

SOLVED PRACTICE WORKBOOK

Tribe and Tribal Society - Solved Practice Workbook

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Tribe and Tribal Society - Solved Practice Workbook 6

BASIC MCQS / REMEDIATION 6

Q1. Which statement correctly identifies Scheduled Tribe as a legal category?	6
Q2. Which chronology card should be filed under Scheduled Tribe as a legal category?	6
Q3. Which option preserves the source-bounded meaning of Scheduled Tribe as a legal category?	6
Q4. Which statement avoids a close-option trap about Scheduled Tribe as a legal category?	7
Q5. Which statement correctly identifies Tribe-caste continuum?	7
Q6. Which chronology card should be filed under Tribe-caste continuum?	7
Q7. Which option preserves the source-bounded meaning of Tribe-caste continuum?	8
Q8. Which statement avoids a close-option trap about Tribe-caste continuum?	8
Q9. Which statement correctly identifies Elwin's isolation?	8
Q10. Which chronology card should be filed under Elwin's isolation?	9
Q11. Which option preserves the source-bounded meaning of Elwin's isolation?	9
Q12. Which statement avoids a close-option trap about Elwin's isolation?	9
Q13. Which statement correctly identifies Ghurye's assimilation?	10
Q14. Which chronology card should be filed under Ghurye's assimilation?	10
Q15. Which option preserves the source-bounded meaning of Ghurye's assimilation?	10
Q16. Which statement avoids a close-option trap about Ghurye's assimilation?	11
Q17. Which statement correctly identifies Nehru's Panchsheel for Tribals?	11
Q18. Which chronology card should be filed under Nehru's Panchsheel for Tribals?	11
Q19. Which option preserves the source-bounded meaning of Nehru's Panchsheel for Tribals?	12
Q20. Which statement avoids a close-option trap about Nehru's Panchsheel for Tribals?	12
Q21. Which statement correctly identifies Acculturation as the actual outcome?	12
Q22. Which chronology card should be filed under Acculturation as the actual outcome?	13
Q23. Which option preserves the source-bounded meaning of Acculturation as the actual outcome?	13
Q24. Which statement avoids a close-option trap about Acculturation as the actual outcome?	13
Q25. Which statement correctly identifies Resource overlap?	14
Q26. Which chronology card should be filed under Resource overlap?	14
Q27. Which option preserves the source-bounded meaning of Resource overlap?	14

Q28. Which statement avoids a close-option trap about Resource overlap?	14
Q29. Which statement correctly identifies Project displacement?	15
Q30. Which chronology card should be filed under Project displacement?	15
Q31. Which option preserves the source-bounded meaning of Project displacement?	15
Q32. Which statement avoids a close-option trap about Project displacement?	16
Q33. Which statement correctly identifies Land alienation?	16
Q34. Which chronology card should be filed under Land alienation?	16
Q35. Which option preserves the source-bounded meaning of Land alienation?	17
Q36. Which statement avoids a close-option trap about Land alienation?	17
Q37. Which statement correctly identifies Rehabilitation as restoration or compensation?	17
Q38. Which chronology card should be filed under Rehabilitation as restoration or compensation?	18
Q39. Which option preserves the source-bounded meaning of Rehabilitation as restoration or compensation?	18
Q40. Which statement avoids a close-option trap about Rehabilitation as restoration or compensation?	18
Q41. Which statement correctly identifies Rehabilitation decides the welfare sign?	19
Q42. Which chronology card should be filed under Rehabilitation decides the welfare sign?	19
Q43. Which option preserves the source-bounded meaning of Rehabilitation decides the welfare sign?	19
Q44. Which statement avoids a close-option trap about Rehabilitation decides the welfare sign?	20
Q45. Which statement correctly identifies Particularly Vulnerable Tribal Groups?	20
Q46. Which chronology card should be filed under Particularly Vulnerable Tribal Groups?	20
Q47. Which option preserves the source-bounded meaning of Particularly Vulnerable Tribal Groups?	21
Q48. Which statement avoids a close-option trap about Particularly Vulnerable Tribal Groups?	21
Q49. Which statement correctly identifies Fifth and Sixth Schedule contexts?	21
Q50. Which chronology card should be filed under Fifth and Sixth Schedule contexts?	22
Q51. Which option preserves the source-bounded meaning of Fifth and Sixth Schedule contexts?	22
Q52. Which statement avoids a close-option trap about Fifth and Sixth Schedule contexts?	22
Q53. Which statement correctly identifies Aggregate for rights, disaggregate for design?	23
Q54. Which chronology card should be filed under Aggregate for rights, disaggregate for design?	23
Q55. Which option preserves the source-bounded meaning of Aggregate for rights, disaggregate for design?	23
Q56. Which statement avoids a close-option trap about Aggregate for rights, disaggregate for design?	24
Q57. Which statement correctly identifies Tribal knowledge domains?	24
Q58. Which chronology card should be filed under Tribal knowledge domains?	24
Q59. Which option preserves the source-bounded meaning of Tribal knowledge domains?	25

