CURRENT SCHOLARLY ANCHOR — [SUPPORTING]**CONTEXT + EXACT CORE**

Current scholarly anchor — [SUPPORTING]: □□ Inference: The episode gives a contemporary use for the 2020 science–technology PYQ: technical systems can classify and reproduce religious perspectives, but questions of moral authority, fairness and human dignity remain philosophical and normative.

MECHANISM / ARGUMENT

□□ Inference: The episode gives a contemporary use for the 2020 science–technology PYQ: technical systems can classify and reproduce religious perspectives, but questions of moral authority, fairness and human dignity remain philosophical and normative.

CONSEQUENCE / CONTRAST

It does not establish any theological claim.

UPSC TRAP / ANSWER USE

It does not establish any theological claim.

ANSWER LINE: □ **Fact: Religion News Service reported on 26 May 2026 that a consortium involving Brigham Young, Baylor, Notre Dame and Yeshiva researchers tested fourteen AI models for multi-faith bias and presented findings at an AI ethics summit in Athens.**

02

VISUAL GATEWAY — THE THREE FUNCTIONS**CONTEXT + EXACT CORE**

Visual gateway — the three functions: Final verdict: Reason is best treated as regulative without being assumed to be the sole source of religious truth.

MECHANISM / ARGUMENT

Recommended opening definition: Reason tests coherence and warrant, revelation claims divine self-disclosure, and faith receives that disclosure through trust and commitment.

CONSEQUENCE / CONTRAST

Core argument/criticism: Propositional models emphasise revealed truths, whereas non-propositional models emphasise divine acts or presence interpreted through human experience.

UPSC TRAP / ANSWER USE

Master verdict: Reason should be regulative but need not be constitutive.

ANSWER LINE: **Master verdict: Reason should be regulative but need not be constitutive.**
