NCRWC and Working of the Constitution - Complete Uncompressed Learning Session

Complete Core-first learning session + verified practice + optional Advanced + register notes

Legal/current control date: 5 September 2026 (Asia/Kolkata)

Evidence discipline: NCRWC recommendations, constitutional text, later law, judgments and analytical inference are separately labelled. Chronology or similarity is never treated as proof that a later reform implemented the Commission.

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Polity Basic/Core is answer-complete before optional Advanced depth.
Text hierarchy	Constitution/Act/rule/notification -> binding judgment -> authoritative institution -> Constituent Assembly material -> standard textbook.
Legal precision	State exact Article, Part, Schedule, amendment, case, date, institution, procedure, exception and current operative status.
Doctrine method	Text -> institutional mechanism -> controlling case -> exception/limit -> present legal status.
Chronology	Enactment, commencement, amendment, judgment and implementation dates remain separate.
Boundary method	Topic ownership and cross-owner bridges are explicit; adjacent PYQs never become fabricated direct routes.
Practice contract	Every solved item has demand decoding, examiner-grade model, timed compression plan, marks rationale and answer-specific improvement.
Approval	This immutable successor remains approved: false pending explicit approval.

Official syllabus mapping: upsc-ai-kit\knowledge\Polity\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- **Four independent ledgers:** literal syllabus/index, indispensable

prerequisites, standard textbook taxonomy and complete routed 2018-2026 PYQ demands were built before repair.

- **Hostile search:** missing Articles, Parts, Schedules, amendments, cases,

institutional mechanisms, exceptions, chronology, source status and cross-owner boundaries are hard failures.

- **Answer rule:** claim -> exact constitutional/statutory/case evidence ->

institutional analysis -> exception or qualification.

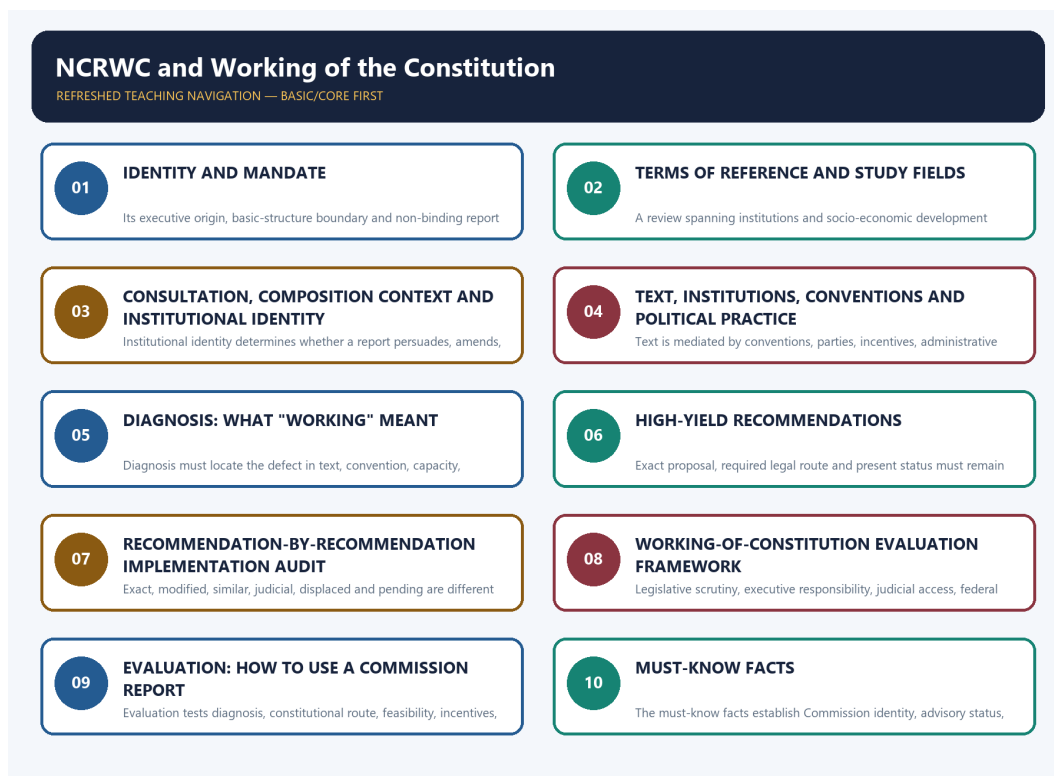

- **Current-status note, rechecked 2026-09-05:** Rechecked 2026-09-05: the official 2002 NCRWC report remains advisory. Every claim of adoption must be proved through a separate amendment, statute, rule, judgment or executive instrument.

BASIC LEARNING SESSION

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - IDENTITY AND MANDATE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The NCRWC was a temporary advisory commission created to review constitutional performance.

Technical definition: Its executive origin, basic-structure boundary and non-binding report distinguish review from constituent power.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The NCRWC was a temporary advisory commission created to review constitutional performance. Its executive origin, basic-structure boundary and non-binding report distinguish review from constituent power.

MUST-WRITE KEYWORDS

- constitutional review
- advisory commission
- Government resolution
- Venkatachaliah
- basic structure
- parliamentary democracy

How to use them: Frame the answer through constitutional review; define advisory commission, connect Government resolution with Venkatachaliah to explain the mechanism, and use basic structure for the decisive comparison or qualification.

Attribute	Position
Creation	Set up by a Government of India resolution dated 22 February 2000
Legal status	Executive, temporary and advisory; neither constitutional nor statutory
Chair	M.N. Venkatachaliah, former Chief Justice of India
Composition	11-member commission
Report	Adopted and signed on 11 March 2002 ; presented to the Prime Minister on 31 March 2002
Task	Review how the Constitution had worked over fifty years and recommend changes for effective governance and socio-economic development
Express limit	Work within parliamentary democracy and without disturbing the basic structure/basic features

Master distinction: The NCRWC reviewed the **working** of the Constitution; it was not a constituent assembly and did not claim power to rewrite the Constitution.

1.1 Initial composition

FACT: The eleven-member Commission comprised Chairperson **Justice M.N. Venkatachaliah** and **Justice B.P. Jeevan Reddy, Justice R.S. Sarkaria, Justice Kottapalli Punneya, P.A. Sangma, Soli J. Sorabjee, K. Parasaran, Dr Subhash C. Kashyap, C.R. Irani, Dr Abid Hussain and Sumitra G. Kulkarni**. The signed report records that **P.A. Sangma had resigned**. Dr Raghbir Singh served the Commission as secretary; he was not a twelfth Commission member.

Composition trap: "Eleven members" includes the Chairperson. Do not add the secretary or advisory-panel participants to the Commission's membership.

CLOSING RECALL FLOW - IDENTITY AND MANDATE

START / CONCEPT: IDENTITY AND MANDATE

|
v

EXACT TERMS: constitutional review · advisory commission · Government resolution · Venkatachaliah · basic structure · parliamentary democracy

|
v

MECHANISM / ARGUMENT: Identify the institutional defect, match it to the competent reform route, and verify the later legal effect independently.

|
v

CONSEQUENCE / CONTRAST: The answer can distinguish constitutional diagnosis from recommendation, implementation and current law.

|
v

UPSC TRAP / ANSWER-USE: Do not infer binding force or implementation merely from expertise, chronology or thematic similarity.

|
v

ANSWER-GRABBING FORMULATION: The NCRWC was a temporary advisory commission created to review constitutional performance. Its executive origin, basic-structure boundary and non-binding report distinguish review from constituent power.

SESSION 2 - TERMS OF REFERENCE AND STUDY FIELDS

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The terms of reference defined both a broad performance audit and a firm constitutional boundary.

Technical definition: A review spanning institutions and socio-economic development remained subject to parliamentary democracy and basic structure.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The terms of reference defined both a broad performance audit and a firm constitutional boundary. A review spanning institutions and socio-economic development remained subject to parliamentary democracy and basic structure.

MUST-WRITE KEYWORDS

- **terms of reference**
- **performance audit**
- **governance**
- **socio-economic development**
- **parliamentary democracy**
- **basic structure**

How to use them: Frame the answer through terms of reference; define performance audit, connect governance with socio-economic development to explain the mechanism, and use parliamentary democracy for the decisive comparison or qualification.

The Commission examined whether existing constitutional provisions could respond to modern needs of efficient, smooth and effective government and socio-economic development. It organised the review around eleven broad fields:

1. parliamentary institutions and political stability;
2. electoral reform and standards in public life;
3. socio-economic change;
4. literacy, employment, social security and poverty;
5. Union-State relations;
6. decentralisation and local government;
7. enlargement of Fundamental Rights;
8. effectuation of Fundamental Duties;
9. DPSPs and Preambular objectives;
10. fiscal/monetary control and public audit; and
11. administration and standards in public life.

FACT: The Commission made **249 recommendations**: the eighth-edition source classifies **58** as requiring constitutional amendment, **86** as requiring legislation and **105** as capable of executive action.

ANALYSIS: This classification describes the Commission's proposed implementation route. It does not prove that any proposal was accepted.

CLOSING RECALL FLOW - TERMS OF REFERENCE AND STUDY FIELDS

START / CONCEPT: TERMS OF REFERENCE AND STUDY FIELDS

|

v

EXACT TERMS: terms of reference · performance audit · governance · socio-economic development · parliamentary democracy · basic structure

|

v

MECHANISM / ARGUMENT: Identify the institutional defect, match it to the competent reform route, and verify the later legal effect independently.

|

v

CONSEQUENCE / CONTRAST: The answer can distinguish constitutional diagnosis from recommendation, implementation and current law.

|

v

UPSC TRAP / ANSWER-USE: Do not infer binding force or implementation merely from expertise, chronology or thematic similarity.

|

v

ANSWER-GRABBING FORMULATION: The terms of reference defined both a broad performance audit and a firm constitutional boundary. A review spanning institutions and socio-economic development remained subject to parliamentary democracy and basic structure.

SESSION 3 - CONSULTATION, COMPOSITION CONTEXT AND INSTITUTIONAL IDENTITY

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Expert membership and consultation strengthened evidence without creating legal force.

Technical definition: Institutional identity determines whether a report persuades, amends, adjudicates or merely recommends.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Expert membership and consultation strengthened evidence without creating legal force. Institutional identity determines whether a report persuades, amends, adjudicates or merely recommends.

MUST-WRITE KEYWORDS

- eleven members
- consultation papers
- advisory report
- institutional identity
- legal force
- public responses

How to use them: Frame the answer through eleven members; define consultation papers, connect advisory report with institutional identity to explain the mechanism, and use legal force for the decisive comparison or qualification.

The Commission worked through consultation papers, expert studies, public responses and thematic deliberation before submitting its report. That method matters because a constitutional review commission has persuasive legitimacy only when it states the problem, receives competing views, explains the legal route and leaves the final choice to constitutionally authorised institutions.

Body/process	Constitutive source	Principal task	Why it is not the NCRWC
Constituent Assembly	Constituent process, 1946-49	Framed and adopted the Constitution	Exercised founding constituent authority
Parliament under Art 368	Constitution	Formally amends the Constitution	Legislative constituent power subject to procedure/basic structure
Law Commission	Executive resolution	Law-reform research and reports	Usually examines statutes/legal doctrine, not the whole constitutional system
Sarkaria/Punchhi Commissions	Executive commissions	Centre-State relations	Sectoral federal reviews
Administrative Reforms Commissions	Executive commissions	Public-administration reform	Administrative rather than comprehensive constitutional review
NCRWC	Government resolution, 2000	Reviewed fifty years of constitutional working	Temporary, advisory and expressly basic-structure bounded

Composition caution: Membership gave the Commission legal, parliamentary, administrative and public-policy experience, but expertise did not convert its report into law or constituent power.

