

SOLVED PRACTICE WORKBOOK

Family, Marriage and Kinship - Solved Practice Workbook

UPSC complete learning session | Foundation to advanced | Concepts, evidence, practice and answer writing

Original deterministic study visual; labels are explanatory, not textual quotations.

Source order: repository knowledge -> official current linkage -> clearly marked analysis. No fabricated PYQs or statistics.

CONTENTS / WORKBOOK INDEX

Major learning parts and meaningful subtopics are listed in document order. Page numbers are generated from the final PDF layout; PDF bookmarks mirror the same hierarchy.

Family, Marriage and Kinship - Solved Practice Workbook 6

BASIC MCQS / REMEDIATION 6

Q1. Which statement correctly identifies Joint family?	6
Q2. Which chronology card should be filed under Joint family?	6
Q3. Which option preserves the source-bounded meaning of Joint family?	6
Q4. Which statement avoids a close-option trap about Joint family?	7
Q5. Which statement correctly identifies Nuclear family?	7
Q6. Which chronology card should be filed under Nuclear family?	7
Q7. Which option preserves the source-bounded meaning of Nuclear family?	7
Q8. Which statement avoids a close-option trap about Nuclear family?	8
Q9. Which statement correctly identifies Structural versus functional nuclearisation?	8
Q10. Which chronology card should be filed under Structural versus functional nuclearisation?	8
Q11. Which option preserves the source-bounded meaning of Structural versus functional nuclearisation?	8
Q12. Which statement avoids a close-option trap about Structural versus functional nuclearisation?	9
Q13. Which statement correctly identifies Nuclearisation chain?	9
Q14. Which chronology card should be filed under Nuclearisation chain?	9
Q15. Which option preserves the source-bounded meaning of Nuclearisation chain?	10
Q16. Which statement avoids a close-option trap about Nuclearisation chain?	10
Q17. Which statement correctly identifies Endogamy and exogamy together?	10
Q18. Which chronology card should be filed under Endogamy and exogamy together?	10
Q19. Which option preserves the source-bounded meaning of Endogamy and exogamy together?	11
Q20. Which statement avoids a close-option trap about Endogamy and exogamy together?	11
Q21. Which statement correctly identifies Forms of marriage?	11
Q22. Which chronology card should be filed under Forms of marriage?	11
Q23. Which option preserves the source-bounded meaning of Forms of marriage?	12
Q24. Which statement avoids a close-option trap about Forms of marriage?	12
Q25. Which statement correctly identifies Patrilineal majority pattern?	12
Q26. Which chronology card should be filed under Patrilineal majority pattern?	12
Q27. Which option preserves the source-bounded meaning of Patrilineal majority pattern?	13

Q28. Which statement avoids a close-option trap about Patrilineal majority pattern?	13
Q29. Which statement correctly identifies Matrilineal exceptions?	13
Q30. Which chronology card should be filed under Matrilineal exceptions?	13
Q31. Which option preserves the source-bounded meaning of Matrilineal exceptions?	14
Q32. Which statement avoids a close-option trap about Matrilineal exceptions?	14
Q33. Which statement correctly identifies Matrilineal is not matriarchy?	14
Q34. Which chronology card should be filed under Matrilineal is not matriarchy?	15
Q35. Which option preserves the source-bounded meaning of Matrilineal is not matriarchy?	15
Q36. Which statement avoids a close-option trap about Matrilineal is not matriarchy?	15
Q37. Which statement correctly identifies Family as socialisation unit?	15
Q38. Which chronology card should be filed under Family as socialisation unit?	16
Q39. Which option preserves the source-bounded meaning of Family as socialisation unit?	16
Q40. Which statement avoids a close-option trap about Family as socialisation unit?	16
Q41. Which statement correctly identifies Dowry as persistent practice?	17
Q42. Which chronology card should be filed under Dowry as persistent practice?	17
Q43. Which option preserves the source-bounded meaning of Dowry as persistent practice?	17
Q44. Which statement avoids a close-option trap about Dowry as persistent practice?	17
Q45. Which statement correctly identifies Legal-social gap?	18
Q46. Which chronology card should be filed under Legal-social gap?	18
Q47. Which option preserves the source-bounded meaning of Legal-social gap?	18
Q48. Which statement avoids a close-option trap about Legal-social gap?	19
Q49. Which statement correctly identifies Special Marriage Act as route, not acceptance?	19
Q50. Which chronology card should be filed under Special Marriage Act as route, not acceptance?	19
Q51. Which option preserves the source-bounded meaning of Special Marriage Act as route, not acceptance?	20
Q52. Which statement avoids a close-option trap about Special Marriage Act as route, not acceptance?	20
Q53. Which statement correctly identifies Status parity and identity boundary?	20
Q54. Which chronology card should be filed under Status parity and identity boundary?	21
Q55. Which option preserves the source-bounded meaning of Status parity and identity boundary?	21
Q56. Which statement avoids a close-option trap about Status parity and identity boundary?	21
Q57. Which statement correctly identifies Work-from-home effect?	22
Q58. Which chronology card should be filed under Work-from-home effect?	22
Q59. Which option preserves the source-bounded meaning of Work-from-home effect?	22

