Scheduled Tribes, PVTGs and Tribal Welfare - Learner-v2

Complete Learning Session

Authoring-only generation: 2026-09-02. No PDF was rendered and no tracker or index was mutated.

SOURCE, PROGRESSION AND CURRENT-LINKAGE AUDIT

- **Generation date:** 2026-09-02.
- **Repository-first evidence:** the Basic owner is taught first and preserved in full; the Advanced owner is retained only in the optional final teaching block.
- **OCR evidence:** Repository Markdown was primary. The OCR-searchable official General Studies question papers held under books\mains and books\more_previous_papers were read only to confirm the printed wording of routed Mains demands. No official answer key, marking scheme, page precision or unsupported quotation was imported from them.
- **Qdrant:** not used; repository Markdown and available OCR context were sufficient.
- **PYQ integrity:** No General Studies Mains demand is routed to this owner in the audited routing ledgers, and exactly two objective demands are, so the ownership statement is a mixed one and is reported precisely. The two routed objective demands are 2019 Prelims General Studies Paper I Question 51 on the criteria for particularly vulnerable tribal groups in India and 2021 Prelims General Studies Paper I Question 84 on the nodal ministry for the Forest Rights Act, 2006, both recorded in the audited 2018-2023 Prelims routing ledger, which states expressly that the official 2018-2023 Prelims keys are not held locally, so no option, key or inferred answer is recorded for either demand and neither is converted into a solved question; both are instead covered as taught content, the four identification criteria being stated in full and the administering ministry being identified from its own official page. No Mains demand card is manufactured for this topic. The Basic and Advanced owners both discuss the 2025 General Studies Paper I question asking whether tribal development in India centres around the two axes of displacement and rehabilitation, but the audited 2024-2025 Mains routing ledger routes that question to the Indian Society owner, so no demand card is created for it here and no ownership is claimed over it; the same ledger routes the 2021 and 2022 General Studies Paper I demands on tribal knowledge systems and tribal diversity to that owner, the 2023 colonial-rule-and-tribals demand to the Modern History owner, and the Fifth Schedule, Scheduled Area and forest-rights objective demands of 2018, 2019, 2022, 2023, 2024 and 2025 to the Polity and Environment owners, so none of those is claimed either. The practice in this package therefore consists of six original Mains questions with model solutions, each written to the repository's examiner-grade standard using the claim, named evidence, analysis and qualification pattern, together with eighty original objective questions on a strict A -> B -> C -> D rotation. Each model solution opens with its analytical claim so that the evidence which follows does argumentative rather than decorative work. The locally held OCR-searchable official General Studies papers were read only to confirm that no Mains question on this owner's subject matter is routed here; no question was invented from them, no marking scheme or page precision was imported and no official answer key is claimed anywhere in this package.
- **Live-link boundary:** One live official page was verified for this topic on 2026-09-02. The Ministry of Tribal Affairs page for the Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006, read on that date, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs; that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use; that it provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; that in conjunction with the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Settlement Act, 2013 it protects the tribal population from eviction without rehabilitation and settlement; that it enjoins on the Gram

Sabha and rights holders the responsibility of conserving biodiversity, wildlife, forests, adjoining catchment areas, water sources and ecologically sensitive areas and of stopping destructive practices affecting those resources or the cultural and natural heritage of the tribals; that the Gram Sabha is a highly empowered body enabling the tribal population to have a decisive say in the determination of local policies and schemes impacting them; and that the stated objectives are to undo the historical injustice occurred to the forest-dwelling communities, to ensure land tenure, livelihood and food security of the forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime of the forests by including the responsibilities and authority on forest-rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. That page also establishes, for the routed objective demand on the nodal ministry, that the Ministry of Tribal Affairs is the ministry that administers and publishes the Act, and no option or answer key is inferred for that demand because the ledger records the official keys as not held locally. Two further official checks were attempted on the same date, namely a ministry page for the vulnerable-group convergence mission and a ministry page for the vulnerable-group category, and both returned a not-found error, while the ministry's landing page returned an assistant interface only, so nothing was read or used from them and no secondary summary, coaching site or news report has been treated as an official source. The package therefore relies on that verified page together with the dated official anchors already carried by the repository owners, each cited with its issuing instrument or launch date: the three recognition categories of the forest-rights statute, with the individual title limited to the area under occupation subject to a ceiling of four hectares per nuclear family and heritable but not transferable or alienable; the Gram Sabha, Sub-Divisional Level Committee and District Level Committee claim chain; the recorded position that rejection of a claim does not justify automatic eviction and that the 2019 eviction direction was stayed; the cumulative safeguards under Section 4(2) for a critical wildlife habitat, namely completed rights recognition, a scientific case, a coexistence assessment, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package; the Panchayats (Extension to the Scheduled Areas) Act, 1996 applying only to Scheduled Areas, with consultation before land acquisition and resettlement, ownership of minor forest produce, money-lending regulation and village-market management; the four identification criteria for particularly vulnerable tribal groups and the officially identified count of seventy-five communities; the convergence mission launched on 15 November 2023 for those seventy-five communities across eighteen States and Union Territories, with the status caution recorded on 21 July 2026 that a sanctioned-household or dashboard count is not proof of completed service delivery; the village-enterprise scheme with Van Dhan Vikas Kendras and minimum-support-price arrangements for minor forest produce; the residential-school norm of one school per block with at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons or as per ministry criteria, covering Class VI to Class XII; Article 338A for the National Commission for Scheduled Tribes; the State tenancy and land-transfer laws named as the Chotanagpur Tenancy Act and the Andhra Pradesh Scheduled Areas Land Transfer Regulation; and the recorded authorities Samatha, the Orissa Mining Corporation matter concerning the Niyamgiri hills and the Xaxa Committee diagnosis. No claim, title, rejection, recognition, household, hamlet, school, enrolment, produce, price, sanction, budget or expenditure figure is asserted, no Census, National Family Health Survey, Periodic Labour Force Survey, NITI Aayog or Sustainable Development Goal value is asserted, no legal or constitutional provision is invented or upgraded in status, no interim judicial direction is described as a standing rule, no tribal community is homogenised with any other, and no previous-year question, official answer key or option is asserted or inferred.

- **Fact/inference discipline:** no current-affairs item, PYQ wording, figure or quotation is invented.

BASIC LEARNING SESSION

DEEP-REVIEW LEARNING CONTRACT

Control	Binding rule for this package
Syllabus boundary	Complete Social Justice Basic/Core is answer-complete before optional Advanced depth.
Legal-status boundary	Constitutional value/right, statute, rule, judgment, executive policy, scheme, eligibility rule, implementation and outcome remain distinct.
Rights-holder map	Rights-holder -> entitlement/need -> competent institution/duty-bearer -> accountability forum -> grievance/appeal/remedy.
Delivery chain	Identification -> eligibility -> documentation -> enrolment -> finance -> frontline access -> service/benefit -> portability -> outcome -> audit and correction.
Inclusion method	Intersectional caste, tribe, gender, age, disability, religion, occupation, migration and regional variation is retained without homogenising groups.
Evidence method	Claim -> named India-centric law/institution/scheme/case/dataset -> analysis -> source, reference period, release date, denominator, status and causal qualification.
Dignity and safeguards	Accessibility, privacy, participation, social audit, portability, offline access, due process and protection from stigma or coercion are tested.
Practice contract	Every model has demand decoding, detailed examiner-grade answer, executable timed/compression plan, marks rationale and answer-specific improvement.
Approval	This immutable successor remains approved: false pending explicit approval.

Canonical Basic/Core owner: upsc-ai-kit\knowledge\Social-Justice\basic\08_Scheduled-Tribes-PVTGs-and-Tribal-Welfare.md **Substantive canonical provenance owner:** upsc-ai-kit\knowledge\Social-Justice\08_Scheduled-Tribes-PVTGs-and-Tribal-Welfare_Learner-V2-Complete-Topic-Package.md **Optional Advanced owner:** upsc-ai-kit\knowledge\Social-Justice\advanced\08_Scheduled-Tribes-PVTGs-and-Tribal-Welfare.md **Official syllabus mapping:** upsc-ai-kit\knowledge\Social-Justice\OFFICIAL-UPSC-SYLLABUS-MAPPING.md

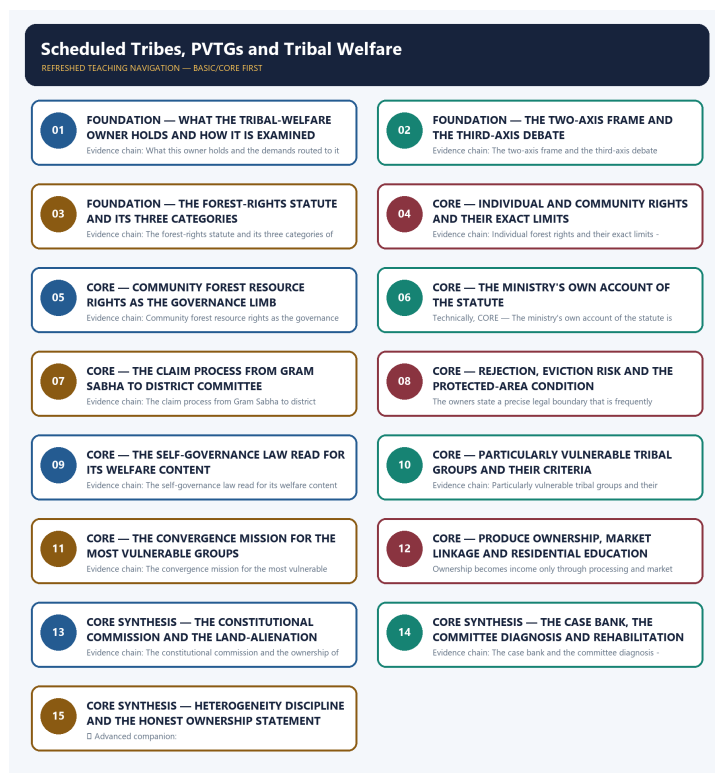

EVIDENCE, PYQ AND CURRENT-STATUS CONTROL

- **Prohibition/outcome discipline:** a legal prohibition, reported case, registration, conviction, rehabilitation measure and lived eradication are different claims.
- **Eligibility discipline:** universal, categorical, means-tested, self-declared, notified-list and residence-linked routes require exact scope; coverage never proves adequacy or access.
- **Reservation discipline:** constitutional basis, beneficiary category, competent list, ceiling, creamy-layer rule, EWS route, horizontal/vertical operation and judicial status are qualified separately.
- **Fiscal discipline:** allocation, release, expenditure, unit cost, beneficiary transfer and outcome are not interchangeable.
- **Data discipline:** retain numerator, denominator, unit, geography, reference period, release date, provisional/final status and survey-versus-administrative character.
- **Causal discipline:** headline change, before-after sequence or cross-state correlation does not establish scheme impact without mechanism and counterfactual limits.
- **PYQ discipline:** exact wording is preserved only when verified; routed or reconstructed demands remain labelled and no model is presented as an official UPSC answer.

- **Current-status note, rechecked 2026-09-03:** volatile law, scheme, judgment, list, budget and dataset claims retain issuing authority, date and operative/interim/final status.

Refreshed teaching navigation

Distinct embedded teaching-navigation image. The separate continuous Cārvāka-style flowchart package remains an independent at-a-glance artifact.

SESSION 1 - FOUNDATION - WHAT THE TRIBAL-WELFARE OWNER HOLDS AND HOW IT IS EXAMINED

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Prelims: Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to What the tribal-welfare owner holds and how it is examined, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.

Technical definition: Evidence chain: What this owner holds and the demands routed to it Qualified use: Open a tribal answer by naming the axis and the instrument the question actually tests.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Prelims: Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to What the tribal-welfare owner holds and how it is examined, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.

MUST-WRITE KEYWORDS

- FOUNDATION
- What the tribal-welfare owner holds
- how it is examined
- Evidence chain
- Qualified use

- 2018-2023

How to use them: Frame the answer through FOUNDATION; define What the tribal-welfare owner holds, connect how it is examined with Evidence chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

WHAT THE TRIBAL-WELFARE OWNER HOLDS AND HOW IT IS EXAMINED

01. What this owner holds and the demands routed to it

BOUNDARY -> The 2025 tribal-development demand and the Fifth Schedule machinery are routed to other owners.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here.

NAMED EVIDENCE AND MECHANISM

- This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here.

EXAMINER CAUTION

- The 2025 tribal-development demand and the Fifth Schedule machinery are routed to other owners.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to What the tribal-welfare owner holds and how it is examined, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Open a tribal answer by naming the axis and the instrument the question actually tests.

MINI RECAP

- **Evidence chain:** What this owner holds and the demands routed to it
- **Qualified use:** Open a tribal answer by naming the axis and the instrument the question actually tests.

SESSION 2 - FOUNDATION - THE TWO-AXIS FRAME AND THE THIRD-AXIS DEBATE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The two-axis framing is substantially correct but incomplete rather than wrong.