CLOSING RECALL FLOW - CONSULTATION, COMPOSITION CONTEXT AND INSTITUTIONAL IDENTITY

START / CONCEPT: CONSULTATION, COMPOSITION CONTEXT AND INSTITUTIONAL IDENTITY

|

v

EXACT TERMS: eleven members • consultation papers • advisory report • institutional identity • legal force • public responses

|

v

MECHANISM / ARGUMENT: Identify the institutional defect, match it to the competent reform route, and verify the later legal effect independently.

|

v

CONSEQUENCE / CONTRAST: The answer can distinguish constitutional diagnosis from recommendation, implementation and current law.

|

v

UPSC TRAP / ANSWER-USE: Do not infer binding force or implementation merely from expertise, chronology or thematic similarity.

|

v

ANSWER-GRABBING FORMULATION: Expert membership and consultation strengthened evidence without creating legal force. Institutional identity determines whether a report persuades, amends, adjudicates or merely recommends.

SESSION 4 - TEXT, INSTITUTIONS, CONVENTIONS AND POLITICAL PRACTICE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Constitutional working extends beyond written rules to institutional behaviour and outcomes.

Technical definition: Text is mediated by conventions, parties, incentives, administrative capacity and corrective institutions.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Constitutional working extends beyond written rules to institutional behaviour and outcomes. Text is mediated by conventions, parties, incentives, administrative capacity and corrective institutions.

MUST-WRITE KEYWORDS

- constitutional text

- institutions
- conventions
- political incentives
- administrative capacity
- outcomes

How to use them: Frame the answer through constitutional text; define institutions, connect conventions with political incentives to explain the mechanism, and use administrative capacity for the decisive comparison or qualification.

The **working of the Constitution** is wider than compliance with its written Articles.

CONSTITUTIONAL TEXT

↓ implemented through

institutions + statutes + rules + conventions + political parties + administration

↓ tested by

rights outcomes + accountability + federal trust + legislative deliberation + remedies

Dimension	Constitutional question	Failure mode	Reform route
Text	Is power or right clearly allocated?	ambiguity, obsolete design or remedial gap	amendment within basic structure
Institution	Does the authorised body have independence/capacity?	vacancy, capture, delay, weak expertise	statute, finance, appointments, procedure
Convention	Do actors respect unwritten role restraints?	technically lawful but constitutionally corrosive conduct	political accountability, reason-giving, codification where needed
Political practice	Do parties and majorities preserve opposition and deliberation?	centralisation, criminalisation, opaque finance, weak committees	electoral/party and parliamentary reform
Federal practice	Are consultation and autonomy real?	unilateralism, delayed assent, fiscal mistrust	councils, negotiated federalism, judicial review
Rights enforcement	Can a right-holder obtain an effective remedy?	cost, delay, weak investigation, unequal access	courts, legal aid, administration and compliance

□□ *Kesavananda Bharati* (1973) supplies the basic-structure boundary; *Minerva Mills* (1980) emphasises limited amending power and Part III-Part IV harmony; *S.R. Bommai* (1994) demonstrates that federalism and secularism are enforceable structural commitments. These later cases are governing law, not NCRWC recommendations.

Examiner line: Constitutional working is the conversion of text into restrained power, accountable institutions, effective rights and cooperative political practice.

CLOSING RECALL FLOW - TEXT, INSTITUTIONS, CONVENTIONS AND POLITICAL PRACTICE

START / CONCEPT: TEXT, INSTITUTIONS, CONVENTIONS AND POLITICAL PRACTICE

|

v

EXACT TERMS: constitutional text · institutions · conventions · political incentives · administrative capacity · outcomes

|

v

MECHANISM / ARGUMENT: Identify the institutional defect, match it to the competent reform route, and verify the later legal effect independently.

|

v

CONSEQUENCE / CONTRAST: The answer can distinguish constitutional diagnosis from recommendation, implementation and current law.

|

v

UPSC TRAP / ANSWER-USE: Do not infer binding force or implementation merely from expertise, chronology or thematic similarity.

|

v

ANSWER-GRABBING FORMULATION: Constitutional working extends beyond written rules to institutional behaviour and outcomes. Text is mediated by conventions, parties, incentives, administrative capacity and corrective institutions.

SESSION 5 - DIAGNOSIS: WHAT "WORKING" MEANT

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: A working review asks why formally valid institutions underperform in practice.

Technical definition: Diagnosis must locate the defect in text, convention, capacity, incentive or remedy before selecting reform.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

A working review asks why formally valid institutions underperform in practice. Diagnosis must locate the defect in text, convention, capacity, incentive or remedy before selecting reform.

MUST-WRITE KEYWORDS

- institutional diagnosis
- text gap
- convention failure
- capacity deficit
- incentive failure
- remedy gap

How to use them: Frame the answer through institutional diagnosis; define text gap, connect convention failure with capacity deficit to explain the mechanism, and use incentive failure for the decisive comparison or qualification.

The NCRWC's report treated constitutional failure mainly as a problem of **institutional practice**, not absence of a constitutional text. Its principal concern clusters were:

Concern cluster	NCRWC diagnosis (historical, 2002)	Analytical use
Democratic trust	Government and public services had become detached from popular sovereignty and dignity	Constitution can fail through behaviour without textual collapse
Political integrity	Criminalisation, corruption, defections and opaque party finance	Electoral/party reform is constitutional maintenance
Institutional performance	Legislature, executive, administration and justice suffered delay, cost and weak accountability	Efficiency and constitutionalism must be reconciled
Social transformation	Rights, education, employment and welfare commitments were under-realised	Formal guarantees require institutions and resources
Federal/local design	Consultation and devolution were inadequate	Constitutional division needs cooperative practice
Justice delivery	Delay, weak investigation/prosecution and limited access undermined rule of law	Remedies are part of constitutional effectiveness

Status caution: These were the Commission's assessments at the time of its report. Do not present its historical data or rhetoric as a verified 2026 condition.

CLOSING RECALL FLOW - DIAGNOSIS: WHAT "WORKING" MEANT

START / CONCEPT: DIAGNOSIS: WHAT "WORKING" MEANT

|

v

EXACT TERMS: institutional diagnosis · text gap · convention failure · capacity deficit · incentive failure · remedy gap

|

v

MECHANISM / ARGUMENT: Identify the institutional defect, match it to the competent reform route, and verify the later legal effect independently.

|

v

CONSEQUENCE / CONTRAST: The answer can distinguish constitutional diagnosis from recommendation, implementation and current law.

|

v

UPSC TRAP / ANSWER-USE: Do not infer binding force or implementation merely from expertise, chronology or thematic similarity.

|

v

ANSWER-GRABBING FORMULATION: A working review asks why formally valid institutions underperform in practice. Diagnosis must locate the defect in text, convention, capacity, incentive or remedy before selecting reform.

SESSION 6 - HIGH-YIELD RECOMMENDATIONS

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The NCRWC organised reform across rights, elections, legislatures, courts, federalism and administration.

Technical definition: Exact proposal, required legal route and present status must remain distinct in every cluster.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The NCRWC organised reform across rights, elections, legislatures, courts, federalism and administration. Exact proposal, required legal route and present status must remain distinct in every cluster.

MUST-WRITE KEYWORDS

- rights
- elections
- Parliament
- judiciary
- federalism
- decentralisation
- recommendation clusters

How to use them: Frame the answer through rights; define elections, connect Parliament with judiciary to explain the mechanism, and use federalism for the decisive comparison or qualification.

6.1 Fundamental Rights, property, DPSPs and Duties

Area	□ Recommendation	Current-law caution
Rights	Add express rights against torture, to compensation for unlawful deprivation of life/liberty, privacy/family life, access to courts/speedy justice, equal justice/legal aid and environmental necessities	Some subjects later developed through judgments/statutes; that does not make the NCRWC wording constitutional text
Speech/equality	Expand express discrimination and speech/media formulations	Not enacted merely because similar values appear in case law
Education	Enlarge the proposed education guarantee for specified groups	Check current FACT: Art 21A, not the NCRWC draft
Emergency	Protect additional rights from suspension beyond Arts 20 and 21	Current law remains governed by FACT: Arts 358-359
Property	Recast Art 300A to require public purpose, non-arbitrariness and rehabilitation protection for specified SC/ST land	□ Proposal, not the text of Art 300A
DPSPs	Rename Part IV and create implementation-review mechanisms	Non-binding
Duties	Add voting, tax and family-responsibility duties; implement the Verma Committee's operationalisation proposals	Non-binding

6.2 Parliament and the executive

- □ define and delimit legislative privileges;
- □ create standing committees for constitutional amendments/legislative planning;
- □ prescribe minimum annual sitting days: **Lok Sabha 120, Rajya Sabha 100, larger State Houses 90 and State Houses with fewer than 70 members 50**;
- □ use a **constructive vote of no confidence**, requiring notice by at least **20 per cent** of the House and a simultaneously proposed alternative leader;
- □ cap the Council of Ministers at **10 per cent** of the popular House;
- □ establish Lokpal/Lokayuktas within the proposed design;
- □ create statutory civil-service boards, promote lateral entry at senior levels and replace secrecy culture with transparency;
- □ enact public-interest-disclosure and anti-benami-corruption measures.

Trap: The later 91st Amendment used a **15 per cent** ceiling for Union/State ministries (with a minimum for States), not the NCRWC's 10 per cent recommendation. Similar subject does not mean identical adoption.

6.3 Federal and inter-State relations

- □ specify subjects requiring Inter-State Council consultation;
- □ place disaster/emergency management in the Concurrent List;
- □ establish an Inter-State Trade and Commerce Commission;
- □ consult the Chief Minister before appointing a Governor;
- □ retain Article 356 but use it only as a last resort and test majority on the floor;
- □ avoid dissolving a State Assembly before parliamentary approval of the proclamation;
- □ reform river-water adjudication; and
- □ prescribe a time-limit for Presidential action on a reserved State Bill.

The report proposed about **six months** for the Governor to decide whether to assent or reserve a State Bill and about **three months** for the President to assent, direct return or seek the Supreme Court's Article 143 opinion. These

suggested periods never became the text of Articles 200-201.

ANALYSIS: Some recommendations overlap with judicial doctrines or later debates. Cite the governing Article/judgment for current law and NCRWC only for the reform case.

6.4 Judiciary and justice delivery

- ☐ create a constitutional National Judicial Commission for Supreme Court appointments and a mechanism for judicial complaints;
- ☐ raise High Court judges' retirement age to **65** and Supreme Court judges' age to **68**;
- ☐ confine constitutional invalidation and contempt powers as proposed;
- ☐ establish judicial councils for planning/budgets;
- ☐ deliver higher-court judgments ordinarily within a specified time and clear arrears; and
- ☐ simplify the subordinate-court hierarchy and use plea bargaining/ADR.

Trap: NCRWC's National Judicial Commission is not the later NJAC constitutional scheme and is not the current collegium. Keep commission proposal, later amendment and case law separate.

The proposed Supreme Court appointments commission comprised the **Chief Justice of India as Chairperson, the two senior-most Supreme Court judges, the Union Law Minister and one eminent person nominated by the President after consulting the CJI**. The NCRWC treated its composition and establishment as integral to judicial independence.

6.5 Local government and weaker sections

- ☐ give Panchayats/Municipalities clearer exclusive functions and fiscal domains;
- ☐ strengthen audit, dissolution safeguards and election-law uniformity;
- ☐ separate delimitation/reservation/rotation from State Election Commissions;
- ☐ improve SC/ST/BC representation, education and reservation administration;
- ☐ strengthen atrocity-law enforcement and institutions for bonded-labour rehabilitation; and
- ☐ adapt local-government reforms to North-East constitutional traditions.

6.6 Elections, parties and anti-defection

Field	☐ Recommendation
Criminalisation	Disqualify specified serious accused/convicted persons and create speedy special courts/benches
Election disputes	Dedicated election benches/special courts
Multiple seats	Prevent one candidate contesting the same office from more than one constituency
Model Code	Give the Model Code statutory force
ECI appointment	Multi-office selection body including government, opposition and presiding officers
Political parties	Comprehensive law on internal functioning, accounts, candidate integrity and funding disclosure
Anti-defection	Defectors resign and recontest; bar remunerative office; vest decision in ECI rather than Speaker/Chairman

ANALYSIS: The current law may differ on every row. Use `Election-Commission.md`, `Political-Parties.md` and `Anti-Defection-Law.md` for the operative position.

Exact ECI recommendation: Prime Minister, Leaders of Opposition in both Houses, Lok Sabha Speaker and Rajya Sabha Deputy Chairman. This is an NCRWC proposal, not the current appointment law.