Q60. Which statement avoids a close-option trap about Work-from-home effect?	23
Q61. Which statement correctly identifies Mediated socialisation?	23
Q62. Which chronology card should be filed under Mediated socialisation?	23
Q63. Which option preserves the source-bounded meaning of Mediated socialisation?	24
Q64. Which statement avoids a close-option trap about Mediated socialisation?	24
Q65. Which statement correctly identifies Marriage as sacrament and companionship?	24
Q66. Which chronology card should be filed under Marriage as sacrament and companionship?	25
Q67. Which option preserves the source-bounded meaning of Marriage as sacrament and companionship?	25
Q68. Which statement avoids a close-option trap about Marriage as sacrament and companionship?	25
Q69. Which statement correctly identifies Globalisation and women's autonomy?	26
Q70. Which chronology card should be filed under Globalisation and women's autonomy?	26
Q71. Which option preserves the source-bounded meaning of Globalisation and women's autonomy?	26
Q72. Which statement avoids a close-option trap about Globalisation and women's autonomy?	27
Q73. Which statement correctly identifies Fertility data boundary?	27
Q74. Which chronology card should be filed under Fertility data boundary?	27
Q75. Which option preserves the source-bounded meaning of Fertility data boundary?	28
Q76. Which statement avoids a close-option trap about Fertility data boundary?	28
Q77. Which statement correctly identifies Verified direct Mains demands?	28
Q78. Which chronology card should be filed under Verified direct Mains demands?	29
Q79. Which option preserves the source-bounded meaning of Verified direct Mains demands?	29
Q80. Which statement avoids a close-option trap about Verified direct Mains demands?	29

Family, Marriage and Kinship - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies Joint family?

A. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. B. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. C. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. D. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further.

Answer: A. Explanation: A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under Joint family?

A. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. B. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. C. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. D. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further.

Answer: B. Explanation: A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of Joint family?

A. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. B. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. C. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. D. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together.

Answer: C. Explanation: A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about Joint family?

A. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. B. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. C. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. D. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households.

Answer: D. Explanation: A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Nuclear family?

A. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. B. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. C. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. D. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together.

Answer: A. Explanation: A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Nuclear family?

A. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. B. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. C. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. D. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation.

Answer: B. Explanation: A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Nuclear family?

A. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. B. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. C. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. D. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation.

Answer: C. Explanation: A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Nuclear family?

A. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. B. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. C. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. D. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility.

Answer: D. Explanation: A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies Structural versus functional nuclearisation?

A. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. B. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. C. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. D. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation.

Answer: A. Explanation: Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under Structural versus functional nuclearisation?

A. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. B. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. C. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. D. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern.

Answer: B. Explanation: Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Structural versus functional nuclearisation?

A. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. B. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. C. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. D. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home.

Answer: C. Explanation: Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Structural versus functional nuclearisation?

A. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. B. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. C. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. D. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together.

Answer: D. Explanation: Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Nuclearisation chain?

A. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. B. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. C. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. D. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation.

Answer: A. Explanation: Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Nuclearisation chain?

A. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. B. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. C. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. D. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern.

Answer: B. Explanation: Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Nuclearisation chain?

A. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. B. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. C. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. D. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home.

Answer: C. Explanation: Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Nuclearisation chain?

A. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. B. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. C. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. D. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further.

Answer: D. Explanation: Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Endogamy and exogamy together?

A. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. B. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. C. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. D. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation.

Answer: A. Explanation: Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Endogamy and exogamy together?

A. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. B. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. C. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. D. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves.

Answer: B. Explanation: Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Endogamy and exogamy together?

A. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. B. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. C. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. D. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves.

Answer: C. Explanation: Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Endogamy and exogamy together?

A. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. B. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. C. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. D. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together.

Answer: D. Explanation: Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Forms of marriage?

A. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. B. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. C. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. D. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern.

Answer: A. Explanation: Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Forms of marriage?

A. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. B. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. C. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. D. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home.

Answer: B. Explanation: Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Forms of marriage?

A. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. B. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. C. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. D. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible.

Answer: C. Explanation: Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Forms of marriage?

A. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. B. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. C. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. D. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation.

Answer: D. Explanation: Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Patrilineal majority pattern?

A. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. B. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. C. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. D. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home.

Answer: A. Explanation: Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Patrilineal majority pattern?

A. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. B. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. C. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. D. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves.

Answer: B. Explanation: Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Patrilineal majority pattern?

A. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. B. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. C. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. D. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice.

Answer: C. Explanation: Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Patrilineal majority pattern?

A. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. B. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. C. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. D. Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern.

