

COMPLETE LEARNING SESSION

Tribe and Tribal Society - Learner-v2 Refreshed

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / SESSION INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Tribe and Tribal Society - Learner-v2 Complete Learning Session	6

Tribe and Tribal Society - Learner-v2 Complete Learning Session

Authoring-only generation: 2026-09-02. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-02.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. The OCR-searchable official General Studies Paper-I question papers held under books\mains and books\more_previous_papers were used only to confirm the wording of routed Mains PYQs. No official answer key, marking scheme, page precision or unsupported quotation was imported from them.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** Three direct General Studies Paper-I Mains demands are verified for this owner. The 2025 demand is routed in the audited 2024-2025 ledger to the Basic owner; the 2021 and 2022 demands are routed in the audited 2018-2023 ledger to the Advanced owner, and the Core owner records that Core routing supersedes, so all three are answered from the Basic spine. Each wording reproduced below was confirmed against the locally held official General Studies Paper-I question papers. The owner additionally carries one routed 2021 Prelims item on the Halbi, Ho and Kui tribal languages; its official key is not held locally, so no option is inferred and it is not converted into a solved answer.
- **Live-link boundary:** No additional live official item was verified for this topic on 2026-09-02. Only the dated official anchors already carried by the repository owners are used, each with its issuing body and date. The package invents no caste, tribe, demographic or agrarian statistic, no legal or constitutional claim and no policy status.
- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Indian Society Basic/Core is answer-complete before optional Advanced depth.
Concept method	Define and distinguish the institution, identity, process, legal category and measured indicator before analysis.
Sociological method	Structure/institution -> mechanism and agency -> differentiated group/region outcome -> feedback, resistance and qualification.
Evidence method	Claim -> named Indian community/region/institution/dataset -> analysis -> source-date-status or causal qualification.
Non-homogenisation	Caste, tribe, women, religion, region and rural/urban groups retain internal class, gender, locality and historical variation.
Boundary method	Constitutional right, statutory mandate, executive scheme, implementation and lived social outcome remain distinct.
Practice contract	Every solved item has demand decoding, a detailed examiner-grade model, executable timed/compression plan, marks rationale and answer-specific improvement.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner:

upsc-ai-kit\knowledge\Indian-Society\basic\03_Tribe-and-Tribal-Society.md **Canonical topic owner:** upsc-ai-kit\knowledge\Indian-Society\basic\03_Tribe-and-Tribal-Society.md **Optional**

Advanced owner:

upsc-ai-kit\knowledge\Indian-Society\advanced\03_Tribe-and-Tribal-Society.md **Official syllabus mapping:** upsc-ai-kit\knowledge\Indian-Society\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- **Definition discipline:** close concepts and legal-administrative categories share a comparison axis and are never treated as synonyms.
- **Mechanism discipline:** correlation, temporal sequence and aggregate association do not establish causation; identify institutions, incentives, norms, power and agency.
- **Historical discipline:** colonial, constitutional, developmental, liberalisation and contemporary phases are separated without a linear tradition-to-modernity story.
- **Intersectional discipline:** overlapping caste, tribe, class, gender, religion, disability, region and life-course positions are analysed without creating a single homogeneous category.
- **India discipline:** use named communities, movements, institutions, cities, states and regional contrasts without stereotyping or treating one case as nationally representative.
- **Data discipline:** Census 2011, NFHS, PLFS, SRS, Agriculture Census, MPI and scheme claims retain source, reference period, release date, coverage and provisional/final status.
- **PYQ discipline:** repository routing ledgers and locally held papers control wording and metadata; reconstructed wording and unavailable official keys remain labelled.
- **Current-status note, rechecked 2026-09-05:** No additional live official item was verified for this topic on 2026-09-02. Only the dated official anchors already carried by the repository owners are used, each with its issuing body and date. The package invents no caste, tribe, demographic or agrarian statistic, no legal or constitutional claim and no policy status.

Live/official context sources recorded by the predecessor generation:

- No volatile live claim is necessary for the static sociological core.

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - What a tribe is and is not

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: What a tribe is and is not is the part of Tribe and Tribal Society that explains how Scheduled Tribe as a legal category fit into one examinable social relationship.

Technical definition: In sociological analysis, What a tribe is and is not denotes the source-bounded relationship among Scheduled Tribe as a legal category, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

What a tribe is and is not should be analysed as a relation among Scheduled Tribe as a legal category, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- What
- tribe
- Scheduled
- legal
- category
- single

How to use them: Define What, tribe, Scheduled; cite legal as named evidence; then apply this qualification: A legal notification is not a sociological checklist and neither defines authenticity. Conclude by showing how the distinction supports this answer route: Fix the category before any tribal argument begins..

VISUAL FIRST

WHAT A TRIBE IS AND IS NOT

01. Scheduled Tribe as a legal category

BOUNDARY -> A legal notification is not a sociological checklist and neither defines authenticity.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.

NAMED EVIDENCE AND MECHANISM

- Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.

EXAMINER CAUTION

- A legal notification is not a sociological checklist and neither defines authenticity.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to What a tribe is and is not.
- **Mains:** Fix the category before any tribal argument begins.

MINI RECAP

- **Evidence chain:** Scheduled Tribe as a legal category
- **Qualified use:** Fix the category before any tribal argument begins.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS What tribe Scheduled legal category single	2. MECHANISM / ARGUMENT relate Scheduled Tribe as a legal category through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that fix the category before any tribal argument begins.	4. UPSC TRAP / ANSWER-USE LIMIT: A legal notification is not a sociological checklist and neither defines authenticity.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: What a tribe is and is not converts named social evidence into a qualified argument			

SESSION 2 - FOUNDATION - The tribe-caste continuum and its limit

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The tribe-caste continuum and its limit is the part of Tribe and Tribal Society that explains how Tribe-caste continuum fit into one examinable social relationship.

Technical definition: In sociological analysis, The tribe-caste continuum and its limit denotes the source-bounded relationship among Tribe-caste continuum, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The tribe-caste continuum and its limit should be analysed as a relation among Tribe-caste continuum, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- tribe-caste
- continuum
- historical
- sociological
- thesis
- that

How to use them: Define tribe-caste, continuum, historical; cite sociological as named evidence; then apply this qualification: The thesis fits some regional histories and does not dissolve Scheduled Tribe status. Conclude by showing how the distinction supports this answer route: Keep a sociological thesis apart from a legal category..

VISUAL FIRST

THE TRIBE-CASTE CONTINUUM AND ITS LIMIT

01. Tribe-caste continuum

BOUNDARY -> The thesis fits some regional histories and does not dissolve Scheduled Tribe status.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

NAMED EVIDENCE AND MECHANISM

- The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

EXAMINER CAUTION

- The thesis fits some regional histories and does not dissolve Scheduled Tribe status.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to The tribe-caste continuum and its limit.
- **Mains:** Keep a sociological thesis apart from a legal category.

MINI RECAP

- **Evidence chain:** Tribe-caste continuum
- **Qualified use:** Keep a sociological thesis apart from a legal category.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS tribe-caste continuum historical sociological thesis that	2. MECHANISM / ARGUMENT relate Tribe-caste continuum through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that keep a sociological thesis apart from a legal category.	4. UPSC TRAP / ANSWER-USE LIMIT: The thesis fits some regional histories and does not dissolve Scheduled Tribe status.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: The tribe-caste continuum and its limit converts named social evidence into a qualified argument			

SESSION 3 - FOUNDATION - Elwin's isolation

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Elwin's isolation is the part of Tribe and Tribal Society that explains how Elwin's isolation fit into one examinable social relationship.

Technical definition: In sociological analysis, Elwin's isolation denotes the source-bounded relationship among Elwin's isolation, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Elwin's isolation should be analysed as a relation among Elwin's isolation, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Elwin's
- isolation
- Verrier
- Elwin
- argued
- from

How to use them: Define Elwin's, isolation, Verrier; cite Elwin as named evidence; then apply this qualification: Protection was a response to exploitative contact, not a claim that tribal societies were static. Conclude by showing how the distinction supports this answer route: Supply the first of the three named policy positions..

VISUAL FIRST

ELWIN'S ISOLATION

01. Elwin's isolation

BOUNDARY -> Protection was a response to exploitative contact, not a claim that tribal societies were static.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.

NAMED EVIDENCE AND MECHANISM

- Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.

EXAMINER CAUTION

- Protection was a response to exploitative contact, not a claim that tribal societies were static.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Elwin's isolation.
- **Mains:** Supply the first of the three named policy positions.

MINI RECAP

- **Evidence chain:** Elwin's isolation
- **Qualified use:** Supply the first of the three named policy positions.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Elwin's isolation Verrier Elwin argued from	2. MECHANISM / ARGUMENT relate Elwin's isolation through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that supply the first of the three named policy positions.	4. UPSC TRAP / ANSWER-USE LIMIT: Protection was a response to exploitative contact, not a claim that tribal societies were static.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Elwin's isolation converts named social evidence into a qualified argument			

SESSION 4 - CORE - Ghurye's assimilation

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Ghurye's assimilation is the part of Tribe and Tribal Society that explains how Ghurye's assimilation fit into one examinable social relationship.

Technical definition: In sociological analysis, Ghurye's assimilation denotes the source-bounded relationship among Ghurye's assimilation, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Ghurye's assimilation should be analysed as a relation among Ghurye's assimilation, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Ghurye's
- assimilation
- historically

- influential
- contested
- argument

How to use them: Define Ghurye's, assimilation, historically; cite influential as named evidence; then apply this qualification: The phrase is quoted as his contested argument and never as a description of identity. Conclude by showing how the distinction supports this answer route: Supply the second named position with its criticism attached..

VISUAL FIRST

GHURYE'S ASSIMILATION

01. Ghurye's assimilation

BOUNDARY -> The phrase is quoted as his contested argument and never as a description of identity.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.

NAMED EVIDENCE AND MECHANISM

- G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.

EXAMINER CAUTION

- The phrase is quoted as his contested argument and never as a description of identity.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Ghurye's assimilation.
- **Mains:** Supply the second named position with its criticism attached.

MINI RECAP

- **Evidence chain:** Ghurye's assimilation
- **Qualified use:** Supply the second named position with its criticism attached.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Ghurye's assimilation historically influential contested argument	2. MECHANISM / ARGUMENT relate Ghurye's assimilation through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that supply the second named position with its criticism attached.	4. UPSC TRAP / ANSWER-USE LIMIT: The phrase is quoted as his contested argument and never as a description of identity.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Ghurye's assimilation converts named social evidence into a qualified argument			

SESSION 5 - CORE - Nehru's Panchsheel integration

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Nehru's Panchsheel integration is the part of Tribe and Tribal Society that explains how Nehru's Panchsheel for Tribals fit into one examinable social relationship.

Technical definition: In sociological analysis, Nehru's Panchsheel integration denotes the source-bounded relationship among Nehru's Panchsheel for Tribals, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Nehru's Panchsheel integration should be analysed as a relation among Nehru's Panchsheel for Tribals, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Nehru's
- Panchsheel
- integration
- Tribals
- Jawaharlal
- integrationist

How to use them: Define Nehru's, Panchsheel, integration; cite Tribals as named evidence; then apply this qualification: Integration is contact with safeguards, which is different from both isolation and absorption. Conclude by showing how the distinction supports this answer route: Supply the synthesis position that examiners expect by name..

VISUAL FIRST

NEHRU'S PANCHSHEEL INTEGRATION

01. Nehru's Panchsheel for Tribals

BOUNDARY -> Integration is contact with safeguards, which is different from both isolation and absorption.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

NAMED EVIDENCE AND MECHANISM

- Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

EXAMINER CAUTION

- Integration is contact with safeguards, which is different from both isolation and absorption.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Nehru's Panchsheel integration.
- **Mains:** Supply the synthesis position that examiners expect by name.

MINI RECAP

- **Evidence chain:** Nehru's Panchsheel for Tribals
- **Qualified use:** Supply the synthesis position that examiners expect by name.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Nehru's Panchsheel integration Tribals Jawaharlal integrationist	2. MECHANISM / ARGUMENT relate Nehru's Panchsheel for Tribals through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that supply the synthesis position that examiners expect by name.	4. UPSC TRAP / ANSWER-USE LIMIT: Integration is contact with safeguards, which is different from both isolation and absorption.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Nehru's Panchsheel integration converts named social evidence into a qualified argument			

SESSION 6 - CORE - Acculturation as the actual outcome

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Acculturation as the actual outcome is the part of Tribe and Tribal Society that explains how Acculturation as the actual outcome fit into one examinable social relationship.

Technical definition: In sociological analysis, Acculturation as the actual outcome denotes the source-bounded relationship among Acculturation as the actual outcome, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Acculturation as the actual outcome should be analysed as a relation among Acculturation as the actual outcome, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **Acculturation**
- **actual**
- **outcome**
- **None**
- **three**
- **positions**

How to use them: Define Acculturation, actual, outcome; cite None as named evidence; then apply this qualification: Acculturation is gradual and often two-way and is not the same as forced assimilation. Conclude by showing how the distinction supports this answer route: Explain why no position was implemented in full..

