

UPSC Civil Services Preliminary Examination - CSAT Paper II

QUESTION PAPER | Time: 2 Hours | Maximum Marks: 200

INSTRUCTIONS

1. This paper contains 80 questions and is qualifying with a minimum standard of 33 percent.
2. Each correct response carries 2.5 marks; one-third of the marks assigned to a question (shown as 0.83) is deducted for an incorrect response; an unattempted question carries zero.
3. Use only the information given in comprehension and data-sufficiency questions.

Q1. Passage: A hospital introduced online appointments. Missed visits fell for smartphone users but rose among patients who shared phones. A call-based fallback restored access without abandoning the digital system. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

- | | |
|--|---|
| A. Digital services need fallback channels to avoid exclusion. | B. The intervention should be abandoned in every setting. |
| C. The passage proves that implementation conditions never matter. | D. The passage recommends maximising only the most visible input. |

Q2. Passage: A hospital introduced online appointments. Missed visits fell for smartphone users but rose among patients who shared phones. A call-based fallback restored access without abandoning the digital system. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

- | | |
|--|---|
| A. Every stakeholder responds identically in all circumstances. | B. A uniform channel can distribute convenience unequally. |
| C. The opposite outcome must occur whenever one condition changes. | D. A policy not discussed in the passage is legally compulsory. |

Q3. Passage: A hospital introduced online appointments. Missed visits fell for smartphone users but rose among patients who shared phones. A call-based fallback restored access without abandoning the digital system. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

- | | |
|---|--|
| A. The intervention has no cost under any condition. | B. No alternative explanation can ever exist. |
| C. Shared-phone users could use the call-based alternative. | D. All participants possess identical preferences and resources. |

Q4. Passage: A hospital introduced online appointments. Missed visits fell for smartphone users but rose among patients who shared phones. A call-based fallback restored access without abandoning the digital system. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

- | | |
|------------------------------|---------------------------|
| A. unreservedly celebratory | B. hostile and dismissive |
| C. unrelated and indifferent | D. pragmatic |

Q5. Passage: A watershed project measured only the number of check dams. An audit found that poorly located structures trapped little runoff, while fewer structures placed after contour mapping improved recharge. Counting assets obscured performance. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

- | | |
|--|---|
| A. Asset counts are weaker than outcome and location-sensitive evaluation. | B. The intervention should be abandoned in every setting. |
| C. The passage proves that implementation conditions never matter. | D. The passage recommends maximising only the most visible input. |

Q6. Passage: A watershed project measured only the number of check dams. An audit found that poorly located structures trapped little runoff, while fewer structures placed after contour mapping improved recharge. Counting assets obscured performance. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

A. Every stakeholder responds identically in all circumstances.	B. More structures do not necessarily produce more recharge.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q7. Passage: A watershed project measured only the number of check dams. An audit found that poorly located structures trapped little runoff, while fewer structures placed after contour mapping improved recharge. Counting assets obscured performance. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Contour-informed placement affects captured runoff.	D. All participants possess identical preferences and resources.

Q8. Passage: A watershed project measured only the number of check dams. An audit found that poorly located structures trapped little runoff, while fewer structures placed after contour mapping improved recharge. Counting assets obscured performance. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. critical but constructive

Q9. Passage: A public library extended opening hours. Usage increased mainly after bus timings were coordinated with closing time. The library had removed a formal barrier, while transport coordination removed a practical one. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

A. Access depends on complementary services, not formal availability alone.	B. The intervention should be abandoned in every setting.
C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.

Q10. Passage: A public library extended opening hours. Usage increased mainly after bus timings were coordinated with closing time. The library had removed a formal barrier, while transport coordination removed a practical one. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

A. Every stakeholder responds identically in all circumstances.	B. Longer hours may be ineffective when return transport is unavailable.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q11. Passage: A public library extended opening hours. Usage increased mainly after bus timings were coordinated with closing time. The library had removed a formal barrier, while transport coordination removed a practical one. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Some potential users depended on buses.	D. All participants possess identical preferences and resources.

