

GEOGRAPHY 32 - INDUSTRIES AND INDUSTRIAL REGIONS - LEARNER-FIRST V2

INDUSTRIAL GEOGRAPHY: TERMINOLOGY AND → RANKED LOCATION FACTORS AND → WEBER'S LEAST-COST THEORY IN → MAJOR WORLD INDUSTRIAL REGIONS → INDIA'S LAYERED INDUSTRIAL MAP → AGGLOMERATION, DEGLOMERATION, INERTIA AND

Read the thick cyan rail from Stage 00 to the final core synthesis. Each card uses a concept-appropriate structure; the grey E card is optional enrichment only and never repairs missing core content.

PRIMARY CORE FLOW SUBORDINATE EXTRA APPROVAL / REVIEW

Approval: FALSE • Pending user review • source generation g10 and all prior artifacts unchanged

CORE BEFORE EXTRA • prior artefacts unchanged • exact same master drives poster and tiles

• Ore processing 1000g/bakery electronics / IT-mixed

• A multi-stage value chain can split across several locations.

MECHANISM / VERDICT — A multi-stage value chain can split across several locations.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: A multi-stage value chain can split across several locations.

02

STAGE 02

WEBER'S LEAST-COST THEORY IN SIX ANALYTICAL STEPS

WEBER'S LEAST-COST THEORY IN SIX ANALYTICAL STEPS

1. LOCATE RAW-MATERIAL SOURCES AND MARKET

2. CLASSIFY INPUTS

UBIQUITOUS OR LOCALISED; PURE OR WEIGHT-LOSING

3. COMPARE TRANSPORT BURDEN THROUGH THE MATERIAL INDEX

4. FIND TRANSPORT-MINIMUM POINT WITHIN THE LOCATIONAL TRIANGLE

5. TEST LABOUR SAVING AGAINST ADDED TRANSPORT COST

6. TEST AGGLOMERATION SAVING AGAINST CONGESTION AND DISPERSION COST

1. LOCATE raw-material sources and market

2. CLASSIFY inputs: ubiquitous or localised; pure or weight-losing

3. COMPARE transport burden through the material index

4. FIND transport-minimum point within the locational triangle

DEFINITION / COMPONENTS

• 1. LOCATE raw-material sources and market

• 2. CLASSIFY inputs: ubiquitous or localised; pure or weight-losing

• 3. COMPARE transport burden through the material index

• 4. FIND transport-minimum point within the locational triangle

TRIGGER / MECHANISM

• 5. TEST labour saving against added transport cost

• 6. TEST agglomeration saving against congestion and dispersion cost

• LEAST TOTAL COST LOCATION

• TRANSPORT COST + LABOUR COST + AGGLOMERATION ECONOMY

EFFECT / INTERVENTION

• MODERN QUALIFICATION containers + roads + reliable power + data + regulation + value chains alter cost surfaces,

• but distance, weight, time and reliability still matter.

• Weber explains a baseline mechanism, not every final location.

MECHANISM / VERDICT — Weber explains a baseline mechanism, not every final location.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: MODERN QUALIFICATION containers + roads + reliable power + data + regulation + value chains alter cost surfaces, but distance, weight, time and reliability still matter.

03

STAGE 03

MAJOR WORLD INDUSTRIAL REGIONS AND THEIR GEOGRAPHIC MECHANISMS

MAJOR WORLD INDUSTRIAL REGIONS AND THEIR GEOGRAPHIC MECHANISMS

NE UNITED STATES

MARKET + GREAT LAKES + TRANSPORT + SKILLS

NW EUROPE

COAL LEGACY + RHINE LINKS + DENSE MARKETS

N ITALY

OLD INDUSTRY + SMES + EUROPEAN NETWORKS

JAPAN PACIFIC BELT

REGION	MECHANISM
NE United States	market + Great Lakes + transport + skills
Ruhr / NW Europe	coal legacy + Rhine links + dense markets
Midlands / N Italy	old industry + SMEs + European networks
Japan Pacific Belt	ports + imported inputs + coastal markets
China coastal belt	ports + labour + FDI + supplier depth

