about 250...", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

ORIGINAL MAINS 4 - 15 MARKS

Question: Why must Budget Estimates, Revised Estimates and Actuals be separated? Answer in about 250 words.

Model thesis: **Claim:** BE, RE and Actuals. **Named evidence/example:** Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Macro Economic Framework Statement. **Named evidence/example:** The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Union Budget 2026-27 vintage. **Named evidence/example:** The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable.
- The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers.
- The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals.

Qualified conclusion: **Claim:** BE, RE and Actuals. **Named evidence/example:** Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Macro Economic Framework Statement. **Named evidence/example:** The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Union Budget 2026-27 vintage. **Named evidence/example:** The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

How to improve this answer: For "Why must Budget Estimates, Revised Estimates and Actuals be separated? Answer in about 250...", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate rule-based fiscal consolidation with countercyclical flexibility. Answer in about 300 words.

Model thesis: Claim: FRBM framework. **Named evidence/example:** The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Debt anchor and glide path. **Named evidence/example:** The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Crowding-out channel. **Named evidence/example:** Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Crowding-in through capex. **Named evidence/example:** Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Off-budget and contingent risk. **Named evidence/example:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met.

- The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing.
- Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions.
- Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution.
- Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget.

Qualified conclusion: **Claim:** FRBM framework. **Named evidence/example:** The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Debt anchor and glide path. **Named evidence/example:** The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Crowding-out channel. **Named evidence/example:** Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Crowding-in through capex. **Named evidence/example:** Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Off-budget and contingent risk. **Named evidence/example:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Demand decoding: The directive **evaluate** requires a direct position on "Evaluate rule-based fiscal consolidation with countercyclical flexibility. Answer in about...", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** FRBM framework. **Named evidence/example:** The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Debt anchor and glide path. **Named evidence/example:** The N.K. institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Crowding-in through capex. **Named evidence/example:** Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Off-budget and contingent risk. **Named evidence/example:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Analytical body:

1. **Claim and named evidence:** The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
2. **Claim and named evidence:** The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
3. **Claim and named evidence:** Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
4. **Claim and named evidence:** Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
5. **Claim and named evidence:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: **Claim:** FRBM framework. **Named evidence/example:** The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met. **Analysis:** This identifies the economic mechanism, the relevant institution or

accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Debt anchor and glide path. **Named evidence/example:** The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Crowding-out channel. **Named evidence/example:** Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Crowding-in through capex. **Named evidence/example:** Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Off-budget and contingent risk. **Named evidence/example:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "Evaluate rule-based fiscal consolidation with countercyclical flexibility. Answer in about...", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: Judge India's fiscal stance through composition, transparency and debt sustainability. Answer in about 300 words.

Model thesis: **Claim:** Revenue and capital expenditure. **Named evidence/example:** Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Deficit and debt coverage. **Named evidence/example:** A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Crowding-in through capex. **Named evidence/example:** Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or

financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Off-budget and contingent risk. **Named evidence/example:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Fiscal Health Index. **Named evidence/example:** NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Black money and household savings. **Named evidence/example:** Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Claim -> named evidence -> analysis -> qualification:

- Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label.
- A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability.
- Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution.
- Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget.
- NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone.
- Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure.

Qualified conclusion: **Claim:** Revenue and capital expenditure. **Named evidence/example:** Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Deficit and debt coverage. **Named evidence/example:** A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Crowding-in through capex. **Named evidence/example:** Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Off-budget and contingent risk. **Named evidence/example:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate

vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Fiscal Health Index. **Named evidence/example:** NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Black money and household savings. **Named evidence/example:** Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Demand decoding: The directive **answer** requires a direct position on "Judge India's fiscal stance through composition, transparency and debt sustainability. Answer...", every clause, exact formula/category, institution and policy status, a monetary-fiscal-real-external transmission chain with lags, named Indian evidence, distribution/federal effects, trade-offs and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: **Claim:** Revenue and capital expenditure. **Named evidence/example:** Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Deficit and debt coverage. **Named evidence/example:** A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Crowding-in through capex. **Named evidence/example:** Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Off-budget and contingent risk. **Named evidence/example:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Fiscal Health Index. **Named evidence/example:** NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Black money and household savings. **Named evidence/example:** Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Analytical body:

1. **Claim and named evidence:** Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral

label. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

2. **Claim and named evidence:** A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
3. **Claim and named evidence:** Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
4. **Claim and named evidence:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
5. **Claim and named evidence:** NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.
6. **Claim and named evidence:** Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. **Analysis:** Connect the identity/category and named Indian evidence -> instrument, price, quantity, balance-sheet or incentive channel -> implementation and lag -> growth, employment, distribution, stability, sustainability and federal effect. **Qualification:** State unit/denominator, stock/flow, nominal/real, authority and programme status, source-date-reference period, causal limit, counterfactual, trade-off or residual risk.

Counter-position / limit: An accounting identity, index movement, allocation, rate change, notification, platform count, WTO notification or chronological association cannot alone establish transmission, utilisation, distributional benefit or attributable outcome; test mechanism, lag, counterfactual, data vintage, implementation and external/federal constraints.

Qualified conclusion: Claim: Revenue and capital expenditure. **Named evidence/example:** Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Deficit and debt coverage. **Named evidence/example:** A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Crowding-in through capex. **Named evidence/example:** Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or

financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Off-budget and contingent risk. **Named evidence/example:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Fiscal Health Index. **Named evidence/example:** NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source. **Claim:** Black money and household savings. **Named evidence/example:** Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure. **Analysis:** This identifies the economic mechanism, the relevant institution or accounting boundary, and the effect on output, prices, distribution or financial stability. **Qualification:** The conclusion must retain the stated period, estimate vintage, base year, basket, instrument eligibility or legal perimeter rather than generalise beyond the source.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing definition/identity -> instrument or shock -> transmission -> growth, distribution, stability, sustainability and federal effects; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for unit, denominator, data vintage, legal/programme status, lag, causation and residual-risk checks.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses India-centric evidence and preserves formula, stock-flow, institutional, status, data-vintage, distributional and causal distinctions.

How to improve this answer: For "Judge India's fiscal stance through composition, transparency and debt sustainability. Answer...", replace the weakest catalogue point with one exact formula or classification, named institution/instrument, balance-sheet or incentive channel, lag, measurable outcome, distribution/federal effect and qualification.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Economy | **Tier:** Advanced | **GS Paper:** GS-III + Prelims. **Core area:** Public finance. **Grounded in:** Ramesh Singh, relevant chapters; Economic Survey 2025-26; audited UPSC Economy PYQs (2024-2026 Prelims and 2024-2025 Mains). **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current Survey/current-affairs hook. **Companion:** `../basic/09_Union-Budget-Fiscal-Policy-and-Deficit-Indicators.md`.

1. Architecture

1. tax and non-tax revenue plus borrowing
 - |
 - v
2. revenue and capital expenditure
 - |
 - v
3. demand and asset creation
 - |
 - v
4. growth, inflation and distribution
 - |
 - v
5. deficit and debt dynamics

Analytical claim: Judge a budget by revenue quality, expenditure composition, macroeconomic timing, transparency and the debt path-not by the fiscal-deficit number alone.

2. Concepts and distinctions

Concept	Precise meaning
FACT: Revenue receipt	Receipt that neither creates a liability nor reduces a financial asset.
FACT: Capital receipt	Receipt that creates a liability or reduces a financial asset.
FACT: Revenue deficit	Revenue expenditure minus revenue receipts.
FACT: Fiscal deficit	Total expenditure minus non-debt receipts; broadly the borrowing requirement.
FACT: Primary deficit	Fiscal deficit minus interest payments.

3. Detailed transmission

1. Taxes and non-tax receipts finance part of government expenditure; borrowing finances the residual gap.
2. Revenue expenditure supports current services and transfers, while capital expenditure creates assets or reduces liabilities.
3. The composition of spending affects demand, human capital, infrastructure and private-investment incentives.
4. Fiscal deficits add to debt, and future interest payments feed back into later budgets.
5. Growth, inflation, interest rates and the primary balance jointly determine debt sustainability.