CLOSING RECALL FLOW - HIGH-YIELD RECOMMENDATIONS

START / CONCEPT: HIGH-YIELD RECOMMENDATIONS

|

v

EXACT TERMS: rights · elections · Parliament · judiciary · federalism · decentralisation · recommendation clusters

|

v

MECHANISM / ARGUMENT: Identify the institutional defect, match it to the competent reform route, and verify the later legal effect independently.

|

v

CONSEQUENCE / CONTRAST: The answer can distinguish constitutional diagnosis from recommendation, implementation and current law.

|

v

UPSC TRAP / ANSWER-USE: Do not infer binding force or implementation merely from expertise, chronology or thematic similarity.

|

v

ANSWER-GRABBING FORMULATION: The NCRWC organised reform across rights, elections, legislatures, courts, federalism and administration. Exact proposal, required legal route and present status must remain distinct in every cluster.

SESSION 7 - RECOMMENDATION-BY-RECOMMENDATION IMPLEMENTATION AUDIT

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Implementation is proved by legal route, wording and effect rather than chronology alone.

Technical definition: Exact, modified, similar, judicial, displaced and pending are different status conclusions.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Implementation is proved by legal route, wording and effect rather than chronology alone. Exact, modified, similar, judicial, displaced and pending are different status conclusions.

MUST-WRITE KEYWORDS

- implementation audit
- legal instrument
- wording comparison
- legal effect
- attribution
- current status

How to use them: Frame the answer through implementation audit; define legal instrument, connect wording comparison with legal effect to explain the mechanism, and use attribution for the decisive comparison or qualification.

Implementation must be tested against the exact proposal, later instrument and legal result.

NCRWC proposal area	Later development	Audit verdict
Council of Ministers ceiling at 10%	91st Amendment (2003) adopted a 15% ceiling, with a State minimum	Related reform, not exact adoption
Stronger transparency/open government	Right to Information Act 2005	Broadly convergent subject; do not claim causal implementation without official evidence
Education guarantee	86th Amendment inserted Art 21A in 2002	Overlapping constitutional reform chronology; wording/scope must be compared separately
Lokpal/Lokayukta framework	Lokpal and Lokayuktas Act 2013	Later statute with its own design; NCRWC recommendation was not self-executing
Judicial appointments commission	99th Amendment/NJAC enacted in 2014 and invalidated in 2015	Proposal did not become the current appointments system
Plea bargaining/ADR expansion	Criminal-procedure and legal-services reforms developed later	Functional follow-through varies by instrument; not proof of wholesale acceptance
Political-party law/internal democracy	No comprehensive party law implementing the proposed code	Substantially pending as a reform field
Anti-defection decision by ECI and narrow whip	Tenth Schedule continues to place decision with presiding officer, subject to review	Core proposal not implemented
Governor appointment through a plural committee	Arts 155-156 framework remains	Proposal not enacted
Moving disaster management to Concurrent List	Disaster Management Act 2005 created a statutory framework without that List transfer	Statutory response, not the recommended constitutional relocation

Audit rule: Similarity, sequence and common policy language do not establish implementation. Write "implemented", "partly reflected", "modified", "rejected", "overtaken" or "pending" only after comparing the exact recommendation with the later legal instrument.

CLOSING RECALL FLOW - RECOMMENDATION-BY-RECOMMENDATION IMPLEMENTATION AUDIT

START / CONCEPT: RECOMMENDATION-BY-RECOMMENDATION IMPLEMENTATION AUDIT

|

v

EXACT TERMS: implementation audit · legal instrument · wording comparison · legal effect · attribution · current status

|

v

MECHANISM / ARGUMENT: Identify the institutional defect, match it to the competent reform route, and verify the later legal effect independently.

|

v

CONSEQUENCE / CONTRAST: The answer can distinguish constitutional diagnosis from recommendation, implementation and current law.

|

v

UPSC TRAP / ANSWER-USE: Do not infer binding force or implementation merely from expertise, chronology or thematic similarity.

|

v

ANSWER-GRABBING FORMULATION: Implementation is proved by legal route, wording and effect rather than chronology alone. Exact, modified, similar, judicial, displaced and pending are different status conclusions.

SESSION 8 - WORKING-OF-CONSTITUTION EVALUATION FRAMEWORK

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: A performance dashboard converts broad constitutional values into testable institutional questions.

Technical definition: Legislative scrutiny, executive responsibility, judicial access, federal trust and effective rights require separate indicators.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

A performance dashboard converts broad constitutional values into testable institutional questions. Legislative scrutiny, executive responsibility, judicial access, federal trust and effective rights require separate indicators.

MUST-WRITE KEYWORDS

- performance dashboard
- legislative scrutiny
- executive accountability
- judicial access
- federal trust
- rights enforcement

How to use them: Frame the answer through performance dashboard; define legislative scrutiny, connect executive accountability with judicial access to explain the mechanism, and use federal trust for the decisive comparison or qualification.

Constitutional morality

Constitutional morality means fidelity to constitutional forms, equal citizenship, institutional roles, reasoned procedure and limits on power. It is not personal morality. *Navtej Singh Johar v. Union of India (2018)* used constitutional morality and transformative constitutionalism in a rights setting; the doctrine remains bounded by text, structure and precedent.

Accountability and legislative functioning

- political accountability: elections, confidence, opposition and public reason;
- legal accountability: judicial review, rights and statutory remedies;
- financial accountability: legislative control, CAG and audit;
- administrative accountability: records, reasons, transparency and grievance redress;
- parliamentary quality: sitting time, committees, scrutiny of Bills and delegated legislation.

Coalition, majority and centralisation

Coalitions may enlarge bargaining and federal voice but also fragment responsibility. Stable single-party majorities may improve decisiveness but can centralise agenda control. The constitutional test is not the party configuration; it is whether deliberation, opposition, federal consultation, rights and institutional autonomy survive.

Reform-method ladder

diagnose exact failure
↓
practice/convention repair
↓ if insufficient
executive rule or institutional capacity
↓ if legal authority needed
ordinary legislation
↓ if constitutional text must change
Article 368 amendment
↓ always
basic structure + rights + federalism + implementation review

CLOSING RECALL FLOW - WORKING-OF-CONSTITUTION EVALUATION FRAMEWORK

START / CONCEPT: WORKING-OF-CONSTITUTION EVALUATION FRAMEWORK
↓
EXACT TERMS: performance dashboard · legislative scrutiny · executive accountability · judicial access · federal trust · rights enforcement
↓
MECHANISM / ARGUMENT: Identify the institutional defect, match it to the competent reform route, and verify the later legal effect independently.
↓
CONSEQUENCE / CONTRAST: The answer can distinguish constitutional diagnosis from recommendation, implementation and current law.
↓
UPSC TRAP / ANSWER-USE: Do not infer binding force or implementation merely from expertise, chronology or thematic similarity.
↓
ANSWER-GRABBING FORMULATION: A performance dashboard converts broad constitutional values into testable institutional questions. Legislative scrutiny, executive responsibility, judicial access, federal trust and effective rights require separate indicators.

SESSION 9 - EVALUATION: HOW TO USE A COMMISSION REPORT

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: A commission report is evidence and a reform menu, not operative law.

Technical definition: Evaluation tests diagnosis, constitutional route, feasibility, incentives, implementation and reviewability.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

A commission report is evidence and a reform menu, not operative law. Evaluation tests diagnosis, constitutional route, feasibility, incentives, implementation and reviewability.

MUST-WRITE KEYWORDS

- commission report
- reform menu
- feasibility
- political incentives
- implementation
- reviewability

How to use them: Frame the answer through commission report; define reform menu, connect feasibility with political incentives to explain the mechanism, and use implementation for the decisive comparison or qualification.

Strengths

- comprehensive, cross-institutional review rather than isolated amendment;

- expressly respected parliamentary democracy and basic structure;
- separated constitutional, legislative and executive routes;
- connected rights with governance capacity, federalism and accountability.

Limitations

- advisory status meant no self-executing force;
- breadth produced proposals of uneven precision and political feasibility;
- some recommendations sought constitutionalising solutions where practice/capacity was the deeper problem;
- later law may resemble, modify or reject a proposal without formally "implementing the NCRWC".

ANALYSIS: The best assessment is **selective constitutional maintenance**, not wholesale implementation. Test each proposal against basic structure, federalism, rights, democratic accountability and the current legal position.

CLOSING RECALL FLOW - EVALUATION: HOW TO USE A COMMISSION REPORT

```

START / CONCEPT: EVALUATION: HOW TO USE A COMMISSION REPORT
|
v
EXACT TERMS: commission report · reform menu · feasibility · political incentives · implementation
· reviewability
|
v
MECHANISM / ARGUMENT: Identify the institutional defect, match it to the competent reform route,
and verify the later legal effect independently.
|
v
CONSEQUENCE / CONTRAST: The answer can distinguish constitutional diagnosis from recommendation,
implementation and current law.
|
v
UPSC TRAP / ANSWER-USE: Do not infer binding force or implementation merely from expertise,
chronology or thematic similarity.
|
v
ANSWER-GRABBING FORMULATION: A commission report is evidence and a reform menu, not operative law.
Evaluation tests diagnosis, constitutional route, feasibility, incentives, implementation and
reviewability.

```

ANSWER ARCHITECTURE (10/15/20-MARK SUPPORT)

10.1 Demand map

Demand	Answer spine
Mandate/status	Resolution -> review-not-rewrite -> basic-structure limit -> advisory report
Major recommendations	Cluster by rights, institutions, federalism, justice and elections; do not list randomly
Relevance today	Institutional diagnosis -> independently verify later law -> selective reform
Commission reports and constitutional change	Expertise/consultation gains -> democratic/non-binding limit -> Parliament/courts control
Working versus text	Formal adequacy -> behavioural/capacity failures -> targeted reforms

10.2 Thesis options

- *The NCRWC's central insight was that India's constitutional deficit lay less in the text than in the working of parties, legislatures, administration and justice.*
- *Its recommendations are a reform menu, not a parallel Constitution: each must pass through the

proper amendment, legislative or executive route and remain subject to basic structure.*

- *The Commission is most useful when cited diagnostically-linking a reform to a named institutional failure-not as authority that the reform is already law.*

10.3 Mark-scaled structures

Marks	Structure	Evidence
10	Identity/mandate -> 3 recommendation clusters -> non-binding verdict	3-4 named proposals
15	Terms -> diagnosis -> rights/institutions/federal/election reforms -> status caution	5-6 proposals
20	Mandate -> concern map -> thematic recommendations -> implementation test -> balanced conclusion	7-9 proposals with current-law qualifications

10.4 Evidence units

- **Claim:** the NCRWC was constitutionally self-limited. **Evidence:** ☐ terms required

parliamentary democracy and non-interference with basic structure. **Analysis:** review was reformist, not constituent.

Qualification: the Commission itself had no legal veto over later amendment.

- **Claim:** its anti-defection proposal separated adjudication from partisan presiding officers.

Evidence: ☐ vest decision in the ECI. **Analysis:** targets conflict of interest. **Qualification:** current Tenth Schedule still controls.

- **Claim:** its federal recommendations emphasised consultation. **Evidence:** ☐ CM consultation

for Governors and a stronger Inter-State Council. **Analysis:** addresses legitimacy and trust. **Qualification:** recommendation is not constitutional convention or law by itself.

SESSION 10 - MUST-KNOW FACTS

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Exact chronology, route counts and recommendation figures anchor a reliable NCRWC answer.

Technical definition: The must-know facts establish Commission identity, advisory status, report chronology, recommendation routes and high-yield institutional proposals.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Exact chronology, route counts and recommendation figures anchor a reliable NCRWC answer. The must-know facts establish Commission identity, advisory status, report chronology, recommendation routes and high-yield institutional proposals.

MUST-WRITE KEYWORDS

- must know facts
- NCRWC facts
- Commission chronology
- advisory status
- report presentation
- recommendation routes
- legislative sittings
- constructive no confidence

How to use them: Frame the answer through must know facts; define NCRWC facts, connect Commission chronology with advisory status to explain the mechanism, and use report presentation for the decisive comparison or

qualification.