Q60. Which statement avoids a close-option trap about Tribal knowledge domains?	25
Q61. Which statement correctly identifies Mode contrast?	25
Q62. Which chronology card should be filed under Mode contrast?	26
Q63. Which option preserves the source-bounded meaning of Mode contrast?	26
Q64. Which statement avoids a close-option trap about Mode contrast?	26
Q65. Which statement correctly identifies Two prohibitions on knowledge answers?	27
Q66. Which chronology card should be filed under Two prohibitions on knowledge answers?	27
Q67. Which option preserves the source-bounded meaning of Two prohibitions on knowledge answers?	27
Q68. Which statement avoids a close-option trap about Two prohibitions on knowledge answers?	28
Q69. Which statement correctly identifies Scale and distinctiveness?	28
Q70. Which chronology card should be filed under Scale and distinctiveness?	28
Q71. Which option preserves the source-bounded meaning of Scale and distinctiveness?	29
Q72. Which statement avoids a close-option trap about Scale and distinctiveness?	29
Q73. Which statement correctly identifies Identity movements and land?	29
Q74. Which chronology card should be filed under Identity movements and land?	30
Q75. Which option preserves the source-bounded meaning of Identity movements and land?	30
Q76. Which statement avoids a close-option trap about Identity movements and land?	30
Q77. Which statement correctly identifies Verified direct Mains demands?	31
Q78. Which chronology card should be filed under Verified direct Mains demands?	31
Q79. Which option preserves the source-bounded meaning of Verified direct Mains demands?	31
Q80. Which statement avoids a close-option trap about Verified direct Mains demands?	32

Tribe and Tribal Society - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Scheduled Tribe as a legal category?

A. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. B. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. C. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. D. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

Answer: A. Explanation: Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Scheduled Tribe as a legal category?

A. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. B. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. C. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. D. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

Answer: B. Explanation: Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Scheduled Tribe as a legal category?

A. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. D. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.

Answer: C. Explanation: Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Scheduled Tribe as a legal category?

A. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. D. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.

Answer: D. Explanation: Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Tribe-caste continuum?

A. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. B. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. C. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. D. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.

Answer: A. Explanation: The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Tribe-caste continuum?

A. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. B. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. C. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. D. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.

Answer: B. Explanation: The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Tribe-caste continuum?

A. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. D. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

Answer: C. Explanation: The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Tribe-caste continuum?

A. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. B. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. C. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. D. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

Answer: D. Explanation: The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies Elwin's isolation?

A. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. B. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. C. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. D. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

Answer: A. Explanation: Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under Elwin's isolation?

A. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. B. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. C. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. D. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

Answer: B. Explanation: Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Elwin's isolation?

A. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. D. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain.

Answer: C. Explanation: Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Elwin's isolation?

A. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. B. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. C. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. D. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.

Answer: D. Explanation: Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Ghurye's assimilation?

A. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. D. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

Answer: A. Explanation: G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Ghurye's assimilation?

A. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. B. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

Answer: B. Explanation: G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Ghurye's assimilation?

A. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. D. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

Answer: C. Explanation: G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Ghurye's assimilation?

A. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. B. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. C. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. D. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.

Answer: D. Explanation: G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Nehru's Panchsheel for Tribals?

A. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. B. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.

