00 — TRANSITION FROM PICTURE AND LOGICAL FORM TO DESCRIPTIVE THERAPY

STAGE 00

TRACTATUS: PICTURE = LOGICAL FORM · INVESTIGATIONS: REMARKS + DESCRIPTION · CONTINUITY: CLARIFICATION AND LIMITS · DISCONTINUITY: NO ONE HIDDEN ESSENCE · NOT A NEW UNIVERSAL USE THEORY

START → Tractatus: proposition pictures a possible fact through shared logical form. → EARLY AIM → philosophy clarifies limits of sense; factual saying differs from showing. → PRESSURE → one essence, ideal analysis and independent elementary propositions fail. → LATER CONTEXT → Philosophical Investigations, posthumous 1953; remarks, not a system. → SHIFT → inspect diverse human practices instead of a hidden calculus beneath language.

EARLY PROJECT

- Propositions picture possible facts through logical form.
- Analysis seeks logically perspicuous elementary propositions.
- Philosophy clarifies the boundary of factual saying.

LATER TURN

- Actual linguistic practices replace the search for one hidden essence.
- Remarks, comparisons and reminders display grammar case by case.
- Meaning-as-use is carefully qualified and not a universal reduction.

CONTINUITY AND CAUTION

- Both periods treat philosophy as clarification rather than empirical science.
- The diagnosis changes from ideal logical form to captive grammatical pictures.
- Do not erase continuity or project later concepts backward into the Tractatus.

MECHANISM / VERDICT — Tractarian picture/logical-form project -> internal and grammatical pressures -> description of actual uses -> therapeutic remarks rather than system-building.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Later Wittgenstein preserves the early aim of releasing us from philosophical confusion while abandoning the Tractarian assumption that one logical form explains every meaningful use.

01 — MEANING AND USE BEYOND THE AUGUSTINIAN NAME-OBJECT MODEL

STAGE 01

PI 43: LARGE CLASS, NOT ALL · NAMING IS ONE LANGUAGE-GAME · USE = NORM-GOVERNED ROLE · TOOLS, SLABS, NUMBERS, AVOWALS · USE != FREQUENCY OR INTENTION

PI 43 → for a large class of cases, though not all, meaning is use

AUGUSTINIAN PICTURE → every word names an object; sentence combines names. → CORRECTION → naming is one language-game, not the essence of all language. → USE → norm-governed role in a practice, learned through training and contrast.

SOURCE / DOCTRINE

- PI 43 → for a large class of cases, though not all, meaning is use in language.
- AUGUSTINIAN PICTURE → every word names an object; sentence combines names.
- CORRECTION → naming is one language-game, not the essence of all language.
- USE → norm-governed role in a practice, learned through training and contrast.

ARGUMENT / MECHANISM

- EXAMPLES → slab, tools, colour terms, numbers, commands, jokes, prayers, avowals.
- DISTINGUISH → use != usage frequency != intention != reference != definition.
- ANTI-BEHAVIOURISM → public use does not reduce meaning to bodily movement.
- OBJECTION → circularity: meaningful use appears to presuppose meaning and norms.

IMPLICATION / VERDICT

- REPLY → grammar, correction and technique distinguish role from mere recurrence.
- LIMIT → practice displays normativity more clearly than it explains its authority.

MECHANISM / VERDICT — Training and contrasts establish a word's role -> competent speakers apply it across cases -> meaning is displayed in norm-governed use within a practice.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Meaning-as-use redirects analysis from an imagined word-object bond to the norm-governed role a word performs in a practice, without denying reference or defining every meaning identically.

02 — OSTENSIVE DEFINITION, BACKGROUND GRAMMAR AND FAMILY RESEMBLANCE

STAGE 02

POINTING NEEDS BACKGROUND GRAMMAR · COLOUR SAMPLE AS TRAINED RULE · OVERLAPPING FAMILY RESEMBLANCES · OPEN TEXTURE WITH STANDARDS · NO ESSENCE != NO BOUNDARY

POINTING → red square may mean colour, shape, material, number, place or sample.

OSTENSIVE DEFINITION → pointing works only within prior grammar and training. → COLOUR SAMPLE → functions as a rule after comparison and application are learned. → NUMBER SERIES → finite examples do not mechanically contain every future case.

