00

STAGE 00 CRITICAL STARTING PROBLEM AND THE RATIONALISM-EMPIRICISM SYNTHESIS

CRITICAL STARTING PROBLEM AND THE RATIONALISM-EMPIRICISM SYNTHESIS · HOW CAN COGNITION BE INFORMATIVE, NECESSARY AND OBJECTIVELY VALID? · A PRIORI NECESSITY, BUT DOGMATIC CLAIMS ABOUT SOUL, WORLD · SENSORY CONTENT, BUT NO EXPERIENCED NECESSARY CONNECTION · KANTIAN CRITIQUE · SENSORY MATTER + A PRIORI FORM, RESTRICTED TO POSSIBLE · COPERNICAN REVOLUTION · OBJECTS AS EXPERIENCED CONFORM TO COGNITIVE CONDITIONS

SOURCE / DOCTRINE

- CENTRAL QUESTION: How can cognition be informative, necessary and objectively valid?
- RATIONALISM → a priori necessity, but dogmatic claims about soul, world and God
- EMPIRICISM / HUME → sensory content, but no experienced necessary connection
- KANTIAN CRITIQUE → sensory matter + a priori form, restricted to possible experience

ARGUMENT / MECHANISM

- COPERNICAN REVOLUTION → objects AS EXPERIENCED conform to cognitive conditions
- SENSIBILITY → intuitions in space/time → UNDERSTANDING → categories and objects
- UNDERSTANDING → REASON → Ideas of Soul, World and God; drive to the unconditioned
- TRANSCENDENTAL = conditions of possible experience; TRANSCENDENT = beyond experience

IMPLICATION / VERDICT

- RESULT → empirical realism + transcendental idealism + limit on theoretical reason
- ANSWER LINE → Kant secures objectivity by making its a priori conditions mind-given.

MECHANISM / VERDICT — Sensory matter is received under space and time, synthesised through categories, and pursued toward unity by reason.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Kant reconciles rationalism and empiricism by making a priori form the condition of experiential objectivity while denying that pure reason can convert those forms into knowledge of noumena.

01

STAGE 01 SYNTHETIC A PRIORI JUDGMENTS AND THE COPERNICAN EXPLANATION

SYNTHETIC A PRIORI JUDGMENTS AND THE COPERNICAN EXPLANATION · PREDICATE CONTAINED IN SUBJECT; DENIAL CONTRADICTS THE CONCEPT · PREDICATE ADDS CONTENT; DENIAL IS NOT SELF-CONTRADICTORY · A PRIORI · NECESSARY/UNIVERSAL WARRANT INDEPENDENT OF PARTICULAR EXPERIENCE · A POSTERIORI · EMPIRICAL, INFORMATIVE AND CONTINGENT WARRANT · ANALYTIC A PRIORI

SYSTEM / DOCTRINE	DECISIVE DISTINCTION	EVALUATION / TRAP
ANALYTIC → predicate contained in subject; denial contradicts the concept	ANALYTIC A PRIORI → 'Bodies are extended'; ANALYTIC A POSTERIORI → no Kantian class	MATHEMATICS / FUNDAMENTAL SCIENCE → valid for objects of possible experience
SYNTHETIC → predicate adds content; denial is not self-contradictory	SYNTHETIC A POSTERIORI → 'This table is brown'; informative but contingent	LIMIT → no inference from these forms to things in themselves or transcendent objects
A PRIORI → necessary/universal warrant independent of particular experience	SYNTHETIC A PRIORI → '7 + 5 = 12; every event has a cause; informative + necessary	
A POSTERIORI → empirical, informative and contingent warrant	HOW POSSIBLE? → the mind supplies space, time and categories to every appearance	

SYSTEM / DOCTRINE

- ANALYTIC → predicate contained in subject; denial contradicts the concept
- SYNTHETIC → predicate adds content; denial is not self-contradictory
- A PRIORI → necessary/universal warrant independent of particular experience
- A POSTERIORI → empirical, informative and contingent warrant

DECISIVE DISTINCTION

- ANALYTIC A PRIORI → 'Bodies are extended'; ANALYTIC A POSTERIORI → no Kantian class
- SYNTHETIC A POSTERIORI → 'This table is brown'; informative but contingent
- SYNTHETIC A PRIORI → '7 + 5 = 12; every event has a cause; informative + necessary
- HOW POSSIBLE? → the mind supplies space, time and categories to every appearance

EVALUATION / TRAP

- MATHEMATICS / FUNDAMENTAL SCIENCE → valid for objects of possible experience
- LIMIT → no inference from these forms to things in themselves or transcendent objects

MECHANISM / VERDICT — The knower supplies universal forms to sensory matter, making informative necessity possible for every object that can be experienced.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Synthetic a priori judgments are possible because objects of possible experience must conform to the mind's a priori forms, so mathematics and fundamental natural principles articulate conditions under which anything can appear as an object for us.