Answer: D. Explanation: Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies Matrilineal exceptions?

A. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. B. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. C. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. D. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves.

Answer: A. Explanation: Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under Matrilineal exceptions?

A. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. B. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. C. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. D. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice.

Answer: B. Explanation: Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. The remaining options belong to different chronology, actor or analytical

categories.

Q31. Which option preserves the source-bounded meaning of Matrilineal exceptions?

A. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. B. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. C. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. D. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice.

Answer: C. Explanation: Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about Matrilineal exceptions?

A. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. B. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. C. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. D. Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home.

Answer: D. Explanation: Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Matriliney is not matriarchy?

A. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. B. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. C. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. D. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice.

Answer: A. Explanation: Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Matriliney is not matriarchy?

A. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. B. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. C. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. D. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone.

Answer: B. Explanation: Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Matriliney is not matriarchy?

A. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. B. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. C. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. D. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice.

Answer: C. Explanation: Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Matriliney is not matriarchy?

A. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. B. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. C. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. D. Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves.

Answer: D. Explanation: Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Family as socialisation unit?

A. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. B. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. C. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. D. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone.

Answer: A. Explanation: The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Family as socialisation unit?

A. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. B. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. C. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. D. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice.

Answer: B. Explanation: The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Family as socialisation unit?

A. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. B. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. C. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. D. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove.

Answer: C. Explanation: The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Family as socialisation unit?

A. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. B. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. C. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. D. The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible.

Answer: D. Explanation: The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies Dowry as persistent practice?

A. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. B. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. C. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. D. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove.

Answer: A. Explanation: Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under Dowry as persistent practice?

A. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. B. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. C. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. D. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone.

Answer: B. Explanation: Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of Dowry as persistent practice?

A. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. B. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. C. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. D. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms.

Answer: C. Explanation: Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about Dowry as persistent practice?

A. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. B. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. C. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. D. Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice.

Answer: D. Explanation: Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Legal-social gap?

A. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. B. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. C. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. D. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms.

Answer: A. Explanation: Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Legal-social gap?

A. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. B. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. C. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. D. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove.

Answer: B. Explanation: Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Legal-social gap?

A. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. B. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. C. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. D. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present.

Answer: C. Explanation: Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Legal-social gap?

A. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. B. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. C. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. D. Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice.

Answer: D. Explanation: Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies Special Marriage Act as route, not acceptance?

A. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. B. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. C. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. D. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove.

Answer: A. Explanation: The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under Special Marriage Act as route, not acceptance?

A. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. B. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. C. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. D. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms.

Answer: B. Explanation: The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of Special Marriage Act as route, not acceptance?

A. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. B. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. C. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. D. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed.

Answer: C. Explanation: The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about Special Marriage Act as route, not acceptance?

A. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. B. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. C. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. D. The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone.

Answer: D. Explanation: The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Status parity and identity boundary?

A. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. B. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. C. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. D. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance.

Answer: A. Explanation: Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Status parity and identity boundary?

A. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. B. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. C. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. D. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed.

Answer: B. Explanation: Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Status parity and identity boundary?

A. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. B. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. C. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. D. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed.

Answer: C. Explanation: Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Status parity and identity boundary?

A. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. B. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. C. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. D. Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove.

Answer: D. Explanation: Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Work-from-home effect?

A. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. B. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. C. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. D. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present.

Answer: A. Explanation: Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Work-from-home effect?

A. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. B. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. C. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. D. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed.

Answer: B. Explanation: Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Work-from-home effect?

A. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. B. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. C. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. D. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance.

Answer: C. Explanation: Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Work-from-home effect?

A. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. B. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. C. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. D. Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms.

Answer: D. Explanation: Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies Mediated socialisation?

A. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. B. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. C. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. D. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance.

Answer: A. Explanation: Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under Mediated socialisation?

A. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. B. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. C. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. D. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed.

Answer: B. Explanation: Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of Mediated socialisation?

A. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. B. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. C. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. D. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance.

Answer: C. Explanation: Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about Mediated socialisation?

A. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. B. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. C. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. D. Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present.

Answer: D. Explanation: Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Marriage as sacrament and companionship?

A. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. B. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. C. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. D. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02.

Answer: A. Explanation: A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Marriage as sacrament and companionship?

A. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. B. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. C. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. D. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households.

Answer: B. Explanation: A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Marriage as sacrament and companionship?

A. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. B. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. C. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. D. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02.

Answer: C. Explanation: A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Marriage as sacrament and companionship?

A. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. B. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. C. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. D. A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance.

Answer: D. Explanation: A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Globalisation and women's autonomy?

A. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. B. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. C. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. D. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households.

Answer: A. Explanation: Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Globalisation and women's autonomy?

A. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. B. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. C. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. D. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households.

Answer: B. Explanation: Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Globalisation and women's autonomy?

A. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. B. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. C. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. D. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households.

Answer: C. Explanation: Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Globalisation and women's autonomy?

A. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. B. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. C. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. D. Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed.

Answer: D. Explanation: Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Fertility data boundary?

A. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. B. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. C. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. D. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility.

Answer: A. Explanation: The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Fertility data boundary?

A. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. B. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. C. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. D. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households.

Answer: B. Explanation: The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Fertility data boundary?

A. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. B. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. C. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. D. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility.

Answer: C. Explanation: The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Fertility data boundary?

A. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. B. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. C. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. D. The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance.

Answer: D. Explanation: The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Verified direct Mains demands?

A. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. B. A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. C. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. D. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together.

Answer: A. Explanation: Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Verified direct Mains demands?

A. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. B. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. C. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. D. A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility.

Answer: B. Explanation: Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Verified direct Mains demands?

A. Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. B. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. C. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. D. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further.

Answer: C. Explanation: Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Verified direct Mains demands?

A. Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. B. Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. C. Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. D. Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02.

Answer: D. Explanation: Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Four direct General Studies Paper-I demands are verified for this owner. The 2024 demand is routed in the audited 2024-2025 ledger, and the 2022 and two 2023 demands are routed in the audited 2018-2023 ledger to the Advanced owner with the Core owner recording that Core routing supersedes. Every wording reproduced below was confirmed against the locally held official General Studies Paper-I question papers. The caste half of the 2024 demand is owned by Topic 02 and is answered here only from the family, kinship and marriage-boundary side. No additional question, marking scheme or official key is invented.

OWNER PYQ LEDGER EXTRACTS

5. Indian applications and PYQ mapping

- **FACT: 2024 GS-I PYQ (10 marks, verbatim):** "Intercaste marriages between castes which have socio-economic parity have increased, to some extent, but this is less true of interreligious marriages. Discuss." From the family/marriage lens: interreligious marriage crosses a boundary anchored in personal law, community belonging and often family/community sanction that operates independently of economic standing, which is why it lags behind intercaste marriage even where the couples concerned are of equal socio-economic standing. State this as a qualified explanation to test, not a claim that personal law makes interreligious marriage impossible; the Special Marriage Act provides a civil route. The caste-marriage half is in

02_Caste-System-Structure-and-Contemporary-Dynamics.md.

- **ANALYSIS:** A Khasi household where the youngest daughter inherits the family home illustrates matrilineal kinship operating alongside India's dominant patrilineal norm.

9. PYQ application

- **FACT: 2024 GS-I (10 marks):** from the family/kinship angle, explain how kinship, community identity and family sanction can make parity insufficient for some interreligious matches; note the Special Marriage Act's civil route and avoid treating the qualified PYQ premise as a universal trend. Cross-refer to Topic 02 for the caste-side analysis.

10. PYQ-based analytical application

- **FACT: 2024 GS-I Q9 (10 marks, verbatim):** "Intercaste marriages between castes which have socio-economic parity have increased, to some extent, but this is less true of interreligious marriages. Discuss." Analytical route from the family/kinship angle: test how status parity, family/kinship sanction and community identity interact, while noting the Special Marriage Act's civil route and strong regional variation - cross-refer advanced/02 for the full caste-side treatment.

- **FACT: 2024 GS-I Q19 (15 marks, verbatim):** "Globalization has increased urban migration by skilled, young, unmarried women from various classes. How has this trend impacted upon their personal freedom and relationship with family?" Analytical route: trace the globalisation-family causal chain (Section 3) to argue personal freedom expands through independent income and residence, while family relationships are renegotiated rather than severed.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

- **Years represented:** 2022, 2023
- **Paper(s):** GS-I
- **Routed question demands:** 3

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2022	GS-I	8	Work From Home and its impact on family relationships	Explore and evaluate · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2023	GS-I	8	Marriage as a sacrament losing value in modern India	Do you think · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2023	GS-I	10	Mobile phones replacing child cuddling and socialization of children	Discuss its impact · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Work From Home and its impact on family relationships
- Marriage as a sacrament losing value in modern India
- Mobile phones replacing child cuddling and socialization of children

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2022 GS-I Q8

Demand: Explore and evaluate the impact of 'Work From Home' on family relationships. (Answer in 150 words) 10 marks.

Status: Routed in the audited 2018-2023 Mains routing ledger to the Advanced owner with Core routing recorded as superseding; wording confirmed in the locally held official General Studies Paper-I.

