

01

THE THREE QUESTIONS EVERY PROOF MUST SURVIVE

CONTEXT + EXACT CORE

□□ Do not treat "proof" univocally: demonstration, probable inference and practical postulate have different success conditions. □□ Do not say the ontological argument is a posteriori because Anselm "observes" that people have the idea of God — the premise is conceptual. □□ Do not equate "a priori" with "certain" and "a posteriori" with "uncertain"; a priori reasoning can be invalid, and a posteriori reasoning can be strong. □□ Distinguish validity from soundness from adequacy of the God established.

MECHANISM / ARGUMENT

Almost every UPSC critique question ("critically examine", "along with its criticism") is answered by locating the objection on one of these three tiers instead of shouting a general "the proof fails".

CONSEQUENCE / CONTRAST

□□ Do not treat "proof" univocally: demonstration, probable inference and practical postulate have different success conditions. □□ Do not say the ontological argument is a posteriori because Anselm "observes" that people have the idea of God — the premise is conceptual. □□ Do not equate "a priori" with "certain" and "a posteriori" with "uncertain"; a priori reasoning can be invalid, and a posteriori reasoning can be strong. □□ Distinguish validity from soundness from adequacy of the God established.

UPSC TRAP / ANSWER USE

The a priori proof promises necessity but is charged with the existence-predicate fallacy.

ANSWER LINE: Every proof must be tested for validity, soundness and adequacy: whether the conclusion follows, the premises are true and the being reached is genuinely God.

02

THE ONTOLOGICAL ARGUMENT AS A REDUCTIO

CONTEXT + EXACT CORE

□□ Distinction to state in the answer: Anselm argues by reductio from a comparative ("greater than"); Descartes argues from essence containment ("existence is a perfection").

MECHANISM / ARGUMENT

□□ Distinction to state in the answer: Anselm argues by reductio from a comparative ("greater than"); Descartes argues from essence containment ("existence is a perfection").

CONSEQUENCE / CONTRAST

It is the argument that has attracted the most sustained modern logical attention of all the proofs. □□ Do not manufacture an "Indian ontological argument" out of Advaita.

UPSC TRAP / ANSWER USE

Gaunilo offers a parody (the form proves too much); Kant offers a diagnosis (the form uses "existence" illegitimately). □□ Do not attribute the island example to Kant, or the thaler example to Gaunilo. □□ Descartes' ontological proof (Meditations V) must not be confused with his causal proof from the idea of the infinite (Meditations III). □□ The modal version does not defeat Kant "cleanly"; it relocates the problem to the possibility premise. □□ Do not say the ontological argument is "obviously absurd".

ANSWER LINE: The ontological argument is an a priori attempt to derive God's necessary existence from the concept of the greatest conceivable being.

03

TWO KINDS OF CAUSAL SERIES (THE WHOLE ARGUMENT TURNS ON THIS)

03

TWO KINDS OF CAUSAL SERIES (THE WHOLE ARGUMENT TURNS ON THIS)

CONTEXT + EXACT CORE

□□ Kant's objection, spelled out because it is frequently mis-stated: the cosmological argument concludes to a necessary being; but to move from "a necessary being" to "the most real being (ens realissimum), i.e.

MECHANISM / ARGUMENT

They start from different features and terminate in differently described conclusions. □□ "First" means explanatory priority, not chronological firstness. □□ Aquinas does not argue that the universe began in time; he holds that its beginning is known by faith. □□ The Kalām does argue for a temporal beginning; it is not Aquinas' argument. □□ Do not attribute Paley's watch to Aquinas (see Subtopic 4). □□ Kant's objection is that the cosmological argument borrows the ontological argument, not that it is invalid on its own terms. □□ Way 3 is modal (contingency/necessity); Way 2 is causal.

CONSEQUENCE / CONTRAST

□□ Kant's objection, spelled out because it is frequently mis-stated: the cosmological argument concludes to a necessary being; but to move from "a necessary being" to "the most real being (ens realissimum), i.e.

UPSC TRAP / ANSWER USE

Keep them apart. □□ Do not say Hume "refuted" the cosmological argument; he attacked the necessity of the regress-stop and the identification of the cause with God.

ANSWER LINE: □□ Ways 1–3 constitute the cosmological family; Way 4 is the henological / degrees argument; Way 5 is the teleological one, treated in Subtopic 4.

04

THREE TELEOLOGIES THAT MUST NOT BE CONFUSED

CONTEXT + EXACT CORE

Technically, Three Teleologies That Must Not Be Confused is analysed by relating Why the difference matters to watch, then testing the relationship through never seen a watch made and does not always work perfectly.

