

ASCII MASTER FLOW – PANEL 1/8: 1. Proof architecture

THEISTIC ARGUMENTS START FROM DIFFERENT DATA

- +> concept of God -> ONTOLOGICAL (a priori)
- +> contingent/moved/caused world -> COSMOLOGICAL (a posteriori)
- +> order and purposiveness -> TELEOLOGICAL
- +> objective obligation -> MORAL
- +> Indian effect/order/language/karma -> NYĀYA-UDAYANA

|

CONTROL: proofs may be deductive, abductive or cumulative;

BURDEN: premise -> inference -> theological identification

never judge all by the standard of a single demonstrative syllogism.

ASCII MASTER FLOW – PANEL 2/8: 2. Ontological line

ANSELM: God = that than which nothing greater can be conceived
existing in reality > existing only in understanding
therefore the greatest conceivable being exists in reality

|

DESCARTES: necessary existence belongs to supremely perfect being

MODAL FORM: possibly necessary God -> necessarily God, if S5 possibility is granted

|

GAUNILLO: perfect-island parody | KANT: existence is not a real predicate

reply: necessary being is unlike contingent islands; pressure shifts to coherent possibility.

ASCII MASTER FLOW – PANEL 3/8: 3. Cosmological family

AQUINAS: motion -> unmoved mover | efficient causes -> first cause

contingency -> necessary being; not “every event has a cause”

KALĀM: whatever begins has a cause; universe began; therefore a cause

LEIBNIZ: principle of sufficient reason -> why something rather than nothing?

|

HUME: causal principle may not extend beyond experience; universe may be brute

RUSSELL: universe is “just there”; composition fallacy

REPLY: argument concerns contingent totality's explanation, not a member-cause in time.

ASCII MASTER FLOW – PANEL 4/8: 4. Design and fine-tuning

PALEY: complex purposive adaptation -> watchmaker analogy -> designer

FINE-TUNING: life-permitting constants appear within narrow range

|

rival explanations

+> design

+> physical necessity

+> chance / multiverse + selection effect

+> unknown deeper law

HUME: weak analogy, many designers, imperfect designer | DARWIN: adaptation by selection

verdict: modern design is probabilistic/abductive, not Paley's biological inference unchanged.

ASCII MASTER FLOW – PANEL 5/8: 5. Moral argument

CONSCIENCE/LAW: obligation -> personal lawgiver (contested)

OBJECTIVE VALUE: moral realism -> transcendent ground (abductive)

KANT: morality does not theoretically prove God

highest good (virtue proportioned to happiness) -> practical postulates:

freedom + immortality + God

|

contemporary route: objective moral obligations -> adequate personal ground

objection: Euthyphro dilemma; secular realism can ground moral facts

reply: modified divine command grounds obligation in commands flowing from good nature

limit: the move from normativity to one religiously specified God remains underdetermined.

ASCII MASTER FLOW – PANEL 6/8: 6. Nyāya-Udayana proof cluster

UDAYANA'S ROUTES TO ĪŚVARA

kāryāt: world as effect -> maker	āyojanāt: atomic combination -> arranger
dhṛtyādeḥ: support/dissolution	padāt: conventional word-use
pratyayataḥ: trustworthy cognition	śruteḥ/vākyāt: Vedic discourse
saṃkhyāviśeṣāt: determinate magnitudes	adṛṣṭāt: karmic allocation

|

ĪŚVARA = omniscient efficient cause; eternal atoms = material causes
not creation ex nihilo; proof aims at intelligent coordination of a realist cosmos.

ASCII MASTER FLOW – PANEL 7/8: 7. Indian and Western critiques

CĀRVĀKA: no perception of God; inference overreaches

BUDDHIST: momentary dependent series needs no permanent creator

JAINA: beginningless jīva/ajīva and karma; creation makes God responsible for evil

MĪMĀṢĀ: Veda is authorless; dharma/apūrva explains ritual fruit without divine author

SĀṂKHYA: unconscious nature (prakṛti) evolves without a creator

|

HUME/KANT: causal/design inference exceeds categories or experience

NYĀYA REPLY: unconscious atoms, apūrva or karma cannot intelligently allocate order

COUNTER: coordination may show explanatory gap, not uniquely the Nyāya God.

ASCII MASTER FLOW – PANEL 8/8: 8. Cumulative verdict and answer plan

DEFINE target God -> classify argument -> formalise premises -> expose hidden bridge
-> strongest named critic -> best reply -> test what conclusion actually establishes

|

ontological: necessity if possibility | cosmological: ground if PSR
design: probability, not deduction | moral: practical/normative support
Nyāya: intelligent order within atomism

|

QUALIFIED VERDICT: no proof compels every rational agent; together they can form a
cumulative case only if their contested modal, causal, probabilistic and moral premises stand.