Model solution: Define the change first: work from home dissolves the spatial and temporal boundary that previously separated paid work from household life. Explore the gains. Presence increases, because a parent is physically available during the working day, which supports supervision of children and care of elderly members; commuting time returns to the household; and flexible scheduling can allow care and paid work to be interleaved. Evaluate the strains. Shared domestic space converts the home into a contested workplace, which raises conflict where housing is small; the always-available expectation extends working hours; and, most importantly, the additional care and domestic labour is absorbed unequally, because prevailing gender norms treat the woman's presence at home as availability for housework rather than as work time. State the conditions that decide the outcome: available room and privacy, occupational control over one's own schedule, whether both adults work from home, and how the household allocates care. Add the family-structure link that work from home can strengthen a functionally joint arrangement by making intergenerational co-residence workable, or weaken it by making the household a permanent office. Conclude that the impact is negotiated rather than uniformly liberating, and that it deepens existing inequalities where norms and space are unequal. Why this earns marks: it explores and then evaluates as the directive requires, names the conditions instead of listing effects, and identifies the distributional consequence an examiner is looking for.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 1 - 2022 GS-I Q8", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Define the change first: work from home dissolves the spatial and temporal boundary that previously separated paid work from household life. Explore the gains. Presence increases, because a parent is physically available during the working day, which supports supervision of children and care of elderly members; commuting time returns to the household; and flexible scheduling can allow care and paid work to be interleaved.

Evaluate the strains. Shared domestic space converts the home into a contested workplace, which raises conflict where housing is small; the always-available expectation extends working hours; and, most importantly, the additional care and domestic labour is absorbed unequally, because prevailing gender norms treat the woman's presence at home as availability for housework rather than as work time. State the conditions that decide the outcome: available room and privacy, occupational control over one's own schedule, whether both adults work from home, and how the household allocates care. Add the family-structure link that work from home can strengthen a functionally joint arrangement by making intergenerational co-residence workable, or weaken it by making the household a permanent office. Conclude that the impact is negotiated rather than uniformly liberating, and that it deepens existing inequalities where norms and space are unequal. Why this earns marks: it explores and then evaluates as the directive requires, names the conditions instead of listing effects, and identifies the distributional consequence an examiner is looking for.

Analytical body:

1. **Claim and named evidence:** Demand: Explore and evaluate the impact of 'Work From Home' on family relationships. (Answer in 150 words) 10 marks. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Status: Routed in the audited 2018-2023 Mains routing ledger to the Advanced owner with Core routing recorded as superseding; wording confirmed in the locally held official General Studies Paper-I. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Define the change first: work from home dissolves the spatial and temporal boundary that previously separated paid work from household life. Explore the gains. Presence increases, because a parent is physically available during the working day, which supports supervision of children and care of elderly members; commuting time returns to the household; and flexible scheduling can allow care and paid work to be interleaved. Evaluate the strains. Shared domestic space converts the home into a contested workplace, which raises conflict where housing is small; the always-available expectation extends working hours; and, most importantly, the additional care and domestic labour is absorbed unequally, because prevailing gender norms treat the woman's presence at home as availability for housework rather than as work time. State the conditions that decide the outcome: available room and privacy, occupational control over one's own schedule, whether both adults work from home, and how the household allocates care. Add the family-structure link that work from home can strengthen a functionally joint arrangement by making intergenerational co-residence workable, or weaken it by making the household a permanent office. Conclude that the impact is negotiated rather than uniformly liberating, and that it deepens existing inequalities where norms and space are unequal. Why this earns marks: it explores and then evaluates as the directive requires, names the conditions instead of listing effects, and identifies the distributional consequence an examiner is looking for.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2022 GS-I Q8", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 2 - 2023 GS-I Q8

Demand: Do you think marriage as a sacrament is losing its value in Modern India? (Answer in 150 words) 10 marks.

Status: Routed in the audited 2018-2023 Mains routing ledger to the Advanced owner with Core routing recorded as superseding; wording confirmed in the locally held official General Studies Paper-I.

Model solution: Take a qualified position: marriage is being transformed rather than devalued. Show what has changed. Companionate expectations, later marriage, women's independent income from urban work and a wider role for self-choice have shifted the emphasis from an obligatory alliance between families to a negotiated relationship between individuals, which proves that the sacramental idiom no longer monopolises the meaning of marriage. Show what persists. Caste endogamy remains the most consistently observed feature of the marriage system and operates with gotra exogamy; ritual performance, kin participation and family sanction continue to authorise most marriages; dowry, though prohibited, persists as a status-signalling practice; and matrilineal Khasi and traditionally Nair systems show that variation is structural rather than a sign of decay. Distinguish law from norms: the Special Marriage Act, 1954 supplies a civil route, and judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, which proves that legal change alone does not measure sacramental value. Add the data caution that a fertility indicator such as the National Family Health Survey round 5 figure of 2.0 measures neither household form nor marriage meaning. Conclude that the sacrament is being reinterpreted, not abandoned, and that its kinship functions are the least changed part. Why this earns marks: it answers do-you-think with a defended verdict, holds change and persistence together, and refuses both nostalgia and exaggerated decline.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 2 - 2023 GS-I Q8", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Take a qualified position: marriage is being transformed rather than devalued. Show what has changed. Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

How to improve this answer: For "PYQ DEMAND CARD 2 - 2023 GS-I Q8", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 3 - 2023 GS-I Q10

Demand: Child cuddling is now being replaced by mobile phones. Discuss its impact on the socialization of children. (Answer in 150 words) 10 marks.

