

COMPLETE LEARNING SESSION

Salient Features and Diversity of Indian Society - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / SESSION INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Salient Features and Diversity of Indian Society - Learner-v2 Complete Learning Session 6

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT 6

BASIC LEARNING SESSION 6

DEEP-REVIEW LEARNING CONTRACT 6

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL 7

SESSION 1 - FOUNDATION - How to read Indian diversity 8

SESSION 2 - FOUNDATION - Diversity, plurality, disparity and marginality 9

SESSION 3 - FOUNDATION - The linguistic layer and its recognition 11

SESSION 4 - CORE - Counting language and identity 12

SESSION 5 - CORE - The scale of recognised historical exclusion 13

SESSION 6 - CORE - Identity without biological race 14

SESSION 7 - CORE - Cross-cutting cleavages 16

SESSION 8 - CORE - Reinforcing cleavages 17

SESSION 9 - CORE - Syncretism and composite culture 18

SESSION 10 - CORE - Everyday civic integration 19

SESSION 11 - CORE - The sharpest reinforcing case 20

SESSION 12 - CORE - Boundary cases that break the correlation 22

SESSION 13 - CORE SYNTHESIS - Accommodation as the continuity mechanism 23

SESSION 14 - CORE SYNTHESIS - Recognition, redistribution and causation 24

SESSION 15 - CORE SYNTHESIS - Measurement boundary and the complete answer spine 26

INDIAN SOCIETY DEEP-REVIEW CORE CONTROL 35

BASIC MCQS / REMEDIATION 35

Q1. Which statement correctly identifies Five diversity axes? 35

Q2. Which chronology card should be filed under Five diversity axes? 35

Q3. Which option preserves the source-bounded meaning of Five diversity axes? 36

Q4. Which statement avoids a close-option trap about Five diversity axes? 36

Q5. Which statement correctly identifies Diversity versus plurality? 36

Q6. Which chronology card should be filed under Diversity versus plurality? 36

Q7. Which option preserves the source-bounded meaning of Diversity versus plurality? 37

Q8. Which statement avoids a close-option trap about Diversity versus plurality?	37
Q9. Which statement correctly identifies Disparity versus marginality?	37
Q10. Which chronology card should be filed under Disparity versus marginality?	37
Q11. Which option preserves the source-bounded meaning of Disparity versus marginality?	38
Q12. Which statement avoids a close-option trap about Disparity versus marginality?	38
Q13. Which statement correctly identifies Four language families?	38
Q14. Which chronology card should be filed under Four language families?	38
Q15. Which option preserves the source-bounded meaning of Four language families?	39
Q16. Which statement avoids a close-option trap about Four language families?	39
Q17. Which statement correctly identifies Eighth Schedule listing?	39
Q18. Which chronology card should be filed under Eighth Schedule listing?	39
Q19. Which option preserves the source-bounded meaning of Eighth Schedule listing?	40
Q20. Which statement avoids a close-option trap about Eighth Schedule listing?	40
Q21. Which statement correctly identifies Census 2011 mother-tongue rationalisation?	40
Q22. Which chronology card should be filed under Census 2011 mother-tongue rationalisation?	40
Q23. Which option preserves the source-bounded meaning of Census 2011 mother-tongue rationalisation?	41
Q24. Which statement avoids a close-option trap about Census 2011 mother-tongue rationalisation?	41
Q25. Which statement correctly identifies Census 2011 Scheduled stocks?	41
Q26. Which chronology card should be filed under Census 2011 Scheduled stocks?	41
Q27. Which option preserves the source-bounded meaning of Census 2011 Scheduled stocks?	42
Q28. Which statement avoids a close-option trap about Census 2011 Scheduled stocks?	42
Q29. Which statement correctly identifies No biological race classification?	42
Q30. Which chronology card should be filed under No biological race classification?	42
Q31. Which option preserves the source-bounded meaning of No biological race classification?	43
Q32. Which statement avoids a close-option trap about No biological race classification?	43
Q33. Which statement correctly identifies Cross-cutting cleavage?	43
Q34. Which chronology card should be filed under Cross-cutting cleavage?	43
Q35. Which option preserves the source-bounded meaning of Cross-cutting cleavage?	44
Q36. Which statement avoids a close-option trap about Cross-cutting cleavage?	44
Q37. Which statement correctly identifies Reinforcing cleavage?	44
Q38. Which chronology card should be filed under Reinforcing cleavage?	44
Q39. Which option preserves the source-bounded meaning of Reinforcing cleavage?	45

Q40. Which statement avoids a close-option trap about Reinforcing cleavage?	45
Q41. Which statement correctly identifies Syncretic integrative traditions?	45
Q42. Which chronology card should be filed under Syncretic integrative traditions?	45
Q43. Which option preserves the source-bounded meaning of Syncretic integrative traditions?	46
Q44. Which statement avoids a close-option trap about Syncretic integrative traditions?	46
Q45. Which statement correctly identifies Everyday civic integration?	46
Q46. Which chronology card should be filed under Everyday civic integration?	46
Q47. Which option preserves the source-bounded meaning of Everyday civic integration?	47
Q48. Which statement avoids a close-option trap about Everyday civic integration?	47
Q49. Which statement correctly identifies Particularly Vulnerable Tribal Groups?	47

Salient Features and Diversity of Indian Society - Learner-v2

Complete Learning Session

Authoring-only generation: 2026-09-02. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-02.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. The OCR-searchable official General Studies Paper-I question papers held under books\mains and books\more_previous_papers were used only to confirm the wording of routed Mains PYQs. No official answer key, marking scheme, page precision or unsupported quotation was imported from them.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** Two direct General Studies Paper-I demands are verified for this owner from the audited routing ledgers and confirmed word for word in the locally held official question papers: 2024 GS-I Q20 and 2019 GS-I Q8. The 2019 demand is routed in the ledger to the Advanced owner while the Core owner records that Core routing supersedes it; both are therefore answered here from the Basic spine. The generated 2018-2023 Prelims block additionally routes two 2023 objective items on national sports awards and the Chess Olympiad mascot and trophies. Those are documented current-affairs routing artefacts with no Indian Society content, their official keys are not held locally, and this package neither claims them nor infers an option for them.
- **Live-link boundary:** No additional live official item was verified for this topic on 2026-09-02. The package uses only the dated official anchors already carried by the repository owners: the Ministry of Tribal Affairs state-wise Particularly Vulnerable Tribal Groups list dated 9 July 2024, Gazette S.O. 2681(E) dated 16 June 2025 fixing Census 2027 reference dates, the Press Information Bureau announcement of 30 April 2025 confirming caste enumeration, and Census 2011 as the last completed full count. No caste, demographic or district figure is invented, and the Census 2027 exercise is described only as prospective.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Indian Society Basic/Core is answer-complete before optional Advanced depth.
Concept method	Define and distinguish the institution, identity, process, legal category and measured indicator before analysis.
Sociological method	Structure/institution -> mechanism and agency -> differentiated group/region outcome -> feedback, resistance and qualification.
Evidence method	Claim -> named Indian community/region/institution/dataset -> analysis -> source-date-status or causal qualification.
Non-homogenisation	Caste, tribe, women, religion, region and rural/urban groups retain internal class, gender, locality and historical variation.
Boundary method	Constitutional right, statutory mandate, executive scheme, implementation and lived social outcome remain distinct.
Practice contract	Every solved item has demand decoding, a detailed examiner-grade model, executable timed/compression plan, marks rationale and answer-specific improvement.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner: upsc-ai-kit\knowledge\Indian-Society\basic\01_Salient-Features-and-Diversity-of-Indian-Society.md **Canonical topic owner:** upsc-ai-kit\knowledge\Indian-Society\basic\01_Salient-Features-and-Diversity-of-Indian-Society.md **Optional Advanced owner:** upsc-ai-kit\knowledge\Indian-Society\advanced\01_Salient-Features-and-Diversity-of-Indian-Society.md **Official syllabus mapping:** upsc-ai-kit\knowledge\Indian-Society\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- **Definition discipline:** close concepts and legal-administrative categories share a comparison axis and are never treated as synonyms.
- **Mechanism discipline:** correlation, temporal sequence and aggregate association do not establish causation; identify institutions, incentives, norms, power and agency.
- **Historical discipline:** colonial, constitutional, developmental, liberalisation and contemporary phases are separated without a linear tradition-to-modernity story.
- **Intersectional discipline:** overlapping caste, tribe, class, gender, religion, disability, region and life-course positions are analysed without creating a single homogeneous category.
- **India discipline:** use named communities, movements, institutions, cities, states and regional contrasts without stereotyping or treating one case as nationally representative.
- **Data discipline:** Census 2011, NFHS, PLFS, SRS, Agriculture Census, MPI and scheme claims retain source, reference period, release date, coverage and provisional/final status.
- **PYQ discipline:** repository routing ledgers and locally held papers control wording and metadata; reconstructed wording and unavailable official keys remain labelled.
- **Current-status note, rechecked 2026-09-05:** Rechecked 2026-09-05: Census 2011 remains the latest completed full Census and its Language Paper/atlas controls language counts; PIB's Census 2027 notice fixes 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere and records caste enumeration as prospective; the Ministry of Tribal Affairs list dated 9 July 2024 records 75 PVTGs in 18 States and one Union Territory. No forthcoming Census result or undated community statistic is used.

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - How to read Indian diversity

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: How to read Indian diversity is the part of Salient Features and Diversity of Indian Society that explains how Five diversity axes fit into one examinable social relationship.

Technical definition: In sociological analysis, How to read Indian diversity denotes the source-bounded relationship among Five diversity axes, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

How to read Indian diversity should be analysed as a relation among Five diversity axes, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- read
- diversity
- Five
- axes
- runs
- along

How to use them: Define read, diversity, Five; cite axes as named evidence; then apply this qualification: Difference is a fact; cohesion is an outcome that depends on how the axes interact. Conclude by showing how the distinction supports this answer route: Open any diversity answer with the axis structure rather than a list of adjectives..

VISUAL FIRST

HOW TO READ INDIAN DIVERSITY

01. Five diversity axes

BOUNDARY -> Difference is a fact; cohesion is an outcome that depends on how the axes interact.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other.

NAMED EVIDENCE AND MECHANISM

- Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other.

EXAMINER CAUTION

- Difference is a fact; cohesion is an outcome that depends on how the axes interact.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to How to read Indian diversity.
- **Mains:** Open any diversity answer with the axis structure rather than a list of adjectives.

MINI RECAP

- **Evidence chain:** Five diversity axes
- **Qualified use:** Open any diversity answer with the axis structure rather than a list of adjectives.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS read diversity Five axes runs along	2. MECHANISM / ARGUMENT relate Five diversity axes through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that open any diversity answer with the axis structure rather than a list of adjectives.	4. UPSC TRAP / ANSWER-USE LIMIT: Difference is a fact; cohesion is an outcome that depends on how the axes interact.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: How to read Indian diversity converts named social evidence into a qualified argument			

SESSION 2 - FOUNDATION - Diversity, plurality, disparity and marginality

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Diversity, plurality, disparity and marginality is the part of Salient Features and Diversity of Indian Society that explains how Diversity versus plurality and Disparity versus marginality fit into one examinable social relationship.

Technical definition: In sociological analysis, Diversity, plurality, disparity and marginality denotes the source-bounded relationship among Diversity versus plurality and Disparity versus marginality, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Diversity, plurality, disparity and marginality should be analysed as a relation among Diversity versus plurality and Disparity versus marginality, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Diversity
- plurality
- disparity
- marginality
- versus
- objective

How to use them: Define Diversity, plurality, disparity; cite marginality as named evidence; then apply this qualification: Each term prevents a specific error, so the four must be kept apart under time pressure. Conclude by showing how the distinction supports this answer route: Convert a definitional demand into four precise, example-backed distinctions..

VISUAL FIRST

DIVERSITY, PLURALITY, DISPARITY AND MARGINALITY

01. Diversity versus plurality

|
v

02. Disparity versus marginality

BOUNDARY -> Each term prevents a specific error, so the four must be kept apart under time pressure.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference.

NAMED EVIDENCE AND MECHANISM

- Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance.
- Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference.

EXAMINER CAUTION

- Each term prevents a specific error, so the four must be kept apart under time pressure.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Diversity, plurality, disparity and marginality.
- **Mains:** Convert a definitional demand into four precise, example-backed distinctions.

MINI RECAP

- **Evidence chain:** Diversity versus plurality -> Disparity versus marginality
- **Qualified use:** Convert a definitional demand into four precise, example-backed distinctions.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Diversity plurality disparity marginality versus objective	2. MECHANISM / ARGUMENT relate Diversity versus plurality and Disparity versus marginality through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that convert a definitional demand into four precise, example-backed distinctions.	4. UPSC TRAP / ANSWER-USE LIMIT: Each term prevents a specific error, so the four must be kept apart under time pressure.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Diversity, plurality, disparity and marginality converts named social evidence into a qualified argument			

SESSION 3 - FOUNDATION - The linguistic layer and its recognition

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The linguistic layer and its recognition is the part of Salient Features and Diversity of Indian Society that explains how Four language families and Eighth Schedule listing fit into one examinable social relationship.