VISUAL FIRST

ACCULTURATION AS THE ACTUAL OUTCOME

01. Acculturation as the actual outcome

BOUNDARY -> Acculturation is gradual and often two-way and is not the same as forced assimilation.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.

NAMED EVIDENCE AND MECHANISM

- None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.

EXAMINER CAUTION

- Acculturation is gradual and often two-way and is not the same as forced assimilation.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Acculturation as the actual outcome.
- **Mains:** Explain why no position was implemented in full.

MINI RECAP

- **Evidence chain:** Acculturation as the actual outcome
- **Qualified use:** Explain why no position was implemented in full.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW | SUBTOPIC CLOSURE FLOW

1. KEY TERMS / DEFINITIONS

Acculturation | actual | outcome | None | three | positions

2. MECHANISM / ARGUMENT

relate Acculturation as the actual outcome through unit, boundary rule and direction of change

3. CONSEQUENCE / CONTRAST

This relation supports the answer route that explain why no position was implemented in full.

4. UPSC TRAP / ANSWER-USE

LIMIT: Acculturation is gradual and often two-way and is not the same as forced assimilation.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Acculturation as the actual outcome converts named social evidence into a qualified argument

SESSION 7 - CORE - Why projects are sited in tribal regions

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Why projects are sited in tribal regions is the part of Tribe and Tribal Society that explains how Resource overlap fit into one examinable social relationship.

Technical definition: In sociological analysis, Why projects are sited in tribal regions denotes the source-bounded relationship among Resource overlap, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Why projects are sited in tribal regions should be analysed as a relation among Resource overlap, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- projects
- sited
- tribal
- regions
- Resource
- overlap

How to use them: Define projects, sited, tribal; cite regions as named evidence; then apply this qualification: Resource geography is a structural pressure, not an intention to displace. Conclude by showing how the distinction supports this answer route: Give the causal reason displacement recurs rather than a moral assertion..

VISUAL FIRST

WHY PROJECTS ARE SITED IN TRIBAL REGIONS

01. Resource overlap

BOUNDARY -> Resource geography is a structural pressure, not an intention to displace.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

NAMED EVIDENCE AND MECHANISM

- Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

EXAMINER CAUTION

- Resource geography is a structural pressure, not an intention to displace.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Why projects are sited in tribal regions.
- **Mains:** Give the causal reason displacement recurs rather than a moral assertion.

MINI RECAP

- **Evidence chain:** Resource overlap
- **Qualified use:** Give the causal reason displacement recurs rather than a moral assertion.

CLOSING RECALL FLOW

1. KEY TERMS / DEFINITIONS projects sited tribal regions Resource overlap	2. MECHANISM / ARGUMENT relate Resource overlap through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that give the causal reason displacement recurs rather than a moral assertion.	4. UPSC TRAP / ANSWER-USE LIMIT: Resource geography is a structural pressure, not an intention to displace.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Why projects are sited in tribal regions converts named social evidence into a qualified argument			

SESSION 8 - CORE - Displacement and land alienation

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Displacement and land alienation is the part of Tribe and Tribal Society that explains how Project displacement and Land alienation fit into one examinable social relationship.

Technical definition: In sociological analysis, Displacement and land alienation denotes the source-bounded relationship among Project displacement and Land alienation, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Displacement and land alienation should be analysed as a relation among Project displacement and Land alienation, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- **Displacement**
- **land**
- **alienation**
- **Project**
- **Mining**
- **industrial**

How to use them: Define Displacement, land, alienation; cite Project as named evidence; then apply this qualification: The two mechanisms differ, so they require different remedies and must not be merged. Conclude by showing how the distinction supports this answer route: Distinguish an acute event from a cumulative process in the same answer..

VISUAL FIRST

DISPLACEMENT AND LAND ALIENATION

01. Project displacement

|
v

02. Land alienation

BOUNDARY -> The two mechanisms differ, so they require different remedies and must not be merged.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

NAMED EVIDENCE AND MECHANISM

- Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain.
- Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

EXAMINER CAUTION

- The two mechanisms differ, so they require different remedies and must not be merged.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Displacement and land alienation.
- **Mains:** Distinguish an acute event from a cumulative process in the same answer.

MINI RECAP

- **Evidence chain:** Project displacement -> Land alienation
- **Qualified use:** Distinguish an acute event from a cumulative process in the same answer.

CLOSING RECALL FLOW

SUBTOPIC CLOSURE FLOW SUBTOPIC CLOSURE FLOW			
1. KEY TERMS / DEFINITIONS Displacement land alienation Project Mining industrial	2. MECHANISM / ARGUMENT relate Project displacement and Land alienation through unit, boundary rule and direction of change	3. CONSEQUENCE / CONTRAST This relation supports the answer route that distinguish an acute event from a cumulative process in the same answer.	4. UPSC TRAP / ANSWER-USE LIMIT: The two mechanisms differ, so they require different remedies and must not be merged.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Displacement and land alienation converts named social evidence into a qualified argument			

SESSION 9 - CORE - Rehabilitation as restoration or compensation

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Rehabilitation as restoration or compensation is the part of Tribe and Tribal Society that explains how Rehabilitation as restoration or compensation fit into one examinable social relationship.

Technical definition: In sociological analysis, Rehabilitation as restoration or compensation denotes the source-bounded relationship among Rehabilitation as restoration or compensation, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Rehabilitation as restoration or compensation should be analysed as a relation among Rehabilitation as restoration or compensation, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Rehabilitation
- restoration
- compensation
- Restoration-oriented
- rebuilds
- land

How to use them: Define Rehabilitation, restoration, compensation; cite Restoration-oriented as named evidence; then apply this qualification: Payment is not restoration, and this distinction carries the entire policy argument. Conclude by showing how the distinction supports this answer route: Convert a development-versus-tribals debate into a design question..

VISUAL FIRST

REHABILITATION AS RESTORATION OR COMPENSATION

01. Rehabilitation as restoration or compensation

BOUNDARY -> Payment is not restoration, and this distinction carries the entire policy argument.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

NAMED EVIDENCE AND MECHANISM

- Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

EXAMINER CAUTION

- Payment is not restoration, and this distinction carries the entire policy argument.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Rehabilitation as restoration or compensation.
- **Mains:** Convert a development-versus-tribals debate into a design question.

MINI RECAP

- **Evidence chain:** Rehabilitation as restoration or compensation
- **Qualified use:** Convert a development-versus-tribals debate into a design question.

CLOSING RECALL FLOW

UPSC TRAP / ANSWER-USE LIMIT: Payment is not restoration, and this distinction carries the entire policy argument.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Rehabilitation as restoration or compensation converts named social evidence into a qualified argument			

SESSION 10 - CORE - What decides the welfare sign

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: What decides the welfare sign is the part of Tribe and Tribal Society that explains how Rehabilitation decides the welfare sign fit into one examinable social relationship.

Technical definition: In sociological analysis, What decides the welfare sign denotes the source-bounded relationship among Rehabilitation decides the welfare sign, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

What decides the welfare sign should be analysed as a relation among Rehabilitation decides the welfare sign, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- What
- decides
- welfare
- sign
- Rehabilitation
- restores

How to use them: Define What, decides, welfare; cite sign as named evidence; then apply this qualification: Outcomes are analytical, so no national rehabilitation success rate may be asserted. Conclude by showing how the distinction supports this answer route: State the decisive variable that a give-your-opinion directive rewards..

VISUAL FIRST

WHAT DECIDES THE WELFARE SIGN

01. Rehabilitation decides the welfare sign

BOUNDARY -> Outcomes are analytical, so no national rehabilitation success rate may be asserted.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.

NAMED EVIDENCE AND MECHANISM

- Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.

EXAMINER CAUTION

- Outcomes are analytical, so no national rehabilitation success rate may be asserted.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to What decides the welfare sign.
- **Mains:** State the decisive variable that a give-your-opinion directive rewards.

MINI RECAP

- **Evidence chain:** Rehabilitation decides the welfare sign
- **Qualified use:** State the decisive variable that a give-your-opinion directive rewards.

2. MECHANISM / ARGUMENT

relate Rehabilitation decides the welfare sign through unit, boundary rule and direction of change

3. CONSEQUENCE / CONTRAST

This relation supports the answer route that state the decisive variable that a give-your-opinion directive rewards.

4. UPSC TRAP / ANSWER-USE

LIMIT: Outcomes are analytical, so no national rehabilitation success rate may be asserted.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: What decides the welfare sign converts named social evidence into a qualified argument

SESSION 11 - CORE - Particularly Vulnerable Tribal Groups as the sharpest case

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Particularly Vulnerable Tribal Groups as the sharpest case is the part of Tribe and Tribal Society that explains how Particularly Vulnerable Tribal Groups fit into one examinable social relationship.

Technical definition: In sociological analysis, Particularly Vulnerable Tribal Groups as the sharpest case denotes the source-bounded relationship among Particularly Vulnerable Tribal Groups, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Particularly Vulnerable Tribal Groups as the sharpest case should be analysed as a relation among Particularly Vulnerable Tribal Groups, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Particularly
- Vulnerable
- Tribal
- Groups
- sharpest
- case

How to use them: Define Particularly, Vulnerable, Tribal; cite Groups as named evidence; then apply this qualification: The list is a dated administrative document with policy criteria, not a ranking of peoples. Conclude by showing how the distinction supports this answer route: Anchor vulnerability in one dated official source..

VISUAL FIRST

PARTICULARLY VULNERABLE TRIBAL GROUPS AS THE SHARPEST CASE

01. Particularly Vulnerable Tribal Groups

BOUNDARY -> The list is a dated administrative document with policy criteria, not a ranking of peoples.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy.

NAMED EVIDENCE AND MECHANISM

- The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy.

EXAMINER CAUTION

- The list is a dated administrative document with policy criteria, not a ranking of peoples.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Particularly Vulnerable Tribal Groups as the sharpest case.
- **Mains:** Anchor vulnerability in one dated official source.

MINI RECAP

- **Evidence chain:** Particularly Vulnerable Tribal Groups
- **Qualified use:** Anchor vulnerability in one dated official source.

UPSC TRAP / ANSWER-USE LIMIT: The list is a dated administrative document with policy criteria, not a ranking of peoples.
ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Particularly Vulnerable Tribal Groups as the sharpest case converts named social evidence into a qualified argument			

SESSION 12 - CORE - Fifth Schedule, Sixth Schedule and identity assertion

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Fifth Schedule, Sixth Schedule and identity assertion is the part of Tribe and Tribal Society that explains how Fifth and Sixth Schedule contexts and Identity movements and land fit into one examinable social relationship.

Technical definition: In sociological analysis, Fifth Schedule, Sixth Schedule and identity assertion denotes the source-bounded relationship among Fifth and Sixth Schedule contexts and Identity movements and land, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Fifth Schedule, Sixth Schedule and identity assertion should be analysed as a relation among Fifth and Sixth Schedule contexts and Identity movements and land, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Fifth
- Schedule
- Sixth
- identity
- assertion
- contexts

How to use them: Define Fifth, Schedule, Sixth; cite identity as named evidence; then apply this qualification: Constitutional doctrine is cross-linked to Polity and is not re-derived in a Society answer. Conclude by showing how the distinction supports this answer route: Show contextual variation and the political dimension the framing omits..

VISUAL FIRST

FIFTH SCHEDULE, SIXTH SCHEDULE AND IDENTITY ASSERTION

01. Fifth and Sixth Schedule contexts

|
v

02. Identity movements and land

BOUNDARY -> Constitutional doctrine is cross-linked to Polity and is not re-derived in a Society answer.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

NAMED EVIDENCE AND MECHANISM

- Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.
- Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

EXAMINER CAUTION

- Constitutional doctrine is cross-linked to Polity and is not re-derived in a Society answer.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Fifth Schedule, Sixth Schedule and identity assertion.
- **Mains:** Show contextual variation and the political dimension the framing omits.

MINI RECAP

- **Evidence chain:** Fifth and Sixth Schedule contexts -> Identity movements and land
- **Qualified use:** Show contextual variation and the political dimension the framing omits.

CLOSING RECALL FLOW

CONSEQUENCE / CONTRAST This relation supports the answer route that show contextual variation and the political dimension the framing omits.	4. UPSC TRAP / ANSWER-USE LIMIT: Constitutional doctrine is cross-linked to Polity and is not re-derived in a Society answer.

SESSION 13 - CORE SYNTHESIS - Aggregation for rights, disaggregation for design

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Aggregation for rights, disaggregation for design is the part of Tribe and Tribal Society that explains how Aggregate for rights, disaggregate for design fit into one examinable social relationship.

