Education and Human-Resource Development - Solved Practice Workbook

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies What this owner holds and the demands routed to it?

A. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. B. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. C. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. D. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use.

Answer: A. Explanation: This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under What this owner holds and the demands routed to it?

A. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. B. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure

and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. C. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. D. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law.

Answer: B. Explanation: This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of What this owner holds and the demands routed to it?

A. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. B. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. C. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. D. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education

creates no statutory entitlement, and saying otherwise is a status error.

Answer: C. Explanation: This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about What this owner holds and the demands routed to it?

A. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. B. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. C. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. D. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here.

Answer: D. Explanation: This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies Education as the second capability-conversion pillar?

A. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. B. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. C. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. D. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law.

Answer: A. Explanation: Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under Education as the second capability-conversion pillar?

A. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. B. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. C. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. D. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and

stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law.

Answer: B. Explanation: Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of Education as the second capability-conversion pillar?

A. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. B. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. C. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. D. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error.

Answer: C. Explanation: Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about Education as the second capability-conversion pillar?

A. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. B. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of

focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. C. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. D. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question.

Answer: D. Explanation: Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies Article 21-A and the Eighty-sixth Amendment?

A. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. B. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. C. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. D. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error.

Answer: A. Explanation: Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. The remaining options belong to different chronology, actor or analytical categories.

Q10. Which chronology card should be filed under Article 21-A and the Eighty-sixth Amendment?

A. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. B. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. C. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. D. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy.

Answer: B. Explanation: Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of Article 21-A and the Eighty-sixth Amendment?

A. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. B. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. C. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. D. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the

stated object of school policy.

Answer: C. Explanation: Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about Article 21-A and the Eighty-sixth Amendment?

A. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. B. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. C. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. D. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right.

Answer: D. Explanation: Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies The Right to Education Act, 2009 and its private-school obligation?

A. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. B. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. C. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for

ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. D. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy.

Answer: A. Explanation: The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under The Right to Education Act, 2009 and its private-school obligation?

A. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. B. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. C. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. D. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy.

Answer: B. Explanation: The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of The Right to Education Act, 2009 and its private-school obligation?

A. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. B. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. C. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. D. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea.

Answer: C. Explanation: The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about The Right to Education Act, 2009 and its private-school obligation?

A. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. B. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. C. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. D. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the

public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use.

Answer: D. Explanation: The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies The 2019 amendment and the detention question?

A. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. B. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. C. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. D. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy.

Answer: A. Explanation: The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under The 2019 amendment and the detention question?

A. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. B. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. D. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy.

Answer: B. Explanation: The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of The 2019 amendment and the detention question?

A. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. B. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. C. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. D. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later

rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage.

Answer: C. Explanation: The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about The 2019 amendment and the detention question?

A. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. B. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. C. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. D. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law.

Answer: D. Explanation: The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies The National Education Policy, 2020 and its status?

A. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. B. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as

one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. C. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. D. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy.

Answer: A. Explanation: The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under The National Education Policy, 2020 and its status?

A. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. B. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. C. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. D. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy.

Answer: B. Explanation: The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care

and education creates no statutory entitlement, and saying otherwise is a status error. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of The National Education Policy, 2020 and its status?

A. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. B. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. C. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. D. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India.

Answer: C. Explanation: The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about The National Education Policy, 2020 and its status?

A. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. B. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. C. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher

education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. D. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error.

Answer: D. Explanation: The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies Samagra Shiksha as the umbrella school scheme?

A. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. B. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. C. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. D. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy.

Answer: A. Explanation: Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under Samagra Shiksha as the umbrella school scheme?

A. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. B. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. C. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. D. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India.

Answer: B. Explanation: Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of Samagra Shiksha as the umbrella school scheme?

A. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. B. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. C. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. D. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022

learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India.

Answer: C. Explanation: Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about Samagra Shiksha as the umbrella school scheme?

A. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. B. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. C. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. D. Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy.

Answer: D. Explanation: Samagra Shiksha is the integrated centrally sponsored scheme of the education ministry that merges the earlier elementary and secondary programmes together with teacher education into a single umbrella, with Centre-State cost sharing covering infrastructure, the State quota of teacher salaries, training, information and communication technology, girls' hostels and inclusive education; two errors follow from misreading it, namely treating it as elementary-only when it covers elementary, secondary and teacher education, and treating it as a replacement for the Act when it is the scheme that implements the Act and the policy. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies NIPUN Bharat and the foundational-learning target?

A. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. B. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. C. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. D. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India.

Answer: A. Explanation: The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under NIPUN Bharat and the foundational-learning target?

A. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. B. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. C. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. D. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data

system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis.

Answer: B. Explanation: The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of NIPUN Bharat and the foundational-learning target?

A. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. B. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. C. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. D. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes.

Answer: C. Explanation: The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about NIPUN Bharat and the foundational-learning target?

A. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. B. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not

know about, cannot document and cannot enforce produces exactly the pattern the demand describes. C. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. D. The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy.

Answer: D. Explanation: The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Foundational literacy and numeracy and learning poverty?

A. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. B. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. C. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. D. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis.

Answer: A. Explanation: Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Foundational literacy and numeracy and learning poverty?

A. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. B. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. C. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. D. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis.

Answer: B. Explanation: Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Foundational literacy and numeracy and learning poverty?

A. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. B. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. C. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. D. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation.

Answer: C. Explanation: Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Foundational literacy and numeracy and learning poverty?

A. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. B. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. C. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. D. Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea.

Answer: D. Explanation: Foundational literacy and numeracy denotes the basic reading, writing and arithmetic competencies expected by Grade 3, and the owners record that survey evidence has documented large gaps in these competencies, which is why the policy and the mission treat foundational learning as the learning crisis rather than as one objective among many; the related global concept recorded in the Advanced owner is learning poverty, the share of ten-year-olds unable to read and understand a simple text, which adds an international benchmark to the same idea. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Gross enrolment ratio and its dated higher-education values?

A. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. B. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. C. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of

government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. D. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes.

Answer: A. Explanation: The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Gross enrolment ratio and its dated higher-education values?

A. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. B. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. C. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. D. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation.

Answer: B. Explanation: The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Gross enrolment ratio and its dated higher-education values?

A. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. B. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. C. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. D. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity.

Answer: C. Explanation: The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Gross enrolment ratio and its dated higher-education values?

A. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. B. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. C. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. D. The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group,

up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage.

Answer: D. Explanation: The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. The remaining options belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies The learning survey and its scope discipline?

A. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. B. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. C. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. D. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes.

Answer: A. Explanation: The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under The learning survey and its scope discipline?

A. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. B. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself

examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. C. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. D. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity.

Answer: B. Explanation: The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of The learning survey and its scope discipline?

A. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. B. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. C. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. D. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training.

Answer: C. Explanation: The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about The learning survey and its scope discipline?

A. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. B. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. C. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. D. The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India.

Answer: D. Explanation: The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies The conversion chain and the three measurement systems?

A. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. B. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. C. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. D. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel

whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation.

Answer: A. Explanation: The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under The conversion chain and the three measurement systems?

A. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. B. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. C. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. D. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation.

Answer: B. Explanation: The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of The conversion chain and the three measurement systems?

A. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. B. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling

recognition, certification and mobility across formal and non-formal training. C. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. D. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity.

Answer: C. Explanation: The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about The conversion chain and the three measurement systems?

A. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. B. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. C. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. D. The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis.

Answer: D. Explanation: The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies The twenty-five per cent obligation as an implementation test case?

A. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. B. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. C. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. D. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation.

Answer: A. Explanation: The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under The twenty-five per cent obligation as an implementation test case?

A. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. B. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. C. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. D. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its

success are.

Answer: B. Explanation: The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of The twenty-five per cent obligation as an implementation test case?

A. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. B. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. C. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. D. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit.

Answer: C. Explanation: The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about The twenty-five per cent obligation as an implementation test case?

A. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. B. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. C. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming

these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. D. The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes.

Answer: D. Explanation: The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Digital education, its instruments and its access qualifications?

A. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. B. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. C. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. D. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are.

Answer: A. Explanation: The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Digital education, its instruments and its access qualifications?

A. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. B. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. C. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. D. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are.

Answer: B. Explanation: The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Digital education, its instruments and its access qualifications?

A. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. B. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. C. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. D. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit.

Answer: C. Explanation: The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they

record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Digital education, its instruments and its access qualifications?

A. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. B. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. C. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. D. The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation.

Answer: D. Explanation: The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies The policy against the fourth sustainable development goal?

A. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. B. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. C. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the

academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. D. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training.

Answer: A. Explanation: The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under The policy against the fourth sustainable development goal?

A. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. B. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. C. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. D. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit.

Answer: B. Explanation: The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of The policy against the fourth sustainable development goal?

A. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. B. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. C. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. D. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit.

Answer: C. Explanation: The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about The policy against the fourth sustainable development goal?

A. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. B. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the

Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. C. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. D. The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity.

Answer: D. Explanation: The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies The skills ecosystem and its regulator?

A. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. B. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. C. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. D. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are.

Answer: A. Explanation: The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under The skills ecosystem and its regulator?

A. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. B. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. C. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. D. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit.

Answer: B. Explanation: The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of The skills ecosystem and its regulator?

A. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. B. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. C. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the

skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. D. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed.

Answer: C. Explanation: The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about The skills ecosystem and its regulator?

A. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. B. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. C. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. D. The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom

training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training.

Answer: D. Explanation: The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Vocational integration and the constraints on it?

A. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. B. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. C. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. D. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed.

Answer: A. Explanation: The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Vocational integration and the constraints on it?

A. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. B. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. C. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. D. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed.

Answer: B. Explanation: The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Vocational integration and the constraints on it?

A. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. B. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs

from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. C. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. D. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here.

Answer: C. Explanation: The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Vocational integration and the constraints on it?

A. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. B. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. C. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. D. The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are.

Answer: D. Explanation: The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation,

career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies Credit portability and multiple entry and exit?

A. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. B. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. C. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. D. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed.

Answer: A. Explanation: The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under Credit portability and multiple entry and exit?

A. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024

public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. B. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. C. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. D. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question.

Answer: B. Explanation: The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of Credit portability and multiple entry and exit?

A. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. B. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. C. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. D. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right.

Answer: C. Explanation: The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is

that portability depends on institutions actually recognising and depositing credit. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about Credit portability and multiple entry and exit?

A. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. B. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. C. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. D. The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit.

Answer: D. Explanation: The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies The higher-education regulatory position as of mid-2026?

A. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. B. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. C. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here. D. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification

regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed.

Answer: A. Explanation: The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under The higher-education regulatory position as of mid-2026?

A. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. B. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. D. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right.

Answer: C. Explanation: The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about The higher-education regulatory position as of mid-2026?

A. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. B. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. C. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. D. The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent.

Answer: D. Explanation: The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Ministry ownership, measurement boundary and honest question ownership?

A. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. B. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. D. This topic owns the education and skills half of human-resource development, namely the constitutional and statutory entitlement to elementary education, the policy restructuring that surrounds it, the umbrella scheme that funds school education, the foundational-learning mission that answers the learning crisis, the higher-education access measure and the skills ecosystem that converts schooling into employability, and its distinctive feature is that six General Studies Mains demands from 2020, 2021, 2022 and 2023 and one objective demand from 2018 are routed to it in the audited ledgers, which is the heaviest Mains load in the folder; the macro labour-market and demographic-dividend framing belongs to the Economy owner, and the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner even though this owner discusses that Act, so no demand card is manufactured for it here.

Answer: A. Explanation: The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. The remaining options belong to different chronology, actor or analytical categories.

Q78. Which chronology card should be filed under Ministry ownership, measurement boundary and honest question ownership?

A. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. B. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. C. Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. D. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right.

Answer: B. Explanation: The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Ministry ownership, measurement boundary and honest question ownership?

A. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. B. Article 21-A is the constitutional basis of the education entitlement and was inserted by the Eighty-sixth Amendment of 2002, making free and compulsory education a fundamental right for children aged six to fourteen, and the doctrinal

detail of that article belongs to the Polity owner while this topic applies the entitlement lens; the point that earns marks is that the fundamental right is age-bounded, so every claim about early childhood or secondary education must be located in policy rather than in the fundamental right. C. The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. D. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law.

Answer: C. Explanation: The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Ministry ownership, measurement boundary and honest question ownership?

A. The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error. B. The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. C. The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. D. The education ministry is the nodal ministry for the entitlement statute,

the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed.

Answer: D. Explanation: The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

VERIFIED PYQ OWNERSHIP AUDIT

Six General Studies Mains demands and one objective demand are routed to this topic in the audited routing ledgers, and each Mains demand is reproduced below as a demand card with its printed year, paper, question number, directive, marks and word limit exactly as the ledgers record them: 2020 General Studies Paper I Question 20, 2020 General Studies Paper II Question 18, 2021 General Studies Paper II Question 7, 2022 General Studies Paper II Question 18, 2023 General Studies Paper II Question 6 and 2023 General Studies Paper II Question 18. The ledger records the 2023 skill-education and employment demand as one whose two subject routes terminate in answer-complete Core, shared with the Economy owner, and that shared ownership is stated openly rather than claimed exclusively. One objective demand is also routed, namely 2018 Prelims General Studies Paper I Question 21 on teacher-qualification eligibility provisions under the entitlement statute, and the ledger records the official 2018-2023 Prelims keys as not held locally, so no option, key or inferred answer is recorded for it and it is not converted into a solved question. The Basic owner separately discusses the 2024 public-examination-integrity Act, but the audited 2024-2025 Mains routing ledger routes that question to the Governance owner, so no demand card is manufactured for it here and no ownership is claimed over it. The locally held OCR-searchable official General Studies papers were read only to confirm the printed wording of the routed Mains demands; no question was invented from them and no marking scheme or page precision was imported. Every model solution below is original work written to the repository's examiner-grade standard using the claim, named evidence, analysis and qualification pattern.

