

ASCII MASTER FLOW – PANEL 1/12: Sultanate thematic chronology

13th c. -> consolidation through court, iqta and inherited local structures

1296-1316 -> Alauddin tightens revenue, cavalry and market supervision

1320s-1351 -> sharing, assessment, cash demands and high-risk experiments

1351-1388 -> canals, karkhanas, elite conciliation and hereditary drift

15th c. -> weaker Delhi control and stronger regional landed interests

RULE: institutions changed by reign, region, distance and enforcement capacity.

MUST REMEMBER: Iqta, muqti, kharaj, jizya and central diwans must be matched to their precise fiscal-administrative functions.

ASCII MASTER FLOW – PANEL 2/12: State formation as a layered network

SULTAN / COURT -> sovereignty, appointments, campaign direction

CENTRAL DEPARTMENTS -> finance, army, correspondence and intelligence

IQTADARS / GOVERNORS -> troops, collection and provincial bargaining

KHUTS / MUQADDAMS / CHIEFS -> village access, information and mediation

CULTIVATORS / ARTISANS -> production, labour and taxable surplus

VERDICT: coercive at nodes, negotiated across the countryside.

ASCII MASTER FLOW – PANEL 3/12: Central departments with chronology caution

DIWAN-I-WIZARAT -> finance, accounts and revenue supervision

DIWAN-I-ARZ -> army review, horses, equipment and recruitment

DIWAN-I-INSHA -> royal correspondence and chancery practice

BARID NETWORK -> intelligence, reports and communication

SADR / QAZI FUNCTIONS -> grants, law and religious authority

CAUTION: portfolios and practical power were not identical in every reign.

ASCII MASTER FLOW – PANEL 4/12: Iqta fiscal-military flow

CROWN ASSIGNS REVENUE CLAIM -> MUQTI / IQTADAR COLLECTS

|

authorised salary + troops + local administration

|

accounts and audit -> surplus expected for the centre

|

transfer restrains local roots; weak control encourages heredity

RULE: assignment of revenue was not unrestricted ownership of land.

ASCII MASTER FLOW – PANEL 5/12: Revenue and local hierarchy

AGRARIAN OUTPUT -> assessment through law, custom and state demand
LOCAL ELITES -> khuts, muqaddams, chaudhris, chiefs and accountants
ALAUDDIN -> measurement, khalisa expansion and pressure on privileges
TUGHLAQ VARIANTS -> sharing, standard yields, canals and changing incidence
OUTCOME -> stronger surplus claims but uneven burden, flight and resistance
METHOD: separate nominal rate, collection practice and cultivator experience.

ASCII MASTER FLOW – PANEL 6/12: Army, logistics and urban regulation

HORSES / REMOUNTS -> import routes, branding, inspection and fodder

CASH SALARIES -> coin supply, price conditions and treasury capacity

FORTS / ROADS -> frontier defence, messengers and grain movement

MARKET OVERSIGHT -> weights, supplies, intelligence and punishment

KOTWAL / QAZI -> policing and judicial plurality in towns

LESSON: military power rested on fiscal, commercial and informational systems.

ASCII MASTER FLOW – PANEL 7/12: Agrarian surplus and irrigation

RAIN + WELLS + LIFTS + CANALS -> variable cultivation capacity

|

grain and cash crops -> village consumption + dues + marketable surplus

|

state, iqta holder and intermediaries compete over extraction

|

town demand and armies grow, while famine and harsh collection expose risk

CAUTION: public works did not distribute gains equally.

ASCII MASTER FLOW – PANEL 8/12: Coinage and monetisation evidence

TANKA / JITTAL -> units and denominations in an expanding money economy
GOLD / SILVER / COPPER -> metal range, scarcity and regional variation
MINTS / LEGENDS -> authority, titles and public monetary claims
CASH REVENUE / SALARY -> links countryside, treasury, army and merchants
RBI PAGE -> official museum synthesis, not a complete price or welfare series
VERDICT: monetisation expanded unevenly; barter and payment in kind persisted.

ASCI MASTER FLOW – PANEL 9/12: Urban craft and technology circuit

COURT + ARMY + MERCHANT DEMAND

|

DELHI / DAULATABAD / MULTAN / CAMBAY and smaller qasbas

|

textiles + paper + metal + leather + building crafts + royal karkhanas

|

spinning wheel, carder's bow, improved looms, mortar and water lifting

RESULT: greater output and specialisation without equal gains for labour.

ASCII MASTER FLOW – PANEL 10/12: Trade, transport and credit

VILLAGE PRODUCERS -> banjaras and local markets -> inland towns

MULTANIS / SAHS / BROKERS -> advances, exchange and merchant finance

HUNDIS -> transfer and credit across distance

CAMBAY / BENGAL PORTS -> Indian Ocean exchange and textile exports

HORSE IMPORTS -> military demand links coast, merchants and court

LIMIT: route activity does not prove uniform prosperity or state control.

CLOSE DISTINCTION: An iqta was not automatically private ownership or hereditary property across every reign and region.

ASCII MASTER FLOW – PANEL 11/12: Social differentiation without static blocs

NOBLES / ULEMA -> status, office, grants and internal hierarchy

MERCHANTS / ARTISANS -> wealth at the top, insecurity lower down

RURAL GROUPS -> chiefs, privileged intermediaries, peasants and labourers

HINDU / MUSLIM COMMUNITIES -> conflict, interaction and differentiated mobility

SLAVERY / GENDER -> household, military and productive roles under coercion

RULE: avoid timeless census boxes and single-cause conversion claims.

EVIDENCE LIMIT: Administrative ideals, chronicler prescriptions and uneven local practice must remain analytically separate.

ASCII MASTER FLOW – PANEL 12/12: Topic 07 evidence and answer spine

OPEN -> changing military-fiscal state, centralising in aspiration

ADMIN -> court + departments + iqta + local intermediaries

ECONOMY -> agrarian surplus + money + towns + crafts + trade

SOCIETY -> layered elites, labour, caste, community, slavery and gender

METHOD -> chroniclers + travellers + coins + inscriptions + monuments

CLOSE -> negotiated in practice, regionally uneven and socially unequal.
