PYQS AND ANSWER PRACTICE	10

Official Language - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Original MCQs 1-36

OM1. Which statement most accurately reproduces Article 343(1)?

A. Hindi in Devanagari script is the official language of the Union. B. English is the sole constitutional language of Union administration. C. Hindi is the national language of India. D. Every Eighth-Schedule language is an official language of the Union.

Answer: A.

[FACT] Article 343(1) uses the functional expression **official language of the Union**. [LIMIT] Neither “national language” nor a universal Union-official status for all 22 scheduled languages follows from it.

OM2. How does the Official Languages Act, 1963 describe post-transition use of English for specified Union purposes?

A. English becomes the national language for legal purposes. B. English may continue to be used in addition to Hindi. C. English survives only through executive convention. D. English becomes a scheduled language.

Answer: B.

[FACT] Section 3 uses “in addition to Hindi”; it does not constitutionally label English an “associate official language”. Its continuation is statutory, not a mere convention.

OM3. The constitutionally specified form of numerals for the official purposes of the Union is:

A. Devanagari numerals exclusively. B. Roman numerals. C. The international form of Indian numerals. D. A form selected annually by Parliament.

Answer: C.

[FACT] Article 343(1) separately fixes Hindi in Devanagari and the **international form of Indian numerals**. Script and numeral form must not be conflated.

OM4. Article 344(1) required constitution of the Official Language Commission:

A. whenever either House passed a simple resolution. B. every five years indefinitely. C. every ten years indefinitely. D. at five years and at ten years from constitutional commencement.

Answer: D.

[FACT] The wording identifies two historical milestones measured from commencement. [LIMIT] It does not establish a commission recurring every ten years forever.

OM5. Which consideration is expressly built into Article 344's recommendation process?

A. The just claims and interests of persons belonging to non-Hindi-speaking areas in public services. B. Abolition of English in all courts. C. Automatic preference for every Hindi-proficient employee. D. Conversion of scheduled languages into Union official languages.

Answer: A.

[FACT] Article 344(3) requires regard to industrial, cultural and scientific advancement and to non-Hindi-speaking interests. The constitutional design is balancing, not one-directional replacement.

OM6. The parliamentary committee under Article 344(4) consists of:

A. 15 Lok Sabha and 15 Rajya Sabha members nominated by the President. B. 20 Lok Sabha and 10 Rajya Sabha members elected by PR-STV in their Houses. C. 20 Lok Sabha and 10 Rajya Sabha members nominated by the Home Minister. D. 30 members drawn only from Eighth-Schedule language States.

Answer: B.

[FACT] Its 30 members are elected by the respective Houses through proportional representation by the single transferable vote. Similar composition does not make it identical to the later section 4 statutory committee.

OM7. Under Article 345, a State Legislature may adopt:

A. only a language listed in the Eighth Schedule. B. Hindi alone. C. one or more languages in use in the State or Hindi, for all or specified official purposes. D. any foreign language without legislation.

Answer: C.

[FACT] Scheduled status is not a gate to State official-language adoption. The power is legislative and operates subject to Articles 346 and 347.

OM8. Article 347 becomes relevant when:

A. the Supreme Court recommends a national language. B. a State Cabinet alone requests a new scheduled language. C. Parliament passes an ordinary law changing a State's official language. D. the President is satisfied that a substantial proportion of a State's population desires official recognition of a language spoken by them.

Answer: D.

[FACT] Demand plus presidential satisfaction activates a discretionary direction for the whole or part of a State and for a specified purpose. [LIMIT] No fixed constitutional percentage defines "substantial proportion".

OM9. Article 348(1) principally controls:

A. Supreme Court and High Court proceedings and authoritative texts of specified legislative instruments. B. every communication between two private citizens. C. primary-school language throughout India. D. inclusion in the Eighth Schedule.

Answer: A.

[FACT] Article 348 covers adjudicative proceedings and authoritative Bills, Acts, ordinances and delegated texts. It is wider than a "courtroom language only" provision.

OM10. Which is correct about Article 348(2)?

A. It automatically applies to all subordinate courts and tribunals. B. With previous presidential consent, a Governor may authorise Hindi or another State official language in High Court proceedings, but the clause excludes judgments, decrees and orders. C. A Governor may change Supreme Court language without consent. D. A State Legislature may make every High Court judgment authoritative without English.

Answer: B.

[FACT] Both the prior-consent gate and judgment exception are express. Non-English High Court judgments require the separate statutory route in section 7.

OM11. Article 349's special procedure is best understood as:

A. a current ordinary gate for every language Bill. B. a mechanism for adding languages to the Eighth Schedule. C. a safeguard expressly bounded to the first fifteen years after commencement. D. a permanent referendum requirement.

Answer: C.

[FACT] Its operative period ended in 1965 even though the provision remains printed in the Constitution. It should not be presented as a perpetual current precondition.

