

UPSC Civil Services Preliminary Examination - CSAT Paper II

QUESTION PAPER | Time: 2 Hours | Maximum Marks: 200

INSTRUCTIONS

1. This paper contains 80 questions and is qualifying with a minimum standard of 33 percent.
2. Each correct response carries 2.5 marks; one-third of the marks assigned to a question (shown as 0.83) is deducted for an incorrect response; an unattempted question carries zero.
3. Use only the information given in comprehension and data-sufficiency questions.

Q1. Passage: A district recruited more health workers. Immunisation improved only after vacant supervisory posts were filled and cold-chain failures were logged. Staff numbers mattered, but coordination and supplies determined effective capacity. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

- | | |
|--|---|
| A. Public capacity depends on management and logistics as well as headcount. | B. The intervention should be abandoned in every setting. |
| C. The passage proves that implementation conditions never matter. | D. The passage recommends maximising only the most visible input. |

Q2. Passage: A district recruited more health workers. Immunisation improved only after vacant supervisory posts were filled and cold-chain failures were logged. Staff numbers mattered, but coordination and supplies determined effective capacity. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

- | | |
|--|---|
| A. Every stakeholder responds identically in all circumstances. | B. Recruitment alone need not remove delivery bottlenecks. |
| C. The opposite outcome must occur whenever one condition changes. | D. A policy not discussed in the passage is legally compulsory. |

Q3. Passage: A district recruited more health workers. Immunisation improved only after vacant supervisory posts were filled and cold-chain failures were logged. Staff numbers mattered, but coordination and supplies determined effective capacity. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

- | | |
|--|--|
| A. The intervention has no cost under any condition. | B. No alternative explanation can ever exist. |
| C. Supervision and cold-chain reliability affect immunisation. | D. All participants possess identical preferences and resources. |

Q4. Passage: A district recruited more health workers. Immunisation improved only after vacant supervisory posts were filled and cold-chain failures were logged. Staff numbers mattered, but coordination and supplies determined effective capacity. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

- | | |
|------------------------------|---------------------------|
| A. unreservedly celebratory | B. hostile and dismissive |
| C. unrelated and indifferent | D. measured |

Q5. Passage: A cooperative displayed daily market prices. Members gained bargaining power, but farmers with perishable produce still accepted low offers when transport was unavailable. Information reduced one asymmetry; logistics preserved another. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

- | | |
|--|---|
| A. Price information improves bargaining but cannot replace market access. | B. The intervention should be abandoned in every setting. |
|--|---|

C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.
--	---

Q6. Passage: A cooperative displayed daily market prices. Members gained bargaining power, but farmers with perishable produce still accepted low offers when transport was unavailable. Information reduced one asymmetry; logistics preserved another. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

A. Every stakeholder responds identically in all circumstances.	B. Sellers under time pressure may not realise the displayed price.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q7. Passage: A cooperative displayed daily market prices. Members gained bargaining power, but farmers with perishable produce still accepted low offers when transport was unavailable. Information reduced one asymmetry; logistics preserved another. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Transport constraints limited farmers' ability to wait or switch buyers.	D. All participants possess identical preferences and resources.

Q8. Passage: A cooperative displayed daily market prices. Members gained bargaining power, but farmers with perishable produce still accepted low offers when transport was unavailable. Information reduced one asymmetry; logistics preserved another. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. balanced

Q9. Passage: A flood map was updated with recent construction. Residents objected when insurance premiums rose, but the old map had understated exposure. Accurate risk information imposed visible costs while reducing hidden vulnerability. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

A. Better risk information can be unpopular because it reveals rather than creates exposure.	B. The intervention should be abandoned in every setting.
C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.

Q10. Passage: A flood map was updated with recent construction. Residents objected when insurance premiums rose, but the old map had understated exposure. Accurate risk information imposed visible costs while reducing hidden vulnerability. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

A. Every stakeholder responds identically in all circumstances.	B. Higher premiums may reflect corrected measurement.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q11. Passage: A flood map was updated with recent construction. Residents objected when insurance premiums rose, but the old map had understated exposure. Accurate risk information imposed visible costs while reducing hidden vulnerability. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. The revised map more accurately represented present conditions.	D. All participants possess identical preferences and resources.

Q12. Passage: A flood map was updated with recent construction. Residents objected when insurance premiums rose, but the old map had understated exposure. Accurate risk information imposed visible costs while reducing hidden vulnerability. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. analytical

Q13. Passage: A university made lectures available online. Completion improved when students also joined small peer groups with weekly deadlines. Content access removed scarcity; social commitment reduced procrastination. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

A. Online access and structured peer accountability can complement each other.	B. The intervention should be abandoned in every setting.
C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.

Q14. Passage: A university made lectures available online. Completion improved when students also joined small peer groups with weekly deadlines. Content access removed scarcity; social commitment reduced procrastination. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which inference is best supported?

A. Every stakeholder responds identically in all circumstances.	B. Availability alone does not guarantee course completion.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q15. Passage: A university made lectures available online. Completion improved when students also joined small peer groups with weekly deadlines. Content access removed scarcity; social commitment reduced procrastination. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Deadlines and peer contact influenced study behaviour.	D. All participants possess identical preferences and resources.

Q16. Passage: A university made lectures available online. Completion improved when students also joined small peer groups with weekly deadlines. Content access removed scarcity; social commitment reduced procrastination. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. constructive

Q17. Passage: A village committee rotated meeting times. Women's attendance rose, but participation became meaningful only after agenda papers were shared in advance. Presence was enabled by timing; voice was enabled by preparation. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which option best states the central idea?

A. Inclusive participation requires both accessible timing and usable information.	B. The intervention should be abandoned in every setting.
C. The passage proves that implementation conditions never matter.	D. The passage recommends maximising only the most visible input.

Q18. Passage: A village committee rotated meeting times. Women's attendance rose, but participation became meaningful only after agenda papers were shared in advance. Presence was enabled by timing; voice was enabled by preparation. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains

or burdens when implementation conditions differ. Which inference is best supported?

A. Every stakeholder responds identically in all circumstances.	B. Attendance is not identical to effective influence.
C. The opposite outcome must occur whenever one condition changes.	D. A policy not discussed in the passage is legally compulsory.

Q19. Passage: A village committee rotated meeting times. Women's attendance rose, but participation became meaningful only after agenda papers were shared in advance. Presence was enabled by timing; voice was enabled by preparation. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. Which assumption is necessary for the reasoning?

A. The intervention has no cost under any condition.	B. No alternative explanation can ever exist.
C. Advance information helped participants formulate views.	D. All participants possess identical preferences and resources.

Q20. Passage: A village committee rotated meeting times. Women's attendance rose, but participation became meaningful only after agenda papers were shared in advance. Presence was enabled by timing; voice was enabled by preparation. The episode also warns against reading an aggregate improvement as proof that every group benefited equally. A sound evaluation must distinguish the formal input, the mechanism through which people can use it, and the distribution of gains or burdens when implementation conditions differ. The author's tone is best described as:

A. unreservedly celebratory	B. hostile and dismissive
C. unrelated and indifferent	D. balanced and precise

Q21. What is the remainder when $205^2 + 3 \times 205 + 5$ is divided by 11?

A. 9	B. 10
C. 0	D. 1

Q22. Two numbers are obtained by doubling 26 and tripling 42. What is their HCF?

A. 3	B. 2
C. 4	D. 3276

Q23. How many positive divisors does 288 have?

A. 17	B. 19
C. 18	D. 9

Q24. What is the unit digit of $(7^{15}) \times (11^9)$?

A. 4	B. 5
C. 6	D. 3

Q25. The arithmetic sequence begins 7, 13, 19. What is the sum of its first 9 terms?

A. 279.0	B. 273.0
C. 285.0	D. 55

Q26. After multiplying 10320 by 9, what is the sum of the decimal digits of the product?

A. 26	B. 27
C. 28	D. 29

Q27. How many integers from 19 through 128, inclusive, are divisible by 10 but not by 20?

A. 4	B. 6
C. 5	D. 7

Q28. The values are 16, 22, 28, 34. If the smallest falls by 4 and the largest rises by 8, what is the new mean?

A. 25.0	B. 27.0
C. 28.0	D. 26.0

Q29. If $3x + 8 = 35$, what is x ?

A. 9	B. 8
C. 10	D. 27

Q30. If $2(x - 4) = 8$, what is x when x is a positive integer and the displayed equality is supplemented by $x + 4 = 12$?

A. 7	B. 8
C. 9	D. 16

Q31. The sum of two consecutive integers is 25. What is the smaller integer?

A. 13	B. 11
C. 12	D. 25

Q32. Five years ago A was half of A's age 18 years from now. What is A's present age?

A. 23	B. 33
C. 14	D. 28

Q33. What is the positive solution of $x^2 = 100$?

A. 10	B. -10
C. 100	D. 11

Q34. Which value is the least integer satisfying $2x + 1 > 22$?

A. 10	B. 11
C. 12	D. 22

Q35. A grant equals 30% of Rs 400. An administrative surcharge of 9% is then applied to the grant. What is the final amount?

A. 120	B. 121.80000000000001
C. 130.8	D. 156.0

Q36. A value of 1000 rises by 12% and then falls by 7%. What is the final value?

A. 1050	B. 1050.0
C. 1051.6	D. 1041.6

Q37. Rs 660 is divided in the ratio 6:3. What is the first share?

A. 440.0	B. 434.0
C. 446.0	D. 73.33333333333333

Q38. Groups of 24 and 34 have averages 44 and 64. What is their combined average?

A. 54.0	B. 55.72
C. 54.72	D. 56.72

Q39. An article costs Rs 700, is marked for a 19% profit, and then receives a 8% rebate on that marked selling price. What is the realised price?

A. 833.0	B. 777.0
C. 766.36	D. 774.36

Q40. A marked price of Rs 1200 is discounted by 14%. What is the sale price?

A. 1186	B. 1368.0
C. 1018.0	D. 1032.0

Q41. A mixture contains milk and water in the ratio 7:5. In 48 litres, how many litres are milk?

A. 28.0	B. 27.0
C. 4.0	D. 29.0

Q42. The average of 9 values is 44. After adding 56, what is the new average?

A. 44	B. 45.2
C. 50.0	D. 46.2

Q43. A can finish a task in 12 days and B in 16 days. How many days will they take together?

A. 28	B. 14.0
C. 6.86	D. 4

Q44. 16 workers finish a job in 15 days at equal efficiency. How many days will 22 workers take?

A. 15	B. 20.62
C. 11.91	D. 10.91

Q45. Two pipes fill a tank in 10 and 12 hours. If opened together, how long do they take?

A. 5.45	B. 22
C. 11.0	D. 6.45

Q46. An inlet fills a tank in 9 hours while a leak empties it in 24 hours. How long to fill together?

A. 6.55	B. 14.4
C. 15	D. 9

Q47. A is 6 times as efficient as B. If B alone takes 60 days, how many days does A take?

A. 60	B. 6
C. 10	D. 16

Q48. A team completes 0.47 of a job. What fraction remains, rounded to two decimals?

A. 0.47	B. 1.47
C. 0.63	D. 0.53

Q49. A vehicle's total journey time is 7 hours, including a halt of 60 minutes. It moves at 65 km/h whenever in motion. What distance is covered?

A. 390.0	B. 455
C. 325.0	D. 455.0

Q50. Over 320 km, how many hours are saved by increasing speed from 44 to 64 km/h?

A. 16.0	B. 2.27
C. 3.27	D. 1.27

Q51. A 220-metre train moves at 54 km/h. How many seconds does it take to clear a 110-metre platform?

A. 14.67	B. 24.0
C. 22.0	D. 20.0

Q52. A boat's still-water speed is 14 km/h and stream speed is 6 km/h. How long does it take to travel 16 km upstream?

A. 0.8	B. 8
C. 1.1428571428571428	D. 2

Q53. A runner completes 7 laps of a square field of side 24 m in 14 minutes. What is the runner's speed in metres per minute?

A. 48.0	B. 96
C. 41.142857142857146	D. 13.714285714285714

Q54. A car covers 120 km at 44 km/h and 180 km at 64 km/h. What is average speed?

A. 54.0	B. 54.15
---------	----------

C. 56.15	D. 52.15
----------	----------

Q55. A table reports district outputs (A=100, B=111, C=122, D=133). What is the total?

A. 456	B. 476
C. 466	D. 133

Q56. Using the table (A=100, B=111, C=122, D=133), what is the difference between the highest and lowest values?

A. 133	B. 100
C. 233	D. 33

Q57. Using the table (A=100, B=111, C=122, D=133), what is the average of the four values?

A. 116.5	B. 466
C. 233.0	D. 33

Q58. Using the table (A=100, B=111, C=122, D=133), by what percentage does D exceed A?

A. 24.81	B. 33.0
C. 33	D. 133.0

Q59. Year 1 values are A=100, B=111, C=122, D=133; Year 2 values are A=124, B=130, C=136, D=142. Which district has the largest absolute increase?

