## MCQ 1

---

When Existentialism is treated as a philosophical family, which classification preserves the projects of Kierkegaard, Sartre and Heidegger?

A. Kierkegaard develops religious inwardness, Sartre develops atheistic freedom, and Heidegger pursues fundamental ontology. B. Kierkegaard develops atheistic freedom, Sartre pursues fundamental ontology, and Heidegger defends religious inwardness. C. All three thinkers defend a single doctrine, with differences caused merely by their different philosophical vocabularies. D. Kierkegaard and Heidegger share Sartre's humanism, while Sartre denies freedom altogether.

**Answer: A.**

### Option explanations:

- **A:** Correct proposition: "Kierkegaard develops religious inwardness, Sartre develops atheistic freedom, and Heidegger pursues fundamental ontology." Rationale: The family resemblance concerns concrete existence, but Kierkegaard's God-relation, Sartre's atheistic freedom and Heidegger's Being-question remain distinct.
- **B:** False proposition: "Kierkegaard develops atheistic freedom, Sartre pursues fundamental ontology, and Heidegger defends religious inwardness." Correct replacement: "Kierkegaard develops religious inwardness, Sartre develops atheistic freedom, and Heidegger pursues fundamental ontology." Rationale: Atheistic freedom is Sartrean, fundamental ontology Heideggerian, and religious inwardness Kierkegaardian; this option permutes all three owners. Restore each doctrine to its distinct project.
- **C:** False proposition: "All three thinkers defend a single doctrine, with differences caused merely by their different philosophical vocabularies." Correct replacement: "Kierkegaard develops religious inwardness, Sartre develops atheistic freedom, and Heidegger pursues fundamental ontology." Rationale: A family resemblance does not make these projects one doctrine. Kierkegaard's God-relation, Sartre's atheistic freedom, and Heidegger's Being-question retain different aims and methods.
- **D:** False proposition: "Kierkegaard and Heidegger share Sartre's humanism, while Sartre denies freedom altogether." Correct replacement: "Kierkegaard develops religious inwardness, Sartre develops atheistic freedom, and Heidegger pursues fundamental ontology." Rationale: Sartrean humanism neither governs Kierkegaard's theology nor Heidegger's ontology, and Sartre makes freedom inescapable rather than denying it. The three projects must remain differentiated.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C01 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C01.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 2

---

How should Nietzsche be used inside the printed Existentialism syllabus item on Kierkegaard, Sartre and Heidegger?

A. Nietzsche owns Heidegger's account of being-in-the-world because Heidegger later interpreted Nietzsche extensively. B. Nietzsche should replace Kierkegaard because both criticize systematic philosophy and inherited Christianity. C. Nietzsche supplies the canonical three stages of existence that structure Kierkegaard's account of inwardness. D. Nietzsche remains bounded enrichment, not a printed owner-thinker for this syllabus item.

**Answer: D.**

### Option explanations:

- **A:** False proposition: "Nietzsche owns Heidegger's account of being-in-the-world because Heidegger later interpreted Nietzsche extensively." Correct replacement: "Nietzsche remains bounded enrichment, not a printed owner-thinker for this syllabus item." Rationale: Heidegger's later interpretation of Nietzsche does not transfer being-in-the-world to Nietzsche. Nietzsche is a precursor and comparator, while Heidegger remains the doctrine's author.
- **B:** False proposition: "Nietzsche should replace Kierkegaard because both criticize systematic philosophy and inherited Christianity." Correct replacement: "Nietzsche remains bounded enrichment, not a printed owner-thinker for this syllabus item." Rationale: Shared criticism of systems and Christianity does not make Nietzsche replace Kierkegaard in the printed syllabus. Nietzsche enriches comparison; Kierkegaard remains an expressly named owner-thinker.
- **C:** False proposition: "Nietzsche supplies the canonical three stages of existence that structure Kierkegaard's account of inwardness." Correct replacement: "Nietzsche remains bounded enrichment, not a printed owner-thinker for this syllabus item." Rationale: The aesthetic, ethical, and religious spheres are Kierkegaard's, not Nietzsche's. Nietzsche may illuminate nihilism and value-creation, but he does not supply Kierkegaard's stages.
- **D:** Correct proposition: "Nietzsche remains bounded enrichment, not a printed owner-thinker for this syllabus item." Rationale: Nietzsche is a relevant precursor and comparator, especially for nihilism and value-creation, but the printed owner-thinkers remain Kierkegaard, Sartre and Heidegger.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C01 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C01.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 3

---

What is the defensible role of Camus's absurdity in an Existentialism answer confined to the canonical owner material?

A. Camus provides a bounded comparison, not the shared doctrine of the printed thinkers. B. Camus's absurdity establishes Sartre's transcendental ego as the permanent subject underlying intentional acts. C. Camus's absurdity is Heidegger's name for the ontological difference between Being and particular beings. D. Camus's absurdity is identical with Kierkegaard's paradox of faith, supplying the religious stage's final content.

**Answer: A.**

**Option explanations:**

- **A:** Correct proposition: "Camus provides a bounded comparison, not the shared doctrine of the printed thinkers." Rationale: Camus can enrich criticism of meaning and revolt, yet absurdity is not the common creed of Kierkegaard, Sartre and Heidegger and is not primary-owned here.
- **B:** False proposition: "Camus's absurdity establishes Sartre's transcendental ego as the permanent subject underlying intentional acts." Correct replacement: "Camus provides a bounded comparison, not the shared doctrine of the printed thinkers." Rationale: The transcendental ego belongs to Husserl's later phenomenology, not to Camus's absurdity or Sartre's non-egological consciousness. Camus contributes a bounded comparison about absurd existence and revolt.
- **C:** False proposition: "Camus's absurdity is Heidegger's name for the ontological difference between Being and particular beings." Correct replacement: "Camus provides a bounded comparison, not the shared doctrine of the printed thinkers." Rationale: The ontological difference is Heidegger's distinction between Being and beings; Camus does not rename it absurdity. Camus remains comparative material rather than an owner of Heideggerian ontology.
- **D:** False proposition: "Camus's absurdity is identical with Kierkegaard's paradox of faith, supplying the religious stage's final content." Correct replacement: "Camus provides a bounded comparison, not the shared doctrine of the printed thinkers." Rationale: Camusian absurdity is not Kierkegaard's paradoxical faith and cannot furnish the religious sphere's content. The useful link is comparison, not identity between revolt and God-relation.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C01 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C01.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 4

---

Which contrast best distinguishes the religious and atheistic variants within the existentialist family?

A. Heidegger treats atheism as the proven conclusion of fundamental ontology, whereas Sartre leaves God's existence undecided. B. Kierkegaard grounds selfhood before God, whereas Sartre begins from atheism and makes value depend on situated choice. C. Sartre grounds faith in the absurd, whereas Kierkegaard makes consciousness a nihilating emptiness without an ego. D. Kierkegaard and Sartre both derive moral values from a divine artisan, whereas Heidegger denies human finitude.

**Answer: B.**

### Option explanations:

- **A:** False proposition: "Heidegger treats atheism as the proven conclusion of fundamental ontology, whereas Sartre leaves God's existence undecided." Correct replacement: "Kierkegaard grounds selfhood before God, whereas Sartre begins from atheism and makes value depend on situated choice." Rationale: Fundamental ontology does not prove atheism, while Sartre explicitly starts from God's non-existence rather than agnosticism. The real contrast is Kierkegaardian selfhood before God versus Sartrean situated choice.
- **B:** Correct proposition: "Kierkegaard grounds selfhood before God, whereas Sartre begins from atheism and makes value depend on situated choice." Rationale: Kierkegaard's religious existence culminates in the God-relation, while Sartre's atheistic humanism denies a prior divine blueprint and stresses responsibility.
- **C:** False proposition: "Sartre grounds faith in the absurd, whereas Kierkegaard makes consciousness a nihilating emptiness without an ego." Correct replacement: "Kierkegaard grounds selfhood before God, whereas Sartre begins from atheism and makes value depend on situated choice." Rationale: Faith and the absurd belong to Kierkegaard's religious problematic, whereas nihilating non-egological consciousness is Sartrean. The option exchanges the defining predicates of the two variants.
- **D:** False proposition: "Kierkegaard and Sartre both derive moral values from a divine artisan, whereas Heidegger denies human finitude." Correct replacement: "Kierkegaard grounds selfhood before God, whereas Sartre begins from atheism and makes value depend on situated choice." Rationale: Sartre rejects a divine artisan, Kierkegaard affirms the God-relation, and Heidegger emphasizes finitude. A common derivation of values from God therefore reverses every relevant position.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C01 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C01.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 5

---

Who owns the formula 'existence precedes essence' in the canonical Existentialism package?

A. Kierkegaard coins the formula in the Postscript, while Sartre and Heidegger merely translate his Danish expression. B. All existentialists use the formula identically because they reject every conception of human nature. C. Sartre owns the formula, Kierkegaard does not use it, and Heidegger rejects its humanistic metaphysical inversion. D. Heidegger coins the formula in Being and Time, while Sartre later removes its ontological meaning.

**Answer: C.**

### Option explanations:

- **A:** False proposition: "Kierkegaard coins the formula in the Postscript, while Sartre and Heidegger merely translate his Danish expression." Correct replacement: "Sartre owns the formula, Kierkegaard does not use it, and Heidegger rejects its humanistic metaphysical inversion." Rationale: Kierkegaard never coined Sartre's French humanist formula, and Heidegger did not translate it from Danish. Sartre authors the slogan; Heidegger later criticizes its metaphysical reversal.
- **B:** False proposition: "All existentialists use the formula identically because they reject every conception of human nature." Correct replacement: "Sartre owns the formula, Kierkegaard does not use it, and Heidegger rejects its humanistic metaphysical inversion." Rationale: The slogan is not a uniform existentialist creed: Kierkegaard uses different theistic terms, and Heidegger rejects the humanist inversion. Its proper owner is Sartre.
- **C:** Correct proposition: "Sartre owns the formula, Kierkegaard does not use it, and Heidegger rejects its humanistic metaphysical inversion." Rationale: The slogan belongs to Sartre's humanist lecture; Heidegger repudiates the reversal and Kierkegaard's project is theistic and differently framed.
- **D:** False proposition: "Heidegger coins the formula in Being and Time, while Sartre later removes its ontological meaning." Correct replacement: "Sartre owns the formula, Kierkegaard does not use it, and Heidegger rejects its humanistic metaphysical inversion." Rationale: Being and Time does not coin existence-precedes-essence, and Sartre does not strip a Heideggerian phrase of ontology. Sartre formulates it; Heidegger objects that the reversal remains metaphysical.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C01 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C01.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 6

---

Why does Heidegger resist being classified through Sartre's existential humanism in the Letter on Humanism?

A. Heidegger rejects philosophical analysis of human existence because Dasein refers exclusively to non-human entities. B. Heidegger accepts Sartre's account of self-creation but argues that it should be supplemented by a divine command theory. C. Heidegger treats humanism as mistaken because it gives insufficient attention to empirical psychology and biology. D. Heidegger says Sartre's reversal remains metaphysical because it keeps human subjectivity central.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "Heidegger rejects philosophical analysis of human existence because Dasein refers exclusively to non-human entities." Correct replacement: "Heidegger says Sartre's reversal remains metaphysical because it keeps human subjectivity central." Rationale: Dasein names the being for whom Being is an issue, not an exclusively non-human class. Heidegger resists humanism because subject-centered metaphysics obscures the truth of Being.

- **B:** False proposition: "Heidegger accepts Sartre's account of self-creation but argues that it should be supplemented by a divine command theory." Correct replacement: "Heidegger says Sartre's reversal remains metaphysical because it keeps human subjectivity central." Rationale: Heidegger neither adopts Sartrean self-creation nor supplements it with divine command. His objection targets the metaphysical centrality of the human subject retained by Sartre's reversal.
- **C:** False proposition: "Heidegger treats humanism as mistaken because it gives insufficient attention to empirical psychology and biology." Correct replacement: "Heidegger says Sartre's reversal remains metaphysical because it keeps human subjectivity central." Rationale: The Letter on Humanism is not a plea for more psychology or biology. Heidegger challenges the inherited essence/existence framework and its anthropocentric orientation.
- **D:** Correct proposition: "Heidegger says Sartre's reversal remains metaphysical because it keeps human subjectivity central." Rationale: Heidegger argues that merely reversing essence and existence retains the metaphysics of subjectivity; his concern is the disclosure of Being, not human self-production.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C01 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C01.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 7

---

What does Kierkegaard's expression 'the single individual' primarily oppose?

A. It opposes personal commitment by requiring the person to identify principally with public opinion. B. It opposes religious inwardness because the individual can become spirit only through institutional membership. C. It rejects ethical obligation as such because individuality is valid only in aesthetic enjoyment. D. It opposes the absorption of concrete responsibility into the crowd or a completed speculative system.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "It opposes personal commitment by requiring the person to identify principally with public opinion." Correct replacement: "It opposes the absorption of concrete responsibility into the crowd or a completed speculative system." Rationale: The single individual resists rule by public opinion rather than requiring identification with it. Kierkegaard protects personal appropriation and responsibility against the crowd.
- **B:** False proposition: "It opposes religious inwardness because the individual can become spirit only through institutional membership." Correct replacement: "It opposes the absorption of concrete responsibility into the crowd or a completed speculative system." Rationale: Institutional membership does not create spirit by cancelling inwardness. The expression marks the concrete person who must stand responsibly before God and cannot be absorbed into collectivity.

- **C:** False proposition: "It rejects ethical obligation as such because individuality is valid only in aesthetic enjoyment." Correct replacement: "It opposes the absorption of concrete responsibility into the crowd or a completed speculative system." Rationale: Kierkegaard does not equate individuality with aesthetic enjoyment or reject ethical obligation wholesale. The target is anonymous crowd-thinking and speculative absorption of lived responsibility.
- **D:** Correct proposition: "It opposes the absorption of concrete responsibility into the crowd or a completed speculative system." Rationale: The single individual names the responsible existing person whom the crowd and Hegelian system cannot replace or absolve.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C02 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C02.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 8

---

In Johannes Climacus's account, what does 'truth is subjectivity' mean?

- A. Logical validity varies with private feeling because objective standards belong to the anonymous crowd.  
 B. A factual statement becomes true whenever a believer experiences sufficiently intense conviction about it.  
 C. Existential truth requires passionate inward appropriation, not detached propositional possession alone.  
 D. Religious truth is demonstrable without risk once speculative philosophy completes a systematic proof of God.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "Logical validity varies with private feeling because objective standards belong to the anonymous crowd." Correct replacement: "Existential truth requires passionate inward appropriation, not detached propositional possession alone." Rationale: Logical validity does not fluctuate with private feeling in Climacus. Subjectivity concerns how existential truth is appropriated through committed inwardness, not variable formal standards.
- **B:** False proposition: "A factual statement becomes true whenever a believer experiences sufficiently intense conviction about it." Correct replacement: "Existential truth requires passionate inward appropriation, not detached propositional possession alone." Rationale: Intensity of conviction cannot turn a false factual statement true. The thesis concerns lived appropriation of existential truth while leaving factual truth conditions intact.
- **C:** Correct proposition: "Existential truth requires passionate inward appropriation, not detached propositional possession alone." Rationale: Climacus distinguishes the how of existential appropriation from the what of objective content; the claim is not unrestricted relativism.
- **D:** False proposition: "Religious truth is demonstrable without risk once speculative philosophy completes a systematic proof of God." Correct replacement: "Existential truth requires passionate inward appropriation, not detached propositional possession alone." Rationale: Speculative proof

would remove the uncertainty, risk, and personal appropriation central to Climacus. Religious truth is existentially embraced rather than demonstrated as a finished result.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C02 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C02.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 9

---

Which qualification prevents Kierkegaard's 'truth is subjectivity' from collapsing into relativism?

A. The thesis governs existential appropriation without displacing objective truth in logic, science or factual inquiry. B. The thesis makes collective agreement the final test of truth because the crowd corrects individual bias. C. The thesis treats sincere belief as salvific even when it evades responsibility and the God-relation. D. The thesis denies that propositions possess content independently of the emotional intensity with which they are asserted.

**Answer: A.**

### Option explanations:

- **A:** Correct proposition: "The thesis governs existential appropriation without displacing objective truth in logic, science or factual inquiry." Rationale: Kierkegaard denies the sufficiency, not the existence, of objective truth for existential and religious life.
- **B:** False proposition: "The thesis makes collective agreement the final test of truth because the crowd corrects individual bias." Correct replacement: "The thesis governs existential appropriation without displacing objective truth in logic, science or factual inquiry." Rationale: Kierkegaard calls the crowd a source of evasion, not the final tribunal of truth. Objective inquiry keeps its standards, while existential appropriation remains individually responsible.
- **C:** False proposition: "The thesis treats sincere belief as salvific even when it evades responsibility and the God-relation." Correct replacement: "The thesis governs existential appropriation without displacing objective truth in logic, science or factual inquiry." Rationale: Sincerity alone is insufficient when belief evades responsibility or the God-relation. The anti-relativist qualification preserves objective truth and demands accountable inward appropriation.
- **D:** False proposition: "The thesis denies that propositions possess content independently of the emotional intensity with which they are asserted." Correct replacement: "The thesis governs existential appropriation without displacing objective truth in logic, science or factual inquiry." Rationale: Propositions retain content independently of emotional force. Kierkegaard limits the subjectivity thesis to the mode of existential appropriation rather than abolishing factual meaning.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C02 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C02.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 10

---

Why can Kierkegaard also write that 'subjectivity is untruth'?

