

## ASCII MASTER FLOW – PANEL 1/12: Central question and the co-presence answer

CENTRAL QUESTION -> has globalisation ended or is it being contested?

ANSWER -> waning, not ended; integration and control operate together

GLOBALISATION -> trade, capital, technology and information integration

SOVEREIGN NATIONALISM -> national control over trade, technology, borders

and strategic industries: protectionism, export controls, buy-national policy

RELATION -> co-present forces of differing strength across sectors and states

PYQ WORDING -> the 2025 demand itself says waning, never ended

BOUNDARY -> tariff and balance-of-payments mechanics to Economy;

de-risking detail to topic 03; the organisation's full structure to topic 12

MUST REMEMBER: Globalisation and trade agreements transmit tariffs, services rules,...

## ASCII MASTER FLOW – PANEL 2/12: Three transmission channels into Indian interests

TRADE CHANNEL -> protectionism | stalled multilateral liberalisation  
| migration of liberalisation into bilateral and plurilateral agreements  
TECHNOLOGY CHANNEL -> export controls | investment screening | de-risking  
CLIMATE CHANNEL -> carbon-border measures | green-subsidy competition  
COMBINED INSTRUMENT -> one measure can be trade, industrial policy and climate  
INDIA AS BENEFICIARY -> diversification interest, owned in detail by topic 03  
INDIA AS TARGET -> others' tariffs and carbon-border measures  
RULE -> name the channel before describing the effect

## ASCII MASTER FLOW – PANEL 3/12: How the trade organisation is actually built

MEMBER-DRIVEN -> run by member governments; no delegated board or head

MINISTERIAL CONFERENCE -> topmost body; meets at least once every two years

GENERAL COUNCIL -> the same body in three guises

General Council | Dispute Settlement Body | Trade Policy Review Body

SECTOR COUNCILS -> Goods | Services | Trade-Related Intellectual Property

DECISION RULE -> normally by consensus among the whole membership

ENFORCEMENT -> by members themselves; sanctions authorised by the membership

FOUNDED 1995 -> India a founding member

VERDICT -> weakened in negotiation, not irrelevant in rules and disputes

## ASCII MASTER FLOW – PANEL 4/12: Ministerial cycle and the consensus chokepoint

26 FEBRUARY - 2 MARCH 2024 -> MC13, Abu Dhabi; Abu Dhabi Ministerial

Declaration; decisions on dispute-settlement reform, special and differential treatment, LDC graduation and electronic commerce

26 MARCH 2026 -> MC14 opens at Yaounde; foundational-issues breakout

27 MARCH 2026 -> minister-facilitated reform breakouts and reform plenary

THIRD DAY -> dispute-settlement reform update; ministerial sessions on

fisheries subsidies, Investment Facilitation for Development incorporation,

E-commerce Work Programme and moratorium, agriculture, development and LDCs

30 MARCH 2026 -> Heads of Delegation meeting and closing session

CHOKEPOINT -> 165 of 166 supported incorporation; consensus absent; it failed

LESSON -> the veto point is procedural, never majoritarian

## ASCTI MASTER FLOW – PANEL 5/12: The appellate void and India's own notified appeals

10 DECEMBER 2019 -> Appellate Body loses its quorum for new appeals

30 NOVEMBER 2020 -> zero members; appeals can be filed into the void

MPIA -> interim appeal arbitration under DSU Article 25; India not a participant

CURRENT NOTIFIED APPEALS INVOLVING INDIA, AS LISTED BY THE ORGANISATION:

24 December 2021 -> DS579 sugar and sugarcane (Brazil)

24 December 2021 -> DS580 sugar and sugarcane (Australia)

24 December 2021 -> DS581 sugar and sugarcane (Guatemala)

17 May 2023 -> DS584 tariff treatment on certain goods (Japan)

8 December 2023 -> DS582 tariff treatment, ICT sector

COST -> two-sided: no binding appellate review for India either

## ASCII MASTER FLOW – PANEL 6/12: One agreement, three legal steps, three dates

STEP 1 ADOPTION -> Agreement on Fisheries Subsidies adopted at MC12,

17 June 2022; prohibits harmful fisheries subsidies

first agreement of the organisation to focus on the environment;

first broad binding multilateral agreement on ocean sustainability;

only the second multilateral agreement reached since its inception

STEP 2 ENTRY INTO FORCE -> on two-thirds acceptance; threshold reached at a

ceremony on 15 September 2025

STEP 3 INDIVIDUAL ACCEPTANCE -> India deposits its instrument, 20 July 2026

MANDATE -> MC11 Buenos Aires Ministerial Decision and SDG 14.6

CONTINUING -> additional provisions under the Negotiating Group on Rules

CLOSE DISTINCTION: Negotiation launch, concluded text, signature, ratification, entry...

