M6. Evaluate India's plural access-to-justice architecture.

Directive: Evaluate · **Marks:** 20 · **Suggested words:** 300

Demand decode: Define the exact institutional or doctrinal issue, answer the directive, use named constitutional/statutory/judicial evidence, include the strongest counterpoint and reach a qualified verdict.

Examiner opening: Evaluate India's plural access-to-justice architecture. The issue should be analysed through constitutional purpose, operating mechanism and enforceable limitation.

- **Operational Forms - claim -> evidence -> analysis -> qualification:** National, Mega, Mobile and E-Lok Adalats do not change the underlying legal character. Format is not jurisdiction.
- **Gram Nyayalaya - claim -> evidence -> analysis -> qualification:** It is a statutory local/mobile first-instance court with scheduled jurisdiction and appeals. Establishment and utilisation remain State-dependent.
- **Family Court - claim -> evidence -> analysis -> qualification:** It is a statutory court combining family adjudication with settlement orientation. Specialisation does not remove fairness or appeal rules.
- **Other Courts - claim -> evidence -> analysis -> qualification:** Fast Track/evening courts are designs; special/commercial courts depend on governing law. Source determines power.
- **Mediation - claim -> evidence -> analysis -> qualification:** Mediation produces a party-made settlement and differs from PLA merits adjudication. Check commencement, rules and exclusions.

Counter-position: Institutional reform can improve accountability, but overbroad regulation may displace autonomy, federal choice, expertise or access. The answer must identify the exact trade-off rather than offer a generic reform list.

Conclusion: Prefer a calibrated design that preserves the institution's constitutional purpose while adding transparency, independence, reason-giving and judicially reviewable safeguards.

M7. Consent is the legitimacy boundary of settlement justice. Discuss.

Directive: Discuss · **Marks:** 20 · **Suggested words:** 300

- **Article 39A - claim -> evidence -> analysis -> qualification:** It directs equal-opportunity justice and free legal aid. Statutes and Article 21 doctrine operationalise the directive.

Counter-position: Institutional reform can improve accountability, but overbroad regulation may displace autonomy, federal choice, expertise or access. The answer must identify the exact trade-off rather than offer a generic reform list.

Conclusion: Prefer a calibrated design that preserves the institution's constitutional purpose while adding transparency, independence, reason-giving and judicially reviewable safeguards.

Dispute-system design

A justice system should match forum to dispute:

Dispute characteristic	Suitable design consideration
Continuing relationship	conciliation/mediation with consent safeguards
Urgent coercive relief	court with enforceable interim jurisdiction
Technical recurring field	specialised court/tribunal with review
Low-value local claim	accessible first-instance forum and simplified procedure
Public-utility pre-litigation dispute	PLA only within statutory jurisdiction

No forum should be chosen merely to improve disposal statistics.

Consent quality and power asymmetry

Settlement legitimacy requires informed consent, access to advice, absence of intimidation, understanding of consequences and neutral facilitation. Women, workers, accident victims, consumers and persons with limited digital access may face unequal bargaining power. A signed settlement is therefore not the end of the fairness inquiry where fraud, coercion or jurisdictional defect is credibly alleged.

Digital justice

E-Lok Adalats and online mediation can reduce travel and scheduling cost, but require identity assurance, private communication, document access, language support, disability access and an offline alternative. Digital convenience must not become a condition for accessing justice.

Reform metrics

Evaluate access institutions by:

- time and cost saved;
- representation and informed-consent quality;
- settlement durability and compliance;
- geographic and social reach;
- reasoned handling of failed settlement;
- staffing, infrastructure and legal-aid quality; and
- review of jurisdictional or natural-justice error.

Lok Adalats and Other Courts: Rapid Constitutional Recall

- **Current-control rule:** NALSA, the Department of Justice and India Code sources for the Legal Services Authorities Act 1987, Gram Nyayalayas Act 2008 and Mediation Act 2023 were rechecked on 25 August 2026. No notification-sensitive pecuniary ceiling, operational court count or commencement assumption is frozen.
- **Factual caveat:** Ordinary Lok Adalats settle only by compromise and cannot decide merits. Permanent Lok Adalats are pre-litigation public-utility bodies that conciliate first and may then decide an eligible dispute. Courts, tribunals, mediation, schemes and operational Lok Adalat formats remain legally distinct.