A. Subjectivity is untruth because the aesthetic sphere already provides complete reconciliation without ethical commitment. B. Subjectivity is untruth because first-person experience is an illusion produced by the anonymous public. C. Subjectivity is untruth because Kierkegaard finally abandons faith and accepts Hegel's completed objective system. D. The self can remain in untruth before God, so inwardness is a task rather than a guarantee.

**Answer: D.**

### Option explanations:

- **A:** False proposition: "Subjectivity is untruth because the aesthetic sphere already provides complete reconciliation without ethical commitment." Correct replacement: "The self can remain in untruth before God, so inwardness is a task rather than a guarantee." Rationale: Aesthetic immediacy does not reconcile the self; it disperses the person in novelty and avoidance. Subjectivity remains untruth when the self is misrelated before God.
- **B:** False proposition: "Subjectivity is untruth because first-person experience is an illusion produced by the anonymous public." Correct replacement: "The self can remain in untruth before God, so inwardness is a task rather than a guarantee." Rationale: First-person experience is not an illusion manufactured by publicness. Kierkegaard's warning is that inwardness can itself remain distorted and therefore must become a task.
- **C:** False proposition: "Subjectivity is untruth because Kierkegaard finally abandons faith and accepts Hegel's completed objective system." Correct replacement: "The self can remain in untruth before God, so inwardness is a task rather than a guarantee." Rationale: Kierkegaard does not abandon faith for a completed Hegelian system. Calling subjectivity untruth identifies the existing self's sinful or misrelated condition before God.
- **D:** Correct proposition: "The self can remain in untruth before God, so inwardness is a task rather than a guarantee." Rationale: The complementary formula blocks self-congratulation: the finite self can be passionately in untruth and requires transformation in the God-relation.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C02 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C02.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 11

---

How does Kierkegaard's anti-Hegelian argument challenge a completed system of spirit?

A. A logical system may be possible, but an existential system cannot contain the living thinker who must choose, suffer and die. B. Kierkegaard proposes a rival total system in which the religious sphere dialectically absorbs the lower standpoints. C. A completed system fails because Hegel used examples from history instead of mathematical demonstrations. D. The concrete person is preserved by being fully sublated into Absolute Spirit, which removes the need for personal decision.

**Answer: A.**

### Option explanations:

- **A:** Correct proposition: "A logical system may be possible, but an existential system cannot contain the living thinker who must choose, suffer and die." Rationale: Kierkegaard's point is performative: the system-builder remains an existing individual whose unresolved decisions cannot be viewed from a finished totality.
- **B:** False proposition: "Kierkegaard proposes a rival total system in which the religious sphere dialectically absorbs the lower standpoints." Correct replacement: "A logical system may be possible, but an existential system cannot contain the living thinker who must choose, suffer and die." Rationale: Kierkegaard refuses to build a rival total system in which religion dialectically absorbs everything. Qualitative choice and lived existence resist completion as speculative moments.
- **C:** False proposition: "A completed system fails because Hegel used examples from history instead of mathematical demonstrations." Correct replacement: "A logical system may be possible, but an existential system cannot contain the living thinker who must choose, suffer and die." Rationale: The objection is not Hegel's use of historical rather than mathematical examples. A finished system cannot include the living thinker as presently choosing, suffering, and dying.
- **D:** False proposition: "The concrete person is preserved by being fully sublated into Absolute Spirit, which removes the need for personal decision." Correct replacement: "A logical system may be possible, but an existential system cannot contain the living thinker who must choose, suffer and die." Rationale: Sublation into Absolute Spirit is precisely the absorption Kierkegaard contests. The single individual retains irreducible responsibility that an impersonal completed system cannot discharge.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C02 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C02.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 12

---

Why is pseudonymity philosophically important in Kierkegaard's authorship?

A. Pseudonyms indirectly stage existence-possibilities and must not be flattened into Kierkegaard's direct doctrine. B. Pseudonyms serve merely as legal protection from censorship and are unrelated to indirect communication. C. Pseudonyms conceal one systematic doctrine, and its propositions can be attributed to Kierkegaard without qualification. D. Pseudonyms prove that existential truth is best transmitted as an impersonal result detached from the reader's appropriation.

**Answer: A.**

**Option explanations:**

- **A:** Correct proposition: "Pseudonyms indirectly stage existence-possibilities and must not be flattened into Kierkegaard's direct doctrine." Rationale: Indirect communication presents ways of existing from within and requires attribution to Climacus, de Silentio, Haufniensis or Anti-Climacus as appropriate.
- **B:** False proposition: "Pseudonyms serve merely as legal protection from censorship and are unrelated to indirect communication." Correct replacement: "Pseudonyms indirectly stage existence-possibilities and must not be flattened into Kierkegaard's direct doctrine." Rationale: Legal concealment cannot explain the philosophical work of the pseudonyms. They stage incompatible existence-possibilities so that the reader must judge and appropriate rather than receive doctrine directly.
- **C:** False proposition: "Pseudonyms conceal one systematic doctrine, and its propositions can be attributed to Kierkegaard without qualification." Correct replacement: "Pseudonyms indirectly stage existence-possibilities and must not be flattened into Kierkegaard's direct doctrine." Rationale: The pseudonyms do not hide one attributable system; their voices occupy distinct standpoints. Flattening them into Kierkegaard's direct assertions defeats indirect communication.
- **D:** False proposition: "Pseudonyms prove that existential truth is best transmitted as an impersonal result detached from the reader's appropriation." Correct replacement: "Pseudonyms indirectly stage existence-possibilities and must not be flattened into Kierkegaard's direct doctrine." Rationale: Indirect communication refuses an impersonal result detached from appropriation. The pseudonymous staging makes the reader confront how a possibility would be lived.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C02 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C02.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 13

---

How should Kierkegaard's aesthetic, ethical and religious 'stages' be understood?

A. They are social classes ordered by wealth, public office and ecclesiastical authority rather than modes of existing. B. They are biological ages through which everyone matures irreversibly from youth to religious adulthood. C. They are Hegelian moments; their contradictions are necessarily sublated into one final speculative synthesis. D. They are qualitative spheres of existence joined by decision and possible leap, not compulsory chronological phases.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "They are social classes ordered by wealth, public office and ecclesiastical authority rather than modes of existing." Correct replacement: "They are qualitative spheres of existence joined by decision and possible leap, not compulsory chronological phases." Rationale: The stages classify modes of existence, not wealth, office, or ecclesiastical rank. A person's relation to commitment, universality, and faith distinguishes the spheres.
- **B:** False proposition: "They are biological ages through which everyone matures irreversibly from youth to religious adulthood." Correct replacement: "They are qualitative spheres of existence joined by decision and possible leap, not compulsory chronological phases." Rationale: Aesthetic, ethical, and religious existence are not irreversible biological ages. Movement requires decision, can fail, and permits relapse rather than automatic maturation.
- **C:** False proposition: "They are Hegelian moments; their contradictions are necessarily sublated into one final speculative synthesis." Correct replacement: "They are qualitative spheres of existence joined by decision and possible leap, not compulsory chronological phases." Rationale: The spheres are qualitative alternatives, not necessary Hegelian moments destined for final synthesis. Kierkegaard preserves discontinuity through choice and possible leap.
- **D:** Correct proposition: "They are qualitative spheres of existence joined by decision and possible leap, not compulsory chronological phases." Rationale: The spheres are alternative orientations of existence; transition is qualitative, and relapse or coexistence remains possible.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C03 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C03.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 14

---

What most clearly characterizes Kierkegaard's aesthetic sphere?

A. It pursues immediacy and novelty without binding commitment, risking boredom and fragmentation. B. It analyses Dasein's equipmental involvement as the primary disclosure of a referential world. C. It stands singularly before God through the double movement of resignation and restored finite attachment. D. It accepts universal obligation, marriage and vocation as the transparent form through which the self becomes responsible.

**Answer: A.**

**Option explanations:**

- **A:** Correct proposition: "It pursues immediacy and novelty without binding commitment, risking boredom and fragmentation." Rationale: The aesthetic orientation seeks enjoyment and possibility without durable commitment, and its instability culminates in boredom or despair.

- **B:** False proposition: "It analyses Dasein's equipmental involvement as the primary disclosure of a referential world." Correct replacement: "It pursues immediacy and novelty without binding commitment, risking boredom and fragmentation." Rationale: Equipmental involvement and referential worlds belong to Heidegger's analysis of Dasein, not Kierkegaard's aesthetic sphere. The aesthetic life pursues immediacy and novelty without durable commitment.
- **C:** False proposition: "It stands singularly before God through the double movement of resignation and restored finite attachment." Correct replacement: "It pursues immediacy and novelty without binding commitment, risking boredom and fragmentation." Rationale: Standing before God through resignation and restored finitude describes the knight of faith, not aesthetic existence. The aesthete instead risks boredom and fragmentation.
- **D:** False proposition: "It accepts universal obligation, marriage and vocation as the transparent form through which the self becomes responsible." Correct replacement: "It pursues immediacy and novelty without binding commitment, risking boredom and fragmentation." Rationale: Marriage, vocation, and universal duty characterize the ethical sphere. The aesthetic sphere avoids binding continuity in favor of episodic enjoyment and novelty.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C03 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C03.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 15

---

Within Kierkegaard's ethical sphere, which combination of commitment and limitation is accurate?

A. It suspends ethical universality through Abraham's singular relation to God and thereby completes religious existence. B. It chooses universal commitments but encounters guilt because ethical demands remain imperfectly fulfilled. C. It identifies authenticity with anticipatory resoluteness toward one's ownmost possibility of death. D. It rejects universal obligation in favour of episodic pleasure, irony and avoidance of personal continuity.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "It suspends ethical universality through Abraham's singular relation to God and thereby completes religious existence." Correct replacement: "It chooses universal commitments but encounters guilt because ethical demands remain imperfectly fulfilled." Rationale: Abraham's singular God-relation marks the religious paradox, not the ethical sphere. Ethical existence works through universal commitments while discovering guilt and imperfect fulfillment.
- **B:** Correct proposition: "It chooses universal commitments but encounters guilt because ethical demands remain imperfectly fulfilled." Rationale: The ethical sphere is the domain of responsible commitment, marriage and vocation, but its universality exposes guilt and incompleteness.

- **C:** False proposition: "It identifies authenticity with anticipatory resoluteness toward one's ownmost possibility of death." Correct replacement: "It chooses universal commitments but encounters guilt because ethical demands remain imperfectly fulfilled." Rationale: Anticipatory resoluteness toward death is Heideggerian authenticity, not Kierkegaard's ethical commitment. The ethical sphere chooses continuity through duty, vocation, and responsibility.
- **D:** False proposition: "It rejects universal obligation in favour of episodic pleasure, irony and avoidance of personal continuity." Correct replacement: "It chooses universal commitments but encounters guilt because ethical demands remain imperfectly fulfilled." Rationale: Episodic pleasure and avoidance of continuity define the aesthetic sphere. Ethical existence instead accepts universal obligation yet encounters guilt because it cannot perfectly fulfill it.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C03 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C03.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 16

---

What is staged by Abraham in Fear and Trembling under Johannes de Silentio's authorship?

A. The aesthetic refusal of commitment that makes enjoyment and novelty the sole standards of a meaningful life. B. The ontological disclosure that a broken tool becomes present-at-hand when an equipmental network is disturbed. C. The ethical proof that universal duty in each case overrides any singular relation and excludes every paradoxical exception. D. It stages faith's paradoxical suspension of the ethical without licensing private violence.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "The aesthetic refusal of commitment that makes enjoyment and novelty the sole standards of a meaningful life." Correct replacement: "It stages faith's paradoxical suspension of the ethical without licensing private violence." Rationale: Abraham is not staged as an aesthete seeking novelty. Fear and Trembling examines a religious paradox in which faith exceeds universal ethics without becoming license for appetite.
- **B:** False proposition: "The ontological disclosure that a broken tool becomes present-at-hand when an equipmental network is disturbed." Correct replacement: "It stages faith's paradoxical suspension of the ethical without licensing private violence." Rationale: The broken-tool disclosure belongs to Heidegger's equipment analysis, not Abraham's ordeal. Johannes de Silentio stages faith's paradoxical relation to universal duty.
- **C:** False proposition: "The ethical proof that universal duty in each case overrides any singular relation and excludes every paradoxical exception." Correct replacement: "It stages faith's paradoxical suspension of the ethical without licensing private violence." Rationale: Abraham does not prove that universal duty always overrides singular relation; the narrative presents precisely the paradox of a teleological suspension. This exception cannot authorize private violence.

- **D:** Correct proposition: "It stages faith's paradoxical suspension of the ethical without licensing private violence." Rationale: Abraham stages the paradox of faith and the double movement; the text does not authorize arbitrary private revelation against morality.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C03 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C03.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 17

---

What does Kierkegaard mean by anxiety as the 'dizziness of freedom'?

A. Anxiety is the calm certainty that ethical rules mechanically determine a person's choice before action.  
 B. Anxiety confronts freedom's indeterminate possibility rather than one determinate object.  
 C. Anxiety is the loss of consciousness produced when the transcendental ego suspends the existence of the external world.  
 D. Anxiety is simply a stronger physiological fear directed at a clearly identified danger within the surrounding world.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "Anxiety is the calm certainty that ethical rules mechanically determine a person's choice before action." Correct replacement: "Anxiety confronts freedom's indeterminate possibility rather than one determinate object." Rationale: Mechanical determination would eliminate the openness that makes anxiety dizzying. Kierkegaardian anxiety arises before indeterminate possibility and the burden of freedom.
- **B:** Correct proposition: "Anxiety confronts freedom's indeterminate possibility rather than one determinate object." Rationale: For Vigilius Haufniensis, anxiety discloses possibility and the freedom to choose or fail; its object is a nothing rather than a worldly threat.
- **C:** False proposition: "Anxiety is the loss of consciousness produced when the transcendental ego suspends the existence of the external world." Correct replacement: "Anxiety confronts freedom's indeterminate possibility rather than one determinate object." Rationale: Epoché and a transcendental ego are Husserlian methodological notions, not a loss of consciousness defining anxiety. Anxiety discloses possibility rather than suspending the external world.
- **D:** False proposition: "Anxiety is simply a stronger physiological fear directed at a clearly identified danger within the surrounding world." Correct replacement: "Anxiety confronts freedom's indeterminate possibility rather than one determinate object." Rationale: Fear has an identifiable worldly object, whereas anxiety is objectless openness to possibility. Treating anxiety as intensified physiology erases its existential disclosure of freedom.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C03 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C03.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 18

---

How does Anti-Climacus define despair in *The Sickness unto Death*?

A. Despair is a misrelation in the self's relation to itself and to the power that established the self. B. Despair is Heidegger's account of the public now-series that conceals primordial ecstatic temporality. C. Despair is a temporary emotional sadness cured by moving from theoretical knowledge to empirical psychology. D. Despair is Sartre's practical rule that action should rely only on probabilities under one's control.

**Answer: A.**

### Option explanations:

- **A:** Correct proposition: "Despair is a misrelation in the self's relation to itself and to the power that established the self." Rationale: Kierkegaardian despair is a structural sickness of selfhood, including not willing to be oneself and defiantly willing to be oneself without God.
- **B:** False proposition: "Despair is Heidegger's account of the public now-series that conceals primordial ecstatic temporality." Correct replacement: "Despair is a misrelation in the self's relation to itself and to the power that established the self." Rationale: The public now-series and concealed ecstatic temporality are Heideggerian, not Anti-Climacus's despair. Despair is a misrelation within selfhood and toward its grounding power.
- **C:** False proposition: "Despair is a temporary emotional sadness cured by moving from theoretical knowledge to empirical psychology." Correct replacement: "Despair is a misrelation in the self's relation to itself and to the power that established the self." Rationale: Despair is not temporary sadness or a problem for empirical therapy alone. Anti-Climacus treats it as a spiritual failure in the self's relation to itself.
- **D:** False proposition: "Despair is Sartre's practical rule that action should rely only on probabilities under one's control." Correct replacement: "Despair is a misrelation in the self's relation to itself and to the power that established the self." Rationale: Reliance only on controllable outcomes is Sartre's popular definition of despair, not Kierkegaard's. *The Sickness unto Death* concerns self-misrelation before the establishing power.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C03 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C03.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 19

---

Which account correctly distinguishes Kierkegaard's anxiety from his despair?