- FACT: Government resolution, 2000; report, 2002.
- FACT: 11 members; chaired by M.N. Venkatachaliah.
- FACT: Review of **working**, not rewriting.
- FACT: Parliamentary democracy/basic structure were express limits.
- FACT: 249 recommendations: 58 constitutional, 86 legislative, 105 executive in the eighth-edition

classification.

- ☐ Every substantive proposal remains a recommendation unless separately enacted/recognised.
- ANALYSIS: Later similarity is not proof of causal implementation.

CLOSING RECALL FLOW - MUST-KNOW FACTS

START / CONCEPT: MUST-KNOW FACTS

|

v

EXACT TERMS: must know facts · NCRWC facts · Commission chronology · advisory status · report presentation · recommendation routes · legislative sittings · constructive no confidence

|

v

MECHANISM / ARGUMENT: Identify the institutional defect, match it to the competent reform route, and verify the later legal effect independently.

|

v

CONSEQUENCE / CONTRAST: The answer can distinguish constitutional diagnosis from recommendation, implementation and current law.

|

v

UPSC TRAP / ANSWER-USE: Do not infer binding force or implementation merely from expertise, chronology or thematic similarity.

|

v

ANSWER-GRABBING FORMULATION: Exact chronology, route counts and recommendation figures anchor a reliable NCRWC answer. The must-know facts establish Commission identity, advisory status, report chronology, recommendation routes and high-yield institutional proposals.

UPSC TRAPS AND SOURCE DISCIPLINE

- Do not call NCRWC a constitutional or statutory body.
- Do not call the Venkatachaliah Commission a constituent assembly.
- Do not merge NCRWC, Sarkaria, Punchhi, Law Commission or Administrative Reforms Commission.
- Do not present a proposed right, ministry ceiling, appointment panel or MCC status as current law.
- Do not say a later statute adopted NCRWC unless an official source establishes that link.
- Write separately: FACT: current text · ☐ enacted law · ☐ holding · ☐ NCRWC proposal ·

ANALYSIS: evaluation.

Routing

- Parliament/executive: Parliament.md, PM-and-Council-of-Ministers.md
- Federalism/Governor: Centre-State-Relations.md, Governor-and-CM.md
- Elections/parties/defection: Election-Commission.md, Political-Parties.md,

Anti-Defection-Law.md

- Judiciary: Supreme-Court.md, High-Court.md
- Rights/DPSP/Duties: Fundamental-Rights.md, Directive-Principles.md,

Fundamental-Duties.md

POLITY HOSTILE SEMANTIC-REVIEW CORE CONTROL

- **Must remember:** Treat every NCRWC proposition as a 2002 recommendation unless a later constitutional amendment, statute, rule or judgment independently proves law.
- **Close distinction:** Separate constitutional text, institutional capacity, conventions, party practice, federal trust, rights outcomes and effective remedies.
- **Legal/source limit:** The official NCRWC report remains advisory; resemblance, chronology or shared policy language does not prove implementation or causation.

Semantic-completeness ownership and PYQ control

- **Identity:** the NCRWC was constituted by Government of India resolution on 22 February 2000, chaired by former CJI M.N. Venkatachaliah, and remained an executive, temporary and advisory body rather than a constitutional organ.
- **Mandate boundary:** it reviewed fifty years of constitutional working within parliamentary democracy and without disturbing basic structure. It did not exercise original constituent power or Parliament's Article 368 power.
- **Report control:** the eleven-member Commission adopted its report on 11 March 2002 and presented it on 31 March 2002. P.A. Sangma had resigned; the secretary and advisory-panel participants were not additional members.
- **Recommendation status:** the report's constitutional-amendment, legislative and executive routes describe how recommendations might be implemented. No recommendation became law by appearing in the report.
- **Working framework:** constitutional performance must be tested through text, statutes, institutions, conventions, parties, administration, federal consultation, legislative deliberation, rights outcomes and effective remedies.
- **Implementation method:** compare the exact recommendation with the later instrument and classify it as exact, modified, related, rejected, overtaken or pending. Similarity and sequence do not prove adoption or NCRWC causation.
- **High-yield mismatch controls:** the NCRWC proposed a 10% ministry ceiling, while the 91st Amendment uses 15%; its judicial commission was not the later NJAC and is not the collegium; its ECI appointment and anti-defection routes are not current law merely because reform debate continued.
- **Current-law owners:** Articles 200-201, the Tenth Schedule, election law, Parts IX/IXA, judicial appointments, RTI, Lokpal and disaster management must be stated from their current constitutional/statutory sources, not the report.
- **Evaluation:** the report remains valuable as a cross-institutional diagnosis and reform menu, but selective constitutional maintenance requires democratic legitimacy, feasibility, rights, federalism and basic-structure control.
- **Official-source control, checked 5 September 2026:** the Department of Legal Affairs and Inter-State Council portals remain the authoritative report repositories. No official consolidated implementation notification gives the report legal force. Routed constitutional-reform PYQs remain cross-owned.

BASIC MCQS / REMEDIATION

Original MCQs 1-48 - hard, varied and source-controlled

OM1. Which description of the NCRWC is constitutionally accurate?

- A. A temporary executive advisory commission constituted by Union government resolution.
- B. A parliamentary joint committee with power to amend the Constitution.
- C. A permanent constitutional commission created by the 42nd Amendment.
- D. A constituent body elected under Article 368.

Answer: A

Explanation: Its Government-resolution origin made its report advisory; amendment still required the constitutionally competent route.

OM2. The NCRWC was constituted and its report presented on which dates?

- A. 22 February 2001 and 31 March 2003.
- B. 22 February 2000 and 31 March 2002.
- C. 15 August 2000 and 26 November 2002.
- D. 26 January 2000 and 11 March 2002.

Answer: B

Explanation: The resolution is dated 22 February 2000; the signed report records presentation to the Prime Minister on 31 March 2002.

OM3. Who chaired the NCRWC?

- A. Justice R.S. Sarkaria.
- B. Dr Subhash C. Kashyap.
- C. Justice M.N. Venkatachaliah.
- D. Justice B.P. Jeevan Reddy.

Answer: C

Explanation: Justice M.N. Venkatachaliah was Chairperson; the other named persons were members.

OM4. The official NCRWC report records which membership fact?

- A. The Commission had only representatives of political parties.
- B. The secretary was counted as a twelfth member.
- C. All members were serving Supreme Court judges.
- D. The eleven-member count included the Chairperson, and P.A. Sangma had resigned.

Answer: D

Explanation: The report lists the Chairperson plus ten initial members and marks P.A. Sangma as having resigned.

OM5. Which proposition formed an express boundary of the terms of reference?

- A. Parliamentary democracy and the Constitution's basic structure or features were not to be interfered with.
- B. The Commission could replace parliamentary government with presidential government.
- C. Every recommendation would automatically amend the Constitution.
- D. Judicial review was outside the review mandate.

Answer: A

Explanation: The review was expressly bounded by parliamentary democracy and basic-structure/basic-feature preservation.

OM6. What was the NCRWC's central object?

- A. To prepare a new Constitution outside the existing amendment process.

- B. To review fifty years of constitutional working for efficient, smooth and effective governance and socio-economic development.
- C. To codify only election law.
- D. To adjudicate constitutional disputes between Union and States.

Answer: B

Explanation: The mandate was a comprehensive performance review, not adjudication or constituent replacement.

OM7. Which statement best distinguishes the NCRWC from the Constituent Assembly?

- A. Both exercised original constituent power.
- B. The Assembly was an executive advisory body.
- C. The Assembly framed the Constitution; the NCRWC later offered non-binding reforms on its working.
- D. The NCRWC ratified the Constitution drafted by Parliament.

Answer: C

Explanation: Founding authority and later advisory review are distinct institutional functions.

OM8. Consultation papers, expert studies and public responses primarily gave the NCRWC what kind of force?

- A. Automatic statutory force after publication.
- B. Constituent force superior to Article 368.
- C. Binding force equal to a Supreme Court judgment.
- D. Persuasive and evidentiary force, not legal enforceability.

Answer: D

Explanation: Consultation can improve quality and legitimacy without changing the report's advisory legal status.

OM9. The report's 249 recommendations were officially grouped by route as:

- A. 58 constitutional amendment, 86 legislation and 105 executive action.
- B. 86 constitutional amendment, 105 legislation and 58 judicial action.
- C. 105 constitutional amendment, 58 legislation and 86 referendum.
- D. 249 constitutional amendments only.

Answer: A

Explanation: The official Chapter 11 summary identifies 58 amendment and 86 legislative routes; the remaining 105 were executive-action routes.

OM10. Which NCRWC proposal concerned Fundamental Duties?

- A. Transfer all duties to Part III as absolute rights.
- B. Add duties to vote, participate democratically and pay taxes, among other proposals.
- C. Make only property ownership a constitutional duty.
- D. Delete every duty because it is non-justiciable.

Answer: B

Explanation: The report proposed additional civic duties; it did not recommend abolishing or converting the entire duties chapter.

OM11. Which rights proposal belongs to the NCRWC report?

- A. Abolition of access to courts.
- B. Removal of privacy from constitutional protection.
- C. Express protection against torture and a right to compensation for unlawful deprivation of life or liberty.
- D. A constitutional right to preventive detention without review.

Answer: C

Explanation: The report proposed stronger rights and remedies, including torture protection and compensation.

OM12. What did the NCRWC propose for Article 300A?

- A. Permit deprivation by executive instruction without law.
- B. Delete property protection entirely.
- C. Restore an unrestricted Fundamental Right to property in its pre-1978 form.
- D. Recast it around public purpose, non-arbitrariness and special rehabilitation protection for SC/ST land deprivation.

Answer: D

Explanation: The proposal strengthened lawful, non-arbitrary acquisition safeguards without simply restoring the former Part III right.

OM13. Which annual sitting-day minima did the NCRWC recommend?

- A. Lok Sabha 120 and Rajya Sabha 100.
- B. Lok Sabha 100 and Rajya Sabha 120.
- C. No numerical minima.
- D. Both Houses 60.

Answer: A

Explanation: The report recommended 120 days for Lok Sabha and 100 for Rajya Sabha.

OM14. For State legislatures, the NCRWC proposed:

- A. 120 days for every House regardless of size.
- B. 90 days for larger Houses and 50 days for Houses with fewer than 70 members.
- C. 30 days for Assemblies and no sittings for Councils.
- D. A numerical rule only for Union Parliament.

Answer: B

Explanation: The differentiated proposal used 90 days generally and 50 for Houses below 70 members.

OM15. What is a constructive vote of no confidence?

- A. A confidence vote decided by the Governor without the House.
- B. A judicial proceeding to remove the Prime Minister.
- C. A removal motion that simultaneously identifies an alternative leader capable of forming government.
- D. A party whip on every legislative matter.

Answer: C

Explanation: Constructive no-confidence joins displacement with replacement to reduce government-free instability.

OM16. The NCRWC's constructive no-confidence proposal required notice by at least:

- A. Two-thirds of the Council of States.
- B. One member.
- C. Half of all State legislatures.
- D. 20 per cent of the House.

Answer: D

Explanation: The report specified a 20 per cent notice threshold and an alternative leader.

OM17. The NCRWC recommended that the size of a Council of Ministers should ordinarily not exceed:

- A. 10 per cent of the strength of the popular House.
- B. 20 per cent of the electorate.
- C. 15 per cent of both Houses combined.
- D. One-third of the popular House.

Answer: A

Explanation: Its proposed ceiling was 10 per cent; this must not be confused with the later constitutional 15 per cent ceiling.

OM18. Why is the 91st Amendment not exact adoption of the NCRWC ministry-size proposal?

- A. It abolished every ceiling.
- B. It constitutionalised a 15 per cent ceiling, whereas NCRWC proposed 10 per cent.
- C. It applied only to the Rajya Sabha.
- D. It created the NCRWC as a constitutional body.

Answer: B

Explanation: A later related reform with a materially different threshold is modified or similar reform, not exact adoption.

OM19. Which anti-defection reform did the NCRWC recommend?

- A. Give party presidents final judicial power.
- B. Abolish every vote of conscience including issues outside confidence and money matters.
- C. Defectors should resign and recontest, with disqualification questions decided by the Election Commission.
- D. Restore the deleted one-third split exception.