## ASCII MASTER FLOW – PANEL 7/12: Agriculture and the reform demand India actually makes

PROBLEM -> public-stockholding procurement collides with domestic-support rules

RESPONSE: the 2013 Bali peace clause shields eligible programmes from  
specified legal challenge while a permanent solution is negotiated

LIMIT -> the shield carries notification and programme conditions

LIMIT -> interim protection is not the permanent settlement India seeks

INDIA'S DEMAND -> preserve public stockholding and special and differential  
treatment while improving subsidy and market-access rules

BALANCE -> producer support, consumer food security and export effects together

DIAGNOSIS -> reform here is distributive, not merely procedural

## ASCII MASTER FLOW – PANEL 8/12: The legal-stage ladder for India's agreements

IN FORCE -> India-UAE CEPA, 1 May 2022

IN FORCE -> India-Australia ECTA, 29 December 2022

IN FORCE -> India-EFTA TEPA, signed 10 March 2024, in force 1 October 2025

IN FORCE -> India-UK CETA, signed London 24 July 2025, in force 15 July 2026

Double Contributions Convention in force the same day; up to 60 months of home-country social-security coverage for detached workers

SIGNED -> India-Oman CEPA, 18 December 2025; India-New Zealand, 27 April 2026

CONCLUDED -> India-Chile CEPA, 5 December 2025

CONCLUDED ONLY -> India-EU FTA, 27 January 2026; not signed, not in force

NEITHER -> India-United States: interim framework and continuing negotiation

RULE -> concluded, signed, ratified and in force are four different claims

## ASCII MASTER FLOW – PANEL 9/12: Four verbs in one communique

16th INDIA-EU SUMMIT, 27 JANUARY 2026

CONCLUDED -> free trade agreement negotiations; not signed, not in force

SIGNED -> Security and Defence Partnership

LAUNCHED -> negotiations on a Security of Information Agreement

ADOPTED -> Towards 2030: India-EU Joint Comprehensive Strategic Agenda

OBLIGATION LEVEL -> four verbs, four different obligations, one document

SEPARATE BOUNDARY -> India announced on 4 November 2019 that it would not  
join the Regional Comprehensive Economic Partnership

RULE -> reproduce the verb the source actually used

## ASCII MASTER FLOW – PANEL 10/12: The carbon-border regime in operation

DEFINITIVE REGIME -> applies from 1 January 2026

TRANSITIONAL PHASE -> 2023 to 2025

OBLIGATIONS -> importer authorisation | reporting | purchase and surrender of certificates matching the embedded carbon emissions of imported goods

SECTORS -> cement | iron and steel | aluminium | fertilisers | electricity  
| hydrogen

PRICE -> calculated from EU Emissions Trading System allowance auction prices

CLASSIFICATION -> trade instrument, industrial-policy tool and climate measure

INDIA -> affected through market access, standards and negotiating strategy  
without being a party to the European Union's internal law

## ASCII MASTER FLOW – PANEL 11/12: Tariff volatility as the transmission mechanism

7 AUGUST 2025 -> 25 per cent reciprocal duty on India takes effect  
27 AUGUST 2025 -> additional 25 per cent duty linked to Russian oil  
7 FEBRUARY 2026 -> the additional Russian-oil-linked duty is removed  
FEBRUARY 2026 -> additional duties under the International Emergency  
Economic Powers Act end  
24 JULY 2026 -> a separate 10 per cent duty under Section 301 begins  
STATUS -> another state's domestic measures; exposure, not Indian obligation  
MECHANISM -> a duty lasting under six months still shaped a negotiating cycle  
ANSWER LINE -> volatility, not level, is what transmits

## ASCII MASTER FLOW – PANEL 12/12: Answer spine for a globalisation or trade-effects demand

OPEN -> define both forces and state that they are co-present, not sequential

CHANNEL -> name trade, technology or climate before describing the effect

EVIDENCE -> one dated instrument per channel, each at its exact legal stage

DUAL POSITION -> India as diversification beneficiary and as measure target

RESPONSE -> continued organisation engagement, agreement negotiation and  
domestic strategic-sector policy, which is Economy's operational domain

CONCEDE -> rules-of-origin fragmentation, transition cost, contested  
proportionality of climate measures, two-sided appellate paralysis

OWNERSHIP -> the 2025 elucidate, 2018 reform and 2022 climate-fora demands

CLOSE -> open enough for markets and technology, resilient enough to absorb  
volatility, and active enough to shape the rules that transmit it

EVIDENCE LIMIT: STATUS / LEVELS / IMPLEMENTATION: Identify parties, legal coverage, rules...