Q12. Passage: A public library extended opening hours. Usage increased mainly after bus timings were coordinated with closing time. The library had removed a formal barrier, while transport coordination removed a practical one. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens

when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. explanatory

Q13. Passage: Farmers received weather advisories by text. Adoption improved when messages specified the crop stage and local rainfall probability rather than giving district-wide warnings. More information was not enough; relevant information changed decisions. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

A. Advisories influence action when they are locally and temporally relevant.	B. The intervention should be abandoned in every setting.
C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.

Q14. Passage: Farmers received weather advisories by text. Adoption improved when messages specified the crop stage and local rainfall probability rather than giving district-wide warnings. More information was not enough; relevant information changed decisions. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

A. Every stakeholder responds identically in all circumstances.	B. Information quantity and decision usefulness are not identical.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q15. Passage: Farmers received weather advisories by text. Adoption improved when messages specified the crop stage and local rainfall probability rather than giving district-wide warnings. More information was not enough; relevant information changed decisions. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Farmers could relate crop-stage advice to an available action.	D. All participants possess identical preferences and resources.

Q16. Passage: Farmers received weather advisories by text. Adoption improved when messages specified the crop stage and local rainfall probability rather than giving district-wide warnings. More information was not enough; relevant information changed decisions. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. diagnostic

Q17. Passage: A municipal dashboard published complaint totals. Departments first closed easy cases to improve rankings. After the metric included age and recurrence of complaints, effort shifted towards persistent failures. Measurement changed behaviour twice. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

A. Performance metrics must anticipate strategic responses.	B. The intervention should be abandoned in every setting.
C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.

Q18. Passage: A municipal dashboard published complaint totals. Departments first closed easy cases to improve rankings. After the metric included age and recurrence of complaints, effort shifted towards persistent failures. Measurement changed behaviour twice. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best

supported?

A. Every stakeholder responds identically in all circumstances.	B. Simple closure counts can reward superficial compliance.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q19. Passage: A municipal dashboard published complaint totals. Departments first closed easy cases to improve rankings. After the metric included age and recurrence of complaints, effort shifted towards persistent failures. Measurement changed behaviour twice. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Departments respond to the incentives embedded in rankings.	D. All participants possess identical preferences and resources.

Q20. Passage: A municipal dashboard published complaint totals. Departments first closed easy cases to improve rankings. After the metric included age and recurrence of complaints, effort shifted towards persistent failures. Measurement changed behaviour twice. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. analytical

Q21. What is the remainder when $171^2 + 3 \times 171 + 5$ is divided by 9?

A. 5	B. 6
C. 7	D. 8

Q22. Two numbers are obtained by doubling 22 and tripling 36. What is their HCF?

A. 5	B. 4
C. 6	D. 1188

Q23. How many positive divisors does 72 have?

A. 11	B. 13
C. 12	D. 7

Q24. What is the unit digit of $(5^{13}) \times (9^7)$?

A. 6	B. 7
C. 8	D. 5

Q25. The arithmetic sequence begins 5, 9, 13. What is the sum of its first 9 terms?

A. 189.0	B. 185.0
C. 193.0	D. 37

Q26. After multiplying 10098 by 9, what is the sum of the decimal digits of the product?

A. 26	B. 27
C. 28	D. 29

Q27. How many integers from 17 through 124, inclusive, are divisible by 8 but not by 16?

A. 6	B. 8
C. 7	D. 9

Q28. The values are 14, 20, 26, 32. If the smallest falls by 2 and the largest rises by 4, what is the new mean?

A. 23.0	B. 24.5
C. 25.5	D. 23.5

Q29. If $3x + 4 = 25$, what is x ?

A. 7	B. 6
C. 8	D. 21

Q30. If $2(x - 2) = 8$, what is x when x is a positive integer and the displayed equality is supplemented by $x + 2 = 8$?

A. 5	B. 6
C. 7	D. 12

Q31. The sum of two consecutive integers is 21. What is the smaller integer?

A. 11	B. 9
C. 10	D. 21

Q32. Five years ago A was half of A's age 14 years from now. What is A's present age?

A. 19	B. 29
C. 12	D. 24

Q33. What is the positive solution of $x^2 = 64$?

A. 8	B. -8
C. 64	D. 9

Q34. Which value is the least integer satisfying $2x + 1 > 18$?

A. 8	B. 9
C. 10	D. 18

Q35. A grant equals 20% of Rs 320. An administrative surcharge of 7% is then applied to the grant. What is the final amount?