Answer: C

Explanation: The report sought stricter electoral consequences and a different decision-maker.

OM20. Which whip reform is associated with the NCRWC?

- A. Give courts power to issue party whips.
- B. Prohibit parties from communicating voting positions.
- C. Constitutionally require whips on every amendment and private member's bill.
- D. Restrict binding whips substantially to confidence and money matters.

Answer: D

Explanation: Narrowing the whip was meant to restore deliberation while preserving government survival votes.

OM21. The NCRWC proposed appointing the Election Commission through a body including:

- A. Prime Minister, opposition leaders in both Houses, Lok Sabha Speaker and Rajya Sabha Deputy Chairman.
- B. The Supreme Court collegium alone.
- C. All Chief Ministers through the Inter-State Council.
- D. Only the Chief Election Commissioner.

Answer: A

Explanation: This was the report's recommendation; it must not be presented as current appointment law.

OM22. What was the NCRWC's position on political parties?

- A. Political parties should remain wholly outside legal disclosure.
- B. A comprehensive law should address registration, internal democracy, accounts and candidate selection.
- C. Party registration under Section 29A should be abolished without replacement.
- D. Only recognised national parties should be permitted.

Answer: B

Explanation: The report linked representative democracy to transparent, internally accountable party organisation.

OM23. Which statement about the NCRWC's judicial commission proposal is correct?

- A. It was created by the 99th Amendment before the NCRWC existed.
- B. It is the institution currently making appointments.
- C. It was distinct from the later NJAC and from the current collegium.

- D. It excluded the Chief Justice of India.

Answer: C

Explanation: NCRWC proposal, later NJAC enactment and current collegium are separate legal states.

OM24. For Supreme Court appointments, the proposed NCRWC commission included:

- A. President acting alone without consultation.
- B. Prime Minister and all Chief Ministers only.
- C. CJI and Attorney General only.
- D. CJI, two senior-most Supreme Court judges, Union Law Minister and one eminent person.

Answer: D

Explanation: The exact proposed design mixed judicial members, the Law Minister and one eminent person.

OM25. What retirement ages did NCRWC recommend?

- A. 65 for High Court judges and 68 for Supreme Court judges.
- B. 70 for every constitutional office.
- C. 68 for High Courts and 65 for the Supreme Court.
- D. 62 for both courts.

Answer: A

Explanation: The proposal raised both ages while retaining a higher Supreme Court age.

OM26. Which Governor-related recommendation is correctly stated?

- A. Governors should hold office without constitutional removal.
- B. The Chief Minister should be consulted before gubernatorial appointment.
- C. Governors should be directly elected nationwide.
- D. The Chief Minister should appoint the Governor unilaterally.

Answer: B

Explanation: The report sought consultation and restraint, not direct election or unilateral State appointment.

OM27. For action on State Bills, NCRWC suggested approximately:

- A. Three years for both offices.
- B. Seven days for the Governor and no period for the President.
- C. Six months for the Governor and three months for the President.
- D. No decision periods.

Answer: C

Explanation: The suggested timelines were recommendations and did not become the text of Articles 200-201.

OM28. Which body did NCRWC recommend operationalising for inter-State commerce?

- A. The Finance Commission under Article 280 as a commercial court.
- B. The GST Council before its constitutional creation.
- C. A new constituent assembly.
- D. An Inter-State Trade and Commerce Commission under Article 307.

Answer: D

Explanation: The report linked Article 307 to an institutional mechanism for inter-State trade and commerce.

OM29. How should the Disaster Management Act, 2005 be classified against NCRWC's proposal?

- A. A statutory response in the field, not proof that disaster management moved to the Concurrent List.
- B. A constitutional amendment to Article 368.
- C. Judicial invalidation of the NCRWC.
- D. Exact constitutional adoption of a Concurrent List transfer.

Answer: A

Explanation: The Act did not amend the Seventh Schedule, so functional similarity cannot establish exact adoption.

OM30. What is the correct implementation label for the 86th Amendment in relation to NCRWC's education proposals?

- A. A repeal of the Commission's report.
- B. A later reform requiring text-and-timing comparison, not automatic attribution from chronology.
- C. An executive action requiring no constitutional amendment.
- D. Conclusive proof that all NCRWC rights proposals were enacted.

Answer: B

Explanation: Implementation analysis must compare exact wording, route and independent reform history.

OM31. Which sequence is the most rigorous implementation audit?

- A. Date -> similarity -> claimed causation.
- B. Commission name -> political approval -> current law.
- C. Recommendation -> later instrument -> wording -> legal effect -> implementation verdict.
- D. Headline -> inference -> enacted status.

Answer: C

Explanation: A route-sensitive audit prevents chronology from being mistaken for causation.

OM32. A later reform resembles an NCRWC recommendation but official materials do not attribute it to NCRWC. The safest label is:

- A. Constitutional convention created by the Commission.
- B. Exact implementation.
- C. Judicial enforcement of the report.
- D. Functionally similar later reform without proven attribution.

Answer: D

Explanation: Similarity may be analytically relevant but does not prove causal implementation.

OM33. Which is an example of a substantially pending recommendation?

- A. A comprehensive political-parties law with internal-democracy architecture.
- B. The existence of Article 368.
- C. The Constitution's adoption in 1950.
- D. The Supreme Court's original jurisdiction.

Answer: A

Explanation: No comprehensive law embodying the report's full party-regulation architecture has been enacted.

OM34. Which reform was enacted and later judicially invalidated?

- A. The 91st Amendment ministry ceiling.
- B. The 99th Amendment/NJAC scheme.
- C. The 86th Amendment.
- D. The RTI Act.

Answer: B

Explanation: The NJAC episode is a distinct later design and cannot be described as the current NCRWC commission.

OM35. 'Working of the Constitution' is best evaluated through:

- A. The age of the Constitution alone.
- B. Election results alone.

- C. Text, institutions, conventions, political incentives and outcomes.
- D. Text alone.

Answer: C

Explanation: Constitutional performance depends on how formal rules interact with institutional and political practice.

OM36. Which indicator most directly tests legislative working?

- A. Only the length of the constitutional text.
- B. Only the number of government bills passed.
- C. Only the size of the ruling majority.
- D. Sitting time, committee scrutiny, financial control and reasoned debate.

Answer: D

Explanation: Legislative quality requires scrutiny and accountability, not merely output volume.

OM37. Which indicator most directly tests federal working?

- A. Consultation, fiscal predictability, council use, Governor restraint and dispute resolution.
- B. Abolition of intergovernmental negotiation.
- C. Uniformity of every State policy.
- D. Union legislation in every field.

Answer: A

Explanation: Federal performance combines autonomy, coordination and fair dispute management.

OM38. Which statement best captures constitutional morality?

- A. Automatic obedience to every political majority.
- B. Role fidelity, reason-giving, restraint and equal citizenship rooted in constitutional norms.
- C. Unreviewable judicial discretion.
- D. Personal moral preferences of office-holders.

Answer: B

Explanation: Constitutional morality disciplines public power through constitutional roles and values.

OM39. What does basic structure contribute to NCRWC analysis?

- A. A rule that no constitutional provision can ever change.
- B. A doctrine applicable only to ordinary statutes.
- C. A substantive limit on permissible amendment, not a ban on every institutional reform.
- D. A power for the Commission to amend the Constitution.

Answer: C

Explanation: The doctrine protects constitutional identity while permitting reforms that remain within it.

OM40. Which statement about Kesavananda Bharati (1973) is safest here?

- A. It abolished Article 368.
- B. It enacted the Commission's election proposals.
- C. It created the NCRWC.
- D. It supplies the basic-structure boundary for amendment, not evidence that NCRWC proposals became law.

Answer: D

Explanation: A judicial doctrine can constrain implementation without implementing an advisory report.

OM41. What is the proper relation between Fundamental Rights and DPSPs in reform analysis?

- A. Harmonise rights and social transformation without destroying either constitutional commitment.
- B. Use NCRWC recommendations to suspend both.
- C. Treat DPSPs as automatically superior to every Fundamental Right.

- D. Treat Fundamental Rights as barring all welfare legislation.

Answer: A

Explanation: Minerva Mills (1980) supports balance rather than absolute primacy of one constitutional part.

OM42. Which reform route should be preferred first?

- A. Constitutional amendment for every administrative defect.
- B. The least legally sufficient and institutionally workable route.
- C. Judicial direction for every political choice.
- D. Executive instruction even where the Constitution requires amendment.

Answer: B

Explanation: Route selection should follow diagnosis: convention, capacity, statute or constitutional text.

OM43. A problem caused primarily by poor administrative capacity should ordinarily begin with:

- A. A referendum outside the constitutional scheme.
- B. Immediate replacement of parliamentary democracy.
- C. Rules, staffing, technology, process and accountability repair.
- D. A constitutional amendment regardless of the legal text.

Answer: C

Explanation: Constitutional text cannot by itself cure every capacity and implementation failure.

OM44. Which question most improves feasibility analysis?

- A. Was it printed in a commission report?
- B. Does the proposal sound desirable in the abstract?
- C. Can its status be inferred from chronological proximity?
- D. Who implements, funds, monitors and reviews the reform?

Answer: D

Explanation: Executable reform requires actor, resource, metric, review and correction design.

OM45. What is the strongest criticism of treating NCRWC as a blueprint?

- A. Its recommendations differ in route, precision, political acceptability and later legal status.
- B. Commission reports can never contain useful evidence.
- C. The report concerned only judicial appointments.
- D. Every recommendation violated basic structure.

Answer: A

Explanation: A menu of heterogeneous proposals requires selective, current-law evaluation.

OM46. What is the strongest defence of NCRWC's continuing relevance?

- A. Every proposal has already been adopted exactly.
- B. It supplies a structured diagnosis and reform vocabulary for recurring institutional-performance problems.
- C. It is a court of final appeal.
- D. Its recommendations automatically override statutes.

Answer: B

Explanation: Its enduring value is analytical and evidentiary, not self-executing legal authority.

OM47. In an answer on NCRWC, which source label is essential?

- A. Call every proposal a constitutional provision.
- B. Use later judgments as proof of Commission authorship.
- C. Mark a report item as a recommendation and separately state current law or status.
- D. Avoid dates and legal routes.

Answer: C

Explanation: The recommendation-law firewall prevents a central factual error.

OM48. Which conclusion best evaluates the Commission?

- A. An obsolete document because not every proposal was enacted.
- B. A second Constituent Assembly whose whole report is binding.
- C. A judicial precedent controlling all public authorities.
- D. A valuable diagnostic reform menu whose proposals require independent constitutional route, feasibility and status verification.

Answer: D

Explanation: A balanced conclusion recognises value without confusing advice, causation and operative law.

PYQS AND ANSWER PRACTICE

Verified supporting Mains PYQs

PYQ boundary: No direct NCRWC-specific GS-II Mains question was located in the verified ledgers. The four questions below are reproduced as supporting/cross-owned routes; NCRWC evidence is used only where it answers the exact demand.

PYQ 1 - 2021 GS-II Q1 - supporting/cross-owned

Question: "Constitutional Morality" is rooted in the Constitution itself and is founded on its essential facets. Explain the doctrine of "Constitutional Morality" with the help of relevant judicial decisions.

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: Constitutional morality is fidelity to the Constitution's text, structure, values and the restraints of public office, rather than compliance with transient social or political morality. It requires equal citizenship, reasoned power and respect for institutional roles. In *Government of NCT of Delhi v. Union of India* (2018), the Supreme Court linked it to constitutional trust, collaborative federalism and responsible government. *Navtej Singh Johar v. Union of India* (2018) held that constitutional morality must protect liberty and equality against exclusionary social morality. *Indian Young Lawyers Association* (2018) used equality and dignity to test religious exclusion, while later opinions demonstrate that the concept requires disciplined legal reasoning rather than personal preference. The NCRWC's focus on accountability, restraint and effective rights illustrates the same performance question: does institutional conduct realise constitutional commitments? Constitutional morality therefore makes a written Constitution a lived discipline of limited, answerable government.

Why this earns marks: It answers the exact demand through constitutional concepts, named authority and a controlled link to NCRWC.