Technical definition: In sociological analysis, The linguistic layer and its recognition denotes the source-bounded relationship among Four language families and Eighth Schedule listing, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The linguistic layer and its recognition should be analysed as a relation among Four language families and Eighth Schedule listing, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- linguistic
- layer
- recognition
- Four
- language
- families

How to use them: Define linguistic, layer, recognition; cite Four as named evidence; then apply this qualification: The four-family shorthand is a teaching device, not an exhaustive taxonomy. Conclude by showing how the distinction supports this answer route: Supply the recognition half of a continuity or accommodation argument..

VISUAL FIRST

THE LINGUISTIC LAYER AND ITS RECOGNITION

01. Four language families

|
v

02. Eighth Schedule listing

BOUNDARY -> The four-family shorthand is a teaching device, not an exhaustive taxonomy.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence.

NAMED EVIDENCE AND MECHANISM

- Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language.
- The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence.

EXAMINER CAUTION

- The four-family shorthand is a teaching device, not an exhaustive taxonomy.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to The linguistic layer and its recognition.
- **Mains:** Supply the recognition half of a continuity or accommodation argument.

MINI RECAP

- **Evidence chain:** Four language families -> Eighth Schedule listing
- **Qualified use:** Supply the recognition half of a continuity or accommodation argument.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS linguistic layer recognition Four language families	2. MECHANISM / ARGUMENT relate Four language families and Eighth Schedule listing through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that supply the recognition half of a continuity or accommodation argument.	4. UPSC TRAP / ANSWER-USE LIMIT: The four-family shorthand is a teaching device, not an exhaustive taxonomy.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The linguistic layer and its recognition converts named social evidence into a qualified argument			

SESSION 4 - CORE - Counting language and identity

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Counting language and identity is the part of Salient Features and Diversity of Indian Society that explains how Census 2011 mother-tongue rationalisation fit into one examinable social relationship.

Technical definition: In sociological analysis, Counting language and identity denotes the source-bounded relationship among Census 2011 mother-tongue rationalisation, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Counting language and identity should be analysed as a relation among Census 2011 mother-tongue rationalisation, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Counting
- language
- identity
- Census
- mother-tongue
- rationalisation

How to use them: Define Counting, language, identity; cite Census as named evidence; then apply this qualification: A rationalised Census figure is a measurement decision, not a natural count of languages. Conclude by showing how the distinction supports this answer route: Give the scale evidence that a diversity answer needs to stop being adjectival..

VISUAL FIRST

COUNTING LANGUAGE AND IDENTITY

01. Census 2011 mother-tongue rationalisation

BOUNDARY -> A rationalised Census figure is a measurement decision, not a natural count of languages.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth.

NAMED EVIDENCE AND MECHANISM

- Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth.

EXAMINER CAUTION

- A rationalised Census figure is a measurement decision, not a natural count of languages.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Counting language and identity.
- **Mains:** Give the scale evidence that a diversity answer needs to stop being adjectival.

MINI RECAP

- **Evidence chain:** Census 2011 mother-tongue rationalisation
- **Qualified use:** Give the scale evidence that a diversity answer needs to stop being adjectival.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Counting language identity Census mother-tongue rationalisation	2. MECHANISM / ARGUMENT relate Census 2011 mother-tongue rationalisation through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that give the scale evidence that a diversity answer needs to stop being adjectival.	4. UPSC TRAP / ANSWER-USE LIMIT: A rationalised Census figure is a measurement decision, not a natural count of languages.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Counting language and identity converts named social evidence into a qualified argument			

SESSION 5 - CORE - The scale of recognised historical exclusion

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The scale of recognised historical exclusion is the part of Salient Features and Diversity of Indian Society that explains how Census 2011 Scheduled stocks fit into one examinable social relationship.

Technical definition: In sociological analysis, The scale of recognised historical exclusion denotes the source-bounded relationship among Census 2011 Scheduled stocks, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The scale of recognised historical exclusion should be analysed as a relation among Census 2011 Scheduled stocks, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- scale
- recognised
- historical
- exclusion

- **Census**
- **Scheduled**

How to use them: Define scale, recognised, historical; cite exclusion as named evidence; then apply this qualification: Census 2011 shares are a stock from the last completed full count, not a current estimate. Conclude by showing how the distinction supports this answer route: Show that diversity questions are simultaneously distribution questions..

VISUAL FIRST

THE SCALE OF RECOGNISED HISTORICAL EXCLUSION

01. Census 2011 Scheduled stocks

BOUNDARY -> Census 2011 shares are a stock from the last completed full count, not a current estimate.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions.

NAMED EVIDENCE AND MECHANISM

- At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions.

EXAMINER CAUTION

- Census 2011 shares are a stock from the last completed full count, not a current estimate.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to The scale of recognised historical exclusion.
- **Mains:** Show that diversity questions are simultaneously distribution questions.

MINI RECAP

- **Evidence chain:** Census 2011 Scheduled stocks
- **Qualified use:** Show that diversity questions are simultaneously distribution questions.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS scale recognised historical exclusion Census Scheduled	2. MECHANISM / ARGUMENT relate Census 2011 Scheduled stocks through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that show that diversity questions are simultaneously distribution questions.	4. UPSC TRAP / ANSWER-USE LIMIT: Census 2011 shares are a stock from the last completed full count, not a current estimate.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The scale of recognised historical exclusion converts named social evidence into a qualified argument			

SESSION 6 - CORE - Identity without biological race

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Identity without biological race is the part of Salient Features and Diversity of Indian Society that explains how No biological race classification fit into one examinable social relationship.

Technical definition: In sociological analysis, Identity without biological race denotes the source-bounded relationship among No biological race classification, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Identity without biological race should be analysed as a relation among No biological race classification, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Identity
- biological
- race
- classification
- Older
- physical-anthropology

How to use them: Define Identity, biological, race; cite classification as named evidence; then apply this qualification: Older anthropological labels are not a sound description of contemporary society. Conclude by showing how the distinction supports this answer route: Protect an answer from a discredited framing that examiners penalise..

VISUAL FIRST

IDENTITY WITHOUT BIOLOGICAL RACE

01. No biological race classification

BOUNDARY -> Older anthropological labels are not a sound description of contemporary society.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead.

NAMED EVIDENCE AND MECHANISM

- Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead.

EXAMINER CAUTION

- Older anthropological labels are not a sound description of contemporary society.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Identity without biological race.
- **Mains:** Protect an answer from a discredited framing that examiners penalise.

MINI RECAP

- **Evidence chain:** No biological race classification
- **Qualified use:** Protect an answer from a discredited framing that examiners penalise.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Identity biological race classification Older physical-anthropology	2. MECHANISM / ARGUMENT relate No biological race classification through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that protect an answer from a discredited framing that examiners penalise.	4. UPSC TRAP / ANSWER-USE LIMIT: Older anthropological labels are not a sound description of contemporary society.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Identity without biological race converts named social evidence into a qualified argument			

SESSION 7 - CORE - Cross-cutting cleavages

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Cross-cutting cleavages is the part of Salient Features and Diversity of Indian Society that explains how Cross-cutting cleavage fit into one examinable social relationship.

Technical definition: In sociological analysis, Cross-cutting cleavages denotes the source-bounded relationship among Cross-cutting cleavage, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Cross-cutting cleavages should be analysed as a relation among Cross-cutting cleavage, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Cross-cutting
- cleavages
- cleavage
- identity
- axes
- align

How to use them: Define Cross-cutting, cleavages, cleavage; cite identity as named evidence; then apply this qualification: Cross-cutting reduces the intensity of conflict but does not guarantee harmony. Conclude by showing how the distinction supports this answer route: Build the analytical device that decides when the correlation fails..

VISUAL FIRST

CROSS-CUTTING CLEAVAGES

01. Cross-cutting cleavage

BOUNDARY -> Cross-cutting reduces the intensity of conflict but does not guarantee harmony.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense.

NAMED EVIDENCE AND MECHANISM

- Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense.

EXAMINER CAUTION

- Cross-cutting reduces the intensity of conflict but does not guarantee harmony.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Cross-cutting cleavages.
- **Mains:** Build the analytical device that decides when the correlation fails.

MINI RECAP

- **Evidence chain:** Cross-cutting cleavage
- **Qualified use:** Build the analytical device that decides when the correlation fails.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS Cross-cutting cleavages cleavage identity axes align	2. MECHANISM / ARGUMENT relate Cross-cutting cleavage through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that build the analytical device that decides when the correlation fails.	4. UPSC TRAP / ANSWER-USE LIMIT: Cross-cutting reduces the intensity of conflict but does not guarantee harmony.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Cross-cutting cleavages converts named social evidence into a qualified argument			

SESSION 8 - CORE - Reinforcing cleavages

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Reinforcing cleavages is the part of Salient Features and Diversity of Indian Society that explains how Reinforcing cleavage fit into one examinable social relationship.

Technical definition: In sociological analysis, Reinforcing cleavages denotes the source-bounded relationship among Reinforcing cleavage, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Reinforcing cleavages should be analysed as a relation among Reinforcing cleavage, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Reinforcing
- cleavages
- cleavage
- remoteness
- literacy
- asset-poverty

How to use them: Define Reinforcing, cleavages, cleavage; cite remoteness as named evidence; then apply this qualification: Reinforcement is a household-level stacking of disadvantage, not a group stereotype. Conclude by showing how the distinction supports this answer route: Build the analytical device that decides when the correlation holds..

VISUAL FIRST

REINFORCING CLEAVAGES

01. Reinforcing cleavage

BOUNDARY -> Reinforcement is a household-level stacking of disadvantage, not a group stereotype.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong.

NAMED EVIDENCE AND MECHANISM

- Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong.

EXAMINER CAUTION

- Reinforcement is a household-level stacking of disadvantage, not a group stereotype.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Reinforcing cleavages.
- **Mains:** Build the analytical device that decides when the correlation holds.

MINI RECAP

- **Qualified use:** Build the analytical device that decides when the correlation holds.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Reinforcing cleavages cleavage remoteness literacy asset-poverty	2. MECHANISM / ARGUMENT relate Reinforcing cleavage through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that build the analytical device that decides when the correlation holds.	4. UPSC TRAP / ANSWER-USE LIMIT: Reinforcement is a household-level stacking of disadvantage, not a group stereotype.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Reinforcing cleavages converts named social evidence into a qualified argument			

SESSION 9 - CORE - Syncretism and composite culture

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Syncretism and composite culture is the part of Salient Features and Diversity of Indian Society that explains how Syncretic integrative traditions fit into one examinable social relationship.

Technical definition: In sociological analysis, Syncretism and composite culture denotes the source-bounded relationship among Syncretic integrative traditions, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Syncretism and composite culture should be analysed as a relation among Syncretic integrative traditions, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **Syncretism**
- **composite**
- **culture**
- **Syncretic**
- **integrative**
- **traditions**

How to use them: Define Syncretism, composite, culture; cite Syncretic as named evidence; then apply this qualification: Composite culture describes interwoven practice, not proof of uniform social mixing. Conclude by showing how the distinction supports this answer route: Supply the named integrative evidence that a cohesion answer requires..

VISUAL FIRST

SYNCRETISM AND COMPOSITE CULTURE

01. Syncretic integrative traditions

BOUNDARY -> Composite culture describes interwoven practice, not proof of uniform social mixing.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region.

NAMED EVIDENCE AND MECHANISM

- Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region.

EXAMINER CAUTION

- Composite culture describes interwoven practice, not proof of uniform social mixing.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Syncretism and composite culture.
- **Mains:** Supply the named integrative evidence that a cohesion answer requires.

MINI RECAP

- **Evidence chain:** Syncretic integrative traditions
- **Qualified use:** Supply the named integrative evidence that a cohesion answer requires.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Syncretism composite culture Syncretic integrative traditions	2. CONSEQUENCE / CONTRAST This relation supports the answer route that supply the named integrative evidence that a cohesion answer requires.	4. UPSC TRAP / ANSWER-USE LIMIT: Composite culture describes interwoven practice, not proof of uniform social mixing.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Syncretism and composite culture converts named social evidence into a qualified argument			

SESSION 10 - CORE - Everyday civic integration

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Everyday civic integration is the part of Salient Features and Diversity of Indian Society that explains how Everyday civic integration fit into one examinable social relationship.

Technical definition: In sociological analysis, Everyday civic integration denotes the source-bounded relationship among Everyday civic integration, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Everyday civic integration should be analysed as a relation among Everyday civic integration, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **Everyday**
- **civic**
- **integration**
- **Common**
- **schools**

- markets

How to use them: Define Everyday, civic, integration; cite Common as named evidence; then apply this qualification: Routine interaction is an integrative mechanism, not a claim that discrimination has ended. Conclude by showing how the distinction supports this answer route: Add a low-cost, continuously renewed integration mechanism to the answer..

VISUAL FIRST

EVERYDAY CIVIC INTEGRATION

01. Everyday civic integration

BOUNDARY -> Routine interaction is an integrative mechanism, not a claim that discrimination has ended.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods.