Technical definition: In sociological analysis, Aggregation for rights, disaggregation for design denotes the source-bounded relationship among Aggregate for rights, disaggregate for design, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Aggregation for rights, disaggregation for design should be analysed as a relation among Aggregate for rights, disaggregate for design, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Aggregation
- rights
- disaggregation
- design
- Aggregate
- disaggregate

How to use them: Define Aggregation, rights, disaggregation; cite design as named evidence; then apply this qualification: Aggregation is legitimate for entitlement and damaging for diagnosis, so the answer must split. Conclude by showing how the distinction supports this answer route: Answer the in-which-contexts directive with two explicit lists..

VISUAL FIRST

AGGREGATION FOR RIGHTS, DISAGGREGATION FOR DESIGN

01. Aggregate for rights, disaggregate for design

BOUNDARY -> Aggregation is legitimate for entitlement and damaging for diagnosis, so the answer must split.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

NAMED EVIDENCE AND MECHANISM

- A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

EXAMINER CAUTION

- Aggregation is legitimate for entitlement and damaging for diagnosis, so the answer must split.

EXAM LINK

- **Prelims:** Retain the exact unit, named scholar, official category, dated statistic or legal boundary attached to Aggregation for rights, disaggregation for design.
- **Mains:** Answer the in-which-contexts directive with two explicit lists.

MINI RECAP

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Aggregation for rights, disaggregation for design converts named social evidence into a qualified argument			

SESSION 14 - CORE SYNTHESIS - Tribal knowledge systems

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Tribal knowledge systems is the part of Tribe and Tribal Society that explains how Tribal knowledge domains, Mode contrast and Two prohibitions on knowledge answers fit into one examinable social relationship.

Technical definition: In sociological analysis, Tribal knowledge systems denotes the source-bounded relationship among Tribal knowledge domains, Mode contrast and Two prohibitions on knowledge answers, described by unit of analysis, boundary rule, mechanism of reproduction, direction of change and the evidence that may legitimately be claimed for it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Tribal knowledge systems should be analysed as a relation among Tribal knowledge domains, Mode contrast and Two prohibitions on knowledge answers, not as a list of adjectives about Indian society.

MUST-WRITE KEYWORDS

- Tribal
- knowledge
- systems
- domains
- Mode
- contrast

How to use them: Define Tribal, knowledge, systems; cite domains as named evidence; then apply this qualification: Distinctiveness lies in mode, and neither romanticisation nor invented attribution is permitted. Conclude by showing how the distinction supports this answer route: Describe knowledge systems rather than folklore in an examine directive..

VISUAL FIRST

TRIBAL KNOWLEDGE SYSTEMS

01. Tribal knowledge domains

|

v

02. Mode contrast

|

v

03. Two prohibitions on knowledge answers

BOUNDARY -> Distinctiveness lies in mode, and neither romanticisation nor invented attribution is permitted.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified.

NAMED EVIDENCE AND MECHANISM

- Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.
- Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.
- Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified.

EXAMINER CAUTION

- Distinctiveness lies in mode, and neither romanticisation nor invented attribution is permitted.

ANSWER-GRABBING LINE — WRITE/ADAPT IN THE EXAM: Scale, PYQ routes and the answer spine converts named social evidence into a qualified argument			

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: Indian Society | **Tier:** Must-Do (foundation) | **GS Paper:** GS-I. **Core area:** Tribe-caste continuum, the isolation-assimilation-integration debate, and the displacement-rehabilitation axis of tribal development. **Grounded in:** Verrier Elwin's isolationist critique; G.S. Ghurye's assimilationist view; Jawaharlal Nehru's integrationist "Panchsheel for Tribals"; Ministry of Tribal Affairs PVTG list; audited 2025 GS-I Mains PYQ. **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor. *Companion:* advanced/03_Tribe-and-Tribal-Society.md.

1. Visual foundation

Core proposition: ANALYSIS: The tribe-caste continuum is an influential but contested sociological thesis for some regional histories, not a substitute for the distinct legal category of Scheduled Tribe. Post-Independence policy is often read through isolation, assimilation and integration; today displacement from land/forest and the quality of rehabilitation are central, but not exhaustive, axes of tribal development.

2. Essential definitions

Concept	Exam-ready meaning
FACT: Tribe / Scheduled Tribe	"Tribe" has no single universal sociological checklist. A Scheduled Tribe is a constitutionally notified category under Article 342; groups differ greatly in language, territory, livelihood, religion and market connection. Do not turn older anthropological traits into a test of authenticity.
ANALYSIS: Tribe-caste continuum	A historical sociological thesis that some communities have long interacted with caste society and may show mixed features. It does not collapse diverse tribal identities into caste or alter a community's legal Scheduled Tribe status.
FACT: Isolation (Verrier Elwin)	The policy view that tribal communities should be protected from external exploitation and cultural disruption by limiting outside contact, preserving autonomy over land, forest and custom.
FACT: Assimilation (G.S. Ghurye)	Ghurye's historically influential and contested view described tribes as "backward Hindus" and favoured absorption into mainstream Hindu society and economy. Use the phrase as his argument, not as a current description of Adivasi identity.
FACT: Integration (Jawaharlal Nehru's "Panchsheel for Tribals")	The middle path: tribal communities should develop according to their own genius, retaining land and forest rights and cultural autonomy, while gaining access to education, health and administration on their own terms rather than by imposed assimilation or enforced isolation.
ANALYSIS: Acculturation	The gradual, often two-way cultural exchange that occurs when tribal and non-tribal communities interact over time, distinct from forced assimilation.
ANALYSIS: Displacement-rehabilitation axis	The recurring pattern in which tribal communities lose land, forest access and livelihood to mines, dams or industrial projects, and the subsequent (often inadequate) resettlement and compensation process.

3. How the tribe-caste continuum and policy debate work

- Continuum thesis, with a legal boundary:** ANALYSIS: many Scheduled Tribe communities have long interacted with neighbouring caste society through trade, migration or religious exchange, while others have different histories. This supports continuum analysis in some cases, but "tribe" and "caste" remain distinct legal and self-identified categories.
- Elwin's isolationist warning:** FACT: Elwin, based on his fieldwork among central Indian tribal groups, argued that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective isolation (National Parks-style tribal reserves in his early writing) was necessary.
- Ghurye's assimilationist counter:** FACT: Ghurye's contested historical argument described tribes as "backward Hindus" at a lower stage of acculturation and favoured faster absorption into Hindu social and economic mainstream.
- Nehru's integrationist synthesis:** FACT: Nehru's Panchsheel for Tribals rejected both extremes: tribal people should not be isolated as museum specimens nor assimilated by force, but should develop along the lines of their own genius, with land/forest rights protected and modern services delivered without cultural imposition.
- Acculturation as the actual process:** ANALYSIS: in practice, most tribal areas have experienced gradual, uneven acculturation - partial market integration, partial retention of custom - rather than any of the three positions being fully implemented.
- Displacement as the modern flashpoint:** FACT: large mining, dam and industrial projects

in mineral-rich, forested and often tribal-majority regions have repeatedly displaced tribal communities from land they depend on for subsistence and identity.

7. **Rehabilitation as the contested response:** ANALYSIS: resettlement packages have frequently failed to restore livelihoods, cultural continuity or community structures, making rehabilitation quality (not just displacement occurrence) the central policy question.

4. Institutions and concepts

- FACT: **Particularly Vulnerable Tribal Groups (PVTGs):** an administrative category. MoTA identifies 75 PVTGs in 18 States and the UT of Andaman & Nicobar Islands; its legacy criteria include pre-agricultural level of technology, low literacy, stagnant/declining population and subsistence economy. These are policy criteria, not a ranking of people; scheme detail is in `Social-Justice/basic/08_Scheduled-Tribes-PVTGs-and-Tribal-Welfare.md`.

- FACT: **Fifth and Sixth Schedule areas:** constitutional arrangements for tribal-area self-governance and land protection; their doctrinal detail belongs to `Polity/basic/Scheduled-and-Tribal-Areas.md`.

- ANALYSIS: **Tribal identity movements:** assertions of distinct tribal religious, linguistic or political identity (separate from Hinduism or from a state's dominant culture) that push back against both assimilationist and purely developmental framings.

- ANALYSIS: **Land alienation:** the loss of tribal land to non-tribal buyers or encroachers over time, a distinct but related process to project-driven displacement.

5. Indian applications and PYQ mapping

- FACT: **2025 GS-I PYQ (15 marks, verbatim):** "Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion." The expected answer: affirm that these are indeed the two dominant, linked axes - development projects (mining, dams, industrial corridors) in tribal-majority regions repeatedly cause displacement, and the adequacy of rehabilitation (land-for-land, livelihood restoration, community relocation intact) determines whether "development" becomes net welfare or net loss for the displaced community; a balanced opinion should add that non-displacement dimensions (education, health, identity recognition) also matter, so the two-axis framing captures the most visible but not the only dimension of tribal development.

- ANALYSIS: A tribal community relocated for a dam project but resettled without adequate land or continuity of community structure illustrates the rehabilitation gap the PYQ probes.

6. Must-Know Facts for Prelims

- FACT: Verrier Elwin advocated isolation/protection; G.S. Ghurye advocated assimilation ("backward Hindus"); Jawaharlal Nehru's Panchsheel for Tribals advocated integration.

- FACT: Scheduled Tribes were about 8.6% of India's population at Census 2011 (last full Census).

- FACT: MoTA identifies 75 PVTGs in 18 States and the UT of Andaman & Nicobar Islands. Its legacy criteria include pre-agricultural level of technology, low literacy, stagnant/declining population and subsistence economy.

- FACT: Fifth Schedule areas (mainland tribal-majority regions) and Sixth Schedule areas (parts of the North-East) have distinct constitutional governance arrangements - full doctrine is Polity's territory.

- CURRENT: MoTA's state-wise list dated 9 July 2024 identifies 75 PVTGs in 18 States and the UT of Andaman & Nicobar Islands. Date the count and consult the ministry list if a later revision is relevant.

7. UPSC traps

- WRONG: Tribe and caste are entirely separate, non-overlapping categories. -> Some sociologists describe a continuum in particular regional histories, but that thesis does not erase distinct tribal self-identification or Scheduled Tribe legal status.

- **WRONG:** Elwin, Ghurye and Nehru held the same view on tribal policy. -> They represent three distinct positions - isolation, assimilation and integration - and Nehru's Panchsheel was explicitly framed as a middle path rejecting both Elwin's and Ghurye's extremes.
- **WRONG:** Tribal development is purely about welfare schemes. -> The displacement-rehabilitation axis (2025 PYQ) shows tribal development is equally about land, livelihood and identity continuity, not only service delivery.
- **WRONG:** Acculturation and forced assimilation are the same process. -> Acculturation is gradual and often two-way; assimilation as Ghurye proposed implied deliberate absorption into the mainstream.

8. CURRENT: Current anchor

- **CURRENT:** MoTA's state-wise list dated 9 July 2024 identifies 75 PVTGs in 18 States and the UT of Andaman & Nicobar Islands. Use the dated list, not an undated or invented count.

9. PYQ application

- **FACT: 2025 GS-I (15 marks):** structure as affirm-the-two-axis-framing, explain the displacement mechanism (mining/dams/industry in tribal-majority regions), explain the rehabilitation-adequacy question (land-for-land, livelihood, community continuity), and qualify with a balanced opinion noting other dimensions (education, health, identity) also matter.

10. Mains angles

- **ANALYSIS:** Always name Elwin, Ghurye and Nehru together when discussing tribal-policy history - examiners expect the three-position contrast, not just one view.
- **ANALYSIS:** Mark the tribe-caste continuum and Ghurye's formulation as sociological arguments, not as legal classifications or universal descriptions of tribal communities.
- **ANALYSIS:** Treat displacement and rehabilitation as a linked pair, not two separate topics.
- **ANALYSIS:** Keep FRA/PESA legal mechanics and Fifth/Sixth Schedule doctrine cross-linked, not restated.

Answer thesis: Some tribal communities' histories can be analysed through a tribe-caste continuum without erasing distinct legal and self-identified status. After decades of oscillation between isolation, assimilation and integration, tribal development today is best understood through the linked displacement-rehabilitation axis, where the adequacy of rehabilitation determines whether development-driven displacement becomes genuine welfare gain or renewed marginalisation.

11. Probable questions

- **ANALYSIS: Prelims:** Which sociologist proposed the "isolation" approach to tribal policy, and which proposed "assimilation"?
- **FACT: Mains (15 marks, 2025 GS-I PYQ, verbatim):** Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion.
- **ANALYSIS: Mains (10 marks):** Explain the tribe-caste continuum with examples from Indian sociology.
- **ANALYSIS: Mains (15 marks):** Contrast Elwin's isolationist and Nehru's integrationist approaches to tribal policy in India.

12. Study links

- **FACT:** Advanced companion: [advanced/03_Tribe-and-Tribal-Society.md](#).
- **FACT:** [Social-Justice/basic/08_Scheduled-Tribes-PVTGs-and-Tribal-Welfare.md](#) - FRA, PESA and welfare-scheme detail (do not re-derive here).

