Approval: FALSE • Pending user review • source generation g10 and all prior artifacts unchanged

00

STAGE 00 AGRICULTURAL GEOGRAPHY AS A NATURAL-HUMAN-MARKET SYSTEM

AGRICULTURAL GEOGRAPHY AS A NATURAL-HUMAN-MARKET SYSTEM · AGRICULTURAL GEOGRAPHY · WHERE DOES PRODUCTION OCCUR, WHY THERE, HOW ORGANISED, AND · NATURAL BASE HUMAN SYSTEM MARKET SYSTEM CLIMATE LABOUR/HOLDING DEMAND · FARMING SYSTEM LOCATION · VALUE CHAIN SPATIAL GAINS AND COSTS FEED BACK TO · SIX CONTROLS · CLIMATE, RELIEF, SOIL, WATER, LABOUR, MARKET/TRANSPORT.

AGRICULTURAL GEOGRAPHY → Where does production occur, why there, how organised, and how does the pattern change through → NATURAL BASE HUMAN SYSTEM MARKET SYSTEM climate labour/holding demand relief technology transport soil tenure/capital storage/processing → and trade links → FARMING SYSTEM location → seasonality → intensity → surplus → value chain spatial gains and

DEFINITION / COMPONENTS

- AGRICULTURAL GEOGRAPHY
- Where does production occur, why there, how organised, and how does the pattern change through time?

TRIGGER / MECHANISM

- NATURAL BASE HUMAN SYSTEM MARKET SYSTEM climate labour/holding demand relief technology transport soil tenure/capital storage/processing water institutions price
- and trade links

EFFECT / INTERVENTION

- FARMING SYSTEM location → seasonality → intensity → surplus → value chain spatial gains and costs feed back to soil, water, labour and region
- Six controls: climate, relief, soil, water, labour, market/transport.

MECHANISM / VERDICT — Six controls: climate, relief, soil, water, labour, market/transport.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Six controls: climate, relief, soil, water, labour, market/transport.

01

STAGE 01 FARMING-SYSTEM CLASSIFICATION BY ECOLOGY, LABOUR AND MARKET

FARMING-SYSTEM CLASSIFICATION BY ECOLOGY, LABOUR AND MARKET · TYPICAL SETTING · SHIFTING CULTIVATION · CLEARING + FALLOW · HUMID FOREST MARGINS · WET-RICE INTENSIVE · SMALL, LABOUR, WATER · MONSOON VALLEYS

SYSTEM	ORGANISATION	TYPICAL SETTING
Shifting cultivation	clearing + fallow	humid forest margins
Wet-rice intensive	small, labour, water	monsoon valleys
Nomadic pastoralism	mobile herds	arid sparse pasture
Mixed farming	crop-livestock link	temperate regions
Mediterranean	winter rain system	west-coast margins

CLASSIFICATION

- TYPICAL SETTING
- Shifting cultivation
- clearing + fallow
- humid forest margins
- Wet-rice intensive

DIAGNOSTIC BASIS

- Nomadic pastoralism
- mobile herds
- arid sparse pasture
- Mixed farming
- crop-livestock link

PROCESS LINK

- west-coast margins
- estate + export crop
- tropical highlands
- Commercial grain
- mechanised vast farms

EXAM TRAP

- perishable + urban
- city hinterlands
- CLASSIFICATION AXES subsistence/commercial
- crop/livestock mix sedentary/mobile
- small/large scale

MECHANISM / VERDICT — High output per hectare is not the same as commercial orientation.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: High output per hectare is not the same as commercial orientation.

