Municipalities - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Original MCQ loop - strict A -> B -> C -> D rotation

OM1. Constitutional status

Municipalities received constitutional status through the:

A. 74th Constitutional Amendment. B. 73rd Constitutional Amendment. C. 86th Constitutional Amendment. D. 69th Constitutional Amendment.

Answer: A.

Explanation: [FACT] The 74th Amendment inserted Part IX-A and the Twelfth Schedule.

OM2. Constitutional Part

The provisions on Municipalities are located in:

A. Part IX. B. Part IX-A. C. Part XVIII. D. Part X.

Answer: B.

Explanation: [FACT] Part IX is for Panchayats; Part IX-A is for Municipalities.

OM3. Functional schedule

The Twelfth Schedule contains:

A. 20 matters. B. 12 matters. C. 18 matters. D. 29 matters.

Answer: C.

Explanation: [FACT] The Eleventh Schedule has 29 Panchayat matters; the Twelfth has 18 municipal matters.

OM4. Commencement

The 74th Amendment came into force on:

A. 24 April 1993. B. 26 January 1993. C. 15 August 1992. D. 1 June 1993.

Answer: D.

Explanation: [FACT] 24 April 1993 is associated with the 73rd Amendment.

OM5. Definitions

Which Article defines "metropolitan area" and "municipality" for Part IX-A?

A. Article 243P. B. Article 243S. C. Article 243Q. D. Article 243R.

Answer: A.

Explanation: [FACT] Article 243P is the definitions provision.

OM6. Transitional area

A transitional area is ordinarily administered through a:

A. District Panchayat. B. Nagar Panchayat. C. Municipal Corporation. D. Cantonment Board.

Answer: B.

Explanation: [FACT] Article 243Q maps Nagar Panchayat to a rural-to-urban transitional area.

OM7. Industrial township

Which statement is correct?

A. Every industrial area must have a Municipal Corporation. B. Parliament alone declares an industrial township. C. The Governor may specify an industrial township where an industrial establishment provides or proposes municipal services. D. An industrial township is the same as a census town.

Answer: C.

Explanation: [FACT] It is the Article 243Q proviso; a municipality need not be constituted there.

OM8. Metropolitan threshold

For Article 243P, a metropolitan area has a population of:

A. twenty lakh or more. B. three lakh or more. C. five lakh or more. D. ten lakh or more.

Answer: D.

Explanation: [FACT] The constitutional threshold is ten lakh or more, plus the notified multi-area character.

OM9. Territorial seats

Territorial seats in a municipality are:

A. directly elected from wards. B. filled by State civil servants. C. indirectly elected by an electoral college. D. nominated by the Governor.

Answer: A.

Explanation: [FACT] Article 243R requires direct election for territorial seats.

OM10. Wards Committees

Article 243S makes Wards Committees mandatory in a municipality with population:

A. ten lakh or more. B. three lakh or more. C. above one lakh only. D. as fixed annually by Parliament.

Answer: B.

Explanation: [FACT] The threshold is three lakh or more.

OM11. Women's seat reservation

The constitutional minimum reservation of total municipal seats for women is:

A. one-fourth. B. two-thirds. C. not less than one-third. D. one-half.

Answer: C.

Explanation: [FACT] It includes seats reserved for SC/ST women; States may provide a higher share.

OM12. Backward-class reservation

Reservation in municipalities for backward classes:

A. is fixed by the Union Finance Commission. B. is prohibited. C. is constitutionally fixed at 27 per cent. D. may be provided by the State legislature.

Answer: D.

Explanation: [FACT] Article 243T permits State-law provision.

OM13. Normal duration

The normal duration of a municipality is:

A. five years from its first meeting. B. five years from notification of election. C. four years from first budget. D. six years from constitution.

Answer: A.

Explanation: [FACT] Article 243U uses the date appointed for the first meeting.

OM14. Short remainder

If a dissolved municipality had less than six months of its term remaining:

A. Parliament appoints an administrator. B. an election need not be held merely for that remaining period. C. the previous council automatically revives. D. a full five-year replacement must be elected.

Answer: B.

Explanation: [FACT] This is the express short-remainder qualification in Article 243U.

OM15. Minimum age

A person who has attained which age cannot be disqualified merely for being below 25?

A. 23. B. 18. C. 21. D. 20.

Answer: C.

Explanation: [FACT] Article 243V sets the relevant age at 21.

