

ASCII MASTER FLOW – PANEL 1/10: Rationalist starting problem and connected 3-1-infinity sequence

CENTRAL QUESTION: CAN REASON GROUND NECESSITY WHILE EXPERIENCE OCCASIONS KNOWLEDGE?

|

+--> METHOD: a priori principles + intuition + deduction

+--> METAPHYSICS: substance, attribute, mode and sufficient explanation

|

DESCARTES: God + mind + body -> interaction problem

|

SPINOZA: one God/Nature -> parallelism + necessity -> individuality problem

|

LEIBNIZ: many monads -> harmony + contingency -> economy and evil problem

MEMORY: substance 3-1-infinity; mind-body I-P-H.

ASCII MASTER FLOW – PANEL 2/10: Cartesian methodic doubt, cogito and first certainty

FOUR METHOD RULES: evidence -> division -> simple-to-complex order -> complete review

|

SENSE ERROR -> DREAM ARGUMENT -> EVIL-GENIUS HYPOTHESIS

| suspend every belief that can be doubted

v

COGITO: I AM, I EXIST WHENEVER I THINK

| immediate intuition, not a syllogism

+--> clear and distinct perception becomes the model

+--> intuition supplies first principles; deduction orders consequences

LIMIT: present thinking is certain; enduring substance, world and identity need further argument.

ASCII MASTER FLOW – PANEL 3/10: Cartesian knowledge architecture and Circle objection

COGITO -> IDEAS -> GOD -> NON-DECEPTION -> MATHEMATICS AND EXTERNAL RES EXTENSA
IDEAS: innate / adventitious / factitious; objective reality = representational content
GOD: causal adequacy or trademark route + ontological route; present cautiously
WAX: intellect judges extended, flexible, changeable identity beyond sensory qualities
CIRCLE: clear/distinct premises prove God -> God guarantees clear/distinct truth
REPLY: present intuition compels; God secures memory and extended reasoning
RESIDUAL: the divine proofs themselves use inferential premises
WORLD: involuntary ideas + natural inclination + divine veracity support bodies
LIMIT: body-existence is stronger than exact resemblance of sensible qualities.

ASCII MASTER FLOW – PANEL 4/10: Descartes on substance, interaction and freedom

GOD = INFINITE SUBSTANCE, ABSOLUTELY INDEPENDENT

---> RES COGITANS: attribute thought; modes include ideas and volitions

---> RES EXTENSA: attribute extension; modes include shape and motion

REAL DISTINCTION: clear conception of each without the other

SUBSTANTIAL UNION: one embodied person experiences cross-domain coordination

OBJECTION: how can unextended mind cause extended motion? causal-closure pressure

REPLY: primitive notion of union; RESIDUAL: no transparent mechanism

OTHER MINDS: inferred through embodied behaviour, not given by the cogito

FREEDOM: will assents or withholds; error occurs when will outruns intellect

LIMIT: created substances depend continuously on God.

ASCII MASTER FLOW – PANEL 5/10: Spinoza's substance-attribute-mode hierarchy and immanent God

ONE SELF-CAUSED, NECESSARILY EXISTING, ABSOLUTELY INFINITE SUBSTANCE

= DEUS SIVE NATURA

|

infinitely many ATTRIBUTES

|

humans know THOUGHT and EXTENSION

|

finite minds and bodies are MODES

GOD = immanent cause; all modes are in God, but no finite aggregate exhausts God

OBJECTION: acosmism; REPLY: modes retain dependent reality.

ASCII MASTER FLOW – PANEL 6/10: Spinoza's parallelism and route from bondage to freedom

ONE EVENT -> under THOUGHT: idea -> under EXTENSION: body-state
ORDER AND CONNECTION OF IDEAS = ORDER AND CONNECTION OF THINGS
NO cross-attribute causal transfer; parallelism replaces Cartesian interaction
FINITE MODES are necessarily caused; contingency records ignorance of causes
CONATUS = each thing's striving to persevere in being
INADEQUATE IDEAS + external causes -> passive affects -> BONDAGE
COMMON NOTIONS / REASON / INTUITION -> ADEQUATE IDEAS -> ACTIVITY
FREEDOM = acting from understood nature within necessity, not uncaused choice
LIMIT: autonomy survives, but alternative possibilities do not.

ASCII MASTER FLOW – PANEL 7/10: Leibniz's monad hierarchy, perception and individuality

WHY MONADS? extension is divisible; ultimate substance must be simple

GOD: unique uncreated necessary source / complete intelligence

RATIONAL SPIRITS: apperception + reason + moral agency

ANIMAL SOULS: memory + clearer perception

BARE ENTELECHIES: obscure minute perceptions without apperception

EVERY MONAD: simple, unextended, windowless, perceptive and appetitive

APPETITION = internal transition; each perspective expresses the universe

IDENTITY OF INDISCERNIBLES secures uniqueness

BODIES = well-founded phenomena grounded in ordered monadic aggregates.

ASCII MASTER FLOW – PANEL 8/10: Leibnizian harmony, sufficient reason, contingency and freedom

GOD chooses a compossible best world under the PRINCIPLE OF SUFFICIENT REASON
+--> mind-monad states unfold internally
+--> bodily/organic states unfold internally
+--> PRE-ESTABLISHED HARMONY makes them correspond without interaction
TRUTHS OF REASON: opposite contradictory -> logically necessary
TRUTHS OF FACT: opposite conceivable -> contingent though certain
COMPLETE CONCEPT: all predicates belong to the individual known fully by God
FREEDOM: spontaneity + intelligence + contingency; reasons incline, not coerce
OBJECTION: programming/evil; REPLY: self-expression + optimal compossibility
LIMIT: compatibility is stronger than libertarian freedom.

ASCII MASTER FLOW – PANEL 9/10: Three rationalist systems compared on matched axes

+	+	+	+	+
AXIS	DESCARTES	SPINOZA	LEIBNIZ	
+	+	+	+	+
substance	God + mind + body	one God or Nature	many simple monads	
God	creator/guarantee	immanent reality	selector/coordinator	
mind-body	interactionism	parallelism	harmony	
order	mechanism + will	strict necessity	certain/contingent	
freedom	rational assent	adequate activity	intelligent spontaneity	
+	+	+	+	+
PRESSURE SEQUENCE: interaction gap -> monist unity -> restored individuality.				

ASCII MASTER FLOW – PANEL 10/10: Criticism-reply ledger, traps, PYQ routes and answer spine

DESCARTES: interaction gap -> primitive union -> mechanism remains opaque

SPINOZA: necessity/acosmism -> adequate activity + modal reality -> no alternatives

LEIBNIZ: programming/evil/economy -> spontaneity + possible worlds -> residual pressure

PRECISION: substance != attribute != mode; mind != person; necessity != fatalism

PRECISION: spontaneity != autonomy; compatibilism != libertarian freedom

PYQ ROUTES: certainty/self-world; substance 3-1-infinity; pantheism; freedom

PYQ ROUTES: innate ideas; monads/harmony; God; determination/negation

ANSWER SPINE:

directive -> thesis -> definitions -> argument -> example -> objection -> reply -> verdict

CONTROL: claim -> named evidence -> analysis -> qualification

BOUNDARY: core = method, substance, God, mind-body and freedom; later owners stay bounded.

VERDICT: intelligibility is gained at recurring costs to interaction and autonomy.