NAMED EVIDENCE AND MECHANISM

- Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods.

EXAMINER CAUTION

- Routine interaction is an integrative mechanism, not a claim that discrimination has ended.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Everyday civic integration.
- **Mains:** Add a low-cost, continuously renewed integration mechanism to the answer.

MINI RECAP

- **Evidence chain:** Everyday civic integration
- **Qualified use:** Add a low-cost, continuously renewed integration mechanism to the answer.

CLOSING RECALL FLOW

1. KEY TERMS / DEFINITIONS Everyday civic integration Common schools markets	2. MECHANISM / ARGUMENT relate Everyday civic integration through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that add a low-cost, continuously renewed integration mechanism to the answer.	4. UPSC TRAP / ANSWER-USE LIMIT: Routine interaction is an integrative mechanism, not a claim that discrimination has ended.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Everyday civic integration converts named social evidence into a qualified argument			

SESSION 11 - CORE - The sharpest reinforcing case

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The sharpest reinforcing case is the part of Salient Features and Diversity of Indian Society that explains how Particularly Vulnerable Tribal Groups fit into one examinable social relationship.

Technical definition: In sociological analysis, The sharpest reinforcing case denotes the source-bounded relationship among Particularly Vulnerable Tribal Groups, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The sharpest reinforcing case should be analysed as a relation among Particularly Vulnerable Tribal Groups, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- sharpest
- reinforcing
- case
- Particularly
- Vulnerable
- Tribal

How to use them: Define sharpest, reinforcing, case; cite Particularly as named evidence; then apply this qualification: The list is an administrative policy category and a dated official document, not a ranking of peoples. Conclude by showing how the distinction supports this answer route: Anchor the reinforcing half of the correlation in one dated official source..

VISUAL FIRST

THE SHARPEST REINFORCING CASE

01. Particularly Vulnerable Tribal Groups

BOUNDARY -> The list is an administrative policy category and a dated official document, not a ranking of peoples.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy.

NAMED EVIDENCE AND MECHANISM

- The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy.

EXAMINER CAUTION

- The list is an administrative policy category and a dated official document, not a ranking of peoples.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to The sharpest reinforcing case.
- **Mains:** Anchor the reinforcing half of the correlation in one dated official source.

MINI RECAP

- **Evidence chain:** Particularly Vulnerable Tribal Groups
- **Qualified use:** Anchor the reinforcing half of the correlation in one dated official source.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS sharpest reinforcing case Particularly Vulnerable Tribal	2. MECHANISM / ARGUMENT relate Particularly Vulnerable Tribal Groups through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that anchor the reinforcing half of the correlation in one dated official source.	4. UPSC TRAP / ANSWER-USE LIMIT: The list is an administrative policy category and a dated official document, not a ranking of peoples.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The sharpest reinforcing case converts named social evidence into a qualified argument			

SESSION 12 - CORE - Boundary cases that break the correlation

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Boundary cases that break the correlation is the part of Salient Features and Diversity of Indian Society that explains how Diversity without marginality and Marginality without a cultural marker fit into one examinable social relationship.

Technical definition: In sociological analysis, Boundary cases that break the correlation denotes the source-bounded relationship among Diversity without marginality and Marginality without a cultural marker, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Boundary cases that break the correlation should be analysed as a relation among Diversity without marginality and Marginality without a cultural marker, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- cases
- that
- break
- correlation
- Diversity
- marginality

How to use them: Define cases, that, break; cite correlation as named evidence; then apply this qualification: Both boundary cases are group-level illustrations and carry no invented income or prevalence figure. Conclude by showing how the distinction supports this answer route: Supply the counter-evidence that a critical directive demands..

VISUAL FIRST

BOUNDARY CASES THAT BREAK THE CORRELATION

01. Diversity without marginality

|
v

02. Marginality without a cultural marker

BOUNDARY -> Both boundary cases are group-level illustrations and carry no invented income or prevalence figure.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric.

NAMED EVIDENCE AND MECHANISM

- Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation.
- A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric.

EXAMINER CAUTION

- Both boundary cases are group-level illustrations and carry no invented income or prevalence figure.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Boundary cases that break the correlation.

- **Mains:** Supply the counter-evidence that a critical directive demands.

MINI RECAP

- **Evidence chain:** Diversity without marginality -> Marginality without a cultural marker
- **Qualified use:** Supply the counter-evidence that a critical directive demands.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS cases that break correlation Diversity marginality	2. MECHANISM / ARGUMENT relate Diversity without marginality and Marginality without a cultural marker through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that supply the counter-evidence that a critical directive demands.	4. UPSC TRAP / ANSWER-USE LIMIT: Both boundary cases are group-level illustrations and carry no invented income or prevalence figure.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Boundary cases that break the correlation converts named social evidence into a qualified argument			

SESSION 13 - CORE SYNTHESIS - Accommodation as the continuity mechanism

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Accommodation as the continuity mechanism is the part of Salient Features and Diversity of Indian Society that explains how Accommodation as the continuity mechanism fit into one examinable social relationship.

Technical definition: In sociological analysis, Accommodation as the continuity mechanism denotes the source-bounded relationship among Accommodation as the continuity mechanism, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Accommodation as the continuity mechanism should be analysed as a relation among Accommodation as the continuity mechanism, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **Accommodation**
- **continuity**
- **cultural**
- **worked**
- **accommodative**
- **absorption**

How to use them: Define Accommodation, continuity, cultural; cite worked as named evidence; then apply this qualification: Recognition of languages is a constitutional listing whose doctrine belongs to Polity. Conclude by showing how the distinction supports this answer route: Answer the continuity demand with a mechanism rather than a celebration..

VISUAL FIRST

ACCOMMODATION AS THE CONTINUITY MECHANISM

01. Accommodation as the continuity mechanism

BOUNDARY -> Recognition of languages is a constitutional listing whose doctrine belongs to Polity.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood.

NAMED EVIDENCE AND MECHANISM

- Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood.

EXAMINER CAUTION

- Recognition of languages is a constitutional listing whose doctrine belongs to Polity.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Accommodation as the continuity mechanism.
- **Mains:** Answer the continuity demand with a mechanism rather than a celebration.

MINI RECAP

- **Evidence chain:** Accommodation as the continuity mechanism
- **Qualified use:** Answer the continuity demand with a mechanism rather than a celebration.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Accommodation continuity cultural worked accommodative absorption	2. MECHANISM / ARGUMENT relate Accommodation as the continuity mechanism through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that answer the continuity demand with a mechanism rather than a celebration.	4. UPSC TRAP / ANSWER-USE LIMIT: Recognition of languages is a constitutional listing whose doctrine belongs to Polity.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Accommodation as the continuity mechanism converts named social evidence into a qualified argument			

SESSION 14 - CORE SYNTHESIS - Recognition, redistribution and causation

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Recognition, redistribution and causation is the part of Salient Features and Diversity of Indian Society that explains how Recognition versus redistribution and Correlation is not causation fit into one examinable social relationship.

Technical definition: In sociological analysis, Recognition, redistribution and causation denotes the source-bounded relationship among Recognition versus redistribution and Correlation is not causation, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Recognition, redistribution and causation should be analysed as a relation among Recognition versus redistribution and Correlation is not causation, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **Recognition**
- **redistribution**

- causation
- versus
- Correlation
- addresses

How to use them: Define Recognition, redistribution, causation; cite versus as named evidence; then apply this qualification: Correlation reflects exclusion working through a marker, so causation must not be attached to identity itself. Conclude by showing how the distinction supports this answer route: Convert the analysis into a policy verdict that survives a critical directive..

VISUAL FIRST

RECOGNITION, REDISTRIBUTION AND CAUSATION

01. Recognition versus redistribution

|

v

02. Correlation is not causation

BOUNDARY -> Correlation reflects exclusion working through a marker, so causation must not be attached to identity itself.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it.

NAMED EVIDENCE AND MECHANISM

- Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact.
- Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it.

EXAMINER CAUTION

- Correlation reflects exclusion working through a marker, so causation must not be attached to identity itself.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Recognition, redistribution and causation.
- **Mains:** Convert the analysis into a policy verdict that survives a critical directive.

MINI RECAP

- **Evidence chain:** Recognition versus redistribution -> Correlation is not causation
- **Qualified use:** Convert the analysis into a policy verdict that survives a critical directive.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Recognition redistribution causation versus Correlation addresses	2. MECHANISM / ARGUMENT relate Recognition versus redistribution and Correlation is not causation through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that convert the analysis into a policy verdict that survives a critical directive.	4. UPSC TRAP / ANSWER-USE LIMIT: Correlation reflects exclusion working through a marker, so causation must not be attached to identity itself.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Recognition, redistribution and causation converts named social evidence into a qualified argument			

SESSION 15 - CORE SYNTHESIS - Measurement boundary and the complete answer spine

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Measurement boundary and the complete answer spine is the part of Salient Features and Diversity of Indian Society that explains how Census 2027 measurement boundary and Verified direct Mains demands fit into one examinable social relationship.

Technical definition: In sociological analysis, Measurement boundary and the complete answer spine denotes the source-bounded relationship among Census 2027 measurement boundary and Verified direct Mains demands, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Measurement boundary and the complete answer spine should be analysed as a relation among Census 2027 measurement boundary and Verified direct Mains demands, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **Measurement**
- **complete**
- **spine**
- **Census**
- **direct**
- **Mains**

How to use them: Define Measurement, complete, spine; cite Census as named evidence; then apply this qualification: The Census 2027 caste enumeration is prospective, so no caste figure may be quoted. Conclude by showing how the distinction supports this answer route: Assemble the final diversity answer spine with an explicit measurement caveat..

VISUAL FIRST

MEASUREMENT BOUNDARY AND THE COMPLETE ANSWER SPINE

01. Census 2027 measurement boundary

|
v

02. Verified direct Mains demands

BOUNDARY -> The Census 2027 caste enumeration is prospective, so no caste figure may be quoted.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words.

NAMED EVIDENCE AND MECHANISM

- Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Measurement boundary and the complete answer spine converts named social evidence into a qualified argument			

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: Indian Society | **Tier:** Must-Do (foundation) | **GS Paper:** GS-I. **Core area:** Forms of diversity in Indian society, unity-in-diversity as a lived arrangement, and the link between cultural diversity and socio-economic marginality. **Grounded in:** Census of India (2011, last full count); Census 2027 Gazette/PIB announcement; Ministry of Tribal Affairs PVTG list; audited 2024 GS-I Mains PYQ. **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor. *Companion:* advanced/01_Salient-Features-and-Diversity-of-Indian-Society.md.

1. Visual foundation

FORMS OF DIVERSITY IN INDIA

Core proposition: ANALYSIS: Indian diversity is not a single axis but several overlapping axes (ethnicity, language, religion, region, caste/tribe); social cohesion depends on whether these axes reinforce each other into compounded disadvantage or cut across each other so that no single identity always predicts deprivation.

2. Essential definitions

Concept	Exam-ready meaning
FACT: Diversity	The objective presence of multiple ethnic, linguistic, religious, regional or caste/tribe identities within one society.
FACT: Plurality	A social condition where multiple identities coexist with mutual recognition, distinct from mere numerical diversity.
ANALYSIS: Unity-in-diversity	A civilisational and constitutional aspiration that difference need not produce division if integrative institutions are strong.
ANALYSIS: Marginality	Socio-economic exclusion from mainstream opportunity, resources or voice, often but not always tied to an identity group.
FACT: Syncretism	The blending of practices across religious or cultural traditions into a shared, composite form (e.g., Sufi-Bhakti idioms, shared shrine worship).
ANALYSIS: Composite culture	A regional or national culture formed through long interaction among diverse groups, not the dominance of one.

3. How Indian diversity is structured

- Ethnicity and ancestry:** ANALYSIS: Older physical-anthropology labels such as "Proto-Australoid" or "Mongoloid" are not a sound way to describe contemporary Indian society. Use self-identification, language, culture and regional history; official Census operations do not classify Indians into biological "races."
- Linguistic layer:** FACT: Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large families commonly used in UPSC texts; this is not an exhaustive taxonomy of all Indian languages. The Eighth Schedule recognises 22 languages (constitutional listing itself is Polity's territory).
- Religious layer:** FACT: Hinduism, Islam, Christianity, Sikhism, Buddhism, Jainism and Zoroastrianism coexist, each with internal sectarian variation, plus tribal faiths.
- Regional layer:** ANALYSIS: Physiographic and cultural-zone diversity (Himalayan, Indo-Gangetic, peninsular, coastal, island) produces distinct cuisines, dress, festivals and social norms.
- Caste/tribe layer:** FACT: Thousands of locally situated jatis and constitutionally notified Scheduled Tribes overlay the other layers; there is no current all-India count of all jatis that should be quoted as a settled fact. Their intersections can be cross-cutting or reinforcing.
- Layering outcome:** ANALYSIS: Cross-cutting identities can reduce the chance that one identity predicts every disadvantage, but do not guarantee harmony. Where identities reinforce (for example, remoteness, low schooling and asset poverty affecting a tribal household), diversity can become a visible marker of marginality.