OM16. Election authority

Municipal elections are constitutionally supervised by the:

A. Election Commission of India under Article 324. B. Governor under Article 243R. C. State Finance Commission under Article 243Y. D. State Election Commission under Article 243ZA.

Answer: D.

Explanation: [FACT] The SEC controls municipal electoral rolls and elections.

OM17. Article 243W

Which proposition best describes Article 243W?

A. State legislatures may endow municipalities with self-government powers and Twelfth Schedule responsibilities. B. Parliament directly assigns municipal staff. C. The MPC levies all municipal taxes. D. All 18 matters automatically transfer on commencement.

Answer: A.

Explanation: [FACT] The provision is enabling and works through State law.

OM18. Twelfth Schedule matter

Which is expressly in the Twelfth Schedule?

A. Inter-State trade. B. Urban planning including town planning. C. Currency. D. Police.

Answer: B.

Explanation: [FACT] Urban and town planning is the first listed matter.

OM19. Article 243X

Article 243X concerns:

A. electoral disputes. B. reservation of chairperson offices. C. municipal taxes, assignments, grants and funds. D. metropolitan-area definition.

Answer: C.

Explanation: [FACT] It is the core municipal-finance enabling provision.

OM20. State Finance Commission

Municipal finance review by the SFC is addressed in:

A. Article 243ZA. B. Article 243ZD. C. Article 243Z. D. Article 243Y.

Answer: D.

Explanation: [FACT] Article 243Y applies the Article 243-I SFC to municipalities.

OM21. Accounts and audit

State-law provision for municipal accounts and audit is enabled by:

A. Article 243Z. B. Article 243T. C. Article 243W. D. Article 243P.

Answer: A.

Explanation: [FACT] Article 243Z is the accounts-and-audit provision.

OM22. Union Territories

Application of Part IX-A to Union Territories is addressed by:

A. Article 243ZF. B. Article 243ZB. C. Article 243ZC. D. Article 243ZA.

Answer: B.

Explanation: [FACT] The President may specify exceptions and modifications.

OM23. Excluded areas

Which Article concerns non-application to specified Scheduled/tribal areas?

A. Article 243ZB. B. Article 243ZG. C. Article 243ZC. D. Article 243ZD.

Answer: C.

Explanation: [FACT] Parliament may extend Part IX-A to such areas with exceptions/modifications.

OM24. Electoral litigation bar

The bar on ordinary court interference in municipal electoral matters is in:

A. Article 243ZE. B. Article 243ZF. C. Article 243ZA. D. Article 243ZG.

Answer: D.

Explanation: [FACT] An election is challenged through the election-petition route prescribed by State law.

OM25. DPC fraction

The elected-member floor in a District Planning Committee is:

A. four-fifths. B. one-half. C. two-thirds. D. three-fourths.

Answer: A.

Explanation: [FACT] DPC 4/5 and MPC 2/3 is a standard close-option trap.

OM26. MPC fraction

The elected-member floor in a Metropolitan Planning Committee is:

A. four-fifths. B. two-thirds. C. one-third. D. three-fourths.

Answer: B.

Explanation: [FACT] Members come from elected municipal members and Panchayat chairpersons.

OM27. DPC function

The DPC primarily:

A. audits State departments. B. appoints municipal commissioners. C. consolidates Panchayat and municipal plans into a draft district plan. D. conducts municipal elections.

Answer: C.

Explanation: [FACT] Article 243ZD integrates rural and urban planning at district level.

OM28. MPC planning input

Which is a distinctive constitutional consideration for an MPC?

A. Inter-State river adjudication. B. Delimitation of parliamentary constituencies. C. Appointment of High Court judges. D. Likely investments by Union and State agencies in the metropolitan area.

Answer: D.

Explanation: [FACT] Article 243ZE explicitly requires regard to such investments and available resources.

OM29. Property-tax reform

Which step most directly expands a lawful property-tax base?

A. Complete, updated property mapping linked to transparent assessment. B. Replacing all taxes with grants. C. Borrowing for routine salary expenditure. D. Dissolving Ward Committees.

Answer: A.

Explanation: [ANALYSIS] Coverage, valuation, billing and collection form the revenue chain.

OM30. User charges

The most defensible design for basic-service user charges is:

A. no billing or measurement under any circumstances. B. transparent charges with service standards and lifeline protection. C. automatic privatisation. D. identical flat charges regardless of service or poverty.