Status: Routed in the audited 2018-2023 Mains routing ledger to the Advanced owner with Core routing recorded as superseding; wording confirmed in the locally held official General Studies Paper-I.

Model solution: Open by converting the premise into a testable mechanism: the relevant question is what interaction a device displaces and what it adds, not whether screens are good or bad. Discuss the displacement side. The family is the primary institution transmitting caste, religious and gender norms, and early socialisation runs through unstructured physical presence, responsive interaction and shared routine; where device use replaces that interaction, the child loses the setting in which emotional regulation, language turn-taking and norm transmission are learnt, and the parent loses the observation on which supervision depends. Discuss the addition side. Mediated contact keeps migrant parents and dispersed kin present in a child's life, which matters directly in a society where urban migration separates nuclear units from ancestral households; curated content can extend learning; and shared viewing with an adult can become a socialising interaction rather than a substitute for one. State the conditions that decide the outcome: the child's age, the total interaction budget of the household, whether an adult mediates, and whether the household has alternative caregivers. Qualify that this is a mechanism argument and that no prevalence or clinical figure is asserted here. Conclude that impact depends on substitution and mediation, so the policy-relevant response is protected interaction time rather than prohibition. Why this earns marks: it discusses impact through a mechanism, presents both displacement and addition, names the deciding conditions, and avoids unsupported quantification.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 3 - 2023 GS-I Q10", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Open by converting the premise into a testable mechanism: the relevant question is what interaction a device displaces and what it adds, not whether screens are good or bad. Discuss the displacement side. The family is the primary institution transmitting caste, religious and gender norms, and early socialisation runs through unstructured physical presence, responsive interaction and shared routine; where device use replaces that interaction, the child loses the setting in which emotional regulation, language turn-taking and norm transmission are learnt, and the parent loses the observation on which supervision depends. Discuss the addition side. Mediated

contact keeps migrant parents and dispersed kin present in a child's life, which matters directly in a society where urban migration separates nuclear units from ancestral households; curated content can extend learning; and shared viewing with an adult can become a socialising interaction rather than a substitute for one. State the conditions that decide the outcome: the child's age, the total interaction budget of the household, whether an adult mediates, and whether the household has alternative caregivers. How to improve this answer: For "PYQ DEMAND CARD 3 - 2023 GS-I Q10", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

PYQ DEMAND CARD 4 - 2024 GS-I Q9

Demand: Intercaste marriages between castes which have socio-economic parity have increased, to some extent, but this is less true of interreligious marriages. Discuss. (Answer in 150 words) 10 marks.

Status: Verified verbatim in the audited 2024-2025 Mains routing ledger and in the locally held official 2024 General Studies Paper-I. The caste half of the demand is owned by Topic 02; this owner supplies the family, kinship and marriage-boundary analysis.

Model solution: Answer from the kinship side. Claim one: marriage in India is arranged by families as much as by individuals, so an alliance is assessed for what it does to the family's standing and resource base; where two jatis have socio-economic parity, that assessment returns a neutral result, which is the mechanism behind the increase the question describes. Claim two: an interreligious alliance is assessed on a different axis, because it engages community belonging, kin networks, ritual participation and the family's standing inside a faith community, and parity does not neutralise any of these; the decisive evidence that legal plurality is not the barrier is the Special Marriage Act, 1954, which supplies a civil route across religions, so the residual resistance is social rather than statutory. Claim three: the reproduction rule is unchanged in both cases, because caste endogamy operating with gotra exogamy remains the most consistently observed feature of the system, which is why rising boundary-crossing does not indicate that kinship control has ended. Qualify explicitly that the premise is hedged as increasing only to some extent and is not a national prevalence series, and that acceptance varies by region, class and generation. Conclude that the two boundaries are guarded by different things, so they erode at different speeds. Why this earns marks: it explains the differential rather than describing marriage change, supplies the civil-route evidence, and preserves the question's own qualification.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 4 - 2024 GS-I Q9", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Answer from the kinship side. How to improve this answer: For "PYQ DEMAND CARD 4 - 2024 GS-I Q9", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish endogamy from exogamy and explain why both rules can operate in the same marriage. Answer in about 150 words.

Model thesis: Endogamy fixes the outer boundary of the marriage circle while exogamy excludes the clan lineage inside it, so the two rules are complementary levels of one system rather than competing norms.

Claim -> named evidence -> analysis -> qualification:

- Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together.
- Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation.
- Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern.

Qualified conclusion: Endogamy fixes the outer boundary of the marriage circle while exogamy excludes the clan lineage inside it, so the two rules are complementary levels of one system rather than competing norms.

Demand decoding: The directive **explain** requires a direct position on "Distinguish endogamy from exogamy and explain why both rules can operate in the same...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Endogamy fixes the outer boundary of the marriage circle while exogamy excludes the clan lineage inside it, so the two rules are complementary levels of one system rather than competing norms.