- FACT: Polity/basic/Scheduled-and-Tribal-Areas.md - Fifth/Sixth Schedule constitutional doctrine.
- FACT: 02_Caste-System-Structure-and-Contemporary-Dynamics.md - the caste side of the tribe-caste continuum.
- FACT: 10_Urbanisation-Problems-and-Remedies.md - displacement-linked migration into cities.

13. Answer architecture (10/15/20-mark support)

Core-only. Tribal questions cluster into four demand families - **policy-approach history, displacement-rehabilitation, tribal diversity versus single-category treatment, and tribal knowledge systems.** All four are executable from this section.

13.1 Directive-to-structure map

Directive	What is tested	Structure that scores
Give your opinion (two axes of tribal development)	Whether you take a position <i>and</i> qualify its completeness	Affirm the framing -> prove each axis -> add what the framing omits -> graded verdict
Examine (uniqueness of tribal knowledge systems)	Whether you can describe knowledge <i>systems</i> , not folklore	Domain-by-domain: ecological, medicinal, resource-governance, craft, cosmology - each with the mainstream contrast
In which specific contexts (tribal diversity vs single-category treatment)	Whether you can name the contexts where aggregation is right and where it is wrong	Split answer: legitimate aggregation contexts vs damaging aggregation contexts
Contrast (Elwin vs Nehru vs Ghurye)	Whether the three positions are kept distinct	Position -> its diagnosis -> its instrument -> its criticism, three times, then the synthesis
Discuss (tribe-caste continuum)	Whether you keep a sociological thesis apart from a legal category	Thesis -> cases where it fits -> cases where it does not -> the legal boundary

13.2 Thesis bank

- **T1 (2025 demand): ANALYSIS:** Displacement and rehabilitation are the two axes on which tribal development is *contested*, but not the two axes on which it is *constituted* - identity recognition, education, health and self-governance are the third dimension the framing omits.
- **T2 (diversity demand): ANALYSIS:** "Tribe" is an administrative and constitutional container holding sharply different social formations; aggregation is defensible for entitlement and unacceptable for diagnosis.
- **T3 (knowledge demand): ANALYSIS:** Tribal knowledge is distinctive not because its content is exotic but because its **mode** differs - embedded in practice, held collectively, transmitted orally, validated by long-run use in a specific ecology.
- **T4 (policy-history demand): FACT:** Post-Independence policy is best read as Nehru's integration standing between Elwin's protection and Ghurye's absorption - and as incompletely implemented in either direction.

13.3 Mark-scaled spines

15 marks - "Does tribal development centre around displacement and rehabilitation? Give your opinion." (2025 GS-I Q20)

1. T1 as an opinion, stated upfront. 2. Axis 1 - displacement: mining, dams and industrial projects concentrated in mineral-rich, forested, often tribal-majority regions (E1); distinguish project displacement from slow **land alienation** to non-tribal buyers (E2).
3. Axis 2 - rehabilitation adequacy: land-for-land, livelihood restoration, community

relocated intact (E3). 4. What the framing omits: PVTG vulnerability (E4), education and health, identity assertion, Fifth/Sixth Schedule self-governance (cross-link only).

5. Qualification: variation between Fifth Schedule mainland and Sixth Schedule North-East contexts. 6. Graded verdict - the two axes dominate the *conflict*, a third dimension decides the *outcome*.

10 marks - "Tribal diversity and its treatment as a single category: in which specific contexts is this a problem?"

1. T2. 2. Contexts where aggregation is legitimate: constitutional notification under Art 342 (Polity's territory), entitlement portability, atrocity protection.

3. Contexts where aggregation damages: livelihood design (forest-dependent vs settled cultivator vs urbanised tribal worker); PVTG-specific vulnerability (E4); Sixth Schedule North-East polities vs Fifth Schedule mainland belts; matrilineal Khasi kinship vs patrilineal tribal groups (cross-link 04); religion and language (tribal faiths, Halbi, Ho, Kui). 4. Consequence: a single scheme template mis-targets. 5. Verdict.

10 marks - "Examine the uniqueness of tribal knowledge systems relative to mainstream systems."

1. T3. 2. Five domains with the contrast, from Section 13.5. 3. Why it matters: conservation, seed and forest-produce management, climate adaptation, health access. 4. Why it erodes: displacement severs the ecology the knowledge was indexed to (E1); schooling and market integration break oral transmission. 5. Qualification - do not romanticise; the knowledge is context-bound and does not substitute for public health or formal education.

6. Verdict.

20 marks - "Assess post-Independence tribal policy against its own objectives." Add: the three-position history (E5) with each position's instrument and criticism; the acculturation reality that none was fully implemented; displacement and rehabilitation as the test of Panchsheel's "own genius" promise; the tribe-caste continuum's limits; a cross-owner synthesis paragraph routing FRA/PESA to Social-Justice/basic/08 and the Fifth/Sixth Schedules to Polity, labelled as borrowings.

13.4 Evidence bank - claim -> named evidence -> significance -> limitation

- **E1 - Project displacement.** *Claim:* development projects convert tribal land into national resource. *Evidence:* mining, dam and industrial projects sited in mineral-rich, forested, often tribal-majority regions. *Significance:* explains why tribal development and national development are experienced as a trade-off rather than a shared gain. *Limitation:* ANALYSIS: do not attach an invented displacement count or project name-and-number; no such figure is verified in this folder.

- **E2 - Land alienation.** *Claim:* loss of land is not only project-driven. *Evidence:* transfer or encroachment of tribal land by non-tribal buyers over time - a slow, cumulative process distinct from a single displacement event. *Significance:* an answer that treats only projects misses the larger share of long-run land loss. *Limitation:* ANALYSIS: mechanism claim; statutory restrictions on transfer are Polity's territory.

- **E3 - Rehabilitation as the decisive variable.** *Claim:* displacement's welfare sign is set by resettlement quality. *Evidence:* resettlement that fails to restore land, livelihood and an intact community - cash compensation without land, dispersal of a village across sites. *Significance:* converts a "development vs tribals" debate into a testable policy-design question. *Limitation:* ANALYSIS: analytical; do not assert a national rehabilitation success rate.

- **E4 - PVTGs as the sharpest case.** *Claim:* the tribal category contains radically different vulnerability levels. *Evidence:* MoTA's state-wise list dated **9 July 2024** identifies **75 PVTGs in 18 States and the UT of Andaman & Nicobar Islands**; legacy criteria include pre-agricultural technology, low literacy, stagnant or declining population and subsistence economy. *Significance:* the strongest evidence against single-category treatment. *Limitation:* administrative policy criteria, not a ranking of peoples; consult the ministry list for later revisions.

- **E5 - The three policy positions.** *Claim:* Indian tribal policy was a contested choice, not a default. *Evidence:* **Verrier Elwin** (protective isolation against market, moneylender and settler exploitation), **G.S. Ghurye** ("backward Hindus", absorption), **Jawaharlal Nehru's Panchsheel for Tribals** (development along tribals' own genius, land and forest rights retained, no imposed assimilation, no museum isolation). *Significance:* supplies the

named-scholar spine every tribal-policy answer needs. *Limitation:* Ghurye's phrase must be quoted as *his argument*, not as a description of Adivasi identity; and none of the three was fully implemented - **acculturation**, gradual and uneven, is what actually happened.

- **E6 - Distinctiveness that survives.** *Claim:* tribal identity is not residual.

Evidence: distinct languages routed in this owner's own PYQ record - **Halbi, Ho and Kui**; tribal faiths alongside the major religions; **Scheduled Tribes about 8.6% of the population at Census 2011.** *Significance:* grounds both the diversity argument and the scale argument. *Limitation:* Census 2011 is a stock; language family classification is 01's territory and the official Prelims key for the language question is not held locally, so no option is inferred.

13.5 Tribal knowledge systems - the Core bank examiners ask for

Domain	What the system holds	Contrast with the mainstream system	Answer use
Ecological	Seasonal indicators, species behaviour, fire and fallow practice indexed to a specific forest tract	Generalised, transferable models validated by controlled study	Conservation and climate-adaptation questions
Medicinal	Locally sourced plant remedies embedded in practitioner lineages	Standardised pharmacology with formal trials	Health access and bio-resource questions
Resource governance	Community rules over forest produce, grazing and water - collective, customary, orally enforced	Individual title, statutory rights, written record	Commons and FRA-adjacent questions (law routed to Social-Justice)
Craft and material	Weaving, metal, bamboo and dyeing techniques transmitted by apprenticeship	Codified industrial process	Livelihood and heritage questions
Cosmology and social order	Origin narratives, clan rules and sacred groves that also regulate resource use	Religious belief separated from resource administration	Why "belief" and "management" cannot be separated in tribal contexts

ANALYSIS: **Mode contrast (the actual answer):** the difference is **embedded vs abstracted, collective vs individual authorship, oral vs written, place-specific vs transferable, validated by long-run use vs validated by formal testing**. ANALYSIS: **Two prohibitions:** do not romanticise the systems as a substitute for public health, schooling or formal science; and do not name a specific tribe as the source of a specific remedy or technique - no such attribution is verified in this folder.

13.6 Balance bank

- ANALYSIS: **Against pure isolation:** it freezes communities out of health, education and legal protection, and Nehru explicitly rejected the "museum specimen" model.
- ANALYSIS: **Against assimilation:** it treats distinct identity as backwardness and was contested in its own time.
- ANALYSIS: **Against a pure displacement framing:** education, health, identity recognition and self-governance also determine tribal development outcomes.
- ANALYSIS: **Against continuum overreach:** the tribe-caste continuum fits some regional histories; it does not dissolve distinct self-identification or Scheduled Tribe status under Art 342.
- ANALYSIS: **Against uniformity:** Fifth Schedule mainland belts, Sixth Schedule North-East polities, PVTGs and urbanised tribal workers face different problems.

13.7 Verdict scaffolds

- **Graded opinion:** "Displacement and rehabilitation are the axes on which tribal development is fought, but the axis on which it is won is whether communities retain decision-making over land, livelihood and culture; the two-axis framing is accurate about conflict and incomplete about development."
- **Category verdict:** "A single legal category is necessary for entitlement and destructive for diagnosis; policy should aggregate for rights and disaggregate for design."

- **Knowledge verdict:** "Tribal knowledge is distinctive in its mode, not merely its content, which is why displacement destroys it faster than any curriculum can record it."

13.8 Direct Mains demands this Core file must answer alone

Year · Paper · Q	Demand	Authoritative ledger owner	Core route
2025 · GS-I · Q20	Tribal development around displacement and rehabilitation	Indian-■Society/■basic/■03 FACT: this file	Section 13.3 15-mark spine (T1)
2021 · GS-I · Q9	Uniqueness of tribal knowledge systems against mainstream systems	ledger points to advanced/■03	Core routing supersedes: Section 13.5 + Section 13.3 10-mark spine
2022 · GS-I · Q10	Tribal diversity and treatment as a single category	ledger points to advanced/■03	Core routing supersedes: Section 13.3 second 10-mark spine (T2) + E4

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2025
- **Paper(s):** GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2025	GS-I	20	Tribal development around displacement and rehabilitation	Give your opinion · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Tribal development around displacement and rehabilitation

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2021
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2021	Prelims GS-I	95	Halbi Ho and Kui tribal languages of India	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Halbi Ho and Kui tribal languages of India

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

Semantic-completeness ownership and PYQ control

- **Official syllabus/index and owned core:** tribe and Scheduled Tribe are not

synonyms; cover kinship, territory, livelihood, political organisation, exchange, religion, knowledge systems and state-market relations across central Indian, Northeast, Himalayan, island, pastoral and urban contexts.

- **Indispensable sociology:** Verrier Elwin's protective isolation, G.S.

Ghurye's contested assimilation and Nehru's integration/Panchsheel are kept distinct. The tribe-caste continuum and acculturation are historical theses, not tests of authenticity or substitutes for Article 342 notification.

- **Mechanism and intersectionality:** distinguish project displacement from cumulative land alienation and cash compensation from restoration of land, livelihood and community. Disaggregate PVTGs, forest-dependent cultivators, pastoral groups, Sixth Schedule polities and urban workers by gender, class, region and market exposure; avoid primitive-modern binaries.

- **Constitutional/legal boundary:** Article 342, the Fifth and Sixth Schedules, PESA 1996 and the Forest Rights Act 2006 have distinct territorial, governance and rights fields. Society owns their social consequences; Polity and Social Justice own detailed doctrine, procedure and scheme implementation.

- **Data/source control:** the Ministry of Tribal Affairs list dated 9 July 2024 records 75 PVTGs in 18 States and the Union Territory of Andaman and Nicobar Islands. It is an administrative list, not a ranking or an outcome measure.

- **Cross-owner boundary:** Topic 01 may borrow diversity, Topic 02 the caste comparison and Topic 05 agrarian relations. Topic 06 population, Topic 07 women, Topic 08 empowerment and Topic 09 poverty remain separately owned.

