

SOLVED PRACTICE WORKBOOK

Issue-Based Prompt Scoping - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Issue-Based Prompt Scoping - Solved Practice Workbook 5

BASIC MCQS / REMEDIATION 5

Q1. Which option applies Issue-statement prompt as an Essay-method distinction?	5
Q2. Which use of Issue-statement prompt stays closest to the printed prompt?	5
Q3. Which statement preserves the strategy-versus-official-rule boundary for Issue-statement prompt?	5
Q4. Which option avoids the standard Essay-method trap about Issue-statement prompt?	5
Q5. Which option applies Classification gate as an Essay-method distinction?	6
Q6. Which use of Classification gate stays closest to the printed prompt?	6
Q7. Which statement preserves the strategy-versus-official-rule boundary for Classification gate?	6
Q8. Which option avoids the standard Essay-method trap about Classification gate?	6
Q9. Which option applies Directive or demand as an Essay-method distinction?	6
Q10. Which use of Directive or demand stays closest to the printed prompt?	7
Q11. Which statement preserves the strategy-versus-official-rule boundary for Directive or demand?	7
Q12. Which option avoids the standard Essay-method trap about Directive or demand?	7
Q13. Which option applies Object as an Essay-method distinction?	7
Q14. Which use of Object stays closest to the printed prompt?	7
Q15. Which statement preserves the strategy-versus-official-rule boundary for Object?	8
Q16. Which option avoids the standard Essay-method trap about Object?	8
Q17. Which option applies Qualifier as an Essay-method distinction?	8
Q18. Which use of Qualifier stays closest to the printed prompt?	8
Q19. Which statement preserves the strategy-versus-official-rule boundary for Qualifier?	8
Q20. Which option avoids the standard Essay-method trap about Qualifier?	9
Q21. Which option applies Geography as an Essay-method distinction?	9
Q22. Which use of Geography stays closest to the printed prompt?	9
Q23. Which statement preserves the strategy-versus-official-rule boundary for Geography?	9
Q24. Which option avoids the standard Essay-method trap about Geography?	9
Q25. Which option applies Time as an Essay-method distinction?	10
Q26. Which use of Time stays closest to the printed prompt?	10
Q27. Which statement preserves the strategy-versus-official-rule boundary for Time?	10

Q28. Which option avoids the standard Essay-method trap about Time?	10
Q29. Which option applies Actor as an Essay-method distinction?	10
Q30. Which use of Actor stays closest to the printed prompt?	11
Q31. Which statement preserves the strategy-versus-official-rule boundary for Actor?	11
Q32. Which option avoids the standard Essay-method trap about Actor?	11
Q33. Which option applies Scale as an Essay-method distinction?	11
Q34. Which use of Scale stays closest to the printed prompt?	11
Q35. Which statement preserves the strategy-versus-official-rule boundary for Scale?	12
Q36. Which option avoids the standard Essay-method trap about Scale?	12
Q37. Which option applies Causal demand as an Essay-method distinction?	12
Q38. Which use of Causal demand stays closest to the printed prompt?	12
Q39. Which statement preserves the strategy-versus-official-rule boundary for Causal demand?	12
Q40. Which option avoids the standard Essay-method trap about Causal demand?	13
Q41. Which option applies Evaluative demand as an Essay-method distinction?	13
Q42. Which use of Evaluative demand stays closest to the printed prompt?	13
Q43. Which statement preserves the strategy-versus-official-rule boundary for Evaluative demand?	13
Q44. Which option avoids the standard Essay-method trap about Evaluative demand?	13
Q45. Which option applies Hidden tension as an Essay-method distinction?	14
Q46. Which use of Hidden tension stays closest to the printed prompt?	14
Q47. Which statement preserves the strategy-versus-official-rule boundary for Hidden tension?	14
Q48. Which option avoids the standard Essay-method trap about Hidden tension?	14
Q49. Which option applies Excluded material as an Essay-method distinction?	14
Q50. Which use of Excluded material stays closest to the printed prompt?	15
Q51. Which statement preserves the strategy-versus-official-rule boundary for Excluded material?	15
Q52. Which option avoids the standard Essay-method trap about Excluded material?	15
Q53. Which option applies Definition boundary as an Essay-method distinction?	15
Q54. Which use of Definition boundary stays closest to the printed prompt?	15
Q55. Which statement preserves the strategy-versus-official-rule boundary for Definition boundary?	16
Q56. Which option avoids the standard Essay-method trap about Definition boundary?	16
Q57. Which option applies Thesis boundary as an Essay-method distinction?	16
Q58. Which use of Thesis boundary stays closest to the printed prompt?	16
Q59. Which statement preserves the strategy-versus-official-rule boundary for Thesis boundary?	16

Q60. Which option avoids the standard Essay-method trap about Thesis boundary?	17
Q61. Which option applies Scope creep as an Essay-method distinction?	17
Q62. Which use of Scope creep stays closest to the printed prompt?	17
Q63. Which statement preserves the strategy-versus-official-rule boundary for Scope creep?	17
Q64. Which option avoids the standard Essay-method trap about Scope creep?	17
Q65. Which option applies GS-answer collapse as an Essay-method distinction?	18
Q66. Which use of GS-answer collapse stays closest to the printed prompt?	18
Q67. Which statement preserves the strategy-versus-official-rule boundary for GS-answer collapse?	18
Q68. Which option avoids the standard Essay-method trap about GS-answer collapse?	18
Q69. Which option applies Policy-catalogue avoidance as an Essay-method distinction?	18
Q70. Which use of Policy-catalogue avoidance stays closest to the printed prompt?	19
Q71. Which statement preserves the strategy-versus-official-rule boundary for Policy-catalogue avoidance?	19
Q72. Which option avoids the standard Essay-method trap about Policy-catalogue avoidance?	19
Q73. Which option applies Counter-case as an Essay-method distinction?	19
Q74. Which use of Counter-case stays closest to the printed prompt?	19
Q75. Which statement preserves the strategy-versus-official-rule boundary for Counter-case?	20
Q76. Which option avoids the standard Essay-method trap about Counter-case?	20
Q77. Which option applies Synthesis as an Essay-method distinction?	20
Q78. Which use of Synthesis stays closest to the printed prompt?	20
Q79. Which statement preserves the strategy-versus-official-rule boundary for Synthesis?	20
Q80. Which option avoids the standard Essay-method trap about Synthesis?	21