Technical definition: Evidence chain: The two-axis frame and the third-axis debate Qualified use: Take a qualified position that adds a dimension instead of denying the frame.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Evidence chain: The two-axis frame and the third-axis debate Qualified use: Take a qualified position that adds a dimension instead of denying the frame.

MUST-WRITE KEYWORDS

- FOUNDATION
- The two-axis frame
- the third-axis debate
- Evidence chain
- Qualified use
- The two-axis framing

How to use them: Frame the answer through FOUNDATION; define The two-axis frame, connect the third-axis debate with Evidence chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

THE TWO-AXIS FRAME AND THE THIRD-AXIS DEBATE

01. The two-axis frame and the third-axis debate

BOUNDARY -> The two-axis framing is substantially correct but incomplete rather than wrong.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.

NAMED EVIDENCE AND MECHANISM

- The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.

EXAMINER CAUTION

- The two-axis framing is substantially correct but incomplete rather than wrong.

SESSION 3 - FOUNDATION - THE FOREST-RIGHTS STATUTE AND ITS THREE CATEGORIES

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.

Technical definition: Evidence chain: The forest-rights statute and its three categories of right Qualified use: Name all three recognition categories before evaluating the statute.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Evidence chain: The forest-rights statute and its three categories of right Qualified use: Name all three recognition categories before evaluating the statute.

MUST-WRITE KEYWORDS

SESSION 4 - CORE - INDIVIDUAL AND COMMUNITY RIGHTS AND THEIR EXACT LIMITS

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

Technical definition: Evidence chain: Individual forest rights and their exact limits - Community rights as the livelihood limb of the statute Qualified use: Use the exact limit of a right rather than a general description of it.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Evidence chain: Individual forest rights and their exact limits - Community rights as the livelihood limb of the statute

v

02. Community rights as the livelihood limb of the statute

BOUNDARY -> The individual title is heritable but not transferable or alienable and is capped at four hectares.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

NAMED EVIDENCE AND MECHANISM

- Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

SESSION 5 - CORE - COMMUNITY FOREST RESOURCE RIGHTS AS THE GOVERNANCE LIMB

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.

Technical definition: Evidence chain: Community forest resource rights as the governance limb Qualified use: Argue governance capacity rather than tenure alone in a forest-rights answer.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.

SESSION 6 - CORE - THE MINISTRY'S OWN ACCOUNT OF THE STATUTE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance.

Technical definition: Technically, CORE - The ministry's own account of the statute is analysed by relating The ministry's own account of the statute to Evidence chain, then testing the relationship through Qualified use and The Ministry.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

SESSION 7 - CORE - THE CLAIM PROCESS FROM GRAM SABHA TO DISTRICT COMMITTEE

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Technical definition: Evidence chain: The claim process from Gram Sabha to district committee Qualified use: Locate an implementation failure at a named tier of the claim chain.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

|

v

02. Rights in a critical wildlife habitat and the cumulative safeguards

BOUNDARY -> Rejection creates eviction risk in practice without creating eviction authority in law.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

NAMED EVIDENCE AND MECHANISM

- The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately.
- The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

EXAMINER CAUTION

- Rejection creates eviction risk in practice without creating eviction authority in law.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to Rejection, eviction risk and the protected-area condition, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Separate a practical consequence from a legal power in a contested area.

MINI RECAP

- **Evidence chain:** Rejection of a claim is not authority to evict -> Rights in a critical wildlife habitat and the cumulative safeguards

- **Qualified use:** Separate a practical consequence from a legal power in a contested area.

|
v

MECHANISM / ARGUMENT: Rejection creates eviction risk in practice without creating eviction authority in law.

|
v

CONSEQUENCE / CONTRAST: Evidence chain: Rejection of a claim is not authority to evict - Rights in a critical wildlife habitat and the cumulative safeguards Qualified use: Separate a practical consequence from a legal power in a contested area.

|
v

UPSC TRAP / ANSWER-USE: The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

|
v

ANSWER-GRABBING FORMULATION: The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately.

SESSION 9 - CORE - THE SELF-GOVERNANCE LAW READ FOR ITS WELFARE CONTENT

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.

Technical definition: Evidence chain: The self-governance law read for its welfare content Qualified use: Use a self-governance power for its welfare effect and route the institutional design.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Evidence chain: The self-governance law read for its welfare content Qualified use: Use a self-governance power for its welfare effect and route the institutional design.

MUST-WRITE KEYWORDS

- The self-governance law read for its welfare content
- Evidence chain
- Qualified use
- In Scheduled Areas

- **Panchayats**

- **Extension**

How to use them: Frame the answer through The self-governance law read for its welfare content; define Evidence chain, connect Qualified use with In Scheduled Areas to explain the mechanism, and use Panchayats for the decisive comparison or qualification.

|
v

02. Residential education and the block-level norm

BOUNDARY -> Ownership becomes income only through processing and market access, and coverage is uneven.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

NAMED EVIDENCE AND MECHANISM

- The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.

THE CONSTITUTIONAL COMMISSION AND THE LAND-ALIENATION PROBLEM

01. The constitutional commission and the ownership of institutional detail

|
v

02. Land alienation and the State laws that address it

BOUNDARY -> Alienation is a gap in administration rather than in prohibition.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.

NAMED EVIDENCE AND MECHANISM

- The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

NAMED EVIDENCE AND MECHANISM

- The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument.
- The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own

statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

EXAMINER CAUTION

- Each authority is used for what it decided, and compensation cannot replace commons or autonomy.

EXAM LINK

- **Prelims:** Retain the exact statute, section, article, ministry, official category, survey round or dated edition attached to The case bank, the committee diagnosis and rehabilitation policy, and never upgrade a policy document into a statute or a targeted scheme into a universal entitlement.
- **Mains:** Support a displacement answer with bounded authorities and an explicit limit.

MINI RECAP

- **Evidence chain:** The case bank and the committee diagnosis -> Rehabilitation policy and what compensation cannot buy
- **Qualified use:** Support a displacement answer with bounded authorities and an explicit limit.

CLOSING RECALL FLOW - CORE SYNTHESIS - THE CASE BANK, THE COMMITTEE DIAGNOSIS AND REHABILITATION POLICY

START / CONCEPT: CORE SYNTHESIS - The case bank, the committee diagnosis and rehabilitation policy

v

ANSWER-GRABBING FORMULATION: Evidence chain: The case bank and the committee diagnosis - Rehabilitation policy and what compensation cannot buy Qualified use: Support a displacement answer with bounded authorities and an explicit limit.

SESSION 15 - CORE SYNTHESIS - HETEROGENEITY DISCIPLINE AND THE HONEST OWNERSHIP STATEMENT

DEFINITION / WHAT THIS IS CALLED

Plain-language definition: Evidence chain: Heterogeneity discipline and the honest ownership statement Qualified use: Close a tribal answer with a differentiated verdict and an explicit ownership boundary.

Technical definition: FACT: Advanced companion: advanced/08Scheduled-Tribes-PVTGs-and-Tribal-Welfare.md. FACT: Polity/basic/Scheduled-and-Tribal-Areas.md - Fifth Schedule, PESA institutional structure (Polity owns this; do not re-teach here). FACT: Polity/basic/National-Commissions-SC-ST-BC.md - NCST composition and mandate. FACT: 07Scheduled-Castes-Rights-Atrocities-and-Welfare.md - parallel PoA Act application for STs; within-category heterogeneity theme.

ANSWER-GRABBING OPENING - WRITE/ADAPT IN THE EXAM

Evidence chain: Heterogeneity discipline and the honest ownership statement Qualified use: Close a tribal answer with a differentiated verdict and an explicit ownership boundary.

MUST-WRITE KEYWORDS

- CORE SYNTHESIS
- Heterogeneity discipline
- the honest ownership statement
- Evidence chain
- Qualified use
- Subject

How to use them: Frame the answer through CORE SYNTHESIS; define Heterogeneity discipline, connect the honest ownership statement with Evidence chain to explain the mechanism, and use Qualified use for the decisive comparison or qualification.

VISUAL FIRST

HETEROGENEITY DISCIPLINE AND THE HONEST OWNERSHIP STATEMENT

01. Heterogeneity discipline and the honest ownership statement

BOUNDARY -> Tribal communities must not be homogenised and no objective key is inferred.

This topic-specific rail fixes the evidence sequence and its exam boundary before analysis.

CORE EXPLANATION

Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured.

NAMED EVIDENCE AND MECHANISM

- Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured.

EXAMINER CAUTION

- Tribal communities must not be homogenised and no objective key is inferred.

MINI RECAP

- **Evidence chain:** Heterogeneity discipline and the honest ownership statement
- **Qualified use:** Close a tribal answer with a differentiated verdict and an explicit ownership boundary.

COMPLETE BASIC OWNER EVIDENCE BANK

Subject: Social Justice | **Tier:** Must-Do (foundation) | **GS Paper:** GS-II; GS-I society link (displacement-rehabilitation, 2025 PYQ). **Core area:** Forest rights, PVTG welfare, land alienation protection, tribal livelihood and education. **Grounded in:** Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 (FRA); PESA, 1996 (welfare angle only); PM-JANMAN (MoTA, 2023-24); Van Dhan Yojana/TRIFED; Eklavya Model Residential Schools (EMRS); audited 2025 GS-I PYQ (displacement-rehabilitation axis). **FACT:** = source-grounded | **ANALYSIS:** = analytical inference | **CURRENT:** = current anchor. *Companion:* advanced/08_Scheduled-Tribes-PVTGs-and-Tribal-Welfare.md.

1. Visual foundation

TRIBAL WELFARE: DISPLACEMENT-REHABILITATION AXIS
(2025 GS-I PYQ anchor)

Core proposition: FACT: Tribal development centres on two axes - displacement (mining, dams, protected areas, land alienation) and rehabilitation (FRA forest rights, PM-JANMAN for PVTGs, Van Dhan livelihood, EMRS education); the 2025 GS-I PYQ directly tests whether this two-axis framing is complete or omits a third dimension (livelihood/market integration or cultural autonomy).

2. Essential definitions

Concept	Exam-ready meaning
FACT: FRA, 2006	The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006, recognising individual forest rights (habitation, self-cultivation title), community rights (MFP collection, grazing, traditional/customary rights) and community forest resource rights (protection/management of traditionally protected forests).
FACT: Individual forest rights (FRA)	Rights to hold and live in forest land under individual or family occupation for habitation or self-cultivation. The title is limited to the area actually under occupation (ceiling 4 hectares per nuclear family), is heritable but not transferable/alienable.
FACT: Community rights (FRA)	Rights including ownership of minor forest produce (MFP), community grazing, access to biodiversity, traditional rights to fish/water bodies, and customary rights.
FACT: Community forest resource rights (FRA)	The right of a Gram Sabha to protect, regenerate, conserve and manage community forest resources which they have traditionally protected - the most empowering but under-recognised category.
FACT: PVTG	Particularly Vulnerable Tribal Group - a sub-category of STs identified using criteria: pre-agricultural technology level, low literacy, declining or stagnant population, economic backwardness. 75 PVTG communities are officially identified across India.
FACT: PM-JANMAN	Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan, launched on 15 November 2023 - a PVTG-focused convergence mission for the 75 identified PVTG communities across 18 States/UTs, covering housing, water, sanitation, health, education, connectivity and livelihoods.
FACT: Van Dhan Yojana	A TRIFED-led scheme establishing Van Dhan Vikas Kendras (VDVKs) at village level for MFP value-addition, aggregation and marketing; supports tribal livelihood through MFP-based enterprise.
FACT: EMRS	Eklavya Model Residential Schools - dedicated tribal residential schools (one per block with specified ST population threshold) under Ministry of Tribal Affairs, providing quality education from Class VI to XII.

3. How tribal-welfare instruments work (mechanism)

- FRA, 2006 - forest-rights recognition:** Gram Sabha receives, verifies and recommends claims; Sub-Divisional Level Committee and District Level Committee adjudicate; individual titles grant land-holding security; community rights grant MFP ownership; community forest resource rights empower Gram Sabhas to manage forests.
- PESA, 1996 (welfare angle):** In Scheduled Areas, Gram Sabhas have powers over: (a) mandatory consultation before land acquisition/resettlement; (b) ownership of MFP; (c) control over money-lending regulation; (d) managing village markets. Constitutional/ Panchayati-Raj institutional detail is in [Polity/basic/Scheduled-and-Tribal-Areas.md](#) - here the focus is on the welfare/livelihood protection function.
- PM-JANMAN (15 Nov 2023):** Saturation approach for 75 PVTG communities across 18 States/UTs: (a) housing via PMAY-G convergence; (b) road/electricity/water infrastructure; (c) health services through mobile medical units and Anganwadi outreach; (d) education via EMRS and hostels.