Analytical body:

1. **Claim and named evidence:** Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Indian marriage forms include monogamy, regionally rare polygamy, endogamy, exogamy, arranged marriage and a rising share of self-choice marriage whose spread varies sharply by region, class, education and generation. **Analysis:** Connect structure or institution -> norm/incentive/power/agency

mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

3. **Claim and named evidence:** Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Endogamy fixes the outer boundary of the marriage circle while exogamy excludes the clan lineage inside it, so the two rules are complementary levels of one system rather than competing norms.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Distinguish endogamy from exogamy and explain why both rules can operate in the same...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 2 - 10 MARKS

Question: Explain why separate residence in urban India does not by itself prove the decline of the joint family. Answer in about 150 words.

Model thesis: Structural nuclearisation can advance while remittance, ritual participation and deferred decision authority keep the family functionally joint, so residence and function must be assessed separately.

Claim -> named evidence -> analysis -> qualification:

- A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households.
- A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility.
- Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together.
- Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further.

Qualified conclusion: Structural nuclearisation can advance while remittance, ritual participation and deferred decision authority keep the family functionally joint, so residence and function must be assessed separately.

Demand decoding: The directive **explain** requires a direct position on "Explain why separate residence in urban India does not by itself prove the decline of the...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Structural nuclearisation can advance while remittance, ritual participation and deferred decision authority keep the family functionally joint, so residence and function must be assessed separately.

Analytical body:

1. **Claim and named evidence:** A joint family is a multi-generational arrangement that may share residence, property, income or obligations; co-residence is an important form, but family functions can persist across separate households. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** A nuclear family household consists of parents and their unmarried children and has become more common with urban migration, housing constraints and occupational mobility. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Structural nuclearisation is the shift to separate, smaller-household residence, while functional nuclearisation would additionally mean independence from intergenerational financial support and decision authority, and the two do not move together. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Structural nuclearisation can advance while remittance, ritual participation and deferred decision authority keep the family functionally joint, so residence and function must be assessed separately.

Executable exam-length answer / compression plan: For a 10-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise three points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Explain why separate residence in urban India does not by itself prove the decline of the...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 3 - 15 MARKS

Question: Examine the claim that Indian kinship is uniform, using matrilineal evidence. Answer in about 250 words.

Model thesis: Patriliney is dominant but not universal, and matrilineal descent among the Khasi and traditionally the Nair shows regional variation in property and lineage without implying matriarchal authority.

Claim -> named evidence -> analysis -> qualification:

- Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern.
- Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home.
- Matrilineal descent concerns descent and property and must not be equated with matriarchal authority, because ritual and public authority can still rest with maternal uncles rather than with women themselves.

- The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible.

Qualified conclusion: Patriliney is dominant but not universal, and matrilineal descent among the Khasi and traditionally the Nair shows regional variation in property and lineage without implying matriarchal authority.

Demand decoding: The directive **examine** requires a direct position on "Examine the claim that Indian kinship is uniform, using matrilineal evidence. Answer in about...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Patriliney is dominant but not universal, and matrilineal descent among the Khasi and traditionally the Nair shows regional variation in property and lineage without implying matriarchal authority.

Analytical body:

1. **Claim and named evidence:** Patrilineal systems trace descent, surname and property transmission through the father's line and constitute India's dominant kinship pattern. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Matrilineal descent among the Khasi of Meghalaya and, traditionally, the Nair of Kerala vests descent, surname and property in the female line, and the youngest Khasi daughter customarily inherits the ancestral home. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

4. **Claim and named evidence:** The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Patriliney is dominant but not universal, and matrilineal descent among the Khasi and traditionally the Nair shows regional variation in property and lineage without implying matriarchal authority.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Examine the claim that Indian kinship is uniform, using matrilineal evidence. Answer in about...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 4 - 15 MARKS

Question: Assess how technology and migration are redistributing care, authority and socialisation within Indian families. Answer in about 250 words.

Model thesis: Family change is a redistribution of functions across household, kin, market and digital systems rather than institutional decline, and its outcome depends on space, gender norms, adult mediation and negotiated obligation.

Claim -> named evidence -> analysis -> qualification:

- Work from home changes the work-home boundary, adding presence, flexible care and reduced commuting while blurring work-care limits and reproducing unequal domestic labour, so the outcome depends on housing space, control over time and gender norms.
- Mobile-phone use changes child socialisation by displacing some direct interaction while adding mediated learning and contact, so the effect depends on what interaction is displaced, the child's age and context, and whether adult mediation is present.
- Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed.
- Urban migration for employment and housing cost separate a nuclear unit from the ancestral household, while remittance and participation in family rituals continue, so form changes before function and later generations weaken the tie further.
- The family remains the primary institution transmitting caste, religious and gender norms across generations, which makes it the site where broader social change or resistance to it first becomes visible.