Demand decoding: The directive **answer** requires a direct position on "VERIFIED PYQ OWNERSHIP AUDIT", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The answer must resolve the Social Justice demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Analytical body:

1. **Claim and named evidence:** Define the vulnerable group, deprivation, right or policy concept and distinguish the nearest legal and measured category. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** Identify the constitutional, statutory, judicial or executive basis and the competent Union, state or local institution. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** Map rights-holder, household/community context, duty-bearer, frontline worker, provider and accountability forum. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** Trace identification, eligibility, documentation, finance, access, portability, grievance, appeal and correction. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
5. **Claim and named evidence:** Use a named Indian law, judgment, scheme, institution or official dataset with source, date, denominator and status. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
6. **Claim and named evidence:** Test intersectionality, regional variation, stigma, accessibility, privacy, fiscal adequacy, exclusion and causal limits. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.
Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The answer must resolve the Social Justice demand in "VERIFIED PYQ OWNERSHIP AUDIT".

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "VERIFIED PYQ OWNERSHIP AUDIT", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- **FACT: 2024 GS-II Q11 (15 marks):** use the Public Examinations (Prevention of Unfair Means) Act, 2024 to distinguish a law's listed public-examination authorities from university/state-board examinations. Link fair examination systems to equal access and institutional trust; do not answer it as a generic school-education question.

- **ANALYSIS:** A strong education-related answer should:
1. Cite the entitlement base (Art 21-A, RTE 2009).
 2. Distinguish access (enrolment, infrastructure) from quality (learning outcomes, FLN).
 3. Present NEP 2020 and NIPUN Bharat as the policy response to the learning crisis.
 4. Link to skills ecosystem (Skill India, NCVET, NAPS) for employability.
 5. Use ASER or AISHE data with the reporting year noted.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md, _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2018, 2020, 2021, 2022, 2023
- **Paper(s):** GS-I, GS-II, Prelims GS-I
- **Routed question demands:** 7

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2018	Prelims GS-I	21	Right to Education Act teacher qualification eligibility provisions	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2020	GS-I	20	Digital initiatives and the functioning of the education system	Elaborate your answer · 15 marks · 250 words	Core route supersedes older Advanced ownership	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2020	GS-II	18	National Education Policy 2020 and Sustainable Development Goal 4	Critically examine · 15 marks · 250 words	Core route supersedes older Advanced ownership	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2021	GS-II	7	Earn while you learn and meaningful vocational education and skilling	Comment · 10 marks · 150 words	Core route supersedes older Advanced ownership	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2022	GS-II	18	Right to Education Act 2009 and awareness about schooling	Analyse · 15 marks · 250 words	Core route supersedes older Advanced ownership	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2023	GS-II	6	Inadequate attention to Human Resource Development in India	Suggest measures · 10 marks · 150 words	Core route supersedes older Advanced ownership	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2023	GS-II	18	Skill development programmes and links between skill education and employment	Analyse the linkages · 15 marks · 250 words	Both subject routes terminate in answer-complete Core	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Right to Education Act teacher qualification eligibility provisions
- Digital initiatives and the functioning of the education system
- National Education Policy 2020 and Sustainable Development Goal 4
- Earn while you learn and meaningful vocational education and skilling
- Right to Education Act 2009 and awareness about schooling
- Inadequate attention to Human Resource Development in India
- Skill development programmes and links between skill education and employment

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- FACT: **2024 GS-II Q11 (15 marks)** directly concerns the Public Examinations

(Prevention of Unfair Means) Act, 2024. It asks both the Act's aims and whether university/state education-board examinations are covered. The answer must identify the Act's notified public-examination authorities before drawing the broader education-governance link; it must not assume universal coverage of all examinations.

- ANALYSIS: A strong education-related answer should:

1. Distinguish access (enrolment, GER) from quality (learning outcomes, FLN).

2. Cite ASER data with the survey year.
3. Present NEP 2020 and NIPUN Bharat as the policy response.
4. Acknowledge equity gaps (regional, gender, social-group GER disparities).
5. Link to skills ecosystem (NCVET, NAPS) for the school-to-employment transition.
6. Frame in capability terms: schooling must convert into learning and employability, not just enrolment.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-MAINS-GS1-GS2-ESSAY-2018-2023.md.

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2020	GS-I	20	Digital initiatives and the functioning of the education system	Elaborate your answer · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2020	GS-II	18	National Education Policy 2020 and Sustainable Development Goal 4	Critically examine · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2021	GS-II	7	Earn while you learn and meaningful vocational education and skilling	Comment · 10 marks · 150 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2022	GS-II	18	Right to Education Act 2009 and awareness about schooling	Analyse · 15 marks · 250 words	Routed to owning topic	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2023	GS-II	6	Inadequate attention to Human Resource Development in India	Suggest measures · 10 marks · 150 words	Routed to owning topic; word limit taken from the instruction block	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.
2023	GS-II	18	Skill development programmes and links between skill education and employment	Analyse the linkages · 15 marks · 250 words	Cross-cutting; employment and education both named in the stem	Prepare context, core dimensions, evidence/examples, counterpoint and a concise conclusion.

What this owner must now support

- Digital initiatives and the functioning of the education system
- National Education Policy 2020 and Sustainable Development Goal 4
- Earn while you learn and meaningful vocational education and skilling
- Right to Education Act 2009 and awareness about schooling
- Inadequate attention to Human Resource Development in India

- Skill development programmes and links between skill education and employment

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

PYQ DEMAND CARD 1 - 2020 General Studies Paper I Question 20

Demand: Digital initiatives and the functioning of the education system, asked with the instruction to elaborate your answer, 15 marks, 250 words, exactly as recorded in the audited 2018-2023 Mains routing ledger.

