

SOLVED PRACTICE WORKBOOK

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Imperial Cholas: Delta Core, Temple Power, Oceanic Reach

Topic-specific cover visual for Ancient History 27

Cover visual only. It deliberately combines delta core, temple institution and oceanic connectivity without drawing modern hard borders.

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

Solved topic-specific MCQs

Verified and routed PYQs

PYQ 01 - UPSC Prelims 2020 GS-I (verified stem and event list; official key unavailable locally)

Question: Consider the following events in the history of India:

1. Rise of Pratiharas under King Bhoja
2. Establishment of Pallava power under Mahendravarman-I
3. Establishment of Chola power by Parantaka-I
4. Pala dynasty founded by Gopala

What is the correct chronological order of the above events, starting from the earliest time?

Answer route: Mahendravarman I belongs to the early 7th century, Gopala to the mid-8th century, Bhoja of the Pratiharas to the 9th century, and Parantaka I to the early 10th century.

Model solution: The deduced order is **2 -> 4 -> 1 -> 3**. This PYQ is relevant because the Chola event is not asked in isolation. UPSC tests whether one can place Chola power within wider early-medieval chronology.

Limitation note: Local repository material verifies the stem and event list, but the official answer-key letter was not available locally at validation time because the option text was OCR-garbled in the stored extract.

Why this earns marks: It shows chronology control and places the Cholas inside the larger post-Gupta regionalization process.

PYQ 02 - UPSC GS-I 2022 (exact wording verified locally)

Question: Discuss the main contributions of Gupta period and Chola period to Indian heritage and culture. (Answer in 250 words) 15

Model answer:

The Gupta and Chola periods belong to different regional and chronological worlds, yet both profoundly shaped Indian heritage and culture.

First, the Gupta contribution lay in classical synthesis. In north India, the period saw important developments in sculpture, temple beginnings, Sanskrit court culture and the consolidation of Puranic Hindu traditions. Gupta coinage, inscriptions and art created a durable idiom of kingship and sacred representation.

Second, the Chola contribution was especially strong in the south through mature Dravida architecture, temple-centered institutional life and bronze iconography. Brihadisvara at Thanjavur, Gangaikondacholapuram and Airavatesvara at Darasuram represent monumental temple achievement, while Chola bronzes - especially Nataraja - embody high metal craftsmanship and theological imagination.

Third, both periods shaped intangible heritage. Gupta-era Sanskritic learning and Chola-era Tamil-Sanskrit bilingual culture, bhakti institutionalization and sacred geographies entered long civilizational memory.

However, the contributions differed in texture. Gupta heritage is often associated with classical north Indian cultural synthesis; Chola heritage is marked by temple institutions, agrarian endowments, maritime links and durable regional-cultural power.

Verdict: Together they show that Indian heritage evolved through multiple classical centres, not a single civilizational line.

Why this earns marks: It compares rather than listing randomly, names monuments, distinguishes regions and ends with a civilizational synthesis.

PYQ 03 - UPSC GS-I 2024 (exact wording verified locally)

Question: "Though the great Cholas are no more yet their name is still remembered with great pride because of their highest achievements in the domain of art and architecture." Comment. (Answer in 250 words) 15

Model answer:

The statement is broadly valid because Chola art and architecture transformed political memory into enduring stone and bronze.

The strongest evidence lies in temple architecture. Rajaraja I's Brihadisvara at Thanjavur, Rajendra I's Brihadisvara at Gangaikondacholapuram and Rajaraja II's Airavatesvara at Darasuram together mark the maturity, variation and continuity of Chola monumentality. They combine scale, planning, sculptural detail and durable sacred use; UNESCO's "Great Living Chola Temples" label captures their continued significance.

The second major achievement lies in bronze casting. Chola bronzes, especially Nataraja, represent extraordinary mastery of the lost-wax method. These were not museum pieces but ritual-processional icons embedded in temple life.

Third, art and architecture reflected wider institutions. Great temples were also archives, employers and redistributive centres. Thus Chola art was sustained by agrarian surplus, royal patronage and corporate local society.