Answer: B.

Explanation: [ANALYSIS] O&M finance must be balanced with affordability and accountability.

OM31. Municipal bonds

Which statement is correct?

A. A municipal bond is a constitutional grant. B. Every ULB can issue one without State-law or market conditions. C. It is debt finance requiring a credible repayment stream. D. It eliminates the need for audited accounts.

Answer: C.

Explanation: [FACT] Bonds finance capital but create debt-service obligations.

OM32. Mayor-commissioner split

The phrase "responsibility-authority mismatch" most directly describes:

A. the ECI conducting municipal elections. B. Parliament fixing every property-tax rate. C. an MPC replacing the State legislature. D. an elected mayor blamed for services controlled by a State-appointed executive or parastatal.

Answer: D.

Explanation: [ANALYSIS] Visible political responsibility may not match control over staff and budgets.

OM33. Three Fs

The three Fs of genuine devolution are:

A. Functions, Functionaries and Funds. B. Functions, Federalism and Franchise. C. Fees, Fines and Funds. D. Federalism, Fraternity and Finance.

Answer: A.

Explanation: [FACT] They are inputs that must converge into functionality.

OM34. Parastatal problem

The strongest criticism of fragmented parastatal governance is that it:

A. makes metropolitan coordination impossible in every case. B. separates service authority from elected municipal answerability. C. always lacks technical expertise. D. is prohibited by Part IX-A.

Answer: B.

Explanation: [ANALYSIS] The issue is accountability fragmentation, not the necessary absence of expertise.

OM35. XVI Finance Commission ULB performance

Under the official 2026-31 recommendation, the ULB performance component is principally linked to:

A. creation of a cantonment board. B. mayoral direct election. C. the specified ULB own-source-revenue growth condition. D. abolition of property tax.

Answer: C.

Explanation: [CURRENT] Entry conditions separately cover constitution, accounts and SFC discipline.

OM36. AMRUT 2.0 reform

Which is part of the official AMRUT 2.0 municipal-reform framework?

A. Elimination of all user charges. B. Suspension of double-entry accounting. C. Replacement of municipalities by district administration. D. Property-tax/user-charge reform, GIS planning and stronger creditworthiness.

Answer: D.

Explanation: [CURRENT] These reforms connect water security with municipal financial and governance capacity.

Remedial MCQs - strict continuation A -> A -> B -> D rotation

RM1. Constitution Parts

Which set is correctly matched?

A. Municipalities-Part IX-A; Emergencies-Part XVIII; Amendment-Part XX. B. Municipalities-Part IX; Emergencies-Part XVII; Amendment-Part XXI. C. Municipalities-Part VIII; Emergencies-Part XX; Amendment-Part IX-A. D. Municipalities-Part X; Emergencies-Part XIX; Amendment-Part XVIII.

Answer: A.

Explanation: [FACT] This is the exact doctrinal core of UPSC Prelims 2024 Q74.

RM2. Ward threshold

A city with a population of exactly three lakh:

A. must become an industrial township. B. falls within the Wards Committee requirement. C. automatically becomes a metropolitan area. D. is outside Article 243S.

Answer: B.

Explanation: [FACT] Article 243S says three lakh or more.

RM3. Schedules

Which statement is correct?

A. The Twelfth Schedule governs Panchayats. B. Neither Schedule relates to local government. C. The Eleventh Schedule has 29 matters and the Twelfth has 18. D. Both Eleventh and Twelfth Schedules contain 29 matters.

Answer: C.

Explanation: [FACT] This is a recurring close-option distinction.

RM4. Planning fractions

Choose the correctly matched pair:

A. DPC-one-half; MPC-two-thirds. B. DPC-four-fifths; MPC-three-fourths. C. DPC-two-thirds; MPC-four-fifths. D. DPC-four-fifths; MPC-two-thirds.

Answer: D.

Explanation: [FACT] Do not swap the constitutional elected floors.

RM5. Reconstituted municipality

After premature dissolution, a newly constituted municipality ordinarily serves:

A. only the remainder of the previous body's term. B. at the Governor's pleasure. C. a fresh five-year term in every case. D. until the next Lok Sabha election.

Answer: A.

Explanation: [FACT] Article 243U preserves the original tenure clock.

RM6. Expert representation

A person represented for special knowledge of municipal administration:

A. conducts the municipal election. B. has no right to vote in municipal meetings under Article 243R. C. is directly elected from a ward. D. must be the mayor.