4. Integrative and marginalising mechanisms

- FACT: **Syncretic traditions:** Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals (Onam, Bihu, Pongal) create composite belonging across religion and region.
- FACT: **Civic and economic institutions:** common schools, markets, elections and public transport function as everyday integrative spaces where diverse groups interact routinely.
- ANALYSIS: **Migration and urban mixing:** internal migration for work brings different linguistic and regional groups into shared neighbourhoods, gradually normalising diversity.
- ANALYSIS: **Marginalising pressures:** remoteness (tribal areas), historical stigma (caste), minority-concentration districts with weak infrastructure, and linguistic-minority status in a state can each independently reduce access to opportunity.
- ANALYSIS: **Compounding risk:** when religious-minority status, rural residence and low income coincide in the same household, ordinary diversity becomes marginality - this is the analytical core the 2024 PYQ tests.

5. Indian applications and PYQ mapping

- FACT: **2024 GS-I PYQ (15 marks):** "Critically analyse the proposition that there is a high correlation between India's cultural diversities and socio-economic marginalities." The expected answer: (a) state the proposition - cultural difference often coincides with deprivation (tribal areas, some religious-minority-concentration districts, certain caste groups); (b) critically test it - many diverse groups are prosperous (Parsis, several Sikh and Jain trading communities, dominant landholding castes), showing the correlation is conditional, not universal; (c) conclude that the causal driver is *historical exclusion and geographic remoteness*, not diversity itself, so policy must target the exclusion mechanism rather than treat diversity as inherently disadvantaging.
- ANALYSIS: A linguistic-minority trader community that is economically prosperous illustrates diversity without marginality; a remote Particularly Vulnerable Tribal Group illustrates diversity compounding into marginality through geographic and infrastructural exclusion.

6. Must-Know Facts for Prelims

- FACT: Four major language families in India: Indo-Aryan, Dravidian, Austroasiatic, Tibeto-Burman.
- FACT: Eighth Schedule of the Constitution currently lists 22 languages (constitutional detail; full doctrine is Polity's territory).
- FACT: Census 2011 (last full Census) recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons.
- FACT: Scheduled Tribes formed about 8.6% and Scheduled Castes about 16.6% of India's population at Census 2011 - the most recent verified full-Census figures.
- CURRENT: The Government announced caste enumeration in the forthcoming Census 2027. This is not the first caste count in Indian history; it is a new all-India enumeration after post-Independence Censuses did not enumerate all castes. No results exist as of 21 July 2026.

7. UPSC traps

- WRONG: Diversity and disparity mean the same thing. -> Diversity is the presence of different identities; disparity is unequal outcomes between groups or regions - a diverse society need not be a disparate one (see Topic 14 for the exact 2024 Q17 distinction).
- WRONG: Unity-in-diversity means conflict never occurs in India. -> It is an aspiration and an observed civilisational pattern, not a guarantee; communal and regional tensions coexist with syncretic integration (Topics 13-14).
- WRONG: Every minority or tribal group is automatically marginalised. -> Marginality is conditional on historical exclusion and access, not an automatic consequence of being culturally distinct - several diverse communities are economically prosperous.
- WRONG: India's diversity is only religious and linguistic. -> Regional, ethnic/ethno-linguistic and caste/tribe axes are equally salient and often analytically more decisive for marginality outcomes than religion or language alone.

8. CURRENT: Current anchor

- CURRENT: Gazette S.O. 2681(E) (16 June 2025) fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas, and 1 March 2027 elsewhere. PIB's 30 April 2025 announcement confirms caste enumeration. It remains prospective as of 21 July 2026; do not cite a caste-count figure or imply that the exercise is India's first historical caste enumeration.

9. PYQ application

- FACT: **2024 GS-I (15 marks):** structure as proposition -> critical test with counter-examples -> causal reframing (exclusion/remoteness, not diversity per se) -> policy implication (target the exclusion mechanism, not the identity marker).

10. Mains angles

- ANALYSIS: Always separate "diversity as fact" from "marginality as outcome" before answering any diversity-linked question.
- ANALYSIS: Use cross-cutting versus reinforcing identity axes as the core analytical device.
- ANALYSIS: Label Census 2011 stocks, forthcoming Census 2027 operations and survey estimates separately; none alone establishes that identity *causes* deprivation.
- ANALYSIS: Anchor examples in named, verifiable groups rather than generic claims.

Answer thesis: India's cultural diversity correlates with socio-economic marginality only where identity axes reinforce historical exclusion and geographic remoteness; where axes cross-cut, diversity coexists with prosperity and integration, so the 2024 PYQ's proposition must be accepted conditionally, not affirmed as a universal law.

11. Probable questions

- ANALYSIS: **Prelims:** Which four language families are represented among India's languages?
- FACT: **Mains (15 marks, 2024 GS-I PYQ, verbatim):** Critically analyse the proposition that there is a high correlation between India's cultural diversities and socio-economic marginalities.
- ANALYSIS: **Mains (10 marks):** Distinguish between diversity and plurality with Indian examples.
- ANALYSIS: **Mains (15 marks):** Examine how cross-cutting identities help India manage its cultural diversity without descending into permanent conflict.

12. Study links

- FACT: Advanced companion:
[advanced/01_Salient-Features-and-Diversity-of-Indian-Society.md](#).
- FACT: [Geography/basic/37_Cultural-and-Social-Geography-of-India.md](#) - spatial cultural-region typology (do not re-derive here).
- FACT: [14_Regionalism.md](#) - the exact diversity-vs-disparity distinction (2024 Q17).
- FACT: [13_Communalism.md](#) - when religious diversity turns into mobilisation and conflict.
- FACT: [15_Secularism.md](#) - syncretism and shared public space as lived practice.

13. Answer architecture (10/15/20-mark support)

Core-only. Everything needed to write a directive-sensitive, thesis-led answer on diversity, plurality, cultural continuity and diversity-linked marginality is in this section. [advanced/01](#) adds optional refinement (cross-cutting cleavage theory, recognition-versus-redistribution) and is not required to score.

13.1 Directive-to-structure map

Directive	What is actually being tested	Structure that scores
Discuss (what makes Indian society unique / sustains its culture)	Whether you can name <i>mechanisms</i> of continuity, not adjectives	Mechanism-by-mechanism: transmission -> accommodation -> adaptation -> institutional carriers, each with an example
Critically analyse (diversity-marginality correlation)	Whether you will test the proposition, not restate it	Proposition -> supporting cases -> counter-cases -> causal reframing -> conditional verdict
Examine / Elucidate (unity in diversity, integration)	Whether you separate the fact of difference from the outcome of cohesion	Two-column: integrative mechanism vs marginalising pressure, then the condition that decides which dominates
Distinguish / Differentiate (diversity vs plurality vs disparity vs marginality)	Definitional precision under time pressure	Definition -> Indian instance -> the error the distinction prevents, four times
Comment / Justify (is diversity a strength or a strain?)	Whether you take a qualified position	Thesis first, then the condition under which each side holds

13.2 Thesis bank (pick one, then defend it)

- **T1 (correlation questions):** ANALYSIS: Diversity is a *marker*, not a *mechanism*, of marginality; the correlation holds only where identity axes reinforce historical exclusion and geographic remoteness on the same household.
- **T2 (continuity questions):** ANALYSIS: Indian culture has persisted less through insulation than through **accommodative absorption** - the capacity to add a tradition without extinguishing the previous one, carried by decentralised transmission institutions.
- **T3 (cohesion questions):** ANALYSIS: Cohesion in India is produced not by the absence of difference but by the presence of *cross-cutting* difference plus institutions that keep difference from converting into permanent deprivation.
- **T4 (policy questions):** ANALYSIS: Diversity policy fails when it supplies recognition where redistribution was needed, or the reverse; the diagnosis must precede the instrument.

13.3 Mark-scaled spines

10 marks / 150 words - "What makes Indian society unique in sustaining its culture?"

1. One-line thesis (T2).
2. Layered, not replaced: four axes coexisting (language, religion, region, caste/tribe).
3. Transmission carriers: family and jati socialisation, ritual calendar, pilgrimage and festival circuits, oral-textual dual transmission.
4. Accommodation: syncretic idioms (Sufi-Bhakti, shared shrines) absorbing new traditions.
5. Adaptation: composite regional cultures (Onam, Bihu, Pongal) renewing continuously.
6. Qualification: continuity is not uniformity - hierarchy and exclusion persisted inside the same continuity.
7. Verdict sentence.

15 marks / 250 words - "Critically analyse the high correlation between cultural diversities and socio-economic marginalities" (2024 GS-I Q20).

1. State the proposition exactly.
2. Where it holds - reinforcing cases (E1, E2).
3. Where it fails - cross-cutting counter-cases (E3, E4).
4. Causal reframing: exclusion and remoteness are the mechanism; identity is the visible marker (E5).
5. Measurement caution: Census stock vs survey estimate; aggregation masks sub-group reality.
6. Policy implication: target the exclusion mechanism, not the identity marker.
7. Conditional verdict - accept the proposition *where cleavages reinforce*, reject it as a universal law.

20 marks - "Diversity, plurality and cohesion in India: a critical assessment." Add to the 15-mark spine: (a) the four-way distinction of Section 13.5; (b) a period dimension - pre-Independence composite culture, linguistic

reorganisation, present-day contestation; (c) the integration-gap diagnosis from 00_Master - Framework .md Section 4; (d) a cross-owner synthesis paragraph - 14_Regionalism .md for disparity, 13_Communalism .md for mobilisation, 15_Secularism .md for coexistence - with each borrowing labelled.

13.4 Evidence bank - claim -> named evidence -> significance -> limitation

- **E1 - Reinforcing cleavage.** *Claim:* diversity converts to marginality when disadvantages stack. *Evidence:* Particularly Vulnerable Tribal Groups - MoTA's list dated 9 July 2024 identifies **75 PVTGs in 18 States and the UT of Andaman & Nicobar Islands**, with legacy criteria including pre-agricultural technology, low literacy and subsistence economy. *Significance:* identity distinctiveness, remoteness and asset-poverty coincide in one population, so the correlation is strongest here. *Limitation:* the criteria are administrative policy categories, not a ranking of communities, and PVTG conditions vary by state.
- **E2 - Scale of the diverse population.** *Claim:* diversity in India is a structural, not a residual, fact. *Evidence:* at **Census 2011** - the last completed full count - Scheduled Tribes were about **8.6%** and Scheduled Castes about **16.6%** of the population. *Significance:* a quarter of the population sits inside constitutionally recognised historically excluded categories, so diversity questions are also distribution questions. *Limitation:* a 2011 **stock**, not a current estimate; Census 2027 has produced no results as of the volatile-source check.
- **E3 - Diversity without marginality.** *Claim:* cultural distinctiveness does not predict deprivation. *Evidence:* prosperous linguistic-minority trading communities in metropolitan India, and several Sikh and Jain business communities. *Significance:* these break any deterministic reading of the proposition. *Limitation:* ANALYSIS: analytical group-level illustration; do not attach an invented income or share figure to it.
- **E4 - Marginality without conspicuous diversity.** *Claim:* deprivation is not always identity-marked. *Evidence:* a landless labouring household of the locally *dominant* caste in a poor region. *Significance:* shows class-based marginality operating without a distinct cultural marker, so the correlation is not symmetric. *Limitation:* ANALYSIS: illustrative case, not a prevalence claim.
- **E5 - Linguistic depth as continuity evidence.** *Claim:* India sustained diversity through recognition rather than suppression. *Evidence:* Census 2011 rationalised over **19,500 raw mother-tongue returns into 121 languages** spoken by 10,000 or more persons; the **Eighth Schedule lists 22 languages**; the **States Reorganisation Act, 1956** accommodated linguistic assertion through statehood. *Significance:* institutional accommodation, not homogenisation, is the Indian continuity mechanism. *Limitation:* recognition of 22 languages is a constitutional listing (Polity's territory) and is not a claim about the vitality of the remaining languages.
- **E6 - Prospective, not usable, data.** *Claim:* caste-linked deprivation is still statistically invisible at the all-India level. *Evidence:* **Gazette S.O. 2681(E) (16 June 2025)** fixes Census 2027 reference dates - 1 October 2026 for Ladakh and specified snow-bound areas, 1 March 2027 elsewhere - and the **PIB announcement of 30 April 2025** confirms caste enumeration. *Significance:* the measurement gap itself is an answer point. *Limitation:* prospective operation; no caste count may be quoted, and it must not be called India's first historical caste enumeration.

13.5 The four-term distinction examiners test

Term	Precise content	Error it prevents
Diversity	Objective presence of different identities	Treating difference as a problem
Plurality	Coexistence <i>with mutual recognition</i>	Equating headcount variety with acceptance
Disparity	Unequal development outcomes between groups/regions	Answering a disparity question with culture (2024 Q17)
Marginality	Exclusion from opportunity, resources or voice	Assuming every distinct group is excluded

13.6 Balance bank (mandatory for critically)

- ANALYSIS: **Against the proposition:** prosperous diverse communities (E3); deprivation inside dominant groups (E4); intra-group variation by region and urban-rural location.

