

GEOGRAPHY 32 - INDUSTRIES AND INDUSTRIAL REGIONS - LEARNER-FIRST V2

INDUSTRIAL GEOGRAPHY: TERMINOLOGY AND – RANKED LOCATION FACTORS AND – WEBER'S LEAST-COST THEORY IN – MAJOR WORLD INDUSTRIAL REGIONS – INDIA'S LAYERED INDUSTRIAL MAP – AGGLOMERATION, DEGLOMERATION, INERTIA AND

Read the thick cyan rail from Stage 00 to the final core synthesis. Each card uses a concept-appropriate structure; the grey E card is optional enrichment only and never repairs missing core content.

PRIMARY CORE FLOW SUBORDINATE EXTRA APPROVAL / REVIEW Approval: FALSE • Pending user review • source generation g11 and all prior artifacts unchanged

CORE BEFORE EXTRA • prior artefacts unchanged • exact same master drives poster and tiles

STAGE 00 INDUSTRIAL GEOGRAPHY: TERMINOLOGY AND LOCATION QUESTION

INDUSTRIAL GEOGRAPHY TERMINOLOGY AND LOCATION QUESTION WHY DOES AN ACTIVITY LOCATE HERE, CLUSTER THERE, PERSIST BROAD ORGANISED ECONOMIC ACTIVITY TRANSFORMATION OF MATERIAL INTO PRODUCTS INDIVIDUAL PRODUCTION ESTABLISHMENT INDUSTRIAL REGION

DENSE INTERACTING FIRMS, LABOUR AND INFRASTRUCTURE

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Do not use factory, manufacturing and industrial region as synonyms.

STAGE 01 RANKED LOCATION FACTORS AND INDUSTRIAL ORIENTATION

RANKED LOCATION FACTORS AND INDUSTRIAL ORIENTATION FIRST ASK WHICH COST, RISK OR CAPABILITY DOMINATES THIS INDUSTRY? RAW-MATERIAL MARKET FOOTLOOSE SKILL WEIGHT LOSS PERISHABILITY HIGH VALUE-TO-WEIGHT BULK OR FRAGILITY PORT ORIENTATION IMPORTED INPUT + EXPORT MARKET + DEEP LOGISTICS POWER ORIENTATION

CLASSIFICATION	DIAGNOSTIC BASIS	PROCESS LINK	EXAM TRAP
FIRST ASK: Which cost, risk or capability dominates this industry?	PORT ORIENTATION: imported input + export market + deep logistics	STATE ORIENTATION: serviced land, trunk utility and policy support	PORT ORIENTATION: imported input + export market + deep logistics
RAW-MATERIAL MARKET FOOTLOOSE / SKILL weight loss perishability high value-to-weight bulk or fragility custom demand knowledge and networks	POWER ORIENTATION: energy-intensive process	RANK FACTORS BY PROCESS STAGE input → transformation → assembly → distribution → after-sales	
ore processing food/bakery electronics / IT-linked	LABOUR ORIENTATION: skill, wage, productivity and labour ecosystem	A multi-stage value chain can split across several locations.	
CLASSIFICATION	DIAGNOSTIC BASIS	PROCESS LINK	EXAM TRAP
FIRST ASK: Which cost, risk or capability dominates this industry?	PORT ORIENTATION: imported input + export market + deep logistics	STATE ORIENTATION: serviced land, trunk utility and policy support	PORT ORIENTATION: imported input + export market + deep logistics
RAW-MATERIAL MARKET FOOTLOOSE / SKILL weight loss perishability high value-to-weight bulk or fragility custom demand knowledge and networks	POWER ORIENTATION: energy-intensive process	RANK FACTORS BY PROCESS STAGE input → transformation → assembly → distribution → after-sales	
ore processing food/bakery electronics / IT-linked	LABOUR ORIENTATION: skill, wage, productivity and labour ecosystem	A multi-stage value chain can split across several locations.	

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: A multi-stage value chain can split across several locations.