A. Anxiety and despair are interchangeable translations of one Danish term, without a conceptual distinction. B. Anxiety belongs to the ethical stage, whereas despair appears after complete religious reconciliation. C. Anxiety concerns the self's fixed essence, whereas despair concerns a determinate external danger encountered in ordinary life. D. Anxiety concerns freedom's possibility, whereas despair concerns the self's failed relation to itself and its grounding power.

**Answer: D.**

### Option explanations:

- **A:** False proposition: "Anxiety and despair are interchangeable translations of one Danish term, without a conceptual distinction." Correct replacement: "Anxiety concerns freedom's possibility, whereas despair concerns the self's failed relation to itself and its grounding power." Rationale: Anxiety and despair translate different Danish concepts and perform different explanatory work. Anxiety concerns possibility; despair concerns a failed self-relation.
- **B:** False proposition: "Anxiety belongs to the ethical stage, whereas despair appears after complete religious reconciliation." Correct replacement: "Anxiety concerns freedom's possibility, whereas despair concerns the self's failed relation to itself and its grounding power." Rationale: Despair is not merely a post-reconciliation condition, and anxiety is not confined to the ethical sphere. Their difference follows structure, not stage chronology.
- **C:** False proposition: "Anxiety concerns the self's fixed essence, whereas despair concerns a determinate external danger encountered in ordinary life." Correct replacement: "Anxiety concerns freedom's possibility, whereas despair concerns the self's failed relation to itself and its grounding power." Rationale: The option exchanges both objects: fear concerns determinate danger, anxiety concerns possibility, and despair concerns self-misrelation rather than an external threat.
- **D:** Correct proposition: "Anxiety concerns freedom's possibility, whereas despair concerns the self's failed relation to itself and its grounding power." Rationale: Anxiety discloses possibility before choice, while despair diagnoses a misrelation within constituted selfhood and the God-relation.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C03 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C03.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 20

---

How should the phrase 'leap of faith' be used when discussing Kierkegaard?

A. It should be presented as Hegel's term for the necessary mediation from ethical life to Absolute Spirit. B. It is an English summary; Kierkegaard writes of the leap and of faith separately. C. It should be quoted as the exact title of a chapter written by Johannes Climacus in Being and Time. D. It should be treated as

Sartre's formula for abandoning determinism through an arbitrary act without facticity.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "It should be presented as Hegel's term for the necessary mediation from ethical life to Absolute Spirit." Correct replacement: "It is an English summary; Kierkegaard writes of the leap and of faith separately." Rationale: Hegel does not coin leap of faith as necessary mediation into Absolute Spirit. The phrase is a later English summary of Kierkegaard's separate discussions of leap and faith.
- **B:** Correct proposition: "It is an English summary; Kierkegaard writes of the leap and of faith separately." Rationale: Provenance discipline requires distinguishing Kierkegaard's Springet, the leap, from the later fused English phrase 'leap of faith'.
- **C:** False proposition: "It should be quoted as the exact title of a chapter written by Johannes Climacus in Being and Time." Correct replacement: "It is an English summary; Kierkegaard writes of the leap and of faith separately." Rationale: Being and Time is Heidegger's work, and it contains no Climacian chapter titled Leap of Faith. Use the expression as shorthand, not a verbatim Kierkegaard title.
- **D:** False proposition: "It should be treated as Sartre's formula for abandoning determinism through an arbitrary act without facticity." Correct replacement: "It is an English summary; Kierkegaard writes of the leap and of faith separately." Rationale: Sartrean choice is situated and not Kierkegaard's religious leap. The familiar phrase summarizes Kierkegaardian themes but must not be attributed as Sartre's anti-determinist formula.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C03 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C03.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 21

---

What does Sartre's paper-knife example establish in Existentialism Is a Humanism?

A. An artefact has a prior design, whereas a person without a divine maker exists before defining a project or essence. B. Human beings possess fixed functions in exactly the same manner as manufactured instruments. C. Heidegger's Dasein is best understood as an artefact located spatially inside a container-like external world. D. Consciousness becomes authentic by copying the stable self-identity of a useful material object.

**Answer: A.**

**Option explanations:**

- **A:** Correct proposition: "An artefact has a prior design, whereas a person without a divine maker exists before defining a project or essence." Rationale: The artefact's concept precedes production, while Sartre's atheist premise removes a divine blueprint for human beings and reverses the order.
- **B:** False proposition: "Human beings possess fixed functions in exactly the same manner as manufactured instruments." Correct replacement: "An artefact has a prior design, whereas a person without a divine maker exists before defining a project or essence." Rationale: The paper-knife has a designed function before manufacture, but persons lack that divine blueprint in Sartre's atheism. Human projects therefore do not mirror fixed artefact functions.
- **C:** False proposition: "Heidegger's Dasein is best understood as an artefact located spatially inside a container-like external world." Correct replacement: "An artefact has a prior design, whereas a person without a divine maker exists before defining a project or essence." Rationale: Dasein is not an artefact spatially inserted into a container-world. Sartre uses the manufactured knife to contrast prior design with human self-definition.
- **D:** False proposition: "Consciousness becomes authentic by copying the stable self-identity of a useful material object." Correct replacement: "An artefact has a prior design, whereas a person without a divine maker exists before defining a project or essence." Rationale: Authenticity cannot copy an object's self-identical inertia. Sartrean consciousness transcends given facticity rather than becoming stable being-in-itself or suppressing projective freedom.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C04 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C04.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 22

---

What role does atheism play in Sartre's argument that existence precedes essence?

- A. Atheism abolishes facticity, making bodily, historical and social conditions irrelevant to human projects.
- B. Atheism guarantees objective moral values because choice discovers a pre-existing intelligible heaven.
- C. Atheism removes a divine human blueprint and leaves persons responsible for situated projects.
- D. Atheism is the conclusion reached after Heidegger's fundamental ontology proves divinity impossible.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "Atheism abolishes facticity, making bodily, historical and social conditions irrelevant to human projects." Correct replacement: "Atheism removes a divine human blueprint and leaves persons responsible for situated projects." Rationale: Atheism removes a divine blueprint, not bodily, historical, or social facticity. Sartrean projects remain situated within conditions they interpret but cannot erase.
- **B:** False proposition: "Atheism guarantees objective moral values because choice discovers a pre-existing intelligible heaven." Correct replacement: "Atheism removes a divine human blueprint and leaves persons responsible for situated projects." Rationale: Without God, Sartre denies a pre-

existing intelligible heaven of values. Choice assumes responsibility for value instead of discovering an objective moral stock.

- **C:** Correct proposition: "Atheism removes a divine human blueprint and leaves persons responsible for situated projects." Rationale: Sartre uses atheism as a premise: without God there is no prior human blueprint, though facticity still conditions available projects.
- **D:** False proposition: "Atheism is the conclusion reached after Heidegger's fundamental ontology proves divinity impossible." Correct replacement: "Atheism removes a divine human blueprint and leaves persons responsible for situated projects." Rationale: Heidegger's fundamental ontology neither proves atheism nor supplies Sartre's premise. Sartre begins from the absence of a divine creator and human essence.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C04 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C04.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 23

---

Why does Sartre call existentialism a humanism?

A. Human beings receive their moral values through a transcendental ego that constitutes the world before practical involvement. B. Human beings possess an immutable rational essence that predetermines valid projects before existence begins. C. Human beings surpass themselves through projects and bear responsibility for the image of humanity implied by their choices. D. Human beings become authentic by withdrawing from relations with others and from their historical situation.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "Human beings receive their moral values through a transcendental ego that constitutes the world before practical involvement." Correct replacement: "Human beings surpass themselves through projects and bear responsibility for the image of humanity implied by their choices." Rationale: A constituting transcendental ego is Husserlian and does not ground Sartre's humanism. Sartre emphasizes self-surpassing projects and responsibility for the image of humanity chosen.
- **B:** False proposition: "Human beings possess an immutable rational essence that predetermines valid projects before existence begins." Correct replacement: "Human beings surpass themselves through projects and bear responsibility for the image of humanity implied by their choices." Rationale: An immutable rational essence would reverse Sartre's existence-first thesis. Humanism lies in projective self-transcendence and responsibility, not predetermined nature.
- **C:** Correct proposition: "Human beings surpass themselves through projects and bear responsibility for the image of humanity implied by their choices." Rationale: Sartrean humanism locates dignity in self-transcending project and responsibility, not in a fixed nature or isolated omnipotence.

- **D:** False proposition: "Human beings become authentic by withdrawing from relations with others and from their historical situation." Correct replacement: "Human beings surpass themselves through projects and bear responsibility for the image of humanity implied by their choices." Rationale: Withdrawal from others and history is not Sartrean humanism. Persons surpass themselves only through situated projects whose choices bear interpersonal and universal implications.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C04 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C04.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 24

---

What is Heidegger's central objection to Sartre's humanist reading of existence and essence?

A. The reversal identifies equipment as ready-to-hand and thereby makes theoretical cognition more primordial than practical coping. B. The reversal still treats the human subject as the centre and leaves the inherited metaphysical pair fundamentally unquestioned. C. The reversal accepts Kierkegaard's religious paradox, making atheistic freedom logically impossible. D. The reversal gives excessive priority to Being and neglects the autonomous creativity of an inner transcendental ego.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "The reversal identifies equipment as ready-to-hand and thereby makes theoretical cognition more primordial than practical coping." Correct replacement: "The reversal still treats the human subject as the centre and leaves the inherited metaphysical pair fundamentally unquestioned." Rationale: Ready-to-hand equipment is unrelated to Heidegger's criticism of Sartre's slogan, and practical coping is not made derivative here. The objection concerns unchallenged subject-centered metaphysics.
- **B:** Correct proposition: "The reversal still treats the human subject as the centre and leaves the inherited metaphysical pair fundamentally unquestioned." Rationale: Heidegger regards the slogan as a metaphysical inversion; his own phrase about Dasein's essence concerns a manner of Being, not voluntarist self-creation.
- **C:** False proposition: "The reversal accepts Kierkegaard's religious paradox, making atheistic freedom logically impossible." Correct replacement: "The reversal still treats the human subject as the centre and leaves the inherited metaphysical pair fundamentally unquestioned." Rationale: Heidegger's criticism does not rest on accepting Kierkegaard's religious paradox. He argues that merely reversing essence and existence leaves the inherited metaphysical opposition intact.
- **D:** False proposition: "The reversal gives excessive priority to Being and neglects the autonomous creativity of an inner transcendental ego." Correct replacement: "The reversal still treats the human subject as the centre and leaves the inherited metaphysical pair fundamentally unquestioned."

Rationale: Heidegger does not fault Sartre for giving Being excessive priority or neglecting a transcendental ego. He faults Sartre for retaining human subjectivity as the center.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C04 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C04.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 25

---

Which statement prevents Sartrean self-making from becoming arbitrary choice?

A. Projects become justified only after an objective moral code is discovered in a timeless intelligible realm. B. Projects interpret facticity through responsible commitment rather than escaping constraint. C. Projects cancel bodily, historical and social conditions whenever consciousness declares itself independent of them. D. Projects are arbitrary because choices bear nothing beyond the chooser's momentary preference.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "Projects become justified only after an objective moral code is discovered in a timeless intelligible realm." Correct replacement: "Projects interpret facticity through responsible commitment rather than escaping constraint." Rationale: Sartre rejects a timeless objective code that validates projects from outside existence. Responsible commitment interprets facticity without pretending that constraint disappears.
- **B:** Correct proposition: "Projects interpret facticity through responsible commitment rather than escaping constraint." Rationale: Sartrean freedom is situated and responsibility-laden: it interprets and surpasses given conditions but does not make those conditions unreal.
- **C:** False proposition: "Projects cancel bodily, historical and social conditions whenever consciousness declares itself independent of them." Correct replacement: "Projects interpret facticity through responsible commitment rather than escaping constraint." Rationale: Consciousness cannot cancel body, history, or social condition by declaration. Self-making remains situated because transcendence works through rather than erases facticity.
- **D:** False proposition: "Projects are arbitrary because choices bear nothing beyond the chooser's momentary preference." Correct replacement: "Projects interpret facticity through responsible commitment rather than escaping constraint." Rationale: Choice has consequences for continuing projects and for the image of humanity endorsed. Sartrean freedom therefore differs from momentary preference or consequence-free spontaneity.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C04 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C04.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 26

---

How does Sartre characterize being-in-itself, or en-soi?

A. It is pre-reflective consciousness that projects possibilities and does not coincide with its factual past. B. It is Kierkegaard's account of a self transparently grounded in the power that established it. C. It is full, opaque and self-identical being that is what it is, without the nihilating distance of consciousness. D. It is Heidegger's term for Dasein's practical involvement in a network of ready-to-hand equipment.

**Answer: C.**

### Option explanations:

- **A:** False proposition: "It is pre-reflective consciousness that projects possibilities and does not coincide with its factual past." Correct replacement: "It is full, opaque and self-identical being that is what it is, without the nihilating distance of consciousness." Rationale: Projective pre-reflective consciousness describes the for-itself, not the in-itself. En-soi is full, opaque, and without nihilating distance from itself.
- **B:** False proposition: "It is Kierkegaard's account of a self transparently grounded in the power that established it." Correct replacement: "It is full, opaque and self-identical being that is what it is, without the nihilating distance of consciousness." Rationale: Transparent grounding in an establishing power is Kierkegaardian selfhood, not Sartre's en-soi. Being-in-itself names non-conscious self-identity rather than a God-relation.
- **C:** Correct proposition: "It is full, opaque and self-identical being that is what it is, without the nihilating distance of consciousness." Rationale: The en-soi is massive positivity and self-coincidence, contrasted with the self-surpassing and nihilating pour-soi.
- **D:** False proposition: "It is Heidegger's term for Dasein's practical involvement in a network of ready-to-hand equipment." Correct replacement: "It is full, opaque and self-identical being that is what it is, without the nihilating distance of consciousness." Rationale: Practical equipmental involvement belongs to Heidegger's Dasein. Sartrean in-itself is self-identical being, not a mode of worldly coping.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C05 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C05.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 27

---

Which description identifies Sartre's being-for-itself, or pour-soi, without turning it into a substance?

A. It is the religious individual with an ethical duty suspended by an absolute relation to God. B. It is a completed substance with a fixed essence that determines future projects and moral responsibilities. C. It is conscious non-self-coincidence that nihilates the given and projects possibilities beyond its facticity. D. It is anonymous public interpretation and conformity through which Heidegger's Dasein loses itself in everydayness.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "It is the religious individual with an ethical duty suspended by an absolute relation to God." Correct replacement: "It is conscious non-self-coincidence that nihilates the given and projects possibilities beyond its facticity." Rationale: The knight of faith belongs to Kierkegaard and is not Sartre's pour-soi. Being-for-itself is consciousness that exceeds its facticity through projected possibilities.
- **B:** False proposition: "It is a completed substance with a fixed essence that determines future projects and moral responsibilities." Correct replacement: "It is conscious non-self-coincidence that nihilates the given and projects possibilities beyond its facticity." Rationale: A fixed essence and completed substance describe precisely what the for-itself is not. Consciousness lacks self-coincidence and continually surpasses its given past.
- **C:** Correct proposition: "It is conscious non-self-coincidence that nihilates the given and projects possibilities beyond its facticity." Rationale: The pour-soi is consciousness as lack, negation and transcendence; it cannot possess the plenitude or fixed identity of the en-soi.
- **D:** False proposition: "It is anonymous public interpretation and conformity through which Heidegger's Dasein loses itself in everydayness." Correct replacement: "It is conscious non-self-coincidence that nihilates the given and projects possibilities beyond its facticity." Rationale: Anonymous public interpretation is Heidegger's das Man, not Sartre's pour-soi. The for-itself is nihilating consciousness rather than a public social norm.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C05 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C05.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 28

---

What does Sartre mean by saying consciousness 'is what it is not and is not what it is'?

A. Consciousness is a stable substance; its future follows analytically from a complete and immutable human essence. B. Consciousness alternates between Husserl's epoché and Heidegger's ready-to-hand equipment without preserving intentionality. C. Consciousness is a logical contradiction that neither exists nor possesses any directed relation to objects in the world. D. Consciousness projects toward unrealized possibilities and cannot coincide completely with its past or present facticity.

**Answer: D.**

### Option explanations:

- **A:** False proposition: "Consciousness is a stable substance; its future follows analytically from a complete and immutable human essence." Correct replacement: "Consciousness projects toward unrealized possibilities and cannot coincide completely with its past or present facticity." Rationale: A stable substance with analytically fixed future is being-in-itself, not consciousness. Sartrean consciousness exceeds present facticity toward unrealized possibilities.
- **B:** False proposition: "Consciousness alternates between Husserl's epoché and Heidegger's ready-to-hand equipment without preserving intentionality." Correct replacement: "Consciousness projects toward unrealized possibilities and cannot coincide completely with its past or present facticity." Rationale: Epoché and ready-to-hand equipment belong to different phenomenological projects and do not alternate inside Sartrean consciousness. Intentional projection and non-self-coincidence explain the formula.
- **C:** False proposition: "Consciousness is a logical contradiction that neither exists nor possesses any directed relation to objects in the world." Correct replacement: "Consciousness projects toward unrealized possibilities and cannot coincide completely with its past or present facticity." Rationale: The formula is not a formal contradiction denying consciousness or intentionality. It expresses temporal self-surpassing: consciousness exceeds what it presently is and is shaped by unrealized possibilities.
- **D:** Correct proposition: "Consciousness projects toward unrealized possibilities and cannot coincide completely with its past or present facticity." Rationale: The formula expresses the pour-soi's temporal non-self-identity: it is defined by possibilities not yet actual and surpasses what it factically is.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C05 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C05.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 29

---

What does Sartre's Pierre-in-the-café example show about nothingness?