How to improve this answer: Keep the NCRWC reference subordinate where the PYQ is owned by another topic; the exact question remains the organising demand.

Compression: Directive -> constitutional rule -> evidence -> analysis -> qualification -> verdict within 150 words.

Detailed examiner-grade model answer:

Introduction and thesis: Constitutional morality is fidelity to the Constitution's text, structure, values and the restraints of public office, rather than compliance with transient social or political morality. It requires equal citizenship, reasoned power and respect for institutional roles. In *Government of NCT of Delhi v. Union of India* (2018), the Supreme Court linked it to constitutional trust, collaborative federalism and responsible government. *Navtej Singh Johar v. Union of India* (2018) held that constitutional morality must protect liberty and equality against exclusionary social morality. *Indian Young Lawyers Association* (2018) used equality and dignity to test religious exclusion, while later opinions demonstrate that the concept requires disciplined legal reasoning rather than personal preference. The NCRWC's focus on accountability, restraint and effective rights illustrates the same performance question: does institutional conduct realise constitutional commitments? Constitutional morality therefore makes a written Constitution

a lived discipline of limited, answerable government.

Analytical body:

1. **Claim and named evidence:** PYQ 1 - 2021 GS-II Q1 - supporting/cross-owned **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** use named evidence, assign precise implementation status and end with a qualified verdict. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** Model solution: Constitutional morality is fidelity to the Constitution's text, structure, values and the restraints of **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** public office, rather than compliance with transient social or political morality. It requires equal **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** citizenship, reasoned power and respect for institutional roles. In *Government of NCT of Delhi v. Union of India*. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Constitutional morality is fidelity to the Constitution's text, structure, values and the restraints of public office, rather than compliance with transient social or political morality. It requires equal citizenship, reasoned power and respect for institutional roles. In *Government of NCT of Delhi v. Union of India* (2018), the Supreme Court linked it to constitutional trust, collaborative federalism and responsible government. *Navtej Singh Johar v. Union of India* (2018) held that constitutional morality must protect liberty and equality against exclusionary social morality. *Indian Young Lawyers Association* (2018) used equality and dignity to test religious exclusion, while later opinions demonstrate that the concept requires disciplined legal reasoning rather than personal preference. The NCRWC's focus on accountability, restraint and effective rights illustrates the same performance question: does institutional conduct realise constitutional commitments? Constitutional morality therefore makes a written Constitution a lived discipline of limited, answerable government.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

PYQ 2 - 2019 GS-II Q12 - supporting/cross-owned

Question: "Parliament's power to amend the Constitution is a limited power and it cannot be enlarged into absolute power." In the light of this statement explain whether Parliament under Article 368 of the Constitution can destroy the Basic Structure of the Constitution by expanding its amending power.

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: Article 368 gives Parliament a wide constituent power, but not authority to destroy the Constitution's identity. *Kesavananda Bharati (1973)* held that every provision may be amended while the basic structure cannot be damaged or destroyed. The limitation is substantive: democracy, rule of law, judicial review, federalism, separation of powers and other foundational features cannot be abrogated through the amendment procedure. *Indira Nehru Gandhi v. Raj Narain* applied the doctrine to invalidate an amendment damaging free elections and judicial review. *Minerva Mills (1980)* struck clauses that sought unlimited amending power and excluded review, reasoning that limited amending power and judicial review are themselves basic features. Parliament therefore cannot use Article 368 to convert a limited power into an absolute one; a self-validating amendment would erase the distinction between a constituted amending body and original constituent power. This boundary also controlled NCRWC's express mandate: review could recommend reform within parliamentary democracy but could not authorise rewriting basic structure. Adaptability survives, but constitutional continuity sets its outer limit.

Why this earns marks: It answers the exact demand through constitutional concepts, named authority and a controlled link to NCRWC.

How to improve this answer: Keep the NCRWC reference subordinate where the PYQ is owned by another topic; the exact question remains the organising demand.

Compression: Directive -> constitutional rule -> evidence -> analysis -> qualification -> verdict within 250 words.

Detailed examiner-grade model answer:

PYQ 3 - 2024 GS-II Q1 - supporting/cross-owned

Question: Examine the need for electoral reforms as suggested by various committees with particular reference to 'one nation-one election' principle. (*Spellings as printed.*)

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: Electoral reform is needed to reduce opaque finance, criminalisation, weak internal democracy, defection incentives and repeated disruption by election cycles. The NCRWC recommended transparent party accounts, internal-democracy law, narrower whips, stricter consequences for defection and a broader Election Commission appointment process. Simultaneous elections may reduce recurring Model Code interruptions and campaign expenditure and could create predictable governance windows. However, they also raise federal and accountability risks: premature dissolution, constructive-confidence design, synchronisation, caretaker conventions and constitutional amendments need broad agreement. Regional issues may be crowded out by national campaigns, and expenditure savings are not enough to justify weakened legislative responsibility. Reform should therefore begin with political-finance transparency, ECI independence, clean candidates and party democracy. Any simultaneous-election design must preserve confidence of the House, federal choice, feasible transition and independent election administration rather than pursue calendar uniformity as an end in itself.

Why this earns marks: It answers the exact demand through constitutional concepts, named authority and a controlled link to NCRWC.

How to improve this answer: Keep the NCRWC reference subordinate where the PYQ is owned by another topic; the exact question remains the organising demand.

Compression: Directive -> constitutional rule -> evidence -> analysis -> qualification -> verdict within 150 words.

Detailed examiner-grade model answer:

PYQ 4 - 2025 GS-II Q11 - supporting/cross-owned

Question: "Constitutional morality is the fulcrum which acts as an essential check upon the high functionaries and citizens alike...." In view of the above observation of the Supreme Court, explain the concept of constitutional morality and its application to ensure balance between judicial independence and judicial accountability in India.

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: Constitutional morality means fidelity to constitutional values, procedures and institutional limits. For judges, it protects decisional independence from executive, legislative and popular retaliation: security of tenure, protected conditions of service, judicial review and institutional control support this function. *Kesavananda Bharati* (1973) and the NJAC judgment locate judicial independence within basic structure. Yet independence is not insulation from standards. The same morality demands transparent selection criteria, reasoned judgments, consistent recusal, ethical disclosure, fair complaint procedures and timely discipline. *Government of NCT of Delhi and Navtej Singh Johar v. Union of India* (2018) show that public power must be exercised through role fidelity, equality and reason-giving.

Removal under Articles 124(4)-(5) is an exceptional parliamentary safeguard, while the Restatement of Values and in-house procedure operate below that threshold. Their non-statutory and opaque features leave an accountability gap. Reform should preserve judicial primacy against executive capture while adding a permanent appointments secretariat, published criteria, recorded reasons, diversity data and an independent, fair complaints process. Constitutional morality thus requires independence in adjudication and accountability in the constitution and exercise of judicial office; neither executive control nor corporate judicial secrecy satisfies it.

Why this earns marks: It answers the exact demand through constitutional concepts, named authority and a controlled link to NCRWC.

How to improve this answer: Keep the NCRWC reference subordinate where the PYQ is owned by another topic; the exact question remains the organising demand.

Compression: Directive -> constitutional rule -> evidence -> analysis -> qualification -> verdict within 250 words.

M1 - 10 marks, 150 words

Question: Explain the mandate, composition and legal status of the NCRWC.

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: The Union Government constituted the National Commission to Review the Working of the Constitution by resolution dated 22 February 2000. Justice M.N. Venkatachaliah chaired an eleven-member body drawing on judicial, parliamentary, legal, administrative and public-policy experience; the report records P.A. Sangma as having resigned. The report was adopted on 11 March and presented to the Prime Minister on 31 March 2002. Its mandate was to review fifty years of constitutional working and recommend changes for efficient governance and socio-economic development. The terms expressly preserved parliamentary democracy and the Constitution's basic structure or features. The Commission was neither a constituent assembly nor a constitutional or adjudicatory body. Its 249 recommendations were advisory and required separate amendment, legislation, executive action or institutional practice. Its authority was persuasive: evidence and expertise could guide reform, but neither publication nor executive acceptance made a proposal operative law.

Why this earns marks: It combines exact identity, full legal-status firewall, dates and route consequence.

How to improve this answer: If space is tight, list only Chairperson plus eleven-member character, but retain both dates and the basic-structure limit.

Compression: Resolution/date -> chair/composition -> mandate -> boundary -> advisory consequence.

Detailed examiner-grade model answer:

M2 - 15 marks, 250 words

Question: Assess the NCRWC's principal recommendations for Parliament and the political process.

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: The NCRWC diagnosed a gap between representative institutions and effective accountability. For Parliament, it proposed minimum annual sittings of 120 days for Lok Sabha and 100 for Rajya Sabha, stronger committee scrutiny, defined privileges and better legislative planning. A constructive vote of no confidence, moved with 20 per cent notice and an alternative leader, sought stability without removing House responsibility. It recommended a Council of Ministers ceiling of 10 per cent of the popular House.

For the political process, it advocated a comprehensive party law covering registration, internal democracy, accounts and candidate selection; stricter disqualification of defectors, resignation and recontest; Election Commission decision on disqualification; and a whip substantially confined to confidence and money matters. It also proposed a broad appointments body for the Election Commission. These recommendations form a coherent chain: democratic parties produce candidates, elections confer authority, Parliament scrutinises government and confidence rules maintain responsibility.

Implementation is uneven. The 91st Amendment created a different 15 per cent ministry ceiling, so it is related rather than exact adoption. A comprehensive political-parties law and narrow-whip design remain substantially pending. The report remains useful because today's problems of low deliberation, opaque finance and defection persist, but feasibility, federal effects and current law must be tested proposal by proposal.

Why this earns marks: It organises proposals into an institutional chain and performs a precise implementation audit.

How to improve this answer: Add one current parliamentary-performance indicator only from a dated official source; do not replace doctrinal analysis with statistics.

Compression: Parliament proposals -> party/election proposals -> institutional chain -> status audit -> balanced verdict.

Detailed examiner-grade model answer:

Introduction and thesis: The NCRWC diagnosed a gap between representative institutions and effective accountability. M3 - 15 marks, 250 words

Question: Critically examine the NCRWC's recommendations on judicial reform.

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: The NCRWC sought to reconcile judicial independence with appointment quality, access and accountability. For Supreme Court appointments it proposed a National Judicial Commission comprising the Chief Justice of India, two senior-most Supreme Court judges, the Union Law Minister and an eminent person nominated after consulting the CJI. It also envisaged a complaints mechanism, stronger court administration, access to justice and retirement ages of 65 for High Court and 68 for Supreme Court judges.

The design's strength was to treat independence and accountability as connected rather than opposing values. Multi-institutional input could broaden information; complaint handling below removal could address the accountability gap; higher retirement ages could reduce differential incentives. Yet membership, transparency, decisive voice and

protection from executive bargaining determine whether a commission actually preserves independence.

The proposal must not be equated with the later 99th Amendment/NJAC scheme, which the Supreme Court invalidated in 2015, or with the current collegium. That history shows that a reform's label cannot answer the basic-structure question. A durable model needs judicial insulation, published criteria, reasoned selections, diversity reporting, a permanent secretariat and fair independent complaints process. NCRWC supplies a reform architecture, not the present law.

Why this earns marks: It states the exact proposed design, evaluates both values and prevents NCRWC/NJAC/collegium conflation.

How to improve this answer: Name the NJAC judgment only to explain the basic-structure constraint; avoid turning the answer into a full collegium history.

Compression: Exact design -> benefits -> capture risks -> current-law firewall -> calibrated reform.

Detailed examiner-grade model answer:

Introduction and thesis: The NCRWC sought to reconcile judicial independence with appointment quality, access and accountability. For Supreme Court appointments it proposed a National Judicial Commission comprising the Chief Justice of India, two senior-most Supreme Court judges, the Union Law Minister and an eminent person nominated after consulting the CJI. It also envisaged a complaints mechanism, stronger court administration, access to justice and retirement ages of 65 for High Court and 68 for Supreme Court judges.

The design's strength was to treat independence and accountability as connected rather than opposing values. Multi-institutional input could broaden information; complaint handling below removal could address the accountability gap; higher retirement ages could reduce differential incentives. Yet membership, transparency, decisive voice and protection from executive bargaining determine whether a commission actually preserves independence.

