

UPSC Civil Services Preliminary Examination - CSAT Paper II

QUESTION PAPER | Time: 2 Hours | Maximum Marks: 200

INSTRUCTIONS

1. This paper contains 80 questions and is qualifying with a minimum standard of 33 percent.
2. Each correct response carries 2.5 marks; one-third of the marks assigned to a question (shown as 0.83) is deducted for an incorrect response; an unattempted question carries zero.
3. Use only the information given in comprehension and data-sufficiency questions.

Q1. Passage: A rural enterprise trained women in food processing. Income rose where training was paired with quality certification and market links; training alone produced skills without reliable sales. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

A. Skills generate income when connected to standards and markets.	B. The intervention should be abandoned in every setting.
C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.

Q2. Passage: A rural enterprise trained women in food processing. Income rose where training was paired with quality certification and market links; training alone produced skills without reliable sales. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

A. Every stakeholder responds identically in all circumstances.	B. Training completion is not the same as commercial success.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q3. Passage: A rural enterprise trained women in food processing. Income rose where training was paired with quality certification and market links; training alone produced skills without reliable sales. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Buyers valued certification or dependable quality.	D. All participants possess identical preferences and resources.

Q4. Passage: A rural enterprise trained women in food processing. Income rose where training was paired with quality certification and market links; training alone produced skills without reliable sales. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. balanced

Q5. Passage: A bus corridor reserved lanes during peak hours. Travel time became predictable even when average speed changed little. Reliability allowed workers to plan transfers and reduced the penalty of uncertainty. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

A. Predictability can be a major transport benefit even without large speed gains.	B. The intervention should be abandoned in every setting.
--	---

C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.
--	---

Q6. Passage: A bus corridor reserved lanes during peak hours. Travel time became predictable even when average speed changed little. Reliability allowed workers to plan transfers and reduced the penalty of uncertainty. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

A. Every stakeholder responds identically in all circumstances.	B. Average speed can hide variation in journey time.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q7. Passage: A bus corridor reserved lanes during peak hours. Travel time became predictable even when average speed changed little. Reliability allowed workers to plan transfers and reduced the penalty of uncertainty. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Travellers value lower uncertainty when planning connections.	D. All participants possess identical preferences and resources.

Q8. Passage: A bus corridor reserved lanes during peak hours. Travel time became predictable even when average speed changed little. Reliability allowed workers to plan transfers and reduced the penalty of uncertainty. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. favourable but qualified

Q9. Passage: A nutrition programme distributed fortified food. Coverage was high, but anaemia fell slowly where infections and poor sanitation persisted. The supplement addressed one pathway, not every cause. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

A. Single nutritional interventions cannot overcome all causes of anaemia.	B. The intervention should be abandoned in every setting.
C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.

Q10. Passage: A nutrition programme distributed fortified food. Coverage was high, but anaemia fell slowly where infections and poor sanitation persisted. The supplement addressed one pathway, not every cause. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

A. Every stakeholder responds identically in all circumstances.	B. High distribution coverage need not ensure equivalent health outcomes.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q11. Passage: A nutrition programme distributed fortified food. Coverage was high, but anaemia fell slowly where infections and poor sanitation persisted. The supplement addressed one pathway, not every cause. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Infection and sanitation independently affect anaemia.	D. All participants possess identical preferences and resources.

Q12. Passage: A nutrition programme distributed fortified food. Coverage was high, but anaemia fell slowly where infections and poor sanitation persisted. The supplement addressed one pathway, not every cause. The episode also

warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. qualified

Q13. Passage: A police station published service standards. Complaints about delay fell only after applicants received dated receipts and an appeal contact. A promise became enforceable when citizens could prove and escalate non-compliance. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

A. Service standards need traceability and escalation to become effective.	B. The intervention should be abandoned in every setting.
C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.

Q14. Passage: A police station published service standards. Complaints about delay fell only after applicants received dated receipts and an appeal contact. A promise became enforceable when citizens could prove and escalate non-compliance. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

A. Every stakeholder responds identically in all circumstances.	B. Publication alone may not alter administrative behaviour.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q15. Passage: A police station published service standards. Complaints about delay fell only after applicants received dated receipts and an appeal contact. A promise became enforceable when citizens could prove and escalate non-compliance. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Receipts and appeal contacts enabled accountability.	D. All participants possess identical preferences and resources.