OM12. Article 350 protects:

A. an absolute right to conduct every proceeding in any chosen language. B. a right to receive every final order in one's mother tongue. C. a right limited to scheduled-language speakers. D. submission of a grievance representation in a language used in the Union or State, as applicable.

Answer: D.

[FACT] Article 350 protects the language of entry into the grievance-redress process. [LIMIT] It does not automatically determine the language of every later administrative stage.

OM13. Article 350A is accurately described as:

A. an endeavour by States and local authorities to provide adequate mother-tongue instruction facilities at the primary stage for linguistic-minority children. B. a rule confined to Eighth-Schedule languages. C. a power of Parliament to prescribe one national medium. D. an absolute Fundamental Right to a particular school.

Answer: A.

[FACT] The textual verb is “shall be the endeavour”, with presidential direction power. Accurate answers preserve both the protective objective and the qualified drafting.

OM14. The Special Officer for Linguistic Minorities under Article 350B primarily:

A. adjudicates binding language disputes. B. investigates constitutional safeguards and reports to the President. C. amends State official-language laws. D. grants Eighth-Schedule status.

Answer: B.

[FACT] The President causes the reports to be laid before Parliament and sent to concerned States. The office investigates and reports; it is not a court or constituent authority.

OM15. Article 351 directs enrichment of Hindi by:

A. replacing all regional languages. B. declaring Hindi the national language. C. assimilating forms and expressions from Hindustani and scheduled languages, with vocabulary primarily from Sanskrit and secondarily from other languages. D. drawing vocabulary exclusively from English.

Answer: C.

[FACT] Composite culture and multilingual assimilation are in the text. [LIMIT] Article 351 must be harmonised with State autonomy, minority safeguards and statutory English use.

OM16. Section 3(1) of the Official Languages Act provides that, after the appointed day:

A. Hindi alone shall be used for every Union purpose. B. each State may terminate English for Parliament. C. English can be used only in the Supreme Court. D. English may continue in addition to Hindi for specified Union purposes and parliamentary business.

Answer: D.

[FACT] The statute operationalises Article 343(3). It prevents the common error that English legally vanished when the Article 343(2) transition expired.

OM17. Which category falls within the bilingual-document requirement of section 3(3)?

A. Union resolutions, general orders, notifications, specified reports, contracts, licences, notices and tender forms. B. State school textbooks. C. Every private contract in India. D. Only oral parliamentary debate.

Answer: A.

[FACT] Section 3(3) targets high-value official instruments and specified government-controlled bodies. It does not impose bilingualism on every private document.

OM18. Section 3(4) requires rules for Union official work to protect:

A. only employees proficient in both Hindi and English. B. efficiency, public interest and employees proficient in either Hindi or English from disadvantage merely because they lack both. C. State power to alter Article 348. D. one-language working regardless of delay.

Answer: B.

[FACT] Employee non-disadvantage is an express statutory safeguard. Promotion of Hindi is therefore legally accompanied by operational efficiency and fairness controls.

OM19. The discontinuance condition in section 3(5) requires:

A. a Union Cabinet decision. B. one non-Hindi State resolution and a Lok Sabha resolution. C. resolutions of all States that have not adopted Hindi as official language, followed by a discontinuance resolution in each House of Parliament. D. a recommendation of the Committee of Parliament on Official Language alone.

Answer: C.

[FACT] The provision creates a double legislative lock. [LIMIT] It applies to the exact section 3 provisions named in subsection (5), not every possible use of English in India.

OM20. Which distinction between the Article 344 committee and the section 4 committee is correct?

A. The first is judicial and the second executive. B. Both arise from the same recurring constitutional commission. C. The first has 30 members and the second 15. D. The first examines Article 344 Commission recommendations; the second is a statutory body reviewing progress of Hindi use for Union official purposes.

Answer: D.

[FACT] They share a 20:10 composition but differ in source, trigger and function. A current statutory report does not amend Part XVII.

OM21. Section 5 of the Official Languages Act principally concerns:

A. authorised Hindi translations of Central Acts, presidential ordinances and specified delegated instruments. B. recognition of classical languages. C. State choice of official language. D. mother-tongue primary instruction.

Answer: A.

[FACT] Presidential authority and Gazette publication give specified Hindi translations authoritative status. Translation accuracy must still track the current amended text.

OM22. Section 6 permits, in specified cases:

A. executive addition to the Eighth Schedule. B. an authorised Hindi translation of a State Act or ordinance whose prescribed language is other than Hindi. C. deletion of the Article 348(3) English translation. D. automatic Hindi judgments in every High Court.

Answer: B.

[FACT] Section 6 supplements rather than erases Article 348(3). It is a legal-authority route, not a general translation service.