Qualified conclusion: Family change is a redistribution of functions across household, kin, market and digital systems rather than institutional decline, and its outcome depends on space, gender norms, adult mediation and negotiated obligation.

Demand decoding: The directive **assess** requires a direct position on "Assess how technology and migration are redistributing care, authority and socialisation...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Family change is a redistribution of functions across household, kin, market and digital systems rather than institutional decline, and its outcome depends on space, gender norms, adult mediation and negotiated obligation.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Assess how technology and migration are redistributing care, authority and socialisation...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 5 - 20 MARKS

Question: Evaluate whether the boundaries guarding caste and religion in marriage are eroding for the same reasons. Answer in about 300 words.

Model thesis: They are not, because parity protects status and resources while belonging protects community identity, and the existence of a civil route shows that legal plurality is not the operative barrier.

Claim -> named evidence -> analysis -> qualification:

- The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone.
- Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove.
- Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together.
- Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice.

Qualified conclusion: They are not, because parity protects status and resources while belonging protects community identity, and the existence of a civil route shows that legal plurality is not the operative barrier.

Demand decoding: The directive **evaluate** requires a direct position on "Evaluate whether the boundaries guarding caste and religion in marriage are eroding for the...", all clauses, a sociological mechanism, historical trajectory,

intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: They are not, because parity protects status and resources while belonging protects community identity, and the existence of a civil route shows that legal plurality is not the operative barrier.

Analytical body:

1. **Claim and named evidence:** The Special Marriage Act, 1954 provides a civil route across religions, which is why an interreligious-marriage answer must separate legal possibility from kin and community sanction instead of blaming personal-law plurality alone. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Socio-economic parity can ease some intercaste matches because neither family's status or resource base is threatened, while interreligious matches additionally engage community belonging, kinship networks and family sanction that parity does not remove. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Caste endogamy restricts marriage to within the caste while gotra exogamy restricts it to outside the clan lineage within that caste, so the two rules operate at different levels and typically apply together. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** Dowry is a transfer of goods or cash from the bride's family to the groom's family at marriage that is legally prohibited yet sociologically persistent as a status-signalling and marriage-market practice. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: They are not, because parity protects status and resources while belonging protects community identity, and the existence of a civil route shows that legal plurality is not the operative barrier.

Executable exam-length answer / compression plan: For a 20-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise six to eight points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

Why this earns marks: The answer obeys the directive, explains rather than lists, integrates India-centric evidence and avoids homogenisation, legalism and causal overclaim.

How to improve this answer: For "Evaluate whether the boundaries guarding caste and religion in marriage are eroding for the...", replace the weakest generalisation with one named community, region, institution, movement or source-dated dataset and state what that evidence cannot establish.

ORIGINAL MAINS 6 - 20 MARKS

Question: Critically examine the proposition that Indian marriage is being transformed rather than devalued. Answer in about 300 words.

Model thesis: Companionate choice, delayed marriage and women's autonomy change what marriage does without removing kinship, ritual and endogamy functions, so transformation is the defensible verdict and dated survey indicators cannot settle it.

Claim -> named evidence -> analysis -> qualification:

- A marriage can become more companionate and choice-oriented without ceasing to carry kinship, ritual and endogamy functions, so sacramental change is institutional transformation rather than disappearance.
- Urban migration of young, skilled and unmarried women for work expands independent income, mobility and partner choice while creating friction with family expectations of control over marriage timing and choice, and ties are usually renegotiated rather than severed.
- Judicial protection for relationships in the nature of marriage has expanded faster than social acceptance, so a relationship may be legally protected while remaining socially unnormalised, and the statutory detail belongs to Social Justice.
- The National Family Health Survey round 5 for 2019-21 recorded a national Total Fertility Rate of 2.0 and is a historical comparator, round 6 for 2023-24 was released on 29 May 2026, and neither round measures household form, nuclearisation or marriage acceptance.
- Four direct General Studies Paper-I demands are verified for this owner: 2022 on the impact of work from home on family relationships worth 10 marks, 2023 on marriage as a sacrament losing value worth 10 marks, 2023 on mobile phones replacing child cuddling worth 10 marks, and 2024 on intercaste versus interreligious marriage worth 10 marks, whose caste half is owned by Topic 02.

Qualified conclusion: Companionate choice, delayed marriage and women's autonomy change what marriage does without removing kinship, ritual and endogamy functions, so transformation is the defensible verdict and dated survey indicators cannot settle it.

Demand decoding: The directive **critically examine** requires a direct position on "Critically examine the proposition that Indian marriage is being transformed rather than...", all clauses, a sociological mechanism, historical trajectory, intersectional and regional variation, named Indian evidence, constitutional/institutional boundaries and a qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Companionate choice, delayed marriage and women's autonomy change what marriage does without removing kinship, ritual and endogamy functions, so transformation is the defensible verdict and dated survey indicators cannot settle it.