Status: Routed to this owner in the audited 2018-2023 Mains routing ledger, where the Core route is recorded as superseding the older Advanced ownership. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: digital initiatives have changed the reach and the administration of Indian education far more than they have changed its conversion of schooling into learning. Named evidence and example: the national digital infrastructure for school content and teacher support and the national online-course platform for higher education; the five recorded access qualifications of devices, connectivity, language, disability and study space; the conversion chain from enrolment through attendance, transition, completion and competency to employment; and the 2024 round of the annual status of education report, a non-government rural household survey, recording 23.4 per cent of government-school Standard III children able to read a Standard II text. Analysis: a digital channel multiplies the supply of content and the visibility of administrative data, which is why school-data systems and teacher training scaled quickly, but competency is produced by instruction time, teacher capacity and feedback, so where a household lacks a device, a connection, instruction in a familiar language, accessible material or a quiet place to study, the channel widens rather than narrows the gap. Qualification: the survey value must be carried with its round, rural scope, school type and competency and must not be generalised to urban India, and no coverage, download or enrolment count is asserted for either platform because such counts are periodic dashboard outputs. Why this earns marks: it elaborates a conditional effect with named instruments, named constraints and dated evidence carrying its own scope limit.

Demand decoding: The directive **answer** requires a direct position on “PYQ DEMAND CARD 1 - 2020 General Studies Paper I Question 20”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: digital initiatives have changed the reach and the administration of Indian education far more than they have changed its conversion of schooling into learning. Named evidence and example: the national digital infrastructure for school content and teacher support and the national online-course platform for higher education; the five recorded access qualifications of devices, connectivity, language, disability and study space; the conversion chain from enrolment through attendance, transition, completion and competency to employment; and the 2024 round of the annual status of education report, a non-government rural household survey, recording 23.4 per cent of government-school Standard III children able to read a Standard II text. Analysis: a digital channel multiplies the supply of content and the visibility of administrative data, which is why school-data systems and teacher training scaled quickly, but competency is produced by instruction time, teacher capacity and feedback, so where a household lacks a device, a connection, instruction in a familiar language, accessible material or a quiet place to study, the channel widens rather than narrows the gap. Qualification: the survey value must be carried with its round, rural scope, school type and competency and must not be generalised to urban India, and no coverage, download or enrolment count is asserted for either platform because such counts are periodic dashboard outputs. Why this earns marks: it elaborates a conditional effect with named instruments, named constraints and dated evidence carrying its own scope limit.

Analytical body:

1. **Claim and named evidence:** PYQ DEMAND CARD 1 - 2020 General Studies Paper I Question 20 **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

2. **Claim and named evidence:** Demand: Digital initiatives and the functioning of the education system, asked with the instruction to elaborate your answer, 15 marks, 250 words, exactly as recorded in the audited 2018-2023 Mains routing ledger. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: Claim: digital initiatives have changed the reach and the administration of Indian education far more than they have changed its conversion of schooling into learning. Named evidence and example: the national digital infrastructure for school content and teacher support and the national online-course platform for higher education; the five recorded access qualifications of devices, connectivity, language, disability and study space; the conversion chain from enrolment through attendance, transition, completion and competency to employment; and the 2024 round of the annual status of education report, a non-government rural household survey, recording 23.4 per cent of government-school Standard III children able to read a Standard II text. Analysis: a digital channel multiplies the supply of content and the visibility of administrative data, which is why school-data systems and teacher training scaled quickly, but competency is produced by instruction time, teacher capacity and feedback, so where a household lacks a device, a connection, instruction in a familiar language, accessible material or a quiet place to study, the channel widens rather than narrows the gap. Qualification: the survey value must be carried with its round, rural scope, school type and competency and must not be generalised to urban India, and no coverage, download or enrolment count is asserted for either platform because such counts are periodic dashboard outputs. Why this earns marks: it elaborates a conditional effect with named instruments, named constraints and dated evidence carrying its own scope limit.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

How to improve this answer: For "PYQ DEMAND CARD 1 - 2020 General Studies Paper I Question 20", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

PYQ DEMAND CARD 2 - 2020 General Studies Paper II Question 18

Demand: National Education Policy 2020 and Sustainable Development Goal 4. Critically examine, 15 marks, 250 words, exactly as recorded in the audited 2018-2023 Mains routing ledger.

Status: Routed to this owner in the audited 2018-2023 Mains routing ledger, where the Core route is recorded as superseding the older Advanced ownership. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: the policy is well aligned with the goal at the level of objectives and is under-specified at the level of delivery conditions, so the critical question is finance and teachers rather than intent. Named evidence and example: the fourth goal's commitment to inclusive and equitable quality education and lifelong learning for all; the policy's five plus three plus three plus four restructuring covering ages three to eight, eight to eleven, eleven to fourteen and fourteen to eighteen; its extension of focus to early childhood care and education, which remains policy and not statutory entitlement because Article 21-A is bounded to ages six to fourteen; the foundational-learning mission launched in 2021 with its Grade 3 target and recorded national target year of 2026-27; and the recorded dependency of delivery on finance, teacher supply and State capacity. Analysis: alignment is genuine because the policy adopts a learning outcome rather than an enrolment count as its object, and the mission is the first national instrument to do so, but a goal that is inclusive and equitable requires the two things the policy cannot itself supply, namely funded teacher posts and State implementation capacity, which is why an aligned policy can coexist with a persistent foundational deficit. Qualification: the policy is not a statute and must not be described as creating enforceable claims, and no expenditure share or teacher-vacancy figure is asserted here. Why this earns marks: it

examines critically by conceding alignment, locating the real contest in delivery and keeping statutory and policy status apart.

Demand decoding: The directive **answer** requires a direct position on “PYQ DEMAND CARD 2 - 2020 General Studies Paper II Question 18”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: the policy is well aligned with the goal at the level of objectives and is under-specified at the level of delivery conditions, so the critical question is finance and teachers rather than intent. Named evidence and example: the fourth goal's commitment to inclusive and equitable quality education and lifelong learning for all; the policy's five plus three plus three plus four restructuring covering ages three to eight, eight to eleven, eleven to fourteen and fourteen to eighteen; its extension of focus to early childhood care and education, which remains policy and not statutory entitlement because Article 21-A is bounded to ages six to fourteen; the foundational-learning mission launched in 2021 with its Grade 3 target and recorded national target year of 2026-27; and the recorded dependency of delivery on finance, teacher supply and State capacity. Analysis: alignment is genuine because the policy adopts a learning outcome rather than an enrolment count as its object, and the mission is the first national instrument to do so, but a goal that is inclusive and equitable requires the two things the policy cannot itself supply, namely funded teacher posts and State implementation capacity, which is why an aligned policy can coexist with a persistent foundational deficit. Qualification: the policy is not a statute and must not be described as creating enforceable claims, and no expenditure share or teacher-vacancy figure is asserted here. Why this earns marks: it examines critically by conceding alignment, locating the real contest in delivery and keeping statutory and policy status apart.