MECHANISM / ARGUMENT

That chronological point is a genuine fact worth stating, because it forestalls the naive assumption that Hume was replying to Paley.

CONSEQUENCE / CONTRAST

□□ □ The trap: Hume does not claim to prove that no designer exists.

UPSC TRAP / ANSWER USE

□ But the decisive difference: Western theists generally believe God is not only the cause of the unity/order of things but also the creative energy that gives existence to the things of Nature.

ANSWER LINE: □ The inference is not weakened if I have never seen a watch made (as we have never seen a world other than this one) and therefore do not know from direct observation that watches are products of intelligence. □ The inference is not invalidated if the mechanism does not always work perfectly — as may appear to be the case with the mechanism of the world. □ The inference is not undermined if there are parts whose function we cannot discover — as there are in nature.

05

KANT'S TWO-STOREY STRUCTURE

05

KANT'S TWO-STOREY STRUCTURE

CONTEXT + EXACT CORE

Technically, Kant's Two-Storey Structure is analysed by relating logical inference to Newman's version, then testing the relationship through Hick's objection and sovereign claim.

MECHANISM / ARGUMENT

Kant is the destroyer of the theistic proofs and the author of a moral argument, and he sees no contradiction because the two operate on different storeys.

CONSEQUENCE / CONTRAST

The resulting consequence is that the basic assumption of all such arguments is that moral values are not capable...

UPSC TRAP / ANSWER USE

This is the topic's most penalised error. □□ Three postulates — freedom, immortality, God — not one. □□ Newman's conscience argument is not Kant's; keep the two forms separate. □□ God is not the source of moral obligation for Kant; the moral law is autonomous. □□ Euthyphro refutes divine-command theories, not Kant's postulate. □□ "Ought implies can" applies to promoting the highest good, not to achieving it single-handedly. □□ Do not present the postulate as a reward-motive; that would be heteronomy and would destroy moral worth on Kant's own terms. □□ Do not omit the Indian comparison; karmaphaladātā is the natural Indian counterpart.

ANSWER LINE: □ Hick's objection: the basic assumption of all such arguments is that moral values are not capable of naturalistic explanation — in terms of human needs, desires, ideals, self-interest, or the structure of human nature or society.

06

NYĀYA'S COSMIC DIVISION OF LABOUR

CONTEXT + EXACT CORE

□□ Nyāya's God is the efficient, never the material, cause.

MECHANISM / ARGUMENT

□□ Nyāya's God is the efficient, never the material, cause.

CONSEQUENCE / CONTRAST

God is creator, preserver and destroyer — hence theism, not deism.

UPSC TRAP / ANSWER USE

Atoms are the eternal material causes. □□ Nyāya theism is theism, not deism — God preserves and destroys as well as creates. □□ Eternal intelligence is an inseparable attribute of God in Nyāya, not His essence as in Advaita. □□ Do not answer "the nature of Nyāya's God" merely by listing Udayana's proofs, or vice versa. □□ Adṛṣṭa does not consciously distribute its own fruits — that unconsciousness is the whole premise of the argument. □□ Enumerations of the proofs vary; say so and use the ones the question needs. □□ The Veda–God circularity is answered by the order-of-existence / order-of-knowledge distinction; do not concede the circle. □□ Do not treat Nyāya as "the Indian Aquinas" without flagging the material-causation divergence.

ANSWER LINE: Nyāya's Īśvara is an eternal, omniscient, omnipotent special self, never bound by karma.

07

TWO COMPLETELY DIFFERENT SENSES OF "GOD" IN THE INDIAN DEBATE

07

TWO COMPLETELY DIFFERENT SENSES OF "GOD" IN THE INDIAN DEBATE

CONTEXT + EXACT CORE

Creator-denial must not be equated with denial of every religious ideal, because Jainism rejects a creator while affirming achieved godhead.

MECHANISM / ARGUMENT

□□ This is the single most important interpretive move in the entire subtopic.

CONSEQUENCE / CONTRAST

UPSC's 2019 wording presupposes that Jainism has something to prove; the mature answer explains which sense of "God" Jainism proves and which it refutes.

UPSC TRAP / ANSWER USE

Do not miss this limiting distinction: creator-denial must not be equated with denial of every religious ideal, because Jainism rejects...

ANSWER LINE: Creator-denial must not be equated with denial of every religious ideal, because Jainism rejects a creator while affirming achieved godhead.