Answer: B.

Explanation: [FACT] Expert input is permitted without voting power.

RM7. GIS caution

Which statement is most accurate?

A. GIS eliminates the need for valuation rules. B. GIS automatically creates legal title. C. GIS improves records, but lawful assessment, grievance and collection remain necessary. D. GIS is unrelated to property-tax administration.

Answer: C.

Explanation: [ANALYSIS] Technology improves the chain but cannot replace law and administration.

RM8. Bond suitability

Municipal bonds are least suitable for:

A. long-lived water infrastructure with a repayment plan. B. pooled infrastructure with structured State support. C. a creditworthy ULB with audited disclosure. D. permanently financing routine deficits without a repayment stream.

Answer: D.

Explanation: [ANALYSIS] Borrowing cannot sustainably replace recurrent fiscal capacity.

RM9. Census and statutory status

Which statement is correct?

A. A census town may be statistically urban without a statutory ULB. B. Census classification is made by the State Election Commission. C. Every census town is a Municipal Corporation. D. Every Nagar Panchayat is an industrial township.

Answer: A.

Explanation: [FACT] Statistical urban status and municipal legal status are distinct.

RM10. Industrial township

The industrial-township proviso:

A. applies automatically to every factory. B. allows the Governor to specify an exception where industrial services justify it. C. creates an MPC. D. abolishes State municipal law.

Answer: B.

Explanation: [FACT] Specification and service conditions matter.

RM11. SPV accountability

Which reform best reconciles a mission SPV with municipal democracy?

A. permanent secrecy of contracts. B. treating the SPV as a constitutional municipality. C. council-approved plans, public reporting and clear transfer of assets/O&M. D. removal of council budget scrutiny.

Answer: C.

Explanation: [ANALYSIS] Project focus should be integrated with elected accountability and long-term ownership.

RM12. Evidence discipline

For a Mains claim that municipalities remain fiscally weak, the strongest structure is:

A. only a generic conclusion. B. assertion plus an undated percentage. C. a list of schemes without mechanism. D. Article 243X/243Y -> revenue/SFC mechanism -> official XVI FC evidence -> State-variation qualification.

Answer: D.

Explanation: [ANALYSIS] Named evidence must prove the claim and be qualified.

PYQS AND ANSWER PRACTICE

Verified routed PYQs

PYQ 1 - UPSC GS-II 2023, Q3 - direct owner

Verified neutral demand: Comment on the extent to which States have empowered urban local bodies functionally and financially. **10 marks | 150 words | Directive: Comment**

Demand decoding

- "Comment" requires a clear extent-based judgement, not a feature list.
- "Functionally and financially" requires two explicit dimensions.
- "States" requires Article 243W/243X discretion and State variation.

Model solution

Thesis: [FACT] The 74th Amendment secured elected municipalities, but functional and financial empowerment remains incomplete because Articles 243W and 243X operate through State law.

Functional extent: [FACT] Article 243W and the Twelfth Schedule list 18 matters, yet activity mapping, staff and assets often remain split among development authorities, water boards and State departments. [ANALYSIS] Thus, a municipality may be responsible to voters without controlling the implementing agency. DPCs and MPCs under Articles 243ZD/ZE provide integrated planning, but their operational authority varies.

Financial extent: [FACT] Article 243X enables taxes, assigned revenues, grants and funds; Article 243Y requires SFC review. [ANALYSIS] Under-used property tax, weak user-charge systems, irregular SFC follow-through and tied grants constrain discretion. [CURRENT] The XVI Finance Commission's OSR, accounts and SFC-linked grant design recognises these gaps.

Qualification: [LIMIT] Regular elections, reservation and stronger State examples show genuine progress, so failure is uneven rather than absolute.

Verdict: States have devolved municipal form more consistently than municipal power; complete empowerment requires functions, staff and predictable finance to move together.

Why this earns marks: It answers both mandated dimensions, uses exact Articles, explains mechanisms, adds dated official evidence and gives a graded rather than absolute judgement.

How to improve: In 150 words, use two labelled dimensions-functions and finance-then one State-variation qualification and a one-line verdict.