The proposal must not be equated with the later 99th Amendment/NJAC scheme, which the Supreme Court invalidated in 2015, or with the current collegium. That history shows that a reform's label cannot answer the basic-structure question. A durable model needs judicial insulation, published criteria, reasoned selections, diversity reporting, a permanent secretariat and fair independent complaints process. NCRWC supplies a reform architecture, not the present law.

Analytical body:

1. **Claim and named evidence:** use named evidence, assign precise implementation status and end with a qualified verdict. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
2. **Claim and named evidence:** Model solution: The NCRWC sought to reconcile judicial independence with appointment quality, access and accountability. **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
3. **Claim and named evidence:** For Supreme Court appointments it proposed a National Judicial Commission comprising the Chief Justice **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
4. **Claim and named evidence:** of India, two senior-most Supreme Court judges, the Union Law Minister and an eminent person nominated **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** after consulting the CJI. It also envisaged a complaints mechanism, stronger court administration, **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: The NCRWC sought to reconcile judicial independence with appointment quality, access and accountability. For Supreme Court appointments it proposed a National Judicial Commission comprising the Chief Justice of India, two senior-most Supreme Court judges, the Union Law Minister and an eminent person nominated after consulting the CJI. It also envisaged a complaints mechanism, stronger court administration, access to justice and retirement ages of 65 for High Court and 68 for Supreme Court judges.

The design's strength was to treat independence and accountability as connected rather than opposing values. Multi-institutional input could broaden information; complaint handling below removal could address the accountability gap; higher retirement ages could reduce differential incentives. Yet membership, transparency, decisive voice and protection from executive bargaining determine whether a commission actually preserves independence.

The proposal must not be equated with the later 99th Amendment/NJAC scheme, which the Supreme Court invalidated in 2015, or with the current collegium. That history shows that a reform's label cannot answer the basic-structure question. A durable model needs judicial insulation, published criteria, reasoned selections, diversity reporting, a permanent secretariat and fair independent complaints process. NCRWC supplies a reform architecture, not the present law.

Executable exam-length answer / compression plan: For a 15-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise five points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

M4 - 10 marks, 150 words

Question: Why is implementation of commission recommendations a question of causation as well as chronology?

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: A later reform occurring after a commission report is not necessarily its implementation. A rigorous audit first states the exact recommendation, then identifies the later legal instrument, compares wording and route, examines legal effect and finally assigns a status. The NCRWC proposed a 10 per cent ministry ceiling; the 91st Amendment adopted 15 per cent, making it a modified related reform rather than exact adoption. It proposed moving disaster management to the Concurrent List; the Disaster Management Act, 2005 created a statutory framework but did not amend that List. Its judicial commission was distinct from the later NJAC, which was enacted and invalidated. Proper labels therefore include exact adoption, modified adoption, functionally similar later reform without proven attribution, judicial development, rejected or displaced, and pending. This method preserves both historical influence and present-law accuracy.

Why this earns marks: It converts an abstract causation warning into a repeatable five-step audit with three examples.

How to improve this answer: If evidence of attribution exists, cite the official statement; otherwise use a neutral similarity label.

Compression: Proposal -> instrument -> wording -> legal effect -> status; use three contrast examples.

Detailed examiner-grade model answer:

Introduction and thesis: A later reform occurring after a commission report is not necessarily its implementation. A rigorous audit first states the exact recommendation, then identifies the later legal instrument, compares wording and route, examines legal effect and finally assigns a status. The NCRWC proposed a 10 per cent ministry ceiling; the 91st Amendment adopted 15 per cent, making it a modified related reform rather than exact adoption. M5 - 15 marks, 250 words

Question: Evaluate the working of the Constitution beyond its formal text.

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: A Constitution works through an interaction of text, institutions, conventions, incentives, capacity and outcomes. Formal provisions allocate authority, but institutions translate them into decisions; parties and conventions shape restraint; administration supplies implementation; courts and audit institutions provide correction. The NCRWC therefore examined electoral integrity, legislative scrutiny, executive accountability, judicial access, federal consultation, decentralisation and rights enforcement rather than merely drafting amendments.

Performance should be measured through a dashboard. Legislature: sitting time, committee scrutiny, financial control and reasoned debate. Executive: cabinet responsibility, legality, transparency and delivery. Judiciary: access, pendency, independence and compliance. Federalism: consultation, fiscal predictability, Governor restraint and

dispute resolution. Local government: devolution of functions, funds and functionaries. Rights: affordability of remedies and implementation of orders.

The approach avoids textual fetishism: a sound provision can underperform through bad incentives or weak capacity. It also avoids political impressionism because each claim must be tied to a constitutional function and evidence. Reform should diagnose whether the defect lies in text, convention, capacity, incentive or remedy, then choose the least legally sufficient route. Constitutional success is sustained role fidelity and corrective capacity, not merely institutional survival.

Why this earns marks: It defines constitutional working, supplies measurable dimensions and links diagnosis to the reform route.

How to improve this answer: Use a two-column dashboard in the exam and add one concrete institutional example under the dimension named in the question.

Compression: Six-factor definition -> five-part dashboard -> two analytical cautions -> route-sensitive verdict.

Detailed examiner-grade model answer:

Introduction and thesis: A Constitution works through an interaction of text, institutions, conventions, incentives, capacity and outcomes. M6 - 15 marks, 250 words

Question: Discuss the NCRWC's federal recommendations and their constitutional significance.

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: The NCRWC treated federalism as a continuing practice of autonomy, consultation and restraint. It recommended consulting the Chief Minister before appointing a Governor, objective handling of Article 356 situations, stronger intergovernmental forums and an Inter-State Trade and Commerce Commission under Article 307. For State Bills it suggested roughly six months for gubernatorial action and three months for Presidential action. It also linked decentralisation to effective transfer of functions, funds and functionaries.

These proposals address recurring friction at institutional junctions: an appointed Governor and an elected ministry, Union emergency power and State autonomy, legislative reservation and democratic delay, or common-market needs and State regulation. Their constitutional significance lies less in centralisation than in proceduralising discretion through consultation, reasons, time and review. *S.R. Bommai (1994)* independently supplies a judicial control on Article 356; it is not evidence that the Court implemented NCRWC.

Most exact proposals remain dependent on constitutional or legislative action and convention. The suggested Bill timelines did not enter Articles 200-201, and Article 307's commission architecture is not operative as proposed. The durable lesson is that federal trust requires predictable procedure, not merely allocation of subjects.

Why this earns marks: It links each proposal to a concrete federal friction and separates judicial development from report implementation.

How to improve this answer: Do not state the proposed Bill periods as current constitutional deadlines; label them expressly as NCRWC suggestions.

Compression: Four proposals -> four friction points -> *S.R. Bommai (1994)* firewall -> status -> procedural-federalism verdict.

Detailed examiner-grade model answer:

Introduction and thesis: The NCRWC treated federalism as a continuing practice of autonomy, consultation and restraint. It recommended consulting the Chief Minister before appointing a Governor, objective handling of Article 356

situations, stronger intergovernmental forums and an Inter-State Trade and Commerce Commission under Article 307. evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

M7 - 10 marks, 150 words

Question: Explain the least-legally-sufficient-route principle in constitutional reform.

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: Institutional failure does not always prove defective constitutional text. The reformer should diagnose whether the gap concerns convention, administrative capacity, incentives, ordinary law, constitutional allocation or remedies. A practice failure may need transparency, reasons and convention; a capacity failure may need staffing, finance and process; a statutory gap needs legislation; only a constitutional barrier requires Article 368. Each route must then be tested for basic structure, rights, federalism, democratic legitimacy, implementability and review. The NCRWC's 249 recommendations themselves used different routes-58 constitutional amendments, 86 legislative measures and 105 executive actions. Using amendment for every problem rigidifies administration; using executive action where higher law is required evades legality. The least sufficient route preserves constitutional economy while making the responsible actor, resource, metric and corrective mechanism visible.

Why this earns marks: It gives a diagnostic ladder, exact route figures and the consequences of both over- and under-constitutionalisation.

How to improve this answer: Illustrate one capacity reform and one amendment-only reform if the question supplies a sector.

Compression: Diagnose five gaps -> choose route -> test limits -> route counts -> two-error warning.

Detailed examiner-grade model answer:

Introduction and thesis: Institutional failure does not always prove defective constitutional text. The reformer should diagnose whether the gap concerns convention, administrative capacity, incentives, ordinary law, constitutional allocation or remedies. A practice failure may need transparency, reasons and convention; a capacity failure may need staffing, finance and process; a statutory gap needs legislation; only a constitutional barrier requires Article 368. M8 - 20 marks, 250 words

Question: Has the NCRWC succeeded as a review of the working of the Constitution? Give a reasoned assessment.

Demand decoding: Answer the directive directly, distinguish recommendation from current law, use named evidence, assign precise implementation status and end with a qualified verdict.

Model solution: Success must be judged at three levels: diagnosis, reform design and verified institutional effect. The NCRWC succeeded diagnostically by reviewing fifty years of practice across rights, elections, Parliament, executive government, judiciary, federalism, decentralisation and administration. Its consultation papers and 249 recommendations created a durable map linking constitutional values to institutional performance. It also respected an express boundary: parliamentary democracy and basic structure were not to be rewritten.

Its design contribution was substantial. Minimum sitting days, constructive no-confidence, party democracy, narrower whips, judicial appointments and complaints, Governor consultation, reserved-Bill timelines and route-sensitive reform remain usable proposals. Some later reforms are related: the 91st Amendment imposed a different ministry ceiling; rights, transparency and local-governance measures developed through separate processes. Other proposals, such as a comprehensive party law and the specific National Judicial Commission, remain pending, displaced or transformed.

However, implementation cannot be credited by chronology alone. Political incentives, federal consent, basic-structure limits, fiscal capacity and institutional ownership filter every proposal. A report without a public recommendation-status dashboard also weakens accountability.

The NCRWC therefore succeeded more as a constitutional diagnostic and reform menu than as an implemented programme. Its present value lies in disciplined comparison: recommendation, route, later instrument, legal effect, evidence of attribution and current status.

Why this earns marks: It uses explicit success criteria, representative proposals, implementation qualifications and a graded verdict.

How to improve this answer: A 20-mark answer should preserve the three-level test and at least four different status labels rather than list recommendations.

Compression: Three success criteria -> achievements -> mixed status -> implementation filters -> graded verdict.

Detailed examiner-grade model answer:

Introduction and thesis: Success must be judged at three levels: diagnosis, reform design and verified institutional effect. The NCRWC succeeded diagnostically by reviewing fifty years of practice across rights, elections, Parliament, executive government, judiciary, federalism, decentralisation and administration. Its consultation papers and 249

recommendations created a durable map linking constitutional values to institutional performance. It also respected an express boundary: parliamentary democracy and basic structure were not to be rewritten.

Its design contribution was substantial. Its **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.
5. **Claim and named evidence:** consultation papers and 249 recommendations created a durable map linking constitutional values to **Analysis:** Connect structure or institution -> norm/incentive/power/agency mechanism -> differentiated social outcome -> feedback or policy implication. **Qualification:** State internal group variation, regional/historical scope, correlation-versus-causation or legal-norm-versus-lived-outcome boundary.

Counter-position / limit: Neither a constitutional provision, one scheme, aggregate correlation nor a single community example establishes uniform implementation, causation or national experience; test institutions, power, agency, intersectionality, region, period and evidence status.

Qualified conclusion: Success must be judged at three levels: diagnosis, reform design and verified institutional effect. The NCRWC succeeded diagnostically by reviewing fifty years of practice across rights, elections, Parliament, executive government, judiciary, federalism, decentralisation and administration. Its consultation papers and 249 recommendations created a durable map linking constitutional values to institutional performance. It also respected an express boundary: parliamentary democracy and basic structure were not to be rewritten.

Its design contribution was substantial. Minimum sitting days, constructive no-confidence, party democracy, narrower whips, judicial appointments and complaints, Governor consultation, reserved-Bill timelines and route-sensitive reform remain usable proposals. Some later reforms are related: the 91st Amendment imposed a different ministry ceiling; rights, transparency and local-governance measures developed through separate processes. Other proposals, such as a comprehensive party law and the specific National Judicial Commission, remain pending, displaced or transformed.