STAGE 02 WEBER'S LEAST-COST THEORY IN SIX ANALYTICAL STEPS

WEBER'S LEAST-COST THEORY IN SIX ANALYTICAL STEPS 1. LOCATE RAW-MATERIAL SOURCES AND MARKET 2. CLASSIFY INPUTS UBIQUITOUS OR LOCALISED; PURE OR WEIGHT-LOSING 3. COMPARE TRANSPORT BURDEN THROUGH THE MATERIAL INDEX 4. FIND TRANSPORT-MINIMUM POINT WITHIN THE LOCATIONAL TRIANGLE 5. TEST LABOUR SAVING AGAINST ADDED TRANSPORT COST 6. TEST AGGLOMERATION SAVING AGAINST CONGESTION AND DISPERSION COST

MECHANISM / VERDICT — Weber explains a baseline mechanism, not every final location.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: MODERN QUALIFICATION containers + roads + reliable power + data + regulation + value chains alter cost surfaces, but distance, weight, time and reliability still matter.

STAGE 03 MAJOR WORLD INDUSTRIAL REGIONS AND THEIR GEOGRAPHIC MECHANISMS

MAJOR WORLD INDUSTRIAL REGIONS AND THEIR GEOGRAPHIC MECHANISMS NE UNITED STATES MARKET + GREAT LAKES + TRANSPORT + SKILLS NW EUROPE COAL LEGACY + RHINE LINKS + DENSE MARKETS N ITALY OLD INDUSTRY + SMES + EUROPEAN NETWORKS JAPAN PACIFIC BELT

REGION	MECHANISM
NE United States	market + Great Lakes + transport + skills
Ruhr / NW Europe	coal legacy + Rhine links + dense markets
Midlands / N Italy	old industry + SMEs + European networks
Japan Pacific Belt	ports + imported inputs + coastal markets
China coastal belt	ports + labour + FDI + supplier depth
SYSTEM / DEFINITION	PROCESS / MECHANISM
NE United States	old industry + SMEs + European networks
market + Great Lakes + transport + skills	Japan Pacific Belt
Ruhr / NW Europe	ports + imported inputs + coastal markets
coal legacy + Rhine links + dense markets	China coastal belt
Midlands / N Italy	ports + labour + FDI + supplier depth
SPATIAL / INDIA PATTERN	HAZARD / LIMIT / RESPONSE
South Korea corridor	upgrading, decline, relocation or service transition
ports + chaebol networks + technology	The same label hides different factor combinations and historical paths.
COMMON EVOLUTION resource or port advantage → firm concentration → suppliers and labour	
infrastructure and knowledge → diversification → industrial inertia	
RESTRUCTURING PRESSURE old plant + pollution + land cost + global competition	

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The same label hides different factor combinations and historical paths.

STAGE 04 INDIA'S LAYERED INDUSTRIAL MAP: BELTS, CLUSTERS AND CORRIDORS

INDIA'S LAYERED INDUSTRIAL MAP BELTS, CLUSTERS AND CORRIDORS INDIA'S LAYERED INDUSTRIAL GEOGRAPHY CHOTA NAGPUR COAL + ORE + RAIL STEEL, POWER, ENGINEERING PORT + MARKET + CAPITAL DIVERSIFIED INDUSTRY

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: New corridors overlay inherited belts; they do not erase brownfield depth.

STAGE 05 AGGLOMERATION, DEGLOMERATION, INERTIA AND REGIONAL DIVERGENCE

AGGLOMERATION, DEGLOMERATION, INERTIA AND REGIONAL DIVERGENCE AGGLOMERATION LOOP FIRMS CLUSTER SHARED SUPPLIERS + LABOUR + SERVICES + KNOWLEDGE LOWER TRANSACTION COST MORE FIRMS AND SKILL DEEPER CLUSTER CONGESTION THRESHOLD LAND COST + TRAFFIC + POLLUTION + DEGLOMERATION SELECTED PLANTS OR STAGES MOVE OUTWARD TO CHEAPER