Yet pride should not become myth. Chola achievement was not merely aesthetic; it was historical, institutional and regional. Nor should it erase earlier Pallava contributions or later developments.

Conclusion: The Cholas are remembered proudly because their artistic legacy united sacred function, technical excellence and imperial public culture.

Why this earns marks: It converts a quote-based prompt into evidence-backed argument with monument names, bronze example, institutional context and measured qualification.

PYQ 04 - UPSC Prelims 2025 GS-I Set A (exact wording and official key verified locally)

Question: Who among the following led a successful military campaign against the kingdom of Srivijaya, the powerful maritime State, which ruled the Malay Peninsula, Sumatra, Java and the neighbouring islands?

A. Amoghavarsha (Rashtrakuta) B. Prataparudra (Kakatiya) C. Rajendra I (Chola) D. Vishnuvardhana (Hoysala)

Answer: C

Explanation: Rajendra I's 1025 expedition against Srivijaya-linked centres is the classic Chola maritime-power event. It shows a successful coercive strike, but not a durable overseas territorial empire.

Why this earns marks: It combines ruler identification with the required caution on the nature of Chola sea power.

Original broad-coverage MCQs

MCQ 01

Question: Which combination best explains why the Imperial Cholas are treated as a major early-medieval regional empire?

A. Agrarian surplus, conquest, local institutions, temple power and selective maritime reach B. Purely temple-centred art without military activity C. Only maritime trade without agrarian foundations D. Only local democracy without kingship

Answer: A

Explanation: Chola power rested on a fusion of delta agriculture, conquest, temple-centered legitimacy, locality institutions and wider commercial-maritime projection.

MCQ 02

Question: Vijayalaya's historical significance lies primarily in:

A. expelling the Cholas from Sri Lanka B. capturing Thanjavur and establishing the lower Kaveri foothold of the imperial line C. launching the 1025 raid on Srivijaya D. building Airavatesvara temple

Answer: B

Explanation: Vijayalaya is the founder figure who secured Thanjavur and laid the territorial base for later imperial expansion.

MCQ 03

Question: The battle of Takkolam is most important because it:

A. ended Tamil-Sanskrit bilingualism B. destroyed Srivijaya C. marked a major Chola setback before later recovery D. created the Chudamani Vihara

Answer: C

Explanation: The Rashtrakuta victory at Takkolam sharply checked Chola expansion and is the key 10th-century reversal.

MCQ 04

Question: Which ruler is most closely associated with Brihadisvara at Thanjavur and the great imperial survey?

A. Kulottunga II B. Vijayalaya C. Aditya I D. Rajaraja I

Answer: D

Explanation: Rajaraja I anchors both the monumental temple and the survey-based articulation of imperial revenue and control.

MCQ 05

Question: In Chola political geography, the safest description of the Maldives is:

A. campaign or maritime-reach zone, not core territory B. hereditary Chola homeland C. brahmadeya heartland D. permanent province equivalent to the Kaveri delta

Answer: A

Explanation: Evidence supports Chola capture claims, but not treatment of the Maldives as a stable core province.

MCQ 06

Question: Which division became especially important in Chola revenue administration after Rajaraja I?

A. ahara B. valanadu C. janapada D. visaya

Answer: B

Explanation: Valanadu is a high-yield Chola revenue-administrative term, especially in the later 10th and 11th centuries.

MCQ 07

Question: The ur in Chola inscriptions refers primarily to:

A. a bronze-casting guild B. the royal court C. the corporate body of a non-brahmadeya village D. a Southeast Asian trade mission

Answer: C

Explanation: Ur is the village assembly or corporate body of the ordinary village, distinct from sabha and nagaram.

MCQ 08

Question: Which statement best captures the historical importance of the sabha?

A. It was a title used only for kings. B. It was a Buddhist monastery network. C. It was identical to nagaram. D. It was the Brahmana assembly of a brahmadeya settlement with strong committee and fiscal functions.