PYQ 2 - UPSC GS-II 2024, Q5 - supporting Governance cross-owner

Verified question: Analyse the role of local bodies in providing good governance at the local level and bring out the pros and cons of merging rural local bodies with urban local bodies. **10 marks | 150 words**

Model solution

Thesis: [ANALYSIS] Local bodies improve good governance when the three Fs convert proximity into responsive services; merger is useful only where a functionally urban settlement has outgrown rural administration.

Good-governance role: [FACT] Panchayats and municipalities institutionalise elected representation, reservation, local planning, service delivery and fiscal review. Ward-level evidence can improve targeting; local taxation can strengthen taxpayer accountability. [LIMIT] Parastatals, weak staff control and tied finance may leave responsibility without capacity.

Merger advantages: unified land-use and infrastructure planning; economies of scale in water, waste and transport; removal of boundary conflicts; access to urban finance and technical systems.

Merger costs: diluted rural representation; loss of Gram Sabha proximity; higher or altered taxes/user charges; disruption of records, assets and rural entitlements; greater administrative distance.

Named evidence: [FACT] Article 243Q recognises transitional areas through Nagar Panchayats; Article 243ZD integrates rural and urban district plans. [CURRENT] XVI Finance Commission recommends a phased rural-to-urban transition policy.

Verdict: Use transparent density, employment, contiguity, finance and service criteria, with consultation and transition protection, rather than automatic merger.

Why this earns marks: It separates role, pros and cons, uses constitutional mechanisms and ends with criteria-based balance.

How to improve: Compress the role of local bodies to two mechanisms; spend the balance on merger benefits, costs and a criteria-based alternative.

PYQ 3 - UPSC GS-II 2020, Q13 - supporting three-F cross-owner

Verified neutral demand: Highlight the challenges in moving local institutions from functions, functionaries and funds to actual functionality. **15 marks | 250 words**

Model solution

Thesis: [ANALYSIS] Functions, functionaries and funds are institutional inputs; functionality exists only when a local body can turn them into timely, equitable and accountable services.

Functions: [FACT] Article 243W is enabling. A State may list a Twelfth Schedule subject while retaining individual activities in a parastatal. [ANALYSIS] Ambiguous activity mapping produces duplication and blame shifting.

Functionaries: Municipal engineers, health staff and planners may remain controlled by State cadres or agencies. [ANALYSIS] The elected council can request but cannot direct, breaking answerability.

Funds: [FACT] Article 243X depends on State authorisation and Article 243Y on SFC follow-through. Weak property records, low collection, tied transfers and delayed releases prevent multi-year planning.

Cross-cutting barriers: fragmented data and assets; weak accounting/audit; short political tenure; procurement capacity; inactive Ward Committees; DPC/MPC weakness; unequal fiscal bases; parallel SPVs and boards.

Reform: binding activity maps, staff-control protocols, predictable SFC transfers, GIS-backed fair taxation, double-entry audited accounts, professional municipal cadres, ward participation and service-level disclosure. [CURRENT] XVI Finance Commission conditions and AMRUT 2.0 reforms can support this transition.

Qualification: [LIMIT] regional utilities remain necessary where economies of scale are real; functionality requires accountable coordination, not indiscriminate transfer.

Verdict: A local body is functional when authority, capacity and public responsibility converge around measurable services.

Why this earns marks: It follows the stem's three-F structure, then adds the missing outcome and accountability layer with named constitutional and current evidence.

How to improve: Use a Functions-Functionaries-Funds table and reserve the final quarter for measurable functionality and accountable coordination.

PYQ 4 - UPSC Prelims 2024, Q74 - official local paper and key verified

Question: Which of the following statements about the Constitution of India are correct?

1. Powers of the Municipalities are given in Part IX-A.
2. Emergency provisions are given in Part XVIII.
3. Provisions related to amendment of the Constitution are given in Part XX.

A. 1 and 2 only B. 2 and 3 only C. 1 only D. 1, 2 and 3

Verified solution: All three statements are correct. The locally held official UPSC Set-A answer key records **option D**.

- [FACT] Part IX-A concerns Municipalities.
- [FACT] Part XVIII contains Emergency Provisions.
- [FACT] Part XX contains Article 368 on constitutional amendment.
- [LIMIT] The routed ledger itself intentionally does not store answer letters; the key was checked directly against the locally held official Set-A answer-key PDF.

Original solved Mains practice

M1. "The 74th Amendment constitutionalised municipalities, but not municipal devolution." Examine. (10 marks, 150 words)

Model solution

Thesis: [FACT] The 74th Amendment entrenched municipal existence, elections and inclusion, but Articles 243W and 243X leave substantial functional and fiscal power to State legislation.

