Question: What caused the Cold War? Answer in about 150 words.

Model thesis: A postwar security dilemma interacted with ideological hostility, atomic asymmetry and wartime mistrust; power created stakes and ideology made defensive acts appear aggressive.

Claim -> named evidence -> analysis -> qualification:

- Soviet pursuit of an eastern European security belt and Western fear of expansion made each side read its own actions as defensive and the other's as aggressive.
- Capitalist-communist conflict shaped interpretation, while the US atomic monopoly, second-front delay and occupation disputes deepened mistrust.
- Wartime agreement coexisted with serious disputes over Poland, Germany, eastern Europe and the meaning of free elections.

Qualified conclusion: A postwar security dilemma interacted with ideological hostility, atomic asymmetry and wartime mistrust; power created stakes and ideology made defensive acts appear aggressive.

Demand decoding: The directive **answer** requires a direct position on “What caused the Cold War? Answer in about 150 words.”, every clause and time boundary, chronological-causal organisation, named evidence, a counter-position and a qualified global verdict.

Detailed examiner-grade model status: The solved content above is the executable answer base. Preserve its thesis, named chronology, spatial evidence, causal mechanism, counter-position and qualification rather than replacing it with a generic narrative.

Executable exam-length answer / compression plan: For a 10-mark answer, open with a two-sentence thesis and a spatial-temporal frame; organise three named events, treaties, actors, regions, institutions or attributed interpretations as claim -> evidence -> analysis -> qualification; reserve the final lines for a graded conclusion.

Why this earns marks: The answer obeys the directive, distinguishes structure, trigger and outcome, connects evidence to mechanism, includes non-European agency and avoids teleology, presentism and monocausal explanation.

How to improve this answer: For “What caused the Cold War? Answer in about 150 words.”, replace the weakest generalisation with one additional named treaty, regional case, primary record or attributed scholarly position and state what that evidence cannot prove.