Answer: D

Explanation: Sabha or mahasabha denotes the Brahmana corporate assembly, especially important in land and committee management.

MCQ 09

Question: The most accurate statement about Uttaramerur is that it:

A. offers detailed procedural evidence for committee selection in a Brahmadeya sabha B. established universal suffrage in all Chola villages C. proves that all social groups participated equally D. records only temple architecture

Answer: A

Explanation: Uttaramerur is a procedural charter-like inscription for committee-based governance within a bounded elite setting.

MCQ 10

Question: Which named committee at Uttaramerur is associated with tank management?

A. Thotta Variyam B. Eri Variyam C. Pon Variyam D. Samvatsara Variyam

Answer: B

Explanation: Eri refers to tank, making Eri Variyam the high-yield committee name for irrigation management.

MCQ 11

Question: Which statement about Chola land surveys is most accurate?

A. They belong only to Sangam times. B. They eliminated local institutions entirely. C. They reveal stronger fiscal articulation while still depending on local implementation. D. They ended temple endowments.

Answer: C

Explanation: Survey evidence indicates state capacity, but the collection and local management still moved through village and nadu-level bodies.

MCQ 12

Question: The term brahmadeya most directly refers to:

A. a sculptural style B. an overseas commercial pact C. a military regiment D. a Brahmana land-grant settlement

Answer: D

Explanation: Brahmadeya settlements are central to Chola agrarian, social and institutional history.

MCQ 13

Question: Which statement best describes the place of vellalas in Chola society?

A. They were major cultivators and powerful local landholders. B. They were marginal forest nomads only. C. They were foreign merchants from Southeast Asia. D. They had no connection to landholding.

Answer: A

Explanation: Vellalas are crucial agrarian elites and must be integrated into any serious account of Chola society.

MCQ 14

Question: Which named royal woman is most closely linked with temple rebuilding and image patronage?

A. Prabhavati Gupta B. Sembiyan Mahadevi C. Didda D. Nur Jahan

Answer: B

Explanation: Sembiyan Mahadevi is the safest and most important named example for Chola female patronage.

MCQ 15

Question: The most secure evidence for Kundavai's public role in this package is:

A. the Mahavamsa's account of Sri Lanka B. a modern novel C. her appearance in the Brihadisvara donor inscriptional record D. the 1025 Srivijaya raid list

Answer: C

Explanation: The IGNCIA inscriptional summary confirms Rajaraja's order to record gifts by Kundavaiyar along with royal and other donors.

MCQ 16

Question: Which statement best defines the Chola temple institution?

A. a foreign merchant office B. only a site of personal devotion C. only a landlord without ritual significance D. a political-economic-cultural institution combining ritual, archive, labour and redistribution

Answer: D

Explanation: Great Chola temples functioned as sacred centres, employers, archives and nodes of redistribution.

MCQ 17

Question: The Great Living Chola Temples UNESCO cluster includes:

A. Thanjavur, Gangaikondacholapuram and Darasuram B. Mahabalipuram, Kanchipuram and Darasuram C. Pattadakal, Badami and Aihole D. Chidambaram, Madurai and Kanchi

Answer: A

Explanation: UNESCO identifies these three as the Great Living Chola Temples.

MCQ 18

Question: Which statement about Chola bronzes is correct?

A. They were detached from temple institutions. B. They were made through the lost-wax process. C. They were carved only in granite. D. They never moved in procession.

Answer: B

Explanation: Chola bronzes are produced by lost-wax casting and were often processional cult images.

MCQ 19

Question: The most balanced statement about Nataraja is that:

A. it proves total Chola political control over India B. it was a Mughal court icon C. the Cholas brought the form to exceptional refinement, though antecedents may be earlier D. it had no theological meaning

Answer: C

Explanation: The Cholas perfected the image, but overclaiming absolute origin ignores earlier evidence and iconographic development.

MCQ 20

Question: Which statement best captures language use in Chola inscriptions and court culture?