02

STAGE 02 VON THUNEN RINGS AND THE SURVIVAL OF DISTANCE

VON THUNEN RINGS AND THE SURVIVAL OF DISTANCE · CENTRAL MARKET DAIRY · HIGH DECAY, FREQUENT TRIPS FORESTRY · HEAVY TRANSPORT BURDEN FIELD CROPS · LOWER PERISHABILITY LIVESTOCK · EXTENSIVE OUTER USE DISTANCE UP · FREIGHT/RELIABILITY COST UP · BID RENT GENERALLY DOWN PERISHABILITY + DELIVERY FREQUENCY +

CENTRAL MARKET dairy / vegetables

high decay, frequent trips forestry / fuelwood → heavy transport burden field crops → lower perishability livestock / ranching

SYSTEM / DEFINITION

- CENTRAL MARKET dairy / vegetables
- high decay, frequent trips forestry / fuelwood
- heavy transport burden field crops

PROCESS / MECHANISM

- lower perishability livestock / ranching
- extensive outer use distance up → freight/reliability cost up → bid rent generally down perishability + delivery frequency
- + land rent decide near-market use

SPATIAL / INDIA PATTERN

- MODERN MODIFIERS cold chain + expressway + processing + digital markets + policy stretch; distort or split rings; they do not abolish cost and access
- Answer route: assumptions → mechanism → modification → surviving use
- limits from relief, multiple markets and institutions.

HAZARD / LIMIT / RESPONSE

- lower perishability livestock / ranching

MECHANISM / VERDICT — Answer route: assumptions → mechanism → modification → surviving use

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Answer route: assumptions → mechanism → modification → surviving use.

03

STAGE 03 WORLD CROP REGIONS AND ECOLOGICAL REQUIREMENTS

WORLD CROP REGIONS AND ECOLOGICAL REQUIREMENTS · ECOLOGICAL BUNDLE · BROAD GEOGRAPHY · WARMTH + MANAGED WATER · MONSOON VALLEYS/DELTAS · COOL GROWTH, DRY RIPENING · TEMPERATE AND WINTER BELTS · FROST-FREE WARMTH

CROP	ECOLOGICAL BUNDLE	BROAD GEOGRAPHY
Rice	warmth + managed water	monsoon valleys/deltas
Wheat	cool growth, dry ripening	temperate and winter belts
Cotton	frost-free warmth	subtropical plains/plateaus
Jute	humid alluvium + retting	eastern deltaic belt
Tea	humid acidic slopes	Asian tropical highlands

SYSTEM / DEFINITION

- ECOLOGICAL BUNDLE
- BROAD GEOGRAPHY
- warmth + managed water
- monsoon valleys/deltas
- cool growth, dry ripening

PROCESS / MECHANISM

- frost-free warmth
- subtropical plains/plateaus
- humid alluvium + retting
- eastern deltaic belt
- humid acidic slopes

SPATIAL / INDIA PATTERN

- shaded drained uplands
- tropical uplands
- variable lower rainfall
- semi-arid drylands
- REGIONAL LOGIC

HAZARD / LIMIT / RESPONSE

- temperate plains → commercial grain
- Mediterranean margins → winter crops, vines, olives and fruits
- Tropical estates → plantation crops
- city belts → dairy and vegetables
- A crop-soil link is an association, not an exclusive rule.

MECHANISM / VERDICT — A crop-soil link is an association, not an exclusive rule.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: A crop-soil link is an association, not an exclusive rule.

04

STAGE 04 INDIA'S AGRO-CLIMATIC MOSAIC, GREEN REVOLUTION AND FOOD CHAIN

INDIA'S AGRO-CLIMATIC MOSAIC, GREEN REVOLUTION AND FOOD CHAIN · INDIA'S AGRICULTURAL MOSAIC · IRRIGATED WHEAT-RICE AND PROCUREMENT CORE · EASTERN DELTAS · RICE, JUTE AND WATER-RICH FARMING · DRYLAND DECCAN · MILLETS, PULSES, OILSEEDS AND VARIABLE RAINFALL · WESTERN PLATEAU

INDIA'S AGRICULTURAL MOSAIC → North-west : irrigated wheat-rice and procurement core → Eastern deltas : rice, jute and water-rich farming → Dryland Deccan : millets, pulses, oilseeds and variable rainfall → Western plateau : cotton and mixed irrigated-dryland systems

SYSTEM / DEFINITION

- INDIA'S AGRICULTURAL MOSAIC
- North-west : irrigated wheat-rice and procurement core
- Eastern deltas : rice, jute and water-rich farming