- ANALYSIS: **Against a naive celebration:** unity-in-diversity is an aspiration and an observed pattern, not a guarantee - communal and regional tension coexists with syncretism.
- ANALYSIS: **Against biological framing:** older physical-anthropology labels are not a sound description of contemporary Indian society; Census operations do not classify Indians into biological races.
- ANALYSIS: **Method caution:** correlation $\neq$ causation; national aggregates mask which sub-group is reinforced-marginal.

13.7 Verdict scaffolds

- **Conditional acceptance:** "The proposition holds where identity axes reinforce - as with remote PVTG populations - and fails where they cross-cut, so it should be read as a conditional empirical pattern, not a law of Indian society."
- **Mechanism verdict:** "Diversity marks disadvantage; historical exclusion and remoteness produce it. Policy that manages identity while leaving the exclusion mechanism intact will reproduce the correlation it claims to address."
- **Continuity verdict:** "Indian culture endured by absorbing rather than resisting, which is also why hierarchy endured alongside it - continuity and inequality were carried by the same institutions."

13.8 Direct Mains demands this Core file must answer alone

Year · Paper · Q	Demand	Authoritative ledger owner	Core route
2024 · GS-I · Q20	Correlation between cultural diversity and socio-economic marginalities	Indian- Society /basic/ 01 FACT: this file	Section 13.3 15-mark spine + E1-E6
2019 · GS-I · Q8	What makes Indian society unique in sustaining its culture	ledger points to advanced/ 01	Core routing supersedes: Section 13.3 10-mark spine (T2)
2020 · GS-I · Q18	Diversity and pluralism under threat from globalisation	ledger points to advanced/ 11	Core owner is 11_ Effects - of - Globalisation - on - Indian - Society .md Section 13; use Section 13.5 here for the plurality half

ANALYSIS: **Documented routing defect (bounded, not answered).** The generated 2018-2023 block below carries two 2023 Prelims rows - national sports awards and the Chess Olympiad mascot/trophies. These are **current-affairs routing artefacts with no Indian Society content**; this file does not claim them, does not answer them from memory, and they must not be counted as gaps in this owner. Modern-Indian-History/basic/38 records the same class of artefact for its own generated block.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2024
- **Paper(s):** GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2024	GS-I	20	Correlation between cultural diversity and socio-economic marginalities	Critically analyse · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Correlation between cultural diversity and socio-economic marginalities

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2023
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2023	Prelims GS-I	95	National sports awards Khel Ratna Arjuna Dronacharya criteria	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2023	Prelims GS-I	96	Chess Olympiad 2022 India mascot Thambi trophies	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- National sports awards Khel Ratna Arjuna Dronacharya criteria
- Chess Olympiad 2022 India mascot Thambi trophies

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

Semantic-completeness ownership and PYQ control

- **Official syllabus/index and owned core:** salient features of Indian society, diversity and unity-in-diversity; define diversity, plurality, disparity, marginality, integration, assimilation, syncretism and composite culture before evaluating language, religion, caste, tribe, class, region and rural-urban location as intersecting axes.
- **Indispensable sociology:** cross-cutting and reinforcing cleavages explain when difference dampens or compounds conflict; Nancy Fraser's recognition- redistribution distinction is optional analytical depth, not constitutional doctrine. Integration never means homogenisation and coexistence never proves equal power.
- **India-specific and intersectional control:** use linguistic reorganisation, Sufi-Bhakti/shared-shrine practices, metropolitan linguistic minorities and PVTG-linked remoteness as bounded cases. Compare region, class, gender and rural-urban location inside every identity instead of stereotyping a community.
- **Data/source control:** Census 2011 language, SC and ST stocks remain the latest completed full-Census baseline. Census 2027 is prospective; its reference dates and caste-enumeration decision may be cited, but no result may be invented. The Ministry of Tribal Affairs PVTG list is dated 9 July 2024.
- **Cross-owner boundary:** Topic 02 owns caste structure, Topic 03 tribal society, Topic 04 family/kinship and Topic 05 rural society. Population belongs to Topic 06, women to Topic 07, empowerment to Topic 08 and poverty to Topic 09. Constitutional detail remains Polity-owned.

- **Four-ledger hostile audit:** literal syllabus, indispensable prerequisites,

textbook taxonomy and PYQ demands were checked for absent concepts, mechanisms, counter-cases, regional variation, intersectionality and evidence limitations.

- **Verified PYQ ownership, 2018-2026:** direct GS-I demands are 2019 Q8 and

2024 Q20. The official 2026 GS-I paper was not available on the UPSC previous- papers portal when rechecked on 5 September 2026; no 2026 demand or key is fabricated.

INDIAN SOCIETY DEEP-REVIEW CORE CONTROL

- **Must remember:** Indian society is plural, stratified and relational: language, religion, caste, tribe, class, gender, region, rural-urban location and migration overlap, while constitutional citizenship and institutions create unity without erasing difference.
- **Close distinction:** Diversity is not inequality, pluralism is not assimilation, integration is not homogenisation, and coexistence is not proof of equal power; intersectionality explains combined disadvantages without treating every identity combination as identical.
- **Evidence / interpretation limit:** Use Census 2011 language/religion baselines, the notified PVTG position and named regional examples with source-date-status labels; neither harmony nor conflict is timeless, and correlation between diversity and marginality is not sufficient causation.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Five diversity axes?

A. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. B. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. C. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. D. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance.

Answer: A. Explanation: Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Five diversity axes?

A. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. B. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. C. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. D. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference.

Answer: B. Explanation: Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Five diversity axes?

A. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. B. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. C. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. D. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence.

Answer: C. Explanation: Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Five diversity axes?

A. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. B. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. C. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. D. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other.

Answer: D. Explanation: Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Diversity versus plurality?

A. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. B. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. C. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. D. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference.

Answer: A. Explanation: Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Diversity versus plurality?

A. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. B. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. C. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. D. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language.

Answer: B. Explanation: Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Diversity versus plurality?

A. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. B. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. C. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. D. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions.

Answer: C. Explanation: Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Diversity versus plurality?

A. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. B. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. C. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. D. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance.

Answer: D. Explanation: Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies Disparity versus marginality?

A. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. B. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. C. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. D. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth.

Answer: A. Explanation: Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under Disparity versus marginality?

A. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. B. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. C. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. D. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions.

Answer: B. Explanation: Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Disparity versus marginality?

A. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. B. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. C. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. D. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions.

Answer: C. Explanation: Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Disparity versus marginality?

A. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. B. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. C. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. D. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference.

Answer: D. Explanation: Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Four language families?

A. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. B. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. C. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. D. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions.

Answer: A. Explanation: Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Four language families?

A. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. B. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. C. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. D. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead.

Answer: B. Explanation: Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Four language families?

A. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. B. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. C. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. D. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead.

Answer: C. Explanation: Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Four language families?

A. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. B. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. C. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. D. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language.

Answer: D. Explanation: Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Eighth Schedule listing?

A. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. B. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. C. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. D. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead.

Answer: A. Explanation: The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Eighth Schedule listing?

A. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. B. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. C. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. D. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense.

Answer: B. Explanation: The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Eighth Schedule listing?

A. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. B. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. C. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. D. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead.

Answer: C. Explanation: The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Eighth Schedule listing?

A. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. B. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. C. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. D. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence.

Answer: D. Explanation: The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Census 2011 mother-tongue rationalisation?

A. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. B. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. C. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. D. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions.

Answer: A. Explanation: Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Census 2011 mother-tongue rationalisation?

A. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. B. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. C. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. D. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong.

Answer: B. Explanation: Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Census 2011 mother-tongue rationalisation?

A. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. B. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. C. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. D. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region.

Answer: C. Explanation: Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Census 2011 mother-tongue rationalisation?

A. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. B. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. C. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. D. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth.

Answer: D. Explanation: Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Census 2011 Scheduled stocks?

A. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. B. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. C. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. D. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong.

Answer: A. Explanation: At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Census 2011 Scheduled stocks?

A. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. B. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. C. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. D. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong.

Answer: B. Explanation: At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Census 2011 Scheduled stocks?

A. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. B. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. C. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. D. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods.

Answer: C. Explanation: At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Census 2011 Scheduled stocks?

A. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. B. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. D. At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions.

Answer: D. Explanation: At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies No biological race classification?

A. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. B. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. C. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. D. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense.

Answer: A. Explanation: Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under No biological race classification?

A. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. B. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. C. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. D. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods.

Answer: B. Explanation: Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of No biological race classification?

A. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. B. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. C. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. D. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods.

Answer: C. Explanation: Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about No biological race classification?

A. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. B. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. C. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. D. Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead.

Answer: D. Explanation: Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races; self-identification, language, culture and regional history are used instead. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Cross-cutting cleavage?

A. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. B. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. C. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. D. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region.

Answer: A. Explanation: Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Cross-cutting cleavage?

A. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. B. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. C. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. D. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy.

Answer: B. Explanation: Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Cross-cutting cleavage?

A. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. C. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. D. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods.

Answer: C. Explanation: Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Cross-cutting cleavage?

A. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. B. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. C. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. D. Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense.

Answer: D. Explanation: Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Reinforcing cleavage?

A. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. B. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. C. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. D. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy.

Answer: A. Explanation: Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Reinforcing cleavage?

A. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. B. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. C. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. D. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy.

Answer: B. Explanation: Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Reinforcing cleavage?

A. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. C. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. D. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation.

Answer: C. Explanation: Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Reinforcing cleavage?

A. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. B. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. C. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. D. Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong.

Answer: D. Explanation: Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies Syncretic integrative traditions?

A. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. B. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. C. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. D. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy.

Answer: A. Explanation: Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Syncretic integrative traditions?

A. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. B. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. D. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric.

Answer: B. Explanation: Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Syncretic integrative traditions?

A. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. B. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. C. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. D. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation.

Answer: C. Explanation: Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Syncretic integrative traditions?

A. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. B. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. C. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. D. Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region.

Answer: D. Explanation: Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Everyday civic integration?

A. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. B. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. D. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation.

Answer: A. Explanation: Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Everyday civic integration?

A. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. B. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. C. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. D. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric.

Answer: B. Explanation: Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Everyday civic integration?

A. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. B. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. C. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. D. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact.

Answer: C. Explanation: Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Everyday civic integration?

A. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. B. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. C. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. D. Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods.

Answer: D. Explanation: Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Particularly Vulnerable Tribal Groups?

A. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. B. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. C. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. D. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation.

Answer: A. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Particularly Vulnerable Tribal Groups?

A. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. C. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. D. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact.

Answer: B. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Particularly Vulnerable Tribal Groups?

A. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. B. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. D. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it.

Answer: C. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Particularly Vulnerable Tribal Groups?

A. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. B. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. C. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. D. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy.

Answer: D. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Diversity without marginality?

A. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. B. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. C. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. D. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood.

Answer: A. Explanation: Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Diversity without marginality?

A. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. B. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. C. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. D. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood.

Answer: B. Explanation: Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Diversity without marginality?

A. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. B. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. C. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. D. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it.

Answer: C. Explanation: Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Diversity without marginality?

A. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. B. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. C. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. D. Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation.

Answer: D. Explanation: Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Marginality without a cultural marker?

A. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. B. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. C. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. D. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact.

Answer: A. Explanation: A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Marginality without a cultural marker?

A. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. B. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. C. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. D. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration.

Answer: B. Explanation: A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Marginality without a cultural marker?

A. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. B. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. C. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. D. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words.

Answer: C. Explanation: A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Marginality without a cultural marker?

A. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. B. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. C. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. D. A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric.

Answer: D. Explanation: A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Accommodation as the continuity mechanism?

A. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. B. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. C. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. D. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration.

Answer: A. Explanation: Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Accommodation as the continuity mechanism?

A. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. B. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. C. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. D. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it.

Answer: B. Explanation: Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Accommodation as the continuity mechanism?

A. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. B. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. C. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. D. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words.

Answer: C. Explanation: Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Accommodation as the continuity mechanism?

A. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. B. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. C. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. D. Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood.

Answer: D. Explanation: Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Recognition versus redistribution?

A. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. B. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. C. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. D. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration.

Answer: A. Explanation: Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Recognition versus redistribution?

A. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. B. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. C. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. D. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other.

Answer: B. Explanation: Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Recognition versus redistribution?

A. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. B. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. C. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. D. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other.

Answer: C. Explanation: Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Recognition versus redistribution?

A. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. B. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. C. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. D. Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact.

Answer: D. Explanation: Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Correlation is not causation?

A. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. B. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. C. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. D. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words.

Answer: A. Explanation: Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Correlation is not causation?

A. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. B. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. C. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. D. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other.

Answer: B. Explanation: Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Correlation is not causation?

A. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. B. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. C. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. D. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other.

Answer: C. Explanation: Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Correlation is not causation?

A. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. B. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. C. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. D. Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it.

Answer: D. Explanation: Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Census 2027 measurement boundary?

A. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. B. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. C. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. D. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance.

Answer: A. Explanation: Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Census 2027 measurement boundary?

A. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. B. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. C. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. D. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference.