A. 64	B. 61.480000000000004
C. 68.48	D. 86.4

Q36. A value of 1000 rises by 10% and then falls by 5%. What is the final value?

A. 1050	B. 1050.0
C. 1055.0	D. 1045.0

Q37. Rs 540 is divided in the ratio 4:3. What is the first share?

A. 308.57142857142856	B. 304.57142857142856
C. 312.57142857142856	D. 77.14285714285714

Q38. Groups of 22 and 32 have averages 42 and 62. What is their combined average?

A. 52.0	B. 53.85
C. 52.85	D. 54.85

Q39. An article costs Rs 600, is marked for a 17% profit, and then receives a 6% rebate on that marked selling price. What is the realised price?

A. 702.0	B. 666.0
C. 659.88	D. 665.88

Q40. A marked price of Rs 1000 is discounted by 12%. What is the sale price?

A. 988	B. 1120.0
C. 868.0	D. 880.0

Q41. A mixture contains milk and water in the ratio 5:5. In 40 litres, how many litres are milk?

A. 20.0	B. 19.0
---------	---------

C. 4.0	D. 21.0
--------	---------

Q42. The average of 7 values is 42. After adding 54, what is the new average?

A. 42	B. 43.5
C. 48.0	D. 44.5

Q43. A can finish a task in 10 days and B in 14 days. How many days will they take together?

A. 24	B. 12.0
C. 5.83	D. 4

Q44. 14 workers finish a job in 15 days at equal efficiency. How many days will 20 workers take?

A. 15	B. 21.43
C. 11.5	D. 10.5

Q45. Two pipes fill a tank in 8 and 10 hours. If opened together, how long do they take?

A. 4.44	B. 18
C. 9.0	D. 5.44

Q46. An inlet fills a tank in 7 hours while a leak empties it in 22 hours. How long to fill together?

A. 5.31	B. 10.27
C. 15	D. 7

Q47. A is 4 times as efficient as B. If B alone takes 40 days, how many days does A take?

A. 40	B. 4
C. 10	D. 14

Q48. A team completes 0.40 of a job. What fraction remains, rounded to two decimals?

A. 0.4	B. 1.4
C. 0.7	D. 0.6

Q49. A vehicle's total journey time is 5 hours, including a halt of 30 minutes. It moves at 55 km/h whenever in motion. What distance is covered?

A. 247.5	B. 275
C. 192.5	D. 302.5

Q50. Over 280 km, how many hours are saved by increasing speed from 42 to 62 km/h?

A. 14.0	B. 2.15
C. 3.15	D. 1.15

Q51. A 200-metre train moves at 54 km/h. How many seconds does it take to clear a 100-metre platform?

A. 13.33	B. 22.0
C. 20.0	D. 18.0

Q52. A boat's still-water speed is 12 km/h and stream speed is 4 km/h. How long does it take to travel 16 km upstream?

A. 1.0	B. 8
C. 1.3333333333333333	D. 2

Q53. A runner completes 5 laps of a square field of side 22 m in 10 minutes. What is the runner's speed in metres per minute?

A. 44.0	B. 88
C. 48.4	D. 17.6

Q54. A car covers 120 km at 42 km/h and 180 km at 62 km/h. What is average speed?

A. 52.0	B. 52.08
C. 54.08	D. 50.08

Q55. A table reports district outputs (A=90, B=103, C=116, D=129). What is the total?

A. 428	B. 448
C. 438	D. 129

Q56. Using the table (A=90, B=103, C=116, D=129), what is the difference between the highest and lowest values?

A. 129	B. 90
C. 219	D. 39

Q57. Using the table (A=90, B=103, C=116, D=129), what is the average of the four values?

A. 109.5	B. 438
C. 219.0	D. 39

Q58. Using the table (A=90, B=103, C=116, D=129), by what percentage does D exceed A?

A. 30.23	B. 43.33
C. 39	D. 143.33

Q59. Year 1 values are A=90, B=103, C=116, D=129; Year 2 values are A=112, B=120, C=128, D=136. Which district has the largest absolute increase?

A. B	B. C
C. A	D. D

Q60. Using Year 2 (A=112, B=120, C=128, D=136), what fraction of the total belongs to B, rounded to two decimals?