4. **Van Dhan Yojana/TRIFED:** Van Dhan Vikas Kendras at village level aggregate MFP, add value (processing, packaging) and link to markets; TRIFED provides MSP for MFP and marketing support, improving tribal livelihood returns.

5. **EMRS:** One EMRS per block with $\geq 50\%$ ST population and $\geq 20,000$ ST persons (or as per MoTA norms); residential schools providing CBSE-affiliated education from Class VI to XII; aims to bridge the tribal-education gap.

4. Institutions and tools

- FACT: **FRA, 2006:** three rights categories - individual, community, community forest resource; Gram Sabha as the initial authority; DLC as the final adjudicating body.

- FACT: **PESA, 1996 (welfare angle):** Gram Sabha's mandatory consultation before land acquisition, MFP ownership, money-lending control - do NOT re-teach the Panchayati-Raj institutional structure (cross-link Polity).

- FACT: **PM-JANMAN (MoTA, launched 15 Nov 2023):** PVTG-focused convergence mission for 75 identified communities across 18 States/UTs (housing, connectivity, health, education and livelihoods).

- FACT: **Van Dhan Yojana/TRIFED:** VDVks for MFP value-addition; MSP-for-MFP; marketing support.

- FACT: **EMRS (MoTA):** tribal residential schools; one per qualifying block.

- FACT: **NCST (Art 338A):** National Commission for Scheduled Tribes - constitutional body investigating ST-rights violations and advising on safeguards; composition/mandate detail is in Polity/basic/National-Commissions-SC-ST-BC.md.

5. Indian applications and examples

- FACT: **2025 GS-I PYQ (250 words):** "Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion." - the expected answer: (a) map displacement drivers (mining, dams, protected-area notification, land alienation); (b) map rehabilitation instruments (FRA, PM-JANMAN, Van Dhan, EMRS); (c) give a reasoned opinion - yes, the two-axis framing captures the core tension, but it may omit a third dimension: (i) livelihood/market integration (ensuring rehabilitation leads to sustainable income, not just land title) or (ii) cultural autonomy (protecting tribal identity, language, governance beyond material rehabilitation).

- ANALYSIS: A Gram Sabha exercising community forest resource rights to regenerate a degraded forest illustrates FRA's most empowering category - often under-utilised due to awareness and administrative gaps.

- ANALYSIS: PM-JANMAN's PVTG-saturation approach targets the 75 officially identified PVTG communities with basic-services convergence, addressing the most vulnerable tribal sub-groups.

6. Must-Know Facts for Prelims

- FACT: FRA, 2006 recognises three rights categories: individual forest rights, community rights, and community forest resource rights.

- FACT: 75 PVTG communities are officially identified across India based on pre-agricultural technology, low literacy, declining/stagnant population and economic backwardness.

- FACT: PM-JANMAN (launched 15 November 2023) is the PVTG-focused convergence mission for 75 identified communities across 18 States/UTs.

- FACT: Van Dhan Vikas Kendras are village-level MFP processing/aggregation units under TRIFED.

- FACT: EMRS norm: one school per block with $\geq 50\%$ ST population and $\geq 20,000$ ST persons (or as per MoTA criteria).

7. UPSC traps

- WRONG: FRA grants only individual land titles to tribals. -> FRA recognises three categories: individual rights, community rights (MFP ownership, grazing, etc.) and community forest resource rights (protection/management).
- WRONG: PESA applies to all rural areas. -> PESA applies only to Scheduled Areas under the Fifth Schedule.
- WRONG: All Scheduled Tribes are PVTGs. -> PVTGs are a sub-category of STs identified by specific vulnerability criteria; only 75 PVTG communities are officially identified.
- WRONG: PM-JANMAN covers all Scheduled Tribes. -> PM-JANMAN is specifically designed for the 75 PVTG communities, not all STs.

8. CURRENT: Current anchor

- CURRENT: **PM-JANMAN status (21 July 2026)**: Launched on 15 November 2023, it is a convergence mission for 75 PVTG communities in 18 States/UTs. Do not convert a sanctioned-household/dashboard count into proof of completed service delivery; state the component and reporting date.

9. PYQ application

- FACT: **2025 GS-I (250 words)**: structure the answer as: (a) displacement axis - mining, dams, protected areas, land alienation; (b) rehabilitation axis - FRA (land/forest rights), PM-JANMAN (PVTG services), Van Dhan (livelihood), EMRS (education); (c) opinion - the two-axis framing is largely accurate but may understate a third dimension: livelihood/market integration or cultural autonomy; (d) recommend - move from displacement-rehabilitation dichotomy to a holistic development model integrating economic opportunity and identity protection.

10. Mains angles

- ANALYSIS: Use the displacement-rehabilitation axis as the default structuring device for any tribal-development question.
- ANALYSIS: Distinguish FRA's three rights categories - individual, community, community forest resource - examiners test whether candidates know the third category.
- ANALYSIS: PESA's welfare relevance (MFP ownership, consultation, money-lending control) is exam-relevant here; institutional/constitutional detail belongs to Polity.

Answer thesis: Tribal development in India does centre on two axes - displacement (mining, dams, protected areas, land alienation) and rehabilitation (FRA forest rights, PM-JANMAN PVTG saturation, Van Dhan livelihood, EMRS education) - but a complete answer must note a potential third axis: livelihood/market integration ensuring that land-title recognition translates into sustainable income, and cultural autonomy protecting tribal identity beyond material rehabilitation; the 2025 GS-I PYQ rewards this nuanced "yes, but" position.

11. Probable questions

- ANALYSIS: **Prelims**: How many rights categories are recognised under the Forest Rights Act, 2006?
- FACT: **Mains (250 words, 2025 GS-I PYQ)**: Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion.
- ANALYSIS: **Mains (10 marks)**: Distinguish between individual forest rights, community rights and community forest resource rights under the Forest Rights Act, 2006.
- ANALYSIS: **Mains (15 marks)**: Examine the role of PM-JANMAN in addressing the specific vulnerabilities of Particularly Vulnerable Tribal Groups (PVTGs).

11A. Answer architecture (10/15/20-mark support)

- **Rights chain**: Fifth/Sixth Schedules -> PESA -> FRA individual/community rights ->

livelihood and service convergence.

- **Cases:** *Samatha* anchors transfer/mining in Scheduled Areas; *Orissa Mining Corporation/Niyamgiri* demonstrates Gram Sabha determination of community/religious forest rights.

- **Displacement:** LARR provides impact, compensation and rehabilitation architecture, but cash cannot replace commons, cultural landscapes or autonomy.

- **Diagnosis:** Xaxa Committee on alienation, displacement and weak self-government; PM-JANMAN as PVTG convergence tested against habitat-sensitive outcomes.

10 marks: right and three gaps. **15 marks:** land, forest, self-government, services and displacement. **20 marks:** conservation, mining, infrastructure and autonomy, distinguishing ST/PVTG conditions.

Reasoned verdict: Services are just when they strengthen rather than extinguish community rights, habitat and self-government.

12. Study links

- FACT: Advanced companion: advanced/08_Scheduled-Tribes-PVTGs-and-Tribal-Welfare.md.
- FACT: Polity/basic/Scheduled-and-Tribal-Areas.md - Fifth Schedule, PESA institutional structure (Polity owns this; do not re-teach here).
- FACT: Polity/basic/National-Commissions-SC-ST-BC.md - NCST composition and mandate.
- FACT: 07_Scheduled-Castes-Rights-Atrocities-and-Welfare.md - parallel PoA Act application for STs; within-category heterogeneity theme.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2019, 2021
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2019	Prelims GS-I	51	Particularly Vulnerable Tribal Groups PVTGs criteria India	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2021	Prelims GS-I	84	Nodal ministry for Forest Rights Act 2006	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Particularly Vulnerable Tribal Groups PVTGs criteria India
- Nodal ministry for Forest Rights Act 2006

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

SOCIAL JUSTICE DEEP-REVIEW CORE CONTROL

- **Must remember:** Scheduled Tribe and PVTG policy must connect land, forest, habitat, livelihood, culture, health, education, displacement, self-governance and consent while respecting major regional differences among central Indian, Northeast, Himalayan, island and pastoral communities.
- **Close distinction:** Scheduled Tribe, PVTG, forest dweller and indigenous people are not interchangeable legal categories; Fifth Schedule, Sixth Schedule, PESA and Forest Rights Act have distinct territories, institutions and rights, and welfare delivery is not self-governance.
- **Authority / evidence / implementation limit:** Use Gram Sabha, habitat/community forest rights, NCST, EMRS and PM-JANMAN only with exact status and scope; map recognition, evidence, claim, verification, appeal, consent/consultation, displacement safeguards and outcomes without homogenising tribes.

BASIC MCQS / REMEDIATION

Q1. Which statement correctly identifies What this owner holds and the demands routed to it?

A. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the

Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. B. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. C. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. D. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.

Answer: A. Explanation: This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. The remaining options belong to different chronology, actor or analytical categories.

Q2. Which chronology card should be filed under What this owner holds and the demands routed to it?

A. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. B. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. C. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. D. Community rights under the statute are the livelihood limb and include ownership of minor forest

produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: B. Explanation: This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. The remaining options belong to different chronology, actor or analytical categories.

Q3. Which option preserves the source-bounded meaning of What this owner holds and the demands routed to it?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. C. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

Answer: C. Explanation: This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the

ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. The remaining options belong to different chronology, actor or analytical categories.

Q4. Which statement avoids a close-option trap about What this owner holds and the demands routed to it?

A. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. B. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. C. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. D. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here.

Answer: D. Explanation: This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025

General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. The remaining options belong to different chronology, actor or analytical categories.

Q5. Which statement correctly identifies The two-axis frame and the third-axis debate?

A. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. B. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. C. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. D. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: A. Explanation: The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. The remaining options belong to different chronology, actor or analytical categories.

Q6. Which chronology card should be filed under The two-axis frame and the third-axis debate?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market

integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. D. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: B. Explanation: The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. The remaining options belong to different chronology, actor or analytical categories.

Q7. Which option preserves the source-bounded meaning of The two-axis frame and the third-axis debate?

A. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. B. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. C. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence,

protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. D. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.

Answer: C. Explanation: The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. The remaining options belong to different chronology, actor or analytical categories.

Q8. Which statement avoids a close-option trap about The two-axis frame and the third-axis debate?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. C. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say

in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. D. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.

Answer: D. Explanation: The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. The remaining options belong to different chronology, actor or analytical categories.

Q9. Which statement correctly identifies The forest-rights statute and its three categories of right?

A. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. B. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. C. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. D. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

Answer: A. Explanation: The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. The remaining options belong to different chronology, actor or

Q10. Which chronology card should be filed under The forest-rights statute and its three categories of right?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. C. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. D. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: B. Explanation: The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. The remaining options belong to different chronology, actor or analytical categories.

Q11. Which option preserves the source-bounded meaning of The forest-rights statute and its three categories of right?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. C. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. D. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Answer: C. Explanation: The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. The remaining options belong to different chronology, actor or analytical categories.

Q12. Which statement avoids a close-option trap about The forest-rights statute and its three categories of right?

A. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. B. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.

Answer: D. Explanation: The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. The remaining options belong to different chronology, actor or analytical categories.

Q13. Which statement correctly identifies Individual forest rights and their exact limits?

A. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. B. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. C. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. D. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance.

Answer: A. Explanation: Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. The remaining options belong to different chronology, actor or analytical categories.

Q14. Which chronology card should be filed under Individual forest rights and their exact limits?

A. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. B. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. C. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. D. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance.

Answer: B. Explanation: Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. The remaining options belong to different chronology, actor or analytical categories.

Q15. Which option preserves the source-bounded meaning of Individual forest rights and their exact limits?

A. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. B. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. C. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. D. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance.

Answer: C. Explanation: Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. The remaining options belong to different chronology, actor or analytical categories.

Q16. Which statement avoids a close-option trap about Individual forest rights and their exact limits?

A. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. B. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. C. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. D. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

Answer: D. Explanation: Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. The remaining options belong to different chronology, actor or analytical categories.

Q17. Which statement correctly identifies Community rights as the livelihood limb of the statute?

A. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. B. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. C. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights

for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. D. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.

Answer: A. Explanation: Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. The remaining options belong to different chronology, actor or analytical categories.

Q18. Which chronology card should be filed under Community rights as the livelihood limb of the statute?

A. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. B. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. C. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction

without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. D. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Answer: B. Explanation: Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. The remaining options belong to different chronology, actor or analytical categories.

Q19. Which option preserves the source-bounded meaning of Community rights as the livelihood limb of the statute?

A. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. B. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. C. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. D. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Answer: C. Explanation: Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under

permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. The remaining options belong to different chronology, actor or analytical categories.

Q20. Which statement avoids a close-option trap about Community rights as the livelihood limb of the statute?

A. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. B. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. C. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. D. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: D. Explanation: Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. The remaining options belong to different chronology, actor or analytical categories.

Q21. Which statement correctly identifies Community forest resource rights as the governance limb?

A. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. B. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of

self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Answer: A. Explanation: Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. The remaining options belong to different chronology, actor or analytical categories.

Q22. Which chronology card should be filed under Community forest resource rights as the governance limb?

A. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. B. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. C. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the

displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. D. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Answer: B. Explanation: Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. The remaining options belong to different chronology, actor or analytical categories.

Q23. Which option preserves the source-bounded meaning of Community forest resource rights as the governance limb?

A. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. B. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. C. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. D. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately.

Answer: C. Explanation: Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. The remaining options belong to different chronology, actor or analytical categories.

Q24. Which statement avoids a close-option trap about Community forest resource rights as the governance limb?

A. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. B. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. C. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. D. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.

Answer: D. Explanation: Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. The remaining options belong to different chronology, actor or analytical categories.

Q25. Which statement correctly identifies The ministry's own account of the statute, verified on the record date?

A. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop

destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. B. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

Answer: A. Explanation: The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. The remaining options belong to different chronology, actor or analytical categories.

Q26. Which chronology card should be filed under The ministry's own account of the statute, verified on the record date?

A. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. B. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

Answer: B. Explanation: The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights

holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. The remaining options belong to different chronology, actor or analytical categories.

Q27. Which option preserves the source-bounded meaning of The ministry's own account of the statute, verified on the record date?

A. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. C. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. D. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.

Answer: C. Explanation: The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not

until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. The remaining options belong to different chronology, actor or analytical categories.

Q28. Which statement avoids a close-option trap about The ministry's own account of the statute, verified on the record date?

A. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. C. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. D. The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement,

that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance.

Answer: D. Explanation: The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. The remaining options belong to different chronology, actor or analytical categories.

Q29. Which statement correctly identifies The claim process from Gram Sabha to district committee?

A. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. B. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and

resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.

Answer: A. Explanation: The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. The remaining options belong to different chronology, actor or analytical categories.

Q30. Which chronology card should be filed under The claim process from Gram Sabha to district committee?

A. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. B. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. C. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. D. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.

Answer: B. Explanation: The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. The remaining options belong to different chronology, actor or analytical categories.

Q31. Which option preserves the source-bounded meaning of The claim process from Gram Sabha to district committee?

A. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. B. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. C. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. D. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme.

Answer: C. Explanation: The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. The remaining options belong to different chronology, actor or analytical categories.

Q32. Which statement avoids a close-option trap about The claim process from Gram Sabha to district committee?

A. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. C. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of

Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. D. The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.

Answer: D. Explanation: The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred. The remaining options belong to different chronology, actor or analytical categories.

Q33. Which statement correctly identifies Rejection of a claim is not authority to evict?

A. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. B. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. C. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. D. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

Answer: A. Explanation: The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create

eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. The remaining options belong to different chronology, actor or analytical categories.

Q34. Which chronology card should be filed under Rejection of a claim is not authority to evict?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. C. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. D. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.

Answer: B. Explanation: The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. The remaining options belong to different chronology, actor or analytical categories.

Q35. Which option preserves the source-bounded meaning of Rejection of a claim is not authority to evict?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are

complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. C. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. D. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used.

Answer: C. Explanation: The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. The remaining options belong to different chronology, actor or analytical categories.

Q36. Which statement avoids a close-option trap about Rejection of a claim is not authority to evict?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. C. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. D. The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately.

Answer: D. Explanation: The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a

standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. The remaining options belong to different chronology, actor or analytical categories.

Q37. Which statement correctly identifies Rights in a critical wildlife habitat and the cumulative safeguards?

A. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. C. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. D. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme.

Answer: A. Explanation: The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. The remaining options belong to different chronology, actor or analytical categories.

Q38. Which chronology card should be filed under Rights in a critical wildlife habitat and the cumulative safeguards?

A. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. B. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is

satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. C. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. D. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used.

Answer: B. Explanation: The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. The remaining options belong to different chronology, actor or analytical categories.

Q39. Which option preserves the source-bounded meaning of Rights in a critical wildlife habitat and the cumulative safeguards?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. C. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. D. The owners record the livelihood limb as a national

agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.

Answer: C. Explanation: The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. The remaining options belong to different chronology, actor or analytical categories.

Q40. Which statement avoids a close-option trap about Rights in a critical wildlife habitat and the cumulative safeguards?

A. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. B. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. C. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. D. The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

Answer: D. Explanation: The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. The remaining options

belong to different chronology, actor or analytical categories.

Q41. Which statement correctly identifies The self-governance law read for its welfare content?

A. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. C. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. D. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.

Answer: A. Explanation: In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. The remaining options belong to different chronology, actor or analytical categories.

Q42. Which chronology card should be filed under The self-governance law read for its welfare content?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the

Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. C. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: B. Explanation: In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. The remaining options belong to different chronology, actor or analytical categories.

Q43. Which option preserves the source-bounded meaning of The self-governance law read for its welfare content?

A. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. B. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. C. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: C. Explanation: In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for

their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. The remaining options belong to different chronology, actor or analytical categories.

Q44. Which statement avoids a close-option trap about The self-governance law read for its welfare content?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. B. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. C. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. D. In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.

Answer: D. Explanation: In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. The remaining options belong to different chronology, actor or analytical categories.

Q45. Which statement correctly identifies Particularly vulnerable tribal groups and their identification criteria?

A. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. B. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across

housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. C. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: A. Explanation: A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. The remaining options belong to different chronology, actor or analytical categories.

Q46. Which chronology card should be filed under Particularly vulnerable tribal groups and their identification criteria?

A. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. B. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. C. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is

precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: B. Explanation: A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. The remaining options belong to different chronology, actor or analytical categories.

Q47. Which option preserves the source-bounded meaning of Particularly vulnerable tribal groups and their identification criteria?

A. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. B. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. C. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: C. Explanation: A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. The remaining options belong to different chronology, actor or analytical categories.

Q48. Which statement avoids a close-option trap about Particularly vulnerable tribal groups and their identification criteria?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. B. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. C. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. D. A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used.

Answer: D. Explanation: A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used. The remaining options belong to different chronology, actor or analytical categories.

Q49. Which statement correctly identifies The convergence mission for the most vulnerable groups?

A. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. B. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. C. Eklayva Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI

to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. D. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.

Answer: A. Explanation: Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. The remaining options belong to different chronology, actor or analytical categories.

Q50. Which chronology card should be filed under The convergence mission for the most vulnerable groups?

A. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. B. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. C. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. Answer: B. Explanation: Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly

vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. The remaining options belong to different chronology, actor or analytical categories.

Q51. Which option preserves the source-bounded meaning of The convergence mission for the most vulnerable groups?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. D. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail.

Answer: C. Explanation: Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. The remaining options belong to different chronology, actor or analytical categories.

Q52. Which statement avoids a close-option trap about The convergence mission for the most vulnerable groups?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. D. Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme.

Answer: D. Explanation: Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. The remaining options belong to different chronology, actor or analytical categories.

Q53. Which statement correctly identifies Minor forest produce, the village enterprise unit and price support?

A. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. B. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations

that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. C. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. D. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.

Answer: A. Explanation: The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. The remaining options belong to different chronology, actor or analytical categories.

Q54. Which chronology card should be filed under Minor forest produce, the village enterprise unit and price support?

A. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. B. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. C. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. D. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.

Answer: B. Explanation: The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. The remaining options belong to different chronology, actor or analytical categories.

Q55. Which option preserves the source-bounded meaning of Minor forest produce, the village enterprise unit and price support?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. B. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. C. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. D. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument.

Answer: C. Explanation: The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. The remaining options belong to different chronology, actor or analytical categories.

Q56. Which statement avoids a close-option trap about Minor forest produce, the village enterprise unit and price support?

A. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. B. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. C. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. D. The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.

Answer: D. Explanation: The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. The remaining options belong to different chronology, actor or analytical categories.

Q57. Which statement correctly identifies Residential education and the block-level norm?

A. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general

endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. D. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.

Answer: A. Explanation: Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. The remaining options belong to different chronology, actor or analytical categories.

Q58. Which chronology card should be filed under Residential education and the block-level norm?

A. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. B. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. C. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. D. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.

Answer: B. Explanation: Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as

one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. The remaining options belong to different chronology, actor or analytical categories.

Q59. Which option preserves the source-bounded meaning of Residential education and the block-level norm?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: C. Explanation: Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. The remaining options belong to different chronology, actor or analytical categories.

Q60. Which statement avoids a close-option trap about Residential education and the block-level norm?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. C. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.

Answer: D. Explanation: Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover. The remaining options belong to different chronology, actor or analytical categories.

Q61. Which statement correctly identifies The constitutional commission and the ownership of institutional detail?

A. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is

recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: A. Explanation: The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. The remaining options belong to different chronology, actor or analytical categories.

Q62. Which chronology card should be filed under The constitutional commission and the ownership of institutional detail?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. C. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the

forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: B. Explanation: The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. The remaining options belong to different chronology, actor or analytical categories.

Q63. Which option preserves the source-bounded meaning of The constitutional commission and the ownership of institutional detail?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. C. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: C. Explanation: The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the

Governor's powers, so an answer here uses the status and routes the institutional detail. The remaining options belong to different chronology, actor or analytical categories.

Q64. Which statement avoids a close-option trap about The constitutional commission and the ownership of institutional detail?

A. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. B. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. C. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail.

Answer: D. Explanation: The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail. The remaining options belong to different chronology, actor or analytical categories.

Q65. Which statement correctly identifies Land alienation and the State laws that address it?

A. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: A. Explanation: Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. The remaining options belong to different chronology, actor or analytical categories.

Q66. Which chronology card should be filed under Land alienation and the State laws that address it?

A. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. B. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its

administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. C. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. D. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here.

Answer: B. Explanation: Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. The remaining options belong to different chronology, actor or analytical categories.

Q67. Which option preserves the source-bounded meaning of Land alienation and the State laws that address it?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local

enforcement rather than propose a prohibition that already exists. D. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here.

Answer: C. Explanation: Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. The remaining options belong to different chronology, actor or analytical categories.

Q68. Which statement avoids a close-option trap about Land alienation and the State laws that address it?

A. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. B. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. D. Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.

Answer: D. Explanation: Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal

prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. The remaining options belong to different chronology, actor or analytical categories.

Q69. Which statement correctly identifies The case bank and the committee diagnosis?

A. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. B. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. C. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: A. Explanation: The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. The remaining options belong to different chronology, actor or analytical categories.

Q70. Which chronology card should be filed under The case bank and the committee diagnosis?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. C. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.

Answer: B. Explanation: The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. The remaining options belong to different chronology, actor or analytical categories.

Q71. Which option preserves the source-bounded meaning of The case bank and the committee diagnosis?

A. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. B.

The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. D. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.

Answer: C. Explanation: The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. The remaining options belong to different chronology, actor or analytical categories.

Q72. Which statement avoids a close-option trap about The case bank and the committee diagnosis?

A. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. B. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. C. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. D. The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights,

and that a committee report is a diagnosis and not a binding instrument.

Answer: D. Explanation: The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument. The remaining options belong to different chronology, actor or analytical categories.

Q73. Which statement correctly identifies Rehabilitation policy and what compensation cannot buy?

A. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. B. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. C. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. D. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.

Answer: A. Explanation: The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested

question. The remaining options belong to different chronology, actor or analytical categories.

Q74. Which chronology card should be filed under Rehabilitation policy and what compensation cannot buy?

A. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. B. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. C. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. D. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here.

Answer: B. Explanation: The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. The remaining options belong to different chronology, actor or analytical categories.

Q75. Which option preserves the source-bounded meaning of Rehabilitation policy and what compensation cannot buy?

A. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. B. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the

convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. D. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.

Answer: C. Explanation: The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. The remaining options belong to different chronology, actor or analytical categories.

Q76. Which statement avoids a close-option trap about Rehabilitation policy and what compensation cannot buy?

A. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. B. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. C. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. D. The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.

Answer: D. Explanation: The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. The remaining options belong to different chronology, actor or analytical categories.

Q77. Which statement correctly identifies Heterogeneity discipline and the honest ownership statement?

A. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. B. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. C. This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here. D. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.

Answer: A. Explanation: Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. The remaining

Q78. Which chronology card should be filed under Heterogeneity discipline and the honest ownership statement?

A. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. B. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. C. The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. D. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

Answer: B. Explanation: Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. The remaining options belong to different chronology, actor or analytical categories.

Q79. Which option preserves the source-bounded meaning of Heterogeneity discipline and the honest ownership statement?

A. The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. B. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it

is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. C. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. D. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Answer: C. Explanation: Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. The remaining options belong to different chronology, actor or analytical categories.

Q80. Which statement avoids a close-option trap about Heterogeneity discipline and the honest ownership statement?

A. Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic. B. Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. C. Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. D. Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable

tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured.

Answer: D. Explanation: Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. The remaining options belong to different chronology, actor or analytical categories.

PYQS AND ANSWER PRACTICE

TRANSPARENT ZERO-DIRECT-PYQ AUDIT

No General Studies Mains demand is routed to this owner in the audited routing ledgers, and exactly two objective demands are, so the ownership statement is a mixed one and is reported precisely. The two routed objective demands are 2019 Prelims General Studies Paper I Question 51 on the criteria for particularly vulnerable tribal groups in India and 2021 Prelims General Studies Paper I Question 84 on the nodal ministry for the Forest Rights Act, 2006, both recorded in the audited 2018-2023 Prelims routing ledger, which states expressly that the official 2018-2023 Prelims keys are not held locally, so no option, key or inferred answer is recorded for either demand and neither is converted into a solved question; both are instead covered as taught content, the four identification criteria being stated in full and the administering ministry being identified from its own official page. No Mains demand card is manufactured for this topic. The Basic and Advanced owners both discuss the 2025 General Studies Paper I question asking whether tribal development in India centres around the two axes of displacement and rehabilitation, but the audited 2024-2025 Mains routing ledger routes that question to the Indian Society owner, so no demand card is created for it here and no ownership is claimed over it; the same ledger routes the 2021 and 2022 General Studies Paper I demands on tribal knowledge systems and tribal diversity to that owner, the 2023 colonial-rule-and-tribals demand to the Modern History owner, and the Fifth Schedule, Scheduled Area and forest-rights objective demands of 2018, 2019, 2022, 2023, 2024 and 2025 to the Polity and Environment owners, so none of those is claimed either. The practice in this package therefore consists of six original Mains questions with model solutions, each written to the repository's examiner-grade standard using the claim, named evidence, analysis and qualification pattern, together with eighty original objective questions on a strict A -> B -> C -> D rotation. Each model solution opens with its analytical claim so that the evidence which follows does argumentative rather than decorative work. The locally held OCR-searchable official General Studies papers were read only to confirm that no Mains question on this owner's subject matter is routed here; no question was invented from them, no marking scheme or page precision was imported and no official answer key is claimed anywhere in this package.

Demand decoding: The directive **answer** requires a direct position on "TRANSPARENT ZERO-DIRECT-PYQ AUDIT", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The answer must resolve the Social Justice demand in "TRANSPARENT ZERO-DIRECT-PYQ AUDIT".

Analytical body:

1. **Claim and named evidence:** Define the vulnerable group, deprivation, right or policy concept and distinguish the nearest legal and measured category. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule

-> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.

Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

2. **Claim and named evidence:** Identify the constitutional, statutory, judicial or executive basis and the competent Union, state or local institution. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.

Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

3. **Claim and named evidence:** Map rights-holder, household/community context, duty-bearer, frontline worker, provider and accountability forum. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.

Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

4. **Claim and named evidence:** Trace identification, eligibility, documentation, finance, access, portability, grievance, appeal and correction. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.

Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

5. **Claim and named evidence:** Use a named Indian law, judgment, scheme, institution or official dataset with source, date, denominator and status. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.

Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

6. **Claim and named evidence:** Test intersectionality, regional variation, stigma, accessibility, privacy, fiscal adequacy, exclusion and causal limits. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction.

Qualification: State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The answer must resolve the Social Justice demand in "TRANSPARENT ZERO-DIRECT-PYQ AUDIT".

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "TRANSPARENT ZERO-DIRECT-PYQ AUDIT", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

OWNER PYQ LEDGER EXTRACTS

9. PYQ application

- **FACT: 2025 GS-I (250 words):** structure the answer as: (a) displacement axis - mining, dams, protected areas, land alienation; (b) rehabilitation axis - FRA (land/forest rights), PM-JANMAN (PVTG services), Van Dhan (livelihood), EMRS (education); (c) opinion - the two-axis framing is largely accurate but may understate a third dimension: livelihood/market integration or cultural autonomy; (d) recommend - move from displacement-rehabilitation dichotomy to a holistic development model integrating economic opportunity and identity protection.

Historical PYQ Integration (2018-2023)

Status: Question-level PYQ demand is integrated into this owner. **Provenance:** Audited local official-paper routing ledgers: _PYQ-ROUTING-PRELIMS-2018-2023.md. **Answer-key rule:** The official 2018-2023 Prelims/CSAT keys are not held locally; no option or answer has been inferred.

- **Years represented:** 2019, 2021
- **Paper(s):** Prelims GS-I
- **Routed question demands:** 2

Year	Paper	Q	PYQ demand (neutral rendering)	Directive / format	Source status	Owner requirement
2019	Prelims GS-I	51	Particularly Vulnerable Tribal Groups PVTGs criteria India	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.
2021	Prelims GS-I	84	Nodal ministry for Forest Rights Act 2006	Objective question; official key unavailable locally	Routed; key unavailable locally	Cover the named fact/concept and its likely statement-level distinctions.

What this owner must now support

- Particularly Vulnerable Tribal Groups PVTGs criteria India
- Nodal ministry for Forest Rights Act 2006

The table integrates the examinable demand and paper metadata. It does not turn an unkeyed objective question into a solved answer, and it does not claim that lexical presence alone proves full conceptual sufficiency.

10. PYQ-based analytical application

- **FACT: 2025 GS-I (250 words):** the model answer: (a) map displacement drivers (mining, dams, protected areas, land alienation); (b) map rehabilitation instruments (FRA, PM-JANMAN, Van Dhan, EMRS); (c) propose a third axis - livelihood/market integration or cultural autonomy; (d) argue that policy coherence improves with a three-axis model; (e) conclude with a "yes, but" position: the two-axis framing is substantially correct but incomplete.

Demand decoding: The directive **answer** requires a direct position on "10. PYQ-based analytical application", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The answer must resolve the Social Justice demand in "10. PYQ-based analytical application".

Analytical body:

1. **Claim and named evidence:** **FACT:** 2025 GS-I (250 words): the model answer: (a) map displacement drivers (mining, **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy,

portability or residual exclusion.

2. **Claim and named evidence:** dams, protected areas, land alienation); (b) map rehabilitation instruments (FRA, **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** PM-JANMAN, Van Dhan, EMRS); (c) propose a third axis - livelihood/market integration **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** or cultural autonomy; (d) argue that policy coherence improves with a three-axis **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
5. **Claim and named evidence:** model; (e) conclude with a "yes, but" position: the two-axis framing is substantially **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The answer must resolve the Social Justice demand in "10. PYQ-based analytical application".

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "10. PYQ-based analytical application", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 1 - 10 MARKS

Question: Distinguish the three categories of right recognised by the Forest Rights Act, 2006, and explain what each secures. Answer in about 150 words.

Model thesis: The three categories secure tenure, livelihood and governance respectively, so the distinction must name the holder, the object and the limit of each, and must close on why the third is the least operationalised.

Claim -> named evidence -> analysis -> qualification:

- The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.
- Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to

the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

- Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.
- Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.

Qualified conclusion: The three categories secure tenure, livelihood and governance respectively, so the distinction must name the holder, the object and the limit of each, and must close on why the third is the least operationalised.

Demand decoding: The directive **explain** requires a direct position on “Distinguish the three categories of right recognised by the Forest Rights Act, 2006, and...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The three categories secure tenure, livelihood and governance respectively, so the distinction must name the holder, the object and the limit of each, and must close on why the third is the least operationalised.

Analytical body:

1. **Claim and named evidence:** The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly

used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Analysis: Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

4. **Claim and named evidence:** Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The three categories secure tenure, livelihood and governance respectively, so the distinction must name the holder, the object and the limit of each, and must close on why the third is the least operationalised.

Executable exam-length answer / compression plan: For 10 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For “Distinguish the three categories of right recognised by the Forest Rights Act, 2006, and...”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 2 - 10 MARKS

Question: Examine why particularly vulnerable tribal groups are treated as a distinct policy category. Answer in about 150 words.

Model thesis: The category exists because four vulnerability criteria identify communities that a tribe-wide scheme would miss, so the examination must state the criteria exactly, name the convergence design built for them and close on the delivery caution.

Claim -> named evidence -> analysis -> qualification:

- A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used.
- Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through

convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme.

- Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.
- Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured.

Qualified conclusion: The category exists because four vulnerability criteria identify communities that a tribe-wide scheme would miss, so the examination must state the criteria exactly, name the convergence design built for them and close on the delivery caution.

Demand decoding: The directive **examine** requires a direct position on “Examine why particularly vulnerable tribal groups are treated as a distinct policy category...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

ORIGINAL MAINS 3 - 15 MARKS

Question: Critically examine the implementation of forest-rights recognition in India. Answer in about 250 words.

Model thesis: The statute is generous and the procedure is where it is decided, so the critical examination must run the three-tier claim chain, separate rejection from eviction authority and locate the failure at a named tier rather than in the text.

Claim -> named evidence -> analysis -> qualification:

- The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.
- The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately.
- Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.
- Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

Qualified conclusion: The statute is generous and the procedure is where it is decided, so the critical examination must run the three-tier claim chain, separate rejection from eviction authority and locate the failure at a named tier rather than in the text.

Demand decoding: The directive **critically examine** requires a direct position on “Critically examine the implementation of forest-rights recognition in India. Answer in about...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The statute is generous and the procedure is where it is decided, so the critical examination must run the three-tier claim chain, separate rejection from eviction authority and locate the failure at a named tier rather than in the text.

Analytical body:

1. **Claim and named evidence:** The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an

implementation answer must name the tier at which the failure occurred. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

2. **Claim and named evidence:** The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

ORIGINAL MAINS 4 - 15 MARKS

Question: Assess whether recognising rights over minor forest produce is sufficient to secure tribal livelihoods. Answer in about 250 words.

Model thesis: Ownership and income are separated by processing and market access, so the assessment must connect the community-rights head to the village-enterprise and price-support channel and close on uneven coverage.

Claim -> named evidence -> analysis -> qualification:

- Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.
- The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.
- In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.
- Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme.

Qualified conclusion: Ownership and income are separated by processing and market access, so the assessment must connect the community-rights head to the village-enterprise and price-support channel and close on uneven coverage.

Demand decoding: The directive **assess** requires a direct position on “Assess whether recognising rights over minor forest produce is sufficient to secure tribal...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Ownership and income are separated by processing and market access, so the assessment must connect the community-rights head to the village-enterprise and price-support channel and close on uneven coverage.

Analytical body:

1. **Claim and named evidence:** Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual,

so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.

Analysis: Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

2. **Claim and named evidence:** The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: Ownership and income are separated by processing and market access, so the assessment must connect the community-rights head to the village-enterprise and price-support channel and close on uneven coverage.

Executable exam-length answer / compression plan: For 15 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

How to improve this answer: For “Assess whether recognising rights over minor forest produce is sufficient to secure tribal...”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 5 - 20 MARKS

Question: Analyse the displacement and rehabilitation axes of tribal development and evaluate whether a third axis is required. Answer in about 300 words.

Model thesis: The two axes describe the tension accurately but stop at material restoration, so the analysis must map both axes with named instruments, test them against the conditional protected-area provision and the compensation limit, and argue a third axis of livelihood integration or cultural autonomy.

Claim -> named evidence -> analysis -> qualification:

- The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.
- The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.
- The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.
- Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured.

Qualified conclusion: The two axes describe the tension accurately but stop at material restoration, so the analysis must map both axes with named instruments, test them against the conditional protected-area provision and the compensation limit, and argue a third axis of livelihood integration or cultural autonomy.

Demand decoding: The directive **analyse** requires a direct position on “Analyse the displacement and rehabilitation axes of tribal development and evaluate whether a...”, every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: The two axes describe the tension accurately but stop at material restoration, so the analysis must map both axes with named instruments, test them against the conditional protected-area provision and the compensation limit, and argue a third axis of livelihood integration or cultural autonomy.

Analytical body:

1. **Claim and named evidence:** The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
2. **Claim and named evidence:** The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
3. **Claim and named evidence:** The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.
4. **Claim and named evidence:** Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025

tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Counter-position / limit: A constitutional promise, prohibition, reservation provision, scheme catalogue, allocation, registration count or headline statistic cannot alone establish accessible implementation, adequate benefit, dignity, remedy or attributable outcome; test eligibility, institutions, frontline capacity, intersectionality, regional variation, grievance and evidence status.

Qualified conclusion: The two axes describe the tension accurately but stop at material restoration, so the analysis must map both axes with named instruments, test them against the conditional protected-area provision and the compensation limit, and argue a third axis of livelihood integration or cultural autonomy.

Executable exam-length answer / compression plan: For 20 marks, spend one-sixth of the time decoding the directive and drawing right/need -> institution -> eligibility -> delivery -> outcome -> remedy; state a thesis; write four to seven claim -> named evidence -> analysis -> qualification points; reserve the final minute for dignity, accessibility, portability, grievance, denominator, fiscal and causal limits.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For “Analyse the displacement and rehabilitation axes of tribal development and evaluate whether a...”, replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

ORIGINAL MAINS 6 - 20 MARKS

Question: Evaluate the proposition that tribal land alienation is a failure of administration rather than of law. Answer in about 300 words.