Answer: B. Explanation: Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Census 2027 measurement boundary?

A. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. B. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. C. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. D. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language.

Answer: C. Explanation: Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. The remaining options belong to

different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Census 2027 measurement boundary?

A. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. B. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. C. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. D. Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration.

Answer: D. Explanation: Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Verified direct Mains demands?

A. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. B. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. C. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. D. Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other.

Answer: A. Explanation: Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Verified direct Mains demands?

A. Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance. B. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. C. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. D. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language.

Answer: B. Explanation: Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Verified direct Mains demands?

A. Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference. B. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. C. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. D. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence.

Answer: C. Explanation: Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Verified direct Mains demands?

A. Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. B. The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence. C. Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. D. Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words.

Answer: D. Explanation: Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Two direct General Studies Paper-I demands are verified for this owner from the audited routing ledgers and confirmed word for word in the locally held official question papers: 2024 GS-I Q20 and 2019 GS-I Q8. The 2019 demand is routed in the ledger to the Advanced owner while the Core owner records that Core routing supersedes it; both are therefore answered here from the Basic spine. The generated 2018-2023 Prelims block additionally routes two 2023 objective items on national sports awards and the Chess Olympiad mascot and trophies. Those are documented current-affairs routing artefacts with no Indian Society content, their official keys are not held locally, and this package neither claims them nor infers an option for them.

OWNER PYQ LEDGER EXTRACTS

5. Indian applications and PYQ mapping

- FACT: **2024 GS-I PYQ (15 marks):** "Critically analyse the proposition that there is a high correlation between India's cultural diversities and socio-economic marginalities." The expected answer: (a) state the proposition - cultural difference often coincides with deprivation (tribal areas, some religious-minority-concentration districts, certain caste groups); (b) critically test it - many diverse groups are prosperous (Parsis, several Sikh and Jain trading communities, dominant landholding castes), showing the correlation is conditional, not universal; (c) conclude that the causal driver is *historical exclusion and geographic remoteness*, not diversity itself, so policy must target the exclusion mechanism rather than treat diversity as inherently disadvantaging.

- ANALYSIS: A linguistic-minority trader community that is economically prosperous illustrates diversity without marginality; a remote Particularly Vulnerable Tribal Group illustrates diversity compounding into marginality through geographic and infrastructural exclusion.

9. PYQ application

- FACT: **2024 GS-I (15 marks)**: structure as proposition -> critical test with counter-examples
- > causal reframing (exclusion/remoteness, not diversity per se) -> policy implication (target the exclusion mechanism, not the identity marker).

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2024
- **Paper(s):** GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2024	GS-I	20	Correlation between cultural diversity and socio-economic marginalities	Critically analyse · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Correlation between cultural diversity and socio-economic marginalities

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2023
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2023	Prelims GS-I	95	National sports awards Khel Ratna Arjuna Dronacharya criteria	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2023	Prelims GS-I	96	Chess Olympiad 2022 India mascot Thambi trophies	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- National sports awards Khel Ratna Arjuna Dronacharya criteria
- Chess Olympiad 2022 India mascot Thambi trophies

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- **FACT: 2024 GS-I (15 marks, verbatim):** "Critically analyse the proposition that there is a high correlation between India's cultural diversities and socio-economic marginalities." Analytical route: (a) state the correlation with named examples (PVTGs, some minority-concentration districts); (b) apply the cross-cutting/reinforcing framework to show the correlation is conditional; (c) invoke the recognition-redistribution distinction to argue that policy responses must match the actual gap (resource versus respect); (d) conclude that diversity is a marker, not a cause, of marginality, so the proposition should be accepted only where cleavages reinforce, not as a universal law.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2019
- **Paper(s):** GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2019	GS-I	8	What makes Indian society unique in sustaining its culture	Discuss · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- What makes Indian society unique in sustaining its culture

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2024 GS-I Q20

Demand: Critically analyse the proposition that there is a high correlation between India's cultural diversities and socio-economic marginalities. (Answer in 250 words) 15 marks.

Status: Verified verbatim in the audited 2024-2025 Mains routing ledger and in the locally held official 2024 General Studies Paper-I.

Model solution: Open by stating the proposition exactly as an analytical claim to be tested rather than restated, and separate diversity as a fact from marginality as an outcome. Show where it holds: the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, whose legacy criteria of pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy stack identity distinctiveness, remoteness and asset-poverty on one population, which proves the reinforcing-cleavage case; the qualification is that these are administrative criteria and conditions vary by State. Show where it fails: prosperous linguistic-minority trading communities and several Sikh and Jain business communities are culturally distinct and economically integrated, while a landless labouring household of the locally dominant caste is deprived without a distinct cultural marker, which proves the correlation is neither universal nor symmetric; the qualification is that both are group-level illustrations carrying no invented income figure. Reframe causally: historical exclusion and geographic remoteness are the mechanism and diversity is the visible marker, so policy that manages identity while leaving exclusion intact reproduces the pattern it claims to address. Add the measurement caution that Census 2011 recorded Scheduled Tribes at about 8.6 per cent and Scheduled Castes at about 16.6 per cent as a stock, that national aggregates mask which sub-group is reinforced-marginal, and that the

Census 2027 caste enumeration announced by the Press Information Bureau on 30 April 2025 with reference dates fixed by Gazette S.O. 2681(E) is prospective and yields no figure. Conclude with a conditional verdict: accept the proposition where cleavages reinforce, reject it as a law of Indian society, and target the exclusion mechanism rather than the identity marker. Why this earns marks: it tests the proposition instead of restating it, supplies dated named evidence on both sides, reframes correlation as marker rather than mechanism, and closes with a graded, policy-relevant verdict.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 1 - 2024 GS-I Q20", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Open by stating the proposition exactly as an analytical claim to be tested rather than restated, and separate diversity as a fact from marginality as an outcome. Show where it holds: the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, whose legacy criteria of pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy stack identity distinctiveness, remoteness and asset-poverty on one population, which proves the reinforcing-cleavage case; the qualification is that these are administrative criteria and conditions vary by State. Show where it fails: prosperous linguistic-minority trading communities and several Sikh and Jain business communities are culturally distinct and economically integrated, while a landless labouring household of the locally dominant caste is deprived without a distinct cultural marker, which proves the correlation is neither universal nor symmetric; the qualification is that both are group-level illustrations carrying no invented income figure. Reframe causally: historical exclusion and geographic remoteness are the mechanism and diversity is the visible marker, so policy that manages identity while leaving exclusion intact reproduces the pattern it claims to address. Add the measurement caution that Census 2011 recorded Scheduled Tribes at about 8.6 per cent and Scheduled Castes at about 16.6 per cent as a stock, that national aggregates mask which sub-group is reinforced-marginal, and that the Census 2027 caste enumeration announced by the Press Information Bureau on 30 April 2025 with reference dates fixed by Gazette S.O. 2681(E) is prospective and yields no figure. Conclude with a conditional verdict: accept the proposition where cleavages reinforce, reject it as a law of Indian society, and target the exclusion mechanism rather than the identity marker. Why this earns marks: it tests the proposition instead of restating it, supplies dated named evidence on both sides, reframes correlation as marker rather than mechanism, and closes with a graded, policy-relevant verdict.

Analytical body:

1. **Claim and named evidence:** Demand: Critically analyse the proposition that there is a high correlation between India's cultural diversities and socio-economic marginalities. (Answer in 250 words) 15 marks. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Status: Verified verbatim in the audited 2024-2025 Mains routing ledger and in the locally held official 2024 General Studies Paper-I. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Open by stating the proposition exactly as an analytical claim to be tested rather than restated, and separate diversity as a fact from marginality as an outcome. Show where it holds: the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, whose legacy criteria of pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy stack identity distinctiveness, remoteness and asset-poverty on one population, which proves the reinforcing-cleavage case; the qualification is that these are administrative criteria and conditions vary by State. Show where it fails: prosperous linguistic-minority trading communities and several Sikh and Jain business

communities are culturally distinct and economically integrated, while a landless labouring household of the locally dominant caste is deprived without a distinct cultural marker, which proves the correlation is neither universal nor symmetric; the qualification is that both are group-level illustrations carrying no invented income figure. Reframe causally: historical exclusion and geographic remoteness are the mechanism and diversity is the visible marker, so policy that manages identity while leaving exclusion intact reproduces the pattern it claims to address. Add the measurement caution that Census 2011 recorded Scheduled Tribes at about 8.6 per cent and Scheduled Castes at about 16.6 per cent as a stock, that national aggregates mask which sub-group is reinforced-marginal, and that the Census 2027 caste enumeration announced by the Press Information Bureau on 30 April 2025 with reference dates fixed by Gazette S.O. 2681(E) is prospective and yields no figure. Conclude with a conditional verdict: accept the proposition where cleavages reinforce, reject it as a law of Indian society, and target the exclusion mechanism rather than the identity marker. Why this earns marks: it tests the proposition instead of restating it, supplies dated named evidence on both sides, reframes correlation as marker rather than mechanism, and closes with a graded, policy-relevant verdict.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2024 GS-I Q20", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 2 - 2019 GS-I Q8

Demand: What makes the Indian society unique in sustaining its culture? Discuss. (Answer in 150 words) 10 marks.

Status: Verified verbatim in the audited 2018-2023 Mains routing ledger and in the locally held official General Studies Paper-I. The ledger routes it to the Advanced owner; the Core owner records that Core routing supersedes, so it is answered from the Basic spine.

Model solution: Open with the mechanism thesis that Indian culture persisted through accommodative absorption rather than insulation. Give the layering evidence: ethnic, linguistic, religious, regional and caste-tribe axes coexisted instead of one replacing another, and Census 2011 rationalised over 19,500 raw mother-tongue returns into 121 languages spoken by 10,000 or more persons, which proves depth was retained rather than flattened; the qualification is that a rationalised count is a measurement decision. Give the transmission evidence: family and jati socialisation, ritual calendars and festival circuits such as Onam, Bihu and Pongal, and syncretic idioms including Sufi dargahs and Bhakti saint-poetry, which proves continuity was carried by decentralised institutions rather than a central authority. Give the institutional evidence: recognition through the Eighth Schedule listing of 22 languages and territorial accommodation through the States Reorganisation Act, 1956, which proves that assertion was absorbed into governance instead of being suppressed. Qualify honestly that continuity is not uniformity, because hierarchy and exclusion persisted inside the same transmitting institutions. Conclude that uniqueness lies in the capacity to add without extinguishing, which is also why inequality endured alongside continuity. Why this earns marks: it answers the directive with named mechanisms and dated evidence, avoids adjectival celebration, and supplies a qualification that converts description into analysis.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 2 - 2019 GS-I Q8", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Open with the mechanism thesis that Indian culture persisted through accommodative absorption rather than insulation. Give the layering evidence: ethnic, linguistic, religious, regional and caste-tribe axes coexisted instead of one replacing another, and Census 2011 rationalised over 19,500 raw mother-tongue returns into 121 languages spoken by 10,000 or more persons, which proves depth was retained rather than flattened; the qualification is that a rationalised count is a measurement decision. Give the transmission evidence: family and jati socialisation, ritual calendars and festival circuits such as Onam, Bihu and Pongal, and syncretic idioms including Sufi dargahs and Bhakti saint-poetry, which proves continuity was carried by decentralised institutions rather than a central

ORIGINAL MAINS 1 - 10 MARKS

Question: Discuss what makes Indian society unique in sustaining its culture. Answer in about 150 words.

Model thesis: Indian culture persisted through accommodative absorption and institutional recognition rather than insulation, carried by decentralised transmission and syncretic idioms, while hierarchy survived inside the same continuity.

Claim -> named evidence -> analysis -> qualification:

- Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other.
- Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region.
- Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods.

- Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood.
- Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language.
- Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth.

Qualified conclusion: Indian culture persisted through accommodative absorption and institutional recognition rather than insulation, carried by decentralised transmission and syncretic idioms, while hierarchy survived inside the same continuity.

Demand decoding: The directive **discuss** requires a direct position on "Discuss what makes Indian society unique in sustaining its culture. Answer in about 150 words.", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Indian culture persisted through accommodative absorption and institutional recognition rather than insulation, carried by decentralised transmission and syncretic idioms, while hierarchy survived inside the same continuity.

Analytical body:

1. **Claim and named evidence:** Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
6. **Claim and named evidence:** Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Indian culture persisted through accommodative absorption and institutional recognition rather than insulation, carried by decentralised transmission and syncretic idioms, while hierarchy survived inside the same continuity.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Discuss what makes Indian society unique in sustaining its culture. Answer in about 150 words.", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 2 - 10 MARKS

Question: Distinguish diversity, plurality, disparity and marginality using Indian examples. Answer in about 150 words.

Model thesis: The four terms separate the fact of difference, the quality of coexistence, the inequality of outcomes and the condition of exclusion, and confusing them produces the commonest answer error in this topic.

Claim -> named evidence -> analysis -> qualification:

- Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance.
- Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference.

Qualified conclusion: The four terms separate the fact of difference, the quality of coexistence, the inequality of outcomes and the condition of exclusion, and confusing them produces the commonest answer error in this topic.