OM23. Under section 7, a non-English High Court judgment, decree or order:

A. becomes valid only after a constitutional amendment. B. needs no presidential consent. C. may use authorised Hindi or a State official language in addition to English and must be accompanied by a High Court-authorized English translation. D. displaces English for all-India precedent.

Answer: C.

[FACT] Section 7 fills the field excluded by Article 348(2)'s proviso. The English translation preserves wider legal usability.

OM24. The Official Languages (Use for Official Purposes of the Union) Rules, 1976 extend:

A. only to Union Territories. B. only to Region A. C. to every State without exception. D. to India except Tamil Nadu.

Answer: D.

[FACT] The extent exception appears in the official Rules text. [LIMIT] Regions A/B/C are administrative categories, not constitutional rankings of languages or States.

OM25. Under Rule 5, a communication received in Hindi should be:

A. replied to in Hindi. B. returned untranslated. C. answered only in English. D. referred automatically to Parliament.

Answer: A.

[FACT] Rule 5 is a reply-language rule. It must be distinguished from Rule 3's regional communication matrix and Rule 6's bilingual document obligation.

OM26. For a Central Government office communicating with a non-Central recipient in Region C, the Rules ordinarily require:

A. any scheduled language selected by the sender. B. English. C. the recipient's mother tongue only. D. Sanskrit.

Answer: B.

[FACT] Region C is the residual category outside Regions A and B, and the operative rule uses English for this communication route. Always identify both sender and recipient before applying a region.

OM27. The Rules distinguish "proficiency in Hindi" from "working knowledge of Hindi" principally in:

A. Rules 1 and 2. B. Rules 3 and 4. C. Rules 9 and 10. D. Rules 11 and 12 only.

Answer: C.

[FACT] The distinction supports differentiated administrative implementation. It is not a constitutional classification of citizens.

OM28. The Eighth Schedule is expressly linked in the constitutional text to:

A. Articles 29 and 30 only. B. Articles 345 and 348 only. C. Articles 350A and 350B only. D. Articles 344(1) and 351.

Answer: D.

[FACT] It structures representation in the Article 344 Commission and supplies a multilingual enrichment base for Article 351. Scheduled status does not itself make a language official everywhere.

OM29. Which language was added by the Twenty-first Amendment Act, 1967?

A. Sindhi. B. Nepali. C. Bodo. D. Maithili.

Answer: A.

[FACT] Sindhi took the original 14-language Schedule to 15. Amendment number, language and commencement should be learned as a linked unit.

OM30. The Seventy-first Amendment Act, 1992 added:

A. Sindhi, Sanskrit and Urdu. B. Konkani, Manipuri and Nepali. C. Bodo, Dogri and Maithili. D. Odia, Pali and Prakrit.

Answer: B.

[FACT] This exact triad is the legal core tested by the verified 2024 Prelims PYQ. Maithili belongs to the later Ninety-second Amendment.

OM31. The Ninety-second Amendment Act, 2003 added:

A. Bengali, Assamese, Tamil and Telugu. B. Konkani, Manipuri, Nepali and Sindhi. C. Bodo, Dogri, Maithili and Santhali. D. Pali, Prakrit, Marathi and Odia.

Answer: C.

[FACT] The Act title year is 2003 and its effective date was 7 January 2004. These four additions raised the total from 18 to 22.

OM32. The Ninety-sixth Amendment Act, 2011:

A. removed English from Parliament. B. added a twenty-third language. C. moved Maithili to the Seventh Schedule. D. substituted "Odia" for "Oriya" without changing the language count.

Answer: D.

[FACT] It was a nomenclature change, not a new inclusion. The current Eighth-Schedule total therefore remains 22.

OM33. A new language can be added to the Eighth Schedule through:

A. a constitutional amendment under Article 368. B. a notification of the Ministry of Culture alone. C. an Official Language Committee recommendation. D. a resolution of one State Legislature alone.

Answer: A.

[FACT] Public demands and committee recommendations may initiate debate but do not alter the Schedule. Enacted constitutional text is the control.

OM34. Which statement correctly distinguishes scheduled and classical-language status?

A. Scheduled status automatically makes a language the Union's official language. B. Scheduled status is constitutional; classical status is a separate Union executive recognition scheme. C. Both are conferred only by constitutional amendment. D. Classical status automatically makes a language a High Court language.

Answer: B.

[CURRENT] Official material reported eleven classical languages after the October 2024 additions. [LIMIT] That count and scheme do not alter the 22-language Eighth Schedule or Part XVII.

OM35. The three-language formula is best classified as:

A. an Article 343 command. B. a rule under section 7 of the Official Languages Act. C. an education-policy framework implemented through federal and State choices. D. an Eighth-Schedule amendment mechanism.

Answer: C.

[FACT] It belongs to education policy rather than Part XVII's official-language law. [ANALYSIS] Its legitimacy and design must therefore be debated through multilingual learning, choice, capacity and federal autonomy.