A. neither language appears in political texts B. Tamil fully replaced Sanskrit from the beginning C. Sanskrit fully excluded Tamil D. Tamil and Sanskrit functioned in a layered bilingual order

Answer: D

Explanation: Chola cultural politics was bilingual; Sanskrit often carried eulogy while Tamil handled documentation and increasingly more.

MCQ 21

Question: Which guild name is most strongly linked with transregional long-distance trade in the Chola world?

A. Ayyavole / Ainnurruvar B. Licchavi gana C. gana-sangha of the Mallas D. Kula of the Yavanas

Answer: A

Explanation: Ayyavole / Ainnurruvar is the best-known merchant guild with broad operating range in the Chola period.

MCQ 22

Question: Nagapattinam is historically important because it:

A. was the birthplace of Mahendravarman I B. linked port activity, Buddhist patronage and Chola-Srivijaya diplomacy C. served only as a cavalry cantonment D. was the site of Takkolam

Answer: B

Explanation: Nagapattinam connects trade, Buddhist institutions, diplomatic grants and wider maritime networks.

MCQ 23

Question: Which statement about the 1025 expedition is most accurate?

A. It was led by Kulottunga I. B. It created a permanent Chola colony in Java. C. It was a successful maritime strike against Srivijaya-linked targets. D. It ended all trade with Southeast Asia.

Answer: C

Explanation: Rajendra I's expedition demonstrated maritime coercion but not durable overseas territorial rule.

MCQ 24

Question: The safest interpretation of Chola maritime power is that it:

A. proves a modern-style blue-water naval state B. eliminated the need for agrarian revenue C. consisted only of peaceful trade D. combined trade, diplomacy and episodic coercive capability

Answer: D

Explanation: Chola maritime power is best framed as strategic-commercial reach with coercive capacity, not as modern naval imperialism.

MCQ 25

Question: In Sri Lanka, the area most durably integrated into the Chola realm was:

A. the northern Rajarata zone B. the whole island equally C. Rohana alone D. only the western coast

Answer: A

Explanation: Northern Sri Lanka was more durably annexed and provincialized than the southern regions.

MCQ 26

Question: Which statement is correct about the Chudamani Vihara connection?

A. it belongs to Gupta north India B. Rajaraja granted Anaimangalam to the Buddhist establishment at Nagapattinam
C. Rajendra I built it after conquering China D. it proves the absence of war with Srivijaya

Answer: B

Explanation: The Leiden plates and related evidence tie Rajaraja to the grant of Anaimangalam for the Chudamani Vihara at Nagapattinam.

MCQ 27

Question: Which statement best captures the state of evidence on the Chola navy?

A. The navy is better documented than local taxation. B. Detailed ship blueprints are preserved in abundance. C. Maritime capacity is clear, but technical and institutional naval detail remains limited. D. The Cholas never used sea transport.

Answer: C

Explanation: Expeditions to Sri Lanka and Srivijaya confirm capability, but evidence on permanent naval structure remains thin.

MCQ 28

Question: The historian most associated with the strongly imperial and centralized narrative of the Cholas is:

A. B. D. Chattopadhyaya B. Burton Stein C. Noboru Karashima D. K. A. Nilakanta Sastri

Answer: D

Explanation: Sastri's classic narrative emphasizes imperial kingship, campaigns, temples and administrative strength.

MCQ 29

Question: Which statement most closely reflects Burton Stein's intervention?

A. Locality and ritual sovereignty complicate any simple bureaucratic-state model. B. Chola history can be written only from UNESCO reports. C. The Chola state had no kings at all. D. Merchant guilds alone made the empire.

Answer: A

Explanation: Stein highlighted a segmentary pattern of power and warned against projecting a fully centralized bureaucracy backward.

MCQ 30

Question: Why are Karashima and Subbarayalu important for Chola studies?

A. They rejected chronology altogether. B. They pushed close inscription-based reconstruction of offices, taxes and locality structures. C. They denied the existence of all temples. D. They worked only on Mughal India.

Answer: B

Explanation: Their work refines debate through epigraphic detail rather than broad abstract claims alone.