- **Four-ledger hostile audit:** literal syllabus, prerequisites, textbook taxonomy and PYQs were checked for category errors, theories, displacement mechanisms, knowledge-system domains, regional variation and implementation limits.

- **Verified PYQ ownership, 2018-2026:** direct GS-I demands are 2021 Q10, 2022 Q10 and 2025 Q20; the routed 2021 objective language item remains unkeyed. No official 2026 GS-I paper was available on 5 September 2026.

INDIAN SOCIETY DEEP-REVIEW CORE CONTROL

- **Must remember:** Tribal societies must be analysed through kinship, territory, livelihood, political organisation, exchange, religion and state-market interfaces, with isolation, assimilation, integration, dispossession, migration and self-governance treated as historically variable processes.

- **Close distinction:** Scheduled Tribe, tribe, indigenous people, Particularly Vulnerable Tribal Group and forest dweller are not synonyms; Fifth Schedule, Sixth Schedule, PESA 1996 and Forest Rights Act 2006 have distinct territorial, institutional and rights boundaries.

- **Evidence / interpretation limit:** Use central Indian, Northeast, Himalayan, island and pastoral examples, including Bhil, Gond, Santhal, Naga and PVTG variation; avoid primitive-versus-modern binaries, and distinguish notified status, statutory entitlement, implementation and lived outcome.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Scheduled Tribe as a legal category?

A. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. B. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. C. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. D. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

Answer: A. Explanation: Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Scheduled Tribe as a legal category?

A. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. B. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. C. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. D. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

Answer: B. Explanation: Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Scheduled Tribe as a legal category?

A. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. D. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.

Answer: C. Explanation: Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Scheduled Tribe as a legal category?

A. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. D. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.

Answer: D. Explanation: Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Tribe-caste continuum?

A. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. B. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. C. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. D. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.

Answer: A. Explanation: The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Tribe-caste continuum?

A. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. B. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. C. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. D. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.

Answer: B. Explanation: The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Tribe-caste continuum?

A. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. D. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

Answer: C. Explanation: The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Tribe-caste continuum?

A. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. B. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. C. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. D. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

Answer: D. Explanation: The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies Elwin's isolation?

A. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. B. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. C. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. D. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

Answer: A. Explanation: Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under Elwin's isolation?

A. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. B. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. C. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. D. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

Answer: B. Explanation: Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Elwin's isolation?

A. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. D. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain.

Answer: C. Explanation: Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Elwin's isolation?

A. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. B. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. C. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. D. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.

Answer: D. Explanation: Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Ghurye's assimilation?

A. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. D. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

Answer: A. Explanation: G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Ghurye's assimilation?

A. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. B. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

Answer: B. Explanation: G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Ghurye's assimilation?

A. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. D. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

Answer: C. Explanation: G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Ghurye's assimilation?

A. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. B. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. C. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. D. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.

Answer: D. Explanation: G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Nehru's Panchsheel for Tribals?

A. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. B. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.

Answer: A. Explanation: Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Nehru's Panchsheel for Tribals?

A. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. B. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

Answer: B. Explanation: Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Nehru's Panchsheel for Tribals?

A. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. B. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. C. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. D. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

Answer: C. Explanation: Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Nehru's Panchsheel for Tribals?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. D. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.

Answer: D. Explanation: Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Acculturation as the actual outcome?

A. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. B. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. C. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. D. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

Answer: A. Explanation: None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Acculturation as the actual outcome?

A. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. B. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: B. Explanation: None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Acculturation as the actual outcome?

A. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. D. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.

Answer: C. Explanation: None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Acculturation as the actual outcome?

A. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. B. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. D. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.

Answer: D. Explanation: None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Resource overlap?

A. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: A. Explanation: Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Resource overlap?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. C. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. D. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

Answer: B. Explanation: Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Resource overlap?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: C. Explanation: Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Resource overlap?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

Answer: D. Explanation: Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Project displacement?

A. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: A. Explanation: Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Project displacement?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: B. Explanation: Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of Project displacement?

A. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. B. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. C. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. D. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.

Answer: C. Explanation: Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Project displacement?

A. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain.

Answer: D. Explanation: Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Land alienation?

A. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. B. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: A. Explanation: Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Land alienation?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. D. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.

Answer: B. Explanation: Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Land alienation?

A. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. D. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

Answer: C. Explanation: Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Land alienation?

A. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. B. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. C. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. D. Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

Answer: D. Explanation: Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Rehabilitation as restoration or compensation?

A. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. D. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.

Answer: A. Explanation: Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Rehabilitation as restoration or compensation?

A. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. B. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

Answer: B. Explanation: Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Rehabilitation as restoration or compensation?

A. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. B. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. C. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. D. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

Answer: C. Explanation: Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Rehabilitation as restoration or compensation?

A. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. B. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. C. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. D. Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.

Answer: D. Explanation: Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies Rehabilitation decides the welfare sign?

A. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. B. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy.

Answer: A. Explanation: Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Rehabilitation decides the welfare sign?

A. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. B. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

Answer: B. Explanation: Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Rehabilitation decides the welfare sign?

A. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. B. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. C. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: C. Explanation: Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Rehabilitation decides the welfare sign?

A. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. B. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. C. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. D. Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.

Answer: D. Explanation: Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Particularly Vulnerable Tribal Groups?

A. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. B. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.

Answer: A. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Particularly Vulnerable Tribal Groups?

A. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. B. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. C. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. D. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.

Answer: B. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Particularly Vulnerable Tribal Groups?

A. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: C. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Particularly Vulnerable Tribal Groups?

A. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. B. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy.

Answer: D. Explanation: The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Fifth and Sixth Schedule contexts?

A. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. B. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. C. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: A. Explanation: Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Fifth and Sixth Schedule contexts?

A. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. B. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. C. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: B. Explanation: Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Fifth and Sixth Schedule contexts?

A. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: C. Explanation: Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Fifth and Sixth Schedule contexts?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.

Answer: D. Explanation: Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Aggregate for rights, disaggregate for design?

A. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. D. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.

Answer: A. Explanation: A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Aggregate for rights, disaggregate for design?

A. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. B. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. C. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: B. Explanation: A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Aggregate for rights, disaggregate for design?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: C. Explanation: A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Aggregate for rights, disaggregate for design?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.

Answer: D. Explanation: A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Tribal knowledge domains?

A. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. B. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified.

Answer: A. Explanation: Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Tribal knowledge domains?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. C. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: B. Explanation: Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Tribal knowledge domains?

A. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. B. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. C. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: C. Explanation: Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Tribal knowledge domains?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.

Answer: D. Explanation: Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Mode contrast?

A. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

Answer: A. Explanation: Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Mode contrast?

A. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. B. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. C. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: B. Explanation: Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Mode contrast?

A. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. B. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. C. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. D. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks.

Answer: C. Explanation: Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Mode contrast?

A. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. B. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. C. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. D. Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

Answer: D. Explanation: Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Two prohibitions on knowledge answers?

A. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. B. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

Answer: A. Explanation: Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Two prohibitions on knowledge answers?

A. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. B. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

Answer: B. Explanation: Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Two prohibitions on knowledge answers?

A. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. B. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. C. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. D. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.

Answer: C. Explanation: Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Two prohibitions on knowledge answers?

A. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. B. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. C. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. D. Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified.

Answer: D. Explanation: Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Scale and distinctiveness?

A. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. B. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.

Answer: A. Explanation: Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Scale and distinctiveness?

A. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. B. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

Answer: B. Explanation: Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Scale and distinctiveness?

A. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. B. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. C. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. D. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.

Answer: C. Explanation: Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Scale and distinctiveness?

A. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. B. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. C. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. D. Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Answer: D. Explanation: Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Identity movements and land?

A. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. B. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. C. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. D. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks.

Answer: A. Explanation: Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Identity movements and land?

A. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. B. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. C. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. D. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.

Answer: B. Explanation: Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Identity movements and land?

A. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. B. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. C. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. D. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

Answer: C. Explanation: Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Identity movements and land?

A. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. B. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. C. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. D. Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

Answer: D. Explanation: Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Verified direct Mains demands?

A. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. B. Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. C. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. D. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.

Answer: A. Explanation: Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Verified direct Mains demands?

A. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. B. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. C. The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. D. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.

Answer: B. Explanation: Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Verified direct Mains demands?

A. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. B. Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary. C. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. D. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.

Answer: C. Explanation: Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Verified direct Mains demands?

A. None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. B. Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. C. G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity. D. Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks.

Answer: D. Explanation: Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Three direct General Studies Paper-I Mains demands are verified for this owner. The 2025 demand is routed in the audited 2024-2025 ledger to the Basic owner; the 2021 and 2022 demands are routed in the audited 2018-2023 ledger to the Advanced owner, and the Core owner records that Core routing supersedes, so all three are answered from the Basic spine. Each wording reproduced below was confirmed against the locally held official General Studies Paper-I question papers. The owner additionally carries one routed 2021 Prelims item on the Halbi, Ho and Kui tribal languages; its official key is not held locally, so no option is inferred and it is not converted into a solved answer.

OWNER PYQ LEDGER EXTRACTS

5. Indian applications and PYQ mapping

- **FACT: 2025 GS-I PYQ (15 marks, verbatim):** "Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion." The expected answer: affirm that these are indeed the two dominant, linked axes - development projects (mining, dams, industrial corridors) in tribal-majority regions repeatedly cause displacement, and the adequacy of rehabilitation (land-for-land, livelihood restoration, community relocation intact) determines whether "development" becomes net welfare or net loss for the displaced community; a balanced opinion should add that non-displacement dimensions (education, health, identity recognition) also matter, so the two-axis framing captures the most visible but not the only dimension of tribal development.
- **ANALYSIS:** A tribal community relocated for a dam project but resettled without adequate land or continuity of community structure illustrates the rehabilitation gap the PYQ probes.

9. PYQ application

- **FACT: 2025 GS-I (15 marks):** structure as affirm-the-two-axis-framing, explain the displacement mechanism (mining/dams/industry in tribal-majority regions), explain the rehabilitation-adequacy question (land-for-land, livelihood, community continuity), and qualify with a balanced opinion noting other dimensions (education, health, identity) also matter.

Recent PYQ Integration (2024-2025)

Status: 2024-2025 question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2024-2025.md.

- **Years represented:** 2025

- **Paper(s):** GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2025	GS-I	20	Tribal development around displacement and rehabilitation	Give your opinion · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Tribal development around displacement and rehabilitation

This block integrates the 2024-2025 examinable demand and paper metadata. It is kept separate from the 2018-2023 block and does not convert an unkeyed/answer-free objective question into a solved answer.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2021
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 1

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2021	Prelims GS-I	95	Halbi Ho and Kui tribal languages of India	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Halbi Ho and Kui tribal languages of India

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- **FACT: 2025 GS-I (15 marks, verbatim):** "Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion." Analytical route: (a) affirm the two-axis framing with the resource-overlap mechanism explaining why tribal regions face disproportionate displacement; (b) use the rehabilitation-quality distinction (restoration versus compensation) to explain why displacement outcomes vary; (c) give one boundary case of successful rehabilitation and one of failed rehabilitation; (d) offer a qualified opinion - the two axes dominate lived tribal development, but education, health and identity-recognition dimensions remain necessary complements, so the framing is largely but not wholly sufficient.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2021, 2022
- **Paper(s):** GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2021	GS-I	9	Uniqueness of tribal knowledge systems against mainstream systems	Examine · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2022	GS-I	10	Tribal diversity and treatment as a single category	In which specific contexts · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Uniqueness of tribal knowledge systems against mainstream systems
- Tribal diversity and treatment as a single category

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2025 GS-I Q20

Demand: Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion. (Answer in 250 words) 15 marks.

Status: Verified verbatim in the audited 2024-2025 Mains routing ledger and in the locally held official 2025 General Studies Paper-I.

Model solution: State the opinion at once as an analytical claim to be defended: displacement and rehabilitation are the axes on which tribal development is contested, but not the only axes on which it is constituted. Prove axis one. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, so mining, dam and industrial projects are structurally sited where tribal communities live, and displacement removes the subsistence and identity base at the same time; the qualification is that no displacement count or project figure is verified in this folder and none is asserted. Distinguish it from land alienation, the slow transfer of tribal land to non-tribal ownership through debt, distress sale or encroachment, which accounts for cumulative land loss that a project-only framing misses. Prove axis two. The decisive distinction is rehabilitation as restoration vs rehabilitation as compensation: restoration-oriented resettlement rebuilds land access, livelihood and an intact community while compensation-oriented resettlement pays cash and scatters a village, so the welfare sign of the same project depends on design rather than on intention. State what the two-axis framing omits: the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands whose vulnerability precedes any project; education, health, identity recognition and Fifth and Sixth Schedule self-governance also determine outcomes. Conclude with a graded opinion: the framing is accurate about conflict and incomplete about development, because the decisive question is whether communities retain decision-making over land, livelihood and culture. Why this earns marks: it gives an opinion first, proves both axes with mechanisms, adds the omitted dimension, and closes with a graded rather than binary verdict.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 1 - 2025 GS-I Q20", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: State the opinion at once as an analytical claim to be defended: displacement and rehabilitation are the axes on which tribal development is contested, but not the only axes on which it is constituted. Prove axis one. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, so mining, dam and industrial projects are structurally sited where tribal communities live, and displacement removes the subsistence and identity base at the same time; the qualification is that no displacement count or project figure is verified in this folder and none is asserted. Distinguish it from land alienation, the slow transfer of tribal land to non-tribal ownership through debt, distress sale or encroachment, which accounts for cumulative land loss that a project-only framing

misses. Prove axis two. The decisive distinction is rehabilitation as restoration vs rehabilitation as compensation: restoration-oriented resettlement rebuilds land access, livelihood and an intact community while compensation-oriented resettlement pays cash and scatters a village, so the welfare sign of the same project depends on design rather than on intention. State what the two-axis framing omits: the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands whose vulnerability precedes any project; education, health, identity recognition and Fifth and Sixth Schedule self-governance also determine outcomes. Conclude with a graded opinion: the framing is accurate about conflict and incomplete about development, because the decisive question is whether communities retain decision-making over land, livelihood and culture. Why this earns marks: it gives an opinion first, proves both axes with mechanisms, adds the omitted dimension, and closes with a graded rather than binary verdict.