Analytical body:

1. **Claim and named evidence:** PYQ DEMAND CARD 2 - 2020 General Studies Paper II Question 18 **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** Demand: National Education Policy 2020 and Sustainable Development Goal 4. Critically examine, 15 marks, 250 words, exactly as recorded in the audited 2018-2023 Mains routing ledger. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: Claim: the policy is well aligned with the goal at the level of objectives and is under-specified at the level of delivery conditions, so the critical question is finance and teachers rather than intent. Named evidence and example: the fourth goal's commitment to inclusive and equitable quality education and lifelong learning for all; the policy's five plus three plus three plus four restructuring covering ages three to eight, eight to eleven, eleven to fourteen and fourteen to eighteen; its extension of focus to early childhood care and education, which remains policy and not statutory entitlement because Article 21-A is bounded to ages six to fourteen; the foundational-learning mission launched in 2021 with its Grade 3 target and recorded national target year of 2026-27; and the recorded dependency of delivery on finance, teacher supply and State capacity. Analysis: alignment is genuine because the policy adopts a learning outcome rather than an enrolment count as its object, and the mission is the first national instrument to do so, but a goal that is inclusive and equitable requires the two things the policy cannot itself supply, namely funded teacher posts and State implementation capacity, which is why an aligned policy can coexist with a persistent foundational deficit. Qualification: the policy is not a statute and must not be described as creating enforceable claims, and no expenditure share or teacher-vacancy figure is asserted here. Why this earns marks: it

examines critically by conceding alignment, locating the real contest in delivery and keeping statutory and policy status apart.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

How to improve this answer: For “PYQ DEMAND CARD 2 - 2020 General Studies Paper II Question 18”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

PYQ DEMAND CARD 3 - 2021 General Studies Paper II Question 7

Demand: Earn while you learn and meaningful vocational education and skilling. Comment, 10 marks, 150 words, exactly as recorded in the audited 2018-2023 Mains routing ledger.

Status: Routed to this owner in the audited 2018-2023 Mains routing ledger, where the Core route is recorded as superseding the older Advanced ownership. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: earning while learning is a sound design whose value depends on four conditions that India has only partly met. Named evidence and example: the apprenticeship promotion scheme providing stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning; the vocational education and training council as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skills ministry; the ten-level national skills qualification framework enabling recognition and mobility across formal and non-formal training; the policy proposal of vocational exposure from Grade 6 and internship or skill courses in higher education; and the recorded constraints of stigma, employer participation, career counselling and quality of matching. Analysis: the model works where the workplace supplies real tasks and the framework converts them into portable certification, so employer participation and recognition are the joints on which the whole design turns, while stigma and weak counselling determine who enters the stream at all, which is why supply-side training targets alone do not produce meaningful skilling. Qualification: no enrolment, placement or apprenticeship figure is asserted because those are periodic dashboard outputs, and the schooling-to-work claim must be located on the conversion chain rather than assumed. Why this earns marks: it comments with a stated design logic and four named constraints instead of endorsing the slogan.

Demand decoding: The directive **answer** requires a direct position on “PYQ DEMAND CARD 3 - 2021 General Studies Paper II Question 7”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: earning while learning is a sound design whose value depends on four conditions that India has only partly met. Named evidence and example: the apprenticeship promotion scheme providing stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning; the vocational education and training council as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skills ministry; the ten-level national skills qualification framework enabling recognition and mobility across formal and non-formal training; the policy proposal of vocational exposure from Grade 6 and internship or skill courses in higher education; and the recorded constraints of stigma, employer participation, career counselling and quality of matching. Why this earns marks: it comments with a stated design logic and four named constraints instead of endorsing the slogan.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

How to improve this answer: For "PYQ DEMAND CARD 3 - 2021 General Studies Paper II Question 7", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

PYQ DEMAND CARD 4 - 2022 General Studies Paper II Question 18

Demand: Right to Education Act 2009 and awareness about schooling. Analyse, 15 marks, 250 words, exactly as recorded in the audited 2018-2023 Mains routing ledger.

Status: Routed to this owner in the audited 2018-2023 Mains routing ledger, where the Core route is recorded as superseding the older Advanced ownership. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: awareness is not a soft supplement to the statutory right but the condition on which its enforceable parts actually operate. Named evidence and example: Article 21-A inserted by the Eighty-sixth Amendment of 2002 and the Right to Education Act, 2009 covering ages six to fourteen; the twenty-five per cent entry-level obligation in private unaided non-minority schools, with its recorded difficulties of delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; the 2019 amendment restoring State discretion for regular examinations in Classes V and VIII with detention only after instruction and re-examination; and the umbrella school scheme through which infrastructure, teacher training and inclusive-education support are funded. Analysis: the parts of the Act that operate automatically, such as free schooling in the public system, do not depend on a household knowing the law, whereas the parts that require a claim,

such as the private-school entry obligation, a grievance about denial or an objection to detention, are activated only by a household that knows the entitlement, holds the documents and can approach the authority, so low awareness converts a justiciable clause into a dormant one and produces the uneven access pattern the demand describes. Qualification: awareness alone cannot cure reimbursement delay or enforcement weakness, and no admission, awareness or grievance figure is asserted here. Why this earns marks: it analyses by separating self-executing from claim-dependent provisions and evidencing the difference.

Demand decoding: The directive **answer** requires a direct position on “PYQ DEMAND CARD 4 - 2022 General Studies Paper II Question 18”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: awareness is not a soft supplement to the statutory right but the condition on which its enforceable parts actually operate. Named evidence and example: Article 21-A inserted by the Eighty-sixth Amendment of 2002 and the Right to Education Act, 2009 covering ages six to fourteen; the twenty-five per cent entry-level obligation in private unaided non-minority schools, with its recorded difficulties of delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; the 2019 amendment restoring State discretion for regular examinations in Classes V and VIII with detention only after instruction and re-examination; and the umbrella school scheme through which infrastructure, teacher training and inclusive-education support are funded. Analysis: the parts of the Act that operate automatically, such as free schooling in the public system, do not depend on a household knowing the law, whereas the parts that require a claim, such as the private-school entry obligation, a grievance about denial or an objection to detention, are activated only by a household that knows the entitlement, holds the documents and can approach the authority, so low awareness converts a justiciable clause into a dormant one and produces the uneven access pattern the demand describes. Qualification: awareness alone cannot cure reimbursement delay or enforcement weakness, and no admission, awareness or grievance figure is asserted here. Why this earns marks: it analyses by separating self-executing from claim-dependent provisions and evidencing the difference.