Model thesis: Prohibition already exists and restoration does not, so the evaluation must name the State laws, locate the failure in records, restoration proceedings and local enforcement, and use the case bank and the committee diagnosis to test the claim.

Claim -> named evidence -> analysis -> qualification:

- Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.
- The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument.
- Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately withholding the marketability that would reopen the land-alienation problem it exists to close.

- The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail.

Qualified conclusion: Prohibition already exists and restoration does not, so the evaluation must name the State laws, locate the failure in records, restoration proceedings and local enforcement, and use the case bank and the committee diagnosis to test the claim.

Demand decoding: The directive **evaluate** requires a direct position on "Evaluate the proposition that tribal land alienation is a failure of administration rather...", every clause, constitutional/statutory/policy distinction, rights-holder and institution map, eligibility/exclusion and delivery chain, intersectional and regional variation, named Indian evidence, accountability and qualified conclusion.

Detailed examiner-grade model answer:

Introduction and thesis: Prohibition already exists and restoration does not, so the evaluation must name the State laws, locate the failure in records, restoration proceedings and local enforcement, and use the case bank and the committee diagnosis to test the claim.

Analytical body:

1. **Claim and named evidence:** Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists. **Analysis:** Connect right or deprivation -> institutional duty and eligibility rule -> frontline implementation -> differentiated access and outcome -> grievance, audit or course correction. **Qualification:** State internal group and regional variation, legal/operative status, denominator, fiscal or causal limit, accessibility, dignity, privacy, portability or residual exclusion.

Why this earns marks: The answer obeys the directive, explains mechanisms rather than listing schemes, uses named India-centric evidence and preserves legal, institutional, group, eligibility, implementation, fiscal, data and outcome distinctions.

How to improve this answer: For "Evaluate the proposition that tribal land alienation is a failure of administration rather...", replace the weakest scheme-catalogue point with one named rights-holder, duty-bearer, eligibility bottleneck, safeguard, grievance route, process/outcome indicator and source-status qualification.

OPTIONAL ADVANCED DEPTH - NOT REQUIRED FOR A CORE ANSWER

Subject: Social Justice | **Tier:** Advanced | **GS Paper:** GS-II; GS-I society link (displacement-rehabilitation, 2025 PYQ). **Core area:** FRA implementation gaps, PVTG targeting, displacement-rehabilitation causal chain, third-axis debate and tribal-welfare reform. **Grounded in:** FRA, 2006; PESA, 1996 (welfare angle); PM-JANMAN; Van Dhan/TRIFED; EMRS; land-alienation laws; audited 2025 GS-I PYQ. **FACT:** = source-grounded | **ANALYSIS:** = inference/analysis | **CURRENT:** = current anchor. *Companion:* basic/08_Scheduled-Tribes-PVTGs-and-Tribal-Welfare.md.

1. Architecture

TRIBAL DEVELOPMENT: THREE-AXIS MODEL
(analytical extension of 2025 GS-I PYQ)

Analytical claim: ANALYSIS: The 2025 GS-I PYQ's displacement-rehabilitation framing is substantially correct but incomplete; a Mains answer earns higher marks by proposing a third axis - livelihood/market integration (ensuring land-title recognition translates into income security) or cultural autonomy (protecting tribal identity/governance) - and arguing that moving from a two-axis dichotomy to a three-axis model would improve policy coherence.

2. Concepts and distinctions

Concept	Precise meaning
FACT: Individual vs community vs community forest resource rights (FRA)	Individual rights secure land-holding for habitation/cultivation (≤ 4 ha); community rights grant collective ownership of MFP, grazing, traditional/customary access; community forest resource rights empower the Gram Sabha to protect/manage traditionally conserved forests - the third category is the most empowering but least operationalised.
FACT: PVTG criteria	Pre-agricultural or low-level technology, low literacy, declining or stagnant population, economic backwardness relative to other tribal groups - 75 communities are officially identified.
FACT: FRA rejection vs eviction	FRA provides a process for recognising rights; rejection does not erase due-process duties or justify automatic eviction. The Supreme Court's 2019 eviction direction concerning rejected claims was stayed, so an answer must not treat that interim episode as a standing automatic-eviction rule.
ANALYSIS: Land alienation	Transfer of tribal land to non-tribals, regulated by state-specific tenancy/land-transfer laws in Fifth Schedule areas (e.g., Chotanagpur Tenancy Act, AP Scheduled Areas Land Transfer Regulation) - a persistent welfare problem despite legal prohibition.
ANALYSIS: R&R policy	Rehabilitation and Resettlement policy (various state and central frameworks, including the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013) - intended to compensate and resettle displaced tribals, but implementation gaps persist.

3. Detailed causal chain: displacement-rehabilitation-third axis

Displacement chain

- Mining/industrial projects:** land acquisition in tribal/forest areas for minerals, power, industry; tribals lose land, forest access and livelihood.
- Dams/irrigation projects:** submergence displaces habitation; R&R often delayed or inadequate.
- Protected-area notification:** wildlife sanctuaries/national parks can restrict access. FRA Section 4(2) permits modification of rights in critical wildlife habitat only after its cumulative safeguards - completed rights recognition, scientific case, coexistence assessment, Gram Sabha's free informed consent and a secure resettlement/ livelihood package - are met; it is not a general relocation power.
- Land alienation:** despite legal prohibition, tribal land transfers to non-tribals through informal/illegal means continue; state-level enforcement is variable.

Rehabilitation chain

- FRA rights recognition:** individual titles secure land; community rights secure MFP livelihood; community forest resource rights empower governance - but recognition rates vary and rejection rates are high in some states.
- PM-JANMAN:** PVTG-focused saturation addresses the most vulnerable sub-groups with housing, connectivity, health and education convergence.
- Van Dhan/TRIFED:** MFP value-addition and marketing improve livelihood returns; MSP-for-MFP provides price support.
- EMRS:** residential education bridges the tribal-education gap; aims to produce a

skilled tribal youth cohort.

Third-axis debate (opinion for 2025 GS-I PYQ)

1. **Livelihood/market integration:** land-title recognition alone does not ensure income security; tribals need credit, market linkage, skill development and non-farm livelihood options - Van Dhan and PM-JANMAN address this, but scale is limited.
2. **Cultural autonomy:** material rehabilitation may displace but not restore tribal identity, language, self-governance; PESA's Gram Sabha powers and FRA's community forest resource rights partially address this, but cultural-preservation mechanisms are weak.
3. **Recommended position (ANALYSIS):** the two-axis framing is a useful starting point, but policy coherence improves if a third axis is explicitly added - either livelihood/ market integration or cultural autonomy, depending on the policy context.

4. Institutional and reform architecture

- FACT: **FRA implementation:** Gram Sabha (initial authority), SDLC (verification), DLC (final adjudication); Rules specify timelines, evidence requirements; implementation quality varies by state.
- FACT: **PESA (welfare angle):** Gram Sabha's mandatory consultation before land acquisition; MFP ownership; money-lending regulation; control over village markets - empowers tribal self-governance at the village level in Scheduled Areas.
- FACT: **PM-JANMAN:** launched 15 November 2023; convergence design for 75 PVTG communities across 18 States/UTs, including PMAY-G (housing), health, education, connectivity and livelihoods.
- FACT: **TRIFED:** national-level agency for tribal-produce marketing; implements Van Dhan Yojana and MSP-for-MFP.
- FACT: **State land-transfer laws:** Chotanagpur Tenancy Act (Jharkhand), AP Scheduled Areas Land Transfer Regulation, etc. - regulate tribal-land alienation in Fifth Schedule areas; enforcement is the weak link.

5. Indian applications and boundary cases

- ANALYSIS: A PVTG community in a remote forested area with no road connectivity: PM-JANMAN's infrastructure-saturation approach (road, electricity, water) is designed precisely for this case - illustrates PVTG-targeting rationale.
- ANALYSIS: A tribal household with FRA individual-rights title but no market access for produce: FRA secures tenure but not income; Van Dhan/TRIFED linkage is the livelihood-integration instrument - a gap if not converged.
- ANALYSIS: Boundary case - tribals in protected areas: FRA's Section 4(2) provides for in-situ rehabilitation or relocation R&R, but implementation is contested; displacement- rehabilitation tension is sharpest here.

6. Limitations and trade-offs

- ANALYSIS: **FRA rejection rates:** high rejection rates in some states indicate procedural/ evidence barriers; rejected claimants face eviction risk.
- ANALYSIS: **PESA consultation vs project timelines:** mandatory consultation can delay infrastructure projects; balancing tribal consent with development timelines is a live policy tension.
- ANALYSIS: **PM-JANMAN scale:** 75 PVTG communities across dispersed geographies; saturation requires sustained funding and inter-ministerial coordination.
- ANALYSIS: **Van Dhan/TRIFED coverage:** VDVks are not universal; market-linkage benefits accrue unevenly across tribal regions.

7. Must-Know Facts for Advanced Prelims

- FACT: FRA's Section 4(2) provides for in-situ rehabilitation or relocation R&R for tribals in protected areas.
- FACT: 75 PVTG communities are officially identified; PM-JANMAN targets these specifically.
- FACT: TRIFED implements Van Dhan Yojana (VDVKs) and MSP-for-MFP for tribal-produce marketing.
- FACT: State-specific tenancy/land-transfer laws regulate tribal-land alienation in Fifth Schedule areas.

8. Advanced Prelims traps

- WRONG: FRA recognises only individual forest rights. -> FRA recognises three categories: individual, community and community forest resource rights.
- WRONG: PESA's consultation requirement applies to all rural areas. -> PESA applies only to Scheduled Areas under the Fifth Schedule.
- WRONG: PM-JANMAN is a universal tribal-welfare scheme. -> PM-JANMAN is specifically designed for the 75 PVTG communities.

9. CURRENT: Current-anchor note

- CURRENT: **PM-JANMAN (21 July 2026)**: launched on 15 November 2023 for 75 PVTG communities across 18 States/UTs. Its convergence design is the durable fact; qualify any coverage number by component and reporting date.

10. PYQ-based analytical application

- FACT: **2025 GS-I (250 words)**: the model answer: (a) map displacement drivers (mining, dams, protected areas, land alienation); (b) map rehabilitation instruments (FRA, PM-JANMAN, Van Dhan, EMRS); (c) propose a third axis - livelihood/market integration or cultural autonomy; (d) argue that policy coherence improves with a three-axis model; (e) conclude with a "yes, but" position: the two-axis framing is substantially correct but incomplete.

11. Mains-ready framework

Central thesis: Tribal development in India does substantially centre on displacement and rehabilitation, but a complete policy framework requires a third axis - livelihood/market integration ensuring that land-title recognition translates into sustainable income, and/or cultural autonomy protecting tribal identity beyond material resettlement. The 2025 GS-I PYQ rewards this nuanced "yes, but" position.

1. **Map displacement drivers:** mining, dams, protected-area notification, land alienation.
2. **Map rehabilitation instruments:** FRA (three rights categories), PM-JANMAN (PVTG saturation), Van Dhan (MFP livelihood), EMRS (education).
3. **Introduce third-axis debate:** livelihood/market integration - land title $\neq$ income security; cultural autonomy - material R&R $\neq$ identity/governance preservation.
4. **Give reasoned opinion:** two-axis framing is accurate as a starting point; adding a third axis improves policy coherence.
5. **Recommend:** converge FRA rights recognition with Van Dhan market linkage; strengthen PESA Gram Sabha powers for cultural self-governance; integrate livelihood-outcome indicators into PM-JANMAN M&E.

12. Probable questions

- ANALYSIS: **Prelims:** Which section of the Forest Rights Act, 2006, provides for in-situ rehabilitation or relocation R&R for tribals in protected areas?

- **FACT: Mains (250 words, 2025 GS-I PYQ):** Does tribal development in India centre around two axes, those of displacement and of rehabilitation? Give your opinion.
- **ANALYSIS: Mains (15 marks):** Critically examine the implementation challenges of the Forest Rights Act, 2006, in recognising community forest resource rights.
- **ANALYSIS: Mains (10 marks):** How does PM-JANMAN differ from earlier tribal-welfare schemes in its design and targeting approach?

13. Study links

- **FACT:** Foundation companion: `basic/08_Scheduled-Tribes-PVTGs-and-Tribal-Welfare.md`.
- **FACT:** `Polity/basic/Scheduled-and-Tribal-Areas.md` - Fifth Schedule, PESA institutional structure (Polity owns this).