Analytical body:

1. **Claim and named evidence:** Demand: Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion. (Answer in 250 words) 15 marks. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Status: Verified verbatim in the audited 2024-2025 Mains routing ledger and in the locally held official 2025 General Studies Paper-I. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: State the opinion at once as an analytical claim to be defended: displacement and rehabilitation are the axes on which tribal development is contested, but not the only axes on which it is constituted. Prove axis one. Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, so mining, dam and industrial projects are structurally sited where tribal communities live, and displacement removes the subsistence and identity base at the same time; the qualification is that no displacement count or project figure is verified in this folder and none is asserted. Distinguish it from land alienation, the slow transfer of tribal land to non-tribal ownership through debt, distress sale or encroachment, which accounts for cumulative land loss that a project-only framing misses. Prove axis two. The decisive distinction is rehabilitation as restoration vs rehabilitation as compensation: restoration-oriented resettlement rebuilds land access, livelihood and an intact community while compensation-oriented resettlement pays cash and scatters a village, so the welfare sign of the same project depends on design rather than on intention. State what the two-axis framing omits: the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands whose vulnerability precedes any project; education, health, identity recognition and Fifth and Sixth Schedule self-governance also determine outcomes. Conclude with a graded opinion: the framing is accurate about conflict and incomplete about development, because the decisive question is whether communities retain decision-making over land, livelihood and culture. Why this earns marks: it gives an opinion first, proves both axes with mechanisms, adds the omitted dimension, and closes with a graded rather than binary verdict.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2025 GS-I Q20", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 2 - 2021 GS-I Q9

Demand: Examine the uniqueness of tribal knowledge system when compared with mainstream knowledge and cultural systems. (Answer in 150 words) 10 marks.

Status: Routed in the audited 2018-2023 Mains routing ledger to the Advanced owner with Core routing recorded as superseding; wording confirmed in the locally held official General Studies Paper-I.

Model solution: Open with the thesis that the uniqueness lies in mode rather than in exotic content. Examine domain by domain with the mainstream contrast. Ecological knowledge holds seasonal indicators, species behaviour and fire and fallow practice indexed to one forest tract, against generalised transferable models validated by controlled study, which proves place-specificity is a property and not a defect. Medicinal knowledge sits in practitioner lineages with locally sourced remedies, against standardised pharmacology with formal trials, which proves a different validation regime. Resource governance runs on collective, customary and orally enforced rules over forest produce, grazing and water, against individual title and written statutory right, which proves a different property logic. Craft and material knowledge passes by apprenticeship rather than codified industrial process, and cosmology binds clan rules and sacred groves to resource regulation, which proves that belief and management cannot be separated in these contexts. State the mode contrast explicitly as embedded against abstracted, collective against individual, oral against written, place-specific against transferable, and long-run use against formal testing. Qualify that the systems are context-bound and are not a substitute for public health, schooling or formal science, and that no remedy is attributed here to a named tribe. Conclude that displacement destroys such knowledge faster than any curriculum can record it. Why this earns marks: it examines systems rather than folklore, contrasts each domain, states the analytical mode difference, and refuses romanticisation.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 2 - 2021 GS-I Q9", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Open with the thesis that the uniqueness lies in mode rather than in exotic content. Examine domain by domain with the mainstream contrast. Ecological knowledge holds seasonal indicators, species behaviour and fire and fallow practice indexed to one forest tract, against generalised transferable models validated by controlled study, which proves place-specificity is a property and not a defect. Medicinal knowledge sits in practitioner lineages with locally sourced remedies, against standardised pharmacology with formal trials, which proves a different validation regime. Resource governance runs on collective, customary and orally enforced rules over forest produce, grazing and water, against individual title and written statutory right, which proves a different property logic. Craft and material knowledge passes by apprenticeship rather than codified industrial process, and cosmology binds clan rules and sacred groves to resource regulation, which proves that belief and management cannot be separated in these contexts. State the mode contrast explicitly as embedded against abstracted, collective against individual, oral against written, place-specific against transferable, and long-run use against formal testing. Qualify that the systems are context-bound and are not a substitute for public health, schooling or formal science, and that no remedy is attributed here to a named tribe. Conclude that displacement destroys such knowledge faster than any curriculum can record it. Why this earns marks: it examines systems rather than folklore, contrasts each domain, states the analytical mode difference, and refuses romanticisation.

Analytical body:

- 1. Claim and named evidence:** Demand: Examine the uniqueness of tribal knowledge system when compared with mainstream knowledge and cultural systems. (Answer in 150 words) 10 marks. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
- 2. Claim and named evidence:** Status: Routed in the audited 2018-2023 Mains routing ledger to the Advanced owner with Core routing recorded as superseding; wording confirmed in the locally held official General Studies Paper-I. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Open with the thesis that the uniqueness lies in mode rather than in exotic content. Examine domain by domain with the mainstream contrast. Ecological knowledge holds seasonal indicators, species behaviour and fire and fallow practice indexed to one forest tract, against generalised transferable models validated by controlled study, which proves place-specificity is a property and not a defect. Medicinal knowledge sits in practitioner lineages with locally sourced remedies, against standardised pharmacology with formal trials, which proves a different validation regime. Resource governance runs on collective, customary and orally enforced rules over forest produce, grazing and water, against individual title and written statutory right, which proves a different property logic. Craft and material knowledge passes by apprenticeship rather than codified industrial process, and cosmology binds clan rules and sacred groves to resource regulation, which proves that belief and management cannot be separated in these contexts. State the mode contrast explicitly as embedded against abstracted, collective against individual, oral against written, place-specific against transferable, and long-run use against formal testing. Qualify that the systems are context-bound and are not a substitute for public health, schooling or formal science, and that no remedy is attributed here to a named tribe. Conclude that displacement destroys such knowledge faster than any curriculum can record it. Why this earns marks: it examines systems rather than folklore, contrasts each domain, states the analytical mode difference, and refuses romanticisation.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

How to improve this answer: For "PYQ DEMAND CARD 2 - 2021 GS-I Q9", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 3 - 2022 GS-I Q10

Demand: Given the diversities among tribal communities in India, in which specific contexts should they be considered as a single category? (Answer in 150 words) 10 marks.

Status: Routed in the audited 2018-2023 Mains routing ledger to the Advanced owner with Core routing recorded as superseding; wording confirmed in the locally held official General Studies Paper-I.

Model solution: Answer with an explicit split rather than a general discussion of diversity. Contexts where single-category treatment is legitimate: constitutional notification under Article 342, which is necessarily categorical; portability of entitlements when a household moves between States; protection against atrocity and discrimination, where a common legal standing is the point; and aggregate reporting of a national share such as the Census 2011 figure of about 8.6 per cent. Contexts where single-category treatment damages: livelihood design, because forest-dependent gatherers, settled cultivators and urbanised tribal workers need different instruments; vulnerability targeting, because the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands whose criteria include pre-agricultural technology and subsistence economy; governance design, because Fifth Schedule mainland belts and Sixth Schedule North-East polities operate differently; and cultural policy, because kinship, language and faith vary sharply, with distinct languages such as Halbi, Ho and Kui recorded in this owner's own record. State the consequence that a single scheme template mis-targets precisely the most vulnerable. Conclude with the working rule: aggregate for rights, disaggregate for design. Why this earns marks: it answers the in-which-contexts demand with two named lists, supplies one dated official source, and ends with a portable decision rule.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 3 - 2022 GS-I Q10", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Answer with an explicit split rather than a general discussion of diversity. Contexts where single-category treatment is legitimate: constitutional notification under Article 342, which is necessarily categorical;

portability of entitlements when a household moves between States; protection against atrocity and discrimination, where a common legal standing is the point; and aggregate reporting of a national share such as the Census 2011 figure of about 8.6 per cent. Contexts where single-category treatment damages: livelihood design, because forest-dependent gatherers, settled cultivators and urbanised tribal workers need different instruments; vulnerability targeting, because the Ministry of Tribal Affairs list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands whose criteria include pre-agricultural technology and subsistence economy; governance design, because Fifth Schedule mainland belts and Sixth Schedule North-East polities operate differently; and cultural policy, because kinship, language and faith vary sharply, with distinct languages such as Halbi, Ho and Kui recorded in this owner's own record. Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

How to improve this answer: For "PYQ DEMAND CARD 3 - 2022 GS-I Q10", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 1 - 10 MARKS

Question: Explain the tribe-caste continuum and state the limits of the thesis. Answer in about 150 words.

Model thesis: The continuum usefully describes long interaction between some communities and caste society, but it cannot dissolve distinct self-identification or the constitutional Scheduled Tribe category, so it is an analytical device with a legal boundary.

Claim -> named evidence -> analysis -> qualification:

- Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.
- The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.
- None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.
- Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Qualified conclusion: The continuum usefully describes long interaction between some communities and caste society, but it cannot dissolve distinct self-identification or the constitutional Scheduled Tribe category, so it is an analytical device with a legal boundary.

Demand decoding: The directive **explain** requires a direct position on "Explain the tribe-caste continuum and state the limits of the thesis. Answer in about 150...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The continuum usefully describes long interaction between some communities and caste society, but it cannot dissolve distinct self-identification or the constitutional Scheduled Tribe category, so it is an analytical device with a legal boundary.

Analytical body:

1. **Claim and named evidence:** Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. **Analysis:** Connect structure or institution ->

norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication.

Qualification: State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The continuum usefully describes long interaction between some communities and caste society, but it cannot dissolve distinct self-identification or the constitutional Scheduled Tribe category, so it is an analytical device with a legal boundary.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Explain the tribe-caste continuum and state the limits of the thesis. Answer in about 150...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 2 - 10 MARKS

Question: Contrast the isolationist, assimilationist and integrationist positions in Indian tribal policy. Answer in about 150 words.

Model thesis: Elwin diagnosed exploitative contact and prescribed protection, Ghurye diagnosed cultural lag and prescribed absorption, and Nehru rejected both extremes in favour of development on tribal terms, while what actually occurred was uneven acculturation.

Claim -> named evidence -> analysis -> qualification:

- Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.
- G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.
- Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.
- None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.

Qualified conclusion: Elwin diagnosed exploitative contact and prescribed protection, Ghurye diagnosed cultural lag and prescribed absorption, and Nehru rejected both extremes in favour of development on tribal terms, while what actually occurred was uneven acculturation.

Demand decoding: The directive **answer** requires a direct position on "Contrast the isolationist, assimilationist and integrationist positions in Indian tribal...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Elwin diagnosed exploitative contact and prescribed protection, Ghurye diagnosed cultural lag and prescribed absorption, and Nehru rejected both extremes in favour of development on tribal terms, while what actually occurred was uneven acculturation.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Contrast the isolationist, assimilationist and integrationist positions in Indian tribal...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 3 - 15 MARKS

Question: Examine why the quality of rehabilitation, rather than the fact of displacement, determines tribal development outcomes. Answer in about 250 words.

Model thesis: Displacement removes a subsistence and identity base, so the welfare sign of a project is set by whether resettlement restores land, livelihood and community rather than by whether compensation was paid.

Claim -> named evidence -> analysis -> qualification:

- Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.

- Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain.
- Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.
- Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.
- Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.

Qualified conclusion: Displacement removes a subsistence and identity base, so the welfare sign of a project is set by whether resettlement restores land, livelihood and community rather than by whether compensation was paid.

Demand decoding: The directive **examine** requires a direct position on "Examine why the quality of rehabilitation, rather than the fact of displacement, determines...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Displacement removes a subsistence and identity base, so the welfare sign of a project is set by whether resettlement restores land, livelihood and community rather than by whether compensation was paid.

Analytical body:

1. **Claim and named evidence:** Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

ORIGINAL MAINS 4 - 15 MARKS

Question: Assess the argument that tribal communities in India should be aggregated for rights and disaggregated for policy design. Answer in about 250 words.