Issue-Based Prompt Scoping - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which option applies Issue-statement prompt as an Essay-method distinction?

A. An issue prompt names a real phenomenon and makes a causal, comparative, interrogative or evaluative claim that can be contested without first decoding a dominant metaphor. B. Treat Issue-statement prompt as a compulsory UPSC formula even when it distorts the prompt. C. Replace Issue-statement prompt with a familiar adjacent GS topic and maximise factual coverage. D. Use Issue-statement prompt to add more headings or dimensions without testing coherence.

Answer: A. Explanation: An issue prompt names a real phenomenon and makes a causal, comparative, interrogative or evaluative claim that can be contested without first decoding a dominant metaphor. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q2. Which use of Issue-statement prompt stays closest to the printed prompt?

A. Use Issue-statement prompt while dropping the prompt's operator, qualifier or scale. B. An issue prompt names a real phenomenon and makes a causal, comparative, interrogative or evaluative claim that can be contested without first decoding a dominant metaphor. C. Let a striking anecdote or quotation determine Issue-statement prompt regardless of thesis fit. D. Apply Issue-statement prompt only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: An issue prompt names a real phenomenon and makes a causal, comparative, interrogative or evaluative claim that can be contested without first decoding a dominant metaphor. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q3. Which statement preserves the strategy-versus-official-rule boundary for Issue-statement prompt?

A. Use Issue-statement prompt to avoid stating a serious counter-case or qualification. B. Support Issue-statement prompt with an unverified statistic, attribution or current claim. C. An issue prompt names a real phenomenon and makes a causal, comparative, interrogative or evaluative claim that can be contested without first decoding a dominant metaphor. D. Present Issue-statement prompt as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: An issue prompt names a real phenomenon and makes a causal, comparative, interrogative or evaluative claim that can be contested without first decoding a dominant metaphor. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q4. Which option avoids the standard Essay-method trap about Issue-statement prompt?

A. Silently tidy the printed prompt before applying Issue-statement prompt to make it easier to answer. B. Allow an exception discovered through Issue-statement prompt to replace the central proposition. C. Maximise the number of outputs produced by Issue-statement prompt, even if they repeat one claim. D. An issue prompt names a real phenomenon and makes a causal, comparative, interrogative or evaluative claim that can be contested without first decoding a dominant metaphor.

Answer: D. Explanation: An issue prompt names a real phenomenon and makes a causal, comparative, interrogative or evaluative claim that can be contested without first decoding a dominant metaphor. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q5. Which option applies Classification gate as an Essay-method distinction?

A. A prompt is scoped as an issue when it names a concrete phenomenon, asserts something about it and already yields a literal contestable proposition. B. Use Classification gate to add more headings or dimensions without testing coherence. C. Replace Classification gate with a familiar adjacent GS topic and maximise factual coverage. D. Treat Classification gate as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: A prompt is scoped as an issue when it names a concrete phenomenon, asserts something about it and already yields a literal contestable proposition. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q6. Which use of Classification gate stays closest to the printed prompt?

A. Apply Classification gate only after drafting, when topic drift can no longer be prevented. B. A prompt is scoped as an issue when it names a concrete phenomenon, asserts something about it and already yields a literal contestable proposition. C. Use Classification gate while dropping the prompt's operator, qualifier or scale. D. Let a striking anecdote or quotation determine Classification gate regardless of thesis fit.

Answer: B. Explanation: A prompt is scoped as an issue when it names a concrete phenomenon, asserts something about it and already yields a literal contestable proposition. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q7. Which statement preserves the strategy-versus-official-rule boundary for Classification gate?

A. Present Classification gate as an official marking rule rather than a pedagogical scaffold. B. Support Classification gate with an unverified statistic, attribution or current claim. C. A prompt is scoped as an issue when it names a concrete phenomenon, asserts something about it and already yields a literal contestable proposition. D. Use Classification gate to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: A prompt is scoped as an issue when it names a concrete phenomenon, asserts something about it and already yields a literal contestable proposition. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q8. Which option avoids the standard Essay-method trap about Classification gate?

A. Maximise the number of outputs produced by Classification gate, even if they repeat one claim. B. Allow an exception discovered through Classification gate to replace the central proposition. C. Silently tidy the printed prompt before applying Classification gate to make it easier to answer. D. A prompt is scoped as an issue when it names a concrete phenomenon, asserts something about it and already yields a literal contestable proposition.

Answer: D. Explanation: A prompt is scoped as an issue when it names a concrete phenomenon, asserts something about it and already yields a literal contestable proposition. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q9. Which option applies Directive or demand as an Essay-method distinction?

A. Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. B. Treat Directive or demand as a compulsory UPSC formula even when it distorts the prompt. C. Replace Directive or demand with a familiar adjacent GS topic and maximise factual coverage. D. Use Directive or demand to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q10. Which use of Directive or demand stays closest to the printed prompt?