Deeper analytical layers

- ANALYSIS: Fiscal impulse depends on changes in the cyclically relevant stance, not only the headline deficit.
- ANALYSIS: Debt sustainability depends on the interest-growth differential, primary balance, maturity, currency and contingent liabilities.
- ANALYSIS: Public capex can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand.
- ANALYSIS: Off-budget borrowing and guarantees can obscure the full public-sector risk position.
- ANALYSIS: Automatic stabilisers work without fresh decisions, while discretionary policy is designed for a specific shock.
- ANALYSIS: Fiscal rules need credible escape clauses, transparent accounting and a medium-term anchor.

4. Institutional architecture

- FACT: **Ministry of Finance**: prepares the Union Budget, borrowing programme and fiscal strategy.
- FACT: **Parliament**: authorises taxation and expenditure through constitutional budget procedures.
- FACT: **CAG and parliamentary financial committees**: audit and scrutinise public spending and accounts.
- FACT: **FRBM framework and fiscal councils or analytical bodies**: provide medium-term discipline and transparency, though institutional design differs.

5. Indian applications and boundary cases

- ANALYSIS: Borrowing to complete a productive transport network can expand future capacity; borrowing for an unreformed recurring gap may only add debt service.

- ANALYSIS: A grant to a state used to create a capital asset enters effective capital expenditure even though it is a grant in the Union accounts.

- ANALYSIS: A zero primary deficit means current borrowing is entirely explained by interest payments, not that total debt is zero.

6. Limitations and trade-offs

- ANALYSIS: Consolidation supports stability but abrupt cuts during weakness can deepen a slowdown.

- ANALYSIS: Capex has high potential multipliers yet project selection and execution determine returns.

- ANALYSIS: Transfers protect vulnerable households but poorly designed entitlements can crowd out public goods.

- ANALYSIS: Disinvestment may improve allocation but one-off proceeds cannot permanently fix structural deficits.

- ANALYSIS: Borrowing today can build future capacity or shift an unsustainable burden, depending on use and growth.

ANALYSIS: **Boundary condition:** Off-budget liabilities, guarantees and delayed payments can make the headline deficit understate public-sector risk.

7. Must-Know Facts for Advanced Prelims

- FACT: The Annual Financial Statement is constitutionally presented with charged and voted expenditure distinctions.

- FACT: Fiscal deficit is not total public debt; it is a flow during a period.

- FACT: Borrowing is excluded from non-debt receipts; recovery of loans and disinvestment are non-debt capital receipts in the fiscal-deficit identity.

- FACT: Centre, states, local bodies and public enterprises are not interchangeable fiscal coverage; distinguish the Union Budget from general-government risk.

- FACT: Capital expenditure can create assets or reduce liabilities; revenue expenditure generally supports current operations and transfers.

- FACT: Effective capital expenditure adds grants used for capital-asset creation to the Centre's own capital expenditure.

- FACT: Primary deficit indicates the current fiscal gap after excluding past-debt interest burden.

- FACT: Quality of expenditure matters alongside the size of the deficit.

8. Advanced Prelims traps

- WRONG: All capital receipts are revenue for spending without future cost. -> Borrowing creates liabilities and disinvestment reduces assets.

- WRONG: Zero revenue deficit means zero fiscal deficit. -> Capital expenditure can still require borrowing.

- WRONG: Fiscal deficit is financed only by printing money. -> It is ordinarily financed through market and other borrowing sources.

- WRONG: Every subsidy is wasteful. -> Design, targeting, externalities and opportunity cost determine quality.

- WRONG: Government capital expenditure equals GFCE. -> Capital formation and government final consumption are distinct national-account concepts.