OM36. Which reform principle best reconciles multilingual legal access with authoritative uniformity?

A. Abolish version control once a translation is published. B. Permit any portal to declare an authoritative statute. C. Treat every machine translation as legally binding. D. Use machine assistance with bilingual legal review, terminology control, version verification and authorised publication.

Answer: D.

[ANALYSIS] Technology can reduce access costs, but legal authority remains institutional. [LIMIT] An AI summary or general-information translation cannot become controlling law merely because it is fluent.

Remedial MCQs 37-48

RM37. - category correction

A candidate writes, "Hindi is India's national language under Article 343." Which correction is exact?

A. Article 343 makes Hindi in Devanagari the official language of the Union; the Constitution declares no national language. B. Article 343 makes English the national language. C. Article 343 concerns only State official languages. D. Article 343 makes all scheduled languages national languages.

Answer: A.

[FACT] "Official" identifies authorised governmental use, whereas "national" would make a different symbolic claim. UPSC answers should reproduce the constitutional category, not political shorthand.

RM38. - the 1965 trap

What legally occurred on 26 January 1965?

A. English became unconstitutional. B. The Article 343(2) transition ended, while statutory continuation under the Official Languages Act governed specified uses. C. The Eighth Schedule expanded to 22 languages. D. Hindi became the language of every High Court judgment.

Answer: B.

[FACT] The expiry of a transition is not the disappearance of English. Article 343(3) enabled Parliament to provide the post-transition statutory regime.

RM39. - committee correction

Why must the Article 344 committee and section 4 committee not be collapsed?

A. One adds scheduled languages while the other appoints judges. B. Only one reports to the President. C. They have different legal sources, triggers and functions despite similar 30-member composition. D. Only one includes Members of Parliament.

Answer: C.

[FACT] The Article 344 body examines Commission recommendations; the Act's section 4 body reviews progress in Hindi use for Union official purposes. Neither can amend the Constitution through its report.

RM40. - State-language correction

Which statement is correct?

A. A State may adopt only Hindi or English. B. A State language must be in the Eighth Schedule. C. A State language must first receive classical status. D. Article 345 permits one or more languages in use in the State or Hindi, subject to Articles 346-347.

Answer: D.

[FACT] State administrative choice and Eighth-Schedule recognition are separate legal categories. This distinction is central to India's asymmetric linguistic federalism.

RM41. - judgment correction

A Governor wishes to authorise a State official language for High Court judgments. Which legal route is relevant?

A. Section 7, with previous presidential consent and an accompanying High Court-authorized English translation. B. Article 345 alone. C. Article 350A alone. D. A classical-language notification.

Answer: A.

[FACT] Article 348(2) covers proceedings but expressly excludes judgments, decrees and orders. Section 7 supplies the separate route while retaining the English bridge.

RM42. - safeguard calibration

Which formulation best respects Article 350A's text?

A. It guarantees every child a school of choice in the mother tongue. B. It makes adequate primary-stage mother-tongue facilities for linguistic-minority children an endeavour of States and local authorities, backed by presidential direction power. C. It applies only to languages in the Eighth Schedule. D. It abolishes State discretion over education administration.

Answer: B.

[FACT] The wording is protective but qualified. [LIMIT] It should neither be reduced to a non-binding aspiration nor inflated into an unlimited school-specific Fundamental Right.

RM43. - amendment cluster

Which set consists entirely of languages added by the Ninety-second Amendment?

A. Konkani, Manipuri, Nepali, Sindhi. B. Bodo, Dogri, Nepali, Santhali. C. Bodo, Dogri, Maithili, Santhali. D. Assamese, Bengali, Odia, Urdu.

Answer: C.

[FACT] Use the four-language cluster as one memory unit. The amendment was enacted in 2003 and took effect on 7 January 2004.

RM44. - count correction

Why did the Ninety-sixth Amendment not raise the Eighth-Schedule total above 22?

A. It concerned a non-scheduled language. B. It was struck down. C. It was only a parliamentary resolution. D. It renamed "Oriya" as "Odia" rather than adding another language.

Answer: D.

[FACT] Nomenclature change and language addition have different count effects. The official Constitution as on 1 May 2026 still lists 22.

RM45. - Rules correction

Regions A, B and C under the 1976 Rules are:

A. administrative categories for Union official communications. B. constitutional rankings of language communities. C. categories of classical languages. D. divisions of the Eighth Schedule.

Answer: A.

[FACT] Their purpose is operational implementation under the Act and Rules. They neither rank cultures nor determine every State's own official language.

RM46. - report correction

The Committee of Parliament on Official Language publishes a recommendation. What is its immediate legal status?

A. It adds a language to the Eighth Schedule. B. It is a recommendation within the statutory process, not self-executing enacted law. C. It automatically deletes English from section 3. D. It automatically amends Article 343.