02

STAGE 02 TRANSCENDENTAL AESTHETIC: SPACE AND TIME AS FORMS OF INTUITION

TRANSCENDENTAL AESTHETIC · SPACE AND TIME AS FORMS OF INTUITION · FORM OF INTUITION · A PRIORI WAY IN WHICH SENSORY MATTER CAN BE · PURE FORM OF OUTER SENSE; COEXISTENCE, EXTERNALITY AND GEOMETRY · PURE FORM OF INNER SENSE; SUCCESSION AND ALL REPRESENTATIONS · A PRIORI ARGUMENT · SPATIAL/TEMPORAL ORDERING PRESUPPOSES, NOT PRODUCES, THE FORMS

FORM OF INTUITION → a priori way in which sensory matter can be given

SPACE → pure form of OUTER sense; coexistence, externality and geometry → TIME → pure form of INNER sense; succession and all representations → A PRIORI ARGUMENT → spatial/temporal ordering presupposes, not produces, the forms

SOURCE / DOCTRINE

- FORM OF INTUITION → a priori way in which sensory matter can be given
- SPACE → pure form of OUTER sense; coexistence, externality and geometry
- TIME → pure form of INNER sense; succession and all representations
- A PRIORI ARGUMENT → spatial/temporal ordering presupposes, not produces, the forms

ARGUMENT / MECHANISM

- NECESSITY ARGUMENT → empty space/time is representable; objects without them are not
- INTUITION ARGUMENT → one space/time; regions and periods are limitations within it
- INFINITY ARGUMENT → magnitude is represented as a given whole, not instances under a concept
- EMPIRICALLY REAL → objectively valid for every appearance and possible experience

IMPLICATION / VERDICT

- TRANSCENDENTALLY IDEAL → not properties of things in themselves
- OBJECTION → modern geometry/science pressures examples, not the whole transcendental strategy

MECHANISM / VERDICT — Space and time precede and organise sensory relations, allowing geometry, arithmetic, motion and ordered experience.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Space and time are empirically real because every appearance must be spatially or temporally ordered, yet transcendentally ideal because neither can be attributed to things as they are independently of our sensibility.

03

STAGE 03 CATEGORIES, SYNTHESIS AND TRANSCENDENTAL UNITY OF APPERCEPTION

CATEGORIES, SYNTHESIS AND TRANSCENDENTAL UNITY OF APPERCEPTION · METAPHYSICAL DEDUCTION · IDENTIFIES CATEGORIES FROM FUNCTIONS OF JUDGMENT · TRANSCENDENTAL DEDUCTION · JUSTIFIES THEIR OBJECTIVE APPLICATION · SYNTHESIS UNDER RULES · 'I THINK' CAN ACCOMPANY EACH REPRESENTATION · FORMAL UNITY OF SELF-CONSCIOUSNESS, NOT EMPIRICAL EGO OR SOUL-SUBSTANCE

QUANTITY → Unity

QUALITY → Reality → RELATION → Inherence/Subsistence → MODALITY → Possibility/Impossibility

SOURCE / DOCTRINE

- QUANTITY → Unity
- QUALITY → Reality
- RELATION → Inherence/Subsistence
- MODALITY → Possibility/Impossibility

ARGUMENT / MECHANISM

- METAPHYSICAL DEDUCTION → identifies categories from functions of judgment
- TRANSCENDENTAL DEDUCTION → justifies their objective application
- MANIFOLD → SYNTHESIS under rules → 'I THINK' can accompany each representation
- APPERCEPTION → formal unity of self-consciousness, not empirical ego or soul-substance

IMPLICATION / VERDICT

- OBJECTIVE UNITY → the same rule unites representations as one experience of objects
- LIMIT → categories constitute appearances only; they do not picture or determine noumena

MECHANISM / VERDICT — The same rules that unite representations in one consciousness also establish an objective order distinguishable from private association.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The Transcendental Deduction justifies categories by showing that unified self-conscious experience is possible only through rule-governed synthesis, so the categories constitute objects of experience without depicting noumenal things.