9. CURRENT: Survey 2025-26 analytical application

Verified current anchor	Topic-specific analytical use
CURRENT: Centre revenue receipts averaged 9.1% of GDP in FY22-FY25 versus 8.5% in FY16-FY20.	Improved revenue receipts expand fiscal space when gains are durable rather than one-off.
CURRENT: Centre capital expenditure averaged about 3% of GDP post-pandemic versus 1.7% pre-pandemic.	Higher capex can crowd in private investment if projects are well selected and completed.
CURRENT: Effective capital expenditure was 4% of GDP in FY25.	Effective capex captures Union support for asset creation through grants as well as direct capital spending.
CURRENT: Union Budget 2026-27: fiscal deficit 4.3% of GDP (BE), against 4.4% in 2025-26 RE; capex Rs 12.22 lakh crore (BE).	Keep Budget estimates separate from Survey trends and realised accounts; evaluate consolidation alongside expenditure composition.

Source for the Budget row: Union Budget 2026-27 FRBM statement.

10. PYQ-based analytical application

- ANALYSIS: 2025 GS-III Fiscal Health Index question highlights expenditure quality, revenue mobilisation, prudence and debt sustainability.
- ANALYSIS: 2024 GS-III social-services question requires linking expenditure trends to inclusive outcomes.
- FACT: **2024 Prelims Q85**: Articles 112/113 and the President's role in the Annual Financial Statement/demands for grants.
- FACT: **2025 Prelims Q10/Q61/Q65**: capital receipts, deficit identities and gross primary deficit. Exact routing: . . /README . md.

11. Mains-ready framework

Central thesis: Judge a budget by revenue quality, expenditure composition, macroeconomic timing, transparency and the debt path-not by the fiscal-deficit number alone.

1. Define **Revenue receipt** and distinguish it from **Capital receipt**.
2. Revenue expenditure supports current services and transfers, while capital expenditure creates assets or reduces liabilities.
3. Ministry of Finance: prepares the Union Budget, borrowing programme and fiscal strategy.
4. Consolidation supports stability but abrupt cuts during weakness can deepen a slowdown.
5. Recommend transparent liabilities, outcome budgeting, independent evaluation and credible medium-term consolidation.

12. Probable questions

- ANALYSIS: **Prelims**: Calculate and distinguish revenue, fiscal and primary deficits from a simplified budget statement.
- ANALYSIS: **Mains (10 marks)**: Why is effective capital expenditure a better indicator of asset-creating support than the Centre's own capex alone?
- ANALYSIS: **Mains (15 marks)**: How can India consolidate fiscally while protecting infrastructure and human-capital expenditure?

13. Study links

- FACT: Foundation companion:
 . . /basic/09_Union-Budget-Fiscal-Policy-and-Deficit-Indicators . md.
- FACT: 10_Taxation-GST-Finance-Commission-and-Fiscal-Federalism . md - revenue and intergovernmental finance.
- FACT: 18_Infrastructure-PPPs-Logistics-and-Public-Investment . md - capex quality and

crowding-in.

What this owner must now support

- Long-term Capital Gains Tax and Dividend Distribution Tax changes
- Public expenditure management challenge in post-liberalization budget making
- Capital Budget and Revenue Budget distinction and significance

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

CONSOLIDATED REGISTER NOTES

Union Budget, Fiscal Policy and Deficit Indicators: RAPID MEASURE, INSTITUTION AND VINTAGE MAP

1. **Annual Financial Statement:** Article 112 provides for the Union Annual Financial Statement, and the budget procedure keeps charged expenditure distinct from expenditure submitted to vote.
2. **Revenue receipts:** Revenue receipts neither create a liability nor reduce a financial asset and include tax and non-tax revenue within the stated budget perimeter.
3. **Capital receipts:** Capital receipts create liabilities or reduce financial assets; borrowings create liabilities, while recovery of loans and disinvestment are non-debt capital receipts.
4. **Revenue and capital expenditure:** Revenue expenditure generally supports current services and transfers, whereas capital expenditure creates assets or reduces liabilities; classification is accounting-based rather than a moral label.
5. **Revenue deficit:** Revenue deficit equals revenue expenditure minus revenue receipts.