Demand decoding: The directive **answer** requires a direct position on "Distinguish diversity, plurality, disparity and marginality using Indian examples. Answer in...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The four terms separate the fact of difference, the quality of coexistence, the inequality of outcomes and the condition of exclusion, and confusing them produces the commonest answer error in this topic.

ORIGINAL MAINS 3 - 15 MARKS

Question: Cultural diversity in India marks disadvantage but does not produce it. Critically examine. Answer in about 250 words.

Model thesis: Diversity correlates with deprivation only where identity axes reinforce historical exclusion and geographic remoteness; where they cross-cut, diversity coexists with prosperity, so exclusion rather than difference is the mechanism.

Claim -> named evidence -> analysis -> qualification:

- Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense.
- Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong.
- The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy.
- Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation.
- A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric.
- Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it.

Qualified conclusion: Diversity correlates with deprivation only where identity axes reinforce historical exclusion and geographic remoteness; where they cross-cut, diversity coexists with prosperity, so exclusion rather than difference is the mechanism.

Demand decoding: The directive **critically examine** requires a direct position on "Cultural diversity in India marks disadvantage but does not produce it. Critically examine....", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

ORIGINAL MAINS 4 - 15 MARKS

Question: Examine how cross-cutting identities help India manage cultural diversity without permanent conflict.
Answer in about 250 words.

Model thesis: Cross-cutting cleavages prevent any single identity from predicting every disadvantage, and integrative civic and syncretic institutions convert difference into routine interaction rather than standing grievance.

Claim -> named evidence -> analysis -> qualification:

- Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense.
- Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region.
- Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods.
- Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other.

Qualified conclusion: Cross-cutting cleavages prevent any single identity from predicting every disadvantage, and integrative civic and syncretic institutions convert difference into routine interaction rather than standing grievance.

Demand decoding: The directive **examine** requires a direct position on "Examine how cross-cutting identities help India manage cultural diversity without permanent...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Cross-cutting cleavages prevent any single identity from predicting every disadvantage, and integrative civic and syncretic institutions convert difference into routine interaction rather than standing grievance.

Analytical body:

ORIGINAL MAINS 5 - 20 MARKS

Question: Assess diversity, plurality and cohesion in India as an integrated problem of recognition and redistribution. Answer in about 300 words.

Model thesis: Cohesion depends less on the volume of difference than on whether recognition and redistribution are matched to the actual gap, because recognition alone leaves reinforcing deprivation intact and redistribution alone leaves identity grievance unaddressed.

Claim -> named evidence -> analysis -> qualification:

- Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance.
- Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong.
- Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact.
- Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it.
- The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy.

Qualified conclusion: Cohesion depends less on the volume of difference than on whether recognition and redistribution are matched to the actual gap, because recognition alone leaves reinforcing deprivation intact and redistribution alone leaves identity grievance unaddressed.

Demand decoding: The directive **assess** requires a direct position on "Assess diversity, plurality and cohesion in India as an integrated problem of recognition and...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Cohesion depends less on the volume of difference than on whether recognition and redistribution are matched to the actual gap, because recognition alone leaves reinforcing deprivation intact and redistribution alone leaves identity grievance unaddressed.

Analytical body:

1. **Claim and named evidence:** Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance.

Analysis: Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

2. **Claim and named evidence:** Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Cohesion depends less on the volume of difference than on whether recognition and redistribution are matched to the actual gap, because recognition alone leaves reinforcing deprivation intact and redistribution alone leaves identity grievance unaddressed.

Executable exam-length answer / compression plan: For a 20-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise six to eight points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Assess diversity, plurality and cohesion in India as an integrated problem of recognition and...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 6 - 20 MARKS

Question: Evaluate the statistical and evidentiary limits of any claim that Indian diversity causes socio-economic marginality. Answer in about 300 words.

Model thesis: The claim is limited by aggregation masking, by the absence of an all-India caste count and by the stock nature of Census 2011, so an honest answer states the measurement gap as part of the argument.

Claim -> named evidence -> analysis -> qualification:

- At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions.
- Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration.

- Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words.
- Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it.
- Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth.

Qualified conclusion: The claim is limited by aggregation masking, by the absence of an all-India caste count and by the stock nature of Census 2011, so an honest answer states the measurement gap as part of the argument.

Demand decoding: The directive **evaluate** requires a direct position on "Evaluate the statistical and evidentiary limits of any claim that Indian diversity causes...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The claim is limited by aggregation masking, by the absence of an all-India caste count and by the stock nature of Census 2011, so an honest answer states the measurement gap as part of the argument.

Analytical body:

1. **Claim and named evidence:** At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Evaluate the statistical and evidentiary limits of any claim that Indian diversity causes...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Indian Society | **Tier:** Advanced | **GS Paper:** GS-I. **Core area:** Diversity-marginality correlation theory, recognition-versus-redistribution trade-off, and boundary cases where diversity and disadvantage do or do not coincide. **Grounded in:** Census of India (2011); Census 2027 Gazette/PIB announcement; Ministry of Tribal Affairs; audited 2024 GS-I Mains PYQ; cross-cutting-cleavage theory (Lipset-Rokkan tradition). **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor. *Companion:* basic/01_Salient-Features-and-Diversity-of-Indian-Society.md.

1. Architecture

IDENTITY AXES: ethnicity, language, religion, region, caste/tribe

Analytical claim: ANALYSIS: The 2024 GS-I PYQ's proposition is best tested using the cross-cutting-versus-reinforcing-cleavage framework: where identity boundaries intersect (a poor upper-caste household, a prosperous linguistic-minority trading community), no single group is systematically worse off, and diversity remains socially stable; where boundaries reinforce (a remote Scheduled Tribe household that is also low-literacy and economically deprived), diversity itself becomes the visible marker of marginality - the correlation the PYQ asks students to interrogate is real but conditional, not universal.

2. Concepts and distinctions

Concept	Precise meaning
FACT: Cross-cutting cleavage	Social divisions on one axis (e.g., religion) do not align with divisions on another (e.g., class), so a person's disadvantage on one axis is often offset on another - reduces the intensity of group conflict.
FACT: Reinforcing cleavage	Multiple disadvantages (remoteness, low literacy, minority status, poverty) stack on the same group, producing compounded exclusion rather than ordinary diversity.
ANALYSIS: Recognition versus redistribution (Nancy Fraser's distinction, used analytically)	Recognition addresses disrespect for identity and culture; redistribution addresses unequal resources and opportunity - a group may need one, the other, or both, and policy that supplies only recognition (symbolic respect) without redistribution (resources) leaves marginality unresolved.
ANALYSIS: Correlation versus causation	Diversity correlating with marginality in specific cases does not mean diversity causes marginality; historical exclusion, geographic remoteness and asset-poverty are the causal drivers, and diversity is often the visible marker, not the mechanism.
ANALYSIS: Composite culture versus multiculturalism	"Composite culture" describes interwoven practices and shared cultural production in particular Indian settings. Multiculturalism is a family of theories and institutions for managing difference, not simply "separate but tolerated"; neither label proves uniform social mixing across regions.

3. Detailed causal chain: from diversity to marginality (or not)

- 1. Identity endowment:** a group's location on ethnicity, language, religion, region and caste/tribe axes is largely inherited, not chosen.
- 2. Historical exclusion layer:** FACT: some groups faced cumulative historical exclusion - Scheduled Tribes from mainstream land and market access, Scheduled Castes from ritual and occupational mobility, some religious-minority-concentration districts from development-index parity.
- 3. Geographic-infrastructural layer:** ANALYSIS: remoteness (hill and forest tribal belts, border districts) independently reduces school, health and market access regardless of identity.
- 4. Compounding point:** ANALYSIS: when historical exclusion and geographic remoteness coincide on the same group (many Particularly Vulnerable Tribal Groups), diversity and marginality show a strong empirical correlation.
- 5. Counter-case point:** ANALYSIS: where a diverse group avoided this compounding - urban linguistic minorities in trade, dominant landholding castes, several Sikh and Jain business communities - diversity coexists with prosperity, breaking the correlation.
- 6. Policy fork:** ANALYSIS: if the state responds with recognition only (symbolic days, cultural festivals) without redistribution (land, credit, education access), reinforcing cleavages persist; if it responds with redistribution alone without recognition, resentment over identity disrespect can persist even as incomes rise.

4. Institutional and reform architecture

- ANALYSIS: **Federal accommodation as a social device:** linguistic states and local self-government allow cultural groups to govern their own everyday affairs, reducing the felt need for more disruptive assertion (federalism's constitutional design is Polity's territory; here the focus is its social effect of channeling diversity into governance rather than conflict).
- ANALYSIS: **Composite-culture institutions:** shared festivals, syncretic shrines and regional cuisines function as low-cost, continuously renewed integration mechanisms that formal policy cannot easily replicate.
- ANALYSIS: **Targeted development architecture:** where reinforcing cleavages are identified

(PVTG-concentration blocks, minority-concentration districts), area-based and group-based development targeting is the redistribution response; its legal/scheme detail belongs to Social-Justice, not here.

- ANALYSIS: **Reform gap:** recognition-only responses (declaring a group's festival a holiday, naming institutions after community icons) are politically visible but do not by themselves close an access or asset gap
- a recurring Mains trap.

5. Indian applications and boundary cases

- ANALYSIS: **Boundary case 1 - diversity without marginality:** a prosperous linguistic-minority trading community in a metropolitan city is culturally distinct but economically integrated; applying the "diversity causes marginality" claim here is a category error.
- ANALYSIS: **Boundary case 2 - marginality without conspicuous diversity:** a landless labouring household from the locally dominant caste in a poor region may be economically as marginal as a tribal household, showing that class-based marginality can exist without a distinct cultural-identity marker.
- ANALYSIS: **Boundary case 3 - reinforcing case:** a Particularly Vulnerable Tribal Group household in a remote forest block combines identity distinctiveness, geographic remoteness and asset-poverty - the clearest case where the PYQ's correlation holds strongly.

6. Limitations and trade-offs

- ANALYSIS: **Correlation-causation conflation:** treating diversity as causal (rather than as a marker correlated with historical exclusion) risks policy that "manages identity" instead of addressing the real deprivation driver - a central critique to raise in any 15-mark answer on this proposition.
- ANALYSIS: **Aggregation masking:** national-level diversity statistics can mask which specific sub-groups are reinforced-marginal versus cross-cutting-prosperous; disaggregated, group-specific data is needed to avoid over-generalising the correlation either way.

7. Must-Know Facts for Advanced Prelims

- FACT: Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts; that shorthand is not an exhaustive taxonomy. The Eighth Schedule currently lists 22 languages.
- FACT: Census 2011 recorded 121 rationalised languages spoken by 10,000 or more persons, from over 19,500 raw mother-tongue returns - evidence of the scale of linguistic diversity.
- FACT: Scheduled Tribes were about 8.6% and Scheduled Castes about 16.6% of the population at Census 2011 (last full Census).
- FACT: The Government has announced caste enumeration in Census 2027. Gazette S.O. 2681(E) fixes reference dates of 1 March 2027 (most of India) and 1 October 2026 (specified snow-bound areas); this is not the first caste enumeration in Indian history.
- ANALYSIS: Recognition-redistribution as a named analytical pair (Fraser's framework, used here as an analytical lens, not a constitutional doctrine) helps structure any answer distinguishing symbolic from substantive responses to diversity-linked marginality.

8. Advanced Prelims traps

- WRONG: A high statistical correlation between a diversity marker and poverty proves the marker causes poverty. -> Correlation reflects historical exclusion and geography operating through that marker; causation runs through exclusion mechanisms, not identity itself.
- WRONG: Recognition measures (declaring a holiday, renaming an institution) are equivalent to redistribution. -> Recognition addresses respect and visibility; redistribution addresses resources and opportunity - conflating them under-delivers on the resource gap.
- WRONG: All Scheduled Tribes or all religious minorities are uniformly marginalised. -> Outcomes

vary sharply by region, urban-rural location and asset base; uniform claims flatten real variation and are a common Mains overreach.

- **WRONG:** Census 2027's caste enumeration has already produced data on caste-linked deprivation.

-> The exercise remains prospective as of 21 July 2026; no results exist to cite. Do not also mistake it for India's first historical caste count.

9. CURRENT: Current-anchor note

- **CURRENT:** Census 2027 remains prospective: the Gazette fixes reference dates of 1 October 2026

for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere; PIB announced caste enumeration. Any Mains answer must state this as a forthcoming operation, not a data source, and must not call it the first caste enumeration in Indian history.

10. PYQ-based analytical application

- **FACT: 2024 GS-I (15 marks, verbatim):** "Critically analyse the proposition that there is a high correlation between India's cultural diversities and socio-economic marginalities." Analytical route: (a) state the correlation with named examples (PVTGs, some minority-concentration districts); (b) apply the cross-cutting/reinforcing framework to show the correlation is conditional; (c) invoke the recognition-redistribution distinction to argue that policy responses must match the actual gap (resource versus respect); (d) conclude that diversity is a marker, not a cause, of marginality, so the proposition should be accepted only where cleavages reinforce, not as a universal law.