A. Apply Directive or demand only after drafting, when topic drift can no longer be prevented. B. Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. C. Let a striking anecdote or quotation determine Directive or demand regardless of thesis fit. D. Use Directive or demand while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q11. Which statement preserves the strategy-versus-official-rule boundary for Directive or demand?

A. Present Directive or demand as an official marking rule rather than a pedagogical scaffold. B. Use Directive or demand to avoid stating a serious counter-case or qualification. C. Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. D. Support Directive or demand with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q12. Which option avoids the standard Essay-method trap about Directive or demand?

A. Silently tidy the printed prompt before applying Directive or demand to make it easier to answer. B. Allow an exception discovered through Directive or demand to replace the central proposition. C. Maximise the number of outputs produced by Directive or demand, even if they repeat one claim. D. Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden.

Answer: D. Explanation: Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q13. Which option applies Object as an Essay-method distinction?

A. The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. B. Replace Object with a familiar adjacent GS topic and maximise factual coverage. C. Use Object to add more headings or dimensions without testing coherence. D. Treat Object as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q14. Which use of Object stays closest to the printed prompt?

A. Apply Object only after drafting, when topic drift can no longer be prevented. B. The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. C. Let a striking anecdote or quotation determine Object regardless of thesis fit. D. Use Object while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q15. Which statement preserves the strategy-versus-official-rule boundary for Object?

A. Use Object to avoid stating a serious counter-case or qualification. B. Present Object as an official marking rule rather than a pedagogical scaffold. C. The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. D. Support Object with an unverified statistic, attribution or current claim.

Answer: C. Explanation: The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q16. Which option avoids the standard Essay-method trap about Object?

A. Silently tidy the printed prompt before applying Object to make it easier to answer. B. Maximise the number of outputs produced by Object, even if they repeat one claim. C. Allow an exception discovered through Object to replace the central proposition. D. The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it.

Answer: D. Explanation: The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q17. Which option applies Qualifier as an Essay-method distinction?

A. Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. B. Treat Qualifier as a compulsory UPSC formula even when it distorts the prompt. C. Use Qualifier to add more headings or dimensions without testing coherence. D. Replace Qualifier with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q18. Which use of Qualifier stays closest to the printed prompt?

A. Apply Qualifier only after drafting, when topic drift can no longer be prevented. B. Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. C. Let a striking anecdote or quotation determine Qualifier regardless of thesis fit. D. Use Qualifier while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q19. Which statement preserves the strategy-versus-official-rule boundary for Qualifier?

A. Support Qualifier with an unverified statistic, attribution or current claim. B. Present Qualifier as an official marking rule rather than a pedagogical scaffold. C. Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. D. Use Qualifier to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q20. Which option avoids the standard Essay-method trap about Qualifier?

A. Allow an exception discovered through Qualifier to replace the central proposition. B. Silently tidy the printed prompt before applying Qualifier to make it easier to answer. C. Maximise the number of outputs produced by Qualifier, even if they repeat one claim. D. Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis.

Answer: D. Explanation: Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q21. Which option applies Geography as an Essay-method distinction?

A. State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. B. Treat Geography as a compulsory UPSC formula even when it distorts the prompt. C. Replace Geography with a familiar adjacent GS topic and maximise factual coverage. D. Use Geography to add more headings or dimensions without testing coherence.

Answer: A. Explanation: State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q22. Which use of Geography stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Geography regardless of thesis fit. B. State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. C. Apply Geography only after drafting, when topic drift can no longer be prevented. D. Use Geography while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q23. Which statement preserves the strategy-versus-official-rule boundary for Geography?

A. Present Geography as an official marking rule rather than a pedagogical scaffold. B. Support Geography with an unverified statistic, attribution or current claim. C. State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. D. Use Geography to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q24. Which option avoids the standard Essay-method trap about Geography?

A. Silently tidy the printed prompt before applying Geography to make it easier to answer. B. Maximise the number of outputs produced by Geography, even if they repeat one claim. C. Allow an exception discovered through Geography to replace the central proposition. D. State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically.

Answer: D. Explanation: State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q25. Which option applies Time as an Essay-method distinction?

A. Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary. B. Use Time to add more headings or dimensions without testing coherence. C. Treat Time as a compulsory UPSC formula even when it distorts the prompt. D. Replace Time with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q26. Which use of Time stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Time regardless of thesis fit. B. Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary. C. Use Time while dropping the prompt's operator, qualifier or scale. D. Apply Time only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q27. Which statement preserves the strategy-versus-official-rule boundary for Time?

A. Present Time as an official marking rule rather than a pedagogical scaffold. B. Support Time with an unverified statistic, attribution or current claim. C. Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary. D. Use Time to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q28. Which option avoids the standard Essay-method trap about Time?

A. Silently tidy the printed prompt before applying Time to make it easier to answer. B. Maximise the number of outputs produced by Time, even if they repeat one claim. C. Allow an exception discovered through Time to replace the central proposition. D. Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary.

Answer: D. Explanation: Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q29. Which option applies Actor as an Essay-method distinction?

A. Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. B. Treat Actor as a compulsory UPSC formula even when it distorts the prompt. C. Replace Actor with a familiar adjacent GS topic and maximise factual coverage. D. Use Actor to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q30. Which use of Actor stays closest to the printed prompt?

A. Use Actor while dropping the prompt's operator, qualifier or scale. B. Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. C. Apply Actor only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Actor regardless of thesis fit.

Answer: B. Explanation: Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q31. Which statement preserves the strategy-versus-official-rule boundary for Actor?