CONSOLIDATED REGISTER NOTES

Scheduled Tribes, PVTGs and Tribal Welfare: RAPID RIGHT, SCHEME AND MEASURED-OUTCOME MAP

1. **What this owner holds and the demands routed to it:** This topic owns the tribal-welfare half of the rights-and-capability argument, namely forest-rights recognition, the welfare limb of the Scheduled-Areas self-governance law, the convergence mission for particularly vulnerable tribal groups, minor-forest-produce livelihood, residential education and the land-alienation problem; its examination record is objective rather than discursive, because the audited 2018-2023 Prelims routing ledger routes two objective demands to it, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and records the official keys for that period as not held locally, while the audited ledgers route no General Studies Mains demand here; the 2025 General Studies Paper I demand on tribal development, displacement and rehabilitation is routed by the ledger to the Indian Society owner, and the Fifth Schedule institutional machinery, the Tribes Advisory Council and the Governor's role are owned by the Polity owner, so none of those is claimed here.
2. **The two-axis frame and the third-axis debate:** The owners organise tribal development around two axes, displacement and rehabilitation: the displacement axis carries mining and industrial projects, dams and irrigation submergence, protected-area notification and land alienation, while the rehabilitation axis carries forest-rights recognition, the convergence mission for the most vulnerable groups, minor-forest-produce livelihood and residential education; they then record an analytical extension, namely that the two-axis framing is substantially correct but incomplete, because it omits either livelihood and market integration, which asks whether a recognised title converts into income security, or cultural autonomy, which asks whether identity, language and self-governance survive material resettlement, and the position the owners recommend is a qualified yes that adds a third axis rather than a denial of the first two.
3. **The forest-rights statute and its three categories of right:** The Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006 recognises three categories that must be named separately: individual forest rights, community rights and community forest resource rights; the owners record that examiners test precisely whether a candidate knows the third category, because an answer that describes the statute as a land-titling law has reduced a three-part recognition of tenure, livelihood and governance to its first part alone, and the recurring trap is exactly that reduction.
4. **Individual forest rights and their exact limits:** Individual forest rights are rights to hold and live in forest land under individual or family occupation for habitation or for self-cultivation, and the owners record three limits that make the category examinable: the title is limited to the area actually under occupation, subject to a ceiling of four hectares per nuclear family; it is heritable, so it passes within the family; and it is not transferable or alienable, so it cannot be sold to an outsider; the design logic is that the statute secures tenure against eviction while deliberately

withholding the marketability that would reopen the land-alienation problem it exists to close.

5. **Community rights as the livelihood limb of the statute:** Community rights under the statute are the livelihood limb and include ownership of minor forest produce, community grazing, access to biodiversity, traditional rights over fish and water bodies and other customary rights of the community; the owners stress that this head is collective rather than individual, so it is not a second individual title but a recognition that the forest economy on which a village depends is jointly used, and its practical effect is that produce which was previously collected under permission becomes produce that is owned, which is the precondition for the value-addition and marketing instruments taught later in this topic.
6. **Community forest resource rights as the governance limb:** Community forest resource rights are separate from both individual and community rights and constitute the governance limb of the statute, being the right of a Gram Sabha to protect, regenerate, conserve and manage the community forest resources it has traditionally protected; the owners describe this as the most empowering category and simultaneously the least operationalised, because awareness among claimants and administrative capacity among officials are limited, and their illustration of the category working as intended is a Gram Sabha exercising the right to regenerate a degraded forest, which converts a community from a claimant of produce into a manager of a resource.
7. **The ministry's own account of the statute, verified on the record date:** The Ministry of Tribal Affairs page for the forest-rights statute, read on 2 September 2026, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs, and that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; the same page records that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use, and that it also provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; it records that in conjunction with the land-acquisition, rehabilitation and resettlement statute of 2013 the Act protects the tribal population from eviction without rehabilitation and settlement, that the Act enjoins on the Gram Sabha and the rights holders a duty to conserve biodiversity, wildlife, forests, catchment areas, water sources and ecologically sensitive areas and to stop destructive practices, and that the Gram Sabha is a highly empowered body enabling a decisive say in local policies and schemes; the objectives it states are to undo the historical injustice to forest-dwelling communities, to ensure land tenure, livelihood and food security for forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime by placing responsibility and authority on rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance.
8. **The claim process from Gram Sabha to district committee:** The owners set out the recognition procedure as a three-tier chain: the Gram Sabha receives claims, verifies them and makes its recommendation; the Sub-Divisional Level Committee examines and verifies the recommendation; and the District Level Committee is the final adjudicating authority, with the Rules specifying timelines and evidence requirements; the examinable consequence is that recognition quality is a function of Gram Sabha capacity, documentary evidence and committee behaviour rather than of the statutory text alone, which is why recognition rates and rejection rates vary sharply across States and why an implementation answer must name the tier at which the failure occurred.
9. **Rejection of a claim is not authority to evict:** The owners state a precise legal boundary that is frequently misremembered: the statute provides a process for recognising rights, and rejection of a claim does not erase due-process duties or justify automatic eviction; they record that the 2019 direction of the Supreme Court concerning evictions of claimants whose claims had been rejected was stayed, so that interim episode must not be treated as a standing rule of automatic eviction; the answer-writing consequence is that high rejection rates create eviction risk as a practical matter without creating eviction authority as a legal matter, and the two must be stated separately.
10. **Rights in a critical wildlife habitat and the cumulative safeguards:** The owners record that Section 4(2) of the statute permits modification of rights in a critical wildlife habitat only after a set of cumulative safeguards is satisfied, namely completed recognition of rights, a scientific case for the modification, an assessment of whether

coexistence is possible, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package, and they state expressly that this is not a general relocation power; the significance is that the sharpest point of the displacement-rehabilitation tension, tribals living inside protected areas, is governed by a conditional provision with a consent requirement rather than by administrative discretion, so an answer must set out the conditions rather than assert either automatic protection or automatic relocation.

11. **The self-governance law read for its welfare content:** In Scheduled Areas the Panchayats (Extension to the Scheduled Areas) Act, 1996 gives Gram Sabhas powers that the owners read here for their welfare and livelihood effect rather than for their institutional design, namely mandatory consultation before land acquisition and resettlement, ownership of minor forest produce, control over money-lending regulation and management of village markets; the boundary is doubly stated, first that the law applies only to Scheduled Areas notified under the Fifth Schedule and not to all rural areas, and second that the constitutional and Panchayati Raj institutional detail belongs to the Polity owner and is cross-linked rather than re-taught here.
12. **Particularly vulnerable tribal groups and their identification criteria:** A particularly vulnerable tribal group is a sub-category within the Scheduled Tribes identified using four criteria that the owners state exactly, namely a pre-agricultural or low level of technology, low literacy, a declining or stagnant population and economic backwardness relative to other tribal groups, and seventy-five such communities are officially identified across India; the two traps the owners flag follow directly from the definition, first that not all Scheduled Tribes are such groups because the sub-category is defined by these vulnerability criteria, and second that the identification is of communities rather than of individuals, so the criteria must be stated in full whenever the category is used.
13. **The convergence mission for the most vulnerable groups:** Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan was launched on 15 November 2023 as a convergence mission of the Ministry of Tribal Affairs for the seventy-five identified particularly vulnerable tribal communities across eighteen States and Union Territories, and the owners record its saturation design across housing through convergence with the rural housing scheme, road, electricity and water infrastructure, health services delivered through mobile medical units and Anganwadi outreach, and education through residential schools and hostels; the status caution recorded on 21 July 2026 is that a sanctioned-household or dashboard count must not be converted into proof of completed service delivery, so any figure used must state the component and the reporting date, and the mission must not be described as a universal tribal-welfare scheme.
14. **Minor forest produce, the village enterprise unit and price support:** The owners record the livelihood limb as a national agency for tribal produce marketing which implements the village-enterprise scheme establishing Van Dhan Vikas Kendras at village level for aggregation, value addition through processing and packaging and market linkage of minor forest produce, together with minimum-support-price arrangements for such produce; the analytical point is that community rights under the forest-rights statute confer ownership of minor forest produce while this scheme supplies the processing and market channel through which ownership becomes income, so the two instruments are complements, and the owners record that these village units are not universal, so market-linkage benefits accrue unevenly across tribal regions.
15. **Residential education and the block-level norm:** Eklavya Model Residential Schools are dedicated tribal residential schools under the Ministry of Tribal Affairs providing education from Class VI to Class XII, and the owners record the norm as one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as otherwise laid down in ministry criteria; the reason the norm matters is that it makes the school a function of settlement density, so dispersed tribal populations that fall below the threshold are structurally harder to serve by this instrument, which is precisely the gap the hostel and convergence components of the vulnerable-group mission are meant to cover.
16. **The constitutional commission and the ownership of institutional detail:** The National Commission for Scheduled Tribes exists under Article 338A of the Constitution and is therefore a constitutional body that investigates and monitors safeguards, inquires into specific complaints and advises on planning and socio-economic development, which distinguishes it from a commission created by ordinary legislation; the owners record its composition and detailed mandate as belonging to the Polity commissions owner and require the cross-link to be stated rather than the material duplicated, and the same routing applies to the Fifth Schedule, the Tribes Advisory Council and the Governor's powers, so an answer here uses the status and routes the institutional detail.

17. **Land alienation and the State laws that address it:** Land alienation is the transfer of tribal land to non-tribals, and the owners record that it is regulated by State-specific tenancy and land-transfer laws applicable in Fifth Schedule areas, naming the Chotanagpur Tenancy Act in Jharkhand and the Andhra Pradesh Scheduled Areas Land Transfer Regulation as examples, and that transfers continue through informal or illegal means despite the legal prohibition because enforcement is the weak link; the analytical consequence is that alienation is not a gap in the law but a gap in its administration, so a recommendation must address record-keeping, restoration proceedings and local enforcement rather than propose a prohibition that already exists.
18. **The case bank and the committee diagnosis:** The owners supply a compact evidence bank for this topic: Samatha anchors the question of transfer of land and mining leases in Scheduled Areas, the Orissa Mining Corporation matter concerning the Niyamgiri hills demonstrates the determination of community and religious forest rights by Gram Sabhas, and the Xaxa Committee is recorded as the diagnostic source on land alienation, displacement and weak self-government; the discipline is the same as elsewhere in the folder, namely that each authority is used for the proposition it decided or examined rather than as a general endorsement of tribal rights, and that a committee report is a diagnosis and not a binding instrument.
19. **Rehabilitation policy and what compensation cannot buy:** The owners record the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 as the architecture that provides for social-impact assessment, compensation and a rehabilitation and resettlement entitlement, together with earlier State and central frameworks, and they attach the analytical limit that cash cannot replace commons, cultural landscapes or autonomy; read with the ministry's own statement that the forest-rights statute in conjunction with that 2013 law protects the tribal population from eviction without rehabilitation and settlement, the argument that follows is that the legal architecture converts displacement from an unconditional act into a conditional one, while the sufficiency of what is offered in exchange remains a separate and contested question.
20. **Heterogeneity discipline and the honest ownership statement:** Two boundaries close this topic. First, tribal communities must not be homogenised: the Scheduled Tribes differ across regions, livelihoods, languages and degrees of forest dependence, the particularly vulnerable groups are a defined sub-category and not a synonym for tribes in general, and the convergence mission designed for those seventy-five communities must never be described as covering all Scheduled Tribes. Second, ownership is stated openly: the audited ledgers route two objective demands to this owner, on the criteria for particularly vulnerable tribal groups and on the nodal ministry for the forest-rights statute, and record the official keys for that period as not held locally, so no option or inferred answer is recorded for either and neither is converted into a solved question; no Mains demand is routed here, the 2025 tribal-development demand is routed to the Indian Society owner and the Scheduled Area objective demands to the Polity owner, so none of them is claimed and none is manufactured.

Scheduled Tribes, PVTGs and Tribal Welfare: CLOSE-OPTION AND ENTITLEMENT TRAPS

- Do not describe the forest-rights statute as a land-titling law, because it recognises individual forest rights, community rights and community forest resource rights as three separate categories.
- Do not omit community forest resource rights, because that category is the governance limb enabling a Gram Sabha to protect, regenerate, conserve and manage a traditionally protected forest.
- Do not describe an individual forest right as transferable, because the title is heritable but not transferable or alienable and is limited to the area under occupation subject to a ceiling of four hectares per nuclear family.
- Do not treat rejection of a claim as authority to evict, because rejection does not erase due-process duties and the 2019 eviction direction was stayed.
- Do not describe Section 4(2) as a general relocation power, because modification of rights in a critical wildlife habitat requires completed rights recognition, a scientific case, a coexistence assessment, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package.
- Do not extend the Scheduled-Areas self-governance law to all rural areas, because it applies only to Scheduled Areas notified under the Fifth Schedule.
- Do not re-teach the Fifth Schedule machinery, the Tribes Advisory Council or the Governor's powers here, because that institutional detail is owned by the Polity owner and is cross-linked.

