E — SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

EXTRA · OPTIONAL ADVANCED ENRICHMENT · CHANDRA DEFENDS THE NEHRUVIAN DEVELOPMENT MODEL AS A RATIONAL · SELF-RELIANCE, IMPORT SUBSTITUTION, A PUBLIC-SECTOR CORE, AND GROWTH WITH · ITS STRUCTURAL FLAW WAS THE LICENCE-PERMIT-QUOTA RAJ · CONTROLS (IDRA 1951, MRTP, SMALL-SCALE · RESERVATION) THAT PROTECTED INEFFICIENCY, THROTTLED SCALE AND COMPETITION, AND · THE 1991 REFORMS ARE PRESENTED NOT AS SURRENDER BUT · — RETAINING THE GOALS OF GROWTH, SELF-RELIANCE AND POVERTY

OPTIONAL SOURCE DEPTH
- Chandra defends the Nehruvian development model as a rational choice for a poor economy —
- self-reliance, import substitution, a public-sector core, and growth with equity within a democratic frame .
- CAUTION: Its structural flaw was the licence-permit-quota raj : controls (IDRA 1951, MRTP, small-scale
- reservation) that protected inefficiency, throttled scale and competition, and eroded productivity by the 1980s.

ADVANCED DEBATE
- The 1991 reforms are presented not as surrender but as a corrective to excessive dirigisme
- — retaining the goals of growth, self-reliance and poverty removal while changing the instruments.
- CAUTION: The deeper argument: democracy shaped development — a free press helped avert famines, and popular
- sovereignty prevented the coercive extraction of surplus from peasants and workers seen in authoritarian industrialisers.

LEGACY / NUANCE
- Land reform : zamindari abolition (backed by the 1st and 4th Amendments) made about 20 million superior tenants owners.
- The rough fall in tenancy area from 42% to 20–25% cannot be read simply as success because oral
- Tenancy/ceiling implementation suffered from "personal cultivation" loopholes, benami transfers, poor records, delay and official collusion
- Bhoodan/Gramdan could not substitute for structural reform.

OPTIONAL STATUS — This optional depth is unnecessary for a competent core answer; use it only for added nuance after the complete core has been written.