A. Present Actor as an official marking rule rather than a pedagogical scaffold. B. Support Actor with an unverified statistic, attribution or current claim. C. Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. D. Use Actor to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q32. Which option avoids the standard Essay-method trap about Actor?

A. Silently tidy the printed prompt before applying Actor to make it easier to answer. B. Allow an exception discovered through Actor to replace the central proposition. C. Maximise the number of outputs produced by Actor, even if they repeat one claim. D. Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous.

Answer: D. Explanation: Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q33. Which option applies Scale as an Essay-method distinction?

A. Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. B. Use Scale to add more headings or dimensions without testing coherence. C. Treat Scale as a compulsory UPSC formula even when it distorts the prompt. D. Replace Scale with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q34. Which use of Scale stays closest to the printed prompt?

A. Use Scale while dropping the prompt's operator, qualifier or scale. B. Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. C. Apply Scale only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Scale regardless of thesis fit.

Answer: B. Explanation: Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q35. Which statement preserves the strategy-versus-official-rule boundary for Scale?

A. Present Scale as an official marking rule rather than a pedagogical scaffold. B. Use Scale to avoid stating a serious counter-case or qualification. C. Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. D. Support Scale with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q36. Which option avoids the standard Essay-method trap about Scale?

A. Silently tidy the printed prompt before applying Scale to make it easier to answer. B. Allow an exception discovered through Scale to replace the central proposition. C. Maximise the number of outputs produced by Scale, even if they repeat one claim. D. Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level.

Answer: D. Explanation: Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q37. Which option applies Causal demand as an Essay-method distinction?

A. Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words. B. Replace Causal demand with a familiar adjacent GS topic and maximise factual coverage. C. Use Causal demand to add more headings or dimensions without testing coherence. D. Treat Causal demand as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q38. Which use of Causal demand stays closest to the printed prompt?

A. Apply Causal demand only after drafting, when topic drift can no longer be prevented. B. Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words. C. Use Causal demand while dropping the prompt's operator, qualifier or scale. D. Let a striking anecdote or quotation determine Causal demand regardless of thesis fit.

Answer: B. Explanation: Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q39. Which statement preserves the strategy-versus-official-rule boundary for Causal demand?

A. Use Causal demand to avoid stating a serious counter-case or qualification. B. Present Causal demand as an official marking rule rather than a pedagogical scaffold. C. Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words. D. Support Causal demand with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q40. Which option avoids the standard Essay-method trap about Causal demand?

A. Allow an exception discovered through Causal demand to replace the central proposition. B. Silently tidy the printed prompt before applying Causal demand to make it easier to answer. C. Maximise the number of outputs produced by Causal demand, even if they repeat one claim. D. Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words.

Answer: D. Explanation: Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q41. Which option applies Evaluative demand as an Essay-method distinction?

A. Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed. B. Treat Evaluative demand as a compulsory UPSC formula even when it distorts the prompt. C. Replace Evaluative demand with a familiar adjacent GS topic and maximise factual coverage. D. Use Evaluative demand to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q42. Which use of Evaluative demand stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Evaluative demand regardless of thesis fit. B. Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed. C. Use Evaluative demand while dropping the prompt's operator, qualifier or scale. D. Apply Evaluative demand only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q43. Which statement preserves the strategy-versus-official-rule boundary for Evaluative demand?

A. Present Evaluative demand as an official marking rule rather than a pedagogical scaffold. B. Use Evaluative demand to avoid stating a serious counter-case or qualification. C. Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed. D. Support Evaluative demand with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q44. Which option avoids the standard Essay-method trap about Evaluative demand?

A. Maximise the number of outputs produced by Evaluative demand, even if they repeat one claim. B. Silently tidy the printed prompt before applying Evaluative demand to make it easier to answer. C. Allow an exception discovered through Evaluative demand to replace the central proposition. D. Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed.

Answer: D. Explanation: Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q45. Which option applies Hidden tension as an Essay-method distinction?

A. Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. B. Use Hidden tension to add more headings or dimensions without testing coherence. C. Replace Hidden tension with a familiar adjacent GS topic and maximise factual coverage. D. Treat Hidden tension as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q46. Which use of Hidden tension stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Hidden tension regardless of thesis fit. B. Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. C. Use Hidden tension while dropping the prompt's operator, qualifier or scale. D. Apply Hidden tension only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q47. Which statement preserves the strategy-versus-official-rule boundary for Hidden tension?

A. Use Hidden tension to avoid stating a serious counter-case or qualification. B. Support Hidden tension with an unverified statistic, attribution or current claim. C. Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. D. Present Hidden tension as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q48. Which option avoids the standard Essay-method trap about Hidden tension?

A. Silently tidy the printed prompt before applying Hidden tension to make it easier to answer. B. Allow an exception discovered through Hidden tension to replace the central proposition. C. Maximise the number of outputs produced by Hidden tension, even if they repeat one claim. D. Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling.

Answer: D. Explanation: Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q49. Which option applies Excluded material as an Essay-method distinction?

A. Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt. B. Replace Excluded material with a familiar adjacent GS topic and maximise factual coverage. C. Use Excluded material to add more headings or dimensions without testing coherence. D. Treat Excluded material as a compulsory UPSC formula even when it distorts the prompt.

Answer: A. Explanation: Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q50. Which use of Excluded material stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Excluded material regardless of thesis fit. B. Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt. C. Apply Excluded material only after drafting, when topic drift can no longer be prevented. D. Use Excluded material while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q51. Which statement preserves the strategy-versus-official-rule boundary for Excluded material?

A. Use Excluded material to avoid stating a serious counter-case or qualification. B. Present Excluded material as an official marking rule rather than a pedagogical scaffold. C. Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt. D. Support Excluded material with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q52. Which option avoids the standard Essay-method trap about Excluded material?

A. Silently tidy the printed prompt before applying Excluded material to make it easier to answer. B. Maximise the number of outputs produced by Excluded material, even if they repeat one claim. C. Allow an exception discovered through Excluded material to replace the central proposition. D. Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt.

Answer: D. Explanation: Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q53. Which option applies Definition boundary as an Essay-method distinction?

A. Define only the terms needed to fix the proposition; a long textbook background section expands the topic before the thesis is secure. B. Use Definition boundary to add more headings or dimensions without testing coherence. C. Treat Definition boundary as a compulsory UPSC formula even when it distorts the prompt. D. Replace Definition boundary with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: Define only the terms needed to fix the proposition; a long textbook background section expands the topic before the thesis is secure. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q54. Which use of Definition boundary stays closest to the printed prompt?

A. Apply Definition boundary only after drafting, when topic drift can no longer be prevented. B. Define only the terms needed to fix the proposition; a long textbook background section expands the topic before the thesis is secure. C. Let a striking anecdote or quotation determine Definition boundary regardless of thesis fit. D. Use Definition boundary while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Define only the terms needed to fix the proposition; a long textbook background section expands the topic before the thesis is secure. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q55. Which statement preserves the strategy-versus-official-rule boundary for Definition boundary?

A. Present Definition boundary as an official marking rule rather than a pedagogical scaffold. B. Use Definition boundary to avoid stating a serious counter-case or qualification. C. Define only the terms needed to fix the proposition; a long textbook background section expands the topic before the thesis is secure. D. Support Definition boundary with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Define only the terms needed to fix the proposition; a long textbook background section expands the topic before the thesis is secure. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q56. Which option avoids the standard Essay-method trap about Definition boundary?

A. Maximise the number of outputs produced by Definition boundary, even if they repeat one claim. B. Allow an exception discovered through Definition boundary to replace the central proposition. C. Silently tidy the printed prompt before applying Definition boundary to make it easier to answer. D. Define only the terms needed to fix the proposition; a long textbook background section expands the topic before the thesis is secure.

Answer: D. Explanation: Define only the terms needed to fix the proposition; a long textbook background section expands the topic before the thesis is secure. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q57. Which option applies Thesis boundary as an Essay-method distinction?

A. The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. B. Use Thesis boundary to add more headings or dimensions without testing coherence. C. Treat Thesis boundary as a compulsory UPSC formula even when it distorts the prompt. D. Replace Thesis boundary with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q58. Which use of Thesis boundary stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Thesis boundary regardless of thesis fit. B. The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. C. Apply Thesis boundary only after drafting, when topic drift can no longer be prevented. D. Use Thesis boundary while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q59. Which statement preserves the strategy-versus-official-rule boundary for Thesis boundary?

A. Support Thesis boundary with an unverified statistic, attribution or current claim. B. Present Thesis boundary as an official marking rule rather than a pedagogical scaffold. C. The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. D. Use Thesis boundary to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q60. Which option avoids the standard Essay-method trap about Thesis boundary?

A. Maximise the number of outputs produced by Thesis boundary, even if they repeat one claim. B. Silently tidy the printed prompt before applying Thesis boundary to make it easier to answer. C. Allow an exception discovered through Thesis boundary to replace the central proposition. D. The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages.

Answer: D. Explanation: The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q61. Which option applies Scope creep as an Essay-method distinction?

A. Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship. B. Use Scope creep to add more headings or dimensions without testing coherence. C. Treat Scope creep as a compulsory UPSC formula even when it distorts the prompt. D. Replace Scope creep with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q62. Which use of Scope creep stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Scope creep regardless of thesis fit. B. Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship. C. Apply Scope creep only after drafting, when topic drift can no longer be prevented. D. Use Scope creep while dropping the prompt's operator, qualifier or scale.

Answer: B. Explanation: Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q63. Which statement preserves the strategy-versus-official-rule boundary for Scope creep?

A. Use Scope creep to avoid stating a serious counter-case or qualification. B. Present Scope creep as an official marking rule rather than a pedagogical scaffold. C. Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship. D. Support Scope creep with an unverified statistic, attribution or current claim.

Answer: C. Explanation: Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q64. Which option avoids the standard Essay-method trap about Scope creep?

A. Silently tidy the printed prompt before applying Scope creep to make it easier to answer. B. Maximise the number of outputs produced by Scope creep, even if they repeat one claim. C. Allow an exception discovered through Scope creep to replace the central proposition. D. Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship.

Answer: D. Explanation: Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q65. Which option applies GS-answer collapse as an Essay-method distinction?

A. A causes-effects-measures or scheme catalogue does not by itself create a sustained Essay argument, even when every listed fact is accurate. B. Use GS-answer collapse to add more headings or dimensions without testing coherence. C. Treat GS-answer collapse as a compulsory UPSC formula even when it distorts the prompt. D. Replace GS-answer collapse with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: A causes-effects-measures or scheme catalogue does not by itself create a sustained Essay argument, even when every listed fact is accurate. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q66. Which use of GS-answer collapse stays closest to the printed prompt?

A. Use GS-answer collapse while dropping the prompt's operator, qualifier or scale. B. A causes-effects-measures or scheme catalogue does not by itself create a sustained Essay argument, even when every listed fact is accurate. C. Apply GS-answer collapse only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine GS-answer collapse regardless of thesis fit.

Answer: B. Explanation: A causes-effects-measures or scheme catalogue does not by itself create a sustained Essay argument, even when every listed fact is accurate. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q67. Which statement preserves the strategy-versus-official-rule boundary for GS-answer collapse?

A. Use GS-answer collapse to avoid stating a serious counter-case or qualification. B. Present GS-answer collapse as an official marking rule rather than a pedagogical scaffold. C. A causes-effects-measures or scheme catalogue does not by itself create a sustained Essay argument, even when every listed fact is accurate. D. Support GS-answer collapse with an unverified statistic, attribution or current claim.

Answer: C. Explanation: A causes-effects-measures or scheme catalogue does not by itself create a sustained Essay argument, even when every listed fact is accurate. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q68. Which option avoids the standard Essay-method trap about GS-answer collapse?

A. Maximise the number of outputs produced by GS-answer collapse, even if they repeat one claim. B. Silently tidy the printed prompt before applying GS-answer collapse to make it easier to answer. C. Allow an exception discovered through GS-answer collapse to replace the central proposition. D. A causes-effects-measures or scheme catalogue does not by itself create a sustained Essay argument, even when every listed fact is accurate.

Answer: D. Explanation: A causes-effects-measures or scheme catalogue does not by itself create a sustained Essay argument, even when every listed fact is accurate. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q69. Which option applies Policy-catalogue avoidance as an Essay-method distinction?

A. Policies and institutions should appear as evidence for a claim, mechanism or synthesis, never as an isolated inventory of government action. B. Treat Policy-catalogue avoidance as a compulsory UPSC formula even when it distorts the prompt. C. Replace Policy-catalogue avoidance with a familiar adjacent GS topic and maximise factual coverage. D. Use Policy-catalogue avoidance to add more headings or dimensions without testing coherence.

Answer: A. Explanation: Policies and institutions should appear as evidence for a claim, mechanism or synthesis, never as an isolated inventory of government action. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q70. Which use of Policy-catalogue avoidance stays closest to the printed prompt?

A. Use Policy-catalogue avoidance while dropping the prompt's operator, qualifier or scale. B. Policies and institutions should appear as evidence for a claim, mechanism or synthesis, never as an isolated inventory of government action. C. Apply Policy-catalogue avoidance only after drafting, when topic drift can no longer be prevented. D. Let a striking anecdote or quotation determine Policy-catalogue avoidance regardless of thesis fit.

Answer: B. Explanation: Policies and institutions should appear as evidence for a claim, mechanism or synthesis, never as an isolated inventory of government action. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q71. Which statement preserves the strategy-versus-official-rule boundary for Policy-catalogue avoidance?

A. Present Policy-catalogue avoidance as an official marking rule rather than a pedagogical scaffold. B. Support Policy-catalogue avoidance with an unverified statistic, attribution or current claim. C. Policies and institutions should appear as evidence for a claim, mechanism or synthesis, never as an isolated inventory of government action. D. Use Policy-catalogue avoidance to avoid stating a serious counter-case or qualification.

Answer: C. Explanation: Policies and institutions should appear as evidence for a claim, mechanism or synthesis, never as an isolated inventory of government action. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q72. Which option avoids the standard Essay-method trap about Policy-catalogue avoidance?

A. Maximise the number of outputs produced by Policy-catalogue avoidance, even if they repeat one claim. B. Silently tidy the printed prompt before applying Policy-catalogue avoidance to make it easier to answer. C. Allow an exception discovered through Policy-catalogue avoidance to replace the central proposition. D. Policies and institutions should appear as evidence for a claim, mechanism or synthesis, never as an isolated inventory of government action.

Answer: D. Explanation: Policies and institutions should appear as evidence for a claim, mechanism or synthesis, never as an isolated inventory of government action. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q73. Which option applies Counter-case as an Essay-method distinction?

A. The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. B. Replace Counter-case with a familiar adjacent GS topic and maximise factual coverage. C. Treat Counter-case as a compulsory UPSC formula even when it distorts the prompt. D. Use Counter-case to add more headings or dimensions without testing coherence.

Answer: A. Explanation: The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q74. Which use of Counter-case stays closest to the printed prompt?

A. Let a striking anecdote or quotation determine Counter-case regardless of thesis fit. B. The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. C. Use Counter-case while dropping the prompt's operator, qualifier or scale. D. Apply Counter-case only after drafting, when topic drift can no longer be prevented.

Answer: B. Explanation: The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q75. Which statement preserves the strategy-versus-official-rule boundary for Counter-case?

A. Present Counter-case as an official marking rule rather than a pedagogical scaffold. B. Use Counter-case to avoid stating a serious counter-case or qualification. C. The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. D. Support Counter-case with an unverified statistic, attribution or current claim.

Answer: C. Explanation: The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q76. Which option avoids the standard Essay-method trap about Counter-case?

A. Allow an exception discovered through Counter-case to replace the central proposition. B. Silently tidy the printed prompt before applying Counter-case to make it easier to answer. C. Maximise the number of outputs produced by Counter-case, even if they repeat one claim. D. The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance.

Answer: D. Explanation: The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q77. Which option applies Synthesis as an Essay-method distinction?

A. A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. B. Treat Synthesis as a compulsory UPSC formula even when it distorts the prompt. C. Use Synthesis to add more headings or dimensions without testing coherence. D. Replace Synthesis with a familiar adjacent GS topic and maximise factual coverage.

Answer: A. Explanation: A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q78. Which use of Synthesis stays closest to the printed prompt?

A. Apply Synthesis only after drafting, when topic drift can no longer be prevented. B. A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. C. Use Synthesis while dropping the prompt's operator, qualifier or scale. D. Let a striking anecdote or quotation determine Synthesis regardless of thesis fit.

Answer: B. Explanation: A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q79. Which statement preserves the strategy-versus-official-rule boundary for Synthesis?

A. Use Synthesis to avoid stating a serious counter-case or qualification. B. Support Synthesis with an unverified statistic, attribution or current claim. C. A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. D. Present Synthesis as an official marking rule rather than a pedagogical scaffold.

Answer: C. Explanation: A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

Q80. Which option avoids the standard Essay-method trap about Synthesis?

A. Maximise the number of outputs produced by Synthesis, even if they repeat one claim. B. Silently tidy the printed prompt before applying Synthesis to make it easier to answer. C. Allow an exception discovered through Synthesis to replace the central proposition. D. A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values.

Answer: D. Explanation: A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. The other options convert a qualified writing method into an official formula, permit topic drift, or reward quantity without coherence and evidence safety.

PYQS AND ANSWER PRACTICE

AUDITED TOPIC-SPECIFIC PYQ OWNERSHIP

The cards preserve exact V1 issue or issue-adjacent prompts from 2018, 2019 and 2024. The solutions demonstrate scope control and do not claim official model essays.

PYQ DEMAND CARD 1 - 2018-A1 Essay

Demand: Alternative technologies for a climate change resilient India.

Status: Exact V1 wording from the local official paper; used to scope object, qualifier and India boundary.

Model solution: Directive or demand: Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. **Object:** The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. **Qualifier:** Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. **Geography:** State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. **Scale:** Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. **Evaluative demand:** Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed. **Excluded material:** Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt. **Thesis boundary:** The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. This is a method-focused decoding or application card, not an official UPSC model answer and not a claim that only one interpretation is valid.

PYQ DEMAND CARD 2 - 2019-B7 Essay

Demand: Biased media is a real threat to Indian democracy.

Status: Exact V1 wording; used to expose the evaluative standards behind real threat and Indian democracy.

Model solution: Directive or demand: Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. **Object:** The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. **Qualifier:** Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. **Geography:** State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. **Evaluative demand:** Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed. **Hidden tension:** Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. **Thesis boundary:** The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. **Counter-case:** The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. This is a method-focused decoding or application card, not an official UPSC model answer and not a claim that only one interpretation is valid.

PYQ DEMAND CARD 3 - 2024-B5 Essay

Demand: Social media is triggering 'Fear of Missing Out' amongst the youth precipitating depression and loneliness.

Status: Exact V1 wording, including the missing comma before precipitating; used for a causal-chain scoping application.

Model solution: Object: The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. **Qualifier:** Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. **Actor:** Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. **Causal demand:** Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words. **Hidden tension:** Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. **Thesis boundary:** The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. **Counter-case:** The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. **Synthesis:** A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. This is a method-focused decoding or application card, not an official UPSC model answer and not a claim that only one interpretation is valid.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish issue-prompt scoping from philosophical decoding. Answer in about 150 words.

Model thesis: Claim: Issue-statement prompt. **Named evidence/example:** An issue prompt names a real phenomenon and makes a causal, comparative, interrogative or evaluative claim that can be contested without first decoding a dominant metaphor. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Classification gate. **Named evidence/example:** A prompt is scoped as an issue when it names a concrete phenomenon, asserts something about it and already yields a literal contestable proposition. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Directive or demand. **Named evidence/example:** Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- An issue prompt names a real phenomenon and makes a causal, comparative, interrogative or evaluative claim that can be contested without first decoding a dominant metaphor.
- A prompt is scoped as an issue when it names a concrete phenomenon, asserts something about it and already yields a literal contestable proposition.
- Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden.

Qualified conclusion: Claim: Issue-statement prompt. **Named evidence/example:** An issue prompt names a real phenomenon and makes a causal, comparative, interrogative or evaluative claim that can be contested without first decoding a dominant metaphor. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Classification gate. **Named evidence/example:** A prompt is scoped as an issue when it names a concrete phenomenon, asserts something about it and already yields a literal contestable proposition. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Directive or demand. **Named evidence/example:** Identify whether the

wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 2 - 10 MARKS

Question: Build an object-qualifier-geography-time-actor-scale scope map. Answer in about 150 words.

Model thesis: **Claim:** Object. **Named evidence/example:** The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic.

Qualification: It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Qualifier. **Named evidence/example:** Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic.

Qualification: It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Geography. **Named evidence/example:** State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic.

Qualification: It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Time. **Named evidence/example:** Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary.

Analysis: This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Actor. **Named evidence/example:** Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Scale. **Named evidence/example:** Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it.
- Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis.
- State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically.
- Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary.
- Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous.
- Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level.

Qualified conclusion: **Claim:** Object. **Named evidence/example:** The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Qualifier. **Named evidence/example:** Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. **Analysis:** This identifies the exact Essay-method

move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic.

Qualification: It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Geography. **Named evidence/example:** State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Time. **Named evidence/example:** Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Actor. **Named evidence/example:** Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Scale. **Named evidence/example:** Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 3 - 15 MARKS

Question: Explain how causal and evaluative demands require different argument tests. Answer in about 250 words.

Model thesis: **Claim:** Causal demand. **Named evidence/example:** Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Evaluative demand. **Named evidence/example:** Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Hidden tension. **Named evidence/example:** Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words.
- Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed.
- Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling.

Qualified conclusion: **Claim:** Causal demand. **Named evidence/example:** Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words.

Analysis: This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Evaluative demand. **Named evidence/example:** Where the prompt uses judgment terms such as threat, anomaly, myth, reality or complex, define the standard by which the judgment will be assessed. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Hidden tension. **Named evidence/example:** Issue prompts normally contain a trade-off or double effect that must be made

explicit, such as connection versus isolation or automation versus reskilling. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 4 - 15 MARKS

Question: Show how excluded material and thesis boundaries prevent scope creep. Answer in about 250 words.