Model thesis: Aggregation is defensible for entitlement, portability and atrocity protection and destructive for diagnosis, because vulnerability inside the category ranges from urbanised tribal workers to Particularly Vulnerable Tribal Groups.

Claim -> named evidence -> analysis -> qualification:

- The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy.
- Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.
- A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.
- Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.

Qualified conclusion: Aggregation is defensible for entitlement, portability and atrocity protection and destructive for diagnosis, because vulnerability inside the category ranges from urbanised tribal workers to Particularly Vulnerable Tribal Groups.

Demand decoding: The directive **assess** requires a direct position on "Assess the argument that tribal communities in India should be aggregated for rights and...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Aggregation is defensible for entitlement, portability and atrocity protection and destructive for diagnosis, because vulnerability inside the category ranges from urbanised tribal workers to Particularly Vulnerable Tribal Groups.

Analytical body:

1. **Claim and named evidence:** The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and

subsistence economy. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

2. **Claim and named evidence:** Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Aggregation is defensible for entitlement, portability and atrocity protection and destructive for diagnosis, because vulnerability inside the category ranges from urbanised tribal workers to Particularly Vulnerable Tribal Groups.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Assess the argument that tribal communities in India should be aggregated for rights and...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate the uniqueness of tribal knowledge systems and the conditions under which they survive. Answer in about 300 words.

Model thesis: Tribal knowledge is distinctive in mode rather than content, so it erodes when displacement severs the ecology it was indexed to and when schooling and market integration break oral transmission, and it must not be romanticised as a substitute for public services.

Claim -> named evidence -> analysis -> qualification:

- Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.
- Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

- Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified.
- Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain.
- Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.

Qualified conclusion: Tribal knowledge is distinctive in mode rather than content, so it erodes when displacement severs the ecology it was indexed to and when schooling and market integration break oral transmission, and it must not be romanticised as a substitute for public services.

Demand decoding: The directive **evaluate** requires a direct position on "Evaluate the uniqueness of tribal knowledge systems and the conditions under which they...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Tribal knowledge is distinctive in mode rather than content, so it erodes when displacement severs the ecology it was indexed to and when schooling and market integration break oral transmission, and it must not be romanticised as a substitute for public services.

Analytical body:

1. **Claim and named evidence:** Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Tribal knowledge is distinctive in mode rather than content, so it erodes when displacement severs the ecology it was indexed to and when schooling and market integration break oral transmission, and it must not be romanticised as a substitute for public services.

Executable exam-length answer / compression plan: For a 20-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise six to eight points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Evaluate the uniqueness of tribal knowledge systems and the conditions under which they...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 6 - 20 MARKS

Question: Assess post-Independence tribal policy against its own stated objectives. Answer in about 300 words.

Model thesis: Panchsheel promised development along tribal genius with land and forest rights retained, so the honest verdict is that contact expanded faster than safeguards, and displacement with weak rehabilitation is the sharpest test the promise failed.

Claim -> named evidence -> analysis -> qualification:

- Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.
- None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.
- Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.
- Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.
- Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.
- Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.

Qualified conclusion: Panchsheel promised development along tribal genius with land and forest rights retained, so the honest verdict is that contact expanded faster than safeguards, and displacement with weak rehabilitation is the sharpest test the promise failed.

Demand decoding: The directive **assess** requires a direct position on "Assess post-Independence tribal policy against its own stated objectives. Answer in about 300...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Panchsheel promised development along tribal genius with land and forest rights retained, so the honest verdict is that contact expanded faster than safeguards, and displacement with weak rehabilitation is the sharpest test the promise failed.

Analytical body:

1. **Claim and named evidence:** Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

5. **Claim and named evidence:** Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
6. **Claim and named evidence:** Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Panchsheel promised development along tribal genius with land and forest rights retained, so the honest verdict is that contact expanded faster than safeguards, and displacement with weak rehabilitation is the sharpest test the promise failed.

Executable exam-length answer / compression plan: For a 20-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise six to eight points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Assess post-Independence tribal policy against its own stated objectives. Answer in about 300...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Indian Society | **Tier:** Advanced | **GS Paper:** GS-I. **Core area:** The Elwin-Ghurye-Nehru debate as competing development theories, the displacement-rehabilitation causal chain, and boundary cases in tribe-caste continuum and acculturation. **Grounded in:** Verrier Elwin; G.S. Ghurye; Jawaharlal Nehru's Panchsheel for Tribals; Ministry of Tribal Affairs PVTG framework; audited 2025 GS-I Mains PYQ. **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor. *Companion:* basic/03_Tribe-and-Tribal-Society.md.

1. Architecture

Analytical claim: ANALYSIS: The 2025 GS-I PYQ's two-axis framing (displacement and rehabilitation) can be placed alongside three competing historical theories of tribal development - isolation, assimilation and integration. It should not be made exhaustive: health, education, self-governance, land alienation and identity also shape outcomes. Where projects displace people, rehabilitation quality, not compensation alone, is central to whether the result is renewed marginalisation or a defensible welfare gain.

2. Concepts and distinctions

Concept	Precise meaning
FACT: Isolation (Elwin) vs integration (Nehru)	Elwin's early position sought to shield tribal communities from exploitative contact by limiting outside access to tribal areas; Nehru's Panchsheel accepted contact and development but insisted tribal communities retain land/forest rights and cultural autonomy while accessing education and health - integration is contact-with-safeguards, isolation is contact-limitation.
FACT: Assimilation (Ghurye) vs acculturation	Ghurye's historically influential and contested assimilationist view sought absorption into mainstream Hindu society. Acculturation describes gradual, sometimes reciprocal cultural exchange through trade, migration and administration; neither term determines a community's constitutional Scheduled Tribe status.
ANALYSIS: Displacement vs land alienation	Displacement is acute, project-driven loss of land/habitat (a dam or mine); land alienation is a slower, often informal process of tribal land passing to non-tribal ownership through debt, distress sale or encroachment - both reduce tribal land control but through different mechanisms and require different remedies.
ANALYSIS: Rehabilitation as restoration vs rehabilitation as compensation	Restoration-oriented rehabilitation tries to rebuild livelihood, land access and community structure at the new site; compensation-oriented rehabilitation provides monetary payment without guaranteeing livelihood continuity - the 2025 PYQ's framing implicitly favours judging rehabilitation by restoration, not payment alone.

3. Detailed causal chain

Policy-history chain

1. **Colonial-era baseline:** administrative neglect combined with missionary and settler contact exposed tribal communities to exploitation, prompting Elwin's isolationist critique.
2. **Ghurye's counter-theory:** treating tribes as "backward Hindus" implied the solution was faster absorption, not protection - a direct theoretical clash with Elwin.
3. **Nehru's synthesis:** the Panchsheel for Tribals explicitly positioned itself between the two, prioritising tribal agency ("their own genius") while accepting modern development inputs.
4. **Post-Independence drift:** ANALYSIS: in practice, neither pure isolation nor pure assimilation nor a fully realised integration occurred; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced.

Displacement-rehabilitation chain (2025 PYQ core)

1. **Resource overlap:** FACT: many of India's mineral, forest and hydel-power resources are concentrated in tribal-majority regions, creating a structural pressure for development projects to be sited there.
2. **Displacement event:** land acquisition, forest diversion or reservoir submergence removes a tribal community from its subsistence base.
3. **Rehabilitation response:** ANALYSIS: resettlement packages vary widely in quality - some provide land-for-land and livelihood-restoration support, others provide cash compensation without livelihood continuity, and community structures are frequently fragmented across scattered resettlement sites.
4. **Net outcome divergence:** ANALYSIS: where rehabilitation restores livelihood and keeps community intact, displacement can coexist with long-run welfare gain (access to markets, services); where it does not, displacement produces cumulative marginalisation - this divergence is the crux the PYQ asks students to evaluate.

4. Institutional and reform architecture

- FACT: **Fifth and Sixth Schedule governance (cross-linked, not restated)**: constitutional arrangements for tribal self-governance and land-transfer restriction are Polity's doctrinal territory; here the focus is their social function of slowing land alienation.

- FACT: **PVTG-targeted development (cross-linked)**: the administrative/welfare architecture for Particularly Vulnerable Tribal Groups belongs to Social-Justice/basic/08; the sociological point here is that PVTGs can face acute vulnerability, but exposure to displacement, acculturation and service gaps must be established group by group rather than presumed from the category alone.

- ANALYSIS: **Consultation and consent safeguards**: Indian law creates Gram Sabha consultation or consent routes in particular Scheduled Area and forest-rights contexts. Do not label all such safeguards "free, prior and informed consent" or assume uniform enforcement; the legal mechanics are cross-linked to Social-Justice/Polity. Their social purpose is to strengthen agency before land/forest decisions.

5. Indian applications and boundary cases

- ANALYSIS: **Boundary case 1 - successful integration**: a tribal community that retains land rights, gains market access via a nearby town, and sends children to school without losing language or custom illustrates Nehru's integration ideal working as intended.

- ANALYSIS: **Boundary case 2 - assimilation without consent**: a tribal group whose land was absorbed into a neighbouring agrarian caste economy through debt and distress land sale (land alienation) shows Ghurye-style absorption occurring informally, without protective safeguards, and without the community's welfare improving.

- ANALYSIS: **Boundary case 3 - rehabilitation contrast**: a community relocated for a project but given land-for-land, livelihood retraining and intact resettlement shows displacement need not equal marginalisation if rehabilitation is restoration-focused, whereas a community given only cash compensation, scattered across multiple resettlement colonies, shows the more common and more damaging pattern the PYQ is likely testing students to critique.

6. Limitations and trade-offs

- ANALYSIS: **Development-versus-autonomy trade-off**: resource extraction in tribal regions generates national economic benefit but concentrates social cost on communities with the least bargaining power - a recurring equity concern in any displacement analysis.

- ANALYSIS: **Consent-versus-project-timeline trade-off**: genuine Gram Sabha consultation takes time and can be procedurally weakened under pressure to fast-track project clearances, creating a persistent implementation gap.

- ANALYSIS: **Compensation-versus-restoration trade-off**: cash compensation is administratively simpler to disburse than land-for-land or livelihood-restoration packages, but restoration is what actually prevents post-displacement impoverishment - a policy-design tension, not merely a funding shortfall.

7. Must-Know Facts for Advanced Prelims

- FACT: Verrier Elwin's isolationist position emerged from fieldwork among central Indian tribal groups and warned against unregulated market and settler contact.

- FACT: G.S. Ghurye's historical assimilationist view described tribes as "backward Hindus"; it is a contested scholarly formulation, not a current identity label.

- FACT: MoTA's dated list identifies 75 PVTGs in 18 States and the UT of Andaman & Nicobar Islands. Legacy criteria include pre-agricultural level of technology, low literacy, stagnant/declining population and subsistence economy; these are administrative criteria, not a hierarchy of cultures.

8. Advanced Prelims traps

- WRONG: Elwin, Ghurye and Nehru's positions are minor variations of the same policy. -> They are

three distinct, historically contested theories - isolation, assimilation, integration - and Nehru's Panchsheel was explicitly framed against the other two.

- **WRONG:** Displacement and land alienation are the same process. -> Displacement is acute and project-driven; land alienation is gradual, often informal, and driven by debt/distress sale or encroachment.

- **WRONG:** Rehabilitation success is measured by compensation amount disbursed. -> Restoration of livelihood and community continuity, not cash amount alone, determines rehabilitation quality in the sociological assessment the PYQ invites.

- **WRONG:** Tribal development is a single-axis (welfare-scheme) issue. -> The 2025 PYQ frames it as a two-axis (displacement and rehabilitation) issue, though education, health and identity recognition remain relevant supporting dimensions.

9. CURRENT: Current-anchor note

- **CURRENT:** MoTA's state-wise PVTG list dated 9 July 2024 identifies 75 PVTGs in 18 States and the UT of Andaman & Nicobar Islands. Do not assert displacement or rehabilitation outcomes without a separate, dated project-level source.

10. PYQ-based analytical application

- **FACT: 2025 GS-I (15 marks, verbatim):** "Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion." Analytical route: (a) affirm the two-axis framing with the resource-overlap mechanism explaining why tribal regions face disproportionate displacement; (b) use the rehabilitation-quality distinction (restoration versus compensation) to explain why displacement outcomes vary; (c) give one boundary case of successful rehabilitation and one of failed rehabilitation; (d) offer a qualified opinion - the two axes dominate lived tribal development, but education, health and identity-recognition dimensions remain necessary complements, so the framing is largely but not wholly sufficient.

11. Mains-ready framework

Central thesis: Tribal development in India is best understood as the empirical endpoint of a century-long policy debate between isolation, assimilation and integration; today, its lived reality centres on the displacement-rehabilitation axis, where the resource-overlap between tribal regions and development projects makes displacement frequent, and the restoration-versus-compensation quality of rehabilitation determines whether displaced communities gain or lose from development.