PROCESS / MECHANISM

- Dryland Deccan : millets, pulses, oilseeds and variable rainfall
- Western plateau : cotton and mixed irrigated-dryland systems
- Highlands : tea, coffee, spices and horticulture

SPATIAL / INDIA PATTERN

- Mountains : horticulture, pastoral and terrace systems
- GREEN REVOLUTION PACKAGE
- HYV + assured irrigation + fertiliser + credit + extension + procurement early concentration: Punjab + Haryana +

HAZARD / LIMIT / RESPONSE

- western Uttar Pradesh higher grain output → procurement → central pool → NFSA/PDS movement
- SECOND-GENERATION FEEDBACK water-table decline + nutrient imbalance + residue pressure rice-wheat lock-in + regional divergence
- Productive success and ecological stress can coexist in the same region.

MECHANISM / VERDICT — Productive success and ecological stress can coexist in the same region.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Productive success and ecological stress can coexist in the same region.

05

STAGE 05 FISHING, FORESTRY, MINING AND QUARRYING THROUGH PHYSIOGRAPHY

FISHING, FORESTRY, MINING AND QUARRYING THROUGH PHYSIOGRAPHY · PHYSICAL BASE · HUMAN FILTER · SHELF, NUTRIENTS, MIXING · HARBOUR, COLD CHAIN · INLAND FISH · RIVER, TANK, RESERVOIR · RIGHTS, SEED, MARKETS

ACTIVITY	PHYSICAL BASE	HUMAN FILTER
Fishing	shelf, nutrients, mixing	harbour, cold chain
Inland fish	river, tank, reservoir	rights, seed, markets
Forestry	climate, altitude, species	access, tenure, rules
Mining	ore body or fuel basin	grade, power, transport
Quarrying	accessible bulk material	demand, regulation

DEFINITION / COMPONENTS

- PHYSICAL BASE
- HUMAN FILTER
- shelf, nutrients, mixing
- harbour, cold chain
- Inland fish

TRIGGER / MECHANISM

- climate, altitude, species
- access, tenure, rules
- ore body or fuel basin
- grade, power, transport
- accessible bulk material

EFFECT / INTERVENTION

- determine realised activity
- Indian cues
- central/NE forests → timber and NTFP
- shields → many metallic ores sedimentary basins → coal/limestone
- margins → offshore hydrocarbons

MECHANISM / VERDICT — central/NE forests → timber and NTFP | shields → many metallic ores sedimentary basins → coal/limestone | margins → offshore hydrocarbons.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: central/NE forests → timber and NTFP | shields → many metallic ores sedimentary basins → coal/limestone | margins → offshore hydrocarbons.

06

STAGE 06 SUSTAINABLE AGRICULTURE AND INTERVENTION STACK

SUSTAINABLE AGRICULTURE AND INTERVENTION STACK · REGIONAL PRODUCTION PRESSURE MONSOON VARIABILITY + FRAGMENTED HOLDINGS + · RESPONSE STACK SOIL AND WATER CONSERVATION · CROP-WATER ALIGNMENT AND DIVERSIFICATION · EFFICIENT IRRIGATION AND RESILIENT SEED SYSTEMS · STORAGE, AGGREGATION, PROCESSING AND COLD CHAIN · CREDIT, INSURANCE, EXTENSION AND MARKET ACCESS · PROCUREMENT REFORM WITH FOOD-SECURITY SAFEGUARDS

REGIONAL PRODUCTION PRESSURE monsoon variability + fragmented holdings + unequal irrigation soil decline + water

RESPONSE STACK soil and water conservation → crop-water alignment and diversification → efficient irrigation and resilient seed systems

DEFINITION / COMPONENTS

- REGIONAL PRODUCTION PRESSURE monsoon variability + fragmented holdings + unequal irrigation soil decline + water stress + market risk
- RESPONSE STACK soil and water conservation
- crop-water alignment and diversification
- efficient irrigation and resilient seed systems
- storage, aggregation, processing and cold chain

TRIGGER / MECHANISM

- credit, insurance, extension and market access
- procurement reform with food-security safeguards
- local monitoring of income, nutrition and ecology
- EVIDENCE FIREWALL estimate is not final
- output is not procurement

EFFECT / INTERVENTION

- procurement is not stock stock is not consumption
- MSP announcement is not actual purchase
- SCHEME STATUS announcement → approval → guidelines → selection → funds
- physical output → service outcome → long-term impact
- Technology raises output only where water, knowledge and institutions converge.