A. Pierre's absence proves that the café and its surrounding physical world cease to exist whenever consciousness expects something else. B. Pierre's absence establishes that a determinate fear and objectless anxiety possess exactly the same intentional structure. C. Pierre's experienced absence organizes the perceptual field, showing that negation is disclosed rather than merely added by later language. D. Pierre's absence demonstrates that Husserl's transcendental ego is the substantial cause of all objects appearing in consciousness.

**Answer: C.**

### Option explanations:

- **A:** False proposition: "Pierre's absence proves that the café and its surrounding physical world cease to exist whenever consciousness expects something else." Correct replacement: "Pierre's experienced absence organizes the perceptual field, showing that negation is disclosed rather than merely added by later language." Rationale: Pierre's absence structures one perceptual field; it does not annihilate the café's physical existence. Consciousness discloses a determinate lack against an expected background.
- **B:** False proposition: "Pierre's absence establishes that a determinate fear and objectless anxiety possess exactly the same intentional structure." Correct replacement: "Pierre's experienced absence organizes the perceptual field, showing that negation is disclosed rather than merely added by later language." Rationale: The example concerns experienced negation, not an identity between fear and anxiety. Pierre's missing presence organizes perception before a later linguistic judgment.
- **C:** Correct proposition: "Pierre's experienced absence organizes the perceptual field, showing that negation is disclosed rather than merely added by later language." Rationale: The missing Pierre becomes figure against the café's ground, so absence structures experience and supports Sartre's phenomenology of nihilation.
- **D:** False proposition: "Pierre's absence demonstrates that Husserl's transcendental ego is the substantial cause of all objects appearing in consciousness." Correct replacement: "Pierre's experienced absence organizes the perceptual field, showing that negation is disclosed rather than merely added by later language." Rationale: No substantial transcendental ego causes the café's objects in Sartre's example. Intentional consciousness encounters Pierre's absence as a figure within the field.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C05 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C05.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 30

---

What does Sartre mean by describing consciousness as 'nothing'?

A. Consciousness lacks thing-like content and fixed essence while remaining intentional and self-aware. B. Consciousness is an empty physical container that receives internal images copied from independently existing external objects. C. Consciousness is the transcendental ego understood as a permanent substance that remains identical beneath changing acts. D. Consciousness is literally nonexistent, so references to freedom, perception and responsibility are convenient fictional descriptions.

**Answer: A.**

**Option explanations:**

- **A:** Correct proposition: "Consciousness lacks thing-like content and fixed essence while remaining intentional and self-aware." Rationale: Sartrean nothingness means lack of en-soi plenitude and fixed content, not nonexistence; consciousness exists as directed, nihilating activity.

- **B:** False proposition: "Consciousness is an empty physical container that receives internal images copied from independently existing external objects." Correct replacement: "Consciousness lacks thing-like content and fixed essence while remaining intentional and self-aware." Rationale: Sartrean consciousness is not a physical receptacle containing copied images. Its nothingness means absence of thing-like plenitude while intentionality remains directed outward.
- **C:** False proposition: "Consciousness is the transcendental ego understood as a permanent substance that remains identical beneath changing acts." Correct replacement: "Consciousness lacks thing-like content and fixed essence while remaining intentional and self-aware." Rationale: A permanent substantial ego is the position Sartre rejects. Consciousness is non-egological and unified through intentional acts rather than an inner owner.
- **D:** False proposition: "Consciousness is literally nonexistent, so references to freedom, perception and responsibility are convenient fictional descriptions." Correct replacement: "Consciousness lacks thing-like content and fixed essence while remaining intentional and self-aware." Rationale: Calling consciousness nothing does not declare it fictional or nonexistent. It denies fixed self-identical content while preserving perception, freedom, and pre-reflective awareness.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C05 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C05.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 31

---

What is Sartre's claim in *The Transcendence of the Ego*?

A. The ego is an immanent substance discovered before intentional acts and responsible for producing their objects. B. The ego is the divine artisan; its concept of humanity explains why essence necessarily precedes existence. C. The ego is a reflected transcendent object, not an inhabitant needed to unify consciousness. D. The ego is identical with Heidegger's *Dasein* because both terms designate a Cartesian subject prior to any world.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "The ego is an immanent substance discovered before intentional acts and responsible for producing their objects." Correct replacement: "The ego is a reflected transcendent object, not an inhabitant needed to unify consciousness." Rationale: Sartre does not discover an immanent ego prior to acts or make it produce intentional objects. The ego appears reflectively as a transcendent object.
- **B:** False proposition: "The ego is the divine artisan; its concept of humanity explains why essence necessarily precedes existence." Correct replacement: "The ego is a reflected transcendent object, not an inhabitant needed to unify consciousness." Rationale: A divine artisan belongs to Sartre's rejected creation model, not his theory of ego. The ego is constituted in reflection rather than designing humanity.

- **C:** Correct proposition: "The ego is a reflected transcendent object, not an inhabitant needed to unify consciousness." Rationale: Sartre removes the ego from the transcendental field: intentional consciousness is non-egological, and the ego appears reflectively in the world.
- **D:** False proposition: "The ego is identical with Heidegger's Dasein because both terms designate a Cartesian subject prior to any world." Correct replacement: "The ego is a reflected transcendent object, not an inhabitant needed to unify consciousness." Rationale: Dasein is not a Cartesian subject, and Sartre's ego is not identical with it. The Transcendence of the Ego removes the ego from immanent consciousness.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C05 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C05.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 32

---

What phenomenological commitment do Husserl and Sartre share despite their disagreement about the ego?

A. Both reject pre-reflective awareness and treat reflection as the sole source of any consciousness whatsoever. B. Both hold that the transcendental ego is an empirical personality produced principally by social roles and public language. C. Both identify consciousness with a self-identical substance, with contents causally sealed from the external world. D. Both accept intentionality and reject the model of consciousness as a container filled with internal representations.

**Answer: D.**

### Option explanations:

- **A:** False proposition: "Both reject pre-reflective awareness and treat reflection as the sole source of any consciousness whatsoever." Correct replacement: "Both accept intentionality and reject the model of consciousness as a container filled with internal representations." Rationale: Both philosophers recognize pre-reflective awareness; reflection is not the sole source of consciousness. Their shared commitment is intentional directedness beyond an inner container.
- **B:** False proposition: "Both hold that the transcendental ego is an empirical personality produced principally by social roles and public language." Correct replacement: "Both accept intentionality and reject the model of consciousness as a container filled with internal representations." Rationale: Neither treats the transcendental ego as an empirical personality generated by social roles. Their disagreement concerns whether a pure ego is needed within transcendental phenomenology.
- **C:** False proposition: "Both identify consciousness with a self-identical substance, with contents causally sealed from the external world." Correct replacement: "Both accept intentionality and reject the model of consciousness as a container filled with internal representations." Rationale: Intentionality rejects causally sealed substantial consciousness. Husserl and Sartre both direct consciousness toward objects, even though they disagree about the ego's status.

- **D:** Correct proposition: "Both accept intentionality and reject the model of consciousness as a container filled with internal representations." Rationale: Sartre radicalizes Husserlian intentionality, but both direct consciousness toward objects rather than treating ideas as inner intermediaries.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C05 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C05.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 33

---

How does Sartre's notion of consciousness differ most sharply from Husserl's later transcendental account?

A. Sartre identifies the ego with bodily facticity, whereas Husserl identifies it with Heidegger's network of ready-to-hand equipment. B. Sartre makes consciousness non-egological; Husserl retains a constituting pure ego with habitualities. C. Sartre makes freedom irrelevant to consciousness, whereas Husserl derives radical choice from the absence of a stable self. D. Sartre rejects intentionality, whereas Husserl treats consciousness as directed beyond itself toward transcendent objects.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "Sartre identifies the ego with bodily facticity, whereas Husserl identifies it with Heidegger's network of ready-to-hand equipment." Correct replacement: "Sartre makes consciousness non-egological; Husserl retains a constituting pure ego with habitualities." Rationale: Bodily facticity and ready-to-hand equipment do not define the Husserl-Sartre ego dispute. Sartre removes the immanent ego; later Husserl retains a constituting pure ego.
- **B:** Correct proposition: "Sartre makes consciousness non-egological; Husserl retains a constituting pure ego with habitualities." Rationale: The 2026 comparison turns on Sartre's removal of the transcendental ego and ontologization of nothingness, while preserving intentionality.
- **C:** False proposition: "Sartre makes freedom irrelevant to consciousness, whereas Husserl derives radical choice from the absence of a stable self." Correct replacement: "Sartre makes consciousness non-egological; Husserl retains a constituting pure ego with habitualities." Rationale: Freedom is central to Sartre's non-self-identical consciousness, while Husserl does not derive radical choice from egolessness. The option reverses both theories.
- **D:** False proposition: "Sartre rejects intentionality, whereas Husserl treats consciousness as directed beyond itself toward transcendent objects." Correct replacement: "Sartre makes consciousness non-egological; Husserl retains a constituting pure ego with habitualities." Rationale: Sartre preserves intentionality rather than rejecting it. His break with later Husserl concerns the constituting ego, not directedness toward transcendent objects.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C05 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C05.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 34

---

What does Sartre mean by saying that human beings are 'condemned to be free'?

A. They possess unlimited physical power to realize any project regardless of bodily, social or historical conditions. B. They did not choose to exist, yet once existing they cannot escape taking responsibility for how they take up situations. C. They are punished by God with freedom after violating an objective moral law established before human existence. D. They may surrender freedom completely by refusing reflection and allowing inherited roles to determine future action.

**Answer: B.**

### Option explanations:

- **A:** False proposition: "They possess unlimited physical power to realize any project regardless of bodily, social or historical conditions." Correct replacement: "They did not choose to exist, yet once existing they cannot escape taking responsibility for how they take up situations." Rationale: Condemnation to freedom does not grant unlimited physical efficacy. It means responsibility remains inescapable within bodily, historical, and social limits.
- **B:** Correct proposition: "They did not choose to exist, yet once existing they cannot escape taking responsibility for how they take up situations." Rationale: Condemnation names unchosen existence, while freedom names the inescapability of taking a stance within facticity rather than omnipotence.
- **C:** False proposition: "They are punished by God with freedom after violating an objective moral law established before human existence." Correct replacement: "They did not choose to exist, yet once existing they cannot escape taking responsibility for how they take up situations." Rationale: Sartre's atheism excludes divine punishment and a pre-existing moral law. We are condemned because existence is unchosen yet choosing within situations cannot be escaped.
- **D:** False proposition: "They may surrender freedom completely by refusing reflection and allowing inherited roles to determine future action." Correct replacement: "They did not choose to exist, yet once existing they cannot escape taking responsibility for how they take up situations." Rationale: Refusal and role-conformity are themselves ways of taking up a situation, not surrender of freedom. Responsibility persists even through evasive choices.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C06 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C06.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 35

---

Why does Sartre deny that a motive determines action before freedom?

A. A circumstance becomes a motive through meaning conferred within a freely adopted project. B. A motive lacks causal power because all somatic and psychological events are illusions generated by an immaterial soul. C. A motive determines action when it has been verified by the transcendental ego through phenomenological reduction. D. A motive determines action mechanically whenever it arises from scarcity, seriality or the practico-inert.

**Answer: A.**

### Option explanations:

- **A:** Correct proposition: "A circumstance becomes a motive through meaning conferred within a freely adopted project." Rationale: Sartre's meaning-conferral argument treats motives as reasons constituted within projects rather than forces that bypass the *pour-soi*.
- **B:** False proposition: "A motive lacks causal power because all somatic and psychological events are illusions generated by an immaterial soul." Correct replacement: "A circumstance becomes a motive through meaning conferred within a freely adopted project." Rationale: Sartre does not explain motivation by an immaterial soul that makes bodily events illusory. Circumstances become motives through the meaning supplied by a project.
- **C:** False proposition: "A motive determines action when it has been verified by the transcendental ego through phenomenological reduction." Correct replacement: "A circumstance becomes a motive through meaning conferred within a freely adopted project." Rationale: A transcendental ego and phenomenological reduction do not mechanically validate motives. For Sartre, freely adopted ends make a circumstance count as a reason for action.
- **D:** False proposition: "A motive determines action mechanically whenever it arises from scarcity, seriality or the practico-inert." Correct replacement: "A circumstance becomes a motive through meaning conferred within a freely adopted project." Rationale: Scarcity and the practico-inert condition action but do not predetermine a motive before projective interpretation. Later social analysis qualifies rather than abolishes freedom.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C06 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C06.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 36

---

How are facticity and transcendence related in Sartre's account of situated freedom?

A. Facticity supplies the given conditions, while transcendence is the projective surpassing that interprets those conditions without erasing them. B. Facticity and transcendence are two names for the self-identical plenitude of being-in-itself. C. Facticity is an illusion created by bad faith, while transcendence gives

consciousness unrestricted control over external events. D. Facticity names Heidegger's future ecstasis, while transcendence names Kierkegaard's ethical stage of universal duty.

**Answer: A.**

**Option explanations:**

- **A:** Correct proposition: "Facticity supplies the given conditions, while transcendence is the projective surpassing that interprets those conditions without erasing them." Rationale: Human reality is the tension of given body, past and situation with the freedom to project meanings and possibilities beyond them.
- **B:** False proposition: "Facticity and transcendence are two names for the self-identical plenitude of being-in-itself." Correct replacement: "Facticity supplies the given conditions, while transcendence is the projective surpassing that interprets those conditions without erasing them." Rationale: Facticity and transcendence are opposed moments of the for-itself, not two labels for en-soi's plenitude. Situated freedom interprets given conditions by projecting beyond them.
- **C:** False proposition: "Facticity is an illusion created by bad faith, while transcendence gives consciousness unrestricted control over external events." Correct replacement: "Facticity supplies the given conditions, while transcendence is the projective surpassing that interprets those conditions without erasing them." Rationale: Bad faith denies or distorts facticity; it does not create facticity as an illusion. Transcendence projects possibilities but cannot command external outcomes without limit.
- **D:** False proposition: "Facticity names Heidegger's future ecstasis, while transcendence names Kierkegaard's ethical stage of universal duty." Correct replacement: "Facticity supplies the given conditions, while transcendence is the projective surpassing that interprets those conditions without erasing them." Rationale: Future ecstasis is Heideggerian and ethical universality Kierkegaardian; neither names Sartre's twofold structure. Facticity is the given, transcendence its projective surpassing.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C06 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C06.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 37

---

Why does Sartre regard refusing to choose as a choice?

A. Refusal suspends consciousness completely, creating a period during which responsibility and projects disappear. B. Deferral or conformity still takes up a stance and lets a situation or another person decide within one's project. C. Refusal follows a moral law that separates passive non-choice from responsible action. D. Refusal converts the pour-soi into an en-soi, fixing future conduct through an acquired social essence.

**Answer: B.**

### Option explanations:

- **A:** False proposition: "Refusal suspends consciousness completely, creating a period during which responsibility and projects disappear." Correct replacement: "Deferral or conformity still takes up a stance and lets a situation or another person decide within one's project." Rationale: Consciousness does not pause during refusal; deferral already sustains a stance toward the situation. Responsibility and project therefore continue through apparent non-choice.
- **B:** Correct proposition: "Deferral or conformity still takes up a stance and lets a situation or another person decide within one's project." Rationale: Because the *pour-soi* cannot cease projecting, passivity and conformity are ways of choosing how the given will govern one's conduct.
- **C:** False proposition: "Refusal follows a moral law that separates passive non-choice from responsible action." Correct replacement: "Deferral or conformity still takes up a stance and lets a situation or another person decide within one's project." Rationale: Sartre does not recognize a moral law that exempts passive refusal from choice. Letting convention or another person decide still expresses one's project.
- **D:** False proposition: "Refusal converts the *pour-soi* into an *en-soi*, fixing future conduct through an acquired social essence." Correct replacement: "Deferral or conformity still takes up a stance and lets a situation or another person decide within one's project." Rationale: Refusal cannot convert consciousness into fixed *en-soi* or acquire a determining essence. The *for-itself* remains responsible for adopting conformity or delay.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C06 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C06.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 38

---

What does Sartre mean by saying 'in choosing myself I choose man'?

A. A choice presents an image of humanity as worth choosing, giving personal commitment a universal dimension and producing anguish. B. A choice remains confined to private preference because values are wholly incommunicable between separate consciousnesses. C. A choice discovers a biologically fixed essence common to persons and removes responsibility for its consequences. D. A choice becomes valid only after the crowd confirms that the same action is statistically preferred by most people.