SOURCE / DOCTRINE

- POINTING → red square may mean colour, shape, material, number, place or sample.
- OSTENSIVE DEFINITION → pointing works only within prior grammar and training.
- COLOUR SAMPLE → functions as a rule after comparison and application are learned.
- NUMBER SERIES → finite examples do not mechanically contain every future case.

ARGUMENT / MECHANISM

- FAMILY RESEMBLANCE → similarities overlap and criss-cross without one common atom.
- GAME → board, card, ball, Olympic and solitary cases form an extensible network.
- OPEN TEXTURE → boundaries may remain flexible while standards still operate.
- TRAP → no single essence does not mean anything counts or definitions never work.

IMPLICATION / VERDICT

- OBJECTION → any two things resemble one another somehow; network seems permissive.
- REPLY → purposes, contrasts, training and judgments select relevant similarities.

MECHANISM / VERDICT — Pointing + prior training/grammar -> selected dimension -> corrected applications; overlapping similarities + practice -> extensible concept without one common essence.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Ostension cannot create meaning from an uninterpreted point, and family resemblance removes the demand for one essence without removing the practical standards governing a concept.

03 — LANGUAGE-GAMES, GRAMMAR AND ORGANISED HUMAN ACTIVITY

STAGE 03

LANGUAGE + ACTIVITY + TRAINING · SLAB GAME: COORDINATED PURPOSE · GRAMMAR = NORMS OF USE · PLURALITY WITHOUT CHAOS · NOT A DECORATIVE LIST

LANGUAGE-GAME → language intertwined with activity, training, rules and purpose. → COMPONENTS → participants + circumstances + grammar + possible moves + responses. → SLAB GAME → order, trained response and completed building action form one whole. → PLURALITY → report, joke, pray, calculate, promise, ask, narrate and command. → ANALYSIS → each game has a point and standards; the list alone proves nothing.

SOURCE / DOCTRINE

- LANGUAGE-GAME → language intertwined with activity, training, rules and purpose.
- COMPONENTS → participants + circumstances + grammar + possible moves + responses.
- SLAB GAME → order, trained response and completed building action form one whole.
- PLURALITY → report, joke, pray, calculate, promise, ask, narrate and command.

ARGUMENT / MECHANISM

- ANALYSIS → each game has a point and standards; the list alone proves nothing.
- GRAMMAR → norms of representation and use, not merely classroom syntax.
- PUBLIC EXAMPLES → railway request, court promise, market order, devotional prayer.
- ERROR SOURCE → expression is moved across games while its surface form is retained.

IMPLICATION / VERDICT

- TRAP → language-games are not literal contests or sealed cultural islands.
- LIMIT → strong at differentiation; thinner as causal theory of linguistic change.

MECHANISM / VERDICT — Participants + activity + training + grammar + purpose -> possible moves and responses -> an intelligible language-game with standards of success and failure.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Language-games make meaning inseparable from organised activity: grammar supplies the norms, training supplies competence, and purpose supplies the contrast among uses.

04 — FORMS OF LIFE, AGREEMENT IN JUDGMENTS AND JUSTIFICATORY BEDROCK

STAGE 04

FORM OF LIFE: SHARED BACKGROUND · AGREEMENT IN JUDGMENTS · BEDROCK: THIS IS WHAT I DO · INTELLIGIBILITY AND CORRECTION · AGREEMENT != MAJORITY VOTE

SYSTEM / DOCTRINE	DECISIVE DISTINCTION	EVALUATION / TRAP
FORM OF LIFE → shared practices and natural reactions enabling intelligibility.	MAJORITY → numerical headcount is not the definition of correctness or truth.	OBJECTION → social fact seems to replace reason; relativism or conservatism threatens.
NOT → biological determinism; total cultural worldview or sealed relativism.	BEDROCK → reasons end in 'this is simply what I do' within an established practice.	LIMIT → balance among natural, cultural and normative elements remains unsettled.
LANGUAGE → training and judgments rest on this enacted background.	LION → radically different life can block understanding despite apparent speech.	
AGREEMENT → agreement in judgments and ways of acting, not every opinion.	STRENGTH → avoids infinite explicit justification and private foundations.	