Answer: B.

[FACT] The President may consider the report and State views and issue directions consistent with section 3. A report must never be described as constituent legislation.

RM47. - PYQ evidence discipline

The local routing ledger says the official 2024 Set-A key exists but does not record Q72's answer letter. What may the workbook safely do?

A. Relabel a coaching key as the UPSC key. B. Omit the constitutional concept entirely. C. Resolve the amendment-language statements from official texts while explicitly declining to claim an unrecorded official key letter. D. Invent the most likely official letter.

Answer: C.

[LIMIT] Legal reasoning may identify that the 71st Amendment added Konkani, Manipuri and Nepali and not Maithili. Evidence discipline still forbids representing an unrecorded letter as the locally verified official key.

RM48. - integrated constitutional design

Which statement best captures India's official-language settlement?

A. It makes every scheduled language official for every purpose. B. It is a single-language constitutional order temporarily tolerating diversity. C. It leaves language entirely outside law. D. It combines Union Hindi, statutory English, State choice, court-text controls, minority safeguards and a directive to develop Hindi within composite culture.

Answer: D.

[ANALYSIS] The system is layered accommodation rather than a single hierarchy. [LIMIT] Promotion, access and legal uniformity must each remain within the authority and safeguards of its own constitutional or statutory layer.

PYQS AND ANSWER PRACTICE

Verified relevant PYQ corpus

[FACT] The audited local routing ledgers identify **one direct verified UPSC PYQ** for this owner: **UPSC Civil Services Preliminary Examination 2024, GS Paper I, Set A, Question 72**. No adjacent question has been relabelled as an official-language PYQ merely to enlarge the corpus.

UPSC Prelims 2024, GS Paper I, Set A, Q72

The Constitution (71st Amendment) Act, 1992 amends the Eighth Schedule to the Constitution to include which of the following languages? 1. Konkani 2. Manipuri 3. Nepali 4. Maithili Select the correct answer using the code given below: (a) 1, 2 and 3 (b) 1, 2 and 4 (c) 1, 3 and 4 (d) 2, 3 and 4

Demand decode: The question tests exact amendment-language mapping, not general awareness of the present 22-language list.

Conceptual resolution: [FACT] The official Seventy-first Amendment text added **Konkani, Manipuri and Nepali**.

[FACT] **Maithili** was added later by the Ninety-second Amendment together with Bodo, Dogri and Santhali. Therefore statements **1, 2 and 3** match the constitutional-amendment record, while statement 4 does not belong to the 71st Amendment.

[LIMIT] The routed ledger records that an official Set-A key is locally available but does **not** record its answer letter. This package therefore teaches and resolves the legal content without claiming that any option letter is the locally recorded official key.

Elimination lesson: Build the sequence **21st: Sindhi -> 71st: Konkani-Manipuri-Nepali -> 92nd:**

Bodo-Dogri-Maithili-Santhali -> 96th: Oriya renamed Odia. The 96th Amendment changed a name, not the total.

Original solved Mains practice

M1. Official language, not national language (10 marks, 150 words)

Question: "The Constitution created an official language for the Union without declaring a national language." Explain the legal distinction and its constitutional wisdom.

Model solution

Thesis: [FACT] Article 343(1) authorises **Hindi in Devanagari** for Union official purposes; it does not confer a national-language title. The distinction separates governmental functionality from exclusive national identity.

Claim -> evidence -> analysis -> qualification

1. **Functional authority:** Article 343 fixes the Union's working language and international-form numerals. This creates administrative certainty. **Qualification:** it does not make Hindi the official language of every State, court or citizen.
2. **Continuity through law:** Article 343(3) and section 3 of the Official Languages Act permit English in addition to Hindi for specified purposes. This avoids a disruptive linguistic cliff. **Qualification:** "associate official language" is not the statute's controlling term.
3. **Plural federal design:** Article 345 allows States to adopt languages in use in the State or Hindi. This recognises territorial linguistic diversity. **Qualification:** State choice remains subject to intergovernmental and minority safeguards.

Verdict: [ANALYSIS] The absence of a declared national language is not a constitutional vacuum; it is a technique of unity without linguistic ownership by one community.

Why this earns marks: It answers the precise distinction, names Articles 343 and 345 plus section 3, and qualifies the reach of each proposition.

How to improve this answer: Add Article 348 only if space permits; in 150 words compress the answer to one definition, three source-based contrasts and the federal verdict.

Compression plan: Preserve the named legal source, one mechanism, one qualification and the reasoned verdict; remove secondary illustration first.

M2. Two parliamentary committees (10 marks, 150 words)

Question: Distinguish the parliamentary committee under Article 344 from the Committee on Official Language under section 4 of the Official Languages Act, 1963.