6. **Fiscal deficit:** Fiscal deficit equals total expenditure minus non-debt receipts and broadly indicates the period's borrowing requirement rather than the stock of public debt.
7. **Primary deficit:** Primary deficit equals fiscal deficit minus interest payments and isolates the current fiscal gap after removing the burden of past-debt interest.
8. **Effective revenue deficit:** Effective revenue deficit equals revenue deficit minus grants-in-aid to states or Union Territories for creation of capital assets; it reclassifies the transfer but does not prove the asset was well used.
9. **Effective capital expenditure:** Effective capital expenditure adds grants for capital-asset creation to the Centre's own capital expenditure.
10. **BE, RE and Actuals:** Budget Estimates are policy authorisations or projections, Revised Estimates update the year's expected outcome, and Actuals record realised accounts; the three vintages are not interchangeable.
11. **FRBM framework:** The FRBM Act, 2003 and its annual fiscal statements impose medium-term targets, macro disclosure and deviation reporting rather than a guarantee that every announced path will be met.
12. **Macro Economic Framework Statement:** The Macro Economic Framework Statement supplies the growth, inflation and macro assumptions needed to interpret Budget numbers.
13. **Debt anchor and glide path:** The N.K. Singh-led FRBM Review Committee advanced a debt-anchor and operational glide-path logic; its recommendations are advisory and not self-executing.
14. **Deficit and debt coverage:** A fiscal deficit is a flow for a specified government and period, while debt is a stock; the Union Budget does not by itself capture states, local bodies and every public-sector liability.
15. **Crowding-out channel:** Government borrowing may raise interest rates or absorb financial savings and crowd out private credit, but the effect depends on slack, liquidity, household savings and monetary conditions.
16. **Crowding-in through capex:** Public capital expenditure can crowd in private investment when it removes infrastructure bottlenecks and raises expected demand, subject to project selection and execution.
17. **Off-budget and contingent risk:** Guarantees, extra-budgetary borrowing and delayed payments can understate genuine public-sector risk in the headline fiscal deficit; several historical items have since been moved on-budget.
18. **Fiscal Health Index:** NITI Aayog's Fiscal Health Index compares state fiscal performance across dimensions including revenue mobilisation, expenditure quality, prudence and debt sustainability rather than one ratio alone.
19. **Black money and household savings:** Undisclosed income narrows the declared tax base, while household financial savings influence how much public borrowing can be absorbed domestically without intensifying financing pressure.
20. **Union Budget 2026-27 vintage:** The owner records Union Budget 2026-27 Budget Estimates of a 4.3 per cent fiscal deficit-to-GDP ratio and 12.22 lakh crore rupees of capital expenditure, alongside a 4.4 per cent fiscal-deficit ratio for 2025-26 Revised Estimates; these are dated BE or RE figures, not Actuals.

Union Budget, Fiscal Policy and Deficit Indicators: BASE-YEAR, BASKET, INSTRUMENT AND LEGAL-STATUS TRAPS

- Do not classify all capital receipts as resources without future fiscal cost.
- Do not equate zero revenue deficit with zero fiscal deficit.
- Do not call fiscal deficit the stock of total public debt.
- Do not subtract borrowings as non-debt receipts in the fiscal-deficit identity.
- Do not merge primary deficit with fiscal deficit or interest payments.
- Do not treat effective revenue deficit as proof of completed asset creation.
- Do not equate Budget Estimates, Revised Estimates and Actuals.
- Do not infer the whole general-government risk from the Union headline alone.
- Do not assume every public capex programme automatically crowds in investment.
- Do not quote Budget 2026-27 figures without the BE or RE vintage.

Union Budget, Fiscal Policy and Deficit Indicators: ANSWER-WRITING SPINE

DEFINE THE MEASURE OR INSTITUTION AND FIX ITS COVERAGE

- > STATE FORMULA, PRICE BASIS, BASE YEAR, BASKET OR LEGAL POWER
- > NAME THE PERIOD, ESTIMATE VINTAGE AND ISSUING BODY
- > TRACE THE TRANSMISSION OR ACCOUNTING RECONCILIATION
- > ADD ONE INDIA-SPECIFIC EVIDENCE UNIT AND ITS LIMIT
- > TEST DISTRIBUTION, OUTPUT, PRICE OR FINANCIAL-STABILITY EFFECTS
- > CONCLUDE WITH A GRADED VERDICT, NOT A TIMELESS NUMBER