Answer: A. Explanation: Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Nehru's Panchsheel for Tribals?

A. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. B. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

Answer: B. Explanation: Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Nehru's Panchsheel for Tribals?

A. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. B. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. C. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. D. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

Answer: C. Explanation: Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Nehru's Panchsheel for Tribals?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. D. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

Answer: D. Explanation: Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Acculturation as the actual outcome?

A. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. B. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. C. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. D. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

Answer: A. Explanation: None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Acculturation as the actual outcome?

A. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: B. Explanation: None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Acculturation as the actual outcome?

A. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. D. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.

Answer: C. Explanation: None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Acculturation as the actual outcome?

A. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. B. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. D. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.

Answer: D. Explanation: None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Resource overlap?

A. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: A. Explanation: Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Resource overlap?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. C. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. D. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

Answer: B. Explanation: Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Resource overlap?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: C. Explanation: Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Resource overlap?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

Answer: D. Explanation: Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Project displacement?

A. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: A. Explanation: Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Project displacement?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: B. Explanation: Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Project displacement?

A. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. B. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.

Answer: C. Explanation: Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Project displacement?

A. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain.

Answer: D. Explanation: Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Land alienation?

A. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. B. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: A. Explanation: Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Land alienation?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. D. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.

Answer: B. Explanation: Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Land alienation?

A. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. D. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

Answer: C. Explanation: Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Land alienation?

A. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. B. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. C. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. D. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

Answer: D. Explanation: Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Rehabilitation as restoration or compensation?

A. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. D. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.

Answer: A. Explanation: Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Rehabilitation as restoration or compensation?

A. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. B. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

Answer: B. Explanation: Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Rehabilitation as restoration or compensation?

A. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. B. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. C. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. D. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

Answer: C. Explanation: Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Rehabilitation as restoration or compensation?

A. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. B. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. C. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: D. Explanation: Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies Rehabilitation decides the welfare sign?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy.

Answer: A. Explanation: Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Rehabilitation decides the welfare sign?

A. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. B. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

Answer: B. Explanation: Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Rehabilitation decides the welfare sign?

A. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. B. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. C. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: C. Explanation: Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Rehabilitation decides the welfare sign?

A. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. B. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. C. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. D. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.

Answer: D. Explanation: Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Particularly Vulnerable Tribal Groups?

A. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. B. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.

Answer: A. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Particularly Vulnerable Tribal Groups?

A. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. D. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.

Answer: B. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Particularly Vulnerable Tribal Groups?

A. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: C. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Particularly Vulnerable Tribal Groups?

A. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. B. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy.

Answer: D. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Fifth and Sixth Schedule contexts?

A. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. B. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. C. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: A. Explanation: Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Fifth and Sixth Schedule contexts?

A. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. B. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. C. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: B. Explanation: Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Fifth and Sixth Schedule contexts?

A. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: C. Explanation: Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Fifth and Sixth Schedule contexts?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.

Answer: D. Explanation: Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Aggregate for rights, disaggregate for design?

A. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. D. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.

Answer: A. Explanation: A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Aggregate for rights, disaggregate for design?

A. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. B. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. C. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: B. Explanation: A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Aggregate for rights, disaggregate for design?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: C. Explanation: A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Aggregate for rights, disaggregate for design?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

Answer: D. Explanation: A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Tribal knowledge domains?

A. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. B. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified.

Answer: A. Explanation: Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Tribal knowledge domains?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. C. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: B. Explanation: Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Tribal knowledge domains?

A. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. B. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. C. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: C. Explanation: Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Tribal knowledge domains?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.

Answer: D. Explanation: Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Mode contrast?

A. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

Answer: A. Explanation: Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Mode contrast?

A. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. B. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. C. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: B. Explanation: Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Mode contrast?

A. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. B. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. C. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. D. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks.

Answer: C. Explanation: Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Mode contrast?

A. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. B. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. C. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: D. Explanation: Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Two prohibitions on knowledge answers?

A. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. B. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

Answer: A. Explanation: Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Two prohibitions on knowledge answers?

A. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

Answer: B. Explanation: Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Two prohibitions on knowledge answers?

A. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. B. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. C. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. D. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.

Answer: C. Explanation: Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Two prohibitions on knowledge answers?

A. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. B. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. C. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. D. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified.

Answer: D. Explanation: Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Scale and distinctiveness?

A. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. B. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.

Answer: A. Explanation: Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Scale and distinctiveness?

A. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. B. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

Answer: B. Explanation: Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Scale and distinctiveness?

A. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. B. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.

Answer: C. Explanation: Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Scale and distinctiveness?

A. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. B. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. C. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: D. Explanation: Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Identity movements and land?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. C. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. D. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks.

Answer: A. Explanation: Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Identity movements and land?

A. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. B. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. C. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. D. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.

Answer: B. Explanation: Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Identity movements and land?

A. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. B. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. C. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. D. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

Answer: C. Explanation: Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Identity movements and land?

A. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. B. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. C. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. D. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

Answer: D. Explanation: Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Verified direct Mains demands?

A. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. B. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. C. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. D. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

Answer: A. Explanation: Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Verified direct Mains demands?

A. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. B. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. C. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. D. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.

Answer: B. Explanation: Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Verified direct Mains demands?

A. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. B. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.

Answer: C. Explanation: Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Verified direct Mains demands?

A. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. B. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. C. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. D. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks.

Answer: D. Explanation: Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Three direct General Studies Paper-I Mains demands are verified for this owner. The 2025 demand is routed in the audited 2024-2025 ledger to the Basic owner; the 2021 and 2022 demands are routed in the audited 2018-2023 ledger to the Advanced owner, and the Core owner records that Core routing supersedes, so all three are answered from the Basic spine. Each wording reproduced below was confirmed against the locally held official General Studies Paper-I question papers. The owner additionally carries one routed 2021 Prelims item on the Halbi, Ho and Kui tribal languages; its official key is not held locally, so no option is inferred and it is not converted into a solved answer.

OWNER PYQ LEDGER EXTRACTS

5. Indian applications and PYQ mapping

- **FACT: 2025 GS-I PYQ (15 marks, verbatim):** "Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion." The expected answer: affirm that these are indeed the two dominant, linked axes - development projects (mining, dams, industrial corridors) in tribal-majority regions repeatedly cause displacement, and the adequacy of rehabilitation (land-for-land, livelihood restoration, community relocation intact) determines whether "development" becomes net welfare or net loss for the displaced community; a balanced opinion should add that non-displacement dimensions (education, health, identity recognition) also matter, so the two-axis framing captures the most visible but not the only dimension of tribal development.
- **ANALYSIS:** A tribal community relocated for a dam project but resettled without adequate land or continuity of community structure illustrates the rehabilitation gap the PYQ probes.

9. PYQ application

- **FACT: 2025 GS-I (15 marks):** structure as affirm-the-two-axis-framing, explain the displacement mechanism (mining/dams/industry in tribal-majority regions), explain the rehabilitation-adequacy question (land-for-land, livelihood, community continuity), and qualify with a balanced opinion noting other dimensions (education, health, identity) also matter.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2025

- **Paper(s):** GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2025	GS-I	20	Tribal development around displacement and rehabilitation	Give your opinion · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Tribal development around displacement and rehabilitation

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2021
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2021	Prelims GS-I	95	Halbi Ho and Kui tribal languages of India	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Halbi Ho and Kui tribal languages of India

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- **FACT: 2025 GS-I (15 marks, verbatim):** "Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion." Analytical route: (a) affirm the two-axis framing with the resource-overlap mechanism explaining why tribal regions face disproportionate displacement; (b) use the rehabilitation-quality distinction (restoration versus compensation) to explain why displacement outcomes vary; (c) give one boundary case of successful rehabilitation and one of failed rehabilitation; (d) offer a qualified opinion - the two axes dominate lived tribal development, but education, health and identity-recognition dimensions remain necessary complements, so the framing is largely but not wholly sufficient.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2021, 2022
- **Paper(s):** GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2021	GS-I	9	Uniqueness of tribal knowledge systems against mainstream systems	Examine · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2022	GS-I	10	Tribal diversity and treatment as a single category	In which specific contexts · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Uniqueness of tribal knowledge systems against mainstream systems
- Tribal diversity and treatment as a single category

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2025 GS-I Q20

Demand: Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion. (Answer in 250 words) 15 marks.