MECHANISM / VERDICT — EVIDENCE FIREWALL estimate is not final | output is not procurement | procurement is not stock stock is not consumption | MSP announcement is not actual purchase.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: EVIDENCE FIREWALL estimate is not final | output is not procurement | procurement is not stock stock is not consumption | MSP announcement is not actual purchase.

07

STAGE 07 MAP-ANSWER AND MAINS SPINE FOR AGRICULTURAL GEOGRAPHY

MAP-ANSWER AND MAINS SPINE FOR AGRICULTURAL GEOGRAPHY · WHY IS AGRICULTURAL CHANGE SPATIALLY UNEQUAL? · 1. DEFINE · LOCATION, SEASONALITY, ORGANISATION AND CHANGE · 2. MAP · IRRIGATED NW · EASTERN DELTAS · DRY DECCAN

QUESTION: Why is agricultural change spatially unequal? → 1. DEFINE: location, seasonality, organisation and change → 2. MAP: irrigated NW → eastern deltas → dry Deccan

SYSTEM / DEFINITION

- QUESTION: Why is agricultural change spatially unequal?
- 1. DEFINE: location, seasonality, organisation and change
- 2. MAP: irrigated NW
- eastern deltas

PROCESS / MECHANISM

- dry Deccan
- plantation hills
- 3. BUILD CONTROL MATRIX climate + relief + soil + water + labour + market/transport
- 4. EXPLAIN SYSTEM subsistence → surplus → specialisation → processing → value chain

SPATIAL / INDIA PATTERN

- 5. ADD NAMED EVIDENCE
- Green Revolution core, procurement geography or physiographic activity
- 6. EVALUATE productivity + food security versus water, soil and regional inequality
- 7. QUALIFY AND CONCLUDE diversify only with purchase assurance, processing and transition support

HAZARD / LIMIT / RESPONSE

- Claim → evidence → spatial mechanism → distributional/ecological limit
- region-sensitive verdict.

MECHANISM / VERDICT — Claim → evidence → spatial mechanism → distributional/ecological limit

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Claim → evidence → spatial mechanism → distributional/ecological limit.

E

EXTRA SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

OPTIONAL ADVANCED ENRICHMENT · 1. INDIA IS AN AGRO-CLIMATIC MOSAIC, NOT ONE FARM · 2. HOLDINGS, IRRIGATION INEQUALITY AND THE SOIL-CROP MAP · 3. GREEN REVOLUTION GEOGRAPHY · 4. PROCUREMENT, THE CENTRAL POOL AND FOOD-SECURITY GEOGRAPHY · 5. REGIONAL IMBALANCE, ECOLOGICAL FEEDBACK AND DIVERSIFICATION · 6. DATED CURRENT-POLICY EVIDENCE AND STATUS DISCIPLINE · 7. ADVANCED EXAM ROUTES

OPTIONAL PROCESS DEPTH

- 1. India is an agro-climatic mosaic, not one farm region
- 2. Holdings, irrigation inequality and the soil-crop map
- 3. Green Revolution geography
- 4. Procurement, the central pool and food-security geography

DATA / INSTITUTION LIMIT

- 5. Regional imbalance, ecological feedback and diversification
- 6. Dated current-policy evidence and status discipline
- 7. Advanced exam routes
- Kharif and Rabi are not mere calendar labels.

CONTEMPORARY PARALLEL

- India does not have one uniform rainfed or irrigated agriculture.
- Current rankings must not be inferred from textbook crop belts.
- Owned land is not the same as operated land.
- Average holding size is not a measure of landlessness.

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.

END OF MASTER CANVAS • poster embeds this exact master • tiled pages are overlapping crops of the same pixels