SYSTEM / DEFINITION

• NE United States

• market + Great Lakes + transport + skills

• Ruhr / NW Europe

• coal legacy + Rhine links + dense markets

• Midlands / N Italy

PROCESS / MECHANISM

• old industry + SMEs + European networks

• Japan Pacific Belt

• ports + imported inputs + coastal markets

• China coastal belt

• ports + labour + FDI + supplier depth

SPATIAL / INDIA PATTERN

• South Korea corridor

• ports + chaebol networks + technology

• COMMON EVOLUTION resource or port advantage → firm concentration → suppliers and labour

• infrastructure and knowledge → diversification → industrial inertia

• RESTRUCTURING PRESSURE old plant + pollution + land cost + global competition

HAZARD / LIMIT / RESPONSE

• upgrading, decline, relocation or service transition

• The same label hides different factor combinations and historical paths.

MECHANISM / VERDICT — The same label hides different factor combinations and historical paths.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The same label hides different factor combinations and historical paths.

04

STAGE 04

INDIA'S LAYERED INDUSTRIAL MAP: BELTS, CLUSTERS AND CORRIDORS

INDIA'S LAYERED INDUSTRIAL MAP

BELTS, CLUSTERS AND CORRIDORS

INDIA'S LAYERED INDUSTRIAL GEOGRAPHY

CHOTA NAGPUR

COAL + ORE + RAIL

STEEL, POWER, ENGINEERING

PORT + MARKET + CAPITAL

DIVERSIFIED INDUSTRY

INDIA'S LAYERED INDUSTRIAL GEOGRAPHY

Chota Nagpur / Damodar : coal + ore + rail → steel, power, engineering

Mumbai-Pune : port + market + capital → diversified industry

Ahmedabad-Vadodara : cotton + enterprise → textile, chemical, engineering

SYSTEM / DEFINITION

• INDIA'S LAYERED INDUSTRIAL GEOGRAPHY

PROCESS / MECHANISM

• Chennai-Bengaluru : ports + skill → auto, electronics, machinery

SPATIAL / INDIA PATTERN

• CORRIDOR OVERLAY freight spine / expressway / port → planned node → trunk

HAZARD / LIMIT / RESPONSE

• New corridors overlay inherited belts; they do not erase brownfield depth.

INDIA'S LAYERED INDUSTRIAL GEOGRAPHY

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: New corridors overlay inherited belts; they do not erase brownfield depth.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: A large plant creates convergence only when local capability and linkages grow.

MECHANISM / VERDICT — A large plant creates convergence only when local capability and linkages grow.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: A large plant creates convergence only when local capability and linkages grow.

06

STAGE 06 STATE, CORRIDORS, PLI AND THE INDUSTRIAL INTERVENTION STACK

STATE, CORRIDORS, PLI AND THE INDUSTRIAL INTERVENTION STACKNATIONAL POLICYMINISTRIES DEFINE FRAMEWORKS AND INCENTIVESCORRIDOR GOVERNANCESPVS PLAN NODES AND TRUNK SYSTEMSSTATE AGENCIESLAND + UTILITIES + APPROVALS + LOCAL INDUSTRIAL ESTATESNETWORK ACTORS

CORRIDOR GOVERNANCE: NICDIT / SPVs plan nodes and trunk systems

STATE AGENCIES: land + utilities + approvals + local industrial estates

NETWORK ACTORS: rail freight + ports + roads + power + digital systems

DEFINITION / COMPONENTS

- NATIONAL POLICY: DPIIT / ministries define frameworks and incentives
- CORRIDOR GOVERNANCE: NICDIT / SPVs plan nodes and trunk systems
- STATE AGENCIES: land + utilities + approvals + local industrial estates
- NETWORK ACTORS: rail freight + ports + roads + power + digital systems

TRIGGER / MECHANISM

- FIRM ECOSYSTEM: anchor producer + suppliers + skills + testing + finance
- URBAN SUPPORT: housing + mobility + water + waste + social services
- OUTCOME: production + jobs + local linkages + lower logistics cost
- STATUS FIREWALL outlay → application → investment → production → incentive → wider outcome

EFFECT / INTERVENTION

- PLI may reinforce capable clusters unless weaker regions gain real ecosystems.
- A transport line becomes a corridor only through functioning nodes and linkages.