Status: Verified verbatim in the audited 2024-2025 Mains routing ledger and in the locally held official 2025 General Studies Paper-I.

Model solution: State the opinion at once as an analytical claim to be defended: displacement and rehabilitation are the axes on which tribal development is contested, but not the only axes on which it is constituted. Prove axis one. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, so mining, dam and industrial projects are structurally sited where tribal communities live, and displacement removes the subsistence and identity base at the same time; the qualification is that no displacement count or project figure is verified in this folder and none is asserted. Distinguish it from land alienation, the slow transfer of tribal land to non-tribal ownership through debt, distress sale or encroachment, which accounts for cumulative land loss that a project-only framing misses. Prove axis two. The decisive distinction is rehabilitation as restoration vs rehabilitation as compensation: restoration-oriented resettlement rebuilds land access, livelihood and an intact community while compensation-oriented resettlement pays cash and scatters a village, so the welfare sign of the same project depends on design rather than on intention. State what the two-axis framing omits: the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands whose vulnerability precedes any project; education, health, identity recognition and Fifth and Sixth Schedule self-governance also determine outcomes. Conclude with a graded opinion: the framing is accurate about conflict and incomplete about development, because the decisive question is whether communities retain decision-making over land, livelihood and culture. Why this earns marks: it gives an opinion first, proves both axes with mechanisms, adds the omitted dimension, and closes with a graded rather than binary verdict.

Demand decoding: The directive **answer** requires a direct position on “PYQ DEMAND CARD 1 - 2025 GS-I Q20”, all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: State the opinion at once as an analytical claim to be defended: displacement and rehabilitation are the axes on which tribal development is contested, but not the only axes on which it is constituted. Prove axis one. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, so mining, dam and industrial projects are structurally sited where tribal communities live, and displacement removes the subsistence and identity base at the same time; the qualification is that no displacement count or project figure is verified in this folder and none is asserted. Distinguish it from land alienation, the slow transfer of tribal land to non-tribal ownership through debt, distress sale or encroachment, which accounts for cumulative land loss that a project-only framing misses. Prove axis two. The decisive distinction is rehabilitation as restoration vs rehabilitation as compensation:

restoration-oriented resettlement rebuilds land access, livelihood and an intact community while compensation-oriented resettlement pays cash and scatters a village, so the welfare sign of the same project depends on design rather than on intention. State what the two-axis framing omits: the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands whose vulnerability precedes any project; education, health, identity recognition and Fifth and Sixth Schedule self-governance also determine outcomes. Conclude with a graded opinion: the framing is accurate about conflict and incomplete about development, because the decisive question is whether communities retain decision-making over land, livelihood and culture. Why this earns marks: it gives an opinion first, proves both axes with mechanisms, adds the omitted dimension, and closes with a graded rather than binary verdict.

Analytical body:

1. **Claim and named evidence:** Demand: Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion. (Answer in 250 words) 15 marks. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Status: Verified verbatim in the audited 2024-2025 Mains routing ledger and in the locally held official 2025 General Studies Paper-I. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: State the opinion at once as an analytical claim to be defended: displacement and rehabilitation are the axes on which tribal development is contested, but not the only axes on which it is constituted. Prove axis one. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, so mining, dam and industrial projects are structurally sited where tribal communities live, and displacement removes the subsistence and identity base at the same time; the qualification is that no displacement count or project figure is verified in this folder and none is asserted. Distinguish it from land alienation, the slow transfer of tribal land to non-tribal ownership through debt, distress sale or encroachment, which accounts for cumulative land loss that a project-only framing misses. Prove axis two. The decisive distinction is rehabilitation as restoration vs rehabilitation as compensation: restoration-oriented resettlement rebuilds land access, livelihood and an intact community while compensation-oriented resettlement pays cash and scatters a village, so the welfare sign of the same project depends on design rather than on intention. State what the two-axis framing omits: the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands whose vulnerability precedes any project; education, health, identity recognition and Fifth and Sixth Schedule self-governance also determine outcomes. Conclude with a graded opinion: the framing is accurate about conflict and incomplete about development, because the decisive question is whether communities retain decision-making over land, livelihood and culture. Why this earns marks: it gives an opinion first, proves both axes with mechanisms, adds the omitted dimension, and closes with a graded rather than binary verdict.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2025 GS-I Q20", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 2 - 2021 GS-I Q9

Demand: Examine the uniqueness of tribal knowledge system when compared with mainstream knowledge and cultural systems. (Answer in 150 words) 10 marks.