SYSTEM / DOCTRINE

- FORM OF LIFE → shared practices and natural reactions enabling intelligibility.
- NOT → biological determinism, total cultural worldview or sealed relativism.
- LANGUAGE → training and judgments rest on this enacted background.
- AGREEMENT → agreement in judgments and ways of acting, not every opinion.

DECISIVE DISTINCTION

- MAJORITY → numerical headcount is not the definition of correctness or truth.
- BEDROCK → reasons end in 'this is simply what I do' within an established practice.
- LION → radically different life can block understanding despite apparent speech.
- STRENGTH → avoids infinite explicit justification and private foundations.

EVALUATION / TRAP

- OBJECTION → social fact seems to replace reason; relativism or conservatism threatens.
- LIMIT → balance among natural, cultural and normative elements remains unsettled.

MECHANISM / VERDICT — Shared natural reactions and practices -> training and stable judgments -> intelligible language-games -> reasons eventually terminate in enacted standards.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Forms of life explain how rule-governed language has a shared background without converting truth or correctness into whatever a numerical majority happens to accept.

05 — RULE-FOLLOWING, FINITE INSTRUCTION AND THE NORMATIVITY PROBLEM

STAGE 05

FINITE RULE UNDERDETERMINES · INTERPRETATION REGRESS · TRAINING + CORRECTION + PRACTICE · NORMATIVE CONTINUATION · KRIPKENSTEIN IS A CONTESTED READING

RULE-FOLLOWING → being correct differs from merely recurring or seeming correct. → PARADOX PI 201 → every finite course can be interpreted to fit divergent rules. → REGRESS → another interpretation needs another rule; no interpretation is final. → TEXTUAL RESPONSE → grasp of a rule is exhibited in obeying and violating it. → BRIDGE → finite rule + training + examples + correction → normative continuation.

SOURCE / DOCTRINE

- RULE-FOLLOWING → being correct differs from merely recurring or seeming correct.
- PARADOX PI 201 → every finite course can be interpreted to fit divergent rules.
- REGRESS → another interpretation needs another rule; no interpretation is final.
- TEXTUAL RESPONSE → grasp of a rule is exhibited in obeying and violating it.

ARGUMENT / MECHANISM

- BRIDGE → finite rule + training + examples + correction → normative continuation.
- REGULARITY != RULE → only a rule has a role for mistake, correction and breach.
- KRIPKENSTEIN 1982 → sceptical paradox plus community assertibility solution.
- CAUTION → Kripke's reconstruction is contested and not simple textual identity.

IMPLICATION / VERDICT

- INDIVIDUAL PRACTICE → standards may persist without present majority headcount.
- LIMIT → practice may describe normativity without fully explaining its authority.

MECHANISM / VERDICT — Finite rule/examples -> multiple compatible interpretations -> regress if another rule is added -> trained practice displays correct continuation and possible correction.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Rules guide because trained practices sustain a distinction between correct and incorrect continuation; neither a private interpretation nor bare behavioural regularity can create that norm.

06 — ESSENTIALLY PRIVATE LANGUAGE AND THE DIARY S FAILURE

STAGE 06

ESSENTIAL SEMANTIC PRIVACY · PRIVATE OSTENSIVE DEFINITION · DIARY S + MEMORY TABLE · SEEMING/RIGHT COLLAPSE · NOT THOUGHT, DIARY OR SECRET CODE

SOURCE / DOCTRINE	ARGUMENT / MECHANISM	IMPLICATION / VERDICT
TARGET → signs for sensations knowable in principle only to one speaker.	DIARY → later S is checked against an inner memory sample or table.	PUBLIC-WORD REPLY → importing public grammar abandons essential private grounding.
PLUS → correctness cannot be independently distinguished from present seeming.	FAILURE → the present impression judges both sample and application.	LIMIT → temporally extended individual-practice replies keep the debate open.
NOT TARGET → private thought, English diary, secret code or first-person authority.	NORMATIVITY → seeming right cannot constitute being right where no error is possible.	
PRIVATE OSTENSION → inward attention is supposed to fix sign S.	MEMORY REPLY → perfect reliability still needs a standard of same/correct use.	