**Answer: A.**

### Option explanations:

- **A:** Correct proposition: "A choice presents an image of humanity as worth choosing, giving personal commitment a universal dimension and producing anguish." Rationale: Sartre gives choice a quasi-universal reach: one cannot choose a project without affirming an image of what a human being may be.

- **B:** False proposition: "A choice remains confined to private preference because values are wholly incommunicable between separate consciousnesses." Correct replacement: "A choice presents an image of humanity as worth choosing, giving personal commitment a universal dimension and producing anguish." Rationale: Sartrean choice is not sealed inside private preference. By endorsing a project, the chooser presents an image of conduct as worth choosing for humanity.
- **C:** False proposition: "A choice discovers a biologically fixed essence common to persons and removes responsibility for its consequences." Correct replacement: "A choice presents an image of humanity as worth choosing, giving personal commitment a universal dimension and producing anguish." Rationale: Choice does not uncover a biologically fixed common essence. It creates commitments and intensifies responsibility precisely because no predetermined human nature excuses them.
- **D:** False proposition: "A choice becomes valid only after the crowd confirms that the same action is statistically preferred by most people." Correct replacement: "A choice presents an image of humanity as worth choosing, giving personal commitment a universal dimension and producing anguish." Rationale: Statistical approval by the crowd cannot validate a Sartrean choice. Its universal dimension comes from the value-image enacted, not majority confirmation.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C06 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C06.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 39

---

How do anguish, abandonment and despair function in Sartre's popular exposition?

A. Anguish abolishes freedom, abandonment restores a divine blueprint, and despair guarantees that projects will succeed. B. Anguish discloses responsibility, abandonment the absence of given values, and despair the limit of relying on outcomes beyond action. C. Anguish discloses a determinate danger, abandonment proves that God exists, and despair describes Kierkegaard's misrelation of the self. D. Anguish is Heidegger's ready-to-hand equipment, abandonment is das Man, and despair is ordinary clock-time.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "Anguish abolishes freedom, abandonment restores a divine blueprint, and despair guarantees that projects will succeed." Correct replacement: "Anguish discloses responsibility, abandonment the absence of given values, and despair the limit of relying on outcomes beyond action." Rationale: Anguish reveals rather than abolishes freedom; abandonment removes rather than restores divine guarantees; despair limits reliance rather than promising success. Each relation is reversed.

- **B:** Correct proposition: "Anguish discloses responsibility, abandonment the absence of given values, and despair the limit of relying on outcomes beyond action." Rationale: The three moods follow from atheistic freedom and must not be conflated with Kierkegaard's theological despair or Heidegger's Angst.
- **C:** False proposition: "Anguish discloses a determinate danger, abandonment proves that God exists, and despair describes Kierkegaard's misrelation of the self." Correct replacement: "Anguish discloses responsibility, abandonment the absence of given values, and despair the limit of relying on outcomes beyond action." Rationale: Determinate danger is fear, God's existence is not proved by abandonment, and Kierkegaardian despair is a different doctrine. Sartre's triad concerns responsibility, value-groundlessness, and controllable action.
- **D:** False proposition: "Anguish is Heidegger's ready-to-hand equipment, abandonment is das Man, and despair is ordinary clock-time." Correct replacement: "Anguish discloses responsibility, abandonment the absence of given values, and despair the limit of relying on outcomes beyond action." Rationale: Ready-to-hand equipment, das Man, and clock-time are Heideggerian structures, not Sartre's moods. The triad interprets freedom and action after divine guarantees disappear.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C06 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C06.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 40

---

What is the significance of Sartre's Critique of Dialectical Reason for his earlier freedom thesis?

A. It incorporates scarcity, seriality and the practico-inert while retaining conditioned freedom. B. It retracts freedom principally and replaces existentialism with a deterministic account in which projects cease to play any role. C. It converts Sartre to Kierkegaard's religious stage and grounds responsibility in obedience to a divine command. D. It repeats Being and Nothingness without addressing social mediation, historical institutions or material constraint.

**Answer: A.**

**Option explanations:**

- **A:** Correct proposition: "It incorporates scarcity, seriality and the practico-inert while retaining conditioned freedom." Rationale: The later work qualifies early abstraction by embedding praxis in social and material structures while retaining agency.
- **B:** False proposition: "It retracts freedom principally and replaces existentialism with a deterministic account in which projects cease to play any role." Correct replacement: "It incorporates scarcity, seriality and the practico-inert while retaining conditioned freedom." Rationale: The Critique does not replace projects with determinism. It embeds freedom in scarcity, seriality, institutions, and the practico-inert as conditioned agency.

- **C:** False proposition: "It converts Sartre to Kierkegaard's religious stage and grounds responsibility in obedience to a divine command." Correct replacement: "It incorporates scarcity, seriality and the practico-inert while retaining conditioned freedom." Rationale: Sartre does not convert to Kierkegaardian divine command. His later work remains secular while expanding the social and historical conditions of freedom.
- **D:** False proposition: "It repeats Being and Nothingness without addressing social mediation, historical institutions or material constraint." Correct replacement: "It incorporates scarcity, seriality and the practico-inert while retaining conditioned freedom." Rationale: The Critique specifically addresses material constraint and social mediation absent from the early ontology. It revises the setting of freedom rather than merely repeating Being and Nothingness.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C06 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C06.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 41

---

What is bad faith in Sartre's Being and Nothingness?

A. It is Heidegger's structural falling into public time, unrelated to responsibility or self-deception. B. It is repression by a fully unconscious censor operating independently of pre-reflective awareness. C. It is self-deception that denies the tension of facticity and transcendence in order to flee the burden of freedom. D. It is an ordinary lie told to another person by a consciousness that transparently accepts its own freedom.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "It is Heidegger's structural falling into public time, unrelated to responsibility or self-deception." Correct replacement: "It is self-deception that denies the tension of facticity and transcendence in order to flee the burden of freedom." Rationale: Heideggerian falling is not Sartre's bad faith and lacks its structure of self-deceptive responsibility. Bad faith evades the coexistence of facticity and transcendence.
- **B:** False proposition: "It is repression by a fully unconscious censor operating independently of pre-reflective awareness." Correct replacement: "It is self-deception that denies the tension of facticity and transcendence in order to flee the burden of freedom." Rationale: A fully separate unconscious censor would reproduce the liar paradox Sartre rejects. Pre-reflective consciousness tacitly knows what it evasively refuses to own.
- **C:** Correct proposition: "It is self-deception that denies the tension of facticity and transcendence in order to flee the burden of freedom." Rationale: Bad faith is a project of becoming only facticity or only transcendence, made possible by the pour-soi's non-self-coincidence.
- **D:** False proposition: "It is an ordinary lie told to another person by a consciousness that transparently accepts its own freedom." Correct replacement: "It is self-deception that denies the tension of facticity and transcendence in order to flee the burden of freedom." Rationale: An

ordinary lie targets another person while the liar knows the truth straightforwardly. Bad faith is self-evasion made possible by consciousness's non-self-coincidence.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C07 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C07.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 42

---

Why is Sartre's over-scripted waiter an example of bad faith?

A. He denies bodily and social facts by pretending that roles and situations are irrelevant to his project. B. He suspends universal ethical duty for an absolute relation to God and enters Kierkegaard's religious sphere through a singular exception. C. He performs the social role as though it exhausted his being, reducing transcendence to a fixed occupational facticity. D. He experiences the Other's look at a keyhole and discovers that human relations are necessarily cooperative.

**Answer: C.**

### Option explanations:

- **A:** False proposition: "He denies bodily and social facts by pretending that roles and situations are irrelevant to his project." Correct replacement: "He performs the social role as though it exhausted his being, reducing transcendence to a fixed occupational facticity." Rationale: The waiter does not deny that roles and situations matter; he treats the role as exhausting his being. His error is reducing transcendence to occupational facticity.
- **B:** False proposition: "He suspends universal ethical duty for an absolute relation to God and enters Kierkegaard's religious sphere through a singular exception." Correct replacement: "He performs the social role as though it exhausted his being, reducing transcendence to a fixed occupational facticity." Rationale: Abraham's suspension of ethics belongs to Kierkegaard's religious sphere, not café conduct. The waiter enacts a social identity as though he were a fixed thing.
- **C:** Correct proposition: "He performs the social role as though it exhausted his being, reducing transcendence to a fixed occupational facticity." Rationale: The waiter plays at being a waiter in the mode of a thing, forgetting that the role is real facticity without becoming a complete essence.
- **D:** False proposition: "He experiences the Other's look at a keyhole and discovers that human relations are necessarily cooperative." Correct replacement: "He performs the social role as though it exhausted his being, reducing transcendence to a fixed occupational facticity." Rationale: The keyhole and the Look form another Sartrean example, and they do not establish necessary cooperation. The waiter illustrates over-identification with a role.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C07 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C07.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 43

---

What structure of bad faith appears in Sartre's example of the woman on a date?

A. She becomes present-at-hand because a tool breaks, revealing the referential whole of Heidegger's surrounding world. B. She treats her hand as a passive thing while postponing the gesture's meaning, simultaneously manipulating facticity and transcendence. C. She identifies completely with her chosen project, accepting both bodily facticity and responsible transcendence without evasion. D. She confronts the paradox of faith through infinite resignation and the restoration of a finite good.

**Answer:** B.

### Option explanations:

- **A:** False proposition: "She becomes present-at-hand because a tool breaks, revealing the referential whole of Heidegger's surrounding world." Correct replacement: "She treats her hand as a passive thing while postponing the gesture's meaning, simultaneously manipulating facticity and transcendence." Rationale: A broken tool and present-at-hand disclosure belong to Heidegger's equipment analysis. The date example concerns evading a gesture by separating passive body from acknowledged meaning.
- **B:** Correct proposition: "She treats her hand as a passive thing while postponing the gesture's meaning, simultaneously manipulating facticity and transcendence." Rationale: The example stages a double evasion: bodily facticity is detached from meaning while freedom to accept or reject the situation is deferred.
- **C:** False proposition: "She identifies completely with her chosen project, accepting both bodily facticity and responsible transcendence without evasion." Correct replacement: "She treats her hand as a passive thing while postponing the gesture's meaning, simultaneously manipulating facticity and transcendence." Rationale: Complete ownership of facticity and transcendence would oppose bad faith. The woman instead shifts between treating her hand as thing and postponing responsible interpretation.
- **D:** False proposition: "She confronts the paradox of faith through infinite resignation and the restoration of a finite good." Correct replacement: "She treats her hand as a passive thing while postponing the gesture's meaning, simultaneously manipulating facticity and transcendence." Rationale: Infinite resignation and restored finite attachment concern Kierkegaard's knight of faith. Sartre's scene analyzes simultaneous manipulation of bodily facticity and projected meaning.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C07 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C07.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 44

---

How does Sartre explain self-deception without appealing to a Freudian unconscious?

A. Public language determines belief, eliminating the first-person awareness from which self-deception could arise. B. The transcendental ego divides into two substances, one permanently deceiving the other through internal representations. C. A separate unconscious censor knows the truth and hides it from a wholly ignorant conscious ego. D. Pre-reflective consciousness can evade a truth it tacitly lives because the pour-soi lacks self-coincidence.

**Answer: D.**

### Option explanations:

- **A:** False proposition: "Public language determines belief, eliminating the first-person awareness from which self-deception could arise." Correct replacement: "Pre-reflective consciousness can evade a truth it tacitly lives because the pour-soi lacks self-coincidence." Rationale: Public language may shape belief but does not eliminate first-person tacit awareness. Sartre locates self-evasion within pre-reflective consciousness itself.
- **B:** False proposition: "The transcendental ego divides into two substances, one permanently deceiving the other through internal representations." Correct replacement: "Pre-reflective consciousness can evade a truth it tacitly lives because the pour-soi lacks self-coincidence." Rationale: Sartre rejects a substantial transcendental ego, much less two inner substances. Self-deception arises from the for-itself's non-coincidence rather than an internal deceiver pair.
- **C:** False proposition: "A separate unconscious censor knows the truth and hides it from a wholly ignorant conscious ego." Correct replacement: "Pre-reflective consciousness can evade a truth it tacitly lives because the pour-soi lacks self-coincidence." Rationale: A separate censor that knows while consciousness is wholly ignorant is the Freudian model Sartre contests. The same consciousness tacitly lives and evades the truth.
- **D:** Correct proposition: "Pre-reflective consciousness can evade a truth it tacitly lives because the pour-soi lacks self-coincidence." Rationale: Sartre uses non-thetic self-awareness and non-self-identity to explain how consciousness can evade what it tacitly knows.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C07 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C07.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 45

---

What does Sartre's keyhole example establish about the Look?

A. Hearing another approach transforms absorbed spying into shameful awareness of oneself as an object for another subject. B. Anticipating the observer's death individualizes Dasein and calls it from the crowd into religious faith. C. Breaking the keyhole makes the door present-at-hand, supposedly proving that

practical equipment derives from theory. D. Remaining alone at the keyhole reveals a transcendental ego that constitutes the absent observer as a noematic object in reflection.

**Answer: A.**

**Option explanations:**

- **A:** Correct proposition: "Hearing another approach transforms absorbed spying into shameful awareness of oneself as an object for another subject." Rationale: The Look is lived in shame as exposure to another freedom that gives me an outside I cannot fully control.
- **B:** False proposition: "Anticipating the observer's death individualizes Dasein and calls it from the crowd into religious faith." Correct replacement: "Hearing another approach transforms absorbed spying into shameful awareness of oneself as an object for another subject." Rationale: Anticipating death and leaving the crowd are Heideggerian themes, while religious faith is Kierkegaardian. The keyhole episode instead turns absorbed spying into shame under another's possible gaze.
- **C:** False proposition: "Breaking the keyhole makes the door present-at-hand, supposedly proving that practical equipment derives from theory." Correct replacement: "Hearing another approach transforms absorbed spying into shameful awareness of oneself as an object for another subject." Rationale: Equipment breakdown belongs to Heidegger and does not prove theory prior to practice. In Sartre, another's approach reveals the spy as an object for a subject.
- **D:** False proposition: "Remaining alone at the keyhole reveals a transcendental ego that constitutes the absent observer as a noematic object in reflection." Correct replacement: "Hearing another approach transforms absorbed spying into shameful awareness of oneself as an object for another subject." Rationale: The scene does not disclose a Husserlian ego constituting a noema in solitude. Shame arises because an actual or possible other reverses the spy's lived position.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C07 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C07.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 46

---

Why does Sartre describe conflict as the original meaning of being-for-others?

A. Conflict disappears once a person sincerely identifies with a social role and abandons transcendence. B. Attempts to possess another's freedom or reduce the other to an object frustrate the recognition each project seeks. C. The Other is constituted by analogy within a transcendental ego, excluding any lived experience of objectification or conflict. D. Being-with guarantees reciprocal recognition because subjects and objects harmonize before any concrete encounter.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "Conflict disappears once a person sincerely identifies with a social role and abandons transcendence." Correct replacement: "Attempts to possess another's freedom or reduce the other to an object frustrate the recognition each project seeks." Rationale: Sincere role-identification is bad faith, not a cure for interpersonal conflict. Conflict arises because each freedom tries to fix the other as object while resisting objectification.
- **B:** Correct proposition: "Attempts to possess another's freedom or reduce the other to an object frustrate the recognition each project seeks." Rationale: Sartre's early analysis makes recognition unstable because making the other an object loses freedom, while possessing freedom proves impossible.
- **C:** False proposition: "The Other is constituted by analogy within a transcendental ego, excluding any lived experience of objectification or conflict." Correct replacement: "Attempts to possess another's freedom or reduce the other to an object frustrate the recognition each project seeks." Rationale: Sartre does not infer the Other merely by analogy inside a transcendental ego. The Look gives lived experience of being objectified by another freedom.
- **D:** False proposition: "Being-with guarantees reciprocal recognition because subjects and objects harmonize before any concrete encounter." Correct replacement: "Attempts to possess another's freedom or reduce the other to an object frustrate the recognition each project seeks." Rationale: Being-with does not guarantee pre-established reciprocal harmony in Sartre. Concrete projects struggle over recognition, possession, and the other's irreducible freedom.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C07 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C07.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 47

---

How should Sartre's line 'hell is other people' be interpreted?

- A. It states Heidegger's doctrine that being-with is a deficient mode eliminated by anticipatory resoluteness. B. It expresses Kierkegaard's view that the crowd cannot contain an ethically responsible individual. C. It concerns distorted relations under another's judgment, not every possible human relation. D. It establishes that other minds do not exist and that apparent social relations are projections of solitary consciousness.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "It states Heidegger's doctrine that being-with is a deficient mode eliminated by anticipatory resoluteness." Correct replacement: "It concerns distorted relations under another's judgment, not every possible human relation." Rationale: Being-with is Heideggerian and is not eliminated by resoluteness. Sartre's line concerns captive relations of judgment in No Exit, not an ontological defect removed by authenticity.

- **B:** False proposition: "It expresses Kierkegaard's view that the crowd cannot contain an ethically responsible individual." Correct replacement: "It concerns distorted relations under another's judgment, not every possible human relation." Rationale: Kierkegaard's critique of the crowd does not explain Sartre's dramatic line. The play depicts persons fixing one another through judgment and dependence.
- **C:** Correct proposition: "It concerns distorted relations under another's judgment, not every possible human relation." Rationale: Sartre later clarified that *No Exit* depicts captive, distorted relations; the line should not erase solidarity or every non-conflictual relation.
- **D:** False proposition: "It establishes that other minds do not exist and that apparent social relations are projections of solitary consciousness." Correct replacement: "It concerns distorted relations under another's judgment, not every possible human relation." Rationale: The line presupposes other consciousnesses rather than denying them. Its target is distorted objectifying relations, not the existence of other minds or every social bond.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C07 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C07.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 48

---

What is the most defensible positive meaning of Sartrean authenticity?

A. Authenticity copies Heidegger's non-moral resoluteness exactly, erasing Sartre's distinct account of bad faith. B. Authenticity owns both facticity and transcendence without pretending to be a fixed thing or a freedom detached from situation. C. Authenticity selects whichever spontaneous preference feels strongest because freedom removes responsibility and constraint. D. Authenticity abolishes the Look by making other people unable to perceive or judge the self.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "Authenticity copies Heidegger's non-moral resoluteness exactly, erasing Sartre's distinct account of bad faith." Correct replacement: "Authenticity owns both facticity and transcendence without pretending to be a fixed thing or a freedom detached from situation." Rationale: Sartrean authenticity cannot be an exact copy of Heideggerian resoluteness because bad faith and situated freedom supply a distinct problem. It means lucidly owning both given limits and projection.
- **B:** Correct proposition: "Authenticity owns both facticity and transcendence without pretending to be a fixed thing or a freedom detached from situation." Rationale: Although Sartre's positive ethics remains incomplete, authenticity is best reconstructed as lucid ownership of situated freedom against bad faith.

- **C:** False proposition: "Authenticity selects whichever spontaneous preference feels strongest because freedom removes responsibility and constraint." Correct replacement: "Authenticity owns both facticity and transcendence without pretending to be a fixed thing or a freedom detached from situation." Rationale: Spontaneous preference without responsibility is arbitrariness, not authenticity. Sartrean freedom must acknowledge consequences, facticity, and the project through which preferences acquire meaning.
- **D:** False proposition: "Authenticity abolishes the Look by making other people unable to perceive or judge the self." Correct replacement: "Authenticity owns both facticity and transcendence without pretending to be a fixed thing or a freedom detached from situation." Rationale: Authenticity cannot abolish the Look or disable other people's judgment. It changes one's relation to objectification by refusing to reduce the self to either fixed fact or pure escape.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C07 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C07.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 49

---

What is Heidegger's ontological difference?

A. It is Kierkegaard's distinction between objective propositions and passionate religious appropriation. B. It distinguishes Being's intelligibility from any particular being disclosed within it. C. It is Husserl's distinction between the natural attitude and the transcendental ego reached through reduction. D. It is Sartre's distinction between a self-identical object and a nihilating consciousness that projects beyond itself.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "It is Kierkegaard's distinction between objective propositions and passionate religious appropriation." Correct replacement: "It distinguishes Being's intelligibility from any particular being disclosed within it." Rationale: Objective proposition versus inward appropriation is Kierkegaard's distinction, not Heidegger's ontological difference. The latter separates the intelligibility of Being from particular beings.
- **B:** Correct proposition: "It distinguishes Being's intelligibility from any particular being disclosed within it." Rationale: The ontological difference prevents Being from being treated as one highest entity and frames Dasein's role in fundamental ontology.
- **C:** False proposition: "It is Husserl's distinction between the natural attitude and the transcendental ego reached through reduction." Correct replacement: "It distinguishes Being's intelligibility from any particular being disclosed within it." Rationale: Natural attitude and transcendental ego belong to Husserlian reduction. Heidegger's distinction prevents Being from being treated as one entity among others.

- **D:** False proposition: "It is Sartre's distinction between a self-identical object and a nihilating consciousness that projects beyond itself." Correct replacement: "It distinguishes Being's intelligibility from any particular being disclosed within it." Rationale: En-soi versus pour-soi is Sartre's ontology, not the Being/beings distinction. Heidegger asks about the meaning enabling entities to be disclosed as entities.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C08 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C08.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 50

---

Why does Heidegger select Dasein for the inquiry into Being?

A. Dasein is a biological species; measurable properties supply a complete empirical definition of existence. B. Dasein is a divine artisan; its concept determines the essence and function of created human beings. C. Dasein's own Being is at issue for it, and it already possesses a pre-ontological understanding of Being. D. Dasein is a detached substance; internal representations provide certainty before any encounter with a world.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "Dasein is a biological species; measurable properties supply a complete empirical definition of existence." Correct replacement: "Dasein's own Being is at issue for it, and it already possesses a pre-ontological understanding of Being." Rationale: Biological measurement treats humans as present-at-hand objects and cannot explain Dasein's access to Being. Dasein is selected because its own Being matters to it.
- **B:** False proposition: "Dasein is a divine artisan; its concept determines the essence and function of created human beings." Correct replacement: "Dasein's own Being is at issue for it, and it already possesses a pre-ontological understanding of Being." Rationale: Dasein is neither creator nor divine blueprint. It is the finite being that already understands Being pre-ontologically through living its possibilities.
- **C:** Correct proposition: "Dasein's own Being is at issue for it, and it already possesses a pre-ontological understanding of Being." Rationale: Dasein provides access to the Being-question because it understands Being in living its possibilities, not because it is simply a human organism.
- **D:** False proposition: "Dasein is a detached substance; internal representations provide certainty before any encounter with a world." Correct replacement: "Dasein's own Being is at issue for it, and it already possesses a pre-ontological understanding of Being." Rationale: A detached representational substance is the Cartesian model being-in-the-world overturns. Dasein encounters a meaningful world before any inner-certainty construction.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C08 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C08.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 51

---

What does Heidegger mean by being-in-the-world?

A. It is the spatial placement of a self-contained mind inside a container composed of independently existing physical things. B. It is Husserl's transcendental reduction from worldly experience to a constituting ego outside practical concern. C. It is Sartre's name for consciousness introducing nothingness into a field of self-identical being. D. It is a unitary structure of practical involvement that precedes the separation of an inner subject from external objects.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "It is the spatial placement of a self-contained mind inside a container composed of independently existing physical things." Correct replacement: "It is a unitary structure of practical involvement that precedes the separation of an inner subject from external objects." Rationale: Being-in-the-world is not spatial containment of an inner mind among outer things. The hyphenated unity names prior practical involvement from which subject-object separation is derivative.
- **B:** False proposition: "It is Husserl's transcendental reduction from worldly experience to a constituting ego outside practical concern." Correct replacement: "It is a unitary structure of practical involvement that precedes the separation of an inner subject from external objects." Rationale: Husserlian reduction to a constituting ego is precisely the detached starting point Heidegger contests. Dasein is already involved in worldly concern.
- **C:** False proposition: "It is Sartre's name for consciousness introducing nothingness into a field of self-identical being." Correct replacement: "It is a unitary structure of practical involvement that precedes the separation of an inner subject from external objects." Rationale: Nihilating consciousness is Sartrean, not Heidegger's account of worldhood. Being-in-the-world describes Dasein's unitary practical constitution before reflective subject-object separation.
- **D:** Correct proposition: "It is a unitary structure of practical involvement that precedes the separation of an inner subject from external objects." Rationale: The hyphenated expression names Dasein's constitutive world-involvement; subject and object are derivative abstractions.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C08 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C08.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 52

---

How are ready-to-hand and present-at-hand related in Heidegger's equipment analysis?

A. Absorbed equipment-use is primary; detached property-observation emerges through disruption or thematization. B. Both modes are identical because a hammer's properties and its place in a workshop are disclosed in precisely the same way. C. Detached theoretical observation is primordial, while practical use is a later subjective interpretation added to neutral objects. D. Ready-to-hand names Sartrean consciousness, while present-at-hand names Kierkegaard's ethical commitment under universal duty.

**Answer: A.**

### Option explanations:

- **A:** Correct proposition: "Absorbed equipment-use is primary; detached property-observation emerges through disruption or thematization." Rationale: Zuhandenheit is practical equipmental involvement; Vorhandenheit becomes salient when coping breaks down or theory abstracts from use.
- **B:** False proposition: "Both modes are identical because a hammer's properties and its place in a workshop are disclosed in precisely the same way." Correct replacement: "Absorbed equipment-use is primary; detached property-observation emerges through disruption or thematization." Rationale: A hammer's practical role and detached properties are not disclosed identically. Readiness-to-hand is absorbed use; presence-at-hand emerges through breakdown or thematic observation.
- **C:** False proposition: "Detached theoretical observation is primordial, while practical use is a later subjective interpretation added to neutral objects." Correct replacement: "Absorbed equipment-use is primary; detached property-observation emerges through disruption or thematization." Rationale: Heidegger gives priority to practical coping, not theoretical inspection. Property-observation is a derivative modification of equipmental involvement disclosed through breakdown or thematization.
- **D:** False proposition: "Ready-to-hand names Sartrean consciousness, while present-at-hand names Kierkegaard's ethical commitment under universal duty." Correct replacement: "Absorbed equipment-use is primary; detached property-observation emerges through disruption or thematization." Rationale: Ready-to-hand and present-at-hand are Heideggerian modes of disclosure, not Sartrean consciousness or Kierkegaardian duty. Their contrast concerns equipment use and objectification.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C08 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C08.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 53

---

What is the philosophical point of Heidegger's broken-hammer analysis?

A. A broken tool loses its worldly relations and proves that equipment does not possess practical significance. B. Breakdown reveals the equipmental network from which theoretical objects are derivatively disclosed. C. A disturbance suspends the world's existence and discloses Husserl's pure transcendental ego as the residual subject. D. A broken tool reveals that consciousness is nothing because material objects cease to possess self-identical being.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "A broken tool loses its worldly relations and proves that equipment does not possess practical significance." Correct replacement: "Breakdown reveals the equipmental network from which theoretical objects are derivatively disclosed." Rationale: Breakdown does not erase a tool's worldly relations; it makes the normally unobtrusive equipmental network conspicuous. Practical significance is revealed through disturbance.
- **B:** Correct proposition: "Breakdown reveals the equipmental network from which theoretical objects are derivatively disclosed." Rationale: Breakdown reveals the referential totality supporting use and explains how present-at-hand thematization arises from ready-to-hand coping.
- **C:** False proposition: "A disturbance suspends the world's existence and discloses Husserl's pure transcendental ego as the residual subject." Correct replacement: "Breakdown reveals the equipmental network from which theoretical objects are derivatively disclosed." Rationale: A broken hammer neither brackets the world's existence nor leaves a Husserlian pure ego. It exposes dependencies among equipment, tasks, and purposes.
- **D:** False proposition: "A broken tool reveals that consciousness is nothing because material objects cease to possess self-identical being." Correct replacement: "Breakdown reveals the equipmental network from which theoretical objects are derivatively disclosed." Rationale: Material objects do not lose self-identical being when equipment fails, and Sartrean nothingness is not the point. Breakdown shows theoretical objects emerging from practical contexts.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C08 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C08.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 54

---

Which structures constitute Dasein's disclosedness in Being and Time?

A. Aesthetic pleasure, ethical duty and religious faith are existentialia arranged as Heidegger's necessary stages. B. Attunement, understanding as projection and discourse articulate how Dasein finds itself and opens a meaningful world. C. Anguish, abandonment and despair are the three ecstases through which ordinary time becomes measurable. D. Sensation, judgment and inference form empirical categories through which a worldless mind constructs external reality.

**Answer: B.**

### Option explanations:

- **A:** False proposition: "Aesthetic pleasure, ethical duty and religious faith are existentialia arranged as Heidegger's necessary stages." Correct replacement: "Attunement, understanding as projection and discourse articulate how Dasein finds itself and opens a meaningful world." Rationale: Aesthetic, ethical, and religious spheres are Kierkegaardian, not Heidegger's existentialia. Dasein's disclosedness is articulated by attunement, understanding, and discourse.
- **B:** Correct proposition: "Attunement, understanding as projection and discourse articulate how Dasein finds itself and opens a meaningful world." Rationale: Befindlichkeit, Verstehen and Rede are existentialia of disclosedness, not categories of things or stages borrowed from other thinkers.
- **C:** False proposition: "Anguish, abandonment and despair are the three ecstases through which ordinary time becomes measurable." Correct replacement: "Attunement, understanding as projection and discourse articulate how Dasein finds itself and opens a meaningful world." Rationale: Anguish, abandonment, and despair are Sartre's popular triad, not temporal ecstases or structures of disclosedness. Heidegger analyzes mood, projection, and articulation.
- **D:** False proposition: "Sensation, judgment and inference form empirical categories through which a worldless mind constructs external reality." Correct replacement: "Attunement, understanding as projection and discourse articulate how Dasein finds itself and opens a meaningful world." Rationale: Sensation, judgment, and inference describe an epistemic construction by a worldless mind that Heidegger rejects. Dasein already finds itself in a meaningful world.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C08 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C08.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 55

---

What does Heidegger mean by Care, or Sorge, as the Being of Dasein?

A. Care is a moral command requiring Dasein to choose benevolent rather than harmful actions. B. Care is a psychological feeling of worry that appears intermittently alongside otherwise self-contained rational cognition. C. Care unifies being-ahead-of-itself, already-being-in-a-world and being-alongside entities encountered within that world. D. Care is the transcendental ego's synthesis of inner sensations into enduring noematic objects through phenomenological reduction.

**Answer: C.**

### Option explanations:

- **A:** False proposition: "Care is a moral command requiring Dasein to choose benevolent rather than harmful actions." Correct replacement: "Care unifies being-ahead-of-itself, already-being-in-a-world and being-alongside entities encountered within that world." Rationale: Care is an ontological structure, not a command to choose benevolent acts. It unifies projection, thrownness, and involvement without supplying a moral code.

- **B:** False proposition: "Care is a psychological feeling of worry that appears intermittently alongside otherwise self-contained rational cognition." Correct replacement: "Care unifies being-ahead-of-itself, already-being-in-a-world and being-alongside entities encountered within that world." Rationale: Occasional psychological worry cannot be Dasein's Being. Sorge names the constant structural unity of ahead-of-itself, already-in, and alongside.
- **C:** Correct proposition: "Care unifies being-ahead-of-itself, already-being-in-a-world and being-alongside entities encountered within that world." Rationale: Care is the ontological unity of projection, thrownness and involvement, not an emotion or ethical rule.
- **D:** False proposition: "Care is the transcendental ego's synthesis of inner sensations into enduring noematic objects through phenomenological reduction." Correct replacement: "Care unifies being-ahead-of-itself, already-being-in-a-world and being-alongside entities encountered within that world." Rationale: A transcendental ego synthesizing noemata belongs to Husserl, not Heideggerian Care. Care articulates worldly, temporal existence before reflective constitution.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C08 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C08.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 56

---

What does Heidegger mean by das Man, or 'the they'?

A. It is Kierkegaard's knight of faith who appears ordinary while maintaining an absolute relation to God. B. It is an identifiable malicious person who directly causes another person's inauthenticity. C. It is anonymous publicness through which what one says, thinks and does becomes levelled into everyday conformity. D. It is Sartre's universal image of humanity chosen whenever the for-itself undertakes a responsible project.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "It is Kierkegaard's knight of faith who appears ordinary while maintaining an absolute relation to God." Correct replacement: "It is anonymous publicness through which what one says, thinks and does becomes levelled into everyday conformity." Rationale: The knight of faith is Kierkegaardian and personally related to God, not Heidegger's anonymous publicness. Das Man levels possibilities through what one ordinarily says and does.
- **B:** False proposition: "It is an identifiable malicious person who directly causes another person's inauthenticity." Correct replacement: "It is anonymous publicness through which what one says, thinks and does becomes levelled into everyday conformity." Rationale: The they is not one malicious individual causing inauthenticity. It is the impersonal normativity of everyday public interpretation in which everyone and nobody decides.

- **C:** Correct proposition: "It is anonymous publicness through which what one says, thinks and does becomes levelled into everyday conformity." Rationale: Das Man names the impersonal 'one' of public norms; it is an existential structure of being-with, not a villain or institution.
- **D:** False proposition: "It is Sartre's universal image of humanity chosen whenever the for-itself undertakes a responsible project." Correct replacement: "It is anonymous publicness through which what one says, thinks and does becomes levelled into everyday conformity." Rationale: Sartre's universal image of humanity arises from responsible choice, not Heidegger's das Man. The latter names anonymous conformity that disperses owned possibility.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C09 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C09.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 57

---

How should Heidegger's notion of falling, or Verfallen, be understood?

A. It is the phenomenological reduction by which consciousness brackets practical involvement and returns to a pure ego. B. It is a voluntary moral crime committed whenever an authentic person consciously chooses an evil project. C. It is the empirical event of organismic death that ends projection and abolishes temporality. D. It is structural absorption in public concern, not a theological fall from moral purity.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "It is the phenomenological reduction by which consciousness brackets practical involvement and returns to a pure ego." Correct replacement: "It is structural absorption in public concern, not a theological fall from moral purity." Rationale: Phenomenological reduction to a pure ego is Husserlian, not Heideggerian falling. Falling is absorption in everyday public concern within being-in-the-world.
- **B:** False proposition: "It is a voluntary moral crime committed whenever an authentic person consciously chooses an evil project." Correct replacement: "It is structural absorption in public concern, not a theological fall from moral purity." Rationale: Falling is not a voluntary crime or moral wickedness. It is a normal structural tendency of Dasein to lose itself in public interpretations.
- **C:** False proposition: "It is the empirical event of organismic death that ends projection and abolishes temporality." Correct replacement: "It is structural absorption in public concern, not a theological fall from moral purity." Rationale: Bodily death is an event, whereas falling describes ongoing everyday absorption. Verfallen does not end projection or temporality.
- **D:** Correct proposition: "It is structural absorption in public concern, not a theological fall from moral purity." Rationale: Falling describes everyday dispersal in the world and das Man; it is equiprimordial with Dasein's other structures and not a sin.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C09 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C09.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 58

---

What does Heideggerian anxiety disclose in Being and Time?

A. The collapse of ordinary significance reveals being-in-the-world as such and individualizes Dasein from das Man. B. A clearly identified threatening object reveals the safest practical route for escaping danger within the surrounding world. C. A divine command reveals the religious stage and guarantees that universal ethical duty may be suspended. D. A psychological cause reveals that moods are internal colorings added to an otherwise neutral world.

**Answer: A.**

**Option explanations:**

- **A:** Correct proposition: "The collapse of ordinary significance reveals being-in-the-world as such and individualizes Dasein from das Man." Rationale: Unlike fear, Angst has no determinate intraworldly object; the world's involvement-totality loses significance and Dasein confronts its thrown possibility.
- **B:** False proposition: "A clearly identified threatening object reveals the safest practical route for escaping danger within the surrounding world." Correct replacement: "The collapse of ordinary significance reveals being-in-the-world as such and individualizes Dasein from das Man." Rationale: A determinate threatening object elicits fear, not existential anxiety. Anxiety collapses familiar significance and discloses being-in-the-world as such.
- **C:** False proposition: "A divine command reveals the religious stage and guarantees that universal ethical duty may be suspended." Correct replacement: "The collapse of ordinary significance reveals being-in-the-world as such and individualizes Dasein from das Man." Rationale: Divine command and suspension of ethics are Kierkegaardian, not Heidegger's anxiety. Heideggerian anxiety individualizes Dasein from das Man.
- **D:** False proposition: "A psychological cause reveals that moods are internal colorings added to an otherwise neutral world." Correct replacement: "The collapse of ordinary significance reveals being-in-the-world as such and individualizes Dasein from das Man." Rationale: Mood is not an internal coloring added to a neutral world. Anxiety is disclosive: it reveals the world's significance withdrawing and Dasein's uncanniness.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C09 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C09.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 59

---

What does being-toward-death disclose for Heidegger?

A. Death is Dasein's ownmost, non-relational, certain and indefinite possibility, which individualizes rather than recommends suicide. B. Death is an illusion produced by the crowd and disappears when Dasein attains anticipatory resoluteness. C. Death is a present-at-hand biological event, and its measurable occurrence exhausts its philosophical significance. D. Death is a determinate object of fear that provides a substantive moral code for evaluating possible choices.

**Answer: A.**

### Option explanations:

- **A:** Correct proposition: "Death is Dasein's ownmost, non-relational, certain and indefinite possibility, which individualizes rather than recommends suicide." Rationale: Sein-zum-Tode concerns anticipatory relation to mortality as a possibility that cannot be outstripped, not empirical demise or self-destruction.
- **B:** False proposition: "Death is an illusion produced by the crowd and disappears when Dasein attains anticipatory resoluteness." Correct replacement: "Death is Dasein's ownmost, non-relational, certain and indefinite possibility, which individualizes rather than recommends suicide." Rationale: Authentic anticipation does not make death disappear; it owns death as inescapable possibility. The crowd instead covers death through idle reassurance and substitution.
- **C:** False proposition: "Death is a present-at-hand biological event, and its measurable occurrence exhausts its philosophical significance." Correct replacement: "Death is Dasein's ownmost, non-relational, certain and indefinite possibility, which individualizes rather than recommends suicide." Rationale: Biological occurrence does not exhaust being-toward-death. Heidegger analyzes death as Dasein's ownmost, non-relational, certain yet indefinite possibility that individualizes finite projection.
- **D:** False proposition: "Death is a determinate object of fear that provides a substantive moral code for evaluating possible choices." Correct replacement: "Death is Dasein's ownmost, non-relational, certain and indefinite possibility, which individualizes rather than recommends suicide." Rationale: Death is not a determinate feared object or source of moral rules. Anticipation individualizes finite projection without prescribing substantive values.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C09 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C09.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 60

---

What is the role of the call of conscience in Heidegger's account of authenticity?

A. Its public instructions supply a universal ethical code that determines which concrete political commitments are authentically correct. B. Its theological voice reveals God's command and moves the individual from the ethical sphere into Kierkegaard's religious stage. C. Its silent summons recalls Dasein from das Man to its groundless responsibility and prepares anticipatory resoluteness without issuing moral rules. D. Its reflective certainty brackets the world and discloses a transcendental ego independent of thrownness and being-with.

**Answer: C.**

### Option explanations:

- **A:** False proposition: "Its public instructions supply a universal ethical code that determines which concrete political commitments are authentically correct." Correct replacement: "Its silent summons recalls Dasein from das Man to its groundless responsibility and prepares anticipatory resoluteness without issuing moral rules." Rationale: The call gives no public instruction or universal political code. Its silence summons Dasein from das Man to responsibility for its own thrown possibilities.
- **B:** False proposition: "Its theological voice reveals God's command and moves the individual from the ethical sphere into Kierkegaard's religious stage." Correct replacement: "Its silent summons recalls Dasein from das Man to its groundless responsibility and prepares anticipatory resoluteness without issuing moral rules." Rationale: Heidegger's conscience is not God's voice moving through Kierkegaardian stages. It is Dasein's non-theological summons toward anticipatory resoluteness.
- **C:** Correct proposition: "Its silent summons recalls Dasein from das Man to its groundless responsibility and prepares anticipatory resoluteness without issuing moral rules." Rationale: The call says no specific what; it summons Dasein to own its thrown projection and null basis rather than remain dispersed.
- **D:** False proposition: "Its reflective certainty brackets the world and discloses a transcendental ego independent of thrownness and being-with." Correct replacement: "Its silent summons recalls Dasein from das Man to its groundless responsibility and prepares anticipatory resoluteness without issuing moral rules." Rationale: Bracketing toward a transcendental ego is Husserlian and would deny thrown being-with. The call recalls Dasein within its existing worldly situation.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C09 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C09.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 61

---

How are authenticity and inauthenticity related as modes of Dasein's being?

A. Authenticity defines Dasein's essence from the beginning, while inauthenticity belongs instead to entities lacking any understanding of Being. B. Authenticity is moral goodness, while inauthenticity is culpable wickedness measured by a universal ethical law. C. Authenticity removes Dasein from social existence, while inauthenticity alone preserves being-with and practical involvement. D. Both are possible modifications of being-in-the-world; authenticity owns thrown possibilities, while inauthenticity disperses them in das Man.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "Authenticity defines Dasein's essence from the beginning, while inauthenticity belongs instead to entities lacking any understanding of Being." Correct replacement: "Both are possible modifications of being-in-the-world; authenticity owns thrown possibilities, while inauthenticity disperses them in das Man." Rationale: Dasein is not essentially authentic from the outset, and inauthenticity is not reserved for non-understanding entities. Both are possible modes of the same being-in-the-world.
- **B:** False proposition: "Authenticity is moral goodness, while inauthenticity is culpable wickedness measured by a universal ethical law." Correct replacement: "Both are possible modifications of being-in-the-world; authenticity owns thrown possibilities, while inauthenticity disperses them in das Man." Rationale: Authenticity and inauthenticity are existential modifications, not moral goodness and wickedness under a universal law. The distinction concerns ownership of possibilities.
- **C:** False proposition: "Authenticity removes Dasein from social existence, while inauthenticity alone preserves being-with and practical involvement." Correct replacement: "Both are possible modifications of being-in-the-world; authenticity owns thrown possibilities, while inauthenticity disperses them in das Man." Rationale: Authenticity does not remove being-with or practical involvement. It modifies how Dasein inhabits shared possibilities rather than escaping social existence.
- **D:** Correct proposition: "Both are possible modifications of being-in-the-world; authenticity owns thrown possibilities, while inauthenticity disperses them in das Man." Rationale: The 2026 demand requires treating both as existential modes, not moral ranks; Dasein is proximally inauthentic yet capable of owned existence.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C09 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C09.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 62

---

How do Heidegger's three temporal ecstases map onto the structure of Care?

A. Future maps to already-in, having-been to being-alongside, and present to ahead-of-itself. B. The temporal ecstases are structurally unrelated to Care because Care is merely a psychological attitude. C. Future maps to being-alongside, having-been to ahead-of-itself, and present to already-in. D. Future maps

to ahead-of-itself, having-been to already-in, and present to being-alongside entities.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "Future maps to already-in, having-been to being-alongside, and present to ahead-of-itself." Correct replacement: "Future maps to ahead-of-itself, having-been to already-in, and present to being-alongside entities." Rationale: The mapping is crossed: ahead-of-itself corresponds to future, already-in to having-been, and alongside to present. Each Care moment has a distinct temporal ecstasis.
- **B:** False proposition: "The temporal ecstases are structurally unrelated to Care because Care is merely a psychological attitude." Correct replacement: "Future maps to ahead-of-itself, having-been to already-in, and present to being-alongside entities." Rationale: Care is not a psychological attitude independent of temporality. Its structural unity receives meaning from the ecstatic relation of future, having-been, and present.
- **C:** False proposition: "Future maps to being-alongside, having-been to ahead-of-itself, and present to already-in." Correct replacement: "Future maps to ahead-of-itself, having-been to already-in, and present to being-alongside entities." Rationale: Future does not map to alongside, nor having-been to projection. Projection is futural, thrownness retrieves having-been, and concern makes present.
- **D:** Correct proposition: "Future maps to ahead-of-itself, having-been to already-in, and present to being-alongside entities." Rationale: Ecstatic temporality articulates Care: projection is futural, thrownness is having-been, and involvement makes present.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C10 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C10.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 63

---

Why does Heidegger grant priority to the future within primordial temporality?

A. Future events causally determine present choices because Dasein possesses certain knowledge of everything that will occur. B. The future abolishes having-been and present involvement once Dasein withdraws from worldly relations. C. Projection toward the ownmost possibility of death gathers thrown existence and makes authentic historicity possible. D. The future is a container of not-yet-present moments that becomes real as the moving present reaches each one.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "Future events causally determine present choices because Dasein possesses certain knowledge of everything that will occur." Correct replacement: "Projection toward the ownmost possibility of death gathers thrown existence and makes authentic historicity possible."

Rationale: Primordial future is not causal foreknowledge of later events. It is Dasein's projection toward possibilities, especially finite being-toward-death.

- **B:** False proposition: "The future abolishes having-been and present involvement once Dasein withdraws from worldly relations." Correct replacement: "Projection toward the ownmost possibility of death gathers thrown existence and makes authentic historicity possible." Rationale: Futural projection does not abolish thrown past or present involvement. Authentic future gathers having-been and present into a unified finite temporality.
- **C:** Correct proposition: "Projection toward the ownmost possibility of death gathers thrown existence and makes authentic historicity possible." Rationale: The future is not a later segment but Dasein's coming-toward-itself in projection, especially anticipatory being-toward-death.
- **D:** False proposition: "The future is a container of not-yet-present moments that becomes real as the moving present reaches each one." Correct replacement: "Projection toward the ownmost possibility of death gathers thrown existence and makes authentic historicity possible." Rationale: Heidegger rejects the future as a container of not-yet-nows approached by a moving present. Ecstatic projection grounds that ordinary representation derivatively.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C10 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C10.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 64

---

What distinguishes primordial temporality from vulgar or ordinary time in Heidegger?

A. Primordial temporality is finite and ecstatic, whereas ordinary time is a derived public sequence of measurable nows. B. Primordial temporality belongs to objects, whereas ordinary time belongs exclusively to authentic Dasein's projects. C. Primordial temporality is an infinite series of present instants, whereas ordinary time unifies future, having-been and present. D. Primordial temporality is Newtonian absolute time, whereas ordinary time is the private feeling of duration within consciousness.

**Answer: A.**

**Option explanations:**

- **A:** Correct proposition: "Primordial temporality is finite and ecstatic, whereas ordinary time is a derived public sequence of measurable nows." Rationale: Zeitlichkeit is the ecstatic unity of Dasein's existence; clock-time and the now-series derive from world-time and practical dating.
- **B:** False proposition: "Primordial temporality belongs to objects, whereas ordinary time belongs exclusively to authentic Dasein's projects." Correct replacement: "Primordial temporality is finite and ecstatic, whereas ordinary time is a derived public sequence of measurable nows." Rationale: Primordial temporality does not belong to objects, and ordinary time is not restricted to authentic Dasein. Ecstatic finitude grounds the public measurable now-sequence.

- **C:** False proposition: "Primordial temporality is an infinite series of present instants, whereas ordinary time unifies future, having-been and present." Correct replacement: "Primordial temporality is finite and ecstatic, whereas ordinary time is a derived public sequence of measurable nows." Rationale: The option reverses the distinction: an infinite now-series is vulgar time, while primordial temporality unifies future, having-been, and present ecstatically.
- **D:** False proposition: "Primordial temporality is Newtonian absolute time, whereas ordinary time is the private feeling of duration within consciousness." Correct replacement: "Primordial temporality is finite and ecstatic, whereas ordinary time is a derived public sequence of measurable nows." Rationale: Newtonian absolute time and private duration are not Heidegger's two levels. Primordial temporality is finite existence; clock-time is its public derivative.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C10 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C10.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 65

---

What is Heidegger's concept of historicity, or *Geschichtlichkeit*?

A. History is Sartre's claim that past facticity mechanically determines the meaning of present and future projects. B. History is an external chronology of present-at-hand events unrelated to projection, inheritance or authenticity. C. Dasein inherits possibilities from a shared past and projects them anew, so history belongs to its temporal way of existing. D. History is the Hegelian completion of Absolute Spirit that dissolves singular possibility into necessary progress.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "History is Sartre's claim that past facticity mechanically determines the meaning of present and future projects." Correct replacement: "Dasein inherits possibilities from a shared past and projects them anew, so history belongs to its temporal way of existing." Rationale: Sartrean facticity does not mechanically determine project meaning, and it is not Heidegger's historicity. Dasein inherits possibilities and projects them anew.
- **B:** False proposition: "History is an external chronology of present-at-hand events unrelated to projection, inheritance or authenticity." Correct replacement: "Dasein inherits possibilities from a shared past and projects them anew, so history belongs to its temporal way of existing." Rationale: Historicity is not external chronology detached from existence. Shared inheritance becomes historical through finite projection and possible authentic retrieval.
- **C:** Correct proposition: "Dasein inherits possibilities from a shared past and projects them anew, so history belongs to its temporal way of existing." Rationale: Historicity expresses how thrown inheritance and futural projection belong together within Dasein's finite temporality.

- **D:** False proposition: "History is the Hegelian completion of Absolute Spirit that dissolves singular possibility into necessary progress." Correct replacement: "Dasein inherits possibilities from a shared past and projects them anew, so history belongs to its temporal way of existing." Rationale: Necessary progress of Absolute Spirit is Hegelian and dissolves the contingency Heidegger preserves. Historicity concerns Dasein's temporal appropriation of inherited possibilities.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C10 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C10.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 66

---

Why is ordinary clock-time called derivative rather than simply false in Heidegger?

A. Clock-time is false because events cannot be measured and numerical sequence is produced by bad faith. B. Clock-time is primordial because detached theoretical observation in each case precedes practical involvement with equipment. C. Clock-time is religious because its sequence of moments culminates in Kierkegaard's paradox of the eternal entering time. D. Public dating and measurement arise from more primordial temporal involvement, yet remain practically valid for worldly coordination.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "Clock-time is false because events cannot be measured and numerical sequence is produced by bad faith." Correct replacement: "Public dating and measurement arise from more primordial temporal involvement, yet remain practically valid for worldly coordination." Rationale: Clock measurement is neither impossible nor a product of bad faith. It remains valid while deriving from more primordial worldly temporal involvement.
- **B:** False proposition: "Clock-time is primordial because detached theoretical observation in each case precedes practical involvement with equipment." Correct replacement: "Public dating and measurement arise from more primordial temporal involvement, yet remain practically valid for worldly coordination." Rationale: Detached observation does not precede practical involvement for Heidegger. Public clock-time arises from making-present and coordinating concern within shared worldly practices.
- **C:** False proposition: "Clock-time is religious because its sequence of moments culminates in Kierkegaard's paradox of the eternal entering time." Correct replacement: "Public dating and measurement arise from more primordial temporal involvement, yet remain practically valid for worldly coordination." Rationale: Kierkegaard's eternal entering time does not make clock-time religious. Heidegger derives measurable nows from Dasein's ecstatic temporality and public coordination.
- **D:** Correct proposition: "Public dating and measurement arise from more primordial temporal involvement, yet remain practically valid for worldly coordination." Rationale: Heidegger derives the levelled now-series from Dasein's temporalizing and world-time without denying the usefulness of

clocks.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C10 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C10.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 67

---

How should fear and existential anxiety be distinguished across the existentialist tradition?