Q16. Passage: A police station published service standards. Complaints about delay fell only after applicants received dated receipts and an appeal contact. A promise became enforceable when citizens could prove and escalate non-compliance. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. institutional

Q17. Passage: A solar irrigation subsidy lowered pumping costs. Groundwater use increased in villages without metering, while feeder separation and water budgeting moderated extraction elsewhere. Clean energy solved an emissions problem but could intensify a resource problem. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

A. Policies can solve one externality while worsening another unless incentives are aligned.	B. The intervention should be abandoned in every setting.
C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.

Q18. Passage: A solar irrigation subsidy lowered pumping costs. Groundwater use increased in villages without metering, while feeder separation and water budgeting moderated extraction elsewhere. Clean energy solved an emissions problem but could intensify a resource problem. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best

supported?

A. Every stakeholder responds identically in all circumstances.	B. Renewable energy does not automatically ensure sustainable water use.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q19. Passage: A solar irrigation subsidy lowered pumping costs. Groundwater use increased in villages without metering, while feeder separation and water budgeting moderated extraction elsewhere. Clean energy solved an emissions problem but could intensify a resource problem. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Pumping decisions respond to the marginal cost of electricity.	D. All participants possess identical preferences and resources.

Q20. Passage: A solar irrigation subsidy lowered pumping costs. Groundwater use increased in villages without metering, while feeder separation and water budgeting moderated extraction elsewhere. Clean energy solved an emissions problem but could intensify a resource problem. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. cautionary

Q21. What is the remainder when $188^2 + 3 \times 188 + 5$ is divided by 10?

A. 3	B. 4
C. 5	D. 6

Q22. Two numbers are obtained by doubling 24 and tripling 39. What is their HCF?

A. 4	B. 3
C. 5	D. 1872

Q23. How many positive divisors does 144 have?

A. 14	B. 16
C. 15	D. 8

Q24. What is the unit digit of $(6^{14}) \times (10^8)$?

A. 1	B. 2
C. 3	D. 0

Q25. The arithmetic sequence begins 6, 11, 16. What is the sum of its first 9 terms?

A. 234.0	B. 229.0
C. 239.0	D. 46

Q26. After multiplying 10209 by 9, what is the sum of the decimal digits of the product?

A. 26	B. 27
C. 28	D. 29

Q27. How many integers from 18 through 126, inclusive, are divisible by 9 but not by 18?

A. 5	B. 7
C. 6	D. 8

Q28. The values are 15, 21, 27, 33. If the smallest falls by 3 and the largest rises by 6, what is the new mean?

A. 24.0	B. 25.75
---------	----------

C. 26.75	D. 24.75
----------	----------

Q29. If $3x + 6 = 30$, what is x ?

A. 8	B. 7
C. 9	D. 24

Q30. If $2(x - 3) = 8$, what is x when x is a positive integer and the displayed equality is supplemented by $x + 3 = 10$?

A. 6	B. 7
C. 8	D. 14

Q31. The sum of two consecutive integers is 23. What is the smaller integer?

A. 12	B. 10
C. 11	D. 23

Q32. Five years ago A was half of A's age 16 years from now. What is A's present age?

A. 21	B. 31
C. 13	D. 26

Q33. What is the positive solution of $x^2 = 81$?

A. 9	B. -9
C. 81	D. 10

Q34. Which value is the least integer satisfying $2x + 1 > 20$?

A. 9	B. 10
C. 11	D. 20

Q35. A grant equals 25% of Rs 360. An administrative surcharge of 8% is then applied to the grant. What is the final amount?

A. 90	B. 89.2
C. 97.2	D. 118.8

Q36. A value of 1000 rises by 11% and then falls by 6%. What is the final value?

A. 1050	B. 1050.0
C. 1053.4	D. 1043.4

Q37. Rs 600 is divided in the ratio 5:3. What is the first share?

A. 375.0	B. 370.0
C. 380.0	D. 75.0

Q38. Groups of 23 and 33 have averages 43 and 63. What is their combined average?

A. 53.0	B. 54.79
C. 53.79	D. 55.79

Q39. An article costs Rs 650, is marked for a 18% profit, and then receives a 7% rebate on that marked selling price. What is the realised price?

A. 767.0	B. 721.5
C. 713.31	D. 720.31

Q40. A marked price of Rs 1100 is discounted by 13%. What is the sale price?

A. 1087	B. 1243.0
C. 944.0	D. 957.0

Q41. A mixture contains milk and water in the ratio 6:5. In 44 litres, how many litres are milk?

A. 24.0	B. 23.0
C. 4.0	D. 25.0

Q42. The average of 8 values is 43. After adding 55, what is the new average?

A. 43	B. 44.33
C. 49.0	D. 45.33

Q43. A can finish a task in 11 days and B in 15 days. How many days will they take together?

A. 26	B. 13.0
C. 6.35	D. 4

Q44. 15 workers finish a job in 15 days at equal efficiency. How many days will 21 workers take?

A. 15	B. 21.0
C. 11.71	D. 10.71

Q45. Two pipes fill a tank in 9 and 11 hours. If opened together, how long do they take?

A. 4.95	B. 20
C. 10.0	D. 5.95

Q46. An inlet fills a tank in 8 hours while a leak empties it in 23 hours. How long to fill together?

A. 5.94	B. 12.27
C. 15	D. 8

Q47. A is 5 times as efficient as B. If B alone takes 50 days, how many days does A take?

A. 50	B. 5
C. 10	D. 15

Q48. A team completes 0.43 of a job. What fraction remains, rounded to two decimals?

A. 0.43	B. 1.43
C. 0.67	D. 0.57

Q49. A vehicle's total journey time is 6 hours, including a halt of 45 minutes. It moves at 60 km/h whenever in motion. What distance is covered?

A. 315.0	B. 360
C. 255.0	D. 375.0

Q50. Over 300 km, how many hours are saved by increasing speed from 43 to 63 km/h?

A. 15.0	B. 2.21
C. 3.21	D. 1.21

Q51. A 210-metre train moves at 54 km/h. How many seconds does it take to clear a 105-metre platform?

A. 14.0	B. 23.0
C. 21.0	D. 19.0

Q52. A boat's still-water speed is 13 km/h and stream speed is 5 km/h. How long does it take to travel 16 km upstream?

A. 0.8888888888888888	B. 8
C. 1.2307692307692308	D. 2

Q53. A runner completes 6 laps of a square field of side 23 m in 12 minutes. What is the runner's speed in metres per minute?

A. 46.0	B. 92
C. 44.08333333333333	D. 15.333333333333334

Q54. A car covers 120 km at 43 km/h and 180 km at 63 km/h. What is average speed?

A. 53.0	B. 53.12
C. 55.12	D. 51.12

Q55. A table reports district outputs (A=95, B=107, C=119, D=131). What is the total?

A. 442	B. 462
C. 452	D. 131

Q56. Using the table (A=95, B=107, C=119, D=131), what is the difference between the highest and lowest values?

A. 131	B. 95
C. 226	D. 36

Q57. Using the table (A=95, B=107, C=119, D=131), what is the average of the four values?

A. 113.0	B. 452
C. 226.0	D. 36

Q58. Using the table (A=95, B=107, C=119, D=131), by what percentage does D exceed A?

A. 27.48	B. 37.89
C. 36	D. 137.89

Q59. Year 1 values are A=95, B=107, C=119, D=131; Year 2 values are A=118, B=125, C=132, D=139. Which district has the largest absolute increase?

A. B	B. C
C. A	D. D

Q60. Using Year 2 (A=118, B=125, C=132, D=139), what fraction of the total belongs to B, rounded to two decimals?

A. 0.28	B. 4.11
C. 0.23	D. 0.24

Q61. Using Year 1 (A=95, B=107, C=119, D=131), if each unit earns Rs 5, what is D's revenue?