SOURCE / DOCTRINE

- TARGET → signs for sensations knowable in principle only to one speaker.
- PLUS → correctness cannot be independently distinguished from present seeming.
- NOT TARGET → private thought, English diary, secret code or first-person authority.
- PRIVATE OSTENSION → inward attention is supposed to fix sign S.

ARGUMENT / MECHANISM

- DIARY → later S is checked against an inner memory sample or table.
- FAILURE → the present impression judges both sample and application.
- NORMATIVITY → seeming right cannot constitute being right where no error is possible.
- MEMORY REPLY → perfect reliability still needs a standard of same/correct use.

IMPLICATION / VERDICT

- PUBLIC-WORD REPLY → importing public grammar abandons essential private grounding.
- LIMIT → temporally extended individual-practice replies keep the debate open.

MECHANISM / VERDICT — Private sensation + inward pointing -> sign S -> later memory comparison -> no distinction between correct and seeming-correct -> no privately constituted rule of use.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The diary S fails not because memory is always unreliable but because an exclusively private memory impression cannot by itself constitute a standard that separates correctness from seeming.

07 — SENSATION GRAMMAR, AVOWALS, CRITERIA AND THE BEETLE ILLUSTRATION

STAGE 07

CRITERION != EVIDENCE OR SYMPTOM · AVOWAL != THIRD-PERSON REPORT · BEETLE DROPS OUT OF GRAMMAR · INNER LIFE PRESERVED · PUBLIC != INFALLIBLE OR MAJORITY

SYSTEM / DOCTRINE	DECISIVE DISTINCTION	EVALUATION / TRAP
CRITERION → grammatical ground for application; defeasible, not infallible.	BEETLE → private object drops out of the public word's grammar.	PUBLIC CRITERIA != majority vote, surveillance or conclusive behavioural symptom.
EVIDENCE/SYMPTOM → empirical support or correlation; revisable by investigation.	CAUTION → beetle is an illustration, not the whole private-language proof.	LIMIT → grammar leaves the qualitative character of experience under-described.
AVOWAL → 'I am in pain' expresses pain; it is not self-observation from behaviour.	ANTI-BEHAVIOURISM → criteria organise a concept but do not equal bodily motion.	
THIRD PERSON → 'She is in pain' uses context, expression and outward criteria.	SECRET CODE → rule is teachable/checkable; concealment is merely contingent.	

SYSTEM / DOCTRINE

- CRITERION → grammatical ground for application; defeasible, not infallible.
- EVIDENCE/SYMPTOM → empirical support or correlation; revisable by investigation.
- AVOWAL → 'I am in pain' expresses pain; it is not self-observation from behaviour.
- THIRD PERSON → 'She is in pain' uses context, expression and outward criteria.

DECISIVE DISTINCTION

- BEETLE → private object drops out of the public word's grammar.
- CAUTION → beetle is an illustration, not the whole private-language proof.
- ANTI-BEHAVIOURISM → criteria organise a concept but do not equal bodily motion.
- SECRET CODE → rule is teachable/checkable; concealment is merely contingent.

EVALUATION / TRAP

- PUBLIC CRITERIA != majority vote, surveillance or conclusive behavioural symptom.
- LIMIT → grammar leaves the qualitative character of experience under-described.

MECHANISM / VERDICT — Natural pain-expression -> training in pain-word -> avowal in first person; outward circumstances -> criterion-guided third-person judgment; private object is not semantic ground.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Wittgenstein is anti-Cartesian without being behaviourist: outward criteria organise the grammar of sensation concepts while avowals preserve first-person authority and inner experience.

08 — PERSPICUOUS REPRESENTATION AND PHILOSOPHICAL THERAPY

STAGE 08

LANGUAGE IDLES / GOES ON HOLIDAY · PERSPICUOUS REPRESENTATION · REMINDERS + DESCRIPTION · FLY FINDS THE EXIT · QUIETISM REMAINS A REAL LIMIT

DIAGNOSIS → language idles or goes on holiday outside its home practice. → CAPTIVE PICTURE → surface analogy makes a pseudo-demand seem unavoidable. → PROBLEM FORM → philosophical disorientation: 'I do not know my way about.' → TOOLS → description, reminders, comparisons and perspicuous representation. → PERSPICUOUS → arrange grammar so connections and crossed games become visible.

