

ASCII MASTER FLOW – PANEL 1/12: Deccan political chronology

c. 1336 -> conventional Vijayanagara foundation anchor

1347 -> Bahmani kingdom established under Alauddin Hasan Bahman Shah

1420s-40s -> Deva Raya II strengthens Vijayanagara military adaptation

1425 -> Bahmani capital shifts from Gulbarga to Bidar

1509-29 -> Krishnadeva Raya and Tuluva apogee

1565 -> Talikota destroys the capital fabric; Aravidu power continues.

MUST REMEMBER: Vijayanagara-Bahmani rivalry joined doab, basin, coast, ports and horse supply;
it was not a communal binary.

ASCII MASTER FLOW – PANEL 2/12: Three contested zones

TUNGABHADRA DOAB -> fertile frontier, forts and recurring campaigns

KRISHNA-GODAVARI -> agrarian basin, routes and eastern-coast connections

KONKAN-GOA -> ports, customs, horse imports and western maritime access

|

REVENUE + CAVALRY + LOGISTICS + PRESTIGE

RULE: political geography explains more than a Hindu-Muslim binary.

ASCII MASTER FLOW – PANEL 3/12: Foundation and evidence ladder

INSCRIPTIONS -> rulers, grants and dated claims | selective formulae

ARCHAEOLOGY -> settlement, water and buildings | cannot recover every motive

TRAVELLERS -> observed city and court | perspective, genre and exaggeration

LATER TRADITIONS -> remembered origins | chronology and political use require care

SAFE OPENING -> c. 1336 is conventional; founder biographies remain debated.

ASCII MASTER FLOW – PANEL 4/12: Vijayanagara dynastic sequence

SANGAMA -> early consolidation and Deccan rivalry

|

SALUVA -> military intervention amid succession pressure

|

TULUVA -> Krishnadeva Raya, campaigns and cultural patronage

|

ARAVIDU -> continuation after the 1565 capital catastrophe

LESSON: dynastic replacement did not automatically erase the state.

ASCII MASTER FLOW – PANEL 5/12: Water, capital and agrarian capacity

TUNGABHADRA LANDSCAPE + TANKS + CANALS

|

cultivation + urban supply + ritual water + military provisioning

|

taxable surplus + metropolitan density + resilience

|

STATE CAPACITY, but benefits and control remained socially unequal

UNESCO bridge: hydraulic remains support integration, not a welfare census.

ASCII MASTER FLOW – PANEL 6/12: Amaram and nayaka bargain

RULER ASSIGNS REVENUE CLAIM / TERRITORIAL COMMAND

|

NAYAKA maintains troops, remits obligations and governs locally

|

service produces military reach but also entrenches regional power

|

weak centre -> hereditary drift, bargaining and later nayaka polities

CAUTION: comparison with iqta is functional, not an equation.

ASCII MASTER FLOW – PANEL 7/12: Horse-port-military chain

WEST ASIAN HORSE SUPPLY -> PORTS / MERCHANTS / CUSTOMS

|

GOA / BHATKAL / KONKAN ROUTES -> inland movement and payment

|

cavalry recruitment + archery + commanders + fodder and remounts

|

competitive adaptation by Vijayanagara and Deccan states

RULE: imported horses mattered, but did not alone decide wars.

ASCI MASTER FLOW – PANEL 8/12: Hampi urban system

LANDSCAPE -> river, boulders, plains and defended approaches

SACRED -> temples, processions, tanks and continuing ritual

ROYAL -> enclosures, audience spaces, stables and elite display

COMMERCIAL -> bazaars, craft production and suburban settlements

HYDRAULIC -> channels, wells, tanks and agricultural support

VERDICT: capital, market, ritual and ecology formed one system.

ASCII MASTER FLOW – PANEL 9/12: Bahmani state and capital shift

1347 GULBARGA -> foundation, frontier command and early consolidation

|

1425 BIDAR -> revised strategic centre and courtly-cultural investment

|

TARAFS -> provincial command, revenue and military resources

|

late 15th c. -> stronger factions and successor-state formation

TRAP: capital shift is not the same event as dynastic foundation.

ASCII MASTER FLOW – PANEL 10/12: Mahmud Gawan reform logic

LARGE TARAFLANDS + POWERFUL GOVERNORS + ELITE RIVALRY

|

more provinces + forts under tighter control + khalisa enlargement

|

measurement, cash expectations and central checks

|

greater intended control -> factional resistance -> Gawan's execution

LESSON: sound design can fail without a durable governing coalition.

CLOSE DISTINCTION: Vijayanagara amaram/nayaka service and Bahmani taraf administration are comparable but not identical institutions.

ASCII MASTER FLOW – PANEL 11/12: Deccani-Afaqi coalition problem

DECCANIS -> longer-settled regional Muslim elites and allies

AFAQIS -> newer western and Central Asian migrants and networks

COMPETITION -> office, patronage, military command and court access

CROSS-CUTTING TIES -> marriage, language, service and local alliance

OUTCOME -> factional labels structure politics but are not racial absolutes

TRAP: do not turn elite rivalry into a timeless communal conflict.

EVIDENCE LIMIT: Talikota (1565) was a destructive turning point, not the instantaneous extinction of all Vijayanagara authority.

ASCII MASTER FLOW – PANEL 12/12: Topic 09 answer spine

OPEN -> connected Deccan field organised by resources and routes

VIJAYANAGARA -> water + capital + amaram + cavalry + maritime diplomacy

BAHMANI -> capitals + tarafs + Gawan reform + factional coalition

EVIDENCE -> inscriptions + archaeology + travellers + monuments

TURNING POINT -> 1565 destroys Hampi fabric, not every political network

CLOSE -> rivalry and exchange jointly shaped later Deccan formations.