Constitutionalisation: Part IX-A creates three municipal types, directly elected wards, reservation, five-year tenure, SEC elections, SFC review and DPC/MPC planning. [ANALYSIS] These prevent municipalities from remaining merely optional administrative creations.

Devolution gap: The Twelfth Schedule lists 18 matters, yet State activity maps may leave land use, water or transport with parastatals. Municipal staff often remain State-controlled. Article 243X authorises only State-permitted

taxes; weak property-tax administration and irregular SFC follow-through constrain discretion.

Named current evidence: [CURRENT] XVI Finance Commission links grants to accounts, SFC discipline and OSR, confirming that core fiscal institutions remain incomplete.

Qualification: [LIMIT] State variation and regular elections show that the framework can support genuine empowerment.

Verdict: The amendment constitutionalised democratic form more completely than operational self-government; devolution requires the three Fs to accompany the constitutional shell.

Why this earns marks: It distinguishes constitutional status from power, uses exact Articles and supports the extent judgement with current evidence and qualification.

How to improve: For 150 words, contrast mandatory democratic form with enabling Articles 243W/X and give one parastatal and one fiscal consequence.

M2. Assess the constitutional logic and democratic cost of the industrial-township exception. (10 marks, 150 words)

Model solution

Thesis: [FACT] Article 243Q permits the Governor to specify an industrial township where an industrial establishment provides or proposes municipal services; the exception recognises functional service capacity but can reduce representative accountability.

Logic: A large integrated industrial estate may already operate water, roads, sanitation, lighting and maintenance. Avoiding duplicate administration can improve technical coordination and cost recovery.

Democratic cost: [ANALYSIS] Company-provided services do not equal elected self-government. Residents may lack a municipal council, ward representation, public budget debate and ordinary electoral sanctions over land use or service priorities.

Safeguards: transparent specification criteria; periodic review; resident grievance and participation mechanisms; public disclosure; State regulatory oversight; clear environmental and labour-settlement responsibilities; transition to an elected municipality when conditions change.

Qualification: [LIMIT] The proviso is discretionary, not automatic for every industrial area.

Verdict: The exception is defensible as a narrow service-delivery arrangement only when democratic and regulatory safeguards prevent a private administrative enclave.

Why this earns marks: It explains the constitutional mechanism, analyses both efficiency and democratic legitimacy, and gives proportionate safeguards.

How to improve: State the exact Article 243Q test first, then balance service efficiency against representation and propose periodic review.

M3. Analyse the causes of municipal fiscal weakness and propose an equitable reform strategy. (15 marks, 250 words)

Model solution

Thesis: [ANALYSIS] Municipal fiscal weakness is a chain failure involving State authorisation, local revenue administration, intergovernmental transfers and service credibility, not simply low grant volume.

Constitutional structure: [FACT] Article 243X enables local taxes, assigned revenues, grants and funds; Article 243Y requires SFC review; Article 280(3)(c) permits Union supplementation through State Consolidated Funds.

Causes: incomplete property registers, undervaluation, exemptions, weak billing and collection; politically difficult user charges; small and unequal tax bases; irregular SFC cycles and State transfers; tied grants; weak accounts, asset records and procurement; lack of control over revenue staff; poor services that reduce taxpayer willingness.

Reform strategy: GIS-linked unique property IDs, transparent valuation and appeal; wider base before indiscriminate rate increases; digital billing plus field enforcement; lifeline water/sanitation protection with fair user charges; asset inventories and lease reform; double-entry accounts, timely audit and council disclosure; implementation of SFC recommendations and predictable equalisation; bonds/pooled finance only for viable capital projects.

Named evidence: [CURRENT] XVI Finance Commission recommends GIS property-tax systems, online accounts, SFC discipline and OSR-linked ULB performance grants. AMRUT 2.0 links property tax, user charges, accounting and creditworthiness.

Qualification: [LIMIT] Own revenue cannot equalise structurally different cities; State and Union transfers remain essential.

Verdict: Equitable fiscal autonomy means stronger local effort plus transparent equalisation, not replacing grants with regressive charges.

Why this earns marks: It links constitutional channels to administrative mechanisms, gives a sequenced and equity-aware solution, and uses two dated official anchors.