SOURCE / DOCTRINE

- DIAGNOSIS → language idles or goes on holiday outside its home practice.
- CAPTIVE PICTURE → surface analogy makes a pseudo-demand seem unavoidable.
- PROBLEM FORM → philosophical disorientation: 'I do not know my way about.'
- TOOLS → description, reminders, comparisons and perspicuous representation.

ARGUMENT / MECHANISM

- PERSPICUOUS → arrange grammar so connections and crossed games become visible.
- THERAPY → local treatments; no one empirical science or metaphysical system.
- FLY-BOTTLE → show the path out of a self-generated conceptual trap.
- QUIETISM → 'leaves everything as it is' can appear conservative or self-defeating.

IMPLICATION / VERDICT

- REPLY → first-order science, ethics and reform are not automatically prohibited.
- LIMIT → identifying every persistent problem as grammatical risks unfalsifiability.

MECHANISM / VERDICT — Misleading analogy or idle word -> philosophical disorientation -> compare language-games and assemble reminders -> perspicuous view -> grip of problem weakens.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Wittgensteinian therapy changes our view of the grammatical terrain rather than adding a theory behind it, but its refusal of explanation must itself be defended against quietism.

09 — EARLY-LATER SYNTHESIS, DISTINCTIONS AND ANSWER SPINE

STAGE 09

EARLY / LATER COMPARATIVE SYNTHESIS · SEVEN EXACT DISTINCTIONS · OBJECTIONS + SERIOUS REPLIES · ORDINARY LANGUAGE + MIND + RULES · POWERFUL METHOD, LIMITED THEORY

EARLY → name/object, logical form, picture, ideal analysis and saying/showing. → LATER → practice, grammar, use, games, family resemblance and therapeutic dissolution. → CONTRIBUTION → ordinary language, mind, anti-essentialism and rule-following. → LIMITS → quietism, relativism, normativity, science and private experience. → DISTINGUISH → criterion/evidence; symptom/criterion; private/secret.

DOCTRINE / CLAIM

- EARLY → name/object, logical form, picture, ideal analysis and saying/showing.
- LATER → practice, grammar, use, games, family resemblance and therapeutic dissolution.
- CONTRIBUTION → ordinary language, mind, anti-essentialism and rule-following.
- LIMITS → quietism, relativism, normativity and private experience.

OBJECTION / PRESSURE

- DISTINGUISH → criterion/evidence; symptom/criterion; private/secret.
- DISTINGUISH → rule/regularity; use/intention; grammar/empirical fact.
- DISTINGUISH → agreement in judgments/majority headcount.
- ENRICHMENT → aspect-seeing, certainty, religion and post-Wittgensteinian debate.

REPLY / RESIDUAL

- ANSWER SPINE → thesis → definitions → mechanism → objection/reply → comparison.
- VERDICT → powerful anti-essentialist method; incomplete general explanatory theory.

MECHANISM / VERDICT — Fair reconstruction of transition -> use/games/rules/private-language mechanism -> precise distinctions -> objections and replies -> qualified contribution and residual limits.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: A comparative synthesis of Later Wittgenstein supports a precise answer architecture: his anti-essentialist method clarifies language and mind, although practice under-explains normativity.

E — SUBORDINATE ENRICHMENT — ONLY AFTER THE COMPLETE CORE

EXTRA

OPTIONAL ADVANCED ENRICHMENT · ADVANCED SESSION 1 — THE BREAK FROM THE TRACTATUS · ADVANCED SESSION 2 — MEANING AS USE - THE · ADVANCED SESSION 3 — FAMILY RESEMBLANCE - OVERLAPPING SIMILARITIES · ADVANCED SESSION 4 — LANGUAGE-GAMES - LANGUAGE WOVEN INTO · ADVANCED SESSION 5 — FORMS OF LIFE - PI · ADVANCED SESSION 6 — RULE-FOLLOWING AND THE PARADOX (PI · ADVANCED SESSION 7 — THE PRIVATE-LANGUAGE ARGUMENT - LOGICAL

OPTIONAL SOURCE WITNESS