Status: Routed in the audited 2018-2023 Mains routing ledger to the Advanced owner with Core routing recorded as superseding; wording confirmed in the locally held official General Studies Paper-I.

Model solution: Open with the thesis that the uniqueness lies in mode rather than in exotic content. Examine domain by domain with the mainstream contrast. Ecological knowledge holds seasonal indicators, species behaviour and fire and fallow practice indexed to one forest tract, against generalised transferable models validated by controlled study, which proves place-specificity is a property and not a defect. Medicinal knowledge sits in practitioner lineages with locally sourced remedies, against standardised pharmacology with formal trials, which proves a different validation regime. Resource governance runs on collective, customary and orally enforced rules over forest produce, grazing and water, against individual title and written statutory right, which proves a different property logic. Craft and material knowledge passes by apprenticeship rather than codified industrial process, and cosmology binds clan rules and sacred groves to resource regulation, which proves that belief and management cannot be separated in these contexts. State the mode contrast explicitly as embedded against abstracted, collective against individual, oral against written, place-specific against transferable, and long-run use against formal testing. Qualify that the systems are context-bound and are not a substitute for public health, schooling or formal science, and that no remedy is attributed here to a named tribe. Conclude that displacement destroys such knowledge faster than any curriculum can record it. Why this earns marks: it examines systems rather than folklore, contrasts each domain, states the analytical mode difference, and refuses romanticisation.

Demand decoding: The directive **answer** requires a direct position on “PYQ DEMAND CARD 2 - 2021 GS-I Q9”, all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Open with the thesis that the uniqueness lies in mode rather than in exotic content. Examine domain by domain with the mainstream contrast. Ecological knowledge holds seasonal indicators, species behaviour and fire and fallow practice indexed to one forest tract, against generalised transferable models validated by controlled study, which proves place-specificity is a property and not a defect. Medicinal knowledge sits in practitioner lineages with locally sourced remedies, against standardised pharmacology with formal trials, which proves a different validation regime. Qualify that the systems are context-bound and are not a substitute for public health, schooling or formal science, and that no remedy is attributed here to a named tribe. Conclude that displacement destroys such knowledge faster than any curriculum can record it. Why this earns marks: it examines systems rather than folklore, contrasts each domain, states the analytical mode difference, and refuses romanticisation.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

How to improve this answer: For “PYQ DEMAND CARD 2 - 2021 GS-I Q9”, replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 3 - 2022 GS-I Q10

Demand: Given the diversities among tribal communities in India, in which specific contexts should they be considered as a single category? (Answer in 150 words) 10 marks.

Status: Routed in the audited 2018-2023 Mains routing ledger to the Advanced owner with Core routing recorded as superseding; wording confirmed in the locally held official General Studies Paper-I.

Model solution: Answer with an explicit split rather than a general discussion of diversity. Contexts where single-category treatment is legitimate: constitutional notification under Article 342, which is necessarily categorical; portability of entitlements when a household moves between States; protection against atrocity and discrimination, where a common legal standing is the point; and aggregate reporting of a national share such as the Census 2011 figure of about 8.6 per cent. Contexts where single-category treatment damages: livelihood design, because forest-dependent gatherers, settled cultivators and urbanised tribal workers need different instruments; vulnerability targeting, because the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands whose criteria include pre-agricultural technology and subsistence economy; governance design, because Fifth Schedule mainland belts and Sixth Schedule North-East polities operate differently; and cultural policy, because kinship, language and faith vary sharply, with distinct languages such as Halbi, Ho and Kui recorded in this owner's own record. State the consequence that a single scheme template mis-targets precisely the most vulnerable. Conclude with the working rule: aggregate for rights, disaggregate for design. Why this earns marks: it answers the in-which-contexts demand with two named lists, supplies one dated official source, and ends with a portable decision rule.