How to improve: Classify reforms under tax base, collection, transfers and equity; retain one RBI and one Finance Commission anchor.

M4. "The Metropolitan Planning Committee is the constitutional answer to a city-region problem, but not yet necessarily the operational answer." Discuss. (15 marks, 250 words)

Model solution

Thesis: [FACT] Article 243ZE designs the MPC to prepare a metropolitan development plan across municipal and Panchayat boundaries; [ANALYSIS] its relevance is high because functional cities exceed administrative borders, but its practical authority depends on State law and agency alignment.

Constitutional design: A metropolitan area has ten lakh or more population under Article 243P. At least two-thirds of MPC members are elected by and from municipal members and Panchayat chairpersons. The plan must consider local plans, coordinated spatial planning, shared resources, infrastructure, environment, Union/State priorities and public-agency investments.

Why needed: commuting, housing, transport, drainage, air sheds, solid-waste chains and water sources operate regionally. Independent municipal plans create spillovers and contradictory land use.

Operational deficit: development authorities and transport/water agencies may retain budgets, data and statutory planning powers; MPCs may lack professional staff, fiscal authority or control over agency investment. A plan forwarded to the State can remain advisory.

Reform: statutory primacy or mandatory conformity for major agency plans; permanent metropolitan planning secretariat; open spatial data; municipal/Panchayat participation; ward-to-region consultation; investment and climate-risk integration; public monitoring.

Qualification: [LIMIT] Technical regional agencies remain useful; the goal is democratically accountable coordination, not their mechanical abolition.

Verdict: The MPC becomes operational when elected regional planning shapes budgets and agency action, not merely when a committee exists.

Why this earns marks: It explains the Article in detail, proves the functional need, identifies the mechanism of weakness and proposes institution-specific reform.

How to improve: Draw the municipal/Panchayat plans -> MPC -> regional plan chain, then identify why agency budgets may still bypass it.

M5. Evaluate the mayor-commissioner model from the perspective of democratic accountability and administrative professionalism. (15 marks, 250 words)

Model solution

Thesis: [ANALYSIS] The mayor-commissioner model can combine political representation with professional administration, but incoherent allocation of tenure, staff and executive authority often produces accountability without control.

Democratic case: The mayor and council carry the electoral mandate, aggregate ward priorities, approve budgets and face voters. A stable mayor can coordinate city-wide choices and publicly own outcomes.

Professional case: A trained commissioner provides continuity, legal compliance, engineering/procurement capacity and coordination with State departments.

Structural problem: [FACT] Part IX-A leaves chairperson and executive design to State law. In many systems, the mayor is short-tenured or primarily deliberative while the State-appointed commissioner controls staff and implementation. Citizens blame the visible elected head, while the executive remains upwardly accountable.

Reform options: co-terminous or adequate political tenure; statutory division of policy and administration; council confirmation/oversight safeguards; performance contract for commissioner; transparent transfer/removal; strong standing committees; professional municipal cadre; public service dashboards and audit.

Counter-risk: [LIMIT] A directly elected or powerful mayor may clash with the council, centralise contracts or politicise administration.

Verdict: Neither elected leadership nor bureaucratic professionalism should dominate absolutely; authority, tenure, scrutiny and removal must be designed as one accountable system.

Why this earns marks: It avoids a simplistic pro-mayor answer, identifies the legal source of variation and balances mandate, expertise and safeguards.

How to improve: Separate elected mandate, professional execution and safeguards; avoid assuming one national mayoral model.

M6. Do parastatals and mission SPVs strengthen or weaken urban local self-government? Critically examine. (15 marks, 250 words)

Model solution

Thesis: [ANALYSIS] Parastatals and SPVs can add scale, finance and expertise, but they weaken self-government when they separate control of core services from elected municipal plans and scrutiny.

Strengthening role: water boards, transport bodies and development authorities can manage networks beyond one municipal boundary; SPVs can ring-fence finance, recruit specialists and execute complex projects quickly.

Weakening mechanism: Twelfth Schedule matters such as planning, water and sanitation may remain outside municipal budget and staff control. Multiple bodies create overlapping mandates, data silos and blame shifting. Smart Cities SPVs may prioritise project areas and upward mission reporting rather than city-wide council choices.

Named constitutional evidence: [FACT] Article 243W envisages municipalities as institutions of self-government; Articles 243ZD/ZE seek integrated elected planning. Parallel agencies become problematic when they bypass these routes.