MCQ 31

Question: The best way to describe later Chola decline is:

A. complete end of Tamil political memory B. sudden disappearance after Rajendra I C. multicausal contraction shaped by succession, rivals and regional rebalancing D. immediate conversion of all temples into forts

Answer: C

Explanation: Later Chola weakening came through interacting pressures rather than one decisive collapse event.

MCQ 32

Question: Which concluding statement is most historically sound?

A. The Cholas are only relevant for art history. B. Chola history proves that trade alone creates empire. C. Chola history proves that local assemblies abolish hierarchy. D. The Cholas are best understood as a source-rich early-medieval empire of uneven control, strong agrarian foundations and wide cultural legacy.

Answer: D

Explanation: This conclusion preserves state power, local mediation, agrarian base, uneven frontiers and long afterlife.

Remedial MCQs: trap-focused corrections

Remedial 01

Question: Which statement is the **least** defensible?

A. Chola village institutions were universal modern democracies. B. Uttaramerur shows procedural sophistication. C. Chola inscriptions need source criticism. D. Rajendra's raid had commercial-strategic meaning.

Answer: A

Explanation: This is the classic trap. Uttaramerur reveals elite participatory governance inside hierarchy, not modern universal democracy.

Remedial 02

Question: Which statement is safest regarding Chola maritime power?

A. It had no relation to merchant guilds. B. It must be separated into trade, diplomacy and coercion, not turned into a modern nation-state navy. C. It had nothing to do with Sri Lanka. D. It began only with European ships.

Answer: B

Explanation: The best corrective is to refuse presentism while still recognising real maritime capacity.

Remedial 03

Question: Which description of the Chola temple is most misleading?

A. a redistributive node B. a monument of political legitimacy C. a purely artistic object unrelated to agrarian endowment and labour D. an archive and ritual centre

Answer: C

Explanation: Temples must be treated as institutions embedded in surplus, labour and political symbolism.

Remedial 04

Question: Which statement best corrects the "segmentary state only" oversimplification?

A. Merchant guilds replaced the king. B. Local bodies did not exist. C. Chola rulers never conducted surveys. D. Evidence also shows surveys, offices, campaigning and direct intervention by kings.

Answer: D

Explanation: A balanced answer recognises both local corporate strength and clear signs of centralized initiative.

Remedial 05

Question: Which statement about Chola-Srivijaya relations is least accurate?

A. one raid proves a permanent Chola colony in Southeast Asia B. diplomacy and conflict could coexist C. Nagapattinam links Buddhist patronage with maritime networks D. Kulottunga's confirmation matters for continuity

Answer: A

Explanation: The 1025 strike was significant, but there is no basis for claiming a durable overseas colony.

Remedial 06

Question: Which statement best corrects a simplistic caste reading?

A. Chola society fits a rigid four-varna chart perfectly. B. Vellalas were major cultivators and local elites despite textual Shudra labeling. C. Only Brahmanas mattered in the Chola countryside. D. No occupational segregation is visible.

Answer: B

Explanation: Regional status and landed power complicate textbook varna schemes; vellalas are the clearest example.

Remedial 07

Question: Which statement best corrects an art-only reading of the Cholas?

A. Architecture can be separated from state formation. B. Brihadisvara matters only for sculpture. C. Monumental temples also reveal donor records, labour, endowment and kingship. D. Bronze icons had no ritual role.

Answer: C

Explanation: Chola monuments must be read institutionally as well as aesthetically.

Remedial 08

Question: Which statement best illustrates chronological compression in Chola studies?

A. Rajendra I followed Rajaraja I. B. Vijayalaya belongs before Rajaraja I in the building of Chola power. C. Takkolam belongs before Rajaraja I's imperial high point. D. Kamban and Rajaraja belong to exactly the same court moment without qualification.

Answer: D

Explanation: Many weak answers collapse later Chola literary flowering into Rajaraja's exact moment without qualification; this is a classic chronology trap.

Remedial 09

Question: Which statement most needs rejection in map-based answers?