Demand decoding: The directive **answer** requires a direct position on “PYQ DEMAND CARD 3 - 2022 GS-I Q10”, all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Answer with an explicit split rather than a general discussion of diversity. Contexts where single-category treatment is legitimate: constitutional notification under Article 342, which is necessarily categorical;

portability of entitlements when a household moves between States; protection against atrocity and discrimination, where a common legal standing is the point; and aggregate reporting of a national share such as the Census 2011 figure of about 8.6 per cent. Contexts where single-category treatment damages: livelihood design, because forest-dependent gatherers, settled cultivators and urbanised tribal workers need different instruments; vulnerability targeting, because the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands whose criteria include pre-agricultural technology and subsistence economy; governance design, because Fifth Schedule mainland belts and Sixth Schedule North-East polities operate differently; and cultural policy, because kinship, language and faith vary sharply, with distinct languages such as Halbi, Ho and Kui recorded in this owner's own record. State the consequence that a single scheme template mis-targets precisely the most vulnerable. Conclude with the working rule: aggregate for rights, disaggregate for design. Why this earns marks: it answers the in-which-contexts demand with two named lists, supplies one dated official source, and ends with a portable decision rule.

Analytical body:

1. **Claim and named evidence:** Demand: Given the diversities among tribal communities in India, in which specific contexts should they be considered as a single category? (Answer in 150 words) 10 marks. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Status: Routed in the audited 2018-2023 Mains routing ledger to the Advanced owner with Core routing recorded as superseding; wording confirmed in the locally held official General Studies Paper-I. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Answer with an explicit split rather than a general discussion of diversity. Contexts where single-category treatment is legitimate: constitutional notification under Article 342, which is necessarily categorical; portability of entitlements when a household moves between States; protection against atrocity and discrimination, where a common legal standing is the point; and aggregate reporting of a national share such as the Census 2011 figure of about 8.6 per cent. Why this earns marks: it answers the in-which-contexts demand with two named lists, supplies one dated official source, and ends with a portable decision rule.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

How to improve this answer: For "PYQ DEMAND CARD 3 - 2022 GS-I Q10", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 1 - 10 MARKS

Question: Explain the tribe-caste continuum and state the limits of the thesis. Answer in about 150 words.

Model thesis: The continuum usefully describes long interaction between some communities and caste society, but it cannot dissolve distinct self-identification or the constitutional Scheduled Tribe category, so it is an analytical device with a legal boundary.

Claim -> named evidence -> analysis -> qualification:

- Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.
- The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.
- None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.
- Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Qualified conclusion: The continuum usefully describes long interaction between some communities and caste society, but it cannot dissolve distinct self-identification or the constitutional Scheduled Tribe category, so it is an analytical device with a legal boundary.

Demand decoding: The directive **explain** requires a direct position on "Explain the tribe-caste continuum and state the limits of the thesis. Answer in about 150...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The continuum usefully describes long interaction between some communities and caste society, but it cannot dissolve distinct self-identification or the constitutional Scheduled Tribe category, so it is an analytical device with a legal boundary.

Analytical body:

1. **Claim and named evidence:** Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. **Analysis:** Connect structure or institution ->

norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication.

Qualification: State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The continuum usefully describes long interaction between some communities and caste society, but it cannot dissolve distinct self-identification or the constitutional Scheduled Tribe category, so it is an analytical device with a legal boundary.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For “Explain the tribe-caste continuum and state the limits of the thesis. Answer in about 150...”, replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 2 - 10 MARKS

Question: Contrast the isolationist, assimilationist and integrationist positions in Indian tribal policy. Answer in about 150 words.

Model thesis: Elwin diagnosed exploitative contact and prescribed protection, Ghurye diagnosed cultural lag and prescribed absorption, and Nehru rejected both extremes in favour of development on tribal terms, while what actually occurred was uneven acculturation.

Claim -> named evidence -> analysis -> qualification:

- Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.
- G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.
- Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.
- None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.