- Do not describe all Scheduled Tribes as particularly vulnerable tribal groups, because that sub-category is identified by pre-agricultural or low technology, low literacy, a declining or stagnant population and economic backwardness, and seventy-five communities are officially identified.
- Do not describe the convergence mission for those groups as a universal tribal-welfare scheme, because it was launched on 15 November 2023 for the seventy-five identified communities across eighteen States and Union Territories.
- Do not convert a sanctioned-household or dashboard count into proof of completed service delivery, because a figure must state its component and its reporting date.
- Do not merge the ownership of minor forest produce with its marketing, because ownership arises under community rights while aggregation, value addition and market linkage come through the village-enterprise scheme and price support.
- Do not state the residential-school norm loosely, because the recorded norm is one school per block having at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons, or as laid down in ministry criteria.
- Do not call the National Commission for Scheduled Tribes a statutory body, because it exists under Article 338A of the Constitution.
- Do not describe land alienation as a gap in the law, because State tenancy and land-transfer laws in Fifth Schedule areas prohibit it and enforcement is the recorded weak link.
- Do not use the case bank loosely, because Samatha concerns transfer and mining in Scheduled Areas and the Niyamgiri matter concerns Gram Sabha determination of community and religious forest rights.
- Do not treat a committee report as a binding instrument, because the Xaxa Committee is a diagnosis of alienation, displacement and weak self-government.
- Do not treat compensation as equivalent to what is lost, because the owners record that cash cannot replace commons, cultural landscapes or autonomy.
- Do not homogenise tribal communities, because they differ across regions, livelihoods, languages and degrees of forest dependence.
- Do not record or infer an option for either routed objective demand, because the ledger records the official 2018-2023 Prelims keys as not held locally.
- Do not claim the 2025 General Studies Paper I tribal-development demand for this owner, because the audited 2024-2025 Mains routing ledger routes it to the Indian Society owner.

Scheduled Tribes, PVTGs and Tribal Welfare: ANSWER-WRITING SPINE

NAME THE DEPRIVATION OR CLAIM -> IDENTIFY THE RIGHT-HOLDER AND THE DUTY-BEARER
-> SEPARATE THE CONSTITUTIONAL OR STATUTORY ENTITLEMENT FROM THE SCHEME THAT CARRIES IT
-> TRACE ADMINISTRATIVE DELIVERY: IDENTIFICATION, ENROLMENT, ACCESS, QUALITY
-> TEST THE MEASURED OUTCOME AGAINST THE INPUT, NAMING SURVEY, ROUND AND YEAR
-> SEPARATE INCLUSION ERROR FROM EXCLUSION ERROR AND COVERAGE FROM CAPABILITY
-> CLOSE WITH A GRADED VERDICT AND AN EXPLICIT INDICATOR OR STATUS CAVEAT

Scheduled Tribes, PVTGs and Tribal Welfare: DATED-INDICATOR AND STATUS BOUNDARY

One live official page was verified for this topic on 2026-09-02. The Ministry of Tribal Affairs page for the Scheduled Tribes and Other Traditional Forest Dwellers (Recognition of Forest Rights) Act, 2006, read on that date, records that the Act recognises the rights of forest-dwelling tribal communities and other traditional forest dwellers to forest resources on which those communities were dependent for livelihood, habitation and other socio-cultural needs; that forest-management policy in colonial and post-colonial India had not until this enactment recognised the symbiotic relationship of Scheduled Tribes with forests; that the Act encompasses rights of self-cultivation and habitation usually regarded as individual rights, and community rights such as grazing, fishing and access to water bodies in forests, habitat rights for particularly vulnerable tribal groups, traditional seasonal resource access for nomadic and pastoral communities, access to biodiversity, community rights to intellectual property and traditional knowledge, recognition of traditional customary rights and the right to protect, regenerate, conserve or manage any community forest resource for sustainable use; that it provides for allocation of forest land for developmental purposes to meet basic infrastructural needs of the community; that in conjunction with the Right to Fair Compensation and Transparency in

Land Acquisition, Rehabilitation and Settlement Act, 2013 it protects the tribal population from eviction without rehabilitation and settlement; that it enjoins on the Gram Sabha and rights holders the responsibility of conserving biodiversity, wildlife, forests, adjoining catchment areas, water sources and ecologically sensitive areas and of stopping destructive practices affecting those resources or the cultural and natural heritage of the tribals; that the Gram Sabha is a highly empowered body enabling the tribal population to have a decisive say in the determination of local policies and schemes impacting them; and that the stated objectives are to undo the historical injustice occurred to the forest-dwelling communities, to ensure land tenure, livelihood and food security of the forest-dwelling Scheduled Tribes and other traditional forest dwellers, and to strengthen the conservation regime of the forests by including the responsibilities and authority on forest-rights holders for sustainable use, conservation of biodiversity and maintenance of ecological balance. That page also establishes, for the routed objective demand on the nodal ministry, that the Ministry of Tribal Affairs is the ministry that administers and publishes the Act, and no option or answer key is inferred for that demand because the ledger records the official keys as not held locally. Two further official checks were attempted on the same date, namely a ministry page for the vulnerable-group convergence mission and a ministry page for the vulnerable-group category, and both returned a not-found error, while the ministry's landing page returned an assistant interface only, so nothing was read or used from them and no secondary summary, coaching site or news report has been treated as an official source. The package therefore relies on that verified page together with the dated official anchors already carried by the repository owners, each cited with its issuing instrument or launch date: the three recognition categories of the forest-rights statute, with the individual title limited to the area under occupation subject to a ceiling of four hectares per nuclear family and heritable but not transferable or alienable; the Gram Sabha, Sub-Divisional Level Committee and District Level Committee claim chain; the recorded position that rejection of a claim does not justify automatic eviction and that the 2019 eviction direction was stayed; the cumulative safeguards under Section 4(2) for a critical wildlife habitat, namely completed rights recognition, a scientific case, a coexistence assessment, the free informed consent of the Gram Sabha and a secure resettlement and livelihood package; the Panchayats (Extension to the Scheduled Areas) Act, 1996 applying only to Scheduled Areas, with consultation before land acquisition and resettlement, ownership of minor forest produce, money-lending regulation and village-market management; the four identification criteria for particularly vulnerable tribal groups and the officially identified count of seventy-five communities; the convergence mission launched on 15 November 2023 for those seventy-five communities across eighteen States and Union Territories, with the status caution recorded on 21 July 2026 that a sanctioned-household or dashboard count is not proof of completed service delivery; the village-enterprise scheme with Van Dhan Vikas Kendras and minimum-support-price arrangements for minor forest produce; the residential-school norm of one school per block with at least fifty per cent Scheduled Tribe population and at least twenty thousand Scheduled Tribe persons or as per ministry criteria, covering Class VI to Class XII; Article 338A for the National Commission for Scheduled Tribes; the State tenancy and land-transfer laws named as the Chotanagpur Tenancy Act and the Andhra Pradesh Scheduled Areas Land Transfer Regulation; and the recorded authorities Samatha, the Orissa Mining Corporation matter concerning the Niyamgiri hills and the Xaxa Committee diagnosis. No claim, title, rejection, recognition, household, hamlet, school, enrolment, produce, price, sanction, budget or expenditure figure is asserted, no Census, National Family Health Survey, Periodic Labour Force Survey, NITI Aayog or Sustainable Development Goal value is asserted, no legal or constitutional provision is invented or upgraded in status, no interim judicial direction is described as a standing rule, no tribal community is homogenised with any other, and no previous-year question, official answer key or option is asserted or inferred.

COMPLETE TOPIC ASCII MASTER FLOW DIAGRAM

ASCII MASTER FLOW - PANEL 1/12: Two axes and a third

AXIS 1 DISPLACEMENT -> mining and industry, dams and submergence, protected areas, alienation
-> LOSS: land, forest access, livelihood, habitation
AXIS 2 REHABILITATION -> forest-rights recognition, convergence mission, produce, schooling
-> AXIS 3 CANDIDATE A: livelihood and market integration; title is not income
-> AXIS 3 CANDIDATE B: cultural autonomy; resettlement is not identity or self-government
MUST REMEMBER: Scheduled Tribe and PVTG policy must connect land, forest, habitat,...

ASCII MASTER FLOW - PANEL 2/12: Three rights categories

INDIVIDUAL FOREST RIGHTS -> hold and live in forest land for habitation or self-cultivation
LIMITS -> area actually occupied; ceiling of four hectares per nuclear family
TENURE -> heritable but not transferable or alienable
COMMUNITY RIGHTS -> minor forest produce, grazing, water bodies, biodiversity, custom
COMMUNITY FOREST RESOURCE -> Gram Sabha protects, regenerates, conserves and manages

ASCII MASTER FLOW - PANEL 3/12: Ministry statement card

RECOGNISES -> dependence of forest dwellers for livelihood, habitation, socio-cultural needs
INCLUDES -> habitat rights for particularly vulnerable groups; nomadic seasonal access
ALSO -> community intellectual property and traditional knowledge; developmental land use
WITH THE 2013 LAW -> protects against eviction without rehabilitation and settlement
OBJECTIVES -> undo historical injustice; secure tenure and food security; strengthen conservation

ASCII MASTER FLOW - PANEL 4/12: Claim chain

STEP 1 -> Gram Sabha receives claims, verifies them and recommends
STEP 2 -> Sub-Divisional Level Committee examines and verifies the recommendation
STEP 3 -> District Level Committee is the final adjudicating authority
RULES -> specify timelines and the evidence a claimant must produce
DIAGNOSIS -> name the tier at which recognition actually failed

ASCII MASTER FLOW - PANEL 5/12: Rejection is not eviction

LEGAL POSITION -> rejection does not erase due-process duties
NO AUTOMATIC POWER -> rejection is not authority to evict a claimant
2019 EPISODE -> the eviction direction concerning rejected claims was stayed
PRACTICAL POSITION -> high rejection rates still create real eviction risk
RULE -> state the legal power and the practical risk as two separate facts

ASCII MASTER FLOW - PANEL 6/12: Protected-area conditions

CONDITION 1 -> recognition of rights in the area must first be completed
CONDITION 2 -> a scientific case for modification of rights must be made out
CONDITION 3 -> coexistence must be assessed and found not to be possible
CONDITION 4 -> the Gram Sabha must give free informed consent
CONDITION 5 -> a secure resettlement and livelihood package must be in place

ASCII MASTER FLOW - PANEL 7/12: Scheduled-Areas welfare powers

SCOPE -> Scheduled Areas notified under the Fifth Schedule only, not all rural areas
CONSULTATION -> mandatory before land acquisition and before resettlement
OWNERSHIP -> minor forest produce vests with the Gram Sabha
REGULATION -> control over money-lending affecting Scheduled Tribes
MARKETS -> management of village markets; institutional design owned by the Polity owner

ASCII MASTER FLOW - PANEL 8/12: Vulnerable-group criteria

CRITERION 1 -> pre-agricultural or low level of technology
CRITERION 2 -> low level of literacy
CRITERION 3 -> declining or stagnant population
CRITERION 4 -> economic backwardness relative to other tribal groups
COUNT -> seventy-five communities officially identified; a sub-category, not all tribes

ASCII MASTER FLOW - PANEL 9/12: Convergence mission card

LAUNCH -> 15 November 2023, Ministry of Tribal Affairs
TARGET -> the seventy-five identified communities across eighteen States and Union Territories
HOUSING AND INFRASTRUCTURE -> rural housing convergence; road, electricity and water
HEALTH AND EDUCATION -> mobile medical units, Anganwadi outreach, schools and hostels
CAUTION -> a sanction or dashboard count is not proof of completed delivery

ASCII MASTER FLOW - PANEL 10/12: Produce to income

COMMUNITY RIGHT -> ownership of minor forest produce under the forest-rights statute
-> VILLAGE ENTERPRISE UNIT: aggregation, processing and packaging at village level
-> PRICE SUPPORT: minimum-support-price arrangement for minor forest produce
-> MARKET LINKAGE through the national tribal-produce marketing agency
LIMIT -> these village units are not universal, so benefits accrue unevenly
CLOSE DISTINCTION: Scheduled Tribe, PVTG, forest dweller and indigenous people are not...

ASCII MASTER FLOW - PANEL 11/12: Education and institutions

RESIDENTIAL SCHOOLS -> Class VI to Class XII under the Ministry of Tribal Affairs
NORM -> one school per block with at least fifty per cent Scheduled Tribe population
AND -> at least twenty thousand Scheduled Tribe persons, or as per ministry criteria
COMMISSION -> National Commission for Scheduled Tribes under Article 338A
ROUTING -> composition and mandate detail belong to the Polity commissions owner
EVIDENCE LIMIT: AUTHORITY / IMPLEMENTATION: Use Gram Sabha, habitat/community forest...

ASCII MASTER FLOW - PANEL 12/12: Alienation and authorities

PROHIBITION EXISTS -> State tenancy and land-transfer laws in Fifth Schedule areas
EXAMPLES -> Chotanagpur Tenancy Act; Andhra Pradesh Scheduled Areas Land Transfer Regulation
FAILURE -> informal and illegal transfers persist; enforcement is the weak link
AUTHORITIES -> Samatha on transfer and mining; Niyamgiri on Gram Sabha determination
DIAGNOSIS -> the Xaxa Committee on alienation, displacement and weak self-government