11. Mains-ready framework

Central thesis: Cultural diversity in India correlates with socio-economic marginality only where identity axes reinforce historical exclusion and geographic remoteness on the same group; where axes cross-cut, diversity and prosperity coexist, so the correct policy response is to target the exclusion mechanism through redistribution, not to treat diversity itself as the problem.

1. State the proposition precisely, citing the exact 2024 PYQ wording.
2. Define cross-cutting versus reinforcing cleavages as the analytical spine.
3. Give at least one reinforcing-case example and one cross-cutting counter-example.
4. Distinguish correlation from causation explicitly.
5. Apply the recognition-versus-redistribution lens to evaluate current state responses.
6. Flag the aggregation-masking limitation - national averages hide group-specific reality.
7. Diagnose which gap (voice, access, or measurement) dominates in the cited example.
8. Recommend disaggregated, group-specific and rights-sensitive targeting, not blanket diversity management.

12. Probable questions

- **ANALYSIS: Prelims:** Which theoretical distinction separates cross-cutting from reinforcing social cleavages?
- **FACT: Mains (15 marks, 2024 GS-I PYQ, verbatim):** Critically analyse the proposition that there is a high correlation between India's cultural diversities and socio-economic marginalities.
- **ANALYSIS: Mains (15 marks):** "Diversity is a marker of marginality, not its cause." Discuss with reference to Indian social groups.
- **ANALYSIS: Mains (10 marks):** Distinguish between recognition and redistribution as responses to diversity-linked disadvantage.

13. Study links

- **FACT:** Foundation companion: [basic/01_Salient-Features-and-Diversity-of-Indian-Society.md](#).
- **FACT:** Geography/basic/37_Cultural-and-Social-Geography-of-India.md - spatial cultural-region models (do not re-derive here).

- FACT: advanced/14_Regionalism.md - disparity-specific causal analysis and NITI SDG linkage.
- FACT: advanced/03_Tribe-and-Tribal-Society.md - the sharpest reinforcing-cleavage case (displacement and rehabilitation).

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2019
- **Paper(s):** GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2019	GS-I	8	What makes Indian society unique in sustaining its culture	Discuss · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- What makes Indian society unique in sustaining its culture

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

CONSOLIDATED REGISTER NOTES

Salient Features and Diversity of Indian Society: RAPID CONCEPT AND EVIDENCE MAP

1. **Five diversity axes:** Indian diversity runs along ethnic or ethno-linguistic, linguistic, religious, regional and caste-tribe axes that are layered and overlapping rather than parallel, so cohesion depends on whether the axes reinforce each other or cut across each other.
2. **Diversity versus plurality:** Diversity is the objective presence of different identities, while plurality is coexistence with mutual recognition, so a headcount of difference is not by itself evidence of acceptance.
3. **Disparity versus marginality:** Disparity is unequal development outcomes between groups or regions, while marginality is exclusion from opportunity, resources or voice; neither follows automatically from the fact of difference.
4. **Four language families:** Indo-Aryan, Dravidian, Austroasiatic and Tibeto-Burman are the four large language families commonly used in UPSC texts, and that shorthand is not an exhaustive taxonomy of every Indian language.
5. **Eighth Schedule listing:** The Eighth Schedule of the Constitution currently lists 22 languages; the constitutional doctrine of that listing belongs to Polity and is cited here only as recognition evidence.
6. **Census 2011 mother-tongue rationalisation:** Census 2011 recorded over 19,500 raw mother-tongue returns, rationalised into 121 languages spoken by 10,000 or more persons, which fixes the scale of linguistic depth.
7. **Census 2011 Scheduled stocks:** At Census 2011, the last completed full count, Scheduled Tribes were about 8.6 per cent and Scheduled Castes about 16.6 per cent of the population, so diversity questions are also distribution questions.
8. **No biological race classification:** Older physical-anthropology labels are not a sound description of contemporary Indian society, and official Census operations do not classify Indians into biological races;

self-identification, language, culture and regional history are used instead.

9. **Cross-cutting cleavage:** Where identity axes do not align, disadvantage on one axis is often offset on another, so no single identity always predicts deprivation and group conflict is less intense.
10. **Reinforcing cleavage:** Where remoteness, low literacy, asset-poverty and minority status stack on the same household, ordinary diversity compounds into marginality and the correlation the examiner asks about becomes strong.
11. **Syncretic integrative traditions:** Sufi dargahs, Bhakti saint-poets, shared local deities and regional festivals such as Onam, Bihu and Pongal create composite belonging that crosses religion and region.
12. **Everyday civic integration:** Common schools, markets, elections and public transport work as routine integrative spaces in which diverse groups interact, and internal migration for work normalises mixed neighbourhoods.
13. **Particularly Vulnerable Tribal Groups:** The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy.
14. **Diversity without marginality:** Prosperous linguistic-minority trading communities in metropolitan India and several Sikh and Jain business communities show that cultural distinctiveness does not by itself predict deprivation.
15. **Marginality without a cultural marker:** A landless labouring household of the locally dominant caste in a poor region shows class-based deprivation operating without a distinct cultural marker, so the correlation is not symmetric.
16. **Accommodation as the continuity mechanism:** Indian cultural continuity worked through accommodative absorption and institutional recognition rather than insulation, illustrated by the States Reorganisation Act, 1956 accommodating linguistic assertion through statehood.
17. **Recognition versus redistribution:** Recognition addresses disrespect for identity and culture while redistribution addresses unequal resources and opportunity, so a response that supplies only symbolic recognition leaves an access or asset gap intact.
18. **Correlation is not causation:** Historical exclusion, geographic remoteness and asset-poverty are the causal drivers of deprivation, and cultural diversity is usually the visible marker rather than the mechanism that produces it.
19. **Census 2027 measurement boundary:** Gazette S.O. 2681(E) dated 16 June 2025 fixes Census 2027 reference dates at 1 October 2026 for Ladakh and specified snow-bound areas and 1 March 2027 elsewhere, and the Press Information Bureau announcement of 30 April 2025 confirms caste enumeration; the exercise is prospective, yields no figure to quote and is not India's first historical caste enumeration.
20. **Verified direct Mains demands:** Two direct General Studies Paper-I demands are verified for this owner: the 2024 question requiring a critical analysis of the proposition of a high correlation between India's cultural diversities and socio-economic marginalities in 250 words, and the 2019 question asking what makes Indian society unique in sustaining its culture in 150 words.

Salient Features and Diversity of Indian Society: CLOSE-OPTION AND CAUSAL TRAPS

- Do not treat diversity and disparity as interchangeable words.
- Do not present unity-in-diversity as a guarantee that conflict never occurs.
- Do not assume that every minority or tribal community is automatically marginalised.
- Do not reduce Indian diversity to religion and language alone.
- Do not describe Indians through older biological race categories.
- Do not convert a statistical correlation into a causal claim about identity.
- Do not equate a symbolic recognition measure with a redistribution measure.
- Do not quote any caste figure from the prospective Census 2027 enumeration.
- Do not call the announced Census 2027 caste count India's first historical caste enumeration.

- Do not present Census 2011 shares as a current-year estimate rather than a stock.
- Do not let a national aggregate hide which sub-group is reinforced-marginal.
- Do not invent a language count, community income share or district-level figure.
- Do not answer a disparity question with a purely cultural explanation.
- Do not treat the two 2023 Prelims sports items routed to this owner as Indian Society content.

Salient Features and Diversity of Indian Society: ANSWER-WRITING SPINE

DEFINE THE SOCIAL UNIT -> STATE THE BOUNDARY RULE AND WHO IS INCLUDED
-> GROUP NAMED EVIDENCE BY MECHANISM OF REPRODUCTION OR CHANGE
-> TEST COUNTER-CASES, REGIONAL VARIATION AND CATEGORY LIMITS
-> SEPARATE CORRELATION FROM CAUSATION AND LAW FROM SOCIAL ACCEPTANCE
-> CLOSE WITH A GRADED, POLICY-AWARE VERDICT AND A DATA CAVEAT

Salient Features and Diversity of Indian Society: CURRENT-LINK AND DATA BOUNDARY

No additional live official item was verified for this topic on 2026-09-02. The package uses only the dated official anchors already carried by the repository owners: the Ministry of Tribal Affairs state-wise Particularly Vulnerable Tribal Groups list dated 9 July 2024, Gazette S.O. 2681(E) dated 16 June 2025 fixing Census 2027 reference dates, the Press Information Bureau announcement of 30 April 2025 confirming caste enumeration, and Census 2011 as the last completed full count. No caste, demographic or district figure is invented, and the Census 2027 exercise is described only as prospective.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: Reading Indian diversity

AXES -> ethnicity, language, religion, region, caste and tribe
RELATION -> layered and overlapping, not parallel lists
TEST -> do the axes cross-cut or reinforce on one household
OUTCOME -> cohesion or compounded marginality
MUST REMEMBER: Indian society is plural, stratified and relational: language, religion, caste, tribe, class, gender, region, rural-urban location and migration overlap, while constitutional citizenship and institutions create unity without erasing difference.

ASCII MASTER FLOW - PANEL 2/12: Four-term distinction

DIVERSITY -> objective presence of different identities
PLURALITY -> coexistence with mutual recognition
DISPARITY -> unequal outcomes between groups or regions
MARGINALITY -> exclusion from opportunity, resources or voice

ASCII MASTER FLOW - PANEL 3/12: Linguistic layer

FAMILIES -> Indo-Aryan, Dravidian, Austroasiatic, Tibeto-Burman
RECOGNITION -> Eighth Schedule currently lists 22 languages
CENSUS 2011 -> 19,500 plus raw returns rationalised to 121 languages
LIMIT -> the four-family shorthand is not an exhaustive taxonomy

ASCII MASTER FLOW - PANEL 4/12: Scale of recognised exclusion

CENSUS 2011 -> last completed full count
SCHEDULED TRIBES -> about 8.6 per cent of population
SCHEDULED CASTES -> about 16.6 per cent of population
STATUS -> a stock figure, never a current-year estimate

ASCII MASTER FLOW - PANEL 5/12: Cleavage test

AXES UNCORRELATED -> cross-cutting, diversity stays plural
AXES OVERLAP ON ONE GROUP -> reinforcing, diversity compounds
REINFORCED STACK -> remoteness, low literacy, asset-poverty
VERDICT -> the correlation is conditional, not universal

ASCII MASTER FLOW - PANEL 6/12: Integrative mechanisms

SYNCRETIC IDIOM -> dargahs, Bhakti poets, shared shrines
FESTIVAL CIRCUIT -> Onam, Bihu and Pongal as composite belonging
CIVIC SPACE -> schools, markets, elections, public transport
MIGRATION -> mixed neighbourhoods normalise difference
CLOSE DISTINCTION: Diversity is not inequality, pluralism is not assimilation, integration is not homogenisation, and coexistence is not proof of equal power; intersectionality explains combined disadvantages without treating every identity combination as identical.

ASCII MASTER FLOW - PANEL 7/12: Reinforcing case card

SOURCE -> Ministry of Tribal Affairs list dated 9 July 2024
COUNT -> 75 Particularly Vulnerable Tribal Groups
SPREAD -> 18 States and the UT of Andaman and Nicobar Islands
LIMIT -> administrative criteria, not a ranking of communities

ASCII MASTER FLOW - PANEL 8/12: Counter-evidence pair

DIVERSITY WITHOUT MARGINALITY -> prosperous linguistic-minority traders
ALSO -> several Sikh and Jain business communities
MARGINALITY WITHOUT MARKER -> landless dominant-caste labourer
RULE -> the correlation is neither universal nor symmetric

ASCII MASTER FLOW - PANEL 9/12: Continuity mechanism

ABSORPTION -> add a tradition without extinguishing the earlier one
RECOGNITION -> Eighth Schedule listing of 22 languages
TERRITORY -> States Reorganisation Act, 1956 accommodates language
COST -> hierarchy persisted inside the same continuity

ASCII MASTER FLOW - PANEL 10/12: Recognition and redistribution

RECOGNITION -> respect, visibility and cultural standing
REDISTRIBUTION -> land, credit, schooling and access
MISMATCH -> recognition alone leaves the asset gap intact
DIAGNOSIS -> identify the gap before choosing the instrument

ASCII MASTER FLOW - PANEL 11/12: Evidence ladder

STRONG -> Census 2011 stocks and the dated official PVTG list
MODERATE -> named integrative practices and boundary cases
WEAK -> national aggregates about which sub-group is excluded
UNSUPPORTED -> any caste figure from prospective Census 2027

ASCII MASTER FLOW - PANEL 12/12: Diversity answer spine

OPEN -> state the proposition and the axis structure
BODY -> reinforcing cases, then cross-cutting counter-cases
REFRAME -> exclusion and remoteness are the mechanism
CLOSE -> conditional verdict plus the measurement caveat
EVIDENCE LIMIT: Use Census 2011 language/religion baselines, the notified PVTG position and named regional examples with source-date-status labels; neither harmony nor conflict is timeless, and correlation between diversity and marginality is not sufficient causation.