Qualified conclusion: Elwin diagnosed exploitative contact and prescribed protection, Ghurye diagnosed cultural lag and prescribed absorption, and Nehru rejected both extremes in favour of development on tribal terms, while what actually occurred was uneven acculturation.

Demand decoding: The directive **answer** requires a direct position on “Contrast the isolationist, assimilationist and integrationist positions in Indian tribal...”, all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

ORIGINAL MAINS 3 - 15 MARKS

Question: Examine why the quality of rehabilitation, rather than the fact of displacement, determines tribal development outcomes. Answer in about 250 words.

Model thesis: Displacement removes a subsistence and identity base, so the welfare sign of a project is set by whether resettlement restores land, livelihood and community rather than by whether compensation was paid.

Claim -> named evidence -> analysis -> qualification:

- Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

- Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain.
- Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.
- Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.
- Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

Qualified conclusion: Displacement removes a subsistence and identity base, so the welfare sign of a project is set by whether resettlement restores land, livelihood and community rather than by whether compensation was paid.

Demand decoding: The directive **examine** requires a direct position on “Examine why the quality of rehabilitation, rather than the fact of displacement, determines...”, all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For “Examine why the quality of rehabilitation, rather than the fact of displacement, determines...”, replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 4 - 15 MARKS

Question: Assess the argument that tribal communities in India should be aggregated for rights and disaggregated for policy design. Answer in about 250 words.

Model thesis: Aggregation is defensible for entitlement, portability and atrocity protection and destructive for diagnosis, because vulnerability inside the category ranges from urbanised tribal workers to Particularly Vulnerable Tribal Groups.

Claim -> named evidence -> analysis -> qualification:

- The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy.
- Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.
- A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.
- Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Qualified conclusion: Aggregation is defensible for entitlement, portability and atrocity protection and destructive for diagnosis, because vulnerability inside the category ranges from urbanised tribal workers to Particularly Vulnerable Tribal Groups.

Demand decoding: The directive **assess** requires a direct position on “Assess the argument that tribal communities in India should be aggregated for rights and...”, all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate the uniqueness of tribal knowledge systems and the conditions under which they survive. Answer in about 300 words.

Model thesis: Tribal knowledge is distinctive in mode rather than content, so it erodes when displacement severs the ecology it was indexed to and when schooling and market integration break oral transmission, and it must not be romanticised as a substitute for public services.

Claim -> named evidence -> analysis -> qualification:

- Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.
- Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

- Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified.
- Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain.
- Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.

Qualified conclusion: Tribal knowledge is distinctive in mode rather than content, so it erodes when displacement severs the ecology it was indexed to and when schooling and market integration break oral transmission, and it must not be romanticised as a substitute for public services.

Demand decoding: The directive **evaluate** requires a direct position on “Evaluate the uniqueness of tribal knowledge systems and the conditions under which they...”, all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Tribal knowledge is distinctive in mode rather than content, so it erodes when displacement severs the ecology it was indexed to and when schooling and market integration break oral transmission, and it must not be romanticised as a substitute for public services.

Analytical body:

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Tribal knowledge is distinctive in mode rather than content, so it erodes when displacement severs the ecology it was indexed to and when schooling and market integration break oral transmission, and it must not be romanticised as a substitute for public services.

Executable exam-length answer / compression plan: For a 20-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise six to eight points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For “Evaluate the uniqueness of tribal knowledge systems and the conditions under which they...”, replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 6 - 20 MARKS

Question: Assess post-Independence tribal policy against its own stated objectives. Answer in about 300 words.

Model thesis: Panchsheel promised development along tribal genius with land and forest rights retained, so the honest verdict is that contact expanded faster than safeguards, and displacement with weak rehabilitation is the sharpest test the promise failed.

Claim -> named evidence -> analysis -> qualification:

- Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.
- None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.
- Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.
- Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.
- Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.
- Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

Qualified conclusion: Panchsheel promised development along tribal genius with land and forest rights retained, so the honest verdict is that contact expanded faster than safeguards, and displacement with weak rehabilitation is the sharpest test the promise failed.

Demand decoding: The directive **assess** requires a direct position on “Assess post-Independence tribal policy against its own stated objectives. Answer in about 300...”, all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:
