Marxism and Neo-Marxism - Complete Topic Package

Subject: Political Theory **Section:** Subject-wide Syllabus **Generation:** learner-v2:g4 **Ownership:** supplementary conceptual support; no synthetic GS or Optional PYQ ownership is created. **Source policy:** complete Basic owner first; optional Advanced depth only after practice.

DEEP-REVIEW LEARNING CONTRACT

- **Learning goal:** move from an easy visual map through these ten stages: Marxism, Scientific Socialism and Core Vocabulary; The Classical Marxist Argument and Essential Distinctions; Thinkers, Illustrations and the Three-Strand Matrix; Ownership Boundaries and UPSC Trap Repair; Historical Materialism Without Mechanical Determinism; Class, State, Exploitation and Alienation; Gramsci and the Frankfurt School; Althusser, Dependency Theory and Classification Cautions; Objections, Qualified Thesis, Evidence and Doctrine Architecture; Indian Application, Mark-Scaled Answers and Proposition Discipline.
- **Syllabus boundary:** this package supplies Political Theory concepts and cross-applies only verified Philosophy Optional PYQs with their primary ownership preserved; constitutional, institutional and current-policy detail remains with its direct repository owner.
- **Answer-grabbing opening:** Marxism and Neo-Marxism should be introduced through its controlling political question, not through biography or a dictionary list.
- **Transition rule:** define the concept -> name the thinker or evidence -> explain the political mechanism -> test the strongest objection -> qualify the verdict.
- **Conclusion rule:** answer the directive directly and state the remaining limit; do not end with an unqualified slogan.

BASIC LEARNING SESSION

SESSION 1 - Marxism, Scientific Socialism and Core Vocabulary

Subject: Political Theory | **Tier:** Must-Do (foundation) | **GS/Optional relevance:** GS-II (Polity & Governance) conceptual foundation; PSIR Optional Paper-1 background. **Core area:** Classical Marxism as a critique of capitalism, and neo-Marxism as its later extension into culture, ideology and new forms of domination. **Grounded in:** O. P. Gauba, *An Introduction to Political Theory*, Fifth Edition (2009), Ch.2, PDF pp.46-54. **Source edition/cutoff:** Fifth Edition (2009); no post-2009 fact is assumed unless independently dated and tagged CURRENT:. **FACT:** = source-grounded | **ANALYSIS:** = analytical inference/synthesis | **CURRENT:** = dated current anchor | **WRONG:** = trap/misattribution. *Companion:* Political-Theory/advanced/04_Marxism-and-Neo-Marxism.md.

1. One-screen conceptual map

capitalist exploitation
->
scientific socialism
->
dialectical materialism + historical materialism
->
mode of production = forces of production + relations of production
->
base <-> superstructure
->
class conflict
->
surplus value as economic exploitation
->
socialist transition -> classless society
->
neo-Marxist extension: ideology, culture, alienation, technological domination

- **FACT:** Gauba presents classical Marxism through four main tenets: dialectical materialism, historical materialism, class conflict and surplus value. (PDF p.48, p.52)

- ANALYSIS: For UPSC purposes, the topic moves from economy-centred critique to a wider analysis of ideology, culture and domination.

2. Why this topic matters

- FACT: Marxism explains why formal legal equality can coexist with deep economic inequality under capitalism. (PDF pp.46-47)
- FACT: Neo-Marxism shows why domination cannot be reduced only to factory ownership; culture, communication and ideology also matter. (PDF pp.53-54)
- ANALYSIS: This file gives the conceptual base for later debates on hegemony, justice, the state and revolutionary social change.

3. Essential definitions

- FACT: **Marxism**: a set of political and economic principles founded by Marx and Engels to give socialism a scientific basis through historical analysis of conflict between antagonistic classes. (PDF p.47)
- FACT: **Classical Marxism**: the original scientific system centred on property, class division, contradiction and revolutionary transformation. (PDF p.47)
- FACT: **Neo-Marxism**: later Marxist thought that studies subtler forms of dominance, alienation and paths to human emancipation. (PDF p.47, p.53)
- FACT: **Dialectical materialism**: the view that matter, not idea, is fundamental, and that contradictions in material conditions drive development. (PDF p.48)
- FACT: **Historical materialism**: the claim that economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life. (PDF p.48)
- FACT: **Surplus value**: the unpaid part of labour appropriated by the capitalist as profit, rent and interest. (PDF pp.52-53)

SESSION 2 - The Classical Marxist Argument and Essential Distinctions

4. Core argument / chapter spine

- FACT: Gauba begins with capitalism's oppressive conditions and presents Marxism as a response to the failure of laissez-faire liberalism to deliver real human freedom. (PDF pp.46-47)
- FACT: Marxism argues that private property in the means of production divides society into dominant and dependent classes with antagonistic interests. (PDF p.47)
- FACT: The mode of production shapes the social structure; when productive forces clash with existing relations of production, revolution replaces one social formation with another. (PDF pp.48-50)
- FACT: Class struggle continues from slave society to feudalism to capitalism, and Marxism expects a socialist revolution to end this cycle in a classless society. (PDF pp.49-52)
- FACT: Neo-Marxism reopens Marxism by focusing on alienation, ideology, technological domination and the relative autonomy of superstructural factors. (PDF pp.53-54)

5. Essential distinctions

- FACT: **Dialectical materialism vs historical materialism**: the first is the philosophical basis; the second is the scientific-historical application to society. (PDF p.48)
- FACT: **Base vs superstructure**: base refers to the mode of production; superstructure includes law, politics, religion, morals, art and culture. (PDF p.48)
- FACT: **Forces of production vs relations of production**: forces include means of production plus labour power; relations concern ownership patterns and class relations. (PDF pp.48-49)
- FACT: **Classical Marxism vs neo-Marxism**: classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination. (PDF pp.47, 53-54)
- WRONG: **Base determines superstructure mechanically**: Gauba explicitly notes that later Marxist debate recognizes interdependence between base and superstructure. (PDF p.53)

SESSION 3 - Thinkers, Illustrations and the Three-Strand Matrix

6. Thinkers and positions

- FACT: **Marx and Engels**: founders of Marxism and scientific socialism; they treat history as struggle rooted in the mode of production. (PDF p.47)
- FACT: **Lenin, Rosa Luxemburg and Mao Zedong**: Gauba lists them among chief exponents of classical Marxism. (PDF p.47)
- FACT: **Young Marx**: Gauba highlights the early humanist Marx on alienation, freedom and capitalism's dehumanizing effects. (PDF p.47)
- FACT: **Frankfurt School**: Adorno, Horkheimer, Marcuse and Habermas extend Marxism through critical theory and ideology critique. (PDF p.53)
- FACT: **Herbert Marcuse**: argues that advanced bourgeois society reduces human beings to one-dimensionality by anaesthetizing discontent through manipulated desires. (PDF p.54)
- FACT: **Louis Althusser**: represents the scientific strain of neo-Marxism focused on structures and modes of production. (PDF p.54)

7. Illustrative examples

- FACT: Gauba's stage-chart example shows how different modes of production generate different social formations: slave-owning, feudal, capitalist, socialist and communist. (PDF pp.49-50)
- FACT: The wage relation illustrates surplus value: the worker produces more value than is returned as subsistence wages, and the unpaid residue becomes capitalist profit. (PDF pp.52-53)
- FACT: Neo-Marxist cultural critique treats communication and consumer desire as sites of domination, not merely reflections of factory ownership. (PDF pp.53-54)
- ANALYSIS: For answer-writing, a safe illustration is to compare direct workplace exploitation with indirect ideological consent produced through culture and media.

8. Comparison table

Dimension	Classical Marxism	Neo-Marxism
Core focus	FACT: Property, class division and revolutionary transformation of capitalism. (PDF p.47)	FACT: Ideology, alienation, culture and subtle domination. (PDF pp.53-54)
Human problem	FACT: Exploitation rooted in ownership of means of production. (PDF p.47)	FACT: Distorted consciousness and managed unfreedom in advanced society. (PDF pp.53-54)
Method	FACT: Historical materialism and class struggle. (PDF pp.48-52)	FACT: Critical theory, humanist critique, structural analysis. (PDF pp.53-54)
Base-superstructure view	FACT: Base-centred explanation. (PDF p.48)	FACT: Relative interdependence between base and superstructure. (PDF p.53)
Key names	FACT: Marx, Engels, Lenin, Luxemburg, Mao. (PDF p.47)	FACT: Frankfurt School, Marcuse, Althusser, dependency theorists. (PDF pp.53-54)

SESSION 4 - Ownership Boundaries and UPSC Trap Repair

9. UPSC traps and corrections

- WRONG: **Marx simply said thesis-antithesis-synthesis.** -> ANALYSIS: That triadic language is a teaching shorthand drawn from Gauba's discussion of Hegel's dialectic; do not present it as Marx's own settled formula. (PDF p.48)
- WRONG: **Historical materialism means economics alone explains everything.** -> FACT: Gauba's neo-Marxist section explicitly notes growing recognition of interdependence between base and superstructure. (PDF p.53)
- WRONG: **Neo-Marxism abandons Marxism.** -> FACT: Gauba presents it as a development within Marxism, especially around alienation, ideology and emancipation. (PDF pp.47, 53-54)

- **WRONG: Surplus value means any profit whatsoever is automatically identical with market price movement.** -> **FACT:** Gauba defines it as the unpaid part of labour appropriated by the capitalist, not simply any change in sale price. (PDF pp.52-53)

10. Cross-links and boundaries

- **FACT:** Neo-Marxist departures (Gramsci, Frankfurt School with the Habermas generation caveat, Althusser, dependency theory) are reconstructed independently in §14 of this file, so this Basic file is self-sufficient for an unfamiliar 10/15/20-mark question. Read the deeper companion at `Political-Theory/advanced/04_Marxism-and-Neo-Marxism.md` only for optional further depth (extra comparative matrices and answer-engine prompts).
- **FACT:** Use `Political-Theory/00_Master-Framework.md` for the ideology matrix and the anti-caricature note on Marx.
- **FACT:** Use `Political-Theory/README.md` for the topic-map links to power/hegemony, justice and social change inside this module.
- **FACT:** Topic-map continuities especially matter with `Political-Theory/basic/15_Power-Authority-and-Legitimacy.md` on hegemony, `Political-Theory/basic/19_Justice-Concepts-and-Dimensions.md` and `Political-Theory/basic/20_Diverse-Perspectives-on-Justice.md` on justice, and `Political-Theory/basic/23_Contemporary-Democracy-Social-Change-and-Development.md` on revolutionary social change.
- **FACT:** For parallel Philosophy-optional reinforcement, see `Philosophy/paper-2/socio-political/Political-Ideologies.md`.

SESSION 5 - Historical Materialism Without Mechanical Determinism

11. Revision capsule / answer spine

- **FACT:** Start with Marxism as scientific socialism responding to capitalist exploitation. (PDF pp.46-47)
- **FACT:** Define dialectical materialism and historical materialism separately. (PDF p.48)
- **FACT:** Explain base, superstructure, forces of production and relations of production clearly. (PDF pp.48-49)
- **FACT:** Show class struggle across historical stages and end with proletarian revolution. (PDF pp.49-52)
- **FACT:** Add surplus value as the economic mechanism of exploitation. (PDF pp.52-53)
- **FACT:** Conclude with neo-Marxism: interdependence, ideology critique, alienation, one-dimensionality and structural analysis. (PDF pp.53-54)

12. The materialist mechanism: forces/relations, fetter/rupture, non-mechanical base-superstructure

- **FACT: Historical materialism restated as a mechanism:** economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life (Gauba, PDF p.48).
- **FACT: Mode of production:** forces of production (means of production plus labour power/technique) combine with relations of production (ownership patterns and class relations) to form the economic base (Gauba, PDF pp.48-49).
- **FACT: Fetter/rupture mechanism:** when the forces of production (technique, productive capacity) develop beyond what the existing relations of production (ownership patterns) can accommodate, the relations become a fetter on further development; revolution breaks that fetter and replaces one social formation with another across the stage-sequence slave-owning -> feudal -> capitalist -> socialist/communist (Gauba, PDF p.49).
- **FACT: Base-superstructure - non-mechanical:** the base is the mode of production; the superstructure is law, politics, religion, morals, art and culture. Gauba's own neo-Marxist section explicitly records growing recognition of interdependence between base and superstructure, rejecting a crude, one-way, mechanical determination of the superstructure by the base (Gauba, PDF pp.48, 53).

SESSION 6 - Class, State, Exploitation and Alienation

13. Class, state and alienation, tied together

- FACT: **Class**: private property in the means of production divides society into dominant (owning) and dependent classes with antagonistic interests, driving conflict across historical stages toward an expected socialist/classless resolution (Gaub, PDF pp.47, 49-52).
- ANALYSIS: **State (cross-referenced, not duplicated)**: within this same base/class framework, Marx and Engels are shown elsewhere in this knowledge base tracing political power to economic power rooted in ownership of the means of production and class domination (Gaub, PDF pp.308-309, via [Political-Theory/basic/15_Power-Authority-and-Legitimacy.md](#)) - i.e. on the classical-Marxist reading the state is not a neutral referee above classes but an instrument helping the economically dominant class secure and reproduce its position.
- FACT: **Alienation**: the "Young Marx"/humanist strain of neo-Marxism centres on alienation, freedom and capitalism's dehumanizing effects on the worker (Gaub, PDF p.47). The mechanism: wage-labour separates the worker from the product of labour and from the labour process itself, and, in humanist readings, from a fully developed human nature and from fellow workers - a separation that operates even before any single surplus-value calculation is made.
- ANALYSIS: Read together: exploitation (surplus value), domination (state as class instrument) and dehumanization (alienation) are three faces of the same underlying property relation, not three unrelated Marxist claims - a strong answer connects them rather than listing them separately.

SESSION 7 - Gramsci and the Frankfurt School

14. Neo-Marxist departures, reconstructed in full

14.1 Gramsci

- FACT: Antonio Gramsci - cross-referenced from Gaub's treatment of hegemony in the power/authority chapter (Gaub, PDF pp.306, 309-311), rather than from the Marxism chapter's own PDF pp.46-54 range - adds hegemony, civil society and structures of legitimation to explain why capitalist rule survives through consent as well as coercion: capitalist class power is secured not only through the coercive state but through cultural and ideological leadership exercised in civil society.
- ANALYSIS: This is a genuine neo-Marxist departure: Gramsci gives relative autonomy to the superstructure (culture, ideas, civil-society institutions) rather than treating it as simply base-determined, extending the non-mechanical base-superstructure point of §12.

14.2 Frankfurt School, with a Habermas generation caveat

- FACT: Adorno, Horkheimer, Marcuse and Habermas are named together by Gaub as extending Marxism through critical theory and ideology critique (Gaub, PDF p.53).
- ANALYSIS: **Habermas generation caveat**: Gaub's own list groups Habermas together with Adorno, Horkheimer and Marcuse without specifying generational sequence. In standard intellectual history the Frankfurt School is usually read across at least two generations - Adorno, Horkheimer and Marcuse as the founding/first generation, and Habermas as belonging to a later generation who reworked critical theory (for example, toward theories of communicative rationality) rather than simply repeating the first generation's positions. This generational distinction is flagged ANALYSIS: because it is standard scholarly framing, not independently confirmed against the specific Gaub page used here - do not attach a specific book title or year to Habermas's own work on this basis.

SESSION 8 - Althusser, Dependency Theory and Classification Cautions

14.3 Althusser

- FACT: Louis Althusser represents the "scientific" strain of neo-Marxism, resisting a purely humanist Marxism and insisting on analysing deep social structures, especially modes of production, rather than centring alienation and consciousness (Gaub, PDF p.54).

14.4 Dependency theory vs world-systems theory (classification caution)

- FACT: Gauba's own text names "dependency theorists" as extending the axis of Marxist struggle from domestic class conflict to developing nations confronting colonialism and neo-colonialism (Gaub, PDF p.54).
- ANALYSIS: **Classification caution:** dependency theory (broadly, analysis of the structural economic dependence of "periphery" states on "core" industrial economies) and world-systems theory (a related but distinct framework analysing one integrated global economic hierarchy of core, periphery and semi-periphery zones across long historical time) are related but not identical bodies of theory. Gauba's own text uses only the narrower "dependency theorists" label, so this file does not attribute a world-systems framework, a specific named theorist, or any book title/year to Gauba's own text here - the distinction above is offered only as an analytical caution against treating "dependency" and "world-system" as simple synonyms.

SESSION 9 - Objections, Qualified Thesis, Evidence and Doctrine Architecture

15. Objection -> reply chains

- ANALYSIS: **Chain 1 - Objection:** "Historical materialism means economics alone explains everything, so law, religion and culture are just decoration." **Reply:** Gauba's own neo-Marxist section explicitly records growing recognition of interdependence between base and superstructure (Gaub, PDF p.53), and Gramsci's hegemony (§14.1) shows culture and civil society doing real, relatively autonomous work in reproducing class rule, not merely reflecting it.
- ANALYSIS: **Chain 2 - Objection:** "The base mechanically and automatically dictates the superstructure, so once you know a society's economy you can simply read off its politics, law and culture." **Reply:** Gauba explicitly rejects the mechanical, one-way reading (Gaub, PDF p.53); Althusser's structural analysis (§14.3) and Gramsci's civil-society hegemony (§14.1) both work by giving the superstructure real causal weight rather than treating it as merely passive.
- ANALYSIS: **Chain 3 - Objection:** "Neo-Marxism abandoned Marxism because it stopped talking only about factories and wages." **Reply:** Gauba presents neo-Marxism as a development within Marxism, especially around alienation, ideology and emancipation, not a rejection of it (Gaub, PDF pp.47, 53-54).

16. Qualified answer thesis and directive-specific decoding

- ANALYSIS: **Qualified thesis formula for this topic:** "Marxism explains political and social life through the materialist mechanism of forces/relations of production and class conflict, but classical Marxism's own base-superstructure claim is not mechanical, and neo-Marxist departures - Gramsci, the Frankfurt School, Althusser and dependency theory - extend rather than abandon this mechanism by giving ideology, culture and international structure their own causal weight." Adapt this sentence to the directive word.
- ANALYSIS: **Directive decoding table:**

Directive	What it demands here	Trap to avoid
"Explain"	Walk through the premises -> mechanism -> conclusion spine (§17) with the fetter/rupture detail (§12).	Listing definitions without the causal mechanism.
"Distinguish"	Separate classical Marxism's economic mechanism from each neo-Marxist departure (§14.1-14.4).	Treating "neo-Marxism" as one undifferentiated add-on.
"Critically examine"/"Critically analyse"	Test the "economism" charge against Gramsci/Althusser's superstructural correctives (§15, Chains 1-2).	Presenting classical Marxism as either purely deterministic or purely refuted.
"Trace"	Follow the stage-sequence (slave -> feudal -> capitalist -> socialist) through the fetter/rupture mechanism (§12).	Skipping the mechanism and merely naming the stages.
Mark-weight cue (10/15/20)	Scale the number of thinkers and depth of objection-reply chain (§20).	Writing a 20-mark-depth answer in 10-mark space or vice versa.

17. Doctrine architecture: premises, mechanism, conclusion

- FACT: **Premises:** (a) private property in the means of production divides society into antagonistic classes (Gaub, PDF p.47); (b) the mode of production - forces plus relations of production - forms the base, shaping law, politics and culture as superstructure (Gaub, PDF p.48); (c) productive forces and relations of production can come into conflict (Gaub, PDF p.49).
- FACT: **Mechanism:** when forces of production outgrow existing relations of production, the relations become a fetter that is broken by revolution, producing a new social formation (§12); this economic-class mechanism operates through and is reproduced by state power as a class instrument (§13) and is experienced by individuals as alienation (§13). Neo-Marxists (§14) extend the mechanism by adding culture/hegemony (Gramsci), critical theory (Frankfurt School), structural analysis (Althusser) and international core-periphery relations (dependency theory) as additional - not substitute - sites where the same underlying property-based conflict is reproduced or contested.
- FACT: **Conclusion:** Marxism's exam-safe verdict is that it remains a powerful structural theory of exploitation and domination, strengthened rather than refuted by its own neo-Marxist extensions, though it is weakened when reduced to a single social cleavage or to mechanical economic determinism.

18. Reusable named evidence units

- FACT: **Unit 1 - Claim:** private property in the means of production creates antagonistic classes -> **Named:** Marx and Engels -> **Significance:** the foundational mechanism of exploitation and historical change (Gaub, PDF p.47) -> **Limitation:** needs the fetter/rupture mechanism (§12) to explain when revolution occurs, not merely that classes conflict.
- FACT: **Unit 2 - Claim:** productive forces outgrowing relations of production break the "fetter" through revolution -> **Named/mechanism:** historical materialism's forces/relations distinction -> **Significance:** gives Marxism a testable-looking mechanism for historical change across slave/feudal/capitalist stages (Gaub, PDF pp.48-50) -> **Limitation:** the actual timing, agency and contingency of real revolutions have not matched this schema neatly - a standard criticism of deterministic readings.
- FACT: **Unit 3 - Claim:** capitalist rule survives through cultural/ideological consent, not coercion alone -> **Named:** Antonio Gramsci -> **Significance:** explains the apparent stability of capitalist societies without abandoning class analysis (Gaub, PDF pp.306, 309-311) -> **Limitation:** risks becoming so broad ("hegemony explains everything") that it loses analytical precision unless tied to specific institutions and mechanisms.
- FACT: **Unit 4 - Claim:** advanced bourgeois society manipulates communication and trivial desire, producing one-dimensional, pacified humanity -> **Named:** Herbert Marcuse -> **Significance:** extends domination from the factory into culture and consumption (Gaub, PDF p.54) -> **Limitation:** can understate the continuing importance of direct economic exploitation and material class interest.
- FACT: **Unit 5 - Claim:** Marxist analysis must attend to deep structures (modes of production), not only humanist categories like alienation -> **Named:** Louis Althusser -> **Significance:** supplies the "scientific" corrective within

neo-Marxism, balancing Marcuse/Young-Marx humanism (Gauba, PDF p.54) -> **Limitation:** can drain agency and consciousness out of political analysis if pushed to a purely structural extreme.

- **FACT: Unit 6 - Claim:** the axis of domination can extend from domestic class conflict to international core-periphery relations -> **Named:** dependency theorists (Gauba's own compressed label) -> **Significance:** lets Marxist logic be applied to global development and post-colonial inequality (Gauba, PDF p.54) -> **Limitation:** must not be conflated with the distinct world-systems framework without further verification (§14.4).

SESSION 10 - Indian Application, Mark-Scaled Answers and Proposition Discipline

19. Indian conceptual anchor (no Polity/Economy fact-ownership claimed)

- **ANALYSIS:** This file does not hold specific Indian policy data, scheme names or GDP/trade figures; for those use the dedicated Polity, Economy and International-Relations knowledge files. What follows is a conceptual application lens only.
- **ANALYSIS:** When an Indian policy debate is framed only as a technical/administrative matter, the non-mechanical base-superstructure relation (§12) and Gramscian hegemony (§14.1) together supply the question of whether an apparently neutral legal or administrative arrangement is doing quiet work to protect an existing economic arrangement - to be paired with the candidate's own independently verified Polity/Economy facts, not asserted here.
- **ANALYSIS:** When discussing regional or global economic inequality involving India, the dependency-theory extension (§14.4, §18 Unit 6) supplies a conceptual lens (structural core-periphery dependence) that the candidate should combine with their own verified Economy/International-Relations facts about India's specific trade, investment or development-finance position, not with any figure asserted in this file.

20. 10/15/20-mark executable answer architecture

10-mark (~150 words): (1) one-line qualified thesis (§16); (2) state the fetter/rupture mechanism (§12) in one sentence; (3) one named-evidence unit each for classical Marxism and one neo-Marxist departure (§18); (4) one-line verdict - extension, not refutation.

15-mark (~200-250 words): (1) qualified thesis; (2) compressed premises -> mechanism -> conclusion spine (§17); (3) two to three named-evidence units (§18) spanning classical Marxism and at least one neo-Marxist departure; (4) one objection -> reply chain (§15); (5) verdict on economism versus a layered model of domination.

20-mark (~250-300 words): (1) qualified thesis with directive fidelity; (2) full premises -> mechanism -> conclusion spine; (3) four to five named-evidence units (§18) spanning Marx/Engels, the forces/relations mechanism, Gramsci, Marcuse and Althusser; (4) both objection -> reply chains (§15); (5) the Indian conceptual application (§19) as clearly-tagged **ANALYSIS:** value-addition; (6) a reasoned verdict distinguishing mechanical economic determinism (rejected) from a structurally grounded, culturally extended Marxism (retained).

21. Quotation, proposition-handling and fact/provenance caution

- **WRONG:** Do not present any sentence in this file as a verbatim quotation from Marx, Engels, Gramsci, Adorno, Horkheimer, Marcuse, Habermas or Althusser unless it is already inside quotation marks in the source text used to build this file; treat all unquoted reconstructions as paraphrase.
- **ANALYSIS:** The Habermas generation caveat (§14.2) and the dependency/world-systems classification caution (§14.4) are flagged **ANALYSIS:** specifically because they are standard scholarly clarifications, not independently page-anchored against the Marxism chapter's own PDF pp.46-54 range; do not upgrade them to **FACT:** status or attach a specific book title/year/page without independent verification.
- **ANALYSIS:** The Gramsci citation in §14.1 and §18 (Unit 3) is drawn from Gauba's power/authority chapter (PDF pp.306, 309-311), not from the Marxism chapter's own page range - this cross-chapter provenance is stated explicitly so it is never mistaken for a Marxism-chapter citation.
- **ANALYSIS:** If an exam question supplies an unfamiliar quotation attributed to any thinker in this file, do not fabricate a specific book, edition, year or page for it. Decode the proposition first - identify its claim and which mechanism or departure (§12-14) it echoes - then answer using that analysis, explicitly noting that the quotation's exact provenance is not independently verified here.

- WRONG: Never invent a publication year, edition number or page number for a thinker's work that is not already anchored in this file or its advanced companion.

22. Sources, metadata and tags

- FACT: Primary source used directly: O. P. Gauba, *An Introduction to Political Theory*, Fifth Edition (2009), Ch.2, PDF pp.46-54, with a cross-chapter Gramsci anchor at PDF pp.306, 309-311 (power/authority chapter).
- FACT: Key citation anchors used here: Marxism and classical/neo distinction (PDF p.47); main tenets, base-superstructure, forces/relations and class stages (PDF pp.48-52); neo-Marxism, Frankfurt School and Marcuse/Althusser/dependency theorists (PDF pp.53-54); Gramsci on hegemony and civil society (PDF pp.306, 309-311).
- FACT: Companion file (optional further depth, not required for marks-adequacy): Political-Theory/advanced/04_Marxism-and-Neo-Marxism.md.
- ANALYSIS: Tags: #PoliticalTheory #Ideology #Marxism #NeoMarxism #ClassConflict #SurplusValue #Gramsci #Hegemony #Alienation #DependencyTheory.

BASIC MCQS / REMEDIATION

MCQ 1

Which option is the exact canonical pairing recorded for **Marxism**? Other options belong to different named entries.

- A. a set of political and economic principles founded by Marx and Engels to give socialism a scientific basis through historical analysis of conflict between antagonistic classes.
- B. the unpaid part of labour appropriated by the capitalist as profit, rent and interest.
- C. Gauba explicitly notes that later Marxist debate recognizes interdependence between base and superstructure.
- D. argues that advanced bourgeois society reduces human beings to one-dimensionality by anaesthetizing discontent through manipulated desires.

Answer: A

Explanation: The canonical Basic owner pairs **Marxism** with **a set of political and economic principles founded by Marx and Engels to give socialism a scientific basis through historical analysis of conflict between antagonistic classes**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 2

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **a set of political and economic principles founded by Marx and Engels to give socialism a scientific basis through historical analysis of conflict between antagonistic classes**.

- A. Louis Althusser
- B. Marxism
- C. Historical materialism restated as a mechanism
- D. Neo-Marxism

Answer: B

Explanation: The canonical Basic owner pairs **a set of political and economic principles founded by Marx and Engels to give socialism a scientific basis through historical analysis of conflict between antagonistic classes** with **Marxism**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 3

Which option is the exact canonical pairing recorded for **Classical Marxism**? Other options belong to different named entries.

- A. the first is the philosophical basis; the second is the scientific-historical application to society.
- B. economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life (Gaub, PDF p.48).
- C. the original scientific system centred on property, class division, contradiction and revolutionary transformation.
- D. later Marxist thought that studies subtler forms of dominance, alienation and paths to human emancipation.

Answer: C

Explanation: The canonical Basic owner pairs **Classical Marxism** with **the original scientific system centred on property, class division, contradiction and revolutionary transformation**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 4

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **the original scientific system centred on property, class division, contradiction and revolutionary transformation**.

- A. Core focus
- B. Mode of production
- C. Dialectical materialism
- D. Classical Marxism

Answer: D

Explanation: The canonical Basic owner pairs **the original scientific system centred on property, class division, contradiction and revolutionary transformation** with **Classical Marxism**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 5

Which option is the exact canonical pairing recorded for **Neo-Marxism**? Other options belong to different named entries.

- A. later Marxist thought that studies subtler forms of dominance, alienation and paths to human emancipation.
- B. base refers to the mode of production; superstructure includes law, politics, religion, morals, art and culture.
- C. Property, class division and revolutionary transformation of capitalism.
- D. forces of production (means of production plus labour power/technique) combine with relations of production (ownership patterns and class relations) to form the economic base (Gaub, PDF pp.48-49).

Answer: A

Explanation: The canonical Basic owner pairs **Neo-Marxism** with **later Marxist thought that studies subtler forms of dominance, alienation and paths to human emancipation**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 6

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **later Marxist thought that studies subtler forms of dominance, alienation and paths to human emancipation.**

- A. Human problem
- B. Neo-Marxism
- C. Fetter/rupture mechanism
- D. Historical materialism

Answer: B

Explanation: The canonical Basic owner pairs **later Marxist thought that studies subtler forms of dominance, alienation and paths to human emancipation.** with **Neo-Marxism**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 7

Which option is the exact canonical pairing recorded for **Dialectical materialism**? Other options belong to different named entries.

- A. forces include means of production plus labour power; relations concern ownership patterns and class relations.
- B. Gauba highlights the early humanist Marx on alienation, freedom and capitalism's dehumanizing effects.
- C. the view that matter, not idea, is fundamental, and that contradictions in material conditions drive development.
- D. Exploitation rooted in ownership of means of production.

Answer: C

Explanation: The canonical Basic owner pairs **Dialectical materialism** with **the view that matter, not idea, is fundamental, and that contradictions in material conditions drive development.** The other options are valid source terms or statements, but belong to different pairings.

MCQ 8

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **the view that matter, not idea, is fundamental, and that contradictions in material conditions drive development.**

- A. Method
- B. Marxism
- C. Surplus value
- D. Dialectical materialism

Answer: D

Explanation: The canonical Basic owner pairs **the view that matter, not idea, is fundamental, and that contradictions in material conditions drive development.** with **Dialectical materialism**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 9

Which option is the exact canonical pairing recorded for **Historical materialism**? Other options belong to different named entries.

- A. the claim that economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life.
- B. classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination.
- C. Adorno, Horkheimer, Marcuse and Habermas extend Marxism through critical theory and ideology critique.
- D. the unpaid part of labour appropriated by the capitalist as profit, rent and interest.

Answer: A

Explanation: The canonical Basic owner pairs **Historical materialism** with **the claim that economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 10

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **the claim that economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life**.

- A. Key names
- B. Historical materialism
- C. Classical Marxism
- D. Dialectical materialism vs historical materialism

Answer: B

Explanation: The canonical Basic owner pairs **the claim that economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life** with **Historical materialism**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 11

Which option is the exact canonical pairing recorded for **Surplus value**? Other options belong to different named entries.

- A. Gauba explicitly notes that later Marxist debate recognizes interdependence between base and superstructure.
- B. argues that advanced bourgeois society reduces human beings to one-dimensionality by anaesthetizing discontent through manipulated desires.
- C. the unpaid part of labour appropriated by the capitalist as profit, rent and interest.
- D. Marx, Engels, Lenin, Luxemburg, Mao.

Answer: C

Explanation: The canonical Basic owner pairs **Surplus value** with **the unpaid part of labour appropriated by the capitalist as profit, rent and interest**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 12

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **the unpaid part of labour appropriated by the capitalist as profit, rent and interest.**

- A. Historical materialism restated as a mechanism
- B. Neo-Marxism
- C. Base vs superstructure
- D. Surplus value

Answer: D

Explanation: The canonical Basic owner pairs **the unpaid part of labour appropriated by the capitalist as profit, rent and interest.** with **Surplus value.** The other options are valid source terms or statements, but belong to different pairings.

MCQ 13

Which option is the exact canonical pairing recorded for **Dialectical materialism vs historical materialism**? Other options belong to different named entries.

- A. the first is the philosophical basis; the second is the scientific-historical application to society.
- B. founders of Marxism and scientific socialism; they treat history as struggle rooted in the mode of production.
- C. represents the scientific strain of neo-Marxism focused on structures and modes of production.
- D. economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life (Gaub, PDF p.48).

Answer: A

Explanation: The canonical Basic owner pairs **Dialectical materialism vs historical materialism** with **the first is the philosophical basis; the second is the scientific-historical application to society.** The other options are valid source terms or statements, but belong to different pairings.

MCQ 14

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **the first is the philosophical basis; the second is the scientific-historical application to society.**

- A. Mode of production
- B. Dialectical materialism vs historical materialism
- C. Dialectical materialism
- D. Forces of production vs relations of production

Answer: B

Explanation: The canonical Basic owner pairs **the first is the philosophical basis; the second is the scientific-historical application to society.** with **Dialectical materialism vs historical materialism.** The other options are valid source terms or statements, but belong to different pairings.

MCQ 15

Which option is the exact canonical pairing recorded for **Base vs superstructure**? Other options belong to different named entries.

- A. Gauba lists them among chief exponents of classical Marxism.
- B. Property, class division and revolutionary transformation of capitalism.
- C. base refers to the mode of production; superstructure includes law, politics, religion, morals, art and culture.
- D. the view that matter, not idea, is fundamental, and that contradictions in material conditions drive development.

Answer: C

Explanation: The canonical Basic owner pairs **Base vs superstructure** with **base refers to the mode of production; superstructure includes law, politics, religion, morals, art and culture**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 16

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **base refers to the mode of production; superstructure includes law, politics, religion, morals, art and culture**.

- A. Fetter/rupture mechanism
- B. Historical materialism
- C. Classical Marxism vs neo-Marxism
- D. Base vs superstructure

Answer: D

Explanation: The canonical Basic owner pairs **base refers to the mode of production; superstructure includes law, politics, religion, morals, art and culture** with **Base vs superstructure**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 17

Which option is the exact canonical pairing recorded for **Forces of production vs relations of production**? Other options belong to different named entries.

- A. forces include means of production plus labour power; relations concern ownership patterns and class relations.
- B. Gauba highlights the early humanist Marx on alienation, freedom and capitalism's dehumanizing effects.
- C. classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination.
- D. Adorno, Horkheimer, Marcuse and Habermas extend Marxism through critical theory and ideology critique.

Answer: A

Explanation: The canonical Basic owner pairs **Forces of production vs relations of production** with **forces include means of production plus labour power; relations concern ownership patterns and class relations**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 18

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **forces include means of production plus labour power; relations concern ownership patterns and class relations.**

- A. Marxism
- B. Forces of production vs relations of production
- C. Surplus value
- D. Base determines superstructure mechanically

Answer: B

Explanation: The canonical Basic owner pairs **forces include means of production plus labour power; relations concern ownership patterns and class relations.** with **Forces of production vs relations of production.** The other options are valid source terms or statements, but belong to different pairings.

MCQ 19

Which option is the exact canonical pairing recorded for **Classical Marxism vs neo-Marxism**? Other options belong to different named entries.

- A. Historical materialism and class struggle.
- B. a set of political and economic principles founded by Marx and Engels to give socialism a scientific basis through historical analysis of conflict between antagonistic classes.
- C. classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination.
- D. the unpaid part of labour appropriated by the capitalist as profit, rent and interest.

Answer: C

Explanation: The canonical Basic owner pairs **Classical Marxism vs neo-Marxism** with **classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination.** The other options are valid source terms or statements, but belong to different pairings.

MCQ 20

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination.**

- A. Classical Marxism
- B. Dialectical materialism vs historical materialism
- C. Marx and Engels
- D. Classical Marxism vs neo-Marxism

Answer: D

Explanation: The canonical Basic owner pairs **classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination.** with **Classical Marxism vs neo-Marxism.** The other options are valid source terms or statements, but belong to different pairings.

MCQ 21

Which option is the exact canonical pairing recorded for **Base determines superstructure mechanically**? Other options belong to different named entries.

- A. Gauba explicitly notes that later Marxist debate recognizes interdependence between base and superstructure.
- B. argues that advanced bourgeois society reduces human beings to one-dimensionality by anaesthetizing discontent through manipulated desires.
- C. Marx, Engels, Lenin, Luxemburg, Mao.
- D. the original scientific system centred on property, class division, contradiction and revolutionary transformation.

Answer: A

Explanation: The canonical Basic owner pairs **Base determines superstructure mechanically** with **Gauba explicitly notes that later Marxist debate recognizes interdependence between base and superstructure**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 22

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **Gauba explicitly notes that later Marxist debate recognizes interdependence between base and superstructure**.

- A. Neo-Marxism
- B. Base determines superstructure mechanically
- C. Base vs superstructure
- D. Lenin, Rosa Luxemburg and Mao Zedong

Answer: B

Explanation: The canonical Basic owner pairs **Gauba explicitly notes that later Marxist debate recognizes interdependence between base and superstructure** with **Base determines superstructure mechanically**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 23

Which option is the exact canonical pairing recorded for **Marx and Engels**? Other options belong to different named entries.

- A. represents the scientific strain of neo-Marxism focused on structures and modes of production.
- B. economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life (Gauba, PDF p.48).
- C. founders of Marxism and scientific socialism; they treat history as struggle rooted in the mode of production.
- D. later Marxist thought that studies subtler forms of dominance, alienation and paths to human emancipation.

Answer: C

Explanation: The canonical Basic owner pairs **Marx and Engels** with **founders of Marxism and scientific socialism; they treat history as struggle rooted in the mode of production**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 24

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **founders of Marxism and scientific socialism; they treat history as struggle rooted in the mode of production.**

- A. Dialectical materialism
- B. Forces of production vs relations of production
- C. Young Marx
- D. Marx and Engels

Answer: D

Explanation: The canonical Basic owner pairs **founders of Marxism and scientific socialism; they treat history as struggle rooted in the mode of production.** with **Marx and Engels**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 25

Which option is the exact canonical pairing recorded for **Lenin, Rosa Luxemburg and Mao Zedong**? Other options belong to different named entries.

- A. Gauba lists them among chief exponents of classical Marxism.
- B. Property, class division and revolutionary transformation of capitalism.
- C. forces of production (means of production plus labour power/technique) combine with relations of production (ownership patterns and class relations) to form the economic base (Gaub, PDF pp.48-49).
- D. the view that matter, not idea, is fundamental, and that contradictions in material conditions drive development.

Answer: A

Explanation: The canonical Basic owner pairs **Lenin, Rosa Luxemburg and Mao Zedong** with **Gaub lists them among chief exponents of classical Marxism**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 26

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **Gaub lists them among chief exponents of classical Marxism.**

- A. Historical materialism
- B. Lenin, Rosa Luxemburg and Mao Zedong
- C. Classical Marxism vs neo-Marxism
- D. Frankfurt School

Answer: B

Explanation: The canonical Basic owner pairs **Gaub lists them among chief exponents of classical Marxism.** with **Lenin, Rosa Luxemburg and Mao Zedong**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 27

Which option is the exact canonical pairing recorded for **Young Marx**? Other options belong to different named entries.

- A. Exploitation rooted in ownership of means of production.
- B. when the forces of production (technique, productive capacity) develop beyond what the existing relations of production (ownership patterns) can accommodate, the relations become a fetter on further development; revolution breaks that fetter and replaces one social formation with another across the stage-sequence slave-owning -> feudal -> capitalist -> socialist/communist (Gaub, PDF p.49).
- C. Gauba highlights the early humanist Marx on alienation, freedom and capitalism's dehumanizing effects.
- D. the claim that economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life.

Answer: C

Explanation: The canonical Basic owner pairs **Young Marx** with **Gaub highlights the early humanist Marx on alienation, freedom and capitalism's dehumanizing effects**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 28

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **Gaub highlights the early humanist Marx on alienation, freedom and capitalism's dehumanizing effects**.

- A. Surplus value
- B. Base determines superstructure mechanically
- C. Herbert Marcuse
- D. Young Marx

Answer: D

Explanation: The canonical Basic owner pairs **Gaub highlights the early humanist Marx on alienation, freedom and capitalism's dehumanizing effects** with **Young Marx**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 29

Which option is the exact canonical pairing recorded for **Frankfurt School**? Other options belong to different named entries.

- A. Adorno, Horkheimer, Marcuse and Habermas extend Marxism through critical theory and ideology critique.
- B. Historical materialism and class struggle.
- C. a set of political and economic principles founded by Marx and Engels to give socialism a scientific basis through historical analysis of conflict between antagonistic classes.
- D. the unpaid part of labour appropriated by the capitalist as profit, rent and interest.

Answer: A

Explanation: The canonical Basic owner pairs **Frankfurt School** with **Adorno, Horkheimer, Marcuse and Habermas extend Marxism through critical theory and ideology critique**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 30

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **Adorno, Horkheimer, Marcuse and Habermas extend Marxism through critical theory and ideology critique.**

- A. Dialectical materialism vs historical materialism
- B. Frankfurt School
- C. Marx and Engels
- D. Louis Althusser

Answer: B

Explanation: The canonical Basic owner pairs **Adorno, Horkheimer, Marcuse and Habermas extend Marxism through critical theory and ideology critique.** with **Frankfurt School**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 31

Which option is the exact canonical pairing recorded for **Herbert Marcuse**? Other options belong to different named entries.

- A. Marx, Engels, Lenin, Luxemburg, Mao.
- B. the original scientific system centred on property, class division, contradiction and revolutionary transformation.
- C. argues that advanced bourgeois society reduces human beings to one-dimensionality by anaesthetizing discontent through manipulated desires.
- D. the first is the philosophical basis; the second is the scientific-historical application to society.

Answer: C

Explanation: The canonical Basic owner pairs **Herbert Marcuse** with **argues that advanced bourgeois society reduces human beings to one-dimensionality by anaesthetizing discontent through manipulated desires**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 32

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **argues that advanced bourgeois society reduces human beings to one-dimensionality by anaesthetizing discontent through manipulated desires.**

- A. Base vs superstructure
- B. Lenin, Rosa Luxemburg and Mao Zedong
- C. Core focus
- D. Herbert Marcuse

Answer: D

Explanation: The canonical Basic owner pairs **argues that advanced bourgeois society reduces human beings to one-dimensionality by anaesthetizing discontent through manipulated desires.** with **Herbert Marcuse**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 33

Which option is the exact canonical pairing recorded for **Louis Althusser**? Other options belong to different named entries.

- A. represents the scientific strain of neo-Marxism focused on structures and modes of production.
- B. economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life (Gaub, PDF p.48).
- C. later Marxist thought that studies subtler forms of dominance, alienation and paths to human emancipation.
- D. base refers to the mode of production; superstructure includes law, politics, religion, morals, art and culture.

Answer: A

Explanation: The canonical Basic owner pairs **Louis Althusser** with **represents the scientific strain of neo-Marxism focused on structures and modes of production**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 34

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **represents the scientific strain of neo-Marxism focused on structures and modes of production**.

- A. Forces of production vs relations of production
- B. Louis Althusser
- C. Young Marx
- D. Human problem

Answer: B

Explanation: The canonical Basic owner pairs **represents the scientific strain of neo-Marxism focused on structures and modes of production** with **Louis Althusser**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 35

Which option is the exact canonical pairing recorded for **Core focus**? Other options belong to different named entries.

- A. forces of production (means of production plus labour power/technique) combine with relations of production (ownership patterns and class relations) to form the economic base (Gaub, PDF pp.48-49).
- B. the view that matter, not idea, is fundamental, and that contradictions in material conditions drive development.
- C. Property, class division and revolutionary transformation of capitalism.
- D. forces include means of production plus labour power; relations concern ownership patterns and class relations.

Answer: C

Explanation: The canonical Basic owner pairs **Core focus** with **Property, class division and revolutionary transformation of capitalism**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 36

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **Property, class division and revolutionary transformation of capitalism.**

- A. Classical Marxism vs neo-Marxism
- B. Frankfurt School
- C. Method
- D. Core focus

Answer: D

Explanation: The canonical Basic owner pairs **Property, class division and revolutionary transformation of capitalism.** with **Core focus.** The other options are valid source terms or statements, but belong to different pairings.

MCQ 37

Which option is the exact canonical pairing recorded for **Human problem**? Other options belong to different named entries.

- A. Exploitation rooted in ownership of means of production.
- B. when the forces of production (technique, productive capacity) develop beyond what the existing relations of production (ownership patterns) can accommodate, the relations become a fetter on further development; revolution breaks that fetter and replaces one social formation with another across the stage-sequence slave-owning -> feudal -> capitalist -> socialist/communist (Gaub, PDF p.49).
- C. the claim that economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life.
- D. classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination.

Answer: A

Explanation: The canonical Basic owner pairs **Human problem** with **Exploitation rooted in ownership of means of production.** The other options are valid source terms or statements, but belong to different pairings.

MCQ 38

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **Exploitation rooted in ownership of means of production.**

- A. Base determines superstructure mechanically
- B. Human problem
- C. Herbert Marcuse
- D. Key names

Answer: B

Explanation: The canonical Basic owner pairs **Exploitation rooted in ownership of means of production.** with **Human problem.** The other options are valid source terms or statements, but belong to different pairings.

MCQ 39

Which option is the exact canonical pairing recorded for **Method**? Other options belong to different named entries.

- A. a set of political and economic principles founded by Marx and Engels to give socialism a scientific basis through historical analysis of conflict between antagonistic classes.
- B. the unpaid part of labour appropriated by the capitalist as profit, rent and interest.
- C. Historical materialism and class struggle.
- D. Gauba explicitly notes that later Marxist debate recognizes interdependence between base and superstructure.

Answer: C

Explanation: The canonical Basic owner pairs **Method** with **Historical materialism and class struggle**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 40

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **Historical materialism and class struggle**.

- A. Marx and Engels
- B. Louis Althusser
- C. Historical materialism restated as a mechanism
- D. Method

Answer: D

Explanation: The canonical Basic owner pairs **Historical materialism and class struggle** with **Method**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 41

Which option is the exact canonical pairing recorded for **Key names**? Other options belong to different named entries.

- A. Marx, Engels, Lenin, Luxemburg, Mao.
- B. the original scientific system centred on property, class division, contradiction and revolutionary transformation.
- C. the first is the philosophical basis; the second is the scientific-historical application to society.
- D. founders of Marxism and scientific socialism; they treat history as struggle rooted in the mode of production.

Answer: A

Explanation: The canonical Basic owner pairs **Key names** with **Marx, Engels, Lenin, Luxemburg, Mao**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 42

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **Marx, Engels, Lenin, Luxemburg, Mao.**

- A. Lenin, Rosa Luxemburg and Mao Zedong
- B. Key names
- C. Core focus
- D. Mode of production

Answer: B

Explanation: The canonical Basic owner pairs **Marx, Engels, Lenin, Luxemburg, Mao.** with **Key names**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 43

Which option is the exact canonical pairing recorded for **Historical materialism restated as a mechanism**? Other options belong to different named entries.

- A. later Marxist thought that studies subtler forms of dominance, alienation and paths to human emancipation.
- B. base refers to the mode of production; superstructure includes law, politics, religion, morals, art and culture.
- C. economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life (Gaub, PDF p.48).
- D. Gauba lists them among chief exponents of classical Marxism.

Answer: C

Explanation: The canonical Basic owner pairs **Historical materialism restated as a mechanism** with **economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life (Gaub, PDF p.48)**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 44

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life (Gaub, PDF p.48).**

- A. Young Marx
- B. Human problem
- C. Fetter/rupture mechanism
- D. Historical materialism restated as a mechanism

Answer: D

Explanation: The canonical Basic owner pairs **economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life (Gaub, PDF p.48)** with **Historical materialism restated as a mechanism**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 45

Which option is the exact canonical pairing recorded for **Mode of production**? Other options belong to different named entries.

- A. forces of production (means of production plus labour power/technique) combine with relations of production (ownership patterns and class relations) to form the economic base (Gaub, PDF pp.48-49).
- B. the view that matter, not idea, is fundamental, and that contradictions in material conditions drive development.
- C. Gauba highlights the early humanist Marx on alienation, freedom and capitalism's dehumanizing effects.
- D. classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination.

Answer: A

Explanation: The canonical Basic owner pairs **Mode of production** with **forces of production (means of production plus labour power/technique) combine with relations of production (ownership patterns and class relations) to form the economic base (Gaub, PDF pp.48-49)**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 46

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **forces of production (means of production plus labour power/technique) combine with relations of production (ownership patterns and class relations) to form the economic base (Gaub, PDF pp.48-49)**.

- A. Frankfurt School
- B. Mode of production
- C. Method
- D. Marxism

Answer: B

Explanation: The canonical Basic owner pairs **forces of production (means of production plus labour power/technique) combine with relations of production (ownership patterns and class relations) to form the economic base (Gaub, PDF pp.48-49)** with **Mode of production**. The other options are valid source terms or statements, but belong to different pairings.

MCQ 47

Which option is the exact canonical pairing recorded for **Fetter/rupture mechanism**? Other options belong to different named entries.

- A. the claim that economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life.
- B. classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination.
- C. when the forces of production (technique, productive capacity) develop beyond what the existing relations of production (ownership patterns) can accommodate, the relations become a fetter on further development; revolution breaks that fetter and replaces one social formation with another across the stage-sequence slave-owning -> feudal -> capitalist -> socialist/communist (Gaub, PDF p.49).
- D. Adorno, Horkheimer, Marcuse and Habermas extend Marxism through critical theory and ideology critique.

Answer: C

Explanation: The canonical Basic owner pairs **Fetter/rupture mechanism** with **when the forces of production (technique, productive capacity) develop beyond what the existing relations of production (ownership patterns) can accommodate, the relations become a fetter on further development; revolution breaks that fetter and replaces one social formation with another across the stage-sequence slave-owning -> feudal -> capitalist -> socialist/communist (Gaub, PDF p.49)**. The other options are valid source terms or statements, but

belong to different pairings.

MCQ 48

Which concept, thinker or distinction is correctly associated with this source-grounded statement: **when the forces of production (technique, productive capacity) develop beyond what the existing relations of production (ownership patterns) can accommodate, the relations become a fetter on further development; revolution breaks that fetter and replaces one social formation with another across the stage-sequence slave-owning -> feudal -> capitalist -> socialist/communist (Gaub, PDF p.49).**

- A. Herbert Marcuse
- B. Key names
- C. Classical Marxism
- D. Fetter/rupture mechanism

Answer: D

Explanation: The canonical Basic owner pairs **when the forces of production (technique, productive capacity) develop beyond what the existing relations of production (ownership patterns) can accommodate, the relations become a fetter on further development; revolution breaks that fetter and replaces one social formation with another across the stage-sequence slave-owning -> feudal -> capitalist -> socialist/communist (Gaub, PDF p.49).** with **Fetter/rupture mechanism**. The other options are valid source terms or statements, but belong to different pairings.

PYQS AND ANSWER PRACTICE

Ownership note: These are verified Philosophy Optional Paper II questions. Their primary owner remains the Philosophy Political Ideologies corpus; they are reproduced here only where the Political Theory topic supplies the directly tested doctrine.

Solved PYQ 2 - 2018 Q3(b), 15 marks

Question: Are Marxian Socialism and individual freedom consistent ? Discuss critically.

Demand decoding: The operative directive is **the stated directive**: define the controlling concept, explain the mechanism in ordered steps, add one material qualification and answer every part of the stem. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: about 200 words: thesis, four or five developed claim -> named evidence -> analysis moves, one objection/reply and a qualified conclusion. **Model solution**

Thesis. Marxian socialism and individual freedom are consistent ONLY CONDITIONALLY: they are consistent where collective ownership genuinely ENLARGES each person's real self-development and democratic control, and they become inconsistent -- the emancipatory claim defeating itself -- where "collective" power hardens into bureaucratic command.

- **Reframe "freedom".** Marx rejects a purely negative liberty (non-interference)

that leaves formal rights operating over radically unequal social conditions. His positive ideal is non-domination PLUS self-development: the capacity to engage in conscious, social, creative activity, of which alienated labour deprives the worker (evidence P3 -- estrangement from product, activity, species-being and others).

- **The consistency argument.** If the means of production are brought under genuinely social, democratic control, then the structural coercion of the wage-relation is removed and freedom is EXTENDED to those the market subordinated -- collective ownership is the condition, not the enemy, of real freedom.

- **The self-defeat condition (objection -> reply -> residual).** Objection (bureaucratic domination): state ownership can become ownership by officials, and a transitional "dictatorship of the proletariat" can entrench rather than wither (the strongest historical objection at §2.9). Reply (M. N. Roy's radical humanism): retain Marx's critique of exploitation but reject economic determinism and party absolutism and restore

individual reason and ethical autonomy, since concentrated power cannot reliably serve emancipation. Residual: the historical record of transitional states remains adverse, so accountability, plural organisation and civil liberty must be built INTO the transition, not postponed.

Verdict (conditional). Marxian socialism and individual freedom are consistent as an IDEAL of collective self-development, and inconsistent in any form that subordinates the individual to class, party or historical necessity; the doctrine survives only if it constitutionalises the freedom it promises.

MEMORY: Why this earns marks -- it turns "consistent?" into the "only if... otherwise self-defeats" conditional (P3 + §2.8), brings M. N. Roy as the internal Indian reply, concedes the adverse record, and grades rather than answers yes/no.

How to improve this answer: Make the opening answer this exact demand - "Are Marxian Socialism and individual freedom consistent ? Discuss critically." - rather than introducing the topic generally. Convert every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 15 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

Solved PYQ 4 - 2019 Q3(c), 15 marks

Question: What do you consider to be the future of Marxism in the context of the prevalent free-market economy?

Demand decoding: The operative directive is **What:** define the controlling concept, explain the mechanism in ordered steps, add one material qualification and answer every part of the stem. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: about 200 words: thesis, four or five developed claim -> named evidence -> analysis moves, one objection/reply and a qualified conclusion. **Model solution**

Thesis. In a prevailing free-market economy the FUTURE of Marxism lies in its survival as a diagnostic and critical framework, not as an infallible prediction of collapse or a blueprint for a command economy: what persists is the analysis; what fails is the timetable and the party-state remedy.

- **What the free market vindicates in Marx.** Concentration of capital, commodification, precarity, recurrent crises and the ideological normalisation of market relations remain live phenomena the analysis still explains (evidence P2 -- the contradiction between developing forces and existing relations; P4 -- structural exploitation through surplus value, argued as a relation, not via the contested price theory).

- **What the free market falsifies.** Revolution did not first triumph in the most advanced economies; welfare compromise, universal franchise and political organisation altered the trajectory. Marxism is an explanatory framework, not an infallible schedule -- and the neo-Marxist turn already absorbed this: causal weight was RELOCATED into ideology and the state (P6 Gramsci's hegemony; P8 Poulantzas's relatively autonomous state) rather than the doctrine abandoned.

- **Objection -> reply -> residual.** Objection: the collapse of command economies refutes Marxism. Reply: it refutes the unaccountable party-state, not the critique of exploitation; the two must be separated. Residual: Marxism supplies no internal safeguard against the transitional state entrenching itself -- that gap is why its political future depends on democratic and constitutional reconstruction.

Verdict (relocation). The future of Marxism under free markets is as a REFINED critical tradition: its diagnosis of concentration, precarity and ideological reproduction retains force; its predictive schedule and command-economy remedy do not; so it will endure as analysis and critique rather than as a governing programme -- with no verdict passed here on any particular country.

MEMORY: Why this earns marks -- it splits diagnosis (P2/P4, still explains) from prediction and remedy (falsified), uses the neo-Marxist relocation (P6/P8) as the survival mechanism, and grades without commenting on any actual regime.

How to improve this answer: Make the opening answer this exact demand - "What do you consider to be the future of Marxism in the context of the prevalent free-market economy?" - rather than introducing the topic generally. Convert

every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 15 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

Solved PYQ 6 - 2020 Q2(b), 15 marks

Question: How far is Marxism as a philosophical doctrine relevant in the present context? Justify your answer.

Demand decoding: The operative directive is **How far**: answer the proposition immediately, specify the conditions or degree, test the counter-position and return to a qualified yes/no verdict. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: about 200 words: thesis, four or five developed claim -> named evidence -> analysis moves, one objection/reply and a qualified conclusion. **Model solution**

Thesis. Marxism as a PHILOSOPHICAL doctrine remains substantially relevant -- as a method, a critique and a theory of ideology -- even where its 19th-century predictions and 20th-century political implementations have failed; relevance must be judged by diagnostic power, not by the fate of any regime.

- **The philosophical core that survives.** Historical materialism reads social formations through productive forces, relations of production and class (evidence P2); the theory of alienation diagnoses the estrangement of labour under commodified production (P3); the critique of ideology explains how contingent, class-bound relations come to appear natural and inevitable (and Gramsci's hegemony, P6, and Althusser's interpellation, P7, extend this into culture and subject-formation). These are analytical instruments, not dated slogans.

- **Where it needs correction.** Economic reductionism is a real tendency: caste, religion, gender and nationalism have relative autonomy and cannot be derived from class alone -- so class analysis is NECESSARY BUT INSUFFICIENT, especially in India (§2.9). The reply treats these as materially embedded powers rather than mere epiphenomena, expanding the analysis through hegemony and social reproduction.

- **Objection -> reply -> residual.** Objection: authoritarian outcomes discredit the doctrine. Reply: separate the critique of exploitation from the unaccountable transitional state; the philosophy is not the regime. Residual: the doctrine offers no internal safeguard against that state -- the strongest standing objection.

Verdict (diagnosis/remedy split). The philosophical analysis of concentration, exploitation and ideological reproduction retains force; the institutional remedy -- an unaccountable transitional state -- does not, and the theory supplies no internal guard against it. Marxism is therefore relevant as critique and method, refined rather than refuted.

MEMORY: Why this earns marks -- it isolates the philosophical core (P2/P3/P6/P7), concedes the necessary-not-sufficient limit and the authoritarian residual, and closes on the diagnosis/remedy split rather than a yes/no on "relevance".

How to improve this answer: Make the opening answer this exact demand - "How far is Marxism as a philosophical doctrine relevant in the present context? Justify your answer." - rather than introducing the topic generally. Convert every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 15 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

Solved PYQ 10 - 2023 Q3(a), 20 marks

Question: Explain Historical Materialism and discuss its relevance in the context of social development and change.

Demand decoding: The operative directive is **Explain**: define the controlling concept, explain the mechanism in ordered steps, add one material qualification and answer every part of the stem. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: about 250 words: thesis, five or six developed dimensions, a named comparison, the strongest objection/reply and a graded conclusion. Cut biography and repeated definitions before cutting evidence, qualification or verdict. **Model solution**

Thesis. Historical materialism explains social formations through the interaction of productive forces, relations of production, class structure and political-ideological institutions; it remains highly relevant to social development and change AS A METHOD, provided its base-superstructure relation is read non-mechanically and supplemented where class alone is insufficient.

- **The doctrine as a causal chain (evidence P2).** (1) Human beings must produce the means of life; (2) production occurs through definite social relations; (3) productive forces develop within those relations; (4) existing relations eventually become FETTERS on further development; (5) the conflict between forces and relations becomes social and political struggle; (6) a new mode of production can emerge through that struggle. The elements: productive forces (capacity), relations of production (ownership/control), mode of production (their unity), base/superstructure (a relation, NOT a one-way switch) and class struggle (the motor of transformation).

- **Relevance to social development and change.** It supplies a materialist account of WHY social orders change -- technological and productive development destabilising inherited property relations -- and of how law, politics and ideology are anchored in social labour and power. Extended by Gramsci's hegemony (P6) and Althusser's reproduction (P7), it explains not only revolution but the STABILITY of orders through consent and subject-formation.

- **Objection -> reply -> residual.** Objection: economic determinism -- caste, religion, gender and nationalism cannot be read off the base. Reply: historical materialism can treat these as materially embedded powers with relative autonomy, not epiphenomena. Residual: in India especially, class analysis is NECESSARY BUT INSUFFICIENT -- caste operates through status, endogamy and social reproduction that class alone cannot derive; say this before the objection is put.

Verdict (necessary-not-sufficient). As a research programme, historical materialism remains a powerful explanation of social development and change; its limit is reductionism, repaired by reading the base-superstructure relation reciprocally and adding the independent mechanisms of caste, gender and culture -- so it is refined, not refuted.

MEMORY: Why this earns marks -- it runs P2 as six numbered premises (not slogans), states the base/superstructure caution pre-emptively, extends via P6/P7, and grades with the necessary-not-sufficient verdict tuned to Indian social change.

How to improve this answer: Make the opening answer this exact demand - "Explain Historical Materialism and discuss its relevance in the context of social development and change." - rather than introducing the topic generally. Convert every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 20 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

Solved PYQ 11 - 2024 Q1(d), 10 marks

Question: Present an exposition of the concept of alienation as propounded by Marx.

Demand decoding: The operative directive is **the stated directive**: define the controlling concept, explain the mechanism in ordered steps, add one material qualification and answer every part of the stem. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: 150 words: one-sentence thesis, three compact claim -> named evidence -> analysis moves, one qualification and a direct two-line conclusion. **Model solution**

Thesis. For Marx, ALIENATION is the estrangement of the worker from their own productive life under conditions of private property and the division of labour -- a structural condition of capitalist production, broader than low pay, in which labour that should be self-realising becomes an external, compelled and dispossessed activity.

- **The four dimensions (evidence P3, from the 1844 Manuscripts).** The worker is estranged (1) FROM THE PRODUCT, which confronts them as another's property; (2) FROM THE ACTIVITY of labour, which is externally compelled rather than self-realising; (3) FROM SPECIES-BEING, as conscious creative activity is reduced to a means of survival; and (4) FROM OTHER PERSONS, as workers compete and social relations assume commodity form.

- **The mark-bearing distinction.** Alienation is BROADER THAN LOW WAGES: a well-paid worker can remain alienated where labour, product and purpose are controlled by others. So the remedy is not merely higher pay but restored control over the activity and ends of work -- which is why alienation, not just inequality, is central to Marx's critique.

- **Objection -> reply.** Objection: species-being assumes a controversial universal human essence. Reply: it can be reconstructed MINIMALLY -- persons require meaningful agency, social recognition and control over their central activities -- without positing a fixed metaphysical essence.

Verdict. Alienation names a genuine and enduring feature of commodified, hierarchically controlled work; its diagnostic reach extends well beyond the 19th-century factory to contemporary labour wherever activity, product and purpose are severed from the producer -- which is why it remains Marx's most portable concept.

MEMORY: Why this earns marks -- as an EXPOSITION it leads with the definition and the four dimensions (P3), makes the "broader than low wages" distinction the centrepiece, adds only one controlled objection/reply, and keeps exposition dominant as the directive demands.

How to improve this answer: Make the opening answer this exact demand - "Present an exposition of the concept of alienation as propounded by Marx." - rather than introducing the topic generally. Convert every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 10 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

Solved PYQ 13 - 2025 Q2(b), 15 marks

Question: Evaluate Marxism as a Political Ideology.

Demand decoding: The operative directive is **Evaluate**: reconstruct the position accurately, test its strongest objection and reply, then give a graded verdict. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: about 200 words: thesis, four or five developed claim -> named evidence -> analysis moves, one objection/reply and a qualified conclusion. **Model solution**

Thesis. Evaluated as a political ideology, Marxism is exceptionally strong as a METHOD, a CRITIQUE and a theory of IDEOLOGY, and correspondingly weak as a PREDICTION and as an institutional programme; its enduring value is diagnostic, its recurring failure political -- and a fair evaluation must keep the two apart.

- **What Marxism is.** Simultaneously a method (dialectical-historical analysis), a critique (exploitation, alienation, commodity relations, ideology), a theory of change (contradiction and class struggle) and a political project (collective emancipation). As ideology in the DESCRIPTIVE sense it guides action; in the PEJORATIVE sense it is itself the theory that UNMASKS ideology as the naturalising of class-bound relations.

- **Strengths (evidence).** Historical materialism explains structural change (P2); surplus value shows exploitation as a RELATION, not unfair bargaining, so it survives even where the labour theory of value is contested (P4); the critique of ideology, extended by Gramsci's hegemony (P6) and Althusser's interpellation (P7), explains how orders secure consent.

- **Objections, each with reply and residual (§2.9).** (1) Economic determinism -> treat caste/gender/culture as materially embedded, relatively autonomous powers -> residual: class is necessary but insufficient, sharply so in India. (2) Failed prediction (revolution not in advanced economies) -> Lenin's weakest-link and vanguard revision (P5) -> residual: the vanguard has no mechanism subordinating party to class (substitutionism). (3) Authoritarian outcome -> build liberty and accountability into the transition -> residual: the historical record stays adverse and the theory offers no internal safeguard. (4) Class reductionism -> anti-caste and feminist analyses identify distinct mechanisms.

- **The neo-Marxist relocation.** Later Marxism keeps the materialist mechanism but relocates causal weight into party, culture and state form (P8 -- the relatively autonomous state) -- refinement, not abandonment.

Verdict (diagnosis/remedy split). Marxism's analysis of concentration, exploitation and ideological reproduction retains force; its institutional remedy -- an unaccountable transitional state -- does not, and it supplies no internal guard against that outcome. As an ideology it is therefore best judged a powerful CRITIQUE in permanent search of a safe political form.

MEMORY: Why this earns marks -- it evaluates on BOTH senses of ideology, banks the strengths (P2/P4/P6/P7), runs all four §2.9 objections to residuals with the P5 revision, adds the P8 relocation, and closes on the diagnosis/remedy split, not a verdict on any regime.

How to improve this answer: Make the opening answer this exact demand - "Evaluate Marxism as a Political Ideology." - rather than introducing the topic generally. Convert every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 15 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

ORIGINAL MAINS PRACTICE WITH MODEL SOLUTIONS

Original Mains Practice 1 - 10 marks

Question: Explain the relation between forces and relations of production in historical materialism. Answer in about 150 words.

Demand decoding: The operative directive is **Explain**: define the controlling concept, explain the mechanism in ordered steps, add one material qualification and answer every part of the stem. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: 150 words: one-sentence thesis, three compact claim -> named evidence -> analysis moves, one qualification and a direct two-line conclusion. **Model solution**

Introduction: Historical materialism explains social formations through the interaction of productive capacity and the social relations governing production.

Core analysis: Forces of production include labour, skills, tools and technology. Relations of production organise ownership, control and the position of classes. Together they constitute a mode of production. As productive forces develop, inherited relations may become fetters that obstruct further development. The resulting contradiction is expressed through class struggle and may culminate in institutional rupture and a new social formation. The mechanism links material production to law, politics and ideology without reducing history to isolated ideas.

Critical evaluation: The relation is not an automatic sequence. Political organisation, culture and contingent struggle influence whether contradiction produces reform, repression or revolution.

Conclusion: Historical change occurs when developing productive forces are constrained by existing relations of ownership and control, but the transition is mediated through social and political struggle rather than mechanical necessity.

Why this earns marks: It defines the issue, states the controlling distinction, adds one limitation and closes with a direct verdict suited to a 10-mark answer.

How to improve this answer: Make the opening answer this exact demand - "Explain the relation between forces and relations of production in historical materialism." - rather than introducing the topic generally. Convert every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 10 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

Original Mains Practice 2 - 10 marks

Question: Present Marx's concept of alienation and distinguish it from economic inequality. Answer in about 150 words.

Demand decoding: The operative directive is **the stated directive**: define the controlling concept, explain the mechanism in ordered steps, add one material qualification and answer every part of the stem. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: 150 words: one-sentence thesis, three compact claim -> named evidence -> analysis moves, one qualification and a direct two-line conclusion. **Model solution**

Introduction: Alienation describes the worker's estrangement within capitalist production and is broader than unequal income or wealth.

Core analysis: The worker is alienated from the product, which confronts its producer as another's property; from the labour process, which is externally controlled; from species-being, because creative activity is reduced to a means of survival; and from other persons, whose relations are mediated by competition and exchange. Inequality concerns distribution, whereas alienation concerns control, purpose and self-realisation within the productive relation. A redistribution of income can therefore reduce inequality while leaving alienated labour intact.

Critical evaluation: The concept depends on a contested account of human flourishing, but it remains powerful when reconstructed around agency, recognition and meaningful control over work.

Conclusion: Alienation concerns loss of control, self-realisation and human relation within production; redistribution may reduce inequality without removing that deeper form of estrangement.

Why this earns marks: It defines the issue, states the controlling distinction, adds one limitation and closes with a direct verdict suited to a 10-mark answer.

How to improve this answer: Make the opening answer this exact demand - "Present Marx's concept of alienation and distinguish it from economic inequality." - rather than introducing the topic generally. Convert every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 10 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

Original Mains Practice 3 - 15 marks

Question: Critically examine the base-superstructure relation in classical and neo-Marxist thought. Answer in about 200 words.

Demand decoding: The operative directive is **Critically examine**: reconstruct the position accurately, test its strongest objection and reply, then give a graded verdict. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: about 200 words: thesis, four or five developed claim -> named evidence -> analysis moves, one objection/reply and a qualified conclusion. **Model solution**

Introduction: The base-superstructure model relates the mode of production to legal, political and cultural institutions.

Core analysis: Classical Marxism gives the economic structure decisive explanatory weight because ownership and production organise class power. Yet the relation should not be read as a one-way switch. Neo-Marxists develop its reciprocal character: Gramsci shows how civil society and hegemony organise consent; the Frankfurt School examines culture and manipulated needs; Althusser analyses ideological and repressive apparatuses that reproduce social relations. The superstructure therefore stabilises or contests the base rather than merely reflecting it.

Further development: Gramsci and Althusser illustrate two different corrections. Gramsci emphasises political agency, organic intellectuals and contest within civil society; Althusser emphasises structural reproduction through ideological and repressive apparatuses. The Frankfurt School adds culture and administered consciousness. These developments answer the objection that economics alone explains history, but they also make the theory harder to falsify because domination can be located across many mutually supporting institutions.

Critical evaluation: If economic determination is made wholly mechanical, historical agency disappears. If culture becomes completely autonomous, the distinctively Marxist account of material power is lost.

Conclusion: The relation is best read as structured interaction: the economic base sets powerful limits, while law, politics and culture also reproduce or transform the social order.

Why this earns marks: It combines definition, named doctrinal evidence, comparison and a counter-position before giving a qualified 15-mark verdict.

How to improve this answer: Make the opening answer this exact demand - "Critically examine the base-superstructure relation in classical and neo-Marxist thought." - rather than introducing the topic generally. Convert every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 15 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

Original Mains Practice 4 - 15 marks

Question: Discuss Gramsci's concept of hegemony as a development within Marxism. Answer in about 200 words.

Demand decoding: The operative directive is **Discuss**: cover the principal dimensions, connect named evidence to each claim, include the strongest counter-position and conclude directly. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: about 200 words: thesis, four or five developed claim -> named evidence -> analysis moves, one objection/reply and a qualified conclusion. **Model solution**

Introduction: Gramsci develops Marxism by explaining why class rule persists through consent as well as direct coercion.

Core analysis: Hegemony is the capacity of a leading class to present its interests as a common social outlook through institutions of civil society, including education, religion, media and associations. Political society supplies law and coercion, while civil society secures active or passive consent. Organic intellectuals organise rival experience into a counter-hegemonic worldview. In advanced societies, transformation therefore requires a prolonged war of position within civil society rather than reliance only on a frontal seizure of state power.

Further development: The distinction between war of manoeuvre and war of position follows from this analysis. A direct assault may be possible where civil society is weak, but dense associations in advanced societies require a long struggle over common sense and institutional leadership. This expands revolutionary strategy beyond the factory and the state. It also allows subordinate groups to build consent before taking governmental power, though it raises the question of whether counter-hegemony can avoid becoming another form of ideological closure.

Critical evaluation: Gramsci gives culture and agency greater causal weight without abandoning class analysis. The risk is stretching hegemony so widely that every form of agreement appears manipulated.

Conclusion: Gramsci extends Marxism by showing that durable rule depends on organised consent in civil society as well as coercion, thereby making culture a terrain of political struggle.

Why this earns marks: It combines definition, named doctrinal evidence, comparison and a counter-position before giving a qualified 15-mark verdict.

How to improve this answer: Make the opening answer this exact demand - "Discuss Gramsci's concept of hegemony as a development within Marxism." - rather than introducing the topic generally. Convert every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 15 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

Original Mains Practice 5 - 20 marks

Question: Evaluate Marxism as a theory of capitalism, domination and social transformation. Answer in about 250 words.

Demand decoding: The operative directive is **Evaluate**: reconstruct the position accurately, test its strongest objection and reply, then give a graded verdict. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: about 250 words: thesis, five or six developed dimensions, a named comparison, the strongest objection/reply and a graded conclusion. Cut biography and repeated definitions before cutting evidence, qualification or verdict. **Model solution**

Introduction: Marxism combines a method of social analysis, a critique of capitalism, a theory of historical change and a political project.

Core analysis: Its analysis links private control of production to surplus appropriation, class conflict and the structural dependence of labour. Historical materialism explains how productive forces and relations generate contradictions, while alienation identifies the human cost of externally controlled work. The state and dominant ideas help stabilise class relations. Neo-Marxism deepens the account through hegemony, culture, ideology and dependency, showing that domination is not maintained by economics alone.

Further development: Its evidence architecture spans several levels: surplus value explains appropriation within production; alienation explains loss of agency; the state protects general conditions of class rule; ideology naturalises contingent relations; and historical materialism links contradiction to transformation. Gramsci and the Frankfurt School explain why crisis need not automatically produce revolution, while dependency theory extends domination to colonial and neo-colonial relations. The strongest reply to Marxism is that democratic welfare reform, plural identities and state autonomy exceed a simple two-class model. Its strongest defence is that these modifications do not remove the structural power attached to ownership and accumulation. That residual insight sustains its contemporary relevance.

Critical evaluation: Marxism remains illuminating where accumulation and class power interact, but deterministic prediction, class reductionism and authoritarian outcomes weaken any claim to a complete philosophy of emancipation.

Conclusion: Marxism remains powerful where exploitation, accumulation and class power intersect, but its adequacy depends on resisting economic reductionism and authoritarian political closure.

Why this earns marks: It develops multiple dimensions and named evidence units, tests the strongest objection and reply, and reaches a balanced 20-mark judgment.

How to improve this answer: Make the opening answer this exact demand - "Evaluate Marxism as a theory of capitalism, domination and social transformation." - rather than introducing the topic generally. Convert every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 20 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

Original Mains Practice 6 - 20 marks

Question: Compare the humanist, structural and dependency-oriented strands of neo-Marxism. Answer in about 250 words.

Demand decoding: The operative directive is **the stated directive**: define the controlling concept, explain the mechanism in ordered steps, add one material qualification and answer every part of the stem. The scope is the exact proposition in the question; do not substitute an adjacent doctrine or a memorised general essay.

Executable exam-length plan: about 250 words: thesis, five or six developed dimensions, a named comparison, the strongest objection/reply and a graded conclusion. Cut biography and repeated definitions before cutting evidence, qualification or verdict. **Model solution**

Introduction: Neo-Marxism revises classical Marxism by widening the mechanisms and scales through which domination is explained.

Core analysis: The humanist strand, associated with the Young Marx and critical theory, emphasises alienation, freedom, culture and manipulated consciousness. The structural strand, represented by Althusser, resists a philosophy centred on an essential human subject and analyses how economic, political and ideological structures reproduce a social formation. Dependency theorists shift the scale toward relations between developing societies and colonial or neo-colonial power. These strands therefore differ over agency, causal structure and the principal arena of conflict.

Further development: The strands also prescribe different emancipatory strategies. Humanism seeks recovery of agency and non-alienated life; structural analysis seeks transformation of the apparatuses reproducing class relations; dependency analysis seeks altered domestic and international relations of production. Gramsci occupies an important bridge because he combines material class leadership with cultural struggle. Habermas should not be merged with first-generation critical theory, and dependency theory should not be renamed world-systems theory without independent justification. Their plurality strengthens Marxism's reach but weakens any claim to one settled neo-Marxist method. Comparison must therefore retain both continuity and internal disagreement.

Critical evaluation: They should not be merged with world-systems theory or treated as abandoning Marxism. Each retains concern with material domination while correcting an overly mechanical base model.

Conclusion: These strands disagree over agency, structure and the scale of domination, yet each preserves Marxism by relocating causal weight beyond a mechanically conceived economic base.

Why this earns marks: It develops multiple dimensions and named evidence units, tests the strongest objection and reply, and reaches a balanced 20-mark judgment.

How to improve this answer: Make the opening answer this exact demand - "Compare the humanist, structural and dependency-oriented strands of neo-Marxism." - rather than introducing the topic generally. Convert every major paragraph into claim -> named thinker, text or India-linked example -> what it proves -> limitation; preserve the model's decisive distinction and final qualification. For 20 marks, use the supplied compression plan and remove decorative biography or repeated definitions first.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Political Theory | **Tier:** Advanced | **GS/Optional relevance:** GS-II (Polity & Governance) conceptual foundation; PSIR Optional Paper-1 background. **Core area:** From classical Marxism's economy-centred critique of capitalism to neo-Marxism's analysis of ideology, alienation, culture and wider structures of domination. **Grounded in:** O. P. - > class struggle
- > surplus value

neo-Marxist reopening

- > Young Marx and alienation
- > Frankfurt School / critical theory
- > Marcuse and one-dimensionality
- > Althusser and structures
- > dependency / colonial domination

- ANALYSIS: The shift is not from economics to non-economics, but from a narrow reading of domination to a wider map of domination.

2. Scope, assumptions and conceptual boundary

- FACT: This file reconstructs Gauba's treatment of Marxism as an ideology within Ch.2, not the later chapter on the state. (PDF pp.46-54)
- FACT: The book treats the collapse of Soviet-style socialism and the turn to market reforms as a historical backdrop for rethinking classical Marxism; these are book-period observations, not current regime analysis. (PDF p.54)
- ANALYSIS: The focus here is conceptual: capitalism, class, ideology, alienation and emancipation, not twentieth-century party history in detail.

3. Direct-book argument reconstruction

- FACT: Step 1: Gauba begins from the failure of classical liberal capitalism to secure real human freedom for the working majority. (PDF p.46)
- FACT: Step 2: He then defines Marxism as scientific socialism, rooted in historical analysis of antagonistic forces and classes generated by ownership of means of production. (PDF p.47)
- FACT: Step 3: He organizes classical Marxism through four tenets: dialectical materialism, historical materialism, class conflict and surplus value. (PDF p.48)
- FACT: Step 4: Historical materialism is unpacked through base and superstructure, and through forces and relations of production. (PDF pp.48-49)
- FACT: Step 5: Social revolutions occur when productive forces come into conflict with existing relations of production and break their fetters. (PDF p.49)
- FACT: Step 6: Surplus value supplies the economic proof of exploitation under capitalism. (PDF pp.52-53)
- FACT: Step 7: Neo-Marxism arises when Marxists stop treating superstructure as wholly dependent and begin examining ideology, alienation, culture and new forms of domination. (PDF p.53)

4. Definitions and distinctions

- FACT: **Dialectical materialism:** matter is primary, and contradiction within material reality drives change. (PDF p.48)
- FACT: **Historical materialism:** the organization of economic life shapes wider legal, political, ethical and intellectual life. (PDF p.48)
- FACT: **Social formation:** a form of social organization associated with a specific mode of production. (PDF p.50)
- FACT: **Base:** the mode of production. (PDF p.48)
- FACT: **Superstructure:** law, politics, religion, morals, social practices, literature, art and culture. (PDF p.48)
- FACT: **Young Marx / humanist strain:** alienation, freedom and capitalism's dehumanizing effects. (PDF p.47, p.54)
- FACT: **Scientific strain:** focus on structures, explanatory rigour and the relative importance of ideological, cultural and social factors. (PDF p.54)

5. Thinker-by-thinker positions

- FACT: **Marx**: treats private property, class division and contradiction in the mode of production as the keys to history and emancipation. (PDF p.47)
- FACT: **Engels**: supplies the three laws of dialectical materialism in Gauba's account and helps edit later volumes of *Capital*. (PDF p.48)
- FACT: **Lenin, Luxemburg, Mao**: named as chief exponents of classical Marxism beyond Marx and Engels. (PDF p.47)
- FACT: **Young Marx**: gives neo-Marxism a humanist source through alienation and freedom. (PDF p.47)
- FACT: **Adorno and Horkheimer**: part of the Frankfurt School's critical theory and ideology critique. (PDF p.53)
- FACT: **Habermas**: listed by Gauba among major Frankfurt-linked figures, signalling the widening of Marxist critique beyond factory economics. (PDF p.53)
- FACT: **Marcuse**: argues that bourgeois society manipulates communication and trivial desire, producing one-dimensional humanity and dulled resistance. (PDF p.54)
- FACT: **Althusser**: resists a purely humanist Marxism and insists on analysing deep social structures, especially modes of production. (PDF p.54)
- FACT: **Dependency theorists**: shift the axis of struggle toward developing nations confronting colonialism and neo-colonialism. (PDF p.54)

6. Competing perspectives

- FACT: **Classical Marxism**: privileges property relations, class antagonism and revolutionary overthrow of capitalism. (PDF pp.47-52)
- FACT: **Humanist neo-Marxism**: emphasizes alienation, consciousness and emancipation. (PDF pp.47, 53-54)
- FACT: **Scientific neo-Marxism**: retools Marxism around structures and explanatory depth rather than moral humanism. (PDF p.54)
- ANALYSIS: **Dependency/post-colonial extension**: widens the location of domination from class inside a nation to asymmetrical relations between developing and dominant nations.
- ANALYSIS: For UPSC, the real contrast is not Marxism versus culture, but economism versus a more layered model of domination.