A. Southeast Asia can be shaded as a stable Chola province. B. The Kaveri delta was the core. C. Northern Sri Lanka was more durably held than the south. D. Tondaimandalam mattered strategically.

Answer: A

Explanation: Campaign or commercial reach must not be shaded as permanent provincial control.

Remedial 10

Question: Which summary best corrects overstatement in Chola decline narratives?

A. Chola relevance ended in the 11th century. B. Decline is best treated as political contraction plus long institutional afterlife. C. The empire vanished overnight for one reason only. D. Temple and inscriptional legacies disappeared instantly.

Answer: B

Explanation: Later Chola decline should be written as multicausal transformation with strong cultural and institutional legacy.

Original solved Mains questions

Mains 01 - 10 marks - Answer in 150 words

Question: "The Kaveri delta, not the open sea, was the real engine of Chola power." Discuss.

Model answer:

The statement is substantially correct. The Cholas became a major early-medieval power because the Kaveri delta generated the surplus that sustained war, temples and administration.

First, delta ecology enabled wet-rice intensification through channels, tanks and branch-river systems. This produced dense settlements, grain assignments and dependable taxation.

Second, the political core of Thanjavur and later Gangaikondacholapuram stood inside this productive zone. Great temples such as Brihadisvara were possible because endowments could be tied to named villages and fields.

Third, maritime activity itself depended on this inland base. Ports, guilds and naval expeditions required food, labour, craft production and fiscal backing.

However, the sea still mattered. Rajendra I's Srivijaya raid and the Sri Lankan campaigns show that the Cholas could project force outward.

Verdict: Chola maritime reach was real, but it rested on the agrarian depth of the Kaveri delta.

Why this earns marks: It states the claim, provides mechanism, concedes the role of the sea and ends with a balanced verdict.

Mains 02 - 10 marks - Answer in 150 words

Question: How far does Uttaramerur justify the claim that the Cholas practised local self-government?

Model answer:

Uttaramerur strongly supports the claim that the Cholas recognised structured local self-management, but only with major qualifications.

In support, the inscriptions describe a clear committee system, public lot-drawing through kudavolai, age rules, qualifications, disqualifications and accountability for office-holders. This shows procedural sophistication.

However, Uttaramerur was a Brahmadeya settlement. Eligibility depended on land, house site, scriptural competence and moral standing. Those who failed to render accounts, their close relatives and other excluded groups could not participate.

Therefore, the inscription does not prove universal village democracy. It reveals elite participatory governance within a socially restricted corporate body.

Conclusion: Uttaramerur is excellent evidence of local self-government in a limited, stratified institutional sense - not of modern democratic equality.

Why this earns marks: It gives both the positive and the qualifying half of the answer, which is where most candidates lose marks.

Mains 03 - 15 marks - Answer in 250 words

Question: Temples were central to Chola state formation. Examine.

Model answer:

Temples were central to Chola state formation, though not in an all-controlling sense.

At the ideological level, temples transformed royal conquest into visible sacred legitimacy. Rajaraja I's Brihadisvara, also called Rajarajeshvara, monumentalised imperial authority. Tripurantaka and other Shaiva imagery connected kingship with victory and cosmic order.

At the agrarian level, temples received land endowments, grain assignments and tax-linked support from villages. This tied local surplus to royal and elite religious projects.

At the administrative level, inscriptions on temple walls recorded gifts, offices, salaries, committee decisions and service obligations. Temples functioned as public archives.

At the social-economic level, great temples employed priests, dancers, guards, accountants, artisans and other service groups. Festivals redistributed resources and integrated town and countryside.

However, it would be wrong to say temples controlled the whole economy. Merchant guilds, nagarams, nattar and royal officers retained distinct roles, and not all production or exchange moved through temples.

Verdict: Chola temples were central because they linked kingship, agrarian surplus, public record and social labour, but they were one powerful node within a broader state-society network.

Why this earns marks: It organizes the answer by function, names Brihadisvara, and adds the required limitation instead of overclaiming.