1. Name the three historical positions - Elwin, Ghurye, Nehru - precisely.
2. State why Nehru's Panchsheel became the working post-Independence framework.
3. Explain the resource-overlap mechanism linking tribal regions to displacement risk.
4. Distinguish displacement from land alienation as two separate loss mechanisms.
5. Apply the restoration-versus-compensation distinction to judge rehabilitation quality.
6. Give one successful and one failed rehabilitation boundary case.
7. Flag the consent-versus-timeline and compensation-versus-restoration trade-offs.
8. Conclude with a qualified opinion on the two-axis framing, naming the supporting dimensions (education, health, identity) it does not fully capture.

12. Probable questions

- **ANALYSIS: Prelims:** Which criteria are used to identify Particularly Vulnerable Tribal Groups?

- **FACT: Mains (15 marks, 2025 GS-I PYQ, verbatim):** Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion.

- **ANALYSIS: Mains (15 marks):** Distinguish between displacement and land alienation as threats to tribal land security.

- **ANALYSIS: Mains (10 marks):** Why did Nehru's Panchsheel for Tribals reject both Elwin's

isolationist and Ghurye's assimilationist positions?

13. Study links

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2021, 2022
- **Paper(s):** GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2021	GS-I	9	Uniqueness of tribal knowledge systems against mainstream systems	Examine · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2022	GS-I	10	Tribal diversity and treatment as a single category	In which specific contexts · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Uniqueness of tribal knowledge systems against mainstream systems
- Tribal diversity and treatment as a single category

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

CONSOLIDATED REGISTER NOTES

Tribe and Tribal Society: RAPID CONCEPT AND EVIDENCE MAP

1. **Scheduled Tribe as a legal category:** Tribe has no single universal sociological checklist, while a Scheduled Tribe is a constitutionally notified category under Article 342, so older anthropological traits must never be used as a test of authenticity.
2. **Tribe-caste continuum:** The tribe-caste continuum is a historical sociological thesis that some communities long interacted with caste society through trade, migration or religious exchange and may show mixed features; it does not collapse tribal identities into caste or alter Scheduled Tribe status.
3. **Elwin's isolation:** Verrier Elwin argued from fieldwork among central Indian tribal groups that unregulated contact with markets, moneylenders and settlers exploited tribal communities and eroded their culture, so protective limitation of outside contact was necessary.
4. **Ghurye's assimilation:** G.S. Ghurye's historically influential and contested argument described tribes as backward Hindus at a lower stage of acculturation and favoured faster absorption into mainstream Hindu social and economic life; the phrase must be quoted as his argument, not as a description of Adivasi identity.
5. **Nehru's Panchsheel for Tribals:** Jawaharlal Nehru's integrationist middle path held that tribal people should develop along the lines of their own genius, retaining land and forest rights and cultural autonomy while gaining education, health and administration without imposed assimilation or museum isolation.
6. **Acculturation as the actual outcome:** None of the three positions was fully implemented; uneven acculturation resulted, with market and administrative contact expanding faster than protective safeguards were enforced, and acculturation is gradual and often two-way rather than deliberate absorption.
7. **Resource overlap:** Mineral, forest and hydel-power resources are concentrated in tribal-majority regions, which creates a structural pressure for development projects to be sited exactly where tribal communities live.
8. **Project displacement:** Mining, dam and industrial projects have repeatedly removed tribal communities from the land and forest base on which subsistence and identity depend, which is why tribal and national development are experienced as a trade-off rather than a shared gain.
9. **Land alienation:** Land alienation is the slower, cumulative transfer or encroachment of tribal land to non-tribal ownership through debt, distress sale or encroachment, and it is a different mechanism from a single project displacement event requiring a different remedy.
10. **Rehabilitation as restoration or compensation:** Restoration-oriented rehabilitation rebuilds land access, livelihood and community structure at the new site, while compensation-oriented rehabilitation pays money without guaranteeing livelihood continuity or keeping a village together.
11. **Rehabilitation decides the welfare sign:** Where rehabilitation restores livelihood and keeps the community intact, displacement can coexist with long-run welfare gain, and where it does not, displacement produces cumulative marginalisation, so rehabilitation quality is the decisive variable.
12. **Particularly Vulnerable Tribal Groups:** The Ministry of Tribal Affairs state-wise list dated 9 July 2024 identifies 75 Particularly Vulnerable Tribal Groups in 18 States and the Union Territory of Andaman and Nicobar Islands, with legacy criteria including pre-agricultural level of technology, low literacy, stagnant or declining population and subsistence economy.
13. **Fifth and Sixth Schedule contexts:** Fifth Schedule mainland tribal-majority regions and Sixth Schedule areas in parts of the North-East have distinct constitutional governance arrangements whose doctrinal detail belongs to Polity and is cross-linked rather than restated in a Society answer.
14. **Aggregate for rights, disaggregate for design:** A single legal category is necessary for entitlement, portability and atrocity protection and damaging for diagnosis, because forest-dependent, settled-cultivator and urbanised tribal workers need different livelihood design.
15. **Tribal knowledge domains:** Tribal knowledge systems span ecological indicators, medicinal plant practice held in practitioner lineages, customary community rules over forest produce, grazing and water, craft and material technique, and cosmology whose clan rules and sacred groves also regulate resource use.
16. **Mode contrast:** Tribal knowledge is distinctive in mode rather than in exotic content: embedded rather than abstracted, collective rather than individually authored, oral rather than written, place-specific rather than transferable, and validated by long-run use rather than by formal testing.

17. **Two prohibitions on knowledge answers:** Tribal knowledge must not be romanticised as a substitute for public health, schooling or formal science, and no specific remedy or technique may be attributed to a named tribe unless that attribution is separately verified.
18. **Scale and distinctiveness:** Scheduled Tribes were about 8.6 per cent of India's population at Census 2011, and distinct tribal languages including Halbi, Ho and Kui are routed in this owner's own Prelims record, which grounds both the scale and the diversity arguments.
19. **Identity movements and land:** Tribal identity movements assert distinct religious, linguistic or political identity and push back against both assimilationist framings and purely developmental framings that treat tribal areas only as a service-delivery problem.
20. **Verified direct Mains demands:** Three direct General Studies Paper-I demands are verified for this owner: 2025 on whether tribal development centres on displacement and rehabilitation worth 15 marks, 2021 on the uniqueness of tribal knowledge systems worth 10 marks and 2022 on the contexts in which tribal diversity should be treated as a single category worth 10 marks.

Tribe and Tribal Society: CLOSE-OPTION AND CAUSAL TRAPS

- Do not treat tribe and caste as entirely separate or entirely continuous categories.
- Do not merge the positions of Elwin, Ghurye and Nehru into one tribal policy view.
- Do not present Ghurye's backward Hindus phrase as a description of Adivasi identity.
- Do not confuse gradual acculturation with deliberate assimilation.
- Do not reduce tribal development to welfare-scheme delivery alone.
- Do not treat displacement and rehabilitation as two unrelated topics.
- Do not equate cash compensation with livelihood restoration.
- Do not attach an invented displacement count, project name or rehabilitation success rate.
- Do not treat the Particularly Vulnerable Tribal Groups criteria as a ranking of peoples.
- Do not use an undated Particularly Vulnerable Tribal Groups count.
- Do not apply one scheme template across Fifth Schedule, Sixth Schedule and urbanised tribal contexts.
- Do not romanticise tribal knowledge as a substitute for public health or schooling.
- Do not attribute a specific remedy or technique to a named tribe without verified evidence.
- Do not infer an option for the routed 2021 Prelims language item whose official key is not held locally.

Tribe and Tribal Society: ANSWER-WRITING SPINE

DEFINE THE SOCIAL UNIT -> STATE THE BOUNDARY RULE AND WHO IS INCLUDED
 -> GROUP NAMED EVIDENCE BY MECHANISM OF REPRODUCTION OR CHANGE
 -> TEST COUNTER-CASES, REGIONAL VARIATION AND CATEGORY LIMITS
 -> SEPARATE CORRELATION FROM CAUSATION AND LAW FROM SOCIAL ACCEPTANCE
 -> CLOSE WITH A GRADED, POLICY-AWARE VERDICT AND A DATA CAVEAT

Tribe and Tribal Society: CURRENT-LINK AND DATA BOUNDARY

No additional live official item was verified for this topic on 2026-09-02. Only the dated official anchors already carried by the repository owners are used, each with its issuing body and date. The package invents no caste, tribe, demographic or agrarian statistic, no legal or constitutional claim and no policy status.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: Category boundary

TRIBE -> no single universal sociological checklist
SCHEDULED TRIBE -> constitutional notification under Article 342
CONTINUUM -> historical thesis about long caste-society interaction
RULE -> the thesis never overrides the legal category
MUST REMEMBER: Tribal societies must be analysed through kinship, territory, livelihood, political organisation, exchange, religion and state-market interfaces, with isolation, assimilation, integration, dispossession, migration and self-governance treated as historically variable processes.

ASCII MASTER FLOW - PANEL 2/12: Three policy positions

ELWIN -> isolation, shield from market and settler exploitation
GHURYE -> assimilation, absorption as backward Hindus
NEHRU -> integration, development on tribals' own genius
OUTCOME -> none fully implemented, uneven acculturation followed

ASCII MASTER FLOW - PANEL 3/12: Panchsheel content

OWN GENIUS -> development on tribal terms
LAND AND FOREST -> rights retained rather than surrendered
SERVICES -> education, health and administration supplied
REJECTED -> both museum isolation and forced absorption

ASCII MASTER FLOW - PANEL 4/12: Why displacement recurs

RESOURCE GEOGRAPHY -> minerals, forests and hydel in tribal regions
PROJECT SITING -> mining, dams and industrial corridors
LOSS -> subsistence base and identity anchored in that land
EXPERIENCE -> development felt as trade-off, not shared gain

ASCII MASTER FLOW - PANEL 5/12: Two mechanisms of land loss

DISPLACEMENT -> acute, project-driven, single event
LAND ALIENATION -> slow transfer through debt or encroachment
REMEDY 1 -> resettlement design and livelihood restoration
REMEDY 2 -> restriction and restoration of transferred land

ASCII MASTER FLOW - PANEL 6/12: Rehabilitation test

LAND FOR LAND -> was an equivalent land base restored
LIVELIHOOD -> was the earning system rebuilt, not just paid for
COMMUNITY -> was the village relocated intact or scattered
VERDICT -> restoration means gain, compensation alone means loss
CLOSE DISTINCTION: Scheduled Tribe, tribe, indigenous people, Particularly Vulnerable Tribal Group and forest dweller are not synonyms; Fifth Schedule, Sixth Schedule, PESA 1996 and Forest Rights Act 2006 have distinct territorial, institutional and rights boundaries.

ASCII MASTER FLOW - PANEL 7/12: Vulnerability card

SOURCE -> Ministry of Tribal Affairs list dated 9 July 2024
COUNT -> 75 Particularly Vulnerable Tribal Groups
SPREAD -> 18 States and the UT of Andaman and Nicobar Islands
CRITERIA -> pre-agricultural technology, low literacy, subsistence economy

ASCII MASTER FLOW - PANEL 8/12: Aggregation split

AGGREGATE FOR -> notification, entitlement portability, atrocity protection
DISAGGREGATE FOR -> livelihood design and scheme targeting
VARIATION -> forest-dependent, settled cultivator, urban tribal worker
CONTEXT -> Fifth Schedule belts against Sixth Schedule polities

ASCII MASTER FLOW - PANEL 9/12: Knowledge domains

ECOLOGICAL -> seasonal indicators, fire and fallow practice
MEDICINAL -> plant remedies held in practitioner lineages
GOVERNANCE -> customary rules on forest produce, grazing, water
CRAFT AND COSMOLOGY -> apprenticeship technique and sacred groves

ASCII MASTER FLOW - PANEL 10/12: Mode contrast

EMBEDDED -> held in practice, not abstracted into models
COLLECTIVE -> authored by a community, not an individual
ORAL AND PLACE-SPECIFIC -> transmitted by speech, indexed to one tract
VALIDATION -> long-run use rather than controlled testing

ASCII MASTER FLOW - PANEL 11/12: Erosion and prohibition

DISPLACEMENT -> severs the ecology the knowledge was indexed to
SCHOOLING AND MARKET -> break oral transmission chains
PROHIBITION 1 -> no substitute for public health or formal education
PROHIBITION 2 -> no unverified remedy attributed to a named tribe

ASCII MASTER FLOW - PANEL 12/12: Tribal answer spine

OPEN -> state the opinion and the framing being tested
BODY -> displacement axis, then rehabilitation adequacy
ADD -> what the framing omits: identity, services, self-governance
CLOSE -> graded verdict with the dated official evidence
EVIDENCE LIMIT: Use central Indian, Northeast, Himalayan, island and pastoral examples, including Bhil, Gond, Santhal, Naga and PVTG variation; avoid primitive-versus-modern binaries, and distinguish notified status, statutory entitlement, implementation and lived outcome.