7. Internal debates and criticisms

- WRONG: **Mechanical determinism**: the crude claim that the base fully and automatically dictates the superstructure is directly weakened by Gauba's neo-Marxist note on interdependence. (PDF p.53)
- FACT: **Humanist vs scientific Marxism**: Gauba explicitly distinguishes these two neo-Marxist directions. (PDF p.54)
- FACT: **State-withering problem**: Gauba notes that actual socialist regimes showed not withering away of the state but collapse and return toward liberalization. This is a historical challenge internal to the tradition. (PDF p.54)
- ANALYSIS: **Expanded domination problem**: once domination includes ideology, culture, communication and colonial dependence, class struggle alone no longer exhausts Marxist explanation.
- ANALYSIS: **UPSC-useful criticism**: Marxism remains powerful for structural inequality, but weak when reduced to only one social cleavage.

8. Comparative matrix

Semantic table split - Issue

- **Issue**: Main concern
- **Classical Marxism**: FACT: Exploitation and class conflict. (PDF pp.47-52)
- **Humanist neo-Marxism**: FACT: Alienation and emancipation. (PDF p.54)
- **Scientific neo-Marxism**: FACT: Structures and explanatory rigour. (PDF p.54)
- **Issue**: Key source

- **Classical Marxism:** FACT: Marx, Engels, Lenin, Luxemburg, Mao. (PDF p.47)
- **Humanist neo-Marxism:** FACT: Young Marx, Frankfurt School, Marcuse. (PDF pp.47, 53-54)
- **Scientific neo-Marxism:** FACT: Althusser. (PDF p.54)
- **Issue:** View of domination
- **Classical Marxism:** FACT: Rooted in ownership of means of production. (PDF p.47)
- **Humanist neo-Marxism:** FACT: Also reproduced through ideology and manipulated desire. (PDF pp.53-54)
- **Scientific neo-Marxism:** FACT: Embedded in deep structural relations. (PDF p.54)
- **Issue:** Base-superstructure relation
- **Classical Marxism:** FACT: Base-centred. (PDF p.48)
- **Humanist neo-Marxism:** FACT: Relative autonomy of superstructure gains importance. (PDF p.53)
- **Scientific neo-Marxism:** FACT: Superstructural and structural analysis becomes central. (PDF p.54)
- **Issue:** Historical extension
- **Classical Marxism:** FACT: Proletarian revolution against capitalism. (PDF pp.51-52)
- **Humanist neo-Marxism:** ANALYSIS: Emancipation through critical consciousness.
- **Scientific neo-Marxism:** FACT: Struggle may extend to colonial and neo-colonial dependence. (PDF p.54)

9. Application without current-affairs dependence

- ANALYSIS: If a question asks why people consent to domination, move from classical Marxism to neo-Marxist ideology critique.
- ANALYSIS: If a question asks whether law, religion or culture are mere reflections of economics, use Gauba's interdependence note to reject a simplistic answer.
- ANALYSIS: If a question asks about development and global inequality, dependency theory lets you extend Marxist logic from domestic classes to international hierarchies.
- ANALYSIS: A safe timeless application is to compare direct coercion, economic extraction and cultural consent as three layers of domination.

10. UPSC answer-engine prompts

- ANALYSIS: **Prompt 1:** Explain historical materialism without collapsing it into crude economic determinism.
- ANALYSIS: **Prompt 2:** Distinguish classical Marxism from neo-Marxism with special reference to alienation and ideology.
- ANALYSIS: **Prompt 3:** How does surplus value supply the economic core of Marx's critique of capitalism?
- ANALYSIS: **Prompt 4:** Why did later Marxists move from class alone to culture, communication and colonial dependence?
- ANALYSIS: **Mini spine:** definition -> four tenets -> base/superstructure nuance -> classical/neo distinction -> one criticism -> qualified conclusion.

11. Cross-links and exclusions

- FACT: Foundation companion: `Political-Theory/basic/04_Marxism-and-Neo-Marxism.md`.
- FACT: Use `Political-Theory/00_Master-Framework.md` for the ideology and thinker-comparison matrices.
- FACT: Use `Political-Theory/README.md` to navigate forward to the mapped topics on power, justice and social change.
- FACT: Module-map continuities especially run toward `Political-Theory/advanced/15_Power-Authority-and-Legitimacy.md` on hegemony, `Political-Theory/advanced/19_Justice-Concepts-and-Dimensions.md` and `Political-Theory/advanced/20_Diverse-Perspectives-on-Justice.md` on justice, and `Political-Theory/advanced/23_Contemporary-Democracy-Social-Change-and-Development.md` on change.

- FACT: For cross-syllabus reinforcement, see `Philosophy/paper-2/socio-political/Political-Ideologies.md` and `Philosophy/paper-2/socio-political/Development-Social-Progress.md`.
- WRONG: Do not turn this file into a Soviet-history or China-policy note; Gauba's regime remarks are context, not the chapter's conceptual core.

12. Factual-risk checks

- WRONG: Treating base-superstructure as one-way and absolute is inaccurate against Gauba's own neo-Marxist clarification. (PDF p.53)
- WRONG: Presenting Hegelian thesis-antithesis-synthesis as Marx's own canonical formula is unsafe; use it only as ANALYSIS: pedagogic shorthand. (PDF p.48)
- WRONG: Gauba's comments on Eastern Europe, the former Soviet Union and Chinese liberalization are historical observations from a 2009 edition, not current regime descriptions. (PDF p.54)
- WRONG: Dependency theory here is a direction of extension, not a full substitute for class analysis in Gauba's presentation. (PDF p.54)

13. Sources, metadata and tags

- FACT: Primary source used directly: O. P. Gauba, *An Introduction to Political Theory*, Fifth Edition (2009), Ch.2, PDF pp.46-54.
- FACT: Key anchors: definition of Marxism and classical/neo distinction (PDF p.47); main tenets and production structure (PDF pp.48-50); class conflict and surplus value (PDF pp.50-53); Frankfurt School, Marcuse, Althusser and dependency extension (PDF pp.53-54).
- ANALYSIS: Tags: `#PoliticalTheory #Advanced #Marxism #NeoMarxism #CriticalTheory #Alienation #DependencyTheory`.

CONSOLIDATED REGISTER NOTES

ONE-PAGE CONCEPT GRID

Concept / thinker	Exam-ready formulation
Marxism	a set of political and economic principles founded by Marx and Engels to give socialism a scientific basis through historical analysis of conflict between antagonistic classes.
Classical Marxism	the original scientific system centred on property, class division, contradiction and revolutionary transformation.
Neo-Marxism	later Marxist thought that studies subtler forms of dominance, alienation and paths to human emancipation.
Dialectical materialism	the view that matter, not idea, is fundamental, and that contradictions in material conditions drive development.
Historical materialism	the claim that economic relations of production, distribution and exchange play the decisive role in shaping wider social and political life.
Surplus value	the unpaid part of labour appropriated by the capitalist as profit, rent and interest.
Dialectical materialism vs historical materialism	the first is the philosophical basis; the second is the scientific-historical application to society.
Base vs superstructure	base refers to the mode of production; superstructure includes law, politics, religion, morals, art and culture.
Forces of production vs relations of production	forces include means of production plus labour power; relations concern ownership patterns and class relations.
Classical Marxism vs neo-Marxism	classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination.
Base determines superstructure mechanically	Gauba explicitly notes that later Marxist debate recognizes interdependence between base and superstructure.
Marx and Engels	founders of Marxism and scientific socialism; they treat history as struggle rooted in the mode of production.

CORE REVISION SPINE

- Gauba presents classical Marxism through four main tenets: dialectical materialism, historical materialism, class conflict and surplus value. (PDF p.48, p.52)
- Marxism explains why formal legal equality can coexist with deep economic inequality under capitalism. (PDF pp.46-47)
- Neo-Marxism shows why domination cannot be reduced only to factory ownership; culture, communication and ideology also matter. (PDF pp.53-54)
- Marxism: a set of political and economic principles founded by Marx and Engels to give socialism a scientific basis through historical analysis of conflict between antagonistic classes. (PDF p.47)
- Classical Marxism: the original scientific system centred on property, class division, contradiction and revolutionary transformation. (PDF p.47)
- Neo-Marxism: later Marxist thought that studies subtler forms of dominance, alienation and paths to human emancipation. (PDF p.47, p.53)
- Gauba begins with capitalism's oppressive conditions and presents Marxism as a response to the failure of laissez-faire liberalism to deliver real human freedom. (PDF pp.46-47)
- Marxism argues that private property in the means of production divides society into dominant and dependent classes with antagonistic interests. (PDF p.47)

- Class struggle continues from slave society to feudalism to capitalism, and Marxism expects a socialist revolution to end this cycle in a classless society. (PDF pp.49-52)
- Neo-Marxism reopens Marxism by focusing on alienation, ideology, technological domination and the relative autonomy of superstructural factors. (PDF pp.53-54)
- Classical Marxism vs neo-Marxism: classical Marxism emphasizes property, class contradiction and revolution; neo-Marxism widens the lens to ideology, culture and new forms of domination. (PDF pp.47, 53-54)
- Marx and Engels: founders of Marxism and scientific socialism; they treat history as struggle rooted in the mode of production. (PDF p.47)

HIGH-RISK TRAPS

- Trap repair: Marx simply said thesis-antithesis-synthesis. -> That triadic language is a teaching shorthand drawn from Gauba's discussion of Hegel's dialectic; do not present it as Marx's own settled formula. (PDF p.48)
- Trap repair: Historical materialism means economics alone explains everything. -> Gauba's neo-Marxist section explicitly notes growing recognition of interdependence between base and superstructure. (PDF p.53)
- Trap repair: Neo-Marxism abandons Marxism. -> Gauba presents it as a development within Marxism, especially around alienation, ideology and emancipation. (PDF pp.47, 53-54)
- Trap repair: Surplus value means any profit whatsoever is automatically identical with market price movement. -> Gauba defines it as the unpaid part of labour appropriated by the capitalist, not simply any change in sale price. (PDF pp.52-53)

ANSWER SPINE

1. Define the exact doctrine or controversy in the question.
2. State a qualified thesis before narration begins.
3. Reconstruct premises, mechanism and conclusion.
4. Add named thinkers and one precise distinction.
5. Present the strongest objection, reply and residual limitation.
6. End with a graded verdict tied to the directive.