Model solution

Thesis: [FACT] The bodies share a 30-member, 20 Lok Sabha/10 Rajya Sabha, PR-STV design, but similarity of composition cannot erase distinct legal parentage.

Dimension	Article 344(4) committee	Section 4 committee
Source	Constitution	Official Languages Act, 1963
Trigger	Article 344 Commission recommendations	Ten years after section 3 commencement plus prescribed parliamentary resolution
Work	Examines Commission recommendations	Reviews progress of Hindi for Union official purposes
Output	Opinion to President	Recommendations to President; report laid before Parliament and sent to States

Analysis: The constitutional committee belonged to the transition-review architecture; the statutory committee institutionalises continuing policy review. **Named safeguard:** section 4(4) prevents presidential directions from contradicting section 3.

Qualification: [LIMIT] Neither committee's report amends Part XVII, discontinues English under section 3(5), or changes the Eighth Schedule.

Verdict: The correct UPSC method is to identify **source -> trigger -> function -> legal effect**, not rely on the shared 20:10 composition.

Why this earns marks: It uses a direct comparison, named provisions and an express legal-effect limitation.

How to improve this answer: State the different trigger and report route in the first two lines; for a 10-marker retain the comparison table logic and delete institutional history.

Compression plan: Preserve the named legal source, one mechanism, one qualification and the reasoned verdict; remove secondary illustration first.

M3. State autonomy and linguistic minorities (10 marks, 150 words)

Question: How do Articles 345-347 and 350-350B balance State language autonomy with protection of linguistic minorities?

Model solution

Thesis: Part XVII gives States meaningful administrative choice but surrounds majoritarian language policy with recognition, access, education and reporting safeguards.

1. **State choice:** [FACT] Article 345 permits State law to adopt one or more languages in use in the State or Hindi. This supports federal autonomy. **Qualification:** the language need not be scheduled, but the power is subject to Articles 346-347.
2. **Recognition:** Article 347 allows a presidential direction where a substantial proportion seeks recognition. It creates a route for sub-State claims. **Qualification:** demand is not automatic entitlement; satisfaction and specified purpose matter.
3. **Administrative access:** Article 350 permits grievance representation in a language used in the Union/State. It lowers the entry barrier. **Qualification:** it does not fix every later proceeding's language.
4. **Education and oversight:** Articles 350A and 350B provide a primary-stage mother-tongue endeavour and an investigating/reporting officer.

Verdict: [ANALYSIS] The scheme is autonomy with internal pluralism, not unchecked State linguistic sovereignty.

Why this earns marks: It links four named safeguards to their mechanisms and preserves their textual limits.

How to improve this answer: Add one implementation gap tied to mother-tongue facilities; compress by grouping Articles 347/350 as access and 350A/350B as facility/oversight.

Compression plan: Preserve the named legal source, one mechanism, one qualification and the reasoned verdict; remove secondary illustration first.

M4. English continuation as federal accommodation (15 marks, 250 words)

Question: Examine how the Official Languages Act, 1963 transformed a constitutional transition into a durable federal accommodation.

Model solution

Thesis: [FACT] Article 343(2) created a fifteen-year transition, but Article 343(3) anticipated parliamentary legislation. The 1963 Act, especially substituted section 3 effective 8 January 1968, converted transition into a guarded bilingual working settlement.

Claim 1 - continuity: Section 3(1) allows English to continue **in addition to Hindi** for specified Union purposes and parliamentary business. **Analysis:** administration and law did not face an abrupt 1965 break. **Qualification:** the Act does not constitutionally declare English an "associate official language".

Claim 2 - federal communication: The provisos require English between the Union and a State that has not adopted Hindi and require English translation where a Hindi State communicates in Hindi with a non-Hindi State. **Analysis:** English operates as a consent-sensitive bridge. **Qualification:** voluntary Hindi use and State agreements remain possible.

Claim 3 - administrative fairness: Section 3(2) provides translation during staff transition; section 3(3) mandates bilingual high-value documents; section 3(4) protects efficiency, public interest and employees proficient in either language. **Analysis:** language promotion is tied to service delivery and non-disadvantage.

Claim 4 - federal lock: Section 3(5) requires resolutions from all non-Hindi-official-language State Legislatures and then each House of Parliament before specified English-use provisions can discontinue. **Analysis:** unilateral

executive termination is barred. **Qualification:** the lock covers the exact provisions named in subsection (5), not every use of English.

Verdict: [ANALYSIS] The Act's durability comes not from cultural victory of English but from legislated consent, translation and employee safeguards-an accommodation that protects both progressive Hindi use and non-Hindi federal confidence.

Why this earns marks: It follows the directive, uses four statutory mechanisms and gives a qualified federal verdict rather than a slogan.

How to improve this answer: Name section 3(5) conditions exactly and avoid political generalisation; in exam length retain communication, bilingual-document, employee and consent safeguards.