SYSTEM / DEFINITION	PROCESS / MECHANISM	SPATIAL / INDIA PATTERN	HAZARD / LIMIT / RESPONSE
AGGLOMERATION LOOP firms cluster → shared suppliers + labour + services + knowledge	DEGLOMERATION selected plants or stages move outward to cheaper connected sites	SPREAD: local suppliers + training + demand + infrastructure diffusion	DEGLOMERATION selected plants or stages move outward to cheaper connected sites
lower transaction cost → more firms and skill → deeper cluster	INDUSTRIAL INERTIA sunk capital + supplier ties + skill + reputation keep old region active	BACKWASH: talent/capital drain + enclave links + land displacement	
CONGESTION THRESHOLD land cost + traffic + pollution + water stress + labour pressure	REGIONAL OUTCOME TEST	A large plant creates convergence only when local capability and linkages grow.	
SYSTEM / DEFINITION	PROCESS / MECHANISM	SPATIAL / INDIA PATTERN	HAZARD / LIMIT / RESPONSE
AGGLOMERATION LOOP firms cluster → shared suppliers + labour + services + knowledge	DEGLOMERATION selected plants or stages move outward to cheaper connected sites	SPREAD: local suppliers + training + demand + infrastructure diffusion	DEGLOMERATION selected plants or stages move outward to cheaper connected sites
lower transaction cost → more firms and skill → deeper cluster	INDUSTRIAL INERTIA sunk capital + supplier ties + skill + reputation keep old region active	BACKWASH: talent/capital drain + enclave links + land displacement	
CONGESTION THRESHOLD land cost + traffic + pollution + water stress + labour pressure	REGIONAL OUTCOME TEST	A large plant creates convergence only when local capability and linkages grow.	

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: A large plant creates convergence only when local capability and linkages grow.

STAGE 06 STATE, CORRIDORS, PLI AND THE INDUSTRIAL INTERVENTION STACK

STATE, CORRIDORS, PLI AND THE INDUSTRIAL INTERVENTION STACK NATIONAL POLICY MINISTRIES DEFINE FRAMEWORKS AND INCENTIVES CORRIDOR GOVERNANCE SPVs PLAN NODES AND TRUNK SYSTEMS STATE AGENCIES LAND + UTILITIES + APPROVALS + LOCAL INDUSTRIAL ESTATES NETWORK ACTORS

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: STATUS FIREWALL outlay → application → investment → production → incentive → wider outcome.

STAGE 07 MAP-ANSWER AND MAINS SPINE FOR INDUSTRIAL LOCATION AND REGIONS

MAP-ANSWER AND MAINS SPINE FOR INDUSTRIAL LOCATION AND REGIONS HOW IS INDIA'S INDUSTRIAL GEOGRAPHY BEING REORGANISED? 1. DEFINE FACTORY, MANUFACTURING, CLUSTER, REGION AND CORRIDOR 2. MAP MINERAL EAST WESTERN PORT BELT SOUTHERN SKILL ARCS

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: 7. VERDICT designed concentration becomes development only when logistics, suppliers, skills, settlements, ecology and institutions work together.

EXTRA SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

OPTIONAL ADVANCED ENRICHMENT 1. INDIA'S INDUSTRIAL GEOGRAPHY FROM INHERITED BELTS TO DESIGNED CORRIDORS 2. CORRIDORS AND PLANNED INDUSTRIAL SPACE 3. PLI AND THE NEW SECTOR-SPECIFIC INDUSTRIAL MAP 4. INSTITUTIONS, REGIONAL IMBALANCE AND THE SPREAD-BACKWASH TEST 5. ADVANCED FACTS, TRAPS AND CURRENT LINKAGE 6. HISTORICAL PYQ INTEGRATION AND ADVANCED ANSWER ROUTES

OPTIONAL PROCESS DEPTH	DATA / INSTITUTION LIMIT	CONTEMPORARY PARALLEL
India's industrial geography: from inherited belts to designed corridors	Advanced facts, traps and current linkage	Deindustrialisation: corridor construction can coexist with weak manufacturing employment quality or decline in particular old sectors.
Corridors and planned industrial space	Historical PYQ integration and advanced answer routes	Logistics-led industrialisation: multimodal connectivity now complements tariffs, subsidies and industrial licensing.
PLI and the new sector-specific industrial map	Regional imbalance: western and southern corridors may advance faster than eastern or interior regions because prior capabilities differ.	Spread versus backwash: local procurement; skills and small-firm upgrading produce spread
Institutions, regional imbalance and the spread-backwash test	Brownfield versus greenfield: old belts possess supplier and labour depth; new cities may offer better infrastructure and planning.	imported labour, enclave supply chains and land pressure produce backwash.

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.