MECHANISM / VERDICT — STATUS FIREWALL outlay → application → investment → production → incentive → wider outcome.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: STATUS FIREWALL outlay → application → investment → production → incentive → wider outcome.

07

STAGE 07 MAP-ANSWER AND MAINS SPINE FOR INDUSTRIAL LOCATION AND REGIONS

MAP-ANSWER AND MAINS SPINE FOR INDUSTRIAL LOCATION AND REGIONSHOW IS INDIA'S INDUSTRIAL GEOGRAPHY BEING REORGANISED?1. DEFINEFACTORY, MANUFACTURING, CLUSTER, REGION AND CORRIDOR2. MAPMINERAL EASTWESTERN PORT BELTSOUTHERN SKILL ARCS

QUESTION: How is India's industrial geography being reorganised?

1. DEFINE: factory, manufacturing, cluster, region and corridor

2. MAP: mineral east

western port belt

southern skill arcs

SYSTEM / DEFINITION

- QUESTION: How is India's industrial geography being reorganised?
- 1. DEFINE: factory, manufacturing, cluster, region and corridor
- 2. MAP: mineral east

PROCESS / MECHANISM

- western port belt
- southern skill arcs
- 3. EXPLAIN INHERITED LOCATION raw material + port + market + labour + transport + agglomeration

SPATIAL / INDIA PATTERN

- 4. ADD NEW NETWORK LOGIC freight corridor + planned node + supplier ecosystem + incentives
- 5. TEST REGIONAL EFFECT jobs + local procurement + skill transfer versus enclave/backwash
- 6. QUALIFY STATUS announcement, construction, operation and outcome need separate evidence

HAZARD / LIMIT / RESPONSE

- 7. VERDICT designed concentration becomes development only when logistics, suppliers, skills, settlements, ecology and institutions work together.

MECHANISM / VERDICT — 7. VERDICT designed concentration becomes development only when logistics, suppliers, skills, settlements, ecology and institutions work together.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: 7. VERDICT designed concentration becomes development only when logistics, suppliers, skills, settlements, ecology and institutions work together.

E

EXTRA SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

OPTIONAL ADVANCED ENRICHMENT1. INDIA'S INDUSTRIAL GEOGRAPHYFROM INHERITED BELTS TO DESIGNED CORRIDORS2. CORRIDORS AND PLANNED INDUSTRIAL SPACE3. PLI AND THE NEW SECTOR-SPECIFIC INDUSTRIAL MAP4. INSTITUTIONS, REGIONAL IMBALANCE AND THE SPREAD-BACKWASH TEST5. ADVANCED FACTS, TRAPS AND CURRENT LINKAGE6. HISTORICAL PYQ INTEGRATION AND ADVANCED ANSWER ROUTES

OPTIONAL PROCESS DEPTH

- 1. India's industrial geography: from inherited belts to designed corridors
- 2. Corridors and planned industrial space
- 3. PLI and the new sector-specific industrial map
- 4. Institutions, regional imbalance and the spread-backwash test

DATA / INSTITUTION LIMIT

- 5. Advanced facts, traps and current linkage
- 6. Historical PYQ integration and advanced answer routes
- Regional imbalance: western and southern corridors may advance faster than eastern or interior regions because prior capabilities differ.
- Brownfield versus greenfield: old belts possess supplier and labour depth; new cities may offer better infrastructure and planning.

CONTEMPORARY PARALLEL

- Deindustrialisation: corridor construction can coexist with weak manufacturing employment quality or decline in particular old sectors.
- Logistics-led industrialisation: multimodal connectivity now complements tariffs, subsidies and industrial licensing.
- Spread versus backwash: local procurement, skills and small-firm upgrading produce spread
- imported labour, enclave supply chains and land pressure produce backwash.

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.

END OF MASTER CANVAS • poster embeds this exact master • tiled pages are overlapping crops of the same pixels