A. 0.27	B. 4.13
C. 0.23	D. 0.24

Q61. Using Year 1 (A=90, B=103, C=116, D=129), if each unit earns Rs 4, what is D's revenue?

A. 516	B. 133
C. 129	D. 1752

Q62. Using Year 1 (A=90, B=103, C=116, D=129), what is the ratio A:D in simplest form?

A. 129:90	B. 30:43
C. 180:258	D. 219:1

Q63. All surgeons are licensed. No person lacking that status may operate. Which conclusion necessarily follows?

A. Every licensed person is one of the surgeons.	B. Some surgeons lack that status.
C. Every surgeon is outside the class lacking that status.	D. No licensed person may operate.

Q64. If each letter is shifted forward by 2, how is INDIA coded?

A. INDIA	B. CKFPK
C. JODJB	D. KPFKC

Q65. Complete the series: 4, 6, 10, 16, ?

A. 24	B. 23
C. 25	D. 22

Q66. Rohan is the child of Leela's only son. How is Rohan related to Leela?

A. Child	B. Grandchild
C. Niece or nephew	D. Sibling

Q67. Some villages are coastal settlements. All coastal settlements are mapped. Which conclusion follows?

A. All villages are mapped	B. No villages are mapped
C. Some villages are mapped	D. Some mapped are not coastal settlements

Q68. In a code, GOVERN is written as HPWFSO by shifting each letter forward once. How is RIVER written?

A. RIVER	B. SFWJS
C. AAAAA	D. SJWFS

Q69. P, Q, R and S sit in a row. P is left of Q; R is right of Q; S is left of P. Who is second from the left?

A. P	B. Q
C. R	D. S

Q70. Four tasks Audit, Budget, Consultation and Draft occur consecutively. Audit precedes Budget; Consultation follows Budget; Draft precedes Audit. Which task is third?

A. Audit	B. Budget
C. Consultation	D. Draft

Q71. Five persons stand by height. Asha is taller than Bina but shorter than Charu. Diya is shorter than Bina. Esha is taller than Charu. Who is tallest?

A. Charu	B. Asha
C. Esha	D. Diya

Q72. Hearing is after Drafting but before Order. Survey is before Drafting. Which is earliest?

A. Drafting	B. Hearing
C. Order	D. Survey

Q73. A person faces North and turns right 2 time(s), each by 90 degrees. Which direction is faced?

A. South	B. North
C. East	D. West

Q74. A walker goes 6 km north and 8 km east. How far is the endpoint from the start?

A. 14 km	B. 10 km
C. 2 km	D. 48 km

Q75. A person starts facing South, turns left, then turns left again. Which direction is now faced?

A. East	B. South
C. North	D. West

Q76. A point B is 6 km south of A, and C is 6 km east of B. In which direction is C from A?

A. North-East	B. South-West
C. North-West	D. South-East

Q77. What is x? Statement 1: $x+4=12$. Statement 2: $2x=16$.

A. Each statement alone is sufficient.	B. Statement 1 alone is sufficient, but statement 2 alone is not.
C. Statement 2 alone is sufficient, but statement 1 alone is not.	D. Both statements together are sufficient, but neither alone is sufficient.

Q78. What is the area of a rectangle? Statement 1: its length is 9 cm. Statement 2: its breadth is 6 cm.

A. Statement 1 alone is sufficient, but statement 2 alone is not.	B. Both statements together are sufficient, but neither alone is sufficient.
C. Statement 2 alone is sufficient, but statement 1 alone is not.	D. Each statement alone is sufficient.

Q79. Is integer n even? Statement 1: n is divisible by 12. Statement 2: n is divisible by 6.

A. Statement 1 alone is sufficient, but statement 2 alone is not.	B. Statement 2 alone is sufficient, but statement 1 alone is not.
---	---

C. Each statement alone is sufficient.	D. Both statements together are sufficient, but neither alone is sufficient.
--	--

Q80. What is y ? Statement 1: y is positive. Statement 2: $y^2=64$.

A. Statement 1 alone is sufficient, but statement 2 alone is not.	B. Statement 2 alone is sufficient, but statement 1 alone is not.
C. Each statement alone is sufficient.	D. Both statements together are sufficient, but neither alone is sufficient.

END OF PAPER