Analytical body:

1. **Claim and named evidence:** PYQ DEMAND CARD 4 - 2022 General Studies Paper II Question 18 **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** Demand: Right to Education Act 2009 and awareness about schooling. Analyse, 15 marks, 250 words, exactly as recorded in the audited 2018-2023 Mains routing ledger. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: Claim: awareness is not a soft supplement to the statutory right but the condition on which its enforceable parts actually operate. Named evidence and example: Article 21-A inserted by the Eighty-sixth Amendment of 2002 and the Right to Education Act, 2009 covering ages six to fourteen; the twenty-five per cent entry-level obligation in private unaided non-minority schools, with its recorded difficulties of delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; the 2019 amendment restoring State discretion for regular examinations in Classes V and VIII with detention only after instruction and re-examination; and the umbrella school scheme through which infrastructure, teacher training and inclusive-education support are funded. Analysis: the parts of the Act that operate automatically, such as free schooling in the public system, do not depend on a household knowing the law, whereas the parts that require a claim,

such as the private-school entry obligation, a grievance about denial or an objection to detention, are activated only by a household that knows the entitlement, holds the documents and can approach the authority, so low awareness converts a justiciable clause into a dormant one and produces the uneven access pattern the demand describes. Qualification: awareness alone cannot cure reimbursement delay or enforcement weakness, and no admission, awareness or grievance figure is asserted here. Why this earns marks: it analyses by separating self-executing from claim-dependent provisions and evidencing the difference.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

How to improve this answer: For “PYQ DEMAND CARD 4 - 2022 General Studies Paper II Question 18”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

PYQ DEMAND CARD 5 - 2023 General Studies Paper II Question 6

Demand: Inadequate attention to Human Resource Development in India, asked with the instruction to suggest measures, 10 marks, 150 words, exactly as recorded in the audited 2018-2023 Mains routing ledger.

Status: Routed to this owner in the audited 2018-2023 Mains routing ledger, where the Core route is recorded as superseding the older Advanced ownership. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: attention has been adequate at the entitlement end and inadequate at the conversion end, so the measures must be attached to named links rather than to education in general. Named evidence and example: the conversion chain from enrolment through attendance, transition, completion and competency to higher education or skill and employment; the three measurement systems, namely the administrative school data system, the rural household learning survey and the higher-education survey, each of which observes a different link; the foundational-learning mission with its Grade 3 target and recorded national target year of 2026-27; the fourth goal's dependency on finance, teacher supply and State capacity; and the skills ecosystem of training, qualification regulation and apprenticeship. Analysis: the enrolment link is the best measured and the most nearly solved, competency is measured only by a rural sample survey and remains the weakest link, and the skill-to-employment joint is measured least well of all, so the measures that follow are a funded teacher and instructional-time guarantee at the foundational stage, competency reporting at the school level rather than only at the sample level, and employer-linked certification at the skilling end. Qualification: no expenditure, vacancy or placement figure is asserted, and each survey value used elsewhere is carried with its round and scope. Why this earns marks: it suggests measures that are link-specific and measurable rather than exhortations to invest more.

Demand decoding: The directive **answer** requires a direct position on “PYQ DEMAND CARD 5 - 2023 General Studies Paper II Question 6”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: attention has been adequate at the entitlement end and inadequate at the conversion end, so the measures must be attached to named links rather than to education in general. Named evidence and example: the conversion chain from enrolment through attendance, transition, completion and competency to higher education or skill and employment; the three measurement systems, namely the administrative school data system, the rural household learning survey and the higher-education survey, each of which observes a different link; the foundational-learning mission with its Grade 3 target and recorded national target year of 2026-27; the fourth goal's dependency on finance, teacher supply and State capacity; and the skills ecosystem of training, qualification regulation and apprenticeship. Why this earns marks: it suggests measures that are link-specific and measurable rather than exhortations to invest more.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

How to improve this answer: For "PYQ DEMAND CARD 5 - 2023 General Studies Paper II Question 6", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

PYQ DEMAND CARD 6 - 2023 General Studies Paper II Question 18

Demand: Skill development programmes and the linkages between skill education and employment, asked with the instruction to analyse the linkages, 15 marks, 250 words, exactly as recorded in the audited 2018-2023 Mains routing ledger, where both subject routes are recorded as terminating in answer-complete Core shared with the Economy owner.

Status: Routed to this owner in the audited 2018-2023 Mains routing ledger with shared subject routing recorded alongside the Economy owner, and that shared ownership is stated rather than claimed exclusively. No official answer key exists for a Mains demand and none is claimed.

Model solution: Claim: the linkage between skilling and employment is a chain with four breakable joints, and Indian policy has built the first two far more completely than the last two. Named evidence and example: the national skill mission for training delivery; the vocational education and training council as the unified regulator of skill qualifications,

awarding bodies and assessment agencies under the skills ministry, replacing earlier fragmented regulators; the ten-level national skills qualification framework enabling recognition and mobility across formal and non-formal training; the apprenticeship promotion scheme providing stipend support to employers; the policy's vocational exposure from Grade 6 and higher-education internship requirement; and the recorded constraints of stigma, employer participation, counselling and matching. Analysis: joint one is training capacity and joint two is certification, both of which a regulator and a framework can deliver administratively, whereas joint three is employer recognition of that certificate and joint four is the matching of a certified trainee to an actual vacancy, and neither can be produced by regulation alone, which is why apprenticeship, employer participation in curriculum and counselling infrastructure are the decisive instruments; the demand is jointly owned with the Economy owner precisely because the fourth joint is a labour-demand question rather than an education question. Qualification: no training, certification or placement figure is asserted, and the analysis does not claim that certification causes employment where labour demand is absent. Why this earns marks: it analyses a linkage joint by joint, states what each instrument can and cannot do, and closes with an honest boundary between education and labour demand.

Demand decoding: The directive **answer** requires a direct position on "PYQ DEMAND CARD 6 - 2023 General Studies Paper II Question 18", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Claim: the linkage between skilling and employment is a chain with four breakable joints, and Indian policy has built the first two far more completely than the last two. Named evidence and example: the national skill mission for training delivery; the vocational education and training council as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skills ministry, replacing earlier fragmented regulators; the ten-level national skills qualification framework enabling recognition and mobility across formal and non-formal training; the apprenticeship promotion scheme providing stipend support to employers; the policy's vocational exposure from Grade 6 and higher-education internship requirement; and the recorded constraints of stigma, employer participation, counselling and matching. How to improve this answer: For “PYQ DEMAND CARD 6 - 2023 General Studies Paper II Question 18”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 1 - 10 MARKS

Question: Comment on the earn-while-you-learn approach and its contribution to meaningful vocational education and skilling. Answer in about 150 words.

Model thesis: The design is not contested while its conditions are, so the comment must name the apprenticeship and qualification instruments, then argue stigma, employer participation, counselling and matching as the binding constraints.

Claim -> named evidence -> analysis -> qualification:

- The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training.
- The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are.
- The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit.
- The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis.