A. B	B. C
C. A	D. D

Q60. Using Year 2 (A=124, B=130, C=136, D=142), what fraction of the total belongs to B, rounded to two decimals?

A. 0.28	B. 4.09
C. 0.23	D. 0.24

Q61. Using Year 1 (A=100, B=111, C=122, D=133), if each unit earns Rs 6, what is D's revenue?

A. 798	B. 139
C. 133	D. 2796

Q62. Using Year 1 (A=100, B=111, C=122, D=133), what is the ratio A:D in simplest form?

A. 133:100	B. 100:133
C. 200:266	D. 233:1

Q63. All valuers are registered. No person lacking that status may sign valuations. Which conclusion necessarily follows?

A. Every registered person is one of the valuers.	B. Some valuers lack that status.
C. Every valuer is outside the class lacking that status.	D. No registered person may sign valuations.

Q64. If each letter is shifted forward by 4, how is INDIA coded?

A. INDIA	B. EMHRM
C. JODJB	D. MRHME

Q65. Complete the series: 6, 8, 12, 18, ?

A. 26	B. 25
C. 27	D. 24

Q66. Imran is the child of Fatima's only son. How is Imran related to Fatima?

A. Child	B. Grandchild
C. Niece or nephew	D. Sibling

Q67. Some firms are exporters. All exporters are registered. Which conclusion follows?

A. All firms are registered	B. No firms are registered
C. Some firms are registered	D. Some registered are not exporters

Q68. In a code, GOVERN is written as HPWFSO by shifting each letter forward once. How is COURT written?

A. COURT	B. USVPD
C. AAAAA	D. DPVSU

Q69. W, X, Y and Z sit in a row. W is left of X; Y is right of X; Z is left of W. Who is second from the left?

A. W	B. X
C. Y	D. Z

Q70. Four tasks Survey, Design, Build and Inspect occur consecutively. Survey precedes Design; Build follows Design; Inspect precedes Survey. Which task is third?

A. Survey	B. Design
C. Build	D. Inspect

Q71. Five persons stand by height. P is taller than R but shorter than T. V is shorter than R. X is taller than T. Who is tallest?

A. T	B. P
C. X	D. V

Q72. Construction is after Tender but before Audit. Design is before Tender. Which is earliest?

A. Tender	B. Construction
C. Audit	D. Design

Q73. A person faces North and turns right 4 time(s), each by 90 degrees. Which direction is faced?

A. North	B. East
C. South	D. West

Q74. A walker goes 12 km north and 16 km east. How far is the endpoint from the start?

A. 28 km	B. 20 km
C. 4 km	D. 192 km

Q75. A person starts facing North, turns left, then turns left again. Which direction is now faced?

A. North	B. East
C. South	D. West

Q76. A point B is 8 km south of A, and C is 8 km east of B. In which direction is C from A?

A. North-East	B. South-West
C. North-West	D. South-East

Q77. What is x? Statement 1: $x+6=16$. Statement 2: $2x=20$.

A. Each statement alone is sufficient.	B. Statement 1 alone is sufficient, but statement 2 alone is not.
C. Statement 2 alone is sufficient, but statement 1 alone is not.	D. Both statements together are sufficient, but neither alone is sufficient.

Q78. What is the area of a rectangle? Statement 1: its length is 11 cm. Statement 2: its breadth is 8 cm.

A. Statement 1 alone is sufficient, but statement 2 alone is not.	B. Both statements together are sufficient, but neither alone is sufficient.
C. Statement 2 alone is sufficient, but statement 1 alone is not.	D. Each statement alone is sufficient.

Q79. Is integer n even? Statement 1: n is divisible by 20. Statement 2: n is divisible by 10.

A. Statement 1 alone is sufficient, but statement 2 alone is not.	B. Statement 2 alone is sufficient, but statement 1 alone is not.
---	---

C. Each statement alone is sufficient.	D. Both statements together are sufficient, but neither alone is sufficient.
--	--

Q80. What is y ? Statement 1: y is positive. Statement 2: $y^2=100$.

A. Statement 1 alone is sufficient, but statement 2 alone is not.	B. Statement 2 alone is sufficient, but statement 1 alone is not.
C. Each statement alone is sufficient.	D. Both statements together are sufficient, but neither alone is sufficient.

END OF PAPER