04

STAGE 04 SCHEMATISM: TEMPORAL BRIDGE FROM PURE CATEGORY TO APPEARANCE

TEMPORAL BRIDGE FROM PURE CATEGORY TO APPEARANCE · PURE INTELLECTUAL CATEGORY AND SENSIBLE PARTICULAR APPEARANCE ARE HETEROGENEOUS · RULE/PROCEDURE OF PRODUCTIVE IMAGINATION; NEVER A DETERMINATE MENTAL IMAGE · WHY TIME? · IT IS A PRIORI LIKE THE CATEGORY AND CONTAINS · NUMBER THROUGH SUCCESSIVE HOMOGENEOUS ADDITION · DEGREE OR INTENSIVE MAGNITUDE · PERMANENCE, SUCCESSION BY RULE, RECIPROCAL COEXISTENCE

SOURCE / DOCTRINE

- PROBLEM → pure intellectual category and sensible particular appearance are heterogeneous
- SCHEMA → rule/procedure of productive imagination; never a determinate mental image
- WHY TIME? → it is a priori like the category and contains every representation
- QUANTITY / time-series → NUMBER through successive homogeneous addition

ARGUMENT / MECHANISM

- QUALITY / time-content → DEGREE or intensive magnitude
- RELATION / time-order → permanence, succession by rule, reciprocal coexistence
- MODALITY / time-scope → some time, determinate time, all times
- DEDUCTION proves THAT categories apply; SCHEMATISM explains HOW they apply

IMPLICATION / VERDICT

- UNSCHEMATISED CATEGORY → logical function without objective sense for appearances
- RESIDUAL → Kant calls the mediating operation an art concealed in the human soul

MECHANISM / VERDICT — Time-series, time-content, time-order and time-scope mediate Quantity, Quality, Relation and Modality.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Schematism converts logical functions into rules of temporal application, explaining how the Deduction's entitlement becomes usable for appearances while leaving unschematised categories without objective sense.

05

STAGE 05 ANALOGIES OF EXPERIENCE AND KANT'S PRECISE ANSWER TO HUME

ANALOGIES OF EXPERIENCE AND KANT'S PRECISE ANSWER TO HUME · MASTER PREMISE · TIME ITSELF CANNOT BE PERCEIVED; OBJECTIVE TIME NEEDS PROXIES · FIRST ANALOGY · SUBSTANCE PERSISTS WHILE ITS STATES ALTER · SECOND ANALOGY · EVERY EVENT FOLLOWS ACCORDING TO A CAUSAL RULE · THIRD ANALOGY

SYSTEM / DOCTRINE	DECISIVE DISTINCTION	EVALUATION / TRAP
MASTER PREMISE → time itself cannot be perceived; objective time needs proxies	HOUSE → viewing order is reversible; succession belongs to my apprehension	STRAWSON OBJECTION → involuntary order does not automatically prove natural necessity
FIRST ANALOGY / duration → substance persists while its states alter	SHIP DOWNSTREAM → order is irreversible: an objective event requires a rule	VERDICT → Kant secures entitlement to causality more clearly than any particular law
SECOND ANALOGY / succession → every event follows according to a causal rule	ANTI-HUME MOVE → causality is a condition of judging objective succession, not habit	
THIRD ANALOGY / simultaneity → substances coexist through reciprocal community	QUALIFICATION → particular causal laws remain empirical and require investigation	

SYSTEM / DOCTRINE

- MASTER PREMISE → time itself cannot be perceived; objective time needs proxies
- FIRST ANALOGY / duration → substance persists while its states alter
- SECOND ANALOGY / succession → every event follows according to a causal rule
- THIRD ANALOGY / simultaneity → substances coexist through reciprocal community

DECISIVE DISTINCTION

- HOUSE → viewing order is reversible; succession belongs to my apprehension
- SHIP DOWNSTREAM → order is irreversible; an objective event requires a rule
- ANTI-HUME MOVE → causality is a condition of judging objective succession, not habit
- QUALIFICATION → particular causal laws remain empirical and require investigation

EVALUATION / TRAP

- STRAWSON OBJECTION → involuntary order does not automatically prove natural necessity
- VERDICT → Kant secures entitlement to causality more clearly than any particular law

MECHANISM / VERDICT — Persistent substance, irreversible succession under a rule, and reciprocal interaction act as proxies for duration, succession and simultaneity.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Kant answers Hume by arguing that causality is not inferred from repetition but presupposed in judging a succession as an objective event, though particular causal laws remain empirical.

06

STAGE 06 PHENOMENA, NOUMENA, EMPIRICAL REALISM AND THE IDEALISM BOUNDARY

PHENOMENA, NOUMENA, EMPIRICAL REALISM AND THE IDEALISM BOUNDARY · OBJECT AS GIVEN IN SPACE/TIME AND THOUGHT THROUGH CATEGORIES · POSSIBLE EXPERIENCE · KNOWABLE, PUBLIC, CAUSAL AND SCIENTIFICALLY INVESTIGABLE DOMAIN · NOUMENON NEGATIVELY · THING CONSIDERED APART FROM SENSIBLE INTUITION; LIMITING CONCEPT · NOUMENON IS THINKABLE, NOT KNOWABLE · NO THEORETICAL PREDICATES FROM THE CATEGORIES

PHENOMENON → object as given in space/time and thought through categories → POSSIBLE EXPERIENCE → knowable, public, causal and scientifically investigable domain → NOUMENON NEGATIVELY → thing considered apart from sensible intuition; limiting concept → NOUMENON IS THINKABLE, NOT KNOWABLE → no theoretical predicates from the categories → TRANSCENDENTAL IDEALISM → our forms condition appearances

SOURCE / DOCTRINE

- PHENOMENON → object as given in space/time and thought through categories
- POSSIBLE EXPERIENCE → knowable, public, causal and scientifically investigable domain
- NOUMENON NEGATIVELY → thing considered apart from sensible intuition; limiting concept
- NOUMENON IS THINKABLE, NOT KNOWABLE → no theoretical predicates from the categories

ARGUMENT / MECHANISM

- TRANSCENDENTAL IDEALISM → our forms condition appearances
- EMPIRICAL REALISM → external objects are real within experience, not private illusions
- REFUTATION → determinate inner time-awareness requires an empirically external permanent
- TWO-ASPECT READING → one object considered as appearance and independently of our access

IMPLICATION / VERDICT

- HEGEL/JACOBI PRESSURE → boundary knowledge and affection threaten internal consistency
- SAFE VERDICT → negative limitation is defensible; positive noumenal causation is not

MECHANISM / VERDICT — Cognitive conditions establish the knowable phenomenal domain and simultaneously forbid constitutive claims beyond it.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Kant combines transcendental idealism with empirical realism: appearances are objective and public within experience, although categories cannot be extended to things in themselves.

07

STAGE 07 IDEAS OF REASON, REGULATIVE UNITY AND NATURAL TRANSCENDENTAL ILLUSION

IDEAS OF REASON, REGULATIVE UNITY AND NATURAL TRANSCENDENTAL ILLUSION · SUPPLIES RULES FOR APPEARANCES; REASON · SEEKS THE UNCONDITIONED · PROJECTED COMPLETE UNITY OF INNER CONDITIONS · PROJECTED COMPLETE TOTALITY OF COSMOLOGICAL CONDITIONS · PROJECTED COMPLETE GROUND OF ALL CONDITIONS AND REALITY · REGULATIVE USE · GUIDE INQUIRY TOWARD SYSTEMATIC UNITY; LEGITIMATE 'AS IF'

UNDERSTANDING → supplies rules for appearances; REASON → seeks the unconditioned

SOUL → projected complete unity of inner conditions → WORLD → projected complete totality of cosmological conditions → GOD → projected complete ground of all conditions and reality

SOURCE / DOCTRINE

- UNDERSTANDING → supplies rules for appearances; REASON → seeks the unconditioned
- SOUL → projected complete unity of inner conditions
- WORLD → projected complete totality of cosmological conditions
- GOD → projected complete ground of all conditions and reality

ARGUMENT / MECHANISM

- REGULATIVE USE → guide inquiry toward systematic unity; legitimate 'as if'
- CONSTITUTIVE USE → claim the Idea determines a known object; illegitimate
- TRANSCENDENTAL ILLUSION → natural and persistent drive to rely completion
- PARALOGISM → logical 'I think' is misread as simple, substantial, enduring soul

IMPLICATION / VERDICT

- VALUE → systematic research and explanatory integration
- DANGER → paralogisms, antinomies and speculative theology

MECHANISM / VERDICT — Reason projects complete explanatory unity and then mistakes a methodological ideal for a constitutively given object.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Transcendental illusion is natural and persistent because reason cannot stop seeking completion, yet critique can prevent the slide from useful systematic unity to metaphysical claims about soul-substance, world-totality and God.