Qualified conclusion: The design is not contested while its conditions are, so the comment must name the apprenticeship and qualification instruments, then argue stigma, employer participation, counselling and matching as the binding constraints.

Demand decoding: The directive **comment** requires a direct position on “Comment on the earn-while-you-learn approach and its contribution to meaningful vocational...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The design is not contested while its conditions are, so the comment must name the apprenticeship and qualification instruments, then argue stigma, employer participation, counselling and matching as the binding constraints.

Analytical body:

1. **Claim and named evidence:** The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** The academic bank of credits is the policy reform that enables students to accumulate credits from multiple institutions and redeem them for a degree, and it is the instrument that makes multiple entry and exit and lifelong learning operationally possible rather than merely aspirational; its examinable value is that it converts a stated principle into an administrative mechanism, and its limitation is that portability depends on institutions actually recognising and depositing credit. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The design is not contested while its conditions are, so the comment must name the apprenticeship and qualification instruments, then argue stigma, employer participation, counselling and matching as

the binding constraints.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For “Comment on the earn-while-you-learn approach and its contribution to meaningful vocational...”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Suggest measures to remedy the inadequate attention given to human-resource development in India. Answer in about 150 words.

Model thesis: Human-resource development fails at identifiable links rather than everywhere, so the answer must run the conversion chain, attach a measure to each failing link and end with a measurable safeguard rather than a general call for investment.

Claim -> named evidence -> analysis -> qualification:

- Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question.
- The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis.
- The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity.
- The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed.

Qualified conclusion: Human-resource development fails at identifiable links rather than everywhere, so the answer must run the conversion chain, attach a measure to each failing link and end with a measurable safeguard rather than a general call for investment.

Demand decoding: The directive **answer** requires a direct position on “Suggest measures to remedy the inadequate attention given to human-resource development in...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Human-resource development fails at identifiable links rather than everywhere, so the answer must run the conversion chain, attach a measure to each failing link and end with a measurable safeguard rather than a general call for investment.

Analytical body:

1. **Claim and named evidence:** Education is the second capability-conversion pillar after health, and the owner's conversion frame runs from input, meaning access and resources, through process, meaning curriculum, pedagogy, teachers and infrastructure, to outcome, meaning foundational literacy and numeracy, higher-order skills and employability; the analytical consequence is that entitlement, quality and skills must all hold for schooling to become capability, so an answer that reports enrolment has reported an input and has not yet reached the question. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** The education ministry is the nodal ministry for the entitlement statute, the policy, the umbrella scheme, the foundational-learning mission and higher education, while the skill-qualification regulator sits under the skill-development ministry, and the owners record expressly that no dynamic dashboard figure is asserted for this topic because education indicators are published periodically by the administrative school data system, the higher-education survey and the household learning survey, so the durable fact is the policy and scheme architecture rather than a continuously changing coverage count. On ownership, six General Studies Mains demands are routed to this topic in the audited ledgers, from 2020, 2021, 2022 and 2023, with the 2023 skill-education and employment demand recorded as terminating in answer-complete Core across two subject routes shared with the Economy owner, and one objective demand from 2018 on teacher-qualification eligibility under the entitlement statute is routed with its official key recorded as unavailable locally, so no option is recorded or inferred; the audited ledger routes the 2024 public-examination-integrity demand to the Governance owner, and that routing is stated here rather than being annexed. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: Human-resource development fails at identifiable links rather than everywhere, so the answer must run the conversion chain, attach a measure to each failing link and end with a measurable safeguard rather than a general call for investment.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For “Suggest measures to remedy the inadequate attention given to human-resource development in...”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 3 - 15 MARKS

Question: Elaborate on the effect of digital initiatives on the functioning of the education system. Answer in about 250 words.

Model thesis: Digital channels change reach without changing conversion by themselves, so the elaboration must name the two national instruments, argue effect conditional on five access constraints and test the claim against measured foundational learning.

Claim -> named evidence -> analysis -> qualification:

- The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation.
- The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India.
- The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis.
- The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes.

Qualified conclusion: Digital channels change reach without changing conversion by themselves, so the elaboration must name the two national instruments, argue effect conditional on five access constraints and test the claim against measured foundational learning.

Demand decoding: The directive **answer** requires a direct position on “Elaborate on the effect of digital initiatives on the functioning of the education system....”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Digital channels change reach without changing conversion by themselves, so the elaboration must name the two national instruments, argue effect conditional on five access constraints and test the claim against measured foundational learning.

Analytical body:

1. **Claim and named evidence:** The owners record the national digital infrastructure for school content and teachers and the national online-course platform for higher education as the two named digital instruments, and they record the qualifications on digital access as devices, connectivity, language, disability and study space; the answer consequence is that digital education is neither a solution nor a distraction but a channel whose effect depends entirely on those five conditions, so a digital-education answer must argue conditional effect rather than declare transformation. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** The twenty-five per cent entry-level obligation in private unaided non-minority schools is the folder's standard test case for the gap between an enforceable entitlement and realised access, because the owners record its difficulties as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States; it is therefore the natural evidence for the 2022 demand on awareness about schooling, since a right that families do not know about, cannot document and cannot enforce produces exactly the pattern the demand describes. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: Digital channels change reach without changing conversion by themselves, so the elaboration must name the two national instruments, argue effect conditional on five access constraints and test the claim against measured foundational learning.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For “Elaborate on the effect of digital initiatives on the functioning of the education system....”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 4 - 15 MARKS

Question: Critically examine the National Education Policy, 2020 against the fourth Sustainable Development Goal. Answer in about 250 words.

Model thesis: Alignment of objectives is not the contested question, so the critical examination must accept the stated alignment, test finance, teachers and State capacity, and separate what is statutory from what is policy.

Claim -> named evidence -> analysis -> qualification:

- The National Education Policy, 2020 is a policy document and not a statute, and it restructures school education into a five plus three plus three plus four design covering the foundational stage for ages three to eight, the preparatory stage for ages eight to eleven, the middle stage for ages eleven to fourteen and the secondary stage for ages fourteen to eighteen, while emphasising foundational literacy and numeracy, mother-tongue instruction, multidisciplinary higher education, multiple entry and exit and vocational integration; because it is policy rather than statute, its extension of focus to early childhood care and education creates no statutory entitlement, and saying otherwise is a status error.
- The owners record the fourth sustainable development goal as inclusive and equitable quality education and lifelong learning for all, and record that the policy's early childhood, foundational-learning, multidisciplinary and vocational reforms are aligned with that goal but depend on finance and teachers; the critical-examination route is therefore to accept the alignment of stated objectives and to test delivery conditions, because the gap in this demand is not one of intention but one of financing, teacher supply and State capacity.
- The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy.
- The owners record that a single higher-education regulator was proposed under the policy, that the relevant Bill was approved by the Cabinet in December 2025 and introduced in Parliament, and that as of mid-2026 it has not been enacted, so the existing regulators for universities, technical education and teacher education continue to function; this is a status fact rather than a design fact, and stating a proposed regulator as an existing one is exactly the policy-status error this package is built to prevent.