A. Fear and anxiety differ only in physiological intensity and lack distinct philosophical or disclosive significance. B. Fear is objectless, while anxiety identifies one threatening entity and remains within ordinary practical concern. C. Fear is uniquely Sartrean, while anxiety belongs exclusively to Kierkegaard and does not appear in Heidegger's ontology. D. Fear has a determinate worldly object, while anxiety lacks one and discloses possibility, freedom or being-in-the-world according to the thinker.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "Fear and anxiety differ only in physiological intensity and lack distinct philosophical or disclosive significance." Correct replacement: "Fear has a determinate worldly object, while anxiety lacks one and discloses possibility, freedom or being-in-the-world according to the thinker." Rationale: Fear and anxiety differ by intentional object and disclosive role, not merely intensity. Fear targets an entity; anxiety opens possibility or worldhood.
- **B:** False proposition: "Fear is objectless, while anxiety identifies one threatening entity and remains within ordinary practical concern." Correct replacement: "Fear has a determinate worldly object, while anxiety lacks one and discloses possibility, freedom or being-in-the-world according to the thinker." Rationale: The relation is reversed: fear has a determinate object, while anxiety lacks one. Objectless anxiety disrupts ordinary practical significance.
- **C:** False proposition: "Fear is uniquely Sartrean, while anxiety belongs exclusively to Kierkegaard and does not appear in Heidegger's ontology." Correct replacement: "Fear has a determinate worldly object, while anxiety lacks one and discloses possibility, freedom or being-in-the-world according to the thinker." Rationale: Anxiety appears in Kierkegaard, Heidegger, and Sartre under distinct analyses, while fear is not uniquely Sartrean. Ownership cannot be partitioned this way.
- **D:** Correct proposition: "Fear has a determinate worldly object, while anxiety lacks one and discloses possibility, freedom or being-in-the-world according to the thinker." Rationale: The shared structural contrast is object versus no determinate object, while the disclosed content remains thinker-specific.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C11 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C11.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 68

---

Which comparison of existential moods is accurate?

A. Kierkegaard treats despair as controlled outcomes, Heidegger treats anxiety as fear of death, and Sartre treats anguish as physical danger. B. Kierkegaard links anxiety to possibility, Heidegger to world-collapse, and Sartre to responsibility before freedom. C. Kierkegaard links anxiety to equipment failure, Heidegger to divine abandonment, and Sartre to the teleological suspension. D. Kierkegaard, Heidegger and Sartre use one identical clinical diagnosis, with content unchanged across their projects.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "Kierkegaard treats despair as controlled outcomes, Heidegger treats anxiety as fear of death, and Sartre treats anguish as physical danger." Correct replacement: "Kierkegaard links anxiety to possibility, Heidegger to world-collapse, and Sartre to responsibility before freedom." Rationale: Kierkegaardian despair is self-misrelation, Heideggerian anxiety is not fear of death, and Sartrean anguish is responsibility before freedom. All three pairings are false.
- **B:** Correct proposition: "Kierkegaard links anxiety to possibility, Heidegger to world-collapse, and Sartre to responsibility before freedom." Rationale: The moods form a family resemblance but cannot be flattened: possibility, being-in-the-world and freedom are distinct disclosive objects.
- **C:** False proposition: "Kierkegaard links anxiety to equipment failure, Heidegger to divine abandonment, and Sartre to the teleological suspension." Correct replacement: "Kierkegaard links anxiety to possibility, Heidegger to world-collapse, and Sartre to responsibility before freedom." Rationale: Equipment failure is Heideggerian, divine abandonment Sartrean, and teleological suspension Kierkegaardian; the option redistributes each concept to the wrong thinker.
- **D:** False proposition: "Kierkegaard, Heidegger and Sartre use one identical clinical diagnosis, with content unchanged across their projects." Correct replacement: "Kierkegaard links anxiety to possibility, Heidegger to world-collapse, and Sartre to responsibility before freedom." Rationale: These moods are not one clinical diagnosis. Kierkegaard links anxiety to possibility, Heidegger to world-collapse, and Sartre to responsible freedom.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C11 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C11.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 69

---

Which examples most accurately distinguish Sartrean anguish from Heideggerian anxiety?

A. Sartre's transcendental ego reveals constitution, while Heidegger's Pierre reveals absence within an intentional field. B. Sartre's cliff and gambler reveal freedom, while Heidegger's collapse of significance reveals being-in-the-world as such. C. Sartre's broken hammer reveals ready-to-hand equipment, while Heidegger's paper-knife reveals a missing divine artisan. D. Sartre's Abraham reveals the paradox of faith, while Heidegger's waiter reveals identification with social facticity.

**Answer: B.**

**Option explanations:**

- **A:** False proposition: "Sartre's transcendental ego reveals constitution, while Heidegger's Pierre reveals absence within an intentional field." Correct replacement: "Sartre's cliff and gambler reveal freedom, while Heidegger's collapse of significance reveals being-in-the-world as such." Rationale: The transcendental ego is Husserlian and Pierre's absence is Sartrean, not Heideggerian. Neither pairing distinguishes Sartrean anguish from Heideggerian anxiety.
- **B:** Correct proposition: "Sartre's cliff and gambler reveal freedom, while Heidegger's collapse of significance reveals being-in-the-world as such." Rationale: Sartre's examples concern the gap in self-determination, whereas Heidegger's Angst discloses the world and Dasein's uncanniness.
- **C:** False proposition: "Sartre's broken hammer reveals ready-to-hand equipment, while Heidegger's paper-knife reveals a missing divine artisan." Correct replacement: "Sartre's cliff and gambler reveal freedom, while Heidegger's collapse of significance reveals being-in-the-world as such." Rationale: The broken hammer is Heidegger's equipment example, while the paper-knife is Sartre's artefact analogy. Neither is an example of the moods asked about.
- **D:** False proposition: "Sartre's Abraham reveals the paradox of faith, while Heidegger's waiter reveals identification with social facticity." Correct replacement: "Sartre's cliff and gambler reveal freedom, while Heidegger's collapse of significance reveals being-in-the-world as such." Rationale: Abraham belongs to Kierkegaard and the waiter to Sartre, not Heidegger. Sartrean anguish is shown by cliff and gambler; Heideggerian anxiety by collapsing significance.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C11 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C11.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 70

---

What is the strongest ethical criticism of Heideggerian authenticity?

A. Its substantive moral code is so detailed that it eliminates room for individual projection or historical interpretation. B. Its dependence on divine command makes it unavailable to anyone outside Kierkegaard's religious sphere. C. Its formal account tells Dasein to own a commitment without supplying criteria for which commitments deserve endorsement. D. Its reduction of freedom to physical ability prevents any distinction between facticity and transcendence.

**Answer: C.**

### Option explanations:

- **A:** False proposition: "Its substantive moral code is so detailed that it eliminates room for individual projection or historical interpretation." Correct replacement: "Its formal account tells Dasein to own a commitment without supplying criteria for which commitments deserve endorsement." Rationale: Heideggerian authenticity supplies too little substantive morality, not an excessively detailed code. Its formal ownedness leaves endorsement criteria underdetermined.
- **B:** False proposition: "Its dependence on divine command makes it unavailable to anyone outside Kierkegaard's religious sphere." Correct replacement: "Its formal account tells Dasein to own a commitment without supplying criteria for which commitments deserve endorsement." Rationale: Authenticity is non-theological and does not depend on Kierkegaardian divine command. The ethical criticism concerns formal emptiness within Heidegger's own account.
- **C:** Correct proposition: "Its formal account tells Dasein to own a commitment without supplying criteria for which commitments deserve endorsement." Rationale: The formal-emptiness objection, sharpened by Adorno and Heidegger's politics, asks whether resoluteness can dignify destructive commitments.
- **D:** False proposition: "Its reduction of freedom to physical ability prevents any distinction between facticity and transcendence." Correct replacement: "Its formal account tells Dasein to own a commitment without supplying criteria for which commitments deserve endorsement." Rationale: Physical ability versus facticity is a Sartrean issue, not the central objection to Heidegger. The problem is owning commitments without criteria for worthy content.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C11 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C11.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 71

---

What is the strongest social criticism of early Sartrean freedom?

A. It makes being-with the primary ontology, preventing any explanation of individual projects or bad faith. B. It treats social roles as natural essences established by a divine artisan before individuals begin to exist. C. It can understate how oppression, trauma and material structures restrict action and even the intelligibility of alternatives. D. It gives material scarcity complete causal power, eliminating responsibility and interpretive agency.

**Answer: C.**

### Option explanations:

- **A:** False proposition: "It makes being-with the primary ontology, preventing any explanation of individual projects or bad faith." Correct replacement: "It can understate how oppression, trauma and material structures restrict action and even the intelligibility of alternatives." Rationale: Being-

with is Heideggerian and does not block explanation of projects or bad faith. The criticism targets early Sartre's underestimation of structural constraint.

- **B:** False proposition: "It treats social roles as natural essences established by a divine artisan before individuals begin to exist." Correct replacement: "It can understate how oppression, trauma and material structures restrict action and even the intelligibility of alternatives." Rationale: Sartre rejects divinely fixed social essences; bad faith often consists in treating roles that way. The social objection instead concerns oppression narrowing action and intelligibility.
- **C:** Correct proposition: "It can understate how oppression, trauma and material structures restrict action and even the intelligibility of alternatives." Rationale: Marxist, feminist and postcolonial criticisms pressure early abstraction; situated freedom and later social theory partly answer without erasing the problem.
- **D:** False proposition: "It gives material scarcity complete causal power, eliminating responsibility and interpretive agency." Correct replacement: "It can understate how oppression, trauma and material structures restrict action and even the intelligibility of alternatives." Rationale: Giving scarcity total causal power would erase the agency Sartre's later work retains. The criticism asks for conditioned freedom, not complete determinism.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C11 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C11.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 72

---

What is the central epistemic criticism of Kierkegaard's religious leap?

A. The leap is excessively rational because it derives religious faith by necessary steps from a completed logical system. B. The leap abolishes inwardness by making collective agreement the principal criterion of existential truth. C. The leap reduces faith to theoretical observation of present-at-hand objects without personal risk or commitment. D. The leap may become fideistic if passionate commitment lacks adequate rational accountability or publicly assessable limits.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "The leap is excessively rational because it derives religious faith by necessary steps from a completed logical system." Correct replacement: "The leap may become fideistic if passionate commitment lacks adequate rational accountability or publicly assessable limits." Rationale: The leap is criticized for insufficient rational mediation, not excessive derivation from a system. Its epistemic danger is commitment insulated from public reasons.
- **B:** False proposition: "The leap abolishes inwardness by making collective agreement the principal criterion of existential truth." Correct replacement: "The leap may become fideistic if passionate commitment lacks adequate rational accountability or publicly assessable limits." Rationale:

Kierkegaard's leap intensifies inward appropriation rather than abolishing it through collective agreement. Fideism arises when inward passion lacks accountable limits.

- **C:** False proposition: "The leap reduces faith to theoretical observation of present-at-hand objects without personal risk or commitment." Correct replacement: "The leap may become fideistic if passionate commitment lacks adequate rational accountability or publicly assessable limits." Rationale: Faith is not detached observation of present-at-hand objects. It involves risk and commitment, with the criticism focused on rational accountability.
- **D:** Correct proposition: "The leap may become fideistic if passionate commitment lacks adequate rational accountability or publicly assessable limits." Rationale: Kierkegaard replies that reason is limited rather than false, but critics question whether the limit protects faith from responsible evaluation.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C11 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C11.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 73

---

Which comparison of authenticity across Kierkegaard, Sartre and Heidegger is defensible?

A. All three thinkers treat authenticity as withdrawal from social relations, bodily facticity and inherited historical possibilities. B. Kierkegaard and Heidegger make authenticity atheistic self-creation, while Sartre grounds it in a paradoxical relation to God. C. Kierkegaard, Sartre and Heidegger define authenticity as obedience to one universal ethical code established independently of existence. D. Kierkegaard grounds selfhood before God, Sartre opposes bad faith through situated freedom, and Heidegger describes non-moral ownedness of finite possibility.

**Answer: D.**

**Option explanations:**

- **A:** False proposition: "All three thinkers treat authenticity as withdrawal from social relations, bodily facticity and inherited historical possibilities." Correct replacement: "Kierkegaard grounds selfhood before God, Sartre opposes bad faith through situated freedom, and Heidegger describes non-moral ownedness of finite possibility." Rationale: None of the three defines authenticity as wholesale withdrawal from society, body, and history. Each asks for a transformed ownership within concrete existence.
- **B:** False proposition: "Kierkegaard and Heidegger make authenticity atheistic self-creation, while Sartre grounds it in a paradoxical relation to God." Correct replacement: "Kierkegaard grounds selfhood before God, Sartre opposes bad faith through situated freedom, and Heidegger describes non-moral ownedness of finite possibility." Rationale: The God-relation is Kierkegaardian, atheistic self-creation Sartrean, and Heideggerian authenticity is non-moral ownedness. The option assigns each basis to the wrong thinker.

- **C:** False proposition: "Kierkegaard, Sartre and Heidegger define authenticity as obedience to one universal ethical code established independently of existence." Correct replacement: "Kierkegaard grounds selfhood before God, Sartre opposes bad faith through situated freedom, and Heidegger describes non-moral ownedness of finite possibility." Rationale: A single universal ethical code would erase the doctrinal differences among the three. Their accounts concern faith, situated freedom, and finite possibility respectively.
- **D:** Correct proposition: "Kierkegaard grounds selfhood before God, Sartre opposes bad faith through situated freedom, and Heidegger describes non-moral ownedness of finite possibility." Rationale: The shared form is owned existence rather than dispersal, but the grounds are faith, freedom and finitude and must remain distinct.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C11 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C11.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.

## MCQ 74

---

How should the Husserl-Heidegger boundary be handled in the 2018 epoché question?

A. Epoché must be attributed to Heidegger as his method for reaching Dasein before any practical involvement with a world. B. Epoché must be attributed to Sartre because nihilation and phenomenological reduction are two names for one operation. C. Epoché and transcendental reduction must be attributed to Husserl, while primary ownership rests here because Heidegger's being-in-the-world carries the main burden. D. Epoché should be omitted because cross-topic concepts cannot appear in an answer owned by Existentialism.

**Answer: C.**

**Option explanations:**

- **A:** False proposition: "Epoché must be attributed to Heidegger as his method for reaching Dasein before any practical involvement with a world." Correct replacement: "Epoché and transcendental reduction must be attributed to Husserl, while primary ownership rests here because Heidegger's being-in-the-world carries the main burden." Rationale: Epoché is Husserl's method, not Heidegger's route to Dasein. Heidegger's contribution is the rejection of detached reduction through being-in-the-world.
- **B:** False proposition: "Epoché must be attributed to Sartre because nihilation and phenomenological reduction are two names for one operation." Correct replacement: "Epoché and transcendental reduction must be attributed to Husserl, while primary ownership rests here because Heidegger's being-in-the-world carries the main burden." Rationale: Sartrean nihilation and Husserlian reduction are distinct operations. Epoché must remain Husserlian even when the answer's primary burden is Heideggerian.

- **C:** Correct proposition: "Epoché and transcendental reduction must be attributed to Husserl, while primary ownership rests here because Heidegger's being-in-the-world carries the main burden." Rationale: The boundary is explicit: describe Husserl accurately, then explain Heidegger's rejection of a worldless transcendental ego without duplicating Topic 09 ownership.
- **D:** False proposition: "Epoché should be omitted because cross-topic concepts cannot appear in an answer owned by Existentialism." Correct replacement: "Epoché and transcendental reduction must be attributed to Husserl, while primary ownership rests here because Heidegger's being-in-the-world carries the main burden." Rationale: Cross-topic context is necessary because the prompt explicitly asks about epoché and transcendental ego. Ownership follows the dominant Heideggerian comparison, not conceptual isolation.

**Examiner trap:** Do not flatten the named distinction or transfer vocabulary across thinkers.

**Repair action:** Reconstruct C11 in the Revision Guide and explain why the keyed proposition alone preserves the stated relation.

**Coverage mapping:** C11.

**PYQ linkage:** See the Topic 10 ownership table and the nearest thinker-specific demand.