08

STAGE 08 FOUR COSMOLOGICAL ANTINOMIES AND THEIR DIFFERENTIATED RESOLUTIONS

FOUR COSMOLOGICAL ANTINOMIES AND THEIR DIFFERENTIATED RESOLUTIONS · 1 THESIS · BEGINNING IN TIME + SPATIAL LIMIT · INFINITE TIME/SPACE · 2 THESIS · COMPOSITES END IN SIMPLE PARTS · NOTHING SIMPLE EXISTS · 3 THESIS

SOURCE / DOCTRINE

- 1 THESIS → beginning in time + spatial limit
- ANTITHESIS → infinite time/space
- 2 THESIS → composites end in simple parts
- ANTITHESIS → nothing simple exists
- 3 THESIS → freedom besides nature

ARGUMENT / MECHANISM

- ANTITHESIS → universal natural causality
- 4 THESIS → absolutely necessary being
- ANTITHESIS → no necessary being
- SOURCE OF CONFLICT → categories applied to the world-series as a completed whole
- MATHEMATICAL 1-2 → reject shared assumption that a finite/infinite whole is given

IMPLICATION / VERDICT

- DYNAMICAL 3-4 → phenomenal conditions and intelligible standpoint can be distinguished
- FREEDOM → thinkable noumenally while every appearance remains naturally determined
- NECESSARY GROUND → thinkable boundary, not theoretical proof of God
- SIGNIFICANCE → indirect case for idealism and limit of speculative metaphysics

MECHANISM / VERDICT — Reason demands the unconditioned, turns a never-completed experiential series into a total object, and proves opposed predicates of that pseudo-object.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Transcendental idealism resolves the mathematical antinomies by rejecting the shared assumption of a given world-whole, while it reconciles the dynamical antinomies by distinguishing phenomenal natural conditions from a merely intelligible standpoint.

09

STAGE 09 GOD-PROOF CRITIQUE, EVALUATION LEDGER, TRAPS, PYQS AND ANSWER SPINE

GOD-PROOF CRITIQUE, EVALUATION LEDGER, TRAPS, PYQS AND ANSWER SPINE · PERFECT CONCEPT INCLUDES EXISTENCE · EXISTENCE ADDS NO CONTENT · 100 POSSIBLE/ACTUAL THALERS · SAME CONCEPT; ACTUALITY CANNOT BE EXTRACTED ANALYTICALLY · CONTINGENT EXISTS, THEREFORE NECESSARY GOD · ILLICIT CAUSAL EXTENSION · COSMOLOGICAL DEPENDENCE

ONTOLOGICAL → perfect concept includes existence → KANT → existence adds no content → 100 possible/actual thalers → same concept; actuality cannot be extracted analytically → COSMOLOGICAL → contingent exists, therefore necessary God → illicit causal extension

DOCTRINE / CLAIM

- ONTOLOGICAL → perfect concept includes existence
- KANT → existence adds no content
- 100 possible/actual thalers → same concept; actuality cannot be extracted analytically
- COSMOLOGICAL → contingent exists, therefore necessary God
- illicit causal extension

OBJECTION / PRESSURE

- COSMOLOGICAL DEPENDENCE → necessary being = ens realissimum repeats ontological proof
- DESIGN → order implies designer
- at most an architect; not necessary creator
- DESIGN DEPENDENCE → creator/necessity needs cosmological then ontological steps
- BOUNDARY → theoretical proof fails; this is not a demonstration of atheism

REPLY / RESIDUAL

- COMPARISON → rationalist necessity + empiricist content under critical limitation
- PYQ ROUTES → synthesis, space/time, apperception, antinomies, Hume and God proofs
- ANSWER SPINE → thesis → doctrine → argument → objection/reply → qualified verdict
- FINAL VERDICT → Kant gains phenomenal objectivity at the cost of noumenal agnosticism

MECHANISM / VERDICT — All three routes attempt to turn thought beyond experience into constitutive knowledge, and the latter two ultimately require the ontological step.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Kant's critique removes God from theoretical knowledge rather than from thought or practical faith, completing a system that secures phenomenal objectivity precisely by refusing constitutive claims beyond possible experience.

E

EXTRA SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

OPTIONAL ADVANCED ENRICHMENT · ADVANCED SESSION 1 — THE CRITICAL PROJECT - HUME'S · ADVANCED SESSION 2 — THE CENTRAL PROBLEM - POSSIBILITY · ADVANCED SESSION 3 — TRANSCENDENTAL AESTHETIC - SPACE AND · ADVANCED SESSION 4 — TRANSCENDENTAL ANALYTIC - CATEGORIES, DEDUCTION · ADVANCED SESSION 5 — THE SCHEMATISM - BRIDGING CATEGORIES · ADVANCED SESSION 6 — THE ANALOGIES OF EXPERIENCE · ADVANCED SESSION 7 — REFUTATION OF IDEALISM; PHENOMENA AND

OPTIONAL SOURCE WITNESS