Mains 04 - 15 marks - Answer in 250 words

Question: Assess the role of merchant guilds in the Chola economy.

Model answer:

Merchant guilds were highly important in the Chola economy, but their role must be assessed in relation to agrarian surplus and state structures rather than as a separate commercial universe.

First, guilds such as Ayyavole / Ainnurruvar, Manigramam, Nanadesi and Anjuvannam gave the Chola world transregional commercial reach. Their activities connect inland markets, port towns, craft production and overseas circuits.

Second, they participated in temple endowments, agreements and property transactions. This shows that commerce, religion and public institutions overlapped.

Third, guilds helped connect the Kaveri agrarian core to Bay of Bengal routes. Ports such as Nagapattinam make sense only when inland production, merchant organization and maritime exchange are brought together.

Yet their role must not be exaggerated. Strong guilds do not prove that the Chola economy was driven by trade alone, nor do they show that all maritime activity was directed by the state. Grain assignments, tax extraction, village institutions and temple demand remained fundamental.

Verdict: Merchant guilds were powerful connectors and multipliers within the Chola economy, but they rested on - and did not replace - the agrarian core.

Why this earns marks: It avoids the false choice between "agrarian economy" and "commercial economy" and gives named guilds as evidence.

Mains 05 - 20 marks - Answer in 250 words

Question: Discuss the nature of Chola maritime power with special reference to Sri Lanka and the 1025 expedition against Srivijaya.

Model answer:

Chola maritime power was real, strategically significant and historically unusual in scale for early-medieval India, but it should not be described in modern imperial-naval terms.

Sri Lanka provides the clearest evidence of sustained maritime campaigning. Rajaraja I attacked the island, destroyed Anuradhapura and annexed Rajarata in the north. Rajendra I continued intervention. This shows that Chola rulers could mobilize shipping, provisioning and military coordination across the sea. Yet southern Sri Lanka remained less securely controlled, and Vijayabahu I eventually expelled the Cholas by 1070.

The 1025 expedition against Srivijaya demonstrates another dimension. Rajendra I's forces struck Srivijaya-linked ports such as Kadaram. The likely motives were prestige, strategic control over trade routes and commercial competition. This was a coercive maritime projection into the Bay of Bengal world.

However, both episodes must be qualified. Sri Lanka was not uniformly controlled; Srivijaya was raided, not permanently colonised. Evidence on ships and formal naval institutions remains limited compared to the rich inscriptional celebration of victory.

Conclusion: Chola maritime power combined transport capacity, coastal-military coordination, strategic commerce and selective coercion. It was stronger than a mere trading presence, but far short of a modern overseas empire.

Why this earns marks: It divides the answer into Sri Lanka, Srivijaya, limitation and verdict - the most scorer-friendly structure.

Mains 06 - 20 marks - Answer in 250 words

Question: Critically examine the major historiographical debates on the Chola state.

Model answer:

The Chola state has generated one of the richest historiographical debates in Indian history because the evidence supports both strong kingship and strong local corporate power.

K. A. Nilakanta Sastri's classic view highlights imperial expansion, ambitious kings, impressive administration, temple-building and maritime achievements. This view captures the scale of Chola power and remains useful for narrative structure.

Burton Stein's segmentary-state model shifted attention to ritual sovereignty, peasant society and the autonomy of locality institutions such as nadu and sabha. His intervention was valuable because it warned historians against reading the Cholas as a modern bureaucratic state.

Inscription-led scholars such as Noboru Karashima and Y. Subbarayalu complicated both views. Their close studies of revenue terms, offices, local divisions, surveys and temporal change show that the Chola polity could centralize in some respects while still depending heavily on local corporate mediation.

A critical synthesis is therefore necessary. Pure centralisation ignores locality; pure segmentary interpretation underplays surveys, campaigns, officials and direct royal intervention.

Verdict: The Chola state is best understood as a negotiated imperial formation - coercive and expansive at the top, but articulated through locally embedded institutions below.

Why this earns marks: It names the major historians, states what each contributes, and ends with an evidence-linked synthetic verdict.