Compression plan: Preserve the named legal source, one mechanism, one qualification and the reasoned verdict; remove secondary illustration first.

M5. Higher-court language and access (15 marks, 250 words)

Question: "Multilingual access to justice must be expanded without fragmenting authoritative legal communication." Analyse with reference to Article 348 and the Official Languages Act.

Model solution

Thesis: Article 348 creates an English baseline for the Supreme Court, High Courts and authoritative legal texts; the Act adds controlled translation routes. The design seeks nationwide precedential usability, but it also generates an access burden for many litigants.

Uniformity claim: [FACT] Article 348(1) keeps higher-court proceedings and specified authoritative legislative texts in English until Parliament otherwise provides. **Evidence-to-analysis:** a common text reduces inter-State ambiguity and supports a shared appellate system. **Qualification:** legal uniformity is not the same as citizen comprehension.

Controlled pluralisation: Article 348(2) permits a Governor, with previous presidential consent, to authorise Hindi or another State official language in High Court proceedings, but excludes judgments, decrees and orders. Section 7 separately permits those outputs in an authorised language **in addition to English**, with a High Court-authorised English translation. **Analysis:** access expands while a common bridge text survives. **Qualification:** authorisation is not automatic merely because a State uses that language administratively.

Authoritative translation: Sections 5-6 and Article 348(3) identify who may authorise Hindi/English translations of Central and State legal instruments. **Analysis:** legal status depends on authority, Gazette publication and current version, not linguistic fluency alone.

Reform: [ANALYSIS] Multilingual cause lists, plain-language summaries, interpretation support, terminology banks and machine-assisted drafts can improve access. **Qualification:** final legal translations require bilingual expert review, amendment tracking and visible identification of the controlling text.

Verdict: India should pursue multilingual **access around and through** the authoritative-text framework, not replace legal certainty with unverified parallel versions.

Why this earns marks: It balances access and uniformity through exact constitutional/statutory routes and offers legally bounded reform.

How to improve this answer: Distinguish proceedings from judgments before discussing technology; compress reforms into authorised translation, human review and version control.

Compression plan: Preserve the named legal source, one mechanism, one qualification and the reasoned verdict; remove secondary illustration first.

M6. Expanding the Eighth Schedule (15 marks, 250 words)

Question: Should the Eighth Schedule be expanded further? Analyse the claims of linguistic recognition against constitutional and administrative concerns.

Model solution

Thesis: [FACT] The Schedule currently contains 22 languages and is textually linked to Articles 344(1) and 351. Expansion may advance recognition, but scheduled status must not be advertised as universal official-language

status.

Case for expansion

- **Recognition and dignity:** Constitutional listing can affirm historically marginalised language communities. **Evidence:** earlier amendments admitted Sindhi; Konkani, Manipuri and Nepali; and Bodo, Dogri, Maithili and Santhali. **Analysis:** the Constitution has accommodated linguistic claims over time. **Qualification:** inclusion alone cannot secure everyday intergenerational use.
- **Development support:** Scheduled representation enters Article 344's Commission design and Article 351's enrichment framework. **Analysis:** it can improve visibility in public institutions. **Qualification:** actual education, publishing and digital resources require separate capacity.

Concerns

- **Criteria and equity:** [ANALYSIS] Selection without transparent principles may produce unequal treatment among comparable claims. **Qualification:** no fixed count of pending demands should be treated as enacted fact.
- **Administrative expectations:** More listed languages may increase translation, examination and resource expectations. **Analysis:** capacity costs are real. **Qualification:** they do not by themselves defeat a justice claim.
- **Category confusion:** Scheduled status does not automatically change Article 343, State laws, Article 348 or classical status.

Route: [FACT] Addition requires an Article 368 constitutional amendment; a committee report or executive notification is insufficient.

Verdict: Expansion should follow transparent, evidence-based and consultative criteria, paired with language-use capacity. Recognition must be honest about what the Schedule legally does and does not confer.

Why this earns marks: It supplies amendment history, both sides, the legal route and a graded rather than binary conclusion.

How to improve this answer: Prioritise Articles 344/351 and the amendment sequence; if short, omit illustrative demand names and preserve the recognition-versus-administration distinction.

Compression plan: Preserve the named legal source, one mechanism, one qualification and the reasoned verdict; remove secondary illustration first.

M7. Complete federal language settlement (20 marks, 300 words)

Question: Evaluate Part XVII and the Official Languages Act as an architecture of multilingual federal accommodation rather than a hierarchy of languages.

Model solution

Thesis: India's settlement distributes language authority by function: Union administration, State choice, intergovernmental communication, courts, minority access and Hindi development. Its coherence lies in layered accommodation, not in declaring one language nationally supreme.