Union Budget, Fiscal Policy and Deficit Indicators: LIVE-SOURCE AND ESTIMATE-STATUS BOUNDARY

Both live India Budget attempts were blocked with HTTP 403. The package therefore preserves the repository owner's figures only with their exact Union Budget 2026-27 BE and 2025-26 RE labels and does not upgrade them to Actuals.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: Budget receipt fork

REVENUE RECEIPT -> no liability / no asset reduction
CAPITAL RECEIPT -> liability or asset reduction
BORROWING -> debt capital receipt
DISINVESTMENT / LOAN RECOVERY -> non-debt capital receipt
MUST REMEMBER: The Union Budget records receipts and expenditure under revenue/capital...

ASCII MASTER FLOW - PANEL 2/12: Expenditure classification

REVENUE EXPENDITURE -> current service / transfer
CAPITAL EXPENDITURE -> asset or liability reduction
ACCOUNTING CLASS is not a moral verdict
QUALITY depends on design and outcomes

ASCII MASTER FLOW - PANEL 3/12: Deficit identity board

REVENUE DEFICIT = RE - RR
FISCAL DEFICIT = TOTAL EXPENDITURE - NON-DEBT RECEIPTS
PRIMARY DEFICIT = FD - INTEREST
KEEP flow, period and government perimeter

ASCII MASTER FLOW - PANEL 4/12: Effective measures

ERD = REVENUE DEFICIT - CAPITAL-ASSET GRANTS
EFFECTIVE CAPEX = CENTRE CAPEX + CAPITAL-ASSET GRANTS
TRANSFER accounting is refined
OUTCOME quality still needs verification

ASCII MASTER FLOW - PANEL 5/12: Estimate-vintage rail

BUDGET ESTIMATE -> authorisation / projection
REVISED ESTIMATE -> updated in-year expectation
ACTUAL -> realised account
NEVER compare without labels

ASCII MASTER FLOW - PANEL 6/12: Constitutional document stack

ARTICLE 112 -> Annual Financial Statement
FRBM ACT -> medium-term fiscal discipline
MEFS -> macro assumptions
PARLIAMENT + CAG -> authorisation and scrutiny
CLOSE DISTINCTION: Allocation is not release or expenditure, capital receipt is not...

ASCII MASTER FLOW - PANEL 7/12: Debt-dynamics chain

PRIMARY BALANCE + INTEREST
-> FISCAL DEFICIT
-> DEBT STOCK
-> FUTURE INTEREST FEEDBACK

ASCII MASTER FLOW - PANEL 8/12: Crowding fork

BORROWING DURING TIGHT FINANCE
-> rates / savings pressure -> crowding out
CAPEX REMOVES BOTTLENECKS
-> productivity / demand -> crowding in

ASCII MASTER FLOW - PANEL 9/12: Hidden-risk perimeter

HEADLINE DEFICIT
+ GUARANTEES
+ EXTRA-BUDGETARY BORROWING
+ DELAYED PAYMENTS -> wider fiscal risk

ASCII MASTER FLOW - PANEL 10/12: State fiscal quality

OWN-REVENUE MOBILISATION
EXPENDITURE QUALITY
FISCAL PRUDENCE
DEBT SUSTAINABILITY

ASCII MASTER FLOW - PANEL 11/12: Budget 2026-27 status card

2026-27 BE -> fiscal deficit 4.3% GDP
2026-27 BE -> capex Rs 12.22 lakh crore
2025-26 RE -> fiscal deficit 4.4% GDP
STATUS -> BE / RE, not Actuals

ASCII MASTER FLOW - PANEL 12/12: Fiscal-policy answer spine

DEFINE identities and coverage
CHECK BE / RE / Actual vintage
ASSESS composition and multiplier
CONCLUDE on debt path and transparency
EVIDENCE LIMIT: FORMULA / STATUS / CAUSATION: Use one Budget year and document stage–BE,...