08

PART I — JAINISM

CONTEXT + EXACT CORE

In that Vedic sense Jainism and Buddhism are *nāstika*; but they are intensely spiritual and ethical, and denial of God does not amount to atheism in the Western sense — otherwise *Sāṃkhya* and *Mīmāṃsā*, which likewise do not believe in a creator God, could not have been counted orthodox.

MECHANISM / ARGUMENT

□ Jainism is "a religion without God" in the sense of a creator. □ There is no necessity of bringing in God to explain creation, for the world was never created: production, destruction and permanence characterise all substances; things have creation and dissolution because of their modes (*pariāya*), while the substances themselves are eternal.

CONSEQUENCE / CONTRAST

□ "Though Jainism denies God, it does not deny godhead.

UPSC TRAP / ANSWER USE

In that Vedic sense Jainism and Buddhism are *nāstika*; but they are intensely spiritual and ethical, and denial of God does not amount to atheism in the Western sense — otherwise *Sāṃkhya* and *Mīmāṃsā*, which likewise do not believe in a creator God, could not have been counted orthodox.

ANSWER LINE: Jainism rejects a creator God but affirms liberated, omniscient souls as achieved godhead attained through self-effort.

09

PART II — BUDDHISM

CONTEXT + EXACT CORE

□ If God is eternal and unchanging, genuine creation becomes difficult to explain, because willing or producing seems to involve change. □ If God creates from desire or purpose, that suggests lack, preference

PART II — BUDDHISM

CONTEXT + EXACT CORE

□ If God is eternal and unchanging, genuine creation becomes difficult to explain, because willing or producing seems to involve change. □ If God creates from desire or purpose, that suggests lack, preference or incompleteness. □ The presence of suffering and evil sits uneasily with an omnipotent benevolent creator. □ Dependent origination (pratītyasamutpāda) already explains the arising of phenomena through conditions, making a creator unnecessary.

MECHANISM / ARGUMENT

□ If God is eternal and unchanging, genuine creation becomes difficult to explain, because willing or producing seems to involve change. □ If God creates from desire or purpose, that suggests lack, preference or incompleteness. □ The presence of suffering and evil sits uneasily with an omnipotent benevolent creator. □ Dependent origination (pratītyasamutpāda) already explains the arising of phenomena through conditions, making a creator unnecessary.

CONSEQUENCE / CONTRAST

If God determines all, karma and moral effort are meaningless; if God does not determine all, God is not the sufficient cause and the theistic explanation is redundant. □□ The Dharmakīrti / Śāntarakṣita line.

UPSC TRAP / ANSWER USE

□ Philosophical force, stated correctly: the Buddhist critique is not mere atheistic denial; it is a systematic refusal of explanatory surplus.

ANSWER LINE: Buddhism rejects a permanent creator and explains suffering through conditioned arising rather than divine production.

PART III — MĪMĀṂSĀ

CONTEXT + EXACT CORE

□ And the direct counter to Nyāya's adṛṣṭa proof: apūrva is the unseen potency produced by correctly performed ritual; it persists after the act and matures into future fruit.

MECHANISM / ARGUMENT

□ And the direct counter to Nyāya's adṛṣṭa proof: apūrva is the unseen potency produced by correctly performed ritual; it persists after the act and matures into future fruit.

CONSEQUENCE / CONTRAST

Prābhākara adds niyoga: the injunction itself creates obligation, so one ought to act because the Veda commands, not because a deity rewards.

UPSC TRAP / ANSWER USE

Answering the 2019 question with "Jainism is atheistic" misreads it. □□ Jaina godhood is plural, achieved and non-creative; a siddha has no cosmic function. □□ Jaina karma is material (pudgala); do not equate it with Nyāya's adṛṣṭa or a generic moral force. □□ Nāstika means denier of Vedic authority, not denier of spirit. □□ Buddhism's critique is a refusal of explanatory surplus, not a proof of atheism. □□ The avyākṛta silence is a methodological judgement, not agnostic evasion. □□ Mīmāṃsā's Veda is authorless — not God-authored; this is the exact contradictory of Nyāya's third proof. □□ Apūrva is Mīmāṃsā's substitute for a fruit-dispensing God; do not call it "karma" loosely. □□ Do not say Sāṃkhya "has no view"; classical Sāṃkhya is nirīśvara and also denies a creator. □□ Do not present these schools as a single "Indian atheism".

ANSWER LINE: Mīmāṃsā (school of inquiry into ritual duty) treats the Veda (sacred revealed knowledge) as authorless and karma (morally consequential action) as self-fructifying, thereby displacing the need for God.