However, implementation cannot be credited by chronology alone. Political incentives, federal consent, basic-structure limits, fiscal capacity and institutional ownership filter every proposal. A report without a public recommendation-status dashboard also weakens accountability.

The NCRWC therefore succeeded more as a constitutional diagnostic and reform menu than as an implemented programme. Its present value lies in disciplined comparison: recommendation, route, later instrument, legal effect, evidence of attribution and current status.

Executable exam-length answer / compression plan: For a 20-mark answer, spend about one-sixth of the time decoding the directive and drawing the mechanism; define and state a thesis; organise six to eight points as claim -> named evidence -> analysis -> qualification; compress examples before mechanisms and reserve the final minute for causation, group variation and legal-outcome limits.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Firewall: The Core independently supplies identity, mandate, exact recommendation anchors, implementation auditing, evaluation and answer execution. The material below is optional.

Companion to `basic/NCRWC-and-Working-of-the-Constitution.md`. Use only after the complete Core. Recommendations remain non-binding unless a later legal instrument is separately identified.

Institutional-performance framework

Constitutional working can be evaluated through four linked capacities:

Capacity	Question	Evidence route
Authorisation	Is the actor constitutionally empowered?	text, statute, rule
Restraint	Are rights, federalism and role limits respected?	reasons, review, conventions
Delivery	Can the institution convert authority into timely outcomes?	staffing, procedure, finance
Correction	Can failure be exposed and remedied?	Parliament, audit, courts, elections

The framework prevents two opposite errors: assuming that valid text guarantees good government, and assuming that performance failure always requires constitutional amendment.

Reform sequencing and implementation causation

A commission recommendation should be coded as:

1. exact adoption;
2. modified adoption;
3. functionally similar later reform without proven attribution;
4. judicial development in a related field;
5. rejected or constitutionally displaced proposal; or
6. pending/unimplemented proposal.

Chronology alone cannot prove causation. Compare wording, institution, route, legal effect and official explanatory material before attributing implementation to the NCRWC.

Constitutional maintenance versus constitutional replacement

Maintenance preserves the founding settlement while repairing procedure, accountability and capacity. Replacement claims a new constituent mandate. The NCRWC's express basic-structure and parliamentary-democracy limits place it in the maintenance category.

Comparative evaluation

Commission-based review can aggregate expertise and public consultation, but elected institutions must choose among contested designs. Courts police constitutional limits; they do not approve an entire reform report in the abstract. A sound answer therefore evaluates each recommendation through democratic legitimacy, federal impact, rights cost, administrative feasibility and reviewability.

CONSOLIDATED REGISTER NOTES

One-screen identity

- FACT: Resolution: **22 February 2000**.
- FACT: Chairperson: **Justice M.N. Venkatachaliah**.
- FACT: Initial composition: **eleven members including the Chairperson**; P.A. Sangma later resigned.
- FACT: Report: adopted **11 March 2002**; presented to Prime Minister **31 March 2002**.
- FACT: Legal status: temporary executive advisory commission; recommendations were non-binding.
- FACT: Boundary: parliamentary democracy and basic structure/basic features preserved.

Recommendation memory grid

Cluster	Exam anchors
Route count	249 total = 58 amendment + 86 legislation + 105 executive action
Parliament	LS 120 days; RS 100; State Houses 90 or 50; committees; privileges
Government	constructive no-confidence; 20% notice; alternative leader; 10% ministry ceiling
Elections/parties	party law; transparent accounts; narrow whip; defectors resign/recontest; ECI decides
Judiciary	distinct National Judicial Commission; complaints; HC 65; SC 68
Federalism	CM consultation for Governor; Art 356 restraint; Bill timelines; Art 307 commission
Rights	torture protection; compensation; privacy; access/speedy justice; stronger Art 300A

Implementation status algorithm

```

Working-of-Constitution dashboard

- Legislature: sittings, scrutiny, finance, opposition, debate.
- Executive: responsibility, legality, transparency, delivery.
- Judiciary: access, independence, pendency, compliance, accountability.
- Federalism: consultation, fiscal predictability, Governor restraint, dispute settlement.
- Local government: functions, funds, functionaries, local accountability.
- Rights: remedy access, implementation, equality and reason-giving.

Answer-grabbing lines

- *The NCRWC reviewed constitutional performance; it did not exercise constituent power.*
- *A recommendation becomes law only through the constitutionally competent route.*
- *Chronology plus similarity is not proof of implementation.*
- **Constitutional working is the interaction of text, institutions, conventions, incentives, capacity and outcomes.**
- *Reform should use the least legally sufficient and institutionally workable route.*

Final traps

- NCRWC proposal ≠ current law.
- NCRWC National Judicial Commission ≠ later NJAC ≠ current collegium.
- 10% NCRWC ministry proposal ≠ 15% 91st Amendment ceiling.
- Disaster Management Act, 2005 ≠ Seventh Schedule transfer.
- Supporting PYQ ≠ direct NCRWC PYQ.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: NCRWC identity, mandate and constitutional boundary

ROOT QUESTION

How can constitutional performance be reviewed without claiming constituent power?

2000 Government resolution -> temporary executive advisory commission.

Justice M.N. Venkatachaliah -> chair | 11 members | report submitted in 2002.

MANDATE

review fifty years of working -> effective governance + socio-economic development.

BOUNDARY

parliamentary democracy + basic structure preserved.

VERDICT

review of working != rewriting the Constitution.

MUST REMEMBER: Treat every NCRWC proposition as a 2002 recommendation unless a later constitutional amendment, statute, rule or judgment independently proves law.

ASCII MASTER FLOW - PANEL 2/12: Consultation and institutional identity firewall

CONSULTATION

papers + expert studies + public responses + thematic deliberation -> advisory report.

CONSTITUENT ASSEMBLY -> framed Constitution.

PARLIAMENT/ART 368 -> amends through constitutional procedure.

LAW COMMISSION -> law-reform reports.

SARKARIA/PUNCHHI -> Centre-State review.

NCRWC -> comprehensive working review, no constituent authority.

TRAP

expertise and consultation create persuasion, not legal force.

ASCII MASTER FLOW - PANEL 3/12: Working of the Constitution: text to lived performance

TEXT

Articles + Parts + Schedules

|

v

INSTITUTIONS

Parliament + executive + courts + federal units + bodies

|

v

PRACTICE

conventions + parties + administration + political incentives

|

v

OUTCOMES

rights + accountability + deliberation + federal trust + remedies.

Kesavananda Bharati (1973) -> structural boundary.

Minerva Mills (1980) -> limited amendment + rights-DPSP harmony.

ASCII MASTER FLOW - PANEL 4/12: Recommendation clusters without law-status contamination

RIGHTS / DPSP / DUTIES

new rights, stronger implementation and proposed duties.

ELECTIONS / PARTIES

criminalisation, finance, ECI selection, party law and anti-defection.

PARLIAMENT / EXECUTIVE / ADMINISTRATION

sittings, committees, privileges, ministry size, civil services and integrity.

JUDICIARY / FEDERALISM / LOCAL GOVERNMENT

appointments, access, Governor, Art 356, councils and devolution.

STATUS

every node = NCRWC recommendation until separately enacted.

ASCII MASTER FLOW - PANEL 5/12: Implementation audit: exact, modified, similar or pending

PROPOSAL -> LATER INSTRUMENT -> WORDING -> LEGAL EFFECT -> VERDICT

10% ministry ceiling

-> 91st Amendment (2003) uses 15% -> modified related reform, not exact adoption.

judicial commission

-> NJAC enacted 2014, invalidated 2015 -> not current NCRWC design.

party law + narrow whip

-> no comprehensive enactment -> substantially pending.

disaster to Concurrent List

-> Disaster Management Act 2005, no List transfer -> statutory response, not adoption.

RULE

chronology + similarity != proven implementation.

ASCII MASTER FLOW - PANEL 6/12: Accountability, federalism and legislative practice

ACCOUNTABILITY

elections | confidence | committees | CAG | transparency | reasons | judicial review.

LEGISLATURE

sitting time -> scrutiny -> delegated law -> opposition -> financial control.

FEDERAL PRACTICE

consultation -> councils -> Governor restraint -> floor test -> negotiated implementation.

S.R. Bommai (1994) -> federal and secular structural enforcement.

TRAP

majority strength or coalition form does not itself prove good constitutional working.

CLOSE DISTINCTION: Separate constitutional text, institutional capacity, conventions, party practice, federal trust, rights outcomes and effective remedies.

ASCII MASTER FLOW - PANEL 7/12: Constitutional morality and rights enforcement

CONSTITUTIONAL MORALITY

text + procedure + equal citizenship + institutional role restraint.

K.S. Puttaswamy (2017)

privacy + dignity in modern governance.

Navtej Singh Johar v. Union of India (2018)

constitutional morality + transformative rights.

RIGHTS WORKING

guarantee -> institution -> affordable remedy -> compliance -> public justification.

LIMIT

morality is not personal preference; later cases are not NCRWC implementation evidence.

ASCII MASTER FLOW - PANEL 8/12: Reform-method ladder and feasibility test

DIAGNOSE

text gap? convention failure? capacity deficit? incentive failure? remedy gap?

|

+++ practice/convention repair
+++ executive rule or capacity
+++ ordinary legislation
+++ Article 368 amendment

|

v

TEST

basic structure + rights + federalism + democratic legitimacy
+ finance + implementation + review.

VERDICT

use the least legally sufficient and institutionally workable route.

ASCII MASTER FLOW - PANEL 9/12: Verified provenance and eleven-member composition

22 FEBRUARY 2000

Government resolution constitutes NCRWC.

|

v

CHAIR + INITIAL MEMBERSHIP

M.N. Venkatachaliah + ten members = eleven; P.A. Sangma later resigned.
Secretary Raghbir Singh was not a Commission member.

|

v

11 MARCH 2002

Report adopted and signed.

|

v

31 MARCH 2002

Report presented to the Prime Minister.

VERDICT

Executive origin + expert composition produced advice, not constituent authority.

ASCII MASTER FLOW - PANEL 10/12: Recommendation metrics and exact high-yield proposals

249 RECOMMENDATIONS

58 constitutional amendment | 86 legislation | 105 executive action.

LEGISLATURE

LS 120 days | RS 100 | State Houses 90 or 50.

GOVERNMENT

constructive no-confidence | 20% notice | alternative leader | 10% ministry ceiling.

JUDICIARY / FEDERALISM

HC age 65 | SC age 68 | Governor about 6 months | President about 3 months.

RULE

Each number is a report proposal unless a later legal instrument is separately proved.

ASCII MASTER FLOW - PANEL 11/12: Performance dashboard and executable answer audit

PERFORMANCE DASHBOARD

Legislature -> sittings + scrutiny + finance + debate.
Executive -> responsibility + legality + transparency + delivery.
Judiciary -> access + independence + pendency + accountability.
Federalism -> consultation + fiscal trust + restraint + dispute resolution.
Local government -> functions + funds + functionaries.
Rights -> affordable remedy + compliance + equal citizenship.

ANSWER EXECUTION

identify demand -> recommendation -> route -> current status -> feasibility -> graded verdict.

ASCII MASTER FLOW - PANEL 12/12: UPSC synthesis: commission report to constitutional answer

PRELIMS FIREWALL

2000 resolution | Venkatachaliah | 11 members | 2002 report
| advisory | review, not rewrite | recommendations, not law.

MAINS SPINE

identity -> mandate -> working beyond text -> recommendation clusters
-> implementation audit -> morality/accountability/federal practice -> reform ladder.

PYQ ROUTE

constitutional morality | electoral reform | judicial accountability | basic structure.

CONCLUSION

NCRWC is a diagnostic reform menu subject to constitutional route and present-law verification.

CURRENT CONTROL: 5 SEPTEMBER 2026

The official NCRWC report remains advisory. A later amendment, Act, rule, judgment or executive instrument must independently prove law; similarity and chronology do not prove implementation.

LEGAL/SOURCE LIMIT: The official NCRWC report remains advisory; resemblance, chronology or shared policy language does not prove implementation or causation.