A. 655	B. 136
C. 131	D. 2260

Q62. Using Year 1 (A=95, B=107, C=119, D=131), what is the ratio A:D in simplest form?

A. 131:95	B. 95:131
C. 190:262	D. 226:1

Q63. All pilots are qualified. No person lacking that status may fly. Which conclusion necessarily follows?

A. Every qualified person is one of the pilots.	B. Some pilots lack that status.
C. Every pilot is outside the class lacking that status.	D. No qualified person may fly.

Q64. If each letter is shifted forward by 3, how is INDIA coded?

A. INDIA	B. DLGQL
C. JODJB	D. LQGLD

Q65. Complete the series: 5, 7, 11, 17, ?

A. 25	B. 24
C. 26	D. 23

Q66. Tara is the child of Kabir's only son. How is Tara related to Kabir?

A. Child	B. Grandchild
C. Niece or nephew	D. Sibling

Q67. Some clinics are public facilities. All public facilities are audited. Which conclusion follows?

A. All clinics are audited	B. No clinics are audited
C. Some clinics are audited	D. Some audited are not public facilities

Q68. In a code, GOVERN is written as HPWFSO by shifting each letter forward once. How is PLANT written?

A. PLANT	B. UOBMQ
C. AAAAA	D. QMBOU

Q69. K, L, M and N sit in a row. K is left of L; M is right of L; N is left of K. Who is second from the left?

A. K	B. L
C. M	D. N

Q70. Four tasks Seed, Sow, Weed and Harvest occur consecutively. Seed precedes Sow; Weed follows Sow; Harvest precedes Seed. Which task is third?

A. Seed	B. Sow
C. Weed	D. Harvest

Q71. Five persons stand by height. Jai is taller than Kiran but shorter than Lalit. Mohan is shorter than Kiran. Nitin is taller than Lalit. Who is tallest?

A. Lalit	B. Jai
C. Nitin	D. Mohan

Q72. Inspection is after Sowing but before Harvest. Seed purchase is before Sowing. Which is earliest?

A. Sowing	B. Inspection
C. Harvest	D. Seed purchase

Q73. A person faces North and turns right 3 time(s), each by 90 degrees. Which direction is faced?

A. West	B. North
C. East	D. South

Q74. A walker goes 9 km north and 12 km east. How far is the endpoint from the start?

A. 21 km	B. 15 km
C. 3 km	D. 108 km

Q75. A person starts facing West, turns left, then turns left again. Which direction is now faced?

A. North	B. South
C. East	D. West

Q76. A point B is 7 km south of A, and C is 7 km east of B. In which direction is C from A?

A. North-East	B. South-West
C. North-West	D. South-East

Q77. What is x? Statement 1: $x+5=14$. Statement 2: $2x=18$.

A. Each statement alone is sufficient.	B. Statement 1 alone is sufficient, but statement 2 alone is not.
C. Statement 2 alone is sufficient, but statement 1 alone is not.	D. Both statements together are sufficient, but neither alone is sufficient.

Q78. What is the area of a rectangle? Statement 1: its length is 10 cm. Statement 2: its breadth is 7 cm.

A. Statement 1 alone is sufficient, but statement 2 alone is not.	B. Both statements together are sufficient, but neither alone is sufficient.
C. Statement 2 alone is sufficient, but statement 1 alone is not.	D. Each statement alone is sufficient.

Q79. Is integer n even? Statement 1: n is divisible by 16. Statement 2: n is divisible by 8.

A. Statement 1 alone is sufficient, but statement 2 alone is not.	B. Statement 2 alone is sufficient, but statement 1 alone is not.
C. Each statement alone is sufficient.	D. Both statements together are sufficient, but neither alone is sufficient.

Q80. What is y ? Statement 1: y is positive. Statement 2: $y^2=81$.

A. Statement 1 alone is sufficient, but statement 2 alone is not.	B. Statement 2 alone is sufficient, but statement 1 alone is not.
C. Each statement alone is sufficient.	D. Both statements together are sufficient, but neither alone is sufficient.

END OF PAPER