Model thesis: **Claim:** Excluded material. **Named evidence/example:** Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Definition boundary. **Named evidence/example:** Define only the terms needed to fix the proposition; a long textbook background section expands the topic before the thesis is secure. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Thesis boundary. **Named evidence/example:** The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Scope creep. **Named evidence/example:** Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt.
- Define only the terms needed to fix the proposition; a long textbook background section expands the topic before the thesis is secure.
- The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages.
- Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship.

Qualified conclusion: **Claim:** Excluded material. **Named evidence/example:** Write a negative boundary naming adjacent content that will not enter unless it directly advances the exact prompt. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Definition boundary. **Named evidence/example:** Define only the terms needed to fix the proposition; a long textbook background section expands the topic before the thesis is secure. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Thesis boundary. **Named evidence/example:** The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Scope creep. **Named evidence/example:** Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 5 - 20 MARKS

Question: Analyse why a policy catalogue or GS-answer structure cannot substitute for an issue essay. Answer in about 300 words.

Model thesis: **Claim:** Thesis boundary. **Named evidence/example:** The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Scope creep. **Named evidence/example:** Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** GS-answer collapse. **Named evidence/example:** A causes-effects-measures or scheme catalogue does not by itself create a sustained Essay argument, even when every listed fact is accurate. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Policy-catalogue avoidance. **Named evidence/example:** Policies and institutions should appear as evidence for a claim, mechanism or synthesis, never as an isolated inventory of government action. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Counter-case. **Named evidence/example:** The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Synthesis. **Named evidence/example:** A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages.
- Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship.
- A causes-effects-measures or scheme catalogue does not by itself create a sustained Essay argument, even when every listed fact is accurate.
- Policies and institutions should appear as evidence for a claim, mechanism or synthesis, never as an isolated inventory of government action.
- The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance.
- A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values.

Qualified conclusion: **Claim:** Thesis boundary. **Named evidence/example:** The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Scope creep. **Named evidence/example:** Scope creep occurs when the response becomes a general survey of the domain instead of testing the prompt's specified relationship. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:**

GS-answer collapse. **Named evidence/example:** A causes-effects-measures or scheme catalogue does not by itself create a sustained Essay argument, even when every listed fact is accurate. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Policy-catalogue avoidance. **Named evidence/example:** Policies and institutions should appear as evidence for a claim, mechanism or synthesis, never as an isolated inventory of government action. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Counter-case. **Named evidence/example:** The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Synthesis. **Named evidence/example:** A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

ORIGINAL MAINS 6 - 20 MARKS

Question: Apply the complete scoping method to one verified issue prompt. Answer in about 300 words.

Model thesis: Claim: Directive or demand. **Named evidence/example:** Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Object. **Named evidence/example:** The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Qualifier. **Named evidence/example:** Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Geography. **Named evidence/example:** State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Time. **Named evidence/example:** Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Actor. **Named evidence/example:** Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Scale. **Named evidence/example:** Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Causal demand. **Named evidence/example:** Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Hidden tension. **Named evidence/example:** Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Thesis boundary. **Named evidence/example:** The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Counter-case. **Named evidence/example:** The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Synthesis. **Named evidence/example:** A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.

Claim -> named evidence -> analysis -> qualification:

- Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden.
- The object is the precise phenomenon or relationship being examined, not the entire GS subject area surrounding it.
- Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis.
- State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically.
- Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary.
- Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous.
- Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level.
- Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words.
- Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling.
- The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages.
- The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance.
- A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values.

Qualified conclusion: **Claim:** Directive or demand. **Named evidence/example:** Identify whether the wording asks a question, presents alternatives, asserts causation or makes a value judgment; that demand governs the essay's argumentative burden. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Object. **Named evidence/example:** The object is the precise phenomenon or relationship being examined, not the entire GS subject

area surrounding it. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Qualifier. **Named evidence/example:** Words such as Indian, majority, youth, real, complex, alternative or better narrow the claim and must survive in the thesis. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Geography. **Named evidence/example:** State whether the prompt is bounded to India, South Asia, another named region or a wider frame; do not globalise or nationalise it automatically. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Time. **Named evidence/example:** Distinguish a present condition, historical change, future possibility or long-run consequence when the wording supports that temporal boundary. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Actor. **Named evidence/example:** Identify who acts, experiences, decides, benefits or bears cost, and do not treat a broad group such as youth or farmers as homogeneous. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Scale. **Named evidence/example:** Locate the demand at individual, community, institutional, state, regional or global scale before importing examples from another level. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Causal demand. **Named evidence/example:** Where the prompt asserts causation, test each link through mechanism, evidence, mediator and limit instead of merely repeating the causal words. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Hidden tension. **Named evidence/example:** Issue prompts normally contain a trade-off or double effect that must be made explicit, such as connection versus isolation or automation versus reskilling. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Thesis boundary. **Named evidence/example:** The thesis must answer the prompt's exact causal or evaluative claim with stated conditions, not announce that the issue has both advantages and disadvantages. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Counter-case. **Named evidence/example:** The strongest rival or beneficial effect should be stated fairly and used to qualify the thesis rather than appended as token balance. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer. **Claim:** Synthesis. **Named evidence/example:** A good issue essay resolves the tension by distributing responsibility, specifying conditions and connecting feasible institutional action with agency and values. **Analysis:** This identifies the exact Essay-method move and shows how it keeps the response tied to the printed proposition rather than an adjacent GS topic. **Qualification:** It remains a repository-audited writing scaffold, not an official UPSC rubric, compulsory formula or model answer.
