

ASCII MASTER FLOW – PANEL 1/12: Organisational layering

REFORM ERA -> elite-led advocacy on widow remarriage and child marriage

EARLY NATIONAL -> Women's Indian Association, then All India Women's Conference 1927

RIGHTS ERA -> National Federation of Indian Women on wages and dowry

ECONOMIC ERA -> Self Employed Women's Association, then federated self-help groups

MUST REMEMBER: Women's status is produced through patriarchy, caste, class, tribe, religion, region, disability and life course across care, work, property, education, health, bodily autonomy, representation and collective action; women's organisations range from reform associations to unions, SHGs and movements.

ASCII MASTER FLOW – PANEL 2/12: Precedence card

EARLIER BODY -> Women's Indian Association

FOUNDED 1927 -> All India Women's Conference, education first

LATER SCOPE -> legal and social reform advocacy

PROHIBITION -> never describe the 1927 body as India's first

ASCII MASTER FLOW – PANEL 3/12: Four organisational models

RIGHTS ADVOCACY -> All India Women's Conference platform work

WAGE AND DOWRY -> National Federation of Indian Women mobilisation

TRADE UNION -> Self Employed Women's Association collective bargaining

SAVINGS FEDERATION -> self-help groups federating upward

ASCII MASTER FLOW – PANEL 4/12: Trichotomy definitions

EQUALITY -> equal rights, status and opportunity as the baseline

EQUITY -> context-responsive measures against unequal starting conditions

EMPOWERMENT -> expanded agency, capability, resources and voice

RULE -> a right or a coverage figure never proves the third term

ASCII MASTER FLOW – PANEL 5/12: Where the chain stalls

INSTRUMENT EXISTS -> is it reachable by this woman at all

REACHED -> was it actually taken up rather than merely offered

USED -> did the use change a recognised decision

STALL POINT -> coverage without uptake, or uptake without follow-through

ASCII MASTER FLOW – PANEL 6/12: Time and space constraints

TIME -> unpaid care and domestic work compress schooling and paid work

SPACE -> mobility limits, harassment and safety condition public presence

WORK -> workplace access and treatment shape continuity of employment

DIGITAL -> internet and device access shape information and market reach

CLOSE DISTINCTION: Women are not a homogeneous category, labour-force participation is not total work, unpaid care is not inactivity, descriptive representation is not substantive empowerment, and protective law is not implementation or transformed social norms.

ASCII MASTER FLOW – PANEL 7/12: Access indicator card

SOURCE -> National Family Health Survey round five, 2019-21

ACCOUNT USE -> 78.6 per cent of women aged 15-49 with an account they used

INTERNET -> 33.3 per cent had ever used the internet

STATUS -> dated reach indicators; round six was released 29 May 2026

ASCII MASTER FLOW – PANEL 8/12: Intersectional reach

UNIVERSAL FRAMING -> women treated as one analytical category

CRITIQUE -> caste, class, tribe and religion differentiate constraint

EVIDENCE -> separate Dalit and tribal women's organisations emerged

READING -> a corrective to reach, not a fragmentation of the movement

ASCI MASTER FLOW – PANEL 9/12: Three boundary cases

EQUALITY WITHOUT EQUITY -> full legal rights, no income or mobility support

EQUITY WITHOUT EMPOWERMENT -> credit received, loan use controlled by another

FULL CHAIN -> credit, collective bargaining, then an independent decision

COMPOUNDED -> caste-based wage discrimination added to gender constraint

ASCII MASTER FLOW – PANEL 10/12: Gig-work verdict

GAIN -> wider entry, flexible hours, independent earning opportunity
COST -> income volatility, algorithmic control, thin social protection
TEST -> do earnings, safety and voice improve together
BOUNDARY -> platform legal status is owned by Social Justice

ASCII MASTER FLOW – PANEL 11/12: Causal restraint

REPORTED CATEGORY -> an outcome record, never a proof of cause

STRESSORS -> candidate pathways, examined without attribution

FRAME -> National Suicide Prevention Strategy of 2022, surveillance to resilience

CLOSE -> support access and non-stigmatising discussion

ASCII MASTER FLOW – PANEL 12/12: Women and organisations spine

OPEN -> define the exact term the directive names

BODY -> organisational mechanism, then reach across caste and class

TEST -> instrument reached, taken up, and converted into a decision

CLOSE -> agency verdict with the coverage-is-not-agency caveat

EVIDENCE LIMIT: Use SEWA, Kudumbashree, Self-Employed Women's Association, anti-arrack, Chipko participation and constitutional/statutory institutions with named regional variation; distinguish NFHS/PLFS source periods and avoid attributing outcomes to one scheme without a mechanism.
