

## ASCII MASTER FLOW – PANEL 1/12: Lens set for social change

MACRO -> structural-functional equilibrium against conflict-driven contradiction

OLDER FAMILIES -> evolutionary unilinear development and cyclical rise and fall

TRANSMISSION -> diffusionist spread of practices, technology and ideas

EXCLUDED -> reform chronology owned by Modern Indian History

MUST REMEMBER: Social change alters institutions, relations, norms and identities through Sanskritisation, westernisation, secularisation, modernisation, democratisation, education, technology, migration, social movements and state action; continuity and change coexist at different speeds.

## ASCII MASTER FLOW – PANEL 2/12: One episode, two readings

EPISODE -> an untouchability practice ends in a village

FUNCTIONAL READING -> the system reduces disruptive tension and renegotiates roles

CONFLICT READING -> sustained lower-caste mobilisation defeats entrenched interest

ANSWER RULE -> state which mechanism the evidence better supports

## ASCII MASTER FLOW – PANEL 3/12: Three axes card

SANSKRITISATION -> status axis, position changes inside an unchanged hierarchy

WESTERNISATION -> value axis, equality, individual rights and rationality

MODERNISATION -> structural axis, rational-legal institutions and role differentiation

PROHIBITION -> the three are not stages of one ladder

## ASCII MASTER FLOW – PANEL 4/12: Status inconsistency chain

INPUT -> new resources through education, migration income or market access  
RESPONSE -> Sanskritise, Westernise, modernise or combine, by social context  
MISMATCH -> new values and structural position without matching local status  
OUTPUT -> the inconsistency generates further pressure for change

## ASCHER MASTER FLOW – PANEL 5/12: Two cultural streams

GREAT TRADITION -> pan-Indian, textual, reflective stream

LITTLE TRADITION -> local, oral, folk stream

AUTHORSHIP -> Robert Redfield, applied to Indian villages by McKim Marriott

RELATION -> continuous interaction, never isolation

## ASCII MASTER FLOW – PANEL 6/12: Two-way exchange

UNIVERSALISATION -> local deity or festival rises into pan-Indian recognition

CARRIERS -> pilgrimage networks, textual incorporation, patronage

PAROCHIALISATION -> pan-Indian ritual adapted to local resources and language

RESULT -> layered, regionally variable practice rather than uniform culture

CLOSE DISTINCTION: Modernisation is not westernisation, secularisation is not necessarily declining belief, Sanskritisation is not structural equality, mobility is not transformation of the hierarchy, and legal reform is not identical to normative or behavioural change.

## ASCII MASTER FLOW – PANEL 7/12: Three levels of the religious question

SECULARISATION -> institutional differentiation of religious authority

SECULARISM -> legal and political doctrine of state neutrality

DESACRALISATION -> experiential decline of the sacred in particular practices

ERROR -> collapsing any two of the three into one term

## ASCHII MASTER FLOW – PANEL 8/12: Continuity mechanisms

FAMILY AND KIN -> socialisation against migration and education pressure

RITUAL AND FESTIVAL -> shared practice against media and market pressure

LANGUAGE AND REGION -> regional culture against standardisation pressure

ADAPTATION -> universalisation and parochialisation absorb the pressure

## ASCII MASTER FLOW – PANEL 9/12: Custom and reason test

STEP ONE -> identify the practice and its lived meaning

STEP TWO -> ask whether an application blocks inquiry, agency or evidence

STEP THREE -> name reform, education and internal dissent as mechanisms

LIMIT -> never move from a practice to a verdict about a community

## ASCII MASTER FLOW – PANEL 10/12: Technology on the society layer

SOCIETY LAYER -> access, trust, work, identity and unequal risk

CROSS-LINKED -> instrument mechanics owned by Economy and Science and Technology

PROHIBITION -> no price, legal status or adoption figure is asserted

OUTPUT -> a social effect argued from access and use, not from a label

## ASCII MASTER FLOW – PANEL 11/12: Evidence-status card

NAMED SCHOLARS -> M. N. Srinivas, Robert Redfield, McKim Marriott

DATED ANCHOR -> none is required for this durable-theory topic

RECENT DEMANDS -> one routed 2025 demand, three routed 2018 to 2021 demands

PROHIBITION -> no village study, survey figure or date is invented

## ASCII MASTER FLOW – PANEL 12/12: Social-change answer spine

OPEN -> name the lens and the axis the question is testing

BODY -> apply the India-specific vocabulary with one worked example

TEST -> continuity mechanisms against their parallel change pressures

CLOSE -> graded verdict with the cross-owner boundary stated

EVIDENCE LIMIT: Use M.N. Srinivas and Yogendra Singh as bounded analytical frameworks, alongside education, media, urban and movement examples; avoid linear tradition-to-modernity teleology and identify feedback, resistance, regional paths and unintended effects.