Qualified conclusion: Alignment of objectives is not the contested question, so the critical examination must accept the stated alignment, test finance, teachers and State capacity, and separate what is statutory from what is policy.

Demand decoding: The directive **critically examine** requires a direct position on “Critically examine the National Education Policy, 2020 against the fourth Sustainable...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For “Critically examine the National Education Policy, 2020 against the fourth Sustainable...”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 5 - 20 MARKS

Question: Analyse the linkages between skill-development programmes and employment outcomes. Answer in about 300 words.

Model thesis: The linkage is a chain with several breakable joints, so the analysis must run from training and certification through recognition and apprenticeship to matching and employment, and must state which joint the available evidence can and cannot observe.

Claim -> named evidence -> analysis -> qualification:

- The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training.
- The policy proposes vocational exposure from Grade 6 and mandatory internship or skill courses in higher education in order to bridge the academic and vocational divide, and the owners record the constraints on this integration as stigma attached to vocational streams, employer participation, career counselling and the quality of matching between trainee and job; naming these four constraints is what turns an earn-while-you-learn answer into an argument, because the design is not contested while the conditions for its success are.
- The owner's conversion chain runs from enrolment to attendance, transition, completion, competency, higher education or skill and finally employment, and it records that the administrative school data system, the household learning survey and the higher-education survey measure different links in that chain; this is the structural device for any human-resource-development answer, because it forces the writer to say which link is failing and to cite the instrument that can actually observe that link, instead of asserting a general education crisis.
- The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage.

Qualified conclusion: The linkage is a chain with several breakable joints, so the analysis must run from training and certification through recognition and apprenticeship to matching and employment, and must state which joint the available evidence can and cannot observe.

Demand decoding: The directive **analyse** requires a direct position on “Analyse the linkages between skill-development programmes and employment outcomes. Answer in...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The linkage is a chain with several breakable joints, so the analysis must run from training and certification through recognition and apprenticeship to matching and employment, and must state which joint the available evidence can and cannot observe.

Analytical body:

1. **Claim and named evidence:** The skills ecosystem recorded by the owners consists of the national skill mission for training, the National Council for Vocational Education and Training as the unified regulator of skill qualifications, awarding bodies and assessment agencies under the skill-development ministry, replacing earlier fragmented regulators, the National Apprenticeship Promotion Scheme which provides stipend support to employers hiring apprentices in order to bridge classroom training and workplace learning, and the national skills qualification framework, a competency-based hierarchy of ten levels enabling recognition, certification and mobility across formal and non-formal training. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

4. **Claim and named evidence:** The gross enrolment ratio is total enrolment at a level of education, regardless of age, as a percentage of the official school-age population for that level, so it measures access and not completion or quality and can exceed one hundred where over-age enrolment is common, and the owners record the all-India survey on higher education for 2021-22 reporting an all-India ratio of 28.4 for the eighteen to twenty-three age group, up from 27.3 in 2020-21, with a female ratio of 28.5; the recorded discipline is to retain the survey year because later rounds update the figure, and the owners state expressly that the durable fact is the rising but unequal trend across region, gender and social group rather than any one year's percentage. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The linkage is a chain with several breakable joints, so the analysis must run from training and certification through recognition and apprenticeship to matching and employment, and must state which joint the available evidence can and cannot observe.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and

outcome distinctions.

How to improve this answer: For “Analyse the linkages between skill-development programmes and employment outcomes. Answer in...”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: Assess whether the statutory right to elementary education has been converted into a right to learning. Answer in about 300 words.

Model thesis: Access has been converted far more completely than learning, so the assessment must separate entitlement, process and outcome, use the dated foundational-learning evidence with its scope discipline and close with a graded verdict.

Claim -> named evidence -> analysis -> qualification:

- The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use.
- The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law.
- The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy.
- The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India.

Qualified conclusion: Access has been converted far more completely than learning, so the assessment must separate entitlement, process and outcome, use the dated foundational-learning evidence with its scope discipline and close with a graded verdict.

Demand decoding: The directive **assess** requires a direct position on “Assess whether the statutory right to elementary education has been converted into a right to...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Access has been converted far more completely than learning, so the assessment must separate entitlement, process and outcome, use the dated foundational-learning evidence with its scope discipline and close with a graded verdict.

Analytical body:

1. **Claim and named evidence:** The Right of Children to Free and Compulsory Education Act, 2009 is the statutory framework for free and compulsory elementary education for ages six to fourteen, providing free schooling through the public system and a twenty-five per cent entry-level obligation for children from weaker and disadvantaged groups in private unaided non-minority schools, subject to the Act and to judicial interpretation; the owners record the implementation challenges of that obligation as delayed reimbursement to schools, documentation barriers for beneficiaries and uneven enforcement across States, which is the concrete evidence any answer about awareness or access should use. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** The Act originally prohibited detention and expulsion until Grade 8, and the owners record that the 2019 amendment restored State discretion for regular examinations in Classes V and VIII and permitted detention after instruction and a re-examination, so the position is not a simple return to detention but a conditional discretion exercisable by a State; the debate is genuinely two-sided, with motivation and accountability on one side and the risk of exclusion and dropout on the other, and stating the amendment's exact mechanism is what allows an answer to take a position without misstating the law. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** The National Initiative for Proficiency in Reading with Understanding and Numeracy is the mission launched under the policy in 2021 that targets foundational literacy and numeracy by the end of Grade 3, with a national target year of 2026-27, and it sets learning-outcome goals and competencies for which States prepare implementation plans with annual targets; it is a mission and not a scholarship, and its importance in an answer is that it is the first national instrument to make a learning outcome, rather than an enrolment count, the stated object of school policy. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** The owners record the 2024 round of the annual status of education report, a non-government rural household survey, as finding recovery from the 2022 learning shock alongside a continuing foundational deficit, with 23.4 per cent of government-school Standard III children able to read a Standard II text, and record it as the latest national foundational-learning round of that survey as of July 2026; the discipline attached is unusually strict and is itself examinable, namely that the round, the rural scope, the school type and the competency must all be cited together, that it is not an administrative dataset and that it must not be silently generalised to urban India. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: Access has been converted far more completely than learning, so the assessment must separate entitlement, process and outcome, use the dated foundational-learning evidence with its scope discipline and close with a graded verdict.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For “Assess whether the statutory right to elementary education has been converted into a right to...”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.