Constitutional layers

1. **Union:** [FACT] Articles 343-344 establish Hindi-Devanagari, international-form numerals and a balanced transition-review machinery. **Analysis:** Hindi receives constitutional direction without a national-language title. **Qualification:** Article 344's Commission milestones are historical, not recurring every decade.
2. **States:** Articles 345-347 protect State legislative choice and a presidential route for substantial linguistic sections. **Analysis:** territorial autonomy is recognised. **Qualification:** Article 346 and statutory communication safeguards prevent isolation.
3. **Courts and texts:** Articles 348-349 preserve authoritative continuity. **Analysis:** common legal communication supports precedent. **Qualification:** Article 349 was time-bound and Article 348 requires controlled access reforms.
4. **Minorities and Hindi:** Articles 350, 350A and 350B protect grievance access, primary mother-tongue facilities and oversight; Article 351 directs Hindi's development through composite culture. **Analysis:** promotion and protection coexist. **Qualification:** neither side erases the other.

Statutory accommodation

Section 3 continues English, mandates bilingual instruments, protects employees and creates the section 3(5) State-plus-Parliament lock. Section 4 reviews progress, while sections 5-7 authorise controlled translations. **Analysis:** the Act turns political consent into legal procedure. **Qualification:** committee recommendations are not law by themselves.

Implementation

The 1976 Rules organise Union communications through Regions A/B/C, reply-language and employee-knowledge provisions. **Qualification:** these are administrative categories, not cultural rankings.

Evaluation: [ANALYSIS] Strengths are continuity, State space, minority safeguards and legal-text discipline. Weaknesses include English-access inequality, uneven translation capacity, recurrent imposition fears and symbolic expectations around Schedule inclusion.

Verdict: The settlement should be deepened through consent-based multilingual services and reliable translations, while retaining exact constitutional categories. Its democratic success depends on capacity and restraint as much as text.

Why this earns marks: It covers every Part XVII chapter, the Act and Rules, evaluates strengths/limits and ends with a legally grounded verdict.

How to improve this answer: Use a four-chapter skeleton and one statutory paragraph; compress current examples before deleting constitutional exceptions or the section 3(5) qualification.

Compression plan: Preserve the named legal source, one mechanism, one qualification and the reasoned verdict; remove secondary illustration first.

M8. Technology and multilingual governance (20 marks, 300 words)

Question: Assess the potential and limits of digital translation technologies in implementing India's official-language framework.

Model solution

Thesis: [ANALYSIS] Digital tools can lower the cost of multilingual administration and justice, but they cannot manufacture constitutional authority or eliminate the need for human legal accountability.

Potential

- **Citizen access:** multilingual forms, grievance interfaces and speech tools can operationalise the access logic of Article 350. **Analysis:** citizens can enter government systems without English dependence. **Qualification:** availability does not prove equal redress quality.
- **Administrative efficiency:** translation memory, terminology banks and bilingual search can support section 3(3) documents and Rules-based communication. **Analysis:** standardisation reduces repetitive work. **Qualification:** employee safeguards under section 3(4) still require fair workflow design and training.
- **Legal access:** machine-assisted drafts can accelerate authorised translations under Article 348 and sections 5-7. **Analysis:** faster updates improve usability after amendments. **Qualification:** a draft is not an authoritative text.
- **Minority inclusion:** digital learning resources may assist Article 350A-oriented mother-tongue facilities. **Qualification:** devices cannot substitute teachers, pedagogy or local-language content ecosystems.

Risks

1. **Semantic error:** legal qualifiers, negation and cross-references may be mistranslated.
2. **Version drift:** a translation may omit later amendments.
3. **Authority confusion:** users may treat an AI output as a binding statute or judgment.
4. **Bias and exclusion:** low-resource languages may receive poorer accuracy.
5. **Privacy:** speech and grievance tools may process sensitive citizen data.

Institutional design: [ANALYSIS] Use a pipeline of source-text identification -> machine-assisted draft -> bilingual legal expert review -> terminology and citation check -> amendment/version audit -> authorised publication -> correction log. Attach metadata identifying authority, date and controlling version.

Current/legal control: [CURRENT] The 22-language Schedule, section 3 safeguards and Article 348 hierarchy remain law; technology does not alter them. [LIMIT] No vendor accuracy claim should be treated as proof of legal reliability without audited domain testing.

Verdict: Technology should widen multilingual access **within** the constitutional chain of authority. Human responsibility, transparent versioning and federal consultation are the conditions that convert speed into trustworthy inclusion.

Why this earns marks: It links technology to named Articles and sections, separates benefits from legal authority, identifies concrete risks and proposes an auditable institutional workflow.

How to improve this answer: Open with the authority/access tension and add the 1973 Act route; in 250 words use a three-stage workflow-draft, legal verification, versioned authorised publication.

Compression plan: Preserve the named legal source, one mechanism, one qualification and the reasoned verdict; remove secondary illustration first.
