

ASCII MASTER FLOW – PANEL 1/12: Drought identity firewall

ARIDITY -> persistent climatic moisture condition

DROUGHT -> temporary deficit relative to local expectation

SCARCITY -> supply-demand-access condition

DISASTER -> serious disruption beyond coping capacity

ASCII MASTER FLOW – PANEL 2/12: Drought-family matrix

METEOROLOGICAL -> precipitation

AGRICULTURAL -> soil moisture / crop water

HYDROLOGICAL -> rivers reservoirs lakes aquifers

SOCIOECONOMIC / ECOLOGICAL -> services-livelihoods / ecosystems

ASCII MASTER FLOW – PANEL 3/12: Slow-onset cascade

RAINFALL DEFICIT -> SOIL-MOISTURE STRESS

-> STORAGE / GROUNDWATER DECLINE

-> CROP ECOSYSTEM LIVELIHOOD AND HEALTH EFFECTS

LAGS DIFFER -> MONITOR EACH STAGE

ASCII MASTER FLOW – PANEL 4/12: Declaration dashboard

RAINFALL + VEGETATIVE INDICES

CROP-SOWING PROGRESSION + SOIL MOISTURE

HYDROLOGICAL INDICES

GRADE STATUS -> DO NOT INVENT ONE CUT-OFF

ASCII MASTER FLOW – PANEL 5/12: Heat hazard-to-harm chain

IMD HAZARD CLASSIFICATION

+ HUMIDITY / RADIATION / WIND / HOT NIGHT

+ WORK / HEALTH / HOUSING / WATER / COOLING

= HEAT STRESS AND UNEQUAL HARM

ASCII MASTER FLOW – PANEL 6/12: Wet-bulb firewall

DRY-BULB -> ambient air temperature

WET-BULB -> evaporative-cooling potential

IMD HEAT WAVE -> operational meteorological criteria

TRAP -> NONE IS A UNIVERSAL PERSON-SAFE THRESHOLD

ASCII MASTER FLOW – PANEL 7/12: Heat Action Plan rail

- 1 SEASONAL RISK AND RESPONSIBILITY MAP
- 2 FORECAST / WARNING AND PUBLIC MESSAGE
- 3 WATER COOLING WORK SCHOOL AND HEALTH ACTION
- 4 REVIEW REACH EQUITY AND OUTCOMES

ASCII MASTER FLOW – PANEL 8/12: Water-agriculture portfolio

DRINKING WATER + DEMAND MANAGEMENT
GROUND / SURFACE WATER MONITORING
WATERSHED RECHARGE STORAGE GOVERNANCE
CROP LIVESTOCK LIVELIHOOD CONTINGENCY

ASCII MASTER FLOW – PANEL 9/12: Urban-labour-health matrix

BUILT FORM -> cool roof shade ventilation trees

LABOUR -> timing rest water communication

HEALTH -> surveillance triage referral continuity

ACCESS -> poor housing informal work vulnerable groups

ASCII MASTER FLOW – PANEL 10/12: Compound-risk web

DROUGHT -> WATER / CROP / POWER PRESSURE

HEAT -> HEALTH / LABOUR / COOLING DEMAND

DRY FUEL -> FIRE RISK

FEEDBACK -> DEEPER LIVELIHOOD AND SERVICE STRESS

MUST REMEMBER: Drought and heat are slow-onset or compounding risks shaped by...

ASCII MASTER FLOW – PANEL 11/12: Early action or maladaptation

FORECAST + VULNERABILITY SIGNAL?

YES -> EARLY WATER HEALTH LABOUR LIVELIHOOD ACTION

TEST -> ENERGY WATER LAND ACCESS MAINTENANCE

FAIL TEST -> MALADAPTATION / TRANSFERRED RISK

CLOSE DISTINCTION: Meteorological drought is not agricultural or hydrological drought;...

ASCII MASTER FLOW – PANEL 12/12: Slow-onset answer spine

DISTINGUISH ARIDITY SCARCITY AND DROUGHT TYPES

TRACE LAGS + MONITOR MULTIPLE INDICATORS

SEPARATE HEAT HAZARD FROM STRESS AND EXPOSURE

DESIGN EARLY ACTION + TEST EQUITY MALADAPTATION OUTCOME

EVIDENCE LIMIT: MECHANISM / STATUS / CAUSATION: Preserve IMD threshold, station/region,...