Reconciliation: clear activity maps; council-approved service and capital plans; metropolitan coordination through MPC; service-level agreements; shared accounts/data; mandatory public reporting; elected representation with conflict safeguards; time-bound SPVs; clear asset and O&M transfer.

Qualification: [LIMIT] Municipal control without technical capacity can also fail; specialist regulation and regional infrastructure may remain external.

Verdict: These bodies strengthen cities only when expertise is nested within elected planning and answerability; otherwise they build projects while hollowing out municipal government.

Why this earns marks: It distinguishes parastatals from SPVs, supplies benefits and costs, anchors criticism in Articles and proposes integration rather than abolition.

How to improve: Distinguish permanent parastatals from mission SPVs, then propose service agreements and elected-plan conformity instead of abolition.

M7. Design a governance framework for India's metropolitan and peri-urban regions. (20 marks, 250 words)

Model solution

Thesis: [ANALYSIS] Metropolitan and peri-urban governance needs a nested model: neighbourhood democracy for proximity, empowered municipalities for local services and an elected regional layer for cross-boundary systems.

Classification and transition: apply transparent Article 243Q criteria - density, non-farm work, revenue, contiguity and economic importance. Use a time-bound State rural-to-urban transition policy, impact assessment, record/asset

transfer and citizen consultation. [CURRENT] XVI Finance Commission explicitly supports this direction.

Local layer: activate Wards Committees, publish neighbourhood service data, protect representation of newly merged areas and phase property tax/user charges with lifeline safeguards.

Municipal layer: binding activity maps for Twelfth Schedule services; control over staff and O&M; predictable SFC transfers; GIS-based property administration; audited double-entry accounts.

Regional layer: operationalise MPC under Article 243ZE with a permanent secretariat, open regional data and authority to align transport, housing, drainage, water, environment and major public investment. Require parastatal and SPV plans to conform or explain divergence.

Coordination and equity: metropolitan equalisation for poorer jurisdictions; shared-service contracts; climate and disaster-risk planning; grievance routing; outcome audit.

Qualification: [LIMIT] merger is not always necessary; joint service authorities or phased Nagar Panchayat status may preserve voice while gaining scale.

Verdict: The objective is not a larger bureaucracy but congruence between the lived city-region and democratically accountable planning, finance and services.

Why this earns marks: It covers classification, institutions, finance, democracy, regional systems, equity and alternatives, with constitutional and current evidence.

How to improve: Organise the 20-marker at neighbourhood, municipality and metropolitan-region levels, with a transition safeguard for peri-urban residents.

M8. Prepare a reform roadmap to move municipalities from constitutional status to measurable functionality. (20 marks, 250 words)

Model solution

Thesis: [ANALYSIS] Municipal functionality requires a sequenced State-local compact aligning the three Fs with capacity, planning and public accountability.

1. Functions: enact activity-level maps for all Twelfth Schedule matters; identify the policy setter, budget holder, asset owner and service operator; remove duplication.

2. Functionaries: create professional municipal cadres and technical pools; place operational staff under defined council/commissioner accountability; publish vacancies and service responsibilities.

3. Funds: implement SFC calendars and accepted recommendations; modernise GIS property tax with fair appeals; adopt equity-aware user charges; publish transfer calendars; use bonds only for viable capital assets. [CURRENT] Use XVI Finance Commission entry/performance conditions as reform leverage.

4. Democratic executive: give the mayor/council adequate tenure and clear policy powers; preserve commissioner professionalism through transparent performance and removal rules; strengthen standing and Wards Committees.

5. Planning: make DPC/MPC plans meaningful for agency investment; integrate land use, mobility, water, housing and climate risk.

6. Accountability/capacity: double-entry accounts, timely independent audit, procurement systems, citizen charters, grievance redress and service-level verification. AMRUT 2.0 tools can support this layer.

7. Parallel agencies: bind parastatals and SPVs to council-approved outcomes, shared data and asset/O&M arrangements.

Qualification: [LIMIT] autonomy must coexist with State standards and equalisation.

Verdict: Functionality exists when an elected municipality can decide, direct, finance and publicly explain measurable service outcomes.

Why this earns marks: It provides a complete implementation sequence, named evidence, institutional safeguards and an outcome-based test rather than a generic wish list.

How to improve: Sequence activity mapping, staff control, finance, planning, accountability and outcome measurement; name the responsible actor for each.
